SOME OF THE CHIEF CONTRIBUTORS

TO APPLETONS' CYCLOPÆDIA OF AMERICAN BIOGRAPHY.

Adams, Charles Kendall,
President of Cornell University.

Agassiz, Alexander,
Author and Professor.

Allibone, S. Austin,
Author "Dictionary of Authors."

Amory, Thomas C.,
Author "Life of General Sullivan," etc.

Bancroft, George,
Author "History of the United States."

Barrett, Lawrence,
Author "Life of Edwin Forrest."

Bayard, Thomas F.,
Secretary of State.

Bigelow, John,
Author "Life of Franklin," etc.

Boker, George H.,
Poet, late Minister to Russia.

Botta, Mrs. Vincenzo,
Author and Poet.

Bradley, Joseph P.,
Justice United States Supreme Court.

Brooks, Phillips,
Author "Sermons in English Churches."

Carter, Franklin,
President of Williams College.

Champlin, John Denison,
Author "Cyclopedia of Painters and Paintings."

Chandler, William E.,
Ex-Secretary of the Navy.

Clarke, James Freeman,
Author "Ten Great Religions," etc.

Cooper, Miss Susan Fenimore,
Author "Rural Hours," etc.

Conway, Moncure D.,
Miscellaneous Writer.

Coppée, Henry,
Professor in Lehigh University, Pa.

Coxe, Arthur Cleveland,
P. E. Bishop of Western New York.

Courtenay, William A.,
Mayor of Charleston, S. C.

Cullum, Gen. George W.,
Author "Register of West Point Graduates," etc.

Curry, Daniel,
Author and Editor.

Curtis, George Ticknor,
Author "Life of James Buchanan," etc.

Curtis, George William,
Author and Editor.

Custer, Mrs. Elizabeth B.,
Author "Boots and Saddles."

Daniel, John W.,
United States Senator from Virginia.

De Costa, Benjamin F.,
Historical Writer.

De Lancey, Edward F.,
Ex-President Genealogical and Biographical Society.

Didier, Eugene L.,
Author "Life of Edgar Allan Poe."

Dix, Morgan,
Rector of Trinity Church, New York.

Doane, William C.,
P. E. Bishop of Albany.

Drake, Samuel Adams,
Author "Historic Personages of Boston," etc.

Draper, Lyman C.,
Secretary of Wisconsin Historical Society.

Dupont, Col. Henry A.,
Of Delaware, late U. S. Army.

Fiske, John,
Author and Professor.

Frothingham, Octavius B.,
Author "Life of George Ripley."

Gayarré, C. E. A.,
Author "History of Louisiana."

Gerry, Elbridge T.,
Member of New York Bar.

Gilman, Daniel C.,
President of Johns Hopkins University.

Goodwin, Daniel, Jr.,
Member of Illinois Bar.

Greely, Gen. A. W., U. S. A.,
Author "Three Years of Arctic Service."

Green, William Mercer,
Late P. E. Bishop of Mississippi.

Greene, Capt. Francis Vinton,
United States Engineer Corps.

Hale, Edward Everett,
Author "Franklin in France," etc.

Hay, Col. John,
Author "Life of Lincoln," etc.

Henry, William Wirt,
Of the Virginia Historical Society.

Higginson, Col. T. W.,
Author "History of the United States," etc.

Hilliard, Henry W.,
Late Minister to Brazil.

Hoppin, Professor James M.,
Of Yale College.

Howe, Mrs. Julia Ward,
Author "Later Lyrics," etc.

Huntington, William R.,
Rector of Grace Church, New York.

Jay, John,
Late Minister to Austria.

Johnson, Gen. Bradley T.,
Member of Maryland Bar.

Johnson, Rossiter,
Author "History of the War of 1812," etc.

Johnston, William Preston,
President of Tulane University.

Jones, Horatio Gates,
Vice-President of Pennsylvania Historical Society.

Jones, J. William,
Secretary of Southern Historical Society.

Jones, William Alfred,
Author "Character and Criticism," etc.

Kobbé, Gustav,
Musical Editor of New York "Mail and Express."

Lathrop, George Parsons,
Author "A Study of Hawthorne," etc.

Lincoln, Robert T.,
Ex-Secretary of War.

Lodge, Henry Cabot,
Author "Life of Hamilton."

Long, Col. Charles Chaillé,
Late of the Egyptian Army.

Lowell, James Russell,
Late Minister at Court of St. James.

MacVeagh, Wayne,
Ex-Attorney-General, U. S.

Mathews, William,
Author "Orators and Oratory," etc.

McMaster, John Bach,
Author "History of the People of the United States."

Mitchell, Donald G.,
Author "Reveries of a Bachelor," etc.

Norton, Charles Eliot,
Professor in Harvard University.

O'Neal, Edward A.,
Governor of Alabama.

Parker, Cortlandt,
Member of New Jersey Bar.

Parkman, Francis,
Author "Frontenac," "French in Canada," etc.

Phelan, James, M. C.,
Editor Memphis "Avalanche," Tenn.

Phelps, William Walter,
Member of Congress from New Jersey.

Pierrepont, Edwards,
Ex-Attorney-General United States.

Porter, David D.,
Admiral United States Navy.

Porter, Gen. Horace,
Late of Gen. Grant's Staff.

Preston, Mrs. Margaret J.,
Author and Poet.

Puron, Dr. Juan G.,
Spanish Author and Editor.

Read, Gen. J. Meredith,
Late Minister to Greece.

Reid, Whitelaw,
Editor of New York "Tribune."

Ricord, Judge Frederick W.,
New Jersey Historical Society.

Robinson, Ezekiel G.,
President of Brown University.

Romero, Mattias,
Mexican Minister to the United States.

Sanborn, Miss Kate,
Miscellaneous Writer.

Schurz, Carl,
Ex-Secretary of the Interior.

Shea, John Gilmary,
Author and Editor.

Sherman, William T.,
Late General of United States Army.

Smith, Charles Emory,
Editor Philadelphia "Press."

Spencer, Jesse Ames,
Author and Professor.

Stedman, Edmund C.,
Author "Poets of America," etc.

Stiles, Henry R., M. D.,
Author "History of Brooklyn, N. Y."

Stoddard, Richard Henry,
Author "Songs of Summer," etc.

Stone, William L.,
Author "Life of Red Jacket," etc.

Strong, William,
Ex-Justice United States Supreme Court.

Stryker, William S.,
Adjutant-General of New Jersey.

Tucker, J. Randolph,
Member of Congress from Virginia.

Waite, Morrison R.,
Chief Justice United States Supreme Court.

Warner, Charles Dudley,
Author and Editor.

Washburne, Elihu B.,
Late Minister to France.

Welling, James C.,
President of Columbian University.

Whitman, Walt,
Author "Leaves of Grass," etc.

Wilson, Gen. Jas. Grant,
President Genealogical and Biographical Society.

Winter, William,
Poet and Theatrical Critic.

Winthrop, Robert C.,
Ex-United States Senator.

To the above list other names will be added as the work progresses.

Among the Contributors to the ***second volume*** *of "Appletons' Cyclopædia of American Biography" are the following:*

S. Austin Allibone, LL. D.,
Author of "Dictionary of Authors."
EVERETT, ALEXANDER H.,
EVERETT, EDWARD.

Gen. Christopher C. Andrews,
Member of the Minnesota Bar.
GILFILLAN, JAMES,
GOODRICH, AARON.

Lawrence Barrett.
FORREST, EDWIN.

Marcus Benjamin,
Fellow of the Chemical Society.
DRAPER, JOHN WILLIAM,
GIBBS, GEORGE,
and other articles.

Rev. Beverley R. Betts,
Editor "New York Genealogical Record."
EIGENBRODT FAMILY,
GLASS, FRANCIS.

Arthur E. Bostwick, Ph. D.
EMMET, THOMAS ADDIS,
GIRARD, STEPHEN,
and other articles.

James C. Brogan.
ARTICLES ON ROMAN CATHOLIC CLERGYMEN.

Mrs. Isa Carrington Cabell.
FLOYD, JOHN BUCHANAN,
FRIES, JOHN,
and other articles.

John D. Champlin, Jr.,
Author of "Cyclopædia of Painters and Paintings."
ARTICLES ON AMERICAN PAINTERS.

William E. Chandler,
Ex-Secretary of the Navy.
GILMORE, JOSEPH A.

Titus M. Coan, M. D.,
Author.
ARTICLES ON AMERICAN MISSIONARIES.

Moncure D. Conway,
Author.
DABNEY, VIRGINIUS,
DANIEL, JOHN MONCURE.

GAINES, EDMUND PENDLETON,
and other articles.

Robert C. Winthrop,
Ex-U. S. Senator from Massachusetts.
GRANGER, FRANCIS,
GRANGER, GIDEON.

APPLETONS'

CYCLOPÆDIA OF AMERICAN BIOGRAPHY.

CRANE, Anne Moncure (Seemüller), author, b. in Baltimore, 7 Jan., 1838; d. in Stuttgart, Germany, 10 Dec., 1872. In 1869 she married August Seemüller, of New York, and in 1871 went to Germany, hoping to derive benefit from the medicinal waters there, but did not live to return. Her first novel, "Emily Chester" (Boston, 1864), was anonymous. She subsequently published "Opportunity" (1867), and "Reginald Archer" (1871). She wrote for periodicals, and a collection of her miscellaneous essays was published in 1873.

CRANE, Bruce, painter, b. in New York in 1857. He studied under A. H. Wyant in New York, where he first exhibited in the National academy in 1879. His studio is at Summit, N. J. His principal works are "Old Mill-Pond on Long Island" (1879); "On Shrewsbury River," "After the Rain" (1880); "Moor in Nantucket," "Inlet on the Jersey Shore" (1881); "Suburban Road at Easthampton," "Blossom Time" (1882); "Winter" (1883); "The Waning Year," "Indian Summer" (1885); "Land Near the Sea," "November Woods," "Summer" (1886).

CRANE, Ichabod B., soldier, b. in New Jersey; d. in Port Richmond, Staten Island, N. Y., 5 Oct., 1857. He was appointed second lieutenant of marines in January, 1809; captain of 3d artillery in April, 1812; brevet major in November, 1813; major in the 4th artillery in September, 1825; lieutenant-colonel in 2d artillery, 3 Nov., 1832; colonel in 1st artillery, 27 June, 1843; and governor of the Military asylum at Washington in May, 1851, in which latter capacity he acted till November, 1853.—His son, **Charles Henry,** surgeon-general, U. S. A., b. in Newport, R. I., 19 July, 1825; d. in Washington, D. C., 10 Oct., 1883. He was graduated at Yale in 1844, and studied medicine at Harvard medical school. In 1847 he passed the examination as acting assistant surgeon, and was at once ordered to Mexico, and, after attaining the full grade of assistant surgeon, served with the army of invasion till July, 1848. During the ten years that followed he was stationed in almost every state and territory of the Union, and was repeatedly in the field with expeditionary forces against the Indians, notably that against the Rogue river tribe in 1856. He was promoted surgeon, 21 May, 1861, and in February, 1862, was assigned to duty as medical director, Department of Key West. On 30 June he was appointed medical director, Department of the South. In September, 1863, he was placed on duty in the surgeon-general's office in Washington, and became assistant surgeon-general, with the rank of colonel, 28 July, 1866. On the retirement of Surg.-Gen. Barnes, 3 July, 1882, he became surgeon-general of the U. S. army. He received brevets to include the rank of brigadier-general in the regular service at the close of the civil war. One of his most noteworthy characteristics was the facility with which he managed the complicated routine of his office, and the good judgment that he brought to bear in reconciling the often conflicting interests of the army medical corps when it was at its numerical maximum during the civil war.

CRANE, Jonathan Townley, clergyman, b. in Connecticut Farms, near Elizabeth, N. J., 18 June, 1819; d. in Port Jervis, N. Y., 16 Feb., 1880. He was graduated at Princeton in 1843, in 1844 was licensed to preach, and was admitted to the New Jersey annual conference of the Methodist Episcopal church in 1845. In 1846 he was stationed as pastor at Hope, Warren co., N. J., and in 1847 at Belvidere in the same state. In 1848–'9 he preached at Orange, N. J., and in June, 1849, was elected president of the Conference seminary at Pennington, N. J., which office he resigned in 1858 to assume the pastorate of Trinity church, Jersey City. In 1868–'72 he was presiding elder of the Newark, N. J., district. Dr. Crane was a delegate to the general conferences of 1860, 1864, 1868, and 1872. He was an able preacher, contributed largely to the periodical literature of his church, and published "Essay on Dancing" (1848); "The Right Way, or Practical Lectures on the Decalogue" (1853); "Popular Amusements" (1869); "Arts of Intoxication" (1870); "Holiness the Birthright of all God's Children" (1874); and "Methodism and its Methods" (1875).

CRANE, William, merchant, b. in Newark, N. J., 6 May, 1790; d. in Baltimore, Md., 28 Sept., 1866. In Richmond, Va., where he resided from 1811 till 1834, he was distinguished for his zeal in promoting the religious welfare of the colored people. He was the founder of the Richmond African Baptist missionary society which sent out Lott Cary to Liberia, and he taught the first school for blacks in Richmond, and was one of the originators of Richmond college, giving to it $1,000. His benefactions to other religious objects were large. —His son, **William Carey,** clergyman, b. in Richmond, Va., 17 March, 1816; d. in Independence, Texas, 27 Feb., 1885, was graduated at Columbian college and at Hamilton theological seminary. He was ordained in 1838 and was pastor of a Baptist

church in Montgomery, Ala., from 1839 till 1842, and afterward pastor of various other churches in Mississippi and Texas. He has been president of Mississippi female college, of Semple Broadus college, of Mount Lebanon college, and of Baylor university, Independence, Texas, to which he was called in 1863, retaining the place till his death. Upon the removal, in 1885, of the names of Baylor university and Baylor female college to Waco and Belton, respectively, the property, buildings, etc., were left at Independence, and were thenceforth called "Crane college" in honor of Dr. Crane. He was regarded as one of the ablest and most scholarly divines of his denomination. He was the author of "Literary Discourses," a "Life of Sam Houston," and other works.

CRANE, William Montgomery, naval officer, b. in Elizabethtown, N. J., 1 Feb., 1776; d. in Washington, 18 March, 1846. He was a son of Gen. William Crane, an officer in the Revolutionary army, who was wounded at Quebec, and died in 1814. William Montgomery entered the navy as a midshipman in 1799, became lieutenant in 1803, commander in 1813, and captain, 22 Nov., 1814. While in command of the brig "Vixen" he distinguished himself in the attack on Tripoli. He was in the "Chesapeake" when she was attacked by the "Leopard." In July, 1812, while in command of the brig "Nautilus," he was captured by the frigate "Southampton," and, on being exchanged, was ordered to the lakes, where, in command of the "Madison" and "Pike," in Chauncey's squadron, he served until the end of the war. In 1827, in the flag-ship "Delaware," he commanded the Mediterranean squadron, acting as joint commissioner with Mr. Offley, U. S. consul at Smyrna, to open negotiations with the Ottoman government. He was appointed navy commissioner in 1841, and in 1842 chief of the bureau of ordnance and hydrography. He died by his own hand.

CRANFIELD, Edward, governor of New Hampshire, d. in England in 1704. He was selected by Robert Mason to become governor of New Hampshire in 1682, and gave up lucrative employment in England with hopes of bettering his fortune. In the administration of his office he was exceedingly arbitrary, and in his greed for money he attempted to tax the people without their consent. This action was strongly resented, and complaints referred to the board of trade were decided against him. Associations were formed for mutual support in resisting the collection of illegal taxes. At Exeter, the collector was driven off with clubs, and farmers' wives threatened to scald the officer if he should attempt to attach property in the house. Gov. Cranfield forbade the usual exercise of church discipline, and, in his efforts to intimidate the clergy, prosecuted, condemned, and imprisoned the Rev. Joshua Moody. Religious worship was almost entirely broken up in the colony. In 1685 he returned to England, and afterward became collector of Barbadoes.

CRANSTON, Henry Young, lawyer, b. in Newport, R. I., 9 Oct., 1789; d. there, 12 Feb., 1864. He received a limited education, and after following a trade, studied law, and in 1809 was admitted to the bar. From 1818 till 1833 he was clerk of the court of common pleas, and he was a member of the state conventions held for framing and improving the constitution of Rhode Island. He was a member of the state legislature from 1827 till 1843, and was repeatedly elected its presiding officer. Subsequently he was sent to congress and served from 4 Dec., 1843, till 3 March, 1847, after which he was again a member of the state legislature and for three years its speaker. He retired from public life in 1854, but continued his residence in Newport until his death.—His brother, **Robert Bennie,** b. in Newport, R. I., 14 Jan., 1791; d. there, 27 Jan., 1873, received a public-school education and later was employed in the collection of internal revenue. For a time he was sheriff of Newport, and then was elected as a whig to congress, serving from 4 Sept., 1837, till 3 March, 1843. He was a banker for several years, was postmaster, and a member of the state legislature, serving for one term as speaker. Subsequently he was sent to congress as a "law-and-order whig," and served from 6 Dec., 1847, till 3 March, 1849. Later he was elected mayor of Newport, but declined the office. He bequeathed $75,000 to those poor of Newport "who are too honest to steal and too proud to beg."

CRANSTON, John, president of Rhode Island, d. 12 March, 1680. He appears to have had some knowledge of law, and was for many years attorney-general of the colony, first holding this office under Nicholas Easton in 1654. In 1672 he became deputy-governor, and continued in that capacity until his election as governor in 1678, in which office he remained until his death. During King Philip's war he was selected to command all the militia of the colony, and he was the first that ever held the rank of major-general in the colony.—His son, **Samuel,** president of Rhode Island, d. in 1727. He became governor in 1698, and was thirty times successively chosen to that place, holding the office until his death. Gov. Cranston held his place probably longer than any other man that has ever been subjected to the test of an annual election. He also held the highest military office that it was possible to occupy in the colony, and his great firmness in times of unexampled trial is said to have been the cause of his great popularity and successful administrations.

CRAPO, Henry H., governor of Michigan, b. in Dartmouth, Mass., 24 May, 1804; d. in Flint, Mich., 23 July, 1869. He early removed to New Bedford, where he resided until 1857, when he settled in Michigan. For many years he was extensively engaged in the manufacture and sale of lumber, and also held important political offices. He was elected mayor of Flint, subsequently served in the state senate, and was twice chosen governor of the state, holding that office from 1864 till 1868. During the civil war he rendered important services to the cause of the Union.

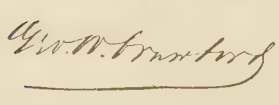
CRAVEN, Charles, colonist, d. in 1754. He was secretary of the proprietors of South Carolina, and governor of the colony from 1712 till 1716. During 1712 he was ordered to sound Port Royal river, and it is supposed that he then founded Beaufort. Three years later all of the Indians from Cape Fear to St. Mary's river combined under the leadership of the Yemassees for the purpose of destroying the colony on Ashley river. Gov. Craven at once proclaimed martial law, laid an embargo on all ships to prevent the departure of men or provisions, and at the head of 1,200 men, part of whom were faithful blacks, met the Indians in a series of desperate encounters and finally drove them beyond the Savannah.

CRAVEN, Thomas Tingey, naval officer, b. in Washington, D. C., 30 Dec., 1808. He was the oldest son of Tunis Craven, of the U. S. navy, and his wife, Hannah Tingey, daughter of Com. Thomas Tingey, also of the U. S. navy. Young Craven attended school in Portsmouth, N. H., until in 1822, when he entered the navy as a midshipman, and from 1823 till 1828 served in the Pacific squadron

on the "United States" and on the "Peacock." In 1828 he joined the "Erie," of the West India squadron, as sailing-master, and took part in the capture of the pirate "Federal." After being commissioned lieutenant in 1830, he spent three years in cruising on the "Boxer," and in 1835–'6 was attached to the receiving-ship at New York, after which he joined the "John Adams." In 1838 he commanded the "Vincennes," Capt. Wilkes's flag-ship in the antarctic exploring expedition. He then served on the "Boxer," "Fulton," "Monroe," "Macedonia," and "Porpoise," principally in the African squadron, after which, during 1846, he was attached to the naval rendezvous in New York. He then served on the "Ohio," in the Pacific squadron, and on the "Independence," in the Mediterranean squadron, returning home in January, 1850. In the following July he was made commandant of midshipmen in the U. S. naval academy in Annapolis, becoming commander in December, 1852, and remaining at the academy until June, 1855. After commanding the "Congress," of the Mediterranean squadron, for several years, he was ordered to resume his post at Annapolis. In October, 1860, he was detached from this place, and, after a short time spent in recruiting-service in Portland, Me., was commissioned captain in June, 1861, and assigned to the command of the Potomac flotilla. In the autumn of 1861 he was placed in command of the "Brooklyn," participating in the capture of New Orleans and subsequent operations on the Mississippi. He was made commodore in July, 1862, and during the subsequent years of the civil war commanded the "Niagara," on the coast of England and France. In September, 1866, he was placed in command of the navy-yard at Mare island, Cal., where he received, in October of the same year, his commission as rear-admiral, and continued there until August, 1868, when he assumed command of the Pacific squadron. In December, 1869, he was retired, but continued on duty in San Francisco until that office was dispensed with. He now (1886) resides at Kittery Point, Me. —His brother, **Alfred Wingate,** civil engineer, b. in Washington, D. C., 20 Oct., 1810; d. in Chiswick, England, 29 March, 1879, was graduated at Columbia in 1829, studied law and then civil engineering. In 1837 he was associated with Gen. George S. Greene on important professional work near Charleston and elsewhere. He was a successful railroad engineer and manager, and rapidly rose to the first rank in his profession. Mr. Craven became engineer commissioner to the Croton water board of New York on its organization in 1849, and continued in that capacity until 1868. Among the many works projected and carried out during these years under his supervision were the building of the large reservoir in Central park, the enlargement of pipes across High Bridge, and the construction of the reservoir in Boyd's Corners, Putnam co. He also caused to be made an accurate survey of Croton valley, with a view of ascertaining its capacity for furnishing an adequate water-supply, and was largely instrumental in securing the passage of the first law establishing a general sewerage system for New York city. Later he was associated with Allan Campbell as a commissioner in the work of building the underground railway extending along 4th avenue from the Grand central depot to Harlem river. He was one of the original members of the American society of civil engineers, a director for many years, and its president from November, 1869, till November, 1871.—Another brother, **Tunis Augustus Macdonough,** naval officer, b. in Portsmouth, N. H., 11 Jan., 1813; d. in Mobile bay, Ala., 5 Aug., 1864. He entered the U. S. navy as a midshipman in February, 1829, and until 1837 served in different vessels, after which he was at his own request attached to the coast survey. In 1841 he was made a lieutenant and served in the "Falmouth" until 1843, when he was transferred to the "North Carolina." Three years later he was connected with the Pacific squadron as lieutenant of the "Dale," and participated in the conquest of California. In 1849 he returned east, and for some time afterward was associated in the work of the coast-survey, having command of various vessels attached to this bureau. He commanded the Atrato expedition which left New York in October, 1857, for the purpose of surveying the isthmus of Darien by way of the Atrato river for a ship-canal. Later he commanded the "Mohawk," stationed off the coast of Cuba to intercept slavers. On one occasion he captured a brig containing 500 negroes, who were afterward sent to Africa and liberated. He also saved the crew of a Spanish merchant vessel, for which he was presented by the queen of Spain with a gold medal and a diploma. About the same time the New York board of underwriters presented Mrs. Craven with a silver service of plate for the efficient services rendered to merchant vessels while at sea by her husband. At the beginning of the civil war he was placed in command of the "Crusader," and was instrumental in preserving for the Union the fortress at Key West. In April, 1861, he was made a commander, and ordered to the charge of the "Tuscarora," in search of Confederate cruisers. While so occupied he succeeded in blockading the "Sumter," so that, after it had been kept a close prisoner for two months in Gibraltar, the officers and crew deserted her. On his return home, he was given command of the monitor "Tecumseh," and directed to join the James river flotilla. A few months later he was attached to Admiral Farragut's squadron, then collected for the attack on Mobile. In the subsequent battle the "Tecumseh" was given the post of honor, and on the morning of 5 Aug., leading the fleet, she fired the first shot at 6.47 A. M. The general orders to the various commanders directed them, in order to avoid the line of torpedoes at the entrance of the bay, to pass eastward of a certain red buoy and directly under the guns of Fort Morgan. The Confederate ram "Tennessee" was on the port-beam of the "Tecumseh," inside of the line of torpedoes, and Craven, in his eagerness to engage the ram, passed to the west of the buoy, when suddenly the monitor reeled and sank with almost every one on board, destroyed by a torpedo. As the "Tecumseh" was going down, Com. Craven and his pilot, John Collins, met at the foot of the ladder leading to the top of the turret. Craven, knowing it was through no fault of the pilot, but by his own command, that the fatal change in her course had been made, stepped back, saying: "After you, pilot." There was no "after" for him. When the pilot reached the top round, the vessel seemed "to drop from

T. Aug. Craven

under him," and no one followed. A buoy that swings to and fro with the ebb and flow of the tide marks the scene of Com. Craven's bravery and of his death, and beneath, only a few fathoms deep, lies the "Tecumseh." He has been called the "Sydney" of the American navy.—**Charles Henderson,** naval officer, son of Thomas Tingey, b. in Portland, Me., 30 Nov., 1843, was graduated at the U. S. naval academy in 1863, promoted to ensign, and served in that capacity in the South Atlantic blockading squadron until 1865. He participated in many of the engagements in the vicinity of Charleston and Savannah during 1863–'4, and was attached to the "Housatonic" when she was blown up in February, 1864. During 1865–'7 he served in the European squadron on the "Colorado," and was commissioned lieutenant-commander in November, 1866. He then served on the "Wampanoag," and was made lieutenant-commander in March, 1868, after which he was attached to the Pacific squadron. Subsequently he served on shore duty at Mare island, Cal. In 1874 he became executive officer of the "Kearsarge," of the Pacific squadron, and later of the "Monocacy." He was detached from duty in June, 1879, broken down by over-work, and was retired in May, 1881.—**Henry Smith,** another son of Thomas Tingey, civil engineer, b. in Bound Brook, N. J., 14 Oct., 1845, studied in St. John's college, Annapolis, Md., and later in the scientific department of Hobart, but was not graduated, as he entered the army shortly before the close of the civil war. He obtained employment on the Croton works in New York city, but in 1866 went to California and became secretary, with the rank of lieutenant, to his father, then commanding the North Pacific squadron, and in 1869 was appointed assistant civil engineer of the navy-yard at Mare island. This office he resigned in 1872, and then practised his profession in San Francisco until 1879. He was commissioned civil engineer in the U. S. navy during the latter year, and ordered to Chester, Pa., where he was occupied with the construction of the iron floating dock then building for the Pensacola navy-yard. Later he was ordered to the navy-yard at League island, Pa., and in July, 1881, was sent to the navy-yard at Portsmouth, N. H., and in September, 1882, assigned to special duty at Coaster's harbor training-station. He was granted leave of absence in 1883, and took charge of the construction of the new Croton aqueduct in New York, up to March, 1886. He is the inventor of an automatic trip for mining-buckets (1876), and of a tunnelling machine (1883). Mr. Craven was given the honorary degree of B. S. by Hobart in 1878, and is a member of the American society of civil engineers.



CRAWFORD, George Washington, lawyer, b. in Columbia county, Ga., 22 Dec., 1798. He was graduated at Princeton in 1820, and after studying law with Richard Henry Wilde in Augusta, was admitted to the bar in 1822. He was appointed attorney-general of Georgia in 1827, and continued in that office until 1831. From 1837 till 1842 was a member of the legislature from Richmond county, with the exception of one year. He then was elected to congress as a whig to fill the vacancy caused by the death of Richard W. Habersham, and served from 7 Feb., 1843, till 3 March of the same year, during which he was also elected governor of Georgia, and re-elected in 1845. Later he held the office of secretary of war in President Taylor's cabinet, serving from 7 March, 1849, till 15 Aug., 1850. On the death of the president Mr. Crawford resigned his portfolio, and subsequently spent some time in travel abroad, after which he returned to Georgia, where he has since resided in retirement at his home in Richmond county.

CRAWFORD, Martin Jenkins, lawyer, b. in Jasper county, Ga., 17 March, 1820; d. in Columbus, Ga., 22 July, 1883. He was educated at Mercer university, and, after studying law, was admitted to the bar in 1839. For a while he followed his profession, but the death of his father caused him to give his attention to planting. From 1845 till 1847 he was a member of the state legislature, and in 1850 was a delegate to the southern convention held in Nashville during May. In 1853 he was made judge of the superior courts of the Chattahoochee circuit, and held that office until his election to congress as a democrat, where he served from 3 Dec., 1855, until his withdrawal on 23 Jan., 1861. He was then elected by the convention of Georgia a delegate to the Confederate provisional congress, serving from January, 1861, till February, 1862, and subsequently was appointed one of the three commissioners sent to treat with the authorities in Washington for a peaceful separation of the states. During 1862 he raised the 3d Georgia cavalry, and after a year's service was transferred to the staff of Gen. Howell Cobb, with whom he continued until the close of the war. He then resumed the practice of his profession, and in 1875 was appointed judge of the superior courts of the Chattahoochee circuit, to which office in 1877 he was reappointed for a term of eight years. In 1880 he was appointed associate justice of the supreme court of Georgia, to fill the unexpired term of Logan E. Bleckley, on the completion of which he became his own successor by appointment from the state legislature.

CRAWFORD, Samuel Wylie, soldier, b. in Franklin county, Pa., 8 Nov., 1829. He was graduated at the University of Pennsylvania in 1846, after which he studied medicine, and in 1851 became an assistant surgeon in the U. S. army. He served in various forts in the southwest, principally in Texas, until 1860, when he was stationed at Fort Moultrie and later at Fort Sumter, being one of the garrison of that fort at the beginning of the civil war, and having command of a battery during the bombardment. From that time till August, 1861, he was at Fort Columbus, New York harbor. He then vacated his commission of assistant surgeon by accepting the appointment of major in the 13th infantry, and in 1862 was commissioned a brigadier-general of volunteers. Gen. Crawford served with distinction in the Shenandoah campaign, being present at the battles of Winchester and Cedar Mountain, losing one half of his brigade in the last-named action. At the battle of Antietam he succeeded Gen. Mansfield in command of his division, and was severely wounded. Early in 1863 he was placed in command of the Pennsylvania reserves, then stationed about Washington, and with these troops, forming the 3d division of the 5th army

corps, he was engaged at Gettysburg, serving with great bravery. Subsequently he participated in all the operations of the Army of the Potomac until the close of the war. He was brevetted successively from colonel, in 1863, up to major-general in 1865, for conspicuous gallantry in the battles of the Wilderness, Spottsylvania, Petersburg, Five Forks, and other engagements. Gen. Crawford was mustered out of the volunteer service in 1866, and then served with his regiment in the south, becoming colonel of the 16th infantry in February, 1869, and later of the 2d infantry. He continued in the service until February, 1873, when, owing to disability resulting from wounds, he was retired with the rank of brigadier-general.

CRAWFORD, Thomas, sculptor, b. in New York city, 22 March, 1814; d. in London, 16 Oct., 1857. He was of Irish parentage. Of his early years we only know that he was at school with Page, the artist, and that his proficiency in his studies was hindered by the exuberance of his fancy, which took form in drawings and carvings. His love of art led him, at the age of nineteen, to enter the studios of Frazer and Launitz, artists and artificers in marble, well known to the New York of that day. In 1834 he went abroad for the promotion of artistic studies, and took up his residence in Rome for life, as it proved. The celebrated sculptor, Thorwaldsen, became his master and friend. Under this fortunate guidance he devoted himself to the study both of the antique and of living models. His first ideal work was a group of "Orpheus and Cerberus," executed in 1839, and purchased, some years later, for the Boston athenæum. This was followed by a succession of groups, single figures, and bas-reliefs, whose rapid production bore witness to the fertility as well as the versatility of his genius. Among these are "Adam and Eve" and a bust of Josiah Quincy, now in the Boston athenæum; "Hebe and Ganymede," presented to the Boston art museum by Mr. C. C. Perkins, and a bronze statue of Beethoven, presented by the same gentleman to the Boston music hall; "Babes in the Wood," in the Lenox library; "Mercury and Psyche"; "Flora," now in the gallery of the late Mrs. A. T. Stewart; an Indian girl; "Dancing Jenny," modelled from his own daughter; and a statue of James Otis, which adorns the chapel at Mount Auburn, Cambridge. In 1849, while on a visit to this country, he received from the state of Virginia an order for a monument to be erected in Richmond. He immediately returned to Rome and began the work, of which the design was a star of five rays, each one of these bearing a statue of some historic Virginian, Patrick Henry and Thomas Jefferson among the number. The work is surmounted by a plinth, on which stands an equestrian statue of Washington. These statues, modelled in Rome, were cast at the celebrated Munich foundry, where, as elsewhere, their merit was much appreciated. Mr. Crawford's most important works after these were ordered by the national government for the capitol at Washington. First among these was a marble pediment, bearing life-size figures symbolical of the progress of American civilization; next in order came a bronze figure of Liberty, which surmounts the dome; and last of these, and of his life-work, was a bronze dove on which are modelled various scenes in the public life of Washington. Prominent among Mr. Crawford's works was also his statue of an Indian chief, much admired by the English sculptor Gibson, who proposed that a bronze copy of it should be retained in Rome as a lasting monument. Mr. Crawford's health failed under the pressure of the great public works here enumerated. In 1856 he was suddenly afflicted with blindness caused by a cancerous affection. He was above middle height, well formed and athletic, with a clear eye, ruddy complexion, and energetic temperament. In politics he was a liberal, in religion a Protestant, in character generous and kindly, and adverse to discords, professional or social.—His son, **Francis Marion,** author, b. in Italy in 1845, has lived chiefly abroad. He has published novels in rapid succession, including "Mr. Isaacs" (New York, 1882); "Doctor Claudius" (1883); "A Roman Singer" (1884); "To Leeward" (1884); "An American Politician" (1885); "Zoroaster" (1885); "Tale of a Lonely Parish" (1886); and "Saracinesca" (1886).

CRAWFORD, Thomas Hartley, lawyer, b. in Chambersburg, Pa., 14 Nov., 1786; d. in Washington, D. C., 27 Jan., 1863. He was graduated at Princeton in 1804, studied law, was admitted to the bar in 1807, and began to practise in Chambersburg. Later he was elected as a Jackson democrat to congress, and was re-elected, serving from 7 Dec., 1829, till 2 March, 1833. During 1833 he was a member of the state legislature, and in 1836 was appointed a commissioner to investigate alleged frauds in the purchase of the reservation of the land of the Creek Indians. From 1838 till 1845 he held the office of commissioner of Indian affairs. In 1845 he was appointed judge of the criminal court of the District of Columbia, and continued as such until his death.

CRAWFORD, William, soldier, b. in Berkeley county, Va., in 1732; d. in Wyandot county, Ohio, 11 June, 1782. He was a surveyor, and the associate of Washington, under whom he served. At the beginning of the French and Indian war he became an ensign in the Virginia rifleman, and was with Gen. Braddock in the expedition against Fort Duquesne. He continued in the service until 1761, having been promoted to the grade of captain on the recommendation of Washington. He again served during the Pontiac war from 1763 till 1764, and in 1767 settled in western Pennsylvania, where he purchased land and became a justice of the peace. Soon after the beginning of the Revolutionary war he raised a company of Virginians and joined Washington's army. In 1776 he was made lieutenant-colonel of the 5th Virginia regiment, and later became colonel, resigning from the army in 1781. He was at the battle of Long Island, in the subsequent retreat across New Jersey and over the Delaware, participated in the battles of Trenton and Princeton, and afterward was engaged around Philadelphia. In 1778 he was assigned to frontier duty, and during the following years was occupied in suppressing the Indian attacks on the settlers. After his resignation he retired to his farm, in the hope of spending the remainder of his days with his family, having already given nearly twenty-five years of his life to the service of his country; but in May, 1782, at the urgent request of Gens. Washington and William Irvine, he accepted, though with great reluctance, the command of an expedition against the Wyandot and Delaware Indians on the banks of the Muskingum. The Indians were discovered on 4 June, and an engagement ensued, in which Crawford's troops were surrounded in a grove called Battle island by a force much larger than his own. For two days the fight was continued, when, finding themselves hemmed in, they decided to cut their way out. In the retreat that followed, the soldiers were separated, and Col. Crawford fell into the hands of the Indians. After several days of cruel experience, during which he was subjected to horrible torture, he was burned to

death. The story is told by N. N. Hill, Jr., in the "Magazine of Western History" for May, 1885, under the title of "Crawford's Campaign."

CRAWFORD, William Harris, statesman, b. in Amherst county, Va., 24 Feb., 1772; d. in Elbert county, Ga., 15 Sept., 1834. His father, who was in reduced circumstances, removed first to South Carolina and then to Columbia county, Ga. After teaching school at Augusta the boy studied law, began practice at Lexington in 1799, and was one of the compilers of the first digest of the laws of Georgia. He became a member of the state senate in 1802, and in 1807 was chosen U. S. senator to fill a vacancy. The political excitement of the period led him to engage in two duels, in one of which his opponent fell, and in the second of which he was himself wounded. He was re-elected in 1811, acquiesced in the policy of a U. S. bank, and in 1812 was chosen president *pro tem.* of the senate. He was at first opposed to the war with Great Britain, but eventually gave it his support; and in 1813, having declined the place of secretary of war, accepted that of minister to France, where he formed a personal intimacy with Lafayette. In 1816, on the retirement of Mr. Dallas, he was appointed secretary of the treasury. He was prominently urged as a candidate for the presidency, but remained at the head of the treasury department, where he adhered to the views of Mr. Jefferson, and opposed the federal policy in regard to internal improvements, then supported by a considerable section of his own party. This position on the great question of the time subjected him to virulent hostility from opponents of his own party; and Mr. Calhoun, who was one of these opponents, became a dangerous rival for the democratic nomination for the presidency, to succeed Monroe. Crawford, however, as the choice of the Virginia party, and the representative of the views of Jefferson, secured the nomination of a congressional caucus in February, 1824; and in the election that followed he received the electoral votes of Virginia and Georgia, with scattering votes from New York, Maryland, and Delaware—in all, 41. No choice having been made by the electoral college, the election reverted to the house of representatives, where John Quincy Adams was elected over Jackson and Crawford, through the influence of Henry Clay, the fourth candidate before the people, who brought his friends to the support of Adams. The result was also due, in a measure, to the confirmed ill health of Mr. Crawford, and perhaps to imputations brought against his conduct of the treasury department. These charges he promptly refuted, and a committee that included Daniel Webster and John Randolph unanimously declared them to be unfounded. But his health rendered it impossible for him to continue in public life; and, although he recovered his strength partially, he took no part after this date in politics. Returning to Georgia, he became circuit judge, which office he continued to fill with great efficiency, by successive elections in 1828 and 1831, until nearly the end of his life. He had no connection with the nullification movement, to which he was opposed; and his last days were spent in retirement. Personally he was a man of conspicuous social gifts, an admirable conversationalist, religious in his views and feelings, and a supporter of Baptist convictions. At his home he dispensed a hearty republican hospitality, and his name is eminent among the illustrious citizens of Georgia.—His son, **Nathaniel Macon,** educator, b. in Oglethorpe county, Ga., 22 March, 1811; d. in Walker county, Va., 27 Oct., 1871, was graduated at the University of Georgia in 1829 with the first honor. At the age of twenty-five he was elected to a professorship in Oglethorpe college, at Milledgeville, Ga. He had been a Presbyterian, but changed his views and entered the Baptist ministry. In 1846 he accepted the chair of theology in Mercer university, and ten years later was elected to the presidency, but soon retired to accept the professorship of moral philosophy in the University of Mississippi. In 1857 he became professor of theology in Georgetown, Ky., but returned to Georgia again as president of Mercer university, where he remained for seven years. At the close of the war, in 1865, he accepted the presidency of Georgetown college, Ky., and continued to fill this office until near the time of his death. He was the author of a volume entitled "Christian Paradoxes."

CRAZY HORSE, Indian chief, b. about 1842. He was an Ogallalla Sioux, brother-in-law of Red Cloud, and one of the principal chiefs of the hostile Indians that for several years defied the authority of the U. S. government in the northwestern territories. He left Fort Laramie, and went to war, after the murder of his brother in 1865. He soon established a reputation as a brave and cunning leader, and gathered a strong band, whom he ruled with despotic rigor. With Sitting Bull he surprised and destroyed Gen. Custer's command on the Little Big-Horn river, 25 June, 1876. He was pursued by Gen. Terry into the Black Hills, and the following spring Gen. Crook conducted an expedition against him and forced him to surrender, with 900 followers, at the Red Cloud agency.

CREERY, William Rufus, educator, b. in Baltimore, Md., 9 May, 1824; d. there, 1 May, 1875. He was graduated at Dickinson college, Carlisle, Pa., in 1842, and at once began teaching in the public schools of Baltimore, continuing in this occupation until 1854, when he became professor of belles-lettres in Baltimore city college. In 1859 he was chosen president of the Lutherville female seminary, where he remained until 1862, when he renewed his teaching in the public schools of Baltimore. Five years later he was elected city superintendent of public instruction for a term of four years, and in 1872 was re-elected. In conjunction with Prof. M. A. Newell he prepared the Maryland series of school-books, which includes "Primary-School Spelling-Book"; "Grammar-School Spelling-Book"; a series of six "Readers," and "Catechism of United States History."

CREIGHTON, John Orde, naval officer, b. in New York city about 1785; d. in Sing Sing, N. Y., 13 Oct., 1838. He entered the navy as a midshipman in June, 1800, served under Preble before Tripoli, became a lieutenant, 24 Feb., 1807, and was attached to the frigate "Chesapeake," in June, 1807, when she was attacked by the "Leopard." He was afterward attached to the "President," and was first lieutenant in her action with the "Little Belt," 16 May, 1811. In 1813 he commanded the brig "Rat-

tlesnake," with the rank of master-commandant, and was made captain, 27 April, 1816. In 1829–'30 he commanded the squadron on the coast of Brazil.

CREIGHTON, Johnston Blakeley, naval officer, b. in Rhode Island, 12 Nov., 1822; d. in Morristown, N. J., 13 Nov., 1883. He entered the navy as a midshipman, 10 Feb., 1838, became a lieutenant, 9 Oct., 1853, commanded the steamer "Ottawa," of the South Atlantic blockading squadron, in 1862, commissioned as commander, 20 Sept., 1862, was on special duty in 1863, and in 1863–'4 commander of the steamer "Mahaska," of the South Atlantic blockading squadron, which was engaged in the bombardment of Forts Wagner and Gregg in August, 1863. He was transferred to the "Mingo," of the South Atlantic blockading squadron, and commanded that steamer till the close of the war. He was commissioned captain on 26 Nov., 1868, and became a commodore on 9 Nov., 1874. He was commandant of the Norfolk navy-yard in 1879, and was retired with the rank of rear-admiral in 1883.

CREIGHTON, William, clergyman, b. in New York city in 1793; d. in Tarrytown, N. Y., 23 April, 1865. He was graduated at Columbia in 1812, studied theology, and took orders in the Protestant Episcopal church, and during a great part of his earlier ministry, 1816–'36, was rector of St. Mark's in New York city. During the suspension of Bishop Onderdonk he was elected provisional bishop of the diocese of New York, but declined the office. He presided in the diocesan convention for nine years, and in the lower house of the general convention of the P. E. church during its sessions of 1853, 1856, and 1859. He was, from 1836 until 1865, rector of Christ church, Tarrytown.

CRELE, Joseph, centenarian, b. in Detroit, Mich., in 1725; d. in Caledonia, Wis., 27 Jan., 1866. The date of his birth is established by the record of his baptism in the French Catholic church, Detroit. He was married in 1755 at New Orleans, and a few years afterward settled at Prairie du Chien. He bore arms at Braddock's defeat, and before the Revolution was employed in carrying letters between Prairie du Chien and Green Bay. He settled in Wisconsin during the Revolutionary war. The later years of his life were passed with a daughter by his third marriage, born when he was sixty-nine years old. He enjoyed robust health up to within two years of his death, and was able to walk several miles without fatigue and to chop wood for the family.

CRENSHAW, Anderson, jurist, b. in South Carolina, 22 May, 1783; d. in Alabama in 1847. He was graduated in 1806 from the College of Columbia, S. C., being the first graduate of the institution, became a successful lawyer, removed to Alabama about 1819, and held the offices of judge of the circuit court from 1821 to 1838, being also, until 1832, judge of the supreme court, and chancellor of the southern division of the state from the organization of a separate court of chancery in 1838 till his death. Though a Whig in politics, he was elected to the judicial posts that he held by a Democratic legislature.—His son, **Walter Henry,** b. in Abbeville district, S. C., 7 July, 1817; d. in Alabama in 1878. He was graduated at the University of Alabama in 1834, and was from 1838 till 1867 a member of either the upper or lower house of the Alabama legislature, officiating as speaker of the house in 1861–'5, and president of the senate in 1865–'7. In 1865 he was a member of the Constitutional convention. He was afterward judge of the Butler county criminal court, and with two other commissioners codified the laws of the state.

CRESAP, Michael, trader and Indian fighter, b. in Alleghany county, Md., 29 June, 1742; d. in New York city, 18 Oct., 1775. His father, Thomas, emigrated from Yorkshire, England, settled in western Maryland, and was a member of the Ohio company in 1752. His son married a Miss Whitehead, of Philadelphia, while yet a minor, became a merchant, removed to the Ohio in the spring of 1774, and established a settlement below Wheeling. He took command of the pioneers, who prepared for an Indian war, and, after Dr. Connolly had warned him of a general Indian war, made a declaration of hostilities on 26 April and defeated a party of Indians in a skirmish on the river. Another party of whites treacherously massacred the family of the chief Logan on Yellow creek. Logan, who had been friendly to the English, accused Cresap, as the leader of the white men in that region, of committing the crime, and through a pathetic speech, attributed to Logan and preserved in Jefferson's "Notes," the deed attached to his memory, until his son-in-law, J. J. Jacob, and later Brantz Mayer, proved that he was in Maryland at the time of the occurrence. Gov. Dunmore gave him the commission of captain of the Hampshire county militia in Virginia. After the conclusion of the Dunmore expedition he returned to Maryland, but again went to Ohio the following spring, and penetrated almost to the Kentucky wilderness. On his return he learned that he had been commissioned by the Continental congress as captain of a company of Maryland riflemen. He went with his company to Boston and joined the army of Washington; but, having been afflicted with his final illness before he took the command, and finding himself growing worse, he left for home, and died on the way, in New York, where he was buried with military honors in Trinity churchyard. See "Biographical Sketch of the Late Capt. Michael Cresap," by J. J. Jacob (1826; new ed., with notes, by Brantz Mayer, Cincinnati, 1866). See, also, Mayer's discourse in vindication of Cresap, delivered before the Maryland historical society in May, 1851, published under the title "Tagah-jute, or Logan the Indian, and Captain Michael Cresap" (New York, 1867).

CRESPEL, Emanuel, clergyman, b. in Belgium about 1700. He arrived in Quebec in 1724, where he finished his ecclesiastical studies, and was ordained in 1726. He accompanied, as chaplain, the expedition of Lignery against the Foxes, and was then successively stationed at Niagara, Frontenac, and Crown Point. Being recalled to France, he sailed from Quebec in 1736, but his vessel, the "La Renommée," was driven on Anticosti island and wrecked. Fifty-four of the passengers escaped. The remainder, including Father Crespel, attempted to reach Mingan in two boats, one of which was lost. The survivors were hemmed in by ice and forced to remain till spring. Father Crespel escaped to an Indian camp, and thence found his way to a French post, from which he sent assistance to his companions. Only three of them were found alive. When he recovered from his sufferings he went to Quebec and was appointed pastor of Solanges. He returned to Europe in 1738. He wrote a series of letters describing his adventures, which appeared in French (Frankfort, 1742), and were shortly afterward published in German (English translation, 1797).

CRESSON, Elliott, philanthropist, b. in Philadelphia, 2 March, 1796; d. there, 20 Feb., 1854. He was a member of the Society of Friends, became a successful merchant in Philadelphia, and devoted his attention to benevolent objects, especially the

promotion of the welfare of the Indians and negroes in the United States. He conceived the intention of becoming a missionary among the Seminoles of Florida, but afterward gave his mind to the scheme of colonizing American negroes in Africa, engaged in establishing the first colony of liberated slaves at Bassa Cove, on the Grain coast, became president of the Colonization society, and labored as its agent in New England in the winter of 1838–'9, in the southern states in 1839–'40, and in Great Britain in 1840–'2 and 1850–'3. He left in his will $122,000 to various benevolent institutions, and a lot, valued at $30,000, for a home for superannuated merchants and gentlemen.

CRESSON, John Chapman, civil engineer, b. in Philadelphia, Pa., in 1806; d. there in 1876. He was educated at a Friends' academy, attended lectures on agriculture at the University of Pennsylvania, and then became a farmer, but sold his farm in 1834, and engaged in business in Philadelphia. He was then made superintendent and engineer of the Philadelphia gas-works, and held the office for twenty-eight years. He was given the chair of mechanics and natural philosophy in Franklin institute in 1837, and in 1855 was made its president. He also held a similar chair in the Philadelphia high-school for two years. He was for many years a manager and one of the vice-presidents of the Pennsylvania institution for the blind, and was connected with many other charitable institutions. He was also manager of the Schuylkill navigation company, president of the Mine Hill and Schuylkill Haven railroad company in 1847–'76, and one of the original Fairmount park commissioners, afterward becoming chief engineer of that park.

CRESWELL, John A. J., statesman, b. in Port Deposit, Cecil co., Md., 18 Nov., 1828. He was graduated at Dickinson college, Pa., in 1848, studied law, and was admitted to the Maryland bar in 1850. He was a member of the state legislature in 1860 and 1862, and assistant adjutant-general for Maryland in 1862–'3. He was elected to congress, and served from 7 Dec., 1863, till 3 March, 1865; and, having distinguished himself as an earnest friend of the Union, was elected as a republican to the U. S. senate in March, 1865, to fill the unexpired term of Thomas H. Hicks. On 22 Feb., 1866, he delivered, at the request of the House of representatives, a memorable eulogy of his friend and colleague, Henry Winter Davis. He was a delegate to the Baltimore convention of 1864, the Philadelphia loyalists' convention of 1866, the Border states convention held in Baltimore in 1867, and the Chicago republican convention of 1868. In May, 1868, he was elected secretary of the U. S. senate, but declined. On 5 March, 1869, he was appointed by President Grant postmaster-general of the United States, and served till 3 July, 1874.

CRESWELL, Julia (Pleasants), author, b. in Huntsville, Ala., 21 Aug., 1827; d. near Shreveport, La., 9 June, 1886. Her father, Col. James J. Pleasants, of Virginia, removed to Alabama, became secretary of state, and married a daughter of Gov. Bibb. The daughter was educated by a superior teacher from the north, and was encouraged by her father to write verses. In 1854 she married David Creswell, a lawyer and planter, who was a district judge of Alabama. Her cousin, Thomas Bibb M. Bradley, a young poet of promise, who died soon afterward, induced her to publish a selection of her poems with some of his own. The volume appeared in 1854, before her marriage, under the title "Apheila, and other Poems, by two Cousins of the South" (New York). After the war Mrs. Creswell taught a village-school, while her husband, who had lost his large estate, resumed the practice of law. She has published an allegorical novel entitled "Callamura" (Philadelphia, 1868), and left many unpublished poems to be issued in a posthumous volume.

CRETIN, Joseph, R. C. bishop, b. in Lyons, France, in 1800; d. in St. Paul, Minn., in 1857. He studied in his native diocese, and became a priest, with the intention of devoting himself to the foreign missions. In 1838 he volunteered for the diocese of Dubuque, and reached that city in 1839. He was appointed vicar-general and pastor of the cathedral. In 1843 he took up his residence at Prairie du Chien among the Winnebagoes. He was requested by them to build a church and school-house, but was prevented from doing so by the Indian agent. Father Cretin continued among the Winnebagoes till 1848, when he was expelled by the government officials, and the tribe removed to Long Prairie. He then returned to Dubuque. In 1849 the seventh council of Baltimore recommended the erection of Minnesota into a diocese, with the title of St. Paul, and the appointment of Father Cretin to the new see. He proceeded to France in order to secure priests for his diocese, and there received episcopal consecration at the hands of the bishop of Belley. He returned to America in 1851, accompanied by several priests, and began his work at St. Paul. Before the end of the year he was enabled to substitute a building of stone for the little log cabin in which he ministered, and to establish a school and seminary. At this period there was an immense influx of population into Minnesota, and Bishop Cretin was soon organizing Catholic parishes in every direction. In 1853 the Sisters of St. Joseph were introduced into the diocese, and placed in charge of an academy for young ladies, and of the parochial schools. Bishop Cretin also erected a hospital, an asylum, and novitiate, which he confided to their care. He revived the mission among the Winnebagoes, who had been removed to Long Prairie. He stationed a pastor and opened a school among them, which was managed by the Sisters of St. Joseph. He also established missions among the Ojibways, and stationed priests and founded churches at Crow Wing, Mill Lake, Sandy Lake, Saux Rapids, and Fond du Lac, as well as promoting the flourishing Indian settlements on the British border. In 1855 he gave the Brothers of the Holy Family charge of his schools for boys, and established a novitiate of the order in St. Paul. He founded a house of the Sisters of the Propagation of the Faith at Pembina for the instruction of the Indians. Through his agency a convent of the Benedictine order was erected at St. Cloud, which has grown into a great school and abbey. He also founded a convent of Benedictine nuns. Bishop Cretin did much to develop the resources of Minnesota by the interest he took in immigration. His letters addressed to intending emigrants, published in the New York journals, and copied into the newspapers of Europe, had the effect of determining many to settle in his adopted territory. When he was appointed bishop, there were in his diocese one log church and three priests; in a few years there were twenty priests, twenty-nine churches, and thirty-five stations, and the Catholic population had increased to more than 50,000. He built the cathedral of St. Paul at a cost of $70,000.

CREVAUX, Jules Nicolas, French explorer, b. in Lorquin, Lorraine, 1 April, 1847; killed in Bolivia, 24 April, 1882. He studied medicine at Strasburg and in the Naval medical school at Brest,

became assistant surgeon in the French navy on 24 Oct., 1868, was attached to the marines at the beginning of the war of 1870, became a surgeon of the second class in 1873, gained the cross of the legion of honor in 1876 for devotion to yellow-fever patients in the Salut islands, and, after recovering from an attack of the disease, ascended Maroni river in French Guiana, explored the Tumuc-Humac mountains, and descended the Yari to the Amazon. He afterward ascended the Oyapock again, and descended the Payou to the Amazon, and then explored Yapoura river. After a visit to France, Dr. Crevaux returned to South America, made a voyage on the Orinoco, and in 1881 set out from Buenos Ayres with a number of companions to ascend the Paraguay and cross over to the Amazon by the Tapajos and the Zingu. The expedition reached the confluence of the Pilaya and Pilcomayo, and embarked in three boats; but, in the region of the Teyo, Dr. Crevaux and all his companions save two were treacherously murdered by the Tapeti Indians.

CREVECŒUR, J. Hector St. John de, author, b. in Normandy in 1731; d. in 1809 or 1813. He finished his education in England, and embarked for America in 1754. He purchased an estate in the neighborhood of New York, and married the daughter of an American merchant. During the wars of the Revolution his farm was frequently ravaged, and he himself forced to seek safety in flight. In 1780, as his affairs in Europe required his presence, he obtained permission from the British commander to cross the line of the army, and entered New York with one of his sons, from which city he was about to sail. But the unexpected appearance of a French squadron led to his being suspected of having entered New York as a spy, and he was cast into prison. After a detention of three months, he was released by two prominent merchants becoming security for him. He then embarked on a vessel sailing for Dublin, and reached France in 1782. About this time he introduced the culture of the American potato into Normandy. He had previously published in English his "Letters of an American Farmer." He now translated those letters into French and had them published in Paris. He then returned to New York, where he was appointed French consul. No sooner had he landed, in November, 1783, than he learned that his house had been burned and his farm ravaged by the savages. His wife had died a few weeks before, and he could learn nothing of his children. He discovered them, however, in the charge of an English merchant named Flower, who, through gratitude for Crevecœur's kindness to the English prisoners in Normandy, had, at great risk, rescued them. The appointment of Crevecœur was agreeable to the American government, and Washington gave him particular proofs of his esteem. He accompanied Franklin in the journey that the latter took in 1787 to Lancaster to lay the first stone of the college which he had founded. The "Lettres d'un cultivateur Americain" consists of three volumes, giving a description of the United States and Canada. It was so laudatory of the climate, productions, etc., that more than five hundred families left France on the faith of Crevecœur's statements, and settled on the Ohio, where most of them perished. He also wrote "La culture des pommes de terre" and "Voyage dans la haute Pensylvanie et dans l'état de New York" (2 vols., Paris, 1801).

CRIADO DE CASTILLA, Alonso (cre-ah'-do day cas-teel'-yah), Spanish governor of Guatemala from 1598 till 1611. During his administration peace and order reigned in every section of the country, as the filibustering expeditions headed by Drake had been successfully repelled before he entered office. He founded the town and port of Santo Tomás, on the harbor of Castilla.

CRINNON, Peter Francis, Canadian R. C. bishop, b. in Cullen, county Louth, Ireland, in 1818; d. in Jacksonville, Fla., in 1882. He came to Canada when a boy, and was ordained in Toronto in 1854. He was then appointed to missionary duty in London, Ontario. He erected St. Mary's church in Stratford. He became bishop of Hamilton in 1874. During his administration of the diocese the number of Catholics was doubled.

CRISPIN, Silas, soldier, b. in Pennsylvania about 1830. He was appointed to the U. S. military academy in 1846, and at graduation ranked third in his class. Assigned to duty at the arsenal at Watervliet, N. Y., he remained there two years, and then served successively at the arsenals at Alleghany, Pa., St. Louis, Mo., and the Leavenworth ordnance depot in Kansas. In 1860 he became assistant inspector of arsenals. He was promoted captain of ordnance, 3 Aug., 1861, and in that grade served through the civil war, having charge of different depots for the ordnance department. He received successive brevets to include that of colonel in the regular army at the close of the civil war, but did not receive his promotion as major of ordnance until 7 March, 1867. On 14 April, 1875, he was promoted lieutenant-colonel, and colonel, 23 Aug., 1881.

CRITTENDEN, John Jordan, statesman, b. in Woodford county, Ky., 10 Sept., 1787; d. near Frankfort, Ky., 26 July, 1863. His father served in the war of the Revolution, with the rank of major. The son was graduated at William and Mary college in 1807, and entered upon the practice of the law in his native county, but after a short time removed to Logan county, bordering on Tennessee, a thinly settled part of the state. In 1809 Gov. Vinian Edwards appointed him attorney-general of the territory of Illinois. He served for a short time as a volunteer in the war of 1812, was aide to Gen. Shelby in 1813, and served with Adair and Berry in the Canada campaign. After leaving the army he resumed the practice of his profession, soon attaining a high place at the bar. In 1816 he was elected to the legislature, where he at once took a high rank. The next year he was elected to the U. S. senate, but after three years' service he resigned his seat, and in 1819 took up his residence in Frankfort. Here he soon rose to eminence in the legal profession, especially as a criminal lawyer, and served several terms in the legislature. In 1827 he was appointed by President Adams U. S. district attorney, but, on the accession of Gen. Jackson to the presidency in 1829, he was removed. He was elected again to the U. S. senate in 1835, and served a full term. In the remarkable canvass of

J. J. Crittenden

1840 Mr. Crittenden took an active part in favor of Gen. Harrison. He was re-elected to the senate at the expiration of his term, but resigned his seat to accept the appointment of attorney-general in Harrison's cabinet. On the death of Harrison, and the accession of Mr. Tyler, Mr. Crittenden's views of national policy not being in harmony with those of the new president, he retired from the cabinet. Mr. Clay having decided to retire from the senate in 1842, Mr. Crittenden was appointed to fill the vacant seat; and at the expiration of the term was again elected for a full term. In 1848 he was elected governor of Kentucky, and resigned his seat in the senate to fill that office. Notwithstanding the intimate relations between Mr. Clay and himself, he favored the nomination of Gen. Taylor in 1848 as the whig candidate for the presidency, but only after Mr. Clay had assured him that he would not be a candidate. When the president died, and Mr. Fillmore succeeded him, Mr. Crittenden accepted the portfolio of attorney-general in the new cabinet. The great question as to the constitutionality of the fugitive-slave law was referred to him, and he prepared an opinion in favor of it. In 1855 he was once more elected to the senate, and took a leading part in the discussions of the important questions that came before congress in the course of the next five years. The sentiments uttered by him were eminently national, and he exerted his full strength in a patriotic effort to effect a satisfactory settlement of the disturbing elements that imperilled the perpetuity of the Union. He opposed the repeal of the Missouri compromise, and, in expressing his views of the questions growing out of the Kansas troubles, vigorously opposed the policy of the administrations of Presidents Pierce and Buchanan. He favored the election of Bell and Everett in the presidential canvass of 1860. He vehemently opposed secession, and supported Mr. Lincoln's administration, holding that it was the right and duty of the government to maintain the Union by force. He exerted his full power to effect a compromise between the contending parties, but, failing to accomplish it, took his stand for the government. In the hope of maintaining the Union, he proposed an amendment to the constitution in December, 1860, providing for the re-enactment of the Missouri compromise, and the prohibition of any interference by congress with slavery wherever it should be legally established. Mr. Crittenden had been six times elected to the senate, and his last effort in that body was to save the Union. On 4 March, 1861, he presented the credentials of his successor, Mr. Breckinridge, and retired. Returning to Kentucky, he urged his state to stand by the Union, and held it firmly against the appeals of the other states of the south. He became a candidate for a seat in congress, and, being elected, took his place in the house of representatives, where he was at once recognized as a powerful leader. He offered, on 19 July, 1861, the following resolution, which was adopted with only two dissenting votes: "Resolved by the house of representatives of the congress of the United States, That the present deplorable civil war has been forced upon the country by the disunionists of the southern states, now in arms against the constitutional government, and in arms around the capital; that in this national emergency congress, banishing all feelings of mere passion or resentment, will recollect its only duty to the whole country; that this war is not waged on their part in any spirit of oppression, or for any purpose of conquest or subjugation, or purpose of overthrowing or interfering with the rights or established institutions of those states, but to defend and maintain the *supremacy* of the constitution, and to preserve the Union with all the dignity, equality, and rights of the several states unimpaired; and that as soon as these objects are accomplished the war ought to cease." He opposed the employment of slaves as soldiers, and he denied the power of congress to organize the state of West Virginia. His last speech, delivered 22 Feb., 1863, showed that his force had not abated. He denounced the conscription bill, and declared that the war had been changed from its original purpose. He was again a candidate for congress, but died before the election. Mr. Crittenden's personal qualities were fine. He made friends everywhere; there was cordiality blended with dignity in his manner; his voice was musical in conversation, and captivating in his public speeches. By Thomas Corwin and others of his compeers he was esteemed the most able debater in the senate. —His son, **George Bibb,** b. in Russellville, Ky., 20 March, 1812; d. in Danville, Ky., 27 Nov., 1880, was graduated at the U. S. military academy in 1832, served in the Black Hawk expedition, though not at the seat of war, and resigned, 30 April, 1833. He volunteered in the Texan revolution of 1835, and was taken prisoner at Meir, on the Rio Grande, by the Mexicans, who carried him with his company to the city of Mexico, where he was confined in a foul prison until released, through the intervention of Daniel Webster, nearly a year afterward. On one occasion the Mexicans decided to shoot a certain number of the prisoners as a measure of retaliation, and Crittenden, being an officer, was one of the first to draw lots to determine which of them should die. He drew a favorable lot, but when a friend who had a family drew a fatal black bean, he gave to that soldier his white bean, and risked his life in another chance. He served through the Mexican war as captain of mounted rifles, and was brevetted major for gallantry at Contreras and Churubusco, was one of the first to enter the city of Mexico, became major of mounted rifles, 15 April, 1848, served on frontier duty, was promoted lieutenant-colonel, 30 Dec., 1856, and on 10 June, 1861, resigned and joined the Confederate service. He was commissioned brigadier-general, and soon afterward major-general, and was assigned, in November, 1861, to the command of southeastern Kentucky and a part of eastern Tennessee. On learning that Gen. Zollicoffer had moved his forces across the Cumberland at Mill Spring, he gave orders to recross the river, but Zollicoffer delayed executing the order until the rise of the river rendered it impracticable to transport the artillery. When Gen. Thomas approached with a large force, on 18 Jan., 1862, Gen. Crittenden ordered an attack. The Confederates attempted to surprise the Union troops at Fishing Creek; but only two regiments came up to begin the attack in the morning of 19 Jan., and after the death of Gen. Zollicoffer the troops were demoralized. Gen. Crittenden effected the retreat of his forces across the river, leaving the artillery behind. He was severely censured for making the attack, was kept under arrest until November, and soon afterward resigned his commission. He continued to serve as a volunteer on the staff of Gen. John S. Williams, who frequently followed his advice and gave him the command of bodies of troops. After the war he resided in Frankfort, Ky., where he was state librarian from 1867 to 1871.—Another son, **Thomas Leonidas,** b. in Russellville, Ky., 15 May, 1815, studied law under his father, was ad-

mitted to the bar, and became commonwealth's attorney in Kentucky in 1842. He served in the Mexican war as lieutenant-colonel of Kentucky infantry, and was volunteer aide to Gen. Taylor at the battle of Buena Vista. In 1849 he was appointed by President Taylor consul to Liverpool, and served till 1853, then returned to the United States, resided for some time at Frankfort, and afterward engaged in mercantile business at Louisville, Ky. At the beginning of the civil war he espoused the national cause, and on 27 Oct., 1861, was appointed brigadier-general of volunteers. He commanded a division at the battle of Shiloh, and was promoted major-general, 17 July, 1862, for gallant services on that occasion, and assigned to the command of a division in the Army of the Tennessee. He commanded the 2d corps, forming the left wing of the Army of the Ohio under Gen. Buell, and afterward served under Gen. Rosecrans in the battle of Stone River, and at Chickamauga commanded one of the two corps that were routed. In the Virginia campaign of 1864 he commanded a division of the 9th corps. He resigned, 13 Dec., 1864, but entered the regular army as colonel of the 32d infantry on 28 July, 1866, was brevetted brigadier-general for gallantry at Stone River, 2 March, 1867, transferred to the 17th infantry in 1869, and served with his regiment on the frontier until he was retired on 19 May, 1881.—**Thomas T.**, a nephew of John Jordan, b. in Alabama about 1828, served in the Mexican war as lieutenant of Missouri mounted volunteers, afterward settled in Indiana, and entered the volunteer army in 1861 as colonel of a regiment of three months' men, with a detachment of which he took part in the battle of Philippi. The regiment was reorganized under his command at the expiration of its term of service, and served for three years. He was promoted brigadier-general on 28 April, 1862, and taken prisoner at Murfreesboro on 12 July, and not released till October. He resigned 5 May, 1863.

CROASDALE, Samuel, soldier, b. in Pennsylvania; d. at Antietam, Md., 17 Sept., 1862. He was a lawyer in Doylestown, Pa. Immediately after the president's proclamation of 15 April, 1861, he volunteered for three months, and, after the governor's call for nine months' men in the summer of 1862, raised a company in Doylestown, and, upon the organization of the 128th Pennsylvania regiment, was appointed its colonel. After a few weeks' service in camps of instruction near Washington, the emergencies of the invasion of Maryland required the services of the regiment in the field. At Antietam it was assigned an important position, and Col. Croasdale, having formed his men in line, was leading an assault under a heavy fire, when a ball killed him instantly.

CROCKER, Alvah, capitalist, b. in Leominster, Mass., 14 Oct., 1801; d. in Fitchburg, 26 Dec., 1874. He obtained an academic education, entered a paper-mill at Franklin, N. H., in 1820, removed to Fitchburg, Mass., in 1823, and began to manufacture paper on his own account on borrowed capital. He struggled for many years with debts, but gradually extended his business, and in 1834 laid the foundation for a fortune by purchasing all the land in the Nashua valley, in order to build a new road. He was elected to the Massachusetts legislature in 1835, where he advocated steam communication with Boston, returned to the legislature in 1842, and obtained a charter for a new railroad between northern Massachusetts and the seaboard, which was completed through his exertions in 1845. He afterward engaged in building the Vermont and Massachusetts, the Troy and Boston, and the Hoosac tunnel railroads, and in 1847–'8 lectured in behalf of the tunnel project. Near his paper-mills, which became the largest in the United States, he built machine-shops and foundries. He was the first to use cotton-waste in the manufacture of white paper, and palm-leaf fibre for coarse wall-paper. He was a member of the state senate for two terms during the civil war, on 2 Jan., 1872, was elected to congress as a republican to serve out the unexpired term of William B. Washburn, who had been made governor, and was re-elected for the following term, serving from 14 Feb., 1872, until his death.

CROCKER, Charles, railroad builder, b. in Troy, N. Y., 16 Sept., 1822. He had a limited education, and was early turned adrift by his father. In 1849 he went to California, and, after engaging in placer mining, opened a general store in Sacramento. He was elected to the common council in 1855, and to the legislature in 1860. With Leland Stanford, Mark Hopkins, and Collis P. Huntington, he furnished means for the survey of a railroad route across the Sierra Nevada; and on the passage of the Union Pacific railroad bill by congress he was associated with them in constructing the Central Pacific division, the four supplying the capital beyond the government subsidy. He personally built a large portion of the most difficult sections, under contract. In 1871 he was elected president of the Southern Pacific railroad company, of California, and second vice-president of the Central Pacific, superintending, in the former capacity, the construction of the divisions in Arizona, New Mexico, and Texas. In 1884 he effected a consolidation of the properties of the two companies, having a joint control of 8,903 miles of railroad and steamship lines, and soon afterward removed to New York city.

CROCKER, Hannah Mather, author, b. in Boston, Mass., in 1765; d. in Roxbury, Mass., 10 July, 1847. She was a granddaughter of Cotton Mather, a daughter of the Rev. Samuel Mather, of Boston, and married Joseph Crocker, of Taunton, who left her a widow. In 1810 she sent to a newspaper a series of "Letters on Freemasonry," which were republished on the advice of the Rev. Dr. Thaddeus M. Harris, who wrote a preface to the volume. She published afterward "The School of Reform," and in 1818 "Observations on the Rights of Woman," and wrote an account of the life of Madam Knight, the schoolmistress of Benjamin Franklin, which is preserved in the library of the Antiquarian society of Worcester, Mass.

CROCKER, Marcellus M., soldier, b. in Franklin, Johnson co., Ind., 6 Feb., 1830; d. in Washington, D. C., 26 Aug., 1865. He entered the U. S. military academy in 1847, but left at the end of his second year, studied law, and practised in Des Moines, Iowa. He entered the national service as major of the 2d Iowa infantry in May, 1861, was promoted colonel on 30 Dec., fought with distinction in the battle of Shiloh, April 6 and 7, 1862, was promoted brigadier-general on 29 Nov., 1862, and engaged at the siege of Vicksburg, conducting a raid in Mississippi. After the re-enlistment of his brigade as veteran volunteers he fought through the Georgia campaign of Gen. Sherman, commanding a division a part of the time. He was suffering from consumption during the whole of his military career, and was assigned to duty in New Mexico on account of sickness. The brigade that he had commanded and brought to a high state of discipline was nicknamed "Crocker's greyhounds." It lost heavily in the assault of Bald Hill before

Atlanta, on 22 July, 1864, and in Hardee's attack on their position later in the day fully half were killed, wounded, or captured.

CROCKER, Nathan Bourne, clergyman, b. in Barnstable, Mass., 4 July, 1781; d. in Providence, R. I., 19 Oct., 1865. He prepared for college at Sandwich academy, was graduated at Harvard in 1802, studied medicine, and then theology, took orders in the Protestant Episcopal church in 1803, and was elected rector of St. John's church in Providence, over which he presided until his death, with the exception of a few years, during which his health prevented his preaching. He was secretary of the corporation of Brown university from 1837 till 1843. The ministerial life of Dr. Crocker was identified with the history of the Episcopal church of Rhode Island, which contained but four churches of that denomination when he assumed his pastorate. Some of his sermons and occasional addresses and lectures were published.

CROCKER, Uriel, publisher, b. in Marblehead, Essex co., Mass., 13 Sept., 1796. He went with his father in the old one-horse shay from Marblehead to Boston in 1811, and was apprenticed to Samuel T. Armstrong to learn the printer's trade. Two months later, Osmyn Brewster, a son of Dr. Brewster, of Worthington, entered the same office. Mr. Armstrong's store, No. 50 Cornhill, was formerly occupied by Paul Revere, and is now 173 and 175 Washington street. In 1814 Mr. Crocker was made foreman of the printing-office, and in 1818 taken into partnership by Mr. Armstrong, with his associate Brewster. Mr. Armstrong withdrew in 1825, and the firm of "Crocker & Brewster" was continued until they retired from active business in 1876. At the fiftieth anniversary of their copartnership Mr. Crocker said: "Mr. Brewster and I first met in the year 1811, as apprentices of the late Samuel S. Armstrong. It was in the old building which stood on the same lot where we spent fifty-four of the fifty-seven years that we have been together, the old number being 50 Cornhill—that's old Cornhill—now forming part of Washington street. We left it only three years ago, when we removed to the adjoining store. I had been an apprentice about two months when he came. It was pleasant to see him, as it removed from me the title which the youngest apprentice in a printing-office has affixed to his name. Our partnership agreement, 1818, just fifty years ago, was drawn up and witnessed by Jeremiah Evarts, father of William M. Evarts. In the arrangement of our business, Mr. Brewster attended chiefly to the book-store. I directed the printing-office, the latter having been wholly in my charge since I was eighteen years of age. The numerous persons in our employ—and there were in former years from twenty-five to thirty in the printing-office alone—were paid in full every Saturday night. The first large work we published was 'Scott's Family Bible' (6 vols., 8vo, 1820). It was an experiment, and many of the older booksellers prophesied that we should not be successful. The result was entirely satisfactory." On 29 Nov., 1886, Mr. Crocker celebrated the seventy-fifth anniversary of his partnership with Mr. Brewster. A number of distinguished people were assembled at his home to congratulate the two nonogenarians. Among them were Dr. Oliver Wendell Holmes, Dr. Samuel Herrick, Frederick D. Ames, ex-Gov. Rice, and Gov.-elect Ames. Each guest was presented with a portrait of these merchant princes, and a member of the Brewster family contributed a poem in commemoration of the diamond wedding festivity. See Mr. Crocker's "Autobiography" (Boston, 1869).

CROCKETT, David, pioneer, b. in Limestone, Greene co., Tenn., 17 Aug., 1786; d. in Texas, 6 March, 1836. His father, a Revolutionary veteran of Irish birth, moved to eastern Tennessee after the war, and about 1793 opened a small tavern on the road from Knoxville to Abingdon. When David was about twelve years old his father hired him to an old Dutchman, with whom he went 400 miles on foot, but, after remaining a few weeks with his master, ran away and succeeded in reaching home. Shortly afterward he was sent to school, but on the fourth day gave one of the pupils with whom he had quarrelled a sound beating, and, after playing truant for a time to avoid a flogging, ran away from home to escape the vengeance of his father. For three years he worked for teamsters in Tennessee, Maryland, and Virginia, and for eighteen months was bound to a hatter in the last-named state. Tired of wandering about, he finally returned home, and shortly afterward worked hard for a year to pay two notes of his father's, amounting to $76. He then went to school for six months, and learned his letters for the first time, but relinquished study to seek a wife, and, after several disappointments in love, married and settled in Lincoln county in 1809, and about 1811 in Franklin county, one of the wildest parts of the state. Crockett had by this time acquired some fame as a hunter, and, at the beginning of the Creek war in 1813, he enlisted in a regiment of sixty-day volunteers. He served through the war, and afterward settled on Shoal creek, in a desolate region of the state, where a temporary government was formed by the settlers and Crockett was made a magistrate. He was subsequently appointed to the same office by the state legislature, and was then elected colonel of militia. In 1821 he was a candidate for the legislature, and winning favor by telling amusing stories and by his skill with the rifle, was elected by a handsome majority, though he had never read a newspaper in his life, and was entirely ignorant of public speaking. In 1822 he lost all his property by fire, and moved again to the Obion river, where he devoted himself to his favorite occupation of hunting, living on bear-meat and venison. He served again in the legislature in 1823–'4, and in the latter year was an unsuccessful candidate for congress. In 1826 he was again a candidate, as a supporter of Jackson, and this time was elected, serving two terms, from 1827 till 1831. In his second term he opposed Jackson's Indian bill, and this course caused his defeat in 1830; but he served again in 1833–'5. Crockett was popular at Washington, where he became noted not only for his eccentricity of manner, but for his strong common sense and shrewdness. He prided himself on his independence, and thus set forth his position: "I am at liberty to vote as my conscience and judgment dictate to be right, without the yoke of any party on me, or the driver at my heels, with his whip in hand, commanding me

David Crockett

to ge-wo-haw, just at his pleasure." After the increasing influence of Jackson in Tennessee, which made it impossible for Crockett to be re-elected to congress, he joined the Texans in their struggle for independence, and, having performed various exploits, ended his adventurous life in the famous defence of the Alamo, where, as one of the six survivors of a band of 140 Texans, he surrendered to Santa Anna, only to be massacred by that officer's orders. An unauthorized account of Crockett's life, entitled "Sketches and Eccentricities of Colonel David Crockett" (Philadelphia, 1833), drew from him a characteristic autobiography (1834), and he also published a burlesque "Life of Van Buren, Heir-Apparent to the Government" (1835); and a "Tour to the North and Down East" (New York, 1835). See, also, "Crockett's Exploits in Texas" (New York, 1848); and "Life of Colonel David Crockett," by Edward S. Ellis (Philadelphia).—His son, **John W.**, b. in Trenton, Tenn.; d. in Memphis, Tenn., 24 Nov., 1852, was a member of congress in 1837–'41. He was elected by the legislature attorney-general for the 9th district of Tennessee on 1 Nov., 1841, and afterward removed to New Orleans, where, on 22 May, 1848, he became associate editor of the "National."

CROES, John, P. E. bishop, b. in Elizabethtown, N. J., 1 June, 1762; d. in New Brunswick, N. J., 26 July, 1832. His early years were occupied partly in mechanical pursuits and partly in efforts to acquire a classical education. During the Revolution he served as a sergeant and quartermaster, and after the war he opened a school in Newark, N. J., and studied for the ministry of the Episcopal church. He was ordained deacon by Bishop White in Philadelphia, 28 Feb., 1790, and priest in March, 1792. He then became rector of Trinity church, Swedesborough, N. J., which place he held for twelve years. He was uniformly active and zealous in the service of the church, in both diocesan and general conventions. Dr. Croes became rector of Christ church, New Brunswick, in 1801, having in charge also a neighboring church and an academy. He was elected bishop of New Jersey in the summer, and consecrated in Philadelphia, 19 Nov., 1815. During the remainder of his life he gave himself to the duties of his high office with conscientious devotion and fidelity. Bishop Croes published a few sermons and addresses.

CROFFUT, William Augustus, author, b. in Redding, Conn., 29 Jan., 1835. He received his education in the public schools of Orange, Conn. In 1861 he enlisted as a private in the U. S. army, and with a certain pride records that the warrant of a corporal is the highest military appointment he has ever held. He was a journalist before joining the army, and has been successively engaged upon the New Haven, Conn., "Palladium," the Rochester, N. Y., "Democrat," the St. Paul, Minn., "Times," the Minneapolis "Tribune," the Chicago "Post," the New York "Graphic," "Tribune," and "World," and the Washington, D. C., "Post." He has twice visited Europe, and travelled through Mexico, Yucatan, Cuba, and Nova Scotia, and has been a voluminous correspondent of papers in most of the large cities of the west. He wrote the libretto of a comic opera entitled "Deseret," brought out in New York in 1882, for which Dudley Buck composed the music. The motive for this opera was drawn from life among the Mormons. He is the author of "The History of Connecticut in the Rebellion" (New York, 1867); "A Helping Hand" (Cincinnati, 1868); "Bourbon Ballads," a popular series of political rhymes (New York, 1880); "A Midsummer Lark" (1882); and "The Vanderbilts" (1886). The "Midsummer Lark" is a humorous account of a tour through Europe, written in rhyme, but printed for the most part in the form of prose.

CROGHAN, George, Indian agent, b. in Ireland; d. in Passayunk, Pa., about August, 1782. He was educated in Dublin, and coming to this country settled near Harrisburg, Pa., and was an Indian trader there as early as 1746. Having acquired the confidence of the Indians and a knowledge of their languages, he became agent for the colony among them. He was a captain in Braddock's expedition in 1755, engaged in the defence of the western frontier in 1756, and in November was made deputy Indian agent for the Pennsylvania and Ohio Indians by Sir William Johnson, who, in 1763, sent him to England to confer with the ministry relative to an Indian boundary-line. While on a mission, in 1765, to pacify the Illinois Indians, he was attacked, wounded, and taken to Vincennes, but was soon released, and succeeded in accomplishing his mission. In May, 1766, he made a settlement four miles from Fort Pitt, and he continued thereafter to render valuable service in pacifying the Indians and conciliating them to British interests until 1776.

CROGHAN, George, soldier, b. near Louisville, Ky., 15 Nov., 1791; d. in New Orleans, 8 Jan., 1849. His father was Maj. William Croghan, of the Revolution, and his mother a sister of Gen. George Rogers Clark. He was graduated at William and Mary college in 1810, and, entering the army, was aide to Col. Boyd at the battle of Tippecanoe in 1811, and made captain in the 17th infantry, 12 March, 1812. He distinguished himself under Harrison in the sortie from Fort Meigs, became his aide-de-camp, with the rank of major, 30 March, 1813, and, on the 1st and 2d of August following, conducted the memorable defence of Fort Stephenson, at Lower Sandusky, against Gen. Proctor, with an army of 500 regulars and 700 Indians. Maj. Croghan was brevetted lieutenant-colonel for his gallantry on this occasion, and subsequently received from congress a gold medal. He was made a lieutenant-colonel 21 Feb., 1814; upon the reduction of the army at the close of the war, he was transferred to the 1st infantry. He resigned in 1817, was postmaster at New Orleans in 1824, and was appointed inspector-general, with the rank of colonel, 21 Dec., 1825. In 1846 he joined Taylor's army in Mexico, and served with credit at the battle of Monterey.—His son, **George St. John,** a Confederate officer, was fatally wounded at McCoy's Mills, W. Va., during Floyd's retreat from Cotton Hill, in December, 1861. Before his death he admitted to Gen. Benham, by whose soldiers he had been wounded, that he had fought on the wrong side. He invented a peculiar pack-saddle for mules, which had been successfully used

in conveying wounded men over the mountain-passes of western Virginia.

CROIX, John Baptist De La, R. C. bishop, b. of a noble family, in Grenoble, France, in 1653; d. in Quebec, 28 Dec., 1727. He was first almoner to Louis XIV., and came to Canada in 1685 as successor to Laval, the first bishop of Quebec. He founded three hospitals, and distributed more than a million livres among the poor.

CROLY, David Goodman, journalist, b. in New York city, 3 Nov., 1829. He was graduated at New York university in 1854, was subsequently a professor of phonography, and a reporter for the New York "Evening Post" and "Herald" from 1855 till 1858. He owned and edited the Rockford, Ill., "Daily News" from 1858 till 1859, and became city editor of the New York "World" when it was founded in 1860, then its managing editor until 1872. His active work as a newspaper editor terminated in 1878, when, in consequence of ill health, he resigned the editorship of the New York "Graphic," which he had held since 1872. Mr. Croly has had some notoriety as a predicter of financial catastrophes, and foretold in the spring of 1872 the panic of the autumn of 1873, naming the banking-house (Jay Cooke & Co.) that first failed, and also indicated the railroad (the Northern Pacific) that would first go down. Mr. Croly has contributed many articles to periodicals, and published lives of Seymour and Blair, with a "History of Reconstruction" (New York, 1868), and a "Primer of Positivism" (1876).—His wife, **Jane Cunningham,** b. in Market Harborough, England, 19 Dec., 1831, is known by her writings under the pen-name of "Jenny June." Her father came to the United States when she was ten years old. Until that time she was educated at her native place, afterward by her father and brother at Poughkeepsie and New York. In 1857 she was married, and in 1860 became editor of Demorest's "Quarterly Mirror of Fashion," and when that periodical and the New York "Weekly Illustrated News" were incorporated into "Demorest's Illustrated Monthly" she became the editor of the new journal. Mrs. Croly has been also editorially connected with the New York "World," "Graphic," daily "Times," and "Noah's Sunday Times," and was dramatic critic and assistant editor of the "Messenger" for five years, 1861–'6. She invented the system of duplicate correspondence, and has practised it for thirty years. Mrs. Croly's pen-name of "Jenny June" was derived from a little poem by Benjamin F. Taylor, sent to her, when she was about twelve years old, by her pastor, in Poughkeepsie, with the name underlined, because, he said, "You are the Juniest little girl I know." Mrs. Croly called the first Woman's Congress in New York, in 1856, and also the second, in 1869, and in 1868 founded the Sorosis, and was its president until 1870, and again from 1876 till 1886. She is vice-president of the Association for the advancement of the medical education of women. She has published "Talks on Women's Topics" (1869); "For Better or Worse" (1875); a "Cookery-Book for Young Housekeepers"; and "Knitters and Crochet," "Letters and Monograms" (New York, 1885–'6).

CROMPTON, William, inventor, b. in Preston, England, in 1806. He was brought up as a hand-loom cotton-weaver, and at an early age learned the trade of a machinist. While superintendent of a cotton-mill in Ramsbottom, near Berry, he made many experiments on cotton-looms. He came to Taunton, Mass., in 1836, and while there devised a loom for the manufacture of fancy cotton goods, for which he received a patent on 23 Nov., 1837. In this loom one part of the warp was depressed while the other was lifted, instead of allowing one part to remain stationary, thus securing more room for the passage of the shuttle. Another feature of it was the chain, which, with its peculiar apparatus, operated the warp. Mr. Crompton went to England in 1838, and, after patenting his loom there, returned with his family to this country in 1839, and in 1840 adapted his loom to the weaving of fancy woollens. At least three fourths of all the woollen goods now made in the United States are woven on the Crompton loom, or on looms embodying its principles. Mr. Crompton retired from active business in 1849, on account of failing health.—His son, **George,** inventor, b. in Ramsbottom, England, 23 March, 1829, came to the United States in 1839, and in 1849 was called to the management of his father's business. In 1851 he engaged in the manufacture of fancy looms in Worcester, Mass., where the Crompton loom-works have since been established. He soon directed his attention to improvements in his father's loom, and since 1854 has taken out more than fifty patents, including those for the harness mechanism, picker movement, let-off and stop motions, shuttle and shuttle-boxes, shipping mechanism, and devices for finding the pick when broken or exhausted. He has also received eight patents for textile fabrics. At the Centennial exhibition in 1876 he received an award "for the best looms for fancy weaving on shawls, cassimeres, and satinets." By Mr. Crompton's improvements in his father's looms there is an increased production of sixty per cent., with a saving of fifty per cent. in labor and more than that in the cost of repairs.

CROMWELL, Henry Bowman, merchant, b. in 1828; d. in Brooklyn, N. Y., 2 April, 1864. He engaged in trade at an early age, and became a member of the firm of Cromwell, Haight & Co. before he was twenty years old. In 1850 he became a partner in the firm of John Haight & Co., in Huddersfield, England, and resided there until 1854, when he returned to his native city, and soon engaged in the shipping business, managing a line of screw propellers in connection with the Baltimore and Ohio railroad, his business increasing until he had connection with nearly all the important domestic seacoast ports. During the few years previous to 1861 he had in successful operation steam lines from New York to Savannah, Charleston, Wilmington, Norfolk, Alexandria, and Washington, Portland, and Baltimore; also from Baltimore to Charleston and Savannah. When the civil war began he sold nearly all his vessels to the government, and immediately proceeded with the construction of two fine steamers, the "George Washington" and "Oliver Cromwell," which subsequently sailed between New York and New Orleans. Although Mr. Cromwell's commercial interests were so largely connected with the south, he firmly upheld the cause of the government during the war.

CRONYN, Benjamin, Canadian P. E. bishop, b. in Kilkenny, Ireland, in 1802; d. in London, Ontario, 22 Sept., 1871. He was graduated at Trinity college, Dublin, in 1821, in 1825 was ordained a deacon of the Episcopal church, and afterward officiated for a short time as curate in the diocese of Chester, England. Returning to Ireland, he served for six years as curate under the late archbishop of Tuam. In 1832 he emigrated to Canada and became rector of St. Paul's church, London, which charge he kept until 1857, when he was elected bishop of the new diocese of Huron.

CROOK, George, soldier, b. near Dayton, Ohio, 8 Sept., 1828. He was graduated at the

U. S. military academy in 1852, and was on duty with the 4th infantry in California in 1852–'61. He participated in the Rouge river expedition in 1856, and commanded the Pitt river expedition in 1857, where he was engaged in several actions, in one of which he was wounded by an arrow. He had risen to a captaincy when, at the beginning of the civil war, he returned to the east and became colonel of the 36th Ohio infantry. He afterward served in the West Virginia campaigns, in command of the 3d provisional brigade, from 1 May till 15 Aug., 1862, and was wounded in the action at Lewisburg. He engaged in the northern Virginia and Maryland campaigns in August and September, 1862, and for his services at Antietam was brevetted lieutenant-colonel, U. S. army. He served in Tennessee in 1863, and on 1 July he was transferred to the command of the 2d cavalry division. After various actions, ending in the battle of Chickamauga, he pursued Wheeler's Confederate cavalry from the 1st to the 10th of October, defeated it, and drove it across the Tennessee with great loss. He entered upon the command of the Kanawha district in western Virginia in February, 1864, made constant raids, and was in numerous actions. He took part in Sheridan's Shenandoah campaign in the autumn of that year, and received the brevets of brigadier-general and major-general in the U. S. army, 13 March, 1865. Gen. Crook had command of the cavalry of the Army of the Potomac from 26 March till 9 April, during which time he was engaged at Dinwiddie Court-House, Jettersville, Sailor's Creek, and Farmville, till the surrender at Appomattox. He was afterward transferred to the command of Wilmington, N. C., where he remained from 1 Sept., 1865, till 15 Jan., 1866, when he was mustered out of the volunteer service. After a six weeks' leave of absence he was assigned to duty on the board appointed to examine rifle tactics, was commissioned lieutenant-colonel of the 23d infantry, U. S. army, on 28 July, 1866, and assigned to the districts of Boisé, Idaho, where he remained until 1872, actively engaged against the Indians. In 1872 Gen. Crook was assigned to the Arizona district, to quell the Indian disturbances. He sent an ultimatum to the chiefs to return to their reservations or "be wiped from the face of the earth." No attention was paid to his demand, and he attacked them in the Tonto basin, a stronghold deemed impregnable, and enforced submission. In 1875 he was ordered to quell the disturbances in the Sioux and Cheyenne nations in the northwest, and defeated those Indians in the battle of Powder River, Wyoming. In March another battle resulted in the destruction of 125 lodges, and in June the battle of Tongue River was a victory for Crook. A few days later the battle of the Rosebud gave him another, when the maddened savages massed their forces and succeeded in crushing Custer. (See Custer, George Armstrong.) Crook, on receiving re-enforcements, struck a severe blow at Slim Buttes, Dakota, and followed it up with such relentless vigor that by May, 1877, all the hostile tribes in the northwest had yielded. In 1882 he returned to Arizona, forced the Mormons, squatters, miners, and stock-raisers to vacate the Indian lands on which they had seized, encouraged the Apaches in planting, and pledged them the protection of the government. In the spring of 1883 the Chiricahuas intrenched themselves in the fastnesses of the mountains on the northern Mexican boundary, and began a series of raids. Gen. Crook struck the trail, and, instead of following, took it backward, penetrated into and took possession of their strongholds, and, as fast as the warriors returned from their plundering excursions, made them prisoners. He marched over 200 miles, made 400 prisoners, and captured all the horses and plunder. During the two years following, he had sole charge of the Indians, and in that time no depredation occurred. He set them all at work on their farms, abolished the system of trading and paying in goods and store orders indulged in by contractors, paid cash direct to the Indians for all his supplies, and stimulated them to increased exertion. The tribes became self-supporting within three years.

George Crook

CROOKS, George Richard, author, b. in Philadelphia, Pa., 3 Feb., 1822. He was graduated at Dickinson college in 1840, and in 1841 entered the ministry of the Methodist Episcopal church, and became a missionary in Illinois. He was called to Dickinson college in 1842 as classical and mathematical tutor, in 1843 became principal of the Collegiate grammar-school, and in 1846 adjunct professor of Latin and Greek. In 1848, having returned to the ministry, he was stationed successively at Philadelphia, Wilmington, New York, and Brooklyn. In 1860 he became editor of "The Methodist." In conjunction with Dr. McClintock, he has prepared a series of "First Books" in Latin and Greek (1846–'7); supervised an edition of Poutler's "Analogy," for which he furnished an analysis, index, and biography (1852); and, in conjunction with Prof. A. J. Schem, published a "Latin-English School Lexicon" (1858).

CROOKS, James, Canadian merchant, b. in Kilmarnock, Scotland, in 1778; d. in West Flamborough, Ontario, in 1860. He was one of the earliest settlers in Upper Canada, making his home at Niagara in 1794. He established the first paper-mill, and sent the first load of wheat and flour from Upper Canada to Montreal. During the war of 1812 he served with distinction at Queenstown and other points on the Niagara frontier. He was soon afterward elected to the assembly, and ultimately became a member of the legislative council. —His son, **Adam**, Canadian statesman, b. in West Flamborough, Ontario, 11 Dec., 1827; d. 28 Dec., 1885, was graduated with honors at King's college, Toronto, in 1850, admitted to the bar in 1851, and distinguished himself as an equity lawyer. He was for eight years vice-chancellor of the University of Toronto (formerly King's college). He contested the representation of the West Riding of Toronto in the Ontario legislative assembly in 1867 as a liberal, and was defeated, but was elected by the same constituency in 1871, and appointed attorney-general in Mr. Blake's cabinet. He became provincial treasurer under Mr. Mowat in 1872, and minister of education in 1876, holding the two portfolios until 1877, when he resigned the treasurer's, but retained that of the minister of

education until 1883, when he was judicially declared insane and confined in a private asylum at Hartford, Conn. Though his administration of the department of education was successful in a certain sense, his concessions to the Catholic hierarchy of Ontario in deleting passages obnoxious to them from Collier's school history of England, and the discarding of one of Sir Walter Scott's poems as a teachers' examination class-book, for a similar reason, gave great offence to the majority of the liberal party, as well as to the conservatives.

CROOKSHANKS, George, Canadian pioneer, b. in New York in 1773; d. in Toronto, 21 July, 1859. His father, a native of the Orkney islands, emigrated to Shrewsbury, N. J., about 1775, but, being a loyalist, soon left the United States and settled in New Brunswick. The son went to Canada in 1796. During the war of 1812–'5 he directed the construction of military roads, and attended to the transportation of cannon, etc., for the army. When York (now Toronto) was captured by the Americans, he followed the British forces to Kingston, and his house in York became the headquarters of the American commander. He was for many years a member of the legislative council, and was noted for benevolence and charity, when systematized charity was unknown. He contributed largely toward the erection of St. James Cathedral, Toronto.

CROPPER, John, soldier, b. in Virginia in 1756; d. at Bowman's Folly, Accomac co., Va., 15 Jan., 1821. He was a captain in the 9th Virginia regiment of the Revolutionary forces in 1775, was soon promoted to be major of the 5th, engaging in the battle of Brandywine, where his regiment suffered severely, and became colonel of the 7th, taking part in the battles of Germantown and Monmouth. He was made lieutenant-colonel of the 11th regiment on 15 May, 1778, and afterward promoted to be its colonel.

CROPSEY, Jasper Francis, painter, b. in Rossville, N. Y., 18 Feb., 1823. After studying architecturé for five years he turned his attention to landscape painting, under the instruction of Edward Maury. He visited England, France, Switzerland, and Italy in 1847, went abroad again in 1855, and resided seven years in London, sending his pictures to the Royal academy and to the International exhibition of 1862. After his return home, in 1863, he opened a studio in New York, where he resided until 1885, when he removed to Hastings-on-Hudson. He has been since 1851 a member of the National academy. His works include "Jedburgh Abbey"; "Pontine Marshes" (1847); "Backwoods of America" (1857); "Richmond Hill" (1862); "Greenwood Lake" (1870); "Lake Nemi in Italy" (1879); "Old Church at Arreton, Isle of Wight" (1880); "Ramapo Valley" (1881); "Autumn on the Hudson" (1882); "Wawayanda Valley" (1883); "Springtime in England" (1884); "October in Ramapo Valley" (1885); "Autumn on Lake George," and "A Showery Day" (1886).

CROSBY, Dixi, surgeon, b. in Sandwich, N. H., 8 Feb., 1800; d. there, 26 Sept., 1873. Dr. Crosby received a classical education, but it is not known that he was a graduate of any college. He studied in the medical school of Dartmouth, and received his degree in 1824. In this year he devised a new and ingenious mode of reducing metacarpophalangeal dislocation. After practising his profession at Gilmanton and Laconia, N. H., fourteen years, he removed to Hanover. He was the first to open an abscess at the hip-joint. In 1838 he was called to the chair of surgery in the medical department of Dartmouth, which he occupied until 1841, when he was promoted to the surgical professorship made vacant by the removal of Prof. Mussey to the west. To this chair was added that of obstetrics and diseases of women and children, and Dr. Crosby for twenty-seven years delivered both courses of lectures. At the beginning of the civil war he served in the provost-marshal's office by day and attended to his medical practice at night. In 1868 he turned over the surgical lectures to his associate, and the college did not appoint a full surgical professor till 1871. In 1870 he found himself unable to perform even the divided duty to his satisfaction, and was appointed emeritus professor of surgery, and lectured when he pleased. The degree of LL. D. was conferred on him by Dartmouth in 1867.—His brother, **Nathan,** lawyer, b. in Sandwich, N. H., 12 Feb., 1798; d. in Lowell, Mass., 9 Feb., 1885, was graduated at Dartmouth in 1820, and practised his profession in Gilmanton, N. H., Salisbury, Newburyport, and Lowell, Mass. In 1845–'6 he purchased for the Lowell manufacturing corporations the great lakes of New Hampshire, which now form the reservoirs of water-power for that city. He was commissioned justice of Lowell police court, 19 May, 1846, and held the office till his death. He was the author of "First Half-Century of Dartmouth College," and eulogies on Tappan Wentworth, and Judge S. S. Wilde, of the Massachusetts supreme court, and many lectures and essays on historical and philanthropic subjects. The degree of LL. D. was conferred on him by Dartmouth in 1879.—Another brother, **Alpheus,** educator, b. in Sandwich, N. H., 13 Oct., 1810; d. in Salem, Mass., 17 April, 1874. He was graduated at Dartmouth in 1827, and in 1829–'31 was a tutor. He studied theology at Andover in 1831–'2, and in 1833–'7 was professor of Latin and Greek at Dartmouth, when, after a tour in Europe, during 1836–'7, he entered upon the professorship of Greek alone, occupying the chair for twenty years. After resigning the active duties of his professorship at Dartmouth, he resided chiefly in Hanover, N. H., and Newburyport, Mass., till September, 1854, when he was appointed agent of the Massachusetts board of education and lecturer in the teachers' institutes of that state. In 1857 he became principal of the normal school in Salem, Mass., where he remained until 1865. He was the author of various text-books, including "Greek Lessons," "Greek Tables," "Greek Grammar," "Greek Fables," and an edition of "Xenophon's Anabasis." He also published the "Second Advent" (Boston, 1850), and "First Lessons in Geometry" (New York, 1851).—Another brother, **Thomas Russell,** b. in Gilmanton, N. H., 22 Oct., 1816; d. in Hanover, N. H., 1 March, 1872, was also a surgeon. After graduation at the medical department of Dartmouth in 1841, he began the practice of his profession. At the beginning of the civil war he entered the army, and was put in charge of the Columbian college hospital in Washington. In 1866 he became professor of general and military surgery and hygiene in the National medical college, where he remained until 1870. During 1854–'64 he was professor of physics and natural history in Norwich, Vt., university, in 1866–'70 professor of military surgery in the National medical college, and from 1870 until his death professor of animal and vegetable physiology in the New Hampshire agricultural college.—Dixi's son, **Alpheus Benning,** surgeon, b. in Gilmanton, N. H., 22 Feb., 1832; d. in Hanover, N. H., 9 Aug., 1877, was graduated at Dartmouth in 1853, and at the

medical department there in 1856. Meanwhile he had devoted one year as an assistant surgeon in the marine hospital at Chelsea, Mass. Returning to Hanover, he began practice, but at the beginning of the civil war joined the 1st New Hampshire volunteers as surgeon, and was afterward promoted to brigade-surgeon. In 1862 he resigned, and became associate professor of surgery to his father, who was professor of surgery and anatomy in Dartmouth. On his father's death, in 1868, he became his successor, and occupied the chair until 1877. Dr. Crosby was also, in 1866–'72, a professor in the University of Vermont, in 1869–'70 a lecturer in the University of Michigan, in 1869 a professor and lecturer in Bowdoin college, in 1871–'2 a professor in the Long Island college hospital, and in 1872–'7 professor of anatomy in Bellevue hospital medical college. In June, 1877, he presided at the annual meeting of the New Hampshire medical society, and delivered an address upon "The Ethical Relations of Physician and Patient." Many of his medical lectures have been published.—Nathan's son, **Stephen Moody,** b. in Salisbury, Mass., 14 Aug., 1827, was educated in the Boston Latin-school and the Lowell high-school, graduated at Dartmouth in 1849, and at Harvard law-school in 1852. At the beginning of the civil war he entered the national service, was paymaster from 1862 till 1866, and brevetted lieutenant-colonel for meritorious services. He was elected representative in the state legislature in 1869, was state senator in 1870–'1, state director of the Boston and Albany railroad for 1871–'2, commissioner of the Hoosac tunnel in 1874–'5, and treasurer of the Massachusetts Trust company in 1870–'83, when he became president of that corporation.

CROSBY, Eben, soldier. Of his early life nothing is known. He served with distinction in the national army throughout the civil war, losing an arm at Gettysburg. He received, on 28 July, 1866, the appointment of second lieutenant of infantry in the U. S. army, and on 27 May, 1869, was assigned to service on the western border. He was killed by Indians, near Heart river, fifteen miles from Fort Rice, while returning from the Yellowstone expedition, 3 Oct., 1872.

CROSBY, Ebenezer, physician, b. in Braintree, Mass., 30 Sept., 1753; d. 16 July, 1788. He was a son of Judge Joseph Crosby, and was graduated at Harvard in 1777, and at the medical department of the University of Pennsylvania in 1780. He served through the Revolutionary war as surgeon of Gen. Washington's guards, and was one of the original members of the Society of the Cincinnati. At the close of the war he married Catharine, daughter of William Bedlow, and niece of Col. Henry Rutgers, of New York, and became a physician in that city. He was also professor of obstetrics at Columbia college, and one of the trustees of that institution until his death.—His son, **William Bedlow,** philanthropist, b. in New York city, 7 Feb., 1786; d. there, 18 March, 1865. His parents died when he was two years old, and he was adopted by Col. Henry Rutgers, his mother's uncle, from whom he received a large part of the old Rutgers estate, comprising most of the present seventh ward of New York city. He never engaged in business, but gave his time and attention to the care of his property and to works of benevolence. He was connected with many societies, and spent a large part of his income in private charities. By virtue of his father's service in the war of the Revolution, he was made a member of the Society of the Cincinnati.—His grandson, **Howard,** b. in New York city, 27 Feb., 1826, was graduated at the University of the city of New York in 1844, and became professor of Greek in that institution in 1851. In 1859 he was called to the chair of Greek at Rutgers. Two years later he entered the ministry of the Presbyterian church, and united the duties of pastor of the first church of New Brunswick with those of his professorship. In 1863 he gave up his work at New Brunswick to become pastor of the Fourth avenue Presbyterian church in New York city, which place he still holds. He also held the office of chancellor of the University of New York from 1870 till 1881, and has been since 1864 a member of its council. In 1859 he received the degree of D. D. from Harvard, and in 1871 that of LL. D. from Columbia. He was chosen moderator of the general assembly of the Presbyterian church of the United States in 1873, and has often been a delegate to that body. In 1877 he was a delegate to the first Presbyterian general council at Edinburgh. In addition to his work as an educator and clergyman, Dr. Crosby has taken a lively interest and exerted a beneficent influence in public affairs, particularly in advocating temperance as distinguished from total abstinence. In 1877 he took the principal part in founding the Society for the Prevention of Crime, whose chief object is the reduction of the number of saloons and the restriction of the liquor traffic. Through this society, of which he has been president since its foundation, and apart from it, he has done much in this great work, influencing legislation and the municipal government of his own city in so far as it has relation to the regulation of intemperance and crime. He has also been actively interested in the welfare of the Indians, and in the procurement of an international copyright law. His published works include "Lands of the Moslem," written after a tour in the east (New York, 1851); "Œdipus Tyrannus of Sophocles," edited with notes (1851); "Scholia on the New Testament" (1861); "Social Hints" (1866); "Life of Jesus" (1870); "Bible Companion" (1870); "Healthy Christian" (1871); "Thoughts on the Pentateuch" (1873); "Notes on Joshua" (1875); "Commentary on Nehemiah" (1876); "The Christian Preacher" (1879); "The Humanity of Christ" (1880); and "Commentary on the New Testament" (1885). He has also written largely for periodicals, and was a member of the American committee to revise the New Testament.—Howard's nephew, **John Schuyler,** soldier, b. in Albany, N. Y., 19 Sept., 1839. He was educated in the New York schools and at the University, but before graduation made a tour of the world. At the beginning of the civil war he entered the regular army as second lieutenant of artillery, served with his battery under McClellan in the Army of the Potomac, and in the Florida campaign of 1862 was transferred to the Department of the Gulf under Gen. Banks, and brevetted captain after the Teche campaign. He carried the first despatches from the Red river

to Farragut, for which he was brevetted major, and also brevetted major and lieutenant-colonel in the regular army for his services at Sabine Cross-Roads and Pleasant Hill. In August, 1864, he was commissioned colonel of the 7th New York heavy artillery, but declined the appointment, becoming assistant adjutant-general on the staff of Gen. Canby in the Department of the Gulf, and being afterward transferred to Sheridan's staff. In 1866 he served in the campaigns of Sheridan and Custer against the Indians. He resigned in 1872, and was appointed consul to Florence, Italy, in 1876. He became governor of Montana on 4 Aug., 1882, took an active part in preventing the Yellowstone park from falling into the hands of a cattle syndicate, and in November, 1884, was appointed first assistant postmaster-general, but resigned 4 March, 1886.

CROSBY, Enoch, patriot, b. in Harwich, Mass., 4 Jan., 1750; d. in Brewsters, N. Y., 26 June, 1835. He was supposed to be the original of "Harvey Birch" in Cooper's "Spy." In his infancy his parents removed to Southeast, Dutchess co., N. Y., and by a series of disasters were reduced to poverty. At the age of sixteen he was apprenticed to a cordwainer. At the beginning of the Revolutionary war he joined the Continentals, and served in the Lake Champlain campaign for several months, then became ill and was sent home. On his recovery he shouldered his musket and set out on foot for the American camp. On his journey an incident, of which he took advantage, revealed a deep-laid conspiracy, upon which he successfully studied and acted. The result was the prompt arrest of a band of tories, and his own appointment to a place in the Secret Service Department. He became a most successful worker, and by his shrewdness prevented various catastrophes to the patriot cause. After many hair-breadth escapes he finally joined the command of Lafayette, under whom he served till the end of the war, when he purchased a farm and devoted himself to agriculture for the rest of his life. The story of his secret-service life, which was thought to be incorporated in Cooper's "Spy" (though Cooper had never heard of him), was dramatized, and Mr. Crosby was on one occasion present at a representation of the play in New York city, and, as the hero, received the plaudits of the multitude. His narrative, taken from his own lips by Capt. H. L. Barnum, was published under the title of "The Spy Unmasked" (New York, 1828).

CROSBY, Peirce, naval officer, b. near Chester, Delaware co., Pa., 16 Jan., 1823. He was educated at a private school, and was appointed in 1838 midshipman from Pennsylvania. He sailed in 1842 on the frigate "Congress" to the Mediterranean, serving on her six months, when he returned to the United States. In May, 1844, he was promoted to passed midshipman, and served on the coast survey in 1844–'6. He was six months on the "Decatur," in the gulf of Mexico during the Mexican war, participated in the attack and capture of Tuxpan and Tobasco, and then served a year on the "Petrel." Peace being declared in 1848, he was transferred to other duties, and commissioned lieutenant, 3 Sept., 1853. At the beginning of the civil war Lieut. Crosby served in Chesapeake bay, keeping the communications open between Annapolis and Havre de Grace, was detailed, on the night prior to the battle of Big Bethel, to transport troops across Hampton creek, and also upon their return from their unsuccessful expedition. In the attack on Forts Hatteras and Clark he commanded the "Fannie," a light-draught steamer, and superintended the landing of troops, until the surf swamped and broke his boats. He then took a ship's heavy launch and landed two more boat-loads of men; but the sea became so heavy that the launch was dashed upon the shore and the crew hurled out. He succeeded in landing 300 men, but, on account of the bad weather, the squadron stood off seaward, leaving him and his companions upon shore. Lieut. Crosby put out a strong picket in front of the enemy's batteries, thus preventing their making a reconnoisance and ascertaining his weakness. On the following day the squadron returned and captured the forts. In the winter of 1861–'2 he took command of the gun-boat "Pinola," and joined the Gulf squadron under Farragut. On his way he captured the "Cora," loaded with cotton. On arriving at the mouth of the Mississippi, he co-operated with the "Itasca" in breaking the chain barrier across the river below Forts Jackson and St. Philip, and participated in the capture of New Orleans, and also at the passage and repassage of the batteries at Vicksburg, 30 June and 15 July. He was promoted to commander, 3 Sept., 1862, and appointed fleet-captain of the North Atlantic squadron, and did good service in various expeditions. In the winter of 1863 he took command of the "Florida," destroyed two blockade-runners at Masonboro inlet, was transferred to the "Keystone State" in 1864, and captured five blockade-runners, causing many others to throw overboard their cargoes in order to escape. In 1864–'5 he was in command of the "Metacomet," and planned and superintended the removal, by the use of drag-nets, of 140 torpedoes which interfered with the approaches to Mobile, successfully clearing the track so that vessels passed up the river and forced the surrender of the city. In 1865 he was transferred to the command of the "Shamokin," and sailed in her for the coast of Brazil, where he remained until 1868. On 27 May, 1868, while yet in Brazilian waters, he was promoted to a captaincy, and returned to the United States, becoming inspector of ordnance at Norfolk navy-yard. He was promoted to commodore, 3 Oct., 1874, made rear-admiral, 10 March, 1882, and assigned to the command of the Asiatic squadron. In 1883 he was placed on the retired list. He had been in active service more than forty-eight years, over twenty-three of which were at sea.

CROSBY, William George, lawyer, b. in Belfast, Me., in 1806; d. there in 1881. He was graduated at Bowdoin in 1823, and studied and practised law in his native town. Gov. Crosby was one of the two whigs that held the office of governor, Edward Kent being the other. In 1853 the Maine law and the pro-slavery tendencies of the democracy lost that party the control of both branches of the legislature, which elected Mr. Crosby governor, and he was re-elected by the legislature in 1854. After the close of his term he took no active part in politics. During the civil war his sympathies were with the Union, but at its close he affiliated with Andrew Johnson and was a democratic candidate for congress, but was defeated. He was prominent in promoting the public-school system of Maine. While in college he published a small volume of poems. He was a contributor to the "Token," a Boston annual, edited by N. P. Willis; "The Legendary," which illustrated the scenes, romances, and legends of our own country; and the "Bowdoin Poets," and was the author of "Poetical Illustrations of the Athenæum Gallery."

CROSBY, William Otis, geologist, b. in Decatur, Ohio, 14 Jan., 1850. He was graduated at the Massachusetts institute of technology in 1876, where he was an assistant in 1876–'80, instructor in 1880–'3, and assistant professor of

mineralogy and lithology since 1883. In 1875 he was appointed assistant in the Boston museum of natural history. Prof. Crosby is a member of numerous scientific societies, and has lectured in the Lowell course. He has travelled extensively throughout the United States, Canada, and the West Indies, and has published memoirs on the geology of the localities visited in various scientific journals. "Native Bitumens and the Pitch Lake of Trinidad" (1879) is one of his most important papers. He is the author of "Common Minerals and Rocks" (Boston, 1881; enlarged ed., 1886).

CROSMAN, George Hampton, soldier, b. in Taunton, Mass., in Nov., 1798; d. in Philadelphia, Pa., 28 May, 1882. He was graduated at the U. S. military academy in 1823, assigned to the 6th infantry, and served on frontier and garrison duty. He was promoted to first lieutenant on 30 Aug., 1828, and made assistant quartermaster on 15 Oct., 1830. He performed the duties of this office in the Indian country during the Black Hawk war of 1832, and in the Florida war of 1836–'7, and was promoted to captain, 30 April, 1837. He was chief quartermaster in the military occupation of Texas in 1845–'6, and distinguished himself at the storming of Palo Alto, 8 May, 1846, receiving the brevet of major for his gallantry on that occasion. He became major on the staff and quartermaster, 3 March, 1847, deputy quartermaster-general with the rank of lieutenant-colonel in 1856, and assistant quartermaster-general with rank of colonel in 1863, serving during this time in charge of various clothing depots and arsenals. From 1864 till 1866 he was occupied in preparing for publication a "Manual for the Quartermaster's Department." He was brevetted brigadier-general and major-general, U. S. army, for his services during the civil war, on 13 March, 1865, and was retired from active service in 1866, but was on duty again in Philadelphia as chief quartermaster of the Department of the East till 1868.—His son, **Alexander Foster,** naval officer, b. in St. Louis, Mo., 11 June, 1838; d. in Greytown, Nicaragua, 12 April, 1872, was appointed to the U. S. naval academy from Pennsylvania, and graduated in 1855. He was attached to the frigate "Congress," of the Mediterranean squadron, in 1856–'8, made master, 4 Nov., 1858, served on the Paraguay expedition of 1858–'9, and was promoted to lieutenant in 1861. He commanded the "Somerset," of the East Gulf squadron, in 1862, was made lieutenant-commander on 16 July of that year, and served in the South Atlantic blockading squadron during the rest of the war, most of the time in the "Wabash." He was with the naval brigade of that squadron on Gen. Hatch's expedition to sever the railroad from Charleston to Savannah, and co-operated several times with the army on Stono river, engaging Fort Lamar once. He was honorably mentioned in Commander George H. Preble's official report of 10 Jan., 1865. After the war he served on the "Ossipee," the "Onward," and at Portsmouth navy-yard. He was commissioned commander in 1870, ordered to the command of the isthmus surveying expedition in January, 1872, and was drowned in the harbor of Greytown. At the time of his death he was preparing a book on seamanship.

CROSS, Charles E., soldier, b. in Massachusetts in 1837; d. near Fredericksburg, Va., 5 May, 1863. He was graduated at the U. S. military academy in May, 1861, standing second in a class of forty-five, and was assigned to the engineer corps. He was engaged in drilling volunteers at Washington, D. C., and as assistant engineer in constructing the defences of that city till March, 1862, participating in the battle of Bull Run on 21 July, 1861, and being promoted to first lieutenant on 6 Aug. In the Virginia peninsular campaign he was engaged in the siege of Yorktown, and in the construction of roads, field-works, and bridges for the passage of the army and its immense trains over White Oak swamp and Chickahominy river. He commanded an engineer battalion at Antietam, and received the brevet of lieutenant-colonel for gallantry there, having previously been given that of major for services on the peninsula. He was engaged in building the pontoon bridges for the advance and retreat of the army at Fredericksburg, and was employed in throwing up field-works, making surveys, and guarding bridges, in the early part of 1863, being promoted to captain of engineers on 3 March. He was at the battle of Chancellorsville, 3–5 May, 1863, and was killed while assisting to throw a bridge across the Rappahannock, in the face of the enemy. For his gallantry on this occasion he was given, after his death, the brevet of colonel.

CROSS, Charles Robert, physicist, b. in Troy, N. Y., 29 March, 1848. He was graduated at the Massachusetts institute of technology in 1870, and has since been connected with the physical department of that institution as student assistant in 1869–'70, instructor in 1870–'1, assistant professor in 1871–'5, and as professor in 1875–'87. In addition to holding the chair of physics, he is director of the Rogers laboratory, and is also at the head of the department of electrical engineering. The developing and superintending of this latter course, one of the first to be introduced in a college in this country, has occupied his attention for several years, and its success under his administration is his just reward. Prof. Cross is a member of the Appalachian mountain club, and was its president in 1880. He was a delegate to the International congress of Alpine clubs held in Geneva in 1879, and was elected one of its vice-presidents. Besides numerous papers contributed to "Proceedings of the American Academy of Sciences and Arts," "American Journal of Otology," he has published "Course in Elementary Physics" (Boston, 1873) and "Lecture Notes on Mechanics and Optics" (1884).

CROSS, David W., lawyer, b. in Richland (now Pulaski), Oswego co., N. Y., 17 Nov., 1814. He was educated at Hamilton, N. Y., seminary (now Madison university), and removed in 1836 to Cleveland, Ohio, where he began the study of law. He was appointed deputy collector of the port in 1837, and held the office till 1855. He began the practice of his profession in 1844, was chosen township clerk in 1848, and a member of the city council in 1849. In 1855 he entered extensively into coal-mining, and continued in it till 1867. Since then he has been connected with other important enterprises and has done much for the industries of Cleveland. Mr. Cross is an ardent sportsman, and was one of the first to plant successfully the California trout in Ohio waters. He has published "Fifty Years with the Gun and Rod" (Cleveland, 1880), and has been for years a contributor to "Forest and Stream," the "American Field," and the "American Angler."

CROSS, Edward Ephram, soldier, b. in Lancaster, N. H., 22 April, 1832; d. near Gettysburg, Pa., 2 July, 1863. He was educated at Lancaster academy, and began life as a journeyman printer. He went to Cincinnati in 1852, and in 1854 became an editor of the "Cincinnati Times," also acting as correspondent for the "New York Herald" and other journals. In 1854 he canvassed the state of

Ohio for the American party. He was afterward employed as agent of the St. Louis and Arizona mining company, in which he subsequently became a large stockholder. In 1858 he made a trip across the plains, taking the first steam-engine and the first printing-press that ever crossed the Rocky mountains. In 1860 he held a lieutenant-colonel's commission in the Mexican army, and when the news of the attack on Fort Sumter reached him he was in command of a large garrison at El Fuerte. He at once resigned, and hastened to Concord, N. H., where he offered his services to the governor of the state, organized the 5th New Hampshire regiment, and was commissioned as its colonel. Under his command the regiment distinguished itself in many important engagements, and won an enviable reputation for bravery, becoming known as the "Fighting Fifth." He was mortally wounded at the battle of Gettysburg while leading the 1st brigade of the 1st division, 2d army corps. He had been several times wounded before, and Gen. Hancock had strongly recommended his promotion to brigadier-general, but, though he had commanded a brigade for several months with conspicuous gallantry, it was delayed, as has been claimed, through political influence. Col. Cross was the author of numerous poems and prose sketches, written under the pen-name of Richard Everett.

CROSS, George Dilwyn, jurist, b. in Westerly, R. I., 24 Jan., 1799; d. there, 1 Oct., 1872. He was educated at a private school in Lebanon, Conn., and entered public life in 1821. He served six terms in the general assembly, was state senator in 1826–'35 and 1848–'50, chief justice of the court of common pleas for Washington county in 1837–'49, and in 1840 was one of the commissioners for fixing the boundary-line between Connecticut and Rhode Island. In 1842, and again in 1853, he was elected a member of the conventions to amend the state constitution. He held many offices of honor and trust in his native town, interesting himself especially in the matter of free schools.

CROSS, Joseph, clergyman and author, b. in East Brent, Somersetshire, England, 4 July, 1813. He came to the United States in 1825, and in 1829 entered the ministry of the Methodist Episcopal church in Genesee, N. Y. He was for some time professor of English literature in Transylvania university, Lexington, Ky., and became prominent in the southern branch of the church. He was a member of the Nashville general conference of 1856 and its official reporter, and principal of a female seminary at Spartanburg, S. C. He entered the ministry of the Protestant Episcopal church in 1866, and, after holding pastorates at Houston, Tex., Buffalo, N. Y., St. Louis, and other places, became in 1885 rector of the church at Las Vegas, New Mexico. Among his publications are "Headlands of Faith"; "Life and Sermons of Christmas Evans," from the Welsh; "The Hebrew Missionary" (Nashville, Tenn., 1855); "Pisgah Views of the Promised Inheritance," a series of dissertations on the unaccomplished prophecies (New York, 1856); "A Year in Europe" (1859); "Gospel Workers" (Baltimore, 1861); "Stories and Illustrations of the Ten Commandments" (New York, 1862); "Illustrations of the Shorter Catechism" (2 vols., Philadelphia, 1865); "Prelections on Charity"; "Edens of Italy" (New York, 1882); "Knight Banneret" (1882); "Coals from the Altar" (2 vols., 1883); "Pauline Charity" (1883); and "Old Wine and New" (1884). The last four are collections of sermons. Dr. Cross has also compiled a "Church Reader for Lent" (1885). —His wife, **Jane Tandy Chinn,** author, b. in Harrodsburg, Ky., in 1817; d. in Elizabethtown, Ky., in October, 1870, married James P. Hardin, a lawyer, in 1835, but he died in 1842, leaving her with three children, and in 1848 she married Dr. Cross. Mrs. Cross devoted more than twenty years to the education of young ladies, in which she was eminently successful. During a trip through Europe with Dr. Cross, she wrote letters to the "Christian Advocate," and also to the Charleston "Courier," and contributed largely to the Nashville "Home Monthly" and other periodicals. During the civil war she sympathized strongly with the south, and at one time she and her two daughters were arrested, tried by a military tribunal, and sent to jail. Her works, all published in Nashville, Tenn., between 1860 and 1870, include "Heart Blossoms for my Little Daughters"; "Wayside Flowerets"; "Bible Gleanings"; "Drift-Wood"; "Gonzalvo de Cordova," a translation from the Spanish of Florian; "Duncan Adair," a story of the civil war; and "Azile," a story partly of southern experiences during the war (1868).

CROSS, Trueman, soldier, b. in Maryland; d. near the present Fort Brown, Texas, 21 April, 1846. He entered the army as ensign in the 42d infantry, 27 April, 1814; became assistant deputy quartermaster-general, with the rank of captain, 16 June, 1818; major-quartermaster, 22 May, 1826; and assistant quartermaster-general, with the rank of colonel, 7 July, 1838. He was chief of the quartermaster's department of the army of occupation from 10 Oct., 1845, till his death, which he met at the hands of Mexican banditti. Col. Cross published "Military Laws of the United States" (Washington).—His brother, **Osborne,** soldier, b. in Maryland in 1803; d. in New York city, 15 July, 1876, was graduated at the U. S. military academy in 1825, assigned to the infantry, and served on garrison, frontier, and commissary duty. He was made first lieutenant on 31 Dec., 1831, assistant quartermaster, 1 Jan., 1836, and became captain in the first infantry, 7 July, 1838. He was chief quartermaster of Wool's division in 1846–'7, and of the Army of Mexico in 1848, promoted to major on 24 July, 1847, and served until the civil war, during which he was chief quartermaster of various posts and camps. He was made deputy quartermaster-general, 26 Feb., 1863, and on 13 March, 1865, was brevetted brigadier-general in the regular army. He was promoted to colonel, 29 July, 1866, and on the same day was retired.

CROSWELL, Andrew, clergyman, b. in Charlestown, Mass., in 1709; d. in Boston, Mass., 12 April, 1785. He was graduated at Harvard in 1728, ordained in Groton, Conn., 14 Oct., 1738, and on 6 Oct., 1738, was installed over a society in Boston formed by persons from other churches. He was active as a controversialist. Among his numerous publications are "Reply to a Book entitled 'A Display of God's Special Grace'" (1742); "The Apostle's Advice to the Jailor Improved; being a Solemn Warning against the Awful Sin of Soul-Murder" (1744); "Heaven Shut against Arminians and Antinominians" (1747); "Remarks on Bishop Warburton's Sermon before the Society for the Propagation of the Gospel" (1768); and "Remarks on the Satirical Drollery at Cambridge, Last Commencement Day" (1771).

CROSWELL, Charles M., statesman, b. in Newburg, N. Y., 31 Oct., 1825; d. in Adrian, Mich., 13 Dec., 1886. He was apprenticed to the carpenter's trade in Adrian, but in his twentieth year began the study of law, and soon became deputy county clerk. In 1850 he was city registrar, and was re-elected in 1852. Mr. Croswell became

mayor of Adrian in 1862, and in the autumn of that year entered the state senate. After serving in this capacity three terms, he was successively president of the Constitutional convention in 1867, elector-at-large on the republican ticket in 1868, speaker of the lower house of the legislature in 1874, and later secretary of the State board of charities. After filling the office of governor of Michigan in 1876, he was re-elected in 1878.

CROSWELL, Harry, clergyman, b. in West Hartford, Conn., 16 June, 1778; d. in New Haven, Conn., 13 March, 1858. He was educated under the care of Rev. Dr. Perkins and Dr. Noah Webster. When quite young, he entered his brother's printing-office in Catskill, N. Y., and soon became editor of a paper issued there. He founded a Federalist newspaper called the "Balance" in Hudson, N. Y., in 1802, which became noted for the bitterness and scathing sarcasm of its editorials; and Mr. Croswell became involved in many libel suits. The most celebrated of these was caused by an article on Jefferson, published in the "Wasp," a paper controlled by Mr. Croswell, and Alexander Hamilton's last and one of his finest speeches was made in Croswell's defence at the trial. Croswell afterward edited a political newspaper in Albany, whither he removed in 1809, and was again prosecuted for libel by a Mr. Southwick, who recovered damages. Croswell called on his friends for money to make good this amount, and on their refusal determined to enter the ministry of the Protestant Episcopal church, though he had been brought up a Congregationalist. He was ordained deacon, 8 May, 1814, and had charge of Christ church, Hudson, till 1 Jan., 1815, when he became rector of Trinity church, New Haven, Conn., then the only Episcopal church in the city, holding services in an old wooden building on Church street till the opening of the new church edifice, on 22 Feb., 1816. He remained in New Haven till his death. One who knew him writes: "His tall figure and manly form, clerical garb, and high-topped boots with knee-buckles, impressed every beholder as they saw him walk the streets of New Haven. He was not a great preacher, but he had an extraordinary knowledge of human nature, and could ingratiate himself into every man's heart." Trinity college gave him the degree of D. D. in 1831. He published "Young Churchman's Guide" (4 vols.); "Manual of Family Prayers" (New Haven); "Guide to the Holy Sacrament"; and a "Memoir" of his son, Rev. William Croswell, D. D. (New York, 1854). He left in manuscript "Annals of Trinity Church" and a voluminous diary. See "Letters of Waldegrave," by Rev. G. W. Nichols (New York, 1886).—His son, **William,** clergyman, b. in Hudson, N. Y., 7 Nov., 1804; d. in Boston, Mass., 9 Nov., 1851, was graduated at Yale in 1822, taught a select school in New Haven, with an elder brother, and in 1824 was engaged with his cousin, Edwin Croswell, as assistant editor of the Albany "Argus." He entered the General theological seminary in New York in 1826, and pursued his studies with Bishop Brownell, in Hartford, in 1827, at the same time editing the "Episcopal Watchman." He was ordained in 1828, and, after holding several pastorates, became rector of the recently organized Church of the Advent in Boston, where he remained till his death. His manner of conducting the church services led to a controversy with Bishop Eastburn, by whom he was officially censured. His life was one of charity and religious devotion. Trinity college gave him the degree of D. D. in 1846. He wrote numerous short lyrical poems, some of which were published in his father's memoirs of him, and his "Poems, Sacred and Secular," were edited, with a memoir, by Rev. A. Cleveland Coxe, D. D. (New York, 1859).—Harry Croswell's nephew, **Edwin,** journalist, b. in Catskill, N. Y., 29 May, 1797; d. in Princeton, N. J., 13 June, 1871, became assistant editor of his father's paper, the "Catskill Recorder," his first article being a defence and vindication of the soldiers drafted for the defence of New York during the war of 1812. After the retirement of his father, his management of the "Recorder" attracted the attention of the democratic leaders, and in 1824 he was invited to Albany by Martin Van Buren, Benjamin F. Butler, and others, to edit the "Argus," and also to become state printer. Mr. Croswell remained in Albany thirty years, changed the "Argus" from a semi-weekly to a daily journal, and made it one of the chief democratic organs in the country. As a member of the so-called "Albany Regency," a group of politicians who directed the party councils in the state, it was his duty to preserve order in the ranks through the columns of his journal, and to his tact in performing this duty may be largely ascribed the position of the democrats in New York at that time. The leading articles in the "Argus" were copied in the minor party papers throughout the state as embodying all that was sound of democratic principles, and for many years it was regarded as political apostasy to question the authority of the party organ. When the whigs obtained possession of the state in 1840, Mr. Croswell was succeeded in the office of state printer by Thurlow Weed, but held it again from 1844 till 1847. Subsequently he found himself opposed to Martin Van Buren and others of his early political associates, through a split in the party. He retired from journalism in 1854 and engaged in business in New York. He published numerous addresses.

CROTHERS, Samuel, clergyman, b. near Chambersburg, Pa., 22 Oct., 1783; d. in Oswego, Ill., 20 July, 1856. He went to Lexington, Ky., with his father in 1787, entered the academy there in 1798, and, after studying at the New York theological seminary, returned to Kentucky in 1809, and was licensed to preach by the Kentucky presbytery. After a year of missionary work, he was settled, in 1810, over the churches of Chillicothe and Greenfield, Ohio, but in 1813 devoted himself to the latter alone. In company with his former teacher in New York, Dr. Mason, he opposed close communion, and the exclusive use of what has been called inspired psalmody. Trouble growing out of his opinions on these subjects led him, in 1818, to resign his charge and move to Winchester, Ky.; but he returned to Greenfield in 1820, organized a new church, and remained pastor of it till his death. Dr. Crothers was a concise and vigorous writer and an eloquent preacher. See "Life and Writings of Samuel Crothers," by Rev. A. Ritchie (Cincinnati, 1857).

CROWE, Frederick, missionary, b. in Belgium; d. in New York city, 7 Nov., 1858. He was the son of a British subject. Coming to Balize about 1838, he established himself there as an independent missionary, labored thirteen years in disseminating the scriptures in Spanish America, and was the author of a valuable historical work on Central America. He was expelled from San Salvador, as is said, by the Roman Catholics, because he circulated the Bible, and intended to open a school in San Miguel. After being imprisoned, harassed, and at last driven by mob violence from the country, he came to New York, and soon died.

CROWELL, William, journalist, b. in Middlefield, Mass., in 1806; d. in Flanders, N. J., 19 Aug., 1871. After receiving an academical education, he entered the Baptist ministry, and was pastor for some years at Waterville, Me. He took charge, in 1838, of the "Christian Watchman," the principal Baptist paper in New England, to which he had previously been a large contributor, and conducted it with ability till its consolidation with the "Christian Reflector" in 1848. He then edited the "Western Watchman," in St. Louis, for several years, and during the civil war was pastor of a church in central Illinois. Rochester university gave him the degree of D. D. in 1857. Dr. Crowell was the author of "The Church-Member's Manual of Ecclesiastical Principles"; "The Church-Member's Hand-Book" (Boston, 1850); a "History of Baptist Literature for Fifty Years," for the missionary jubilee volume, and several Sunday-school books.

CROWNINSHIELD, Jacob, congressman, b. in Salem, Mass., 31 March, 1770; d. in Washington, D. C., 14 April, 1808. He was educated for a merchant, and at one time he and three of his brothers were in command of vessels in the India trade. He was a member of the Massachusetts legislature in 1801, and elected to congress, serving from 1803 till 1805. He was appointed secretary of the navy by President Jefferson on 3 March, 1805, but never entered upon his duties, owing to his rapid decline and death, the result of consumption.—Jacob's brother, **Benjamin Williams,** secretary of the navy, b. in Boston, Mass., 27 Dec., 1772; d. there, 3 Feb., 1851, received an English education, and engaged in business in Salem, Mass. He was a state senator in 1811, and on 17 Dec., 1814, appointed secretary of the navy by President Madison. He held the same office in Monroe's cabinet, and resigned in November, 1818. He was a presidential elector in 1820, again a state senator in 1822–'3, and then elected to congress as a democrat from the Salem district, serving from 1 Dec., 1823, till 3 March, 1831. He was a candidate for re-election in 1830, but defeated by Rufus Choate.—His grandson, **Arrant Schuyler,** naval officer, b. in New York state, 14 March, 1843, was graduated at the U. S. naval academy in 1863. He was attached to the steam sloop "Ticonderoga," and participated in both attacks on Fort Fisher, being commended for his efficiency by Capt. Charles Steedman. He was made lieutenant, 10 Nov., 1866, lieutenant-commander, 10 March, 1868, and commander, 25 March, 1880. He is a member of the naval advisory board in New York city.—Benjamin Williams's grandson, **Frederic,** artist, b. in Boston, Mass., 27 Nov., 1845, was graduated at Harvard in 1866, and began the study of water-color drawing in London in 1867 under Rowbotham, devoting himself to landscape-painting in water-colors and in oil. He passed eleven consecutive years in Europe, most of the time in Italy, and studied his profession chiefly under Couture, though he was for one term in the Paris école des beaux arts, under Cabanel. At this time he took up figure-painting. His first work exhibited in public was an allegorical portrait group sent to the Paris salon of 1878. His water-colors are much admired. After his return to this country he became, in 1879, instructor in the art school connected with the Museum of fine arts in Boston, and remained there till 1885. He has lately devoted the greater part of his time to mural painting, and to stained glass.

CROXTON, John Thomas, soldier, b. in Bourbon county, Ky., 20 Nov., 1837; d. in La Paz, Bolivia, 16 April, 1874. He was graduated at Yale in 1857, studied law in Georgetown, Ky., was admitted to the bar in 1858, and began practice in Paris, Ky., in August, 1859. Two years later he was active in the movement for raising Union troops, and went to the front in June, 1861, as lieutenant-colonel of the 4th Kentucky infantry. In March, 1862, he succeeded to the command of the regiment, and in August, 1864, was commissioned brigadier-general. Soon afterward he was brevetted major-general. He participated in the battles of Sherman's army, and at the close of the war was put in command of the military district of southwest Georgia, with headquarters at Macon. In December, 1865, he resigned his commission and returned to Kentucky, where he resumed the practice of law, residing on his farm near Paris. Two or three years later he was active in establishing the "Louisville Commercial" as a republican journal. His exposure during the war and subsequent overwork had greatly impaired his health, and in 1873 he accepted the office of U. S. minister to Bolivia, in the expectation of benefit to his health from it; but it was too late.

CROZER, John Price, manufacturer, b. in Springfield, Delaware co., Pa., 13 Jan., 1793; d. in Upland, Pa., 11 March, 1866. In the manufacture of cotton goods he made an ample fortune, which he largely devoted to philanthropic purposes. In 1858 he erected at Upland, Pa., at a cost of $45,000, a building intended for general education, but which he subsequently gave to the Baptists for a theological seminary. In honor of him as a founder, this institution was called the Crozer theological seminary. His widow and children have endowed it with contributions amounting to $275,000. Mr. Crozer made other large gifts to the cause of education, the American Baptist publication society, and humane institutions.

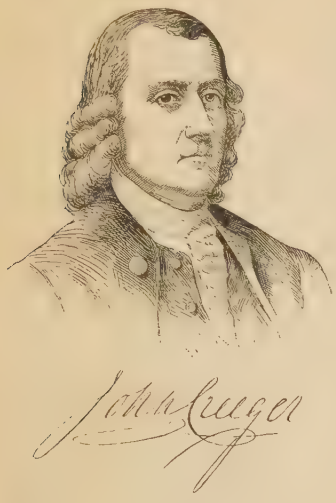
CROZET, Claude, educator, b. in France; d. in 1863. He was educated at the Polytechnic school in Paris, and became an officer of artillery under Napoleon I. He came to the United States in 1816, and on 1 Oct. was appointed assistant professor of engineering at the U. S. military academy at West Point, and on 6 March, 1817, professor. He resigned in 1823, and thereafter acted as a civil engineer.

CRUCE, Francisco, author, b. in Granada, Spain, about 1600; d. in Peru in 1664. He was a Dominican, and held many offices in the province of San Juan Bautista, Peru. He founded the college of Santo Tomás in Lima, and was its professor of theology at the time of his death. He was a voluminous writer, both on theological and political subjects. His principal works, published in Lima, are "Historia del Rosario á Coros," "Discursus pro Occidentalibus," "Cursus Artium," and "Manifiesta obligación del Vasallo."

CRUFT, Charles, soldier, b. in Indiana; d. in Terre Haute, Ind., 23 March, 1883. He was commissioned an officer of volunteers from Indiana, 16 July, 1862, and became a major-general of volunteers, 5 March, 1865. He served with credit throughout the war, and specially distinguished himself in the battles that were fought near Richmond, Ky., 29 and 30 Aug., 1862, having command of a brigade under Gen. Mahlon D. Manson.

CRUGER, John, colonial mayor of New York, b. there, 18 July, 1710; d. 27 Dec., 1792. He early turned his attention to trade, and became eminent as a shipping merchant. Like his father, who was mayor from 1739 till 1744, he filled important political offices. In 1754 he was chosen alderman of the dock ward, and from 1756 till 1765 was mayor.

He was elected to the general assembly in 1759, and in 1761 Mr. Cruger was a leading member of the committee on correspondence, and was associated in the drafting of memorials to the king, the lords, and the commons, "relative to the dangers which threaten the colonies to be taxed by laws to be passed in Great Britain." Again in 1769 he was sent to represent New York city in the last colonial assembly, and was unanimously chosen speaker, which office he held until 1775. He was the first president of the New York chamber of commerce in 1768. In 1775, with thirteen other members of the assembly, he addressed a letter to Gen. Thomas Gage, urging "that no military force might land or be stationed in this province." During the Revolutionary war he retired to Kinderhook, but, after peace was declared, returned to New York.—His brother, **Henry,** merchant, b. in 1702; d. in Bristol, England, 8 Feb., 1780, was a member of the assembly and council of New York, and settled as a merchant in Bristol, England, of which city he was mayor at the time of his death.—**Henry,** son of the preceding, politician, b. in New York in 1739; d. there, 24 April, 1827, established himself in trade, with his father, in Bristol, and succeeded him as mayor in 1781. He was elected to parliament as the colleague of Burke in 1774, and re-elected in 1784, and advocated on all occasions a conciliatory course toward his countrymen. He so severely retorted upon Col. Grant, who said, in parliament, that the colonists would never dare to face an English army, that he was called to order by the speaker. After the war he became a merchant in New York, and was elected to the state senate while yet a member of parliament.—**John Harris,** brother of the preceding, British officer, b. in New York city in 1738; d. in London, 3 June, 1807, succeeded his father as a member of the New York city council, was its mayor in 1764, and at the beginning of the Revolution was its chamberlain. He was a son-in-law of Col. De Lancey, and commanded the 1st battalion of his loyalist corps. In June, 1780, he was captured at a plantation in Belfast, Ga., but was soon exchanged for Col. John McIntosh. In September he made a forced march to Augusta, to relieve Col. Browne, and arrived most opportunely. He distinguished himself at the battle of Eutaw Springs, where his corps formed the British centre. His defence of Ninety-Six, when attacked by Greene in May, 1781, won great praise. His property was confiscated, and he went to England after the war.



CRUSÉ, Christian Frederic, clergyman, b. in Philadelphia, Pa., 27 June, 1794; d. in New York city, 5 Oct., 1864. He was graduated at the University of Pennsylvania in 1815, and after studying theology was ordained in the Protestant Episcopal church by Bishop White, of Pennsylvania, in 1822. He acquired a high reputation for his knowledge of ancient languages. From 1831 till 1833 he was assistant professor in the University of Pennsylvania, and also for a time professor in St. Paul's college, Minn. In 1847 he became rector of Trinity church in Fishkill, N. Y., where he remained until 1853, after which he became librarian in the General theological seminary in New York. His translation of Eusebius's "Ecclesiastical History" (New York; reprinted in London, 1838) is considered the best English version.

CRUSE, Peter Hoffman, writer, b. in Baltimore, Md., in 1795; d. there, 7 Sept., 1832. He was educated at Princeton, and studied law, but subsequently devoted himself entirely to literary pursuits. His contributions appeared principally in the reviews, and for ten years prior to his death he edited the "Baltimore American." During the years 1818–'9 he was associated with John P. Kennedy in the publication of "The Red Book," a fortnightly of local and temporary interest, which contained much playful satire by Kennedy, and some bright poetry by Cruse. He was noted as a brilliant conversationalist.

CRUTTENDEN, Daniel Henry, educator, b. in Galway, N. Y., 27 Feb., 1816; d. in Castleton, N. Y., 21 June, 1874. He was graduated at Union in 1841, and became principal of the school of the Mechanics' institute in New York city. He advocated methods of teaching that are now in general use. He published text-books, including a series of "Systematic Arithmetics" (New York, 1868); "The Philosophy of Language" (1870); and a "Rhetorical Grammar" (1872).

CRUZ, Juan Bautista Valerio de la (crooth), cacique and captain-general of the Chichimecas, b. in Texcoco, Mexico, about 1517; d. in the city of Mexico in 1572. He was a descendant of King Netzalhualcoyotl. When the Spaniards occupied Mexico he was baptized, and, entering the Spanish militia, was appointed ensign of the royal guards two years afterward. Antonio de Mendoza gave him command of 80 Spanish soldiers and 400 Indian archers, and sent him to enlist volunteers and conquer the territories occupied by the Chichimecas. When Mendoza left Mexico, in 1550, he appointed Cruz cacique of all territories that he might conquer, and in 1559 Luis de Velasco advanced him to the rank of captain-general of the Chichimecas. Cruz gave the church and convent of Tula to the Franciscan friars in acknowledgment of their work in favor of the natives, and built the bridge of that city. Charles V. rewarded him with new privileges, and Cruz continued his services during the rest of his life. His remains were buried in the convent of Santiago Tlaltelolco of Mexico.

CRUZ, Rodrigo de la (crooth), soldier, b. in Marbella, Spain, 25 Dec., 1637; d. in Mexico, 16 Sept., 1716. He went to Central America with his father, who had been appointed governor of Costa Rica, in 1656, and afterward succeeded him in that office. He accomplished the conquest of Talamanca, in which he spent a large portion of his private fortune, and the king of Spain rewarded him with the title of Marquis de Talamanca; but he soon entered the order founded by Father Betencourt in Guatemala, and succeeded him as superior, 2 Feb., 1668. He went to Peru, where he founded numerous hospitals, and obtained the incorporation of his order, 26 March, 1687. For this purpose he went to Rome and Madrid, where he remained for nine years, and on his return he founded new institutions and hospitals in Mexico and Peru. He wrote "Constituciones de la Religión Betlemítica fundada en las Indias Occidentales" (Mexico, 1751).

CRUZ, Sor **Juana Inés de la,** Mexican poet, b. in San Miguel de Nepantla, near the city of Mexico, 12 Nov., 1651; d. in Mexico, 17 April, 1695. At the age of five she could read, write, and keep accounts, and at the age of eight composed a poem on the holy sacrament. Soon afterward she was sent to the city of Mexico, learned Latin and other branches rapidly, and asked her parents' permission to disguise herself as a student so that she could enter the university. Not being allowed to do this, she continued her studies privately, and her literary accomplishments soon made her famous in Mexico. The vice-queen retained her as one of the ladies of the household. The viceroy, the Marquis de Mancera, wishing to test her learning and intelligence (she being then seventeen years old), invited several theologians, jurists, philosophers, and poets to a meeting, during which she had to answer, unprepared, many questions, and explain several difficult points on various scientific and literary subjects. The manner in which she acquitted herself astonished all present, and greatly increased her reputation. She was much admired in the viceroyal court for her beauty, but refused several proposals of marriage, and entered first the convent of San José, and subsequently that of San Jerónimo, where she finally took the veil. She then devoted herself for twenty-seven years to her religious duties, as well as to her favorite studies of theology, interpretation of the Scriptures, logic, rhetoric, natural philosophy, mathematics, history, music, and poetry. In 1693 she gave up all studies and exercises unconnected with her religious duties in the convent, and sold her splendid library to help the poor. Two years afterward a terrible scourge desolated the city of Mexico, and Sister Juana Inés, while personally assisting other nuns suffering from the epidemic, became its victim and died. Her remains were buried with extraordinary ceremonies. She was generally known as "The Nun of Mexico," and was also called "The Tenth Muse." Her writings, mostly in verse, include "Amor es laberinto," a classical drama; "Los empeños de una casa," a comedy; "Ovillejos," a satirical poem; "El Neptuno alegórico," and two volumes entitled "Poesías sagradas y profanas."

CUADRA, Pedro Lucio (kwah'-drah), Chilian engineer, b. in the city of Santiago, 14 April, 1842. He studied in the university of his native city, and when still very young was attached to the scientific commission that the government appointed to make a geographical study of the Chilian territory, his personal efforts assuring the success of the commission's work. In 1874 the owners of the newly discovered silver mines at Caracoles, Bolivia, gave Cuadra the general superintendence of the works, and in 1876 he was appointed president of the Bank of Valparaiso. During Pinto's administration Cuadra was several times offered a portfolio in the cabinet, but declined it, and in 1882 he accepted that of finance under President Santa Maria, distinguishing himself by important reforms. Being a member of the cabinet that negotiated the treaty of peace with Spain, he used all his influence in favor of its negotiation, and King Alfonso XII. awarded him the Great Cross of Naval Merit. He was elected senator in 1882 for six years, and was president of the senate in 1886.

CUAUHTEMOTZÍN (kwau-tay-mo-tseen'), which means "Eagle's Eyesight," sometimes called Cuauhtemoc, Quauhtemotzín, Quauhtemoc, Guatemoc, Guatimoc, or Guatimocín, thirteenth and last Mexican king (eleventh monarch, according to other accounts), b. in 1495; d. in 1524. He was the son of Ahuitzol, and married Tecuichpatzín, a daughter of Motecuhzoma (Moctezuma) and the widow of Cuitlahuatl, his own uncle, whom he succeeded on the throne, being elected and crowned about the end of January, 1521. Cuauhtemotzín at once began to strengthen the defences of the city of Mexico; but Cortés, after several successful battles and subsequent agreements with the natives, besieged the city with a large force of Indian allies and his Spanish troops, and finally Cuauhtemotzín and all his warriors surrendered (13 Aug., 1521). The siege lasted 75 days, and cost the Spaniards over 100 men of the 900 present, their allies losing several thousand, while many thousand Mexicans died fighting or from starvation and disease. Cuauhtemotzín had on one occasion, with the approval of the senate, sacrificed four Spaniards and 4,000 Indians, to obtain favor of the gods.

The invaders tortured him to make him tell where his treasures and those of the temples were hidden; and three years afterward he was executed, with the kings of Texcoco and Tlacopan, on suspicion that they had conspired against the Spanish rule. The young emperor endured his torture calmly, and when the Texcoco chief groaned in his death-agony, reproved him, saying, "Do you think I am on a bed of roses?" A monument to Cuauhtemotzín, surmounted by a bronze statue, represented in the illustration, has been erected in the city of Mexico.

CUBA, Dionisio Vives, Count of, Spanish general, b. in the latter part of the 18th century; d. in 1840. He was captain-general of Cuba in 1824, when all Spanish possessions on the American continent had become independent. He had then but few troops under his command, but managed to maintain order and preserve the island of Cuba for Spain without troubles or any sort of violence. In recognition of his valuable services to the mother country, the government rewarded him with high honors, among them the title of Count of Cuba.

CUDEQUALA (coo-da-kah'-lah), Araucanian warrior, b. in the Mariguena valley, Chili, about 1555; d. near Purén, 12 Dec., 1587. While very young he entered the Araucanian army as a private, although he was a nobleman, and gradually won promotion to the grade of general. The general-in-chief, Dayaucura, gave him command of a strong army to attack the city of Angol, which he did without success, but then marched to the city of Arauco, besieged and entered it. Afterward he intended to attack Fort Trinidad, this fortress commanding the passage from Biobio, but a body of Spanish troops under Francisco Hernandez came out and defeated Cudequala, who lost an arm and was otherwise severely wounded. This forced him to retire to the mountains. He was followed thither by the lieutenant-governor of Chili, who attempted an ambuscade, only to be discovered, defeated, and killed, with fifty of his men, 14 Nov., 1586. On

the same day Cudequala was elected general-in-chief by acclamation. In the following year, 1587, Thomas Cavendish, who commanded a predatory expedition of three ships against the Spanish colonies, landed at Quintero, but Cudequala's warriors attacked the English and forced them to sail away, a number of their men having been killed. After some successful operations the Araucanian chief determined to take the city of Angol by surprise, for which he managed to have the Indian inhabitants prepared to set fire to the houses of the Spaniards at an appointed time during the night, while he would have his troops quietly approaching the gates of the place. This was done, and, while the flames consumed many buildings, the frightened inmates ran about the streets only to be horribly dealt with at the hands of the Araucanians. The governor of Ragol hastily gathered some troops, and, after desperate fighting, Cudequala retreated at daybreak. But this did not discourage the Indian general, who soon besieged Purén and defeated a body of Spanish troops sent by the governor to re-enforce the place. Then he proposed to the besieged that they either surrender or enter his own service; but, as his proposals received no attention, Cudequala went near the rampart of the place, riding on a splendid horse taken by himself from the governor, and challenged the commander of the Spanish forces to come out and fight personally with him. The commander, García Ramón, immediately accepted the challenge, and on an appointed day the chiefs met in an open field, each being accompanied by a small number of officers and men. The encounter was very short, for the two opponents at once made a furious attack, riding at full gallop, and Cudequala fell, having been run through with the Spaniard's spear. Even when dying the Araucanian warrior would not admit defeat, and tried in vain to mount his horse again.

CUDWORTH, James, colonist, b. in England about 1612; d. there in 1682. He was an elder brother of Ralph Cudworth, famous among Cambridge Platonists, and came to America in 1634, settling in Plymouth. Later he removed to Scituate, where for several years he was prominent in public affairs, and one of the council of war. He was a brave and prudent officer, and commanded the Plymouth troops during the Indian war with King Philip, winning a military reputation second only to that of Miles Standish. He became unpopular on account of his opposition to the severe measures taken against the Quakers. In 1681 he was made deputy governor, and during the same year sent to England as an agent for the colony, but died soon after his arrival. Some of his letters on public business are still extant.

CUÉLLAR, José T. de (kwayl'-yar), Mexican author, b. at San Luis Potosi, 15 Aug., 1835. He studied at the San Carlos academy in Mexico, and afterward entered the diplomatic service. He was attaché to the Mexican legation at Washington from 1856 till 1858, when he returned to Mexico to fill a place in the foreign office. He accompanied President Juarez to Paso del Norte in his official capacity, and returned to the capital with Juarez in 1867. Having asked for a leave of absence, he retired to his native city in 1868, and there won literary reputation by a novel entitled "El Pecado del Siglo." He was appointed secretary to the Mexican legation at Washington in 1870, and remained there until 1882, then being recalled and subsequently elected a representative to congress. His appointment as chief officer or under-secretary of foreign affairs was made in August, 1886. Among Cuellar's works are these comedies and dramas: "Deberes y sacrificios," "Azares de una venganza," "Natural y figura," "Arte de amar," "Cubrir las apariencias," "Redención," and "Un viaje á Oriente." His novels include "Ensalada de pollos," "Chucho el Ninfo," "Isolina la ex-figurante," "Las jamonas," "Las gentes que son así," and "Gabriel el Cerrajero." He has also written several poems.

CUENECURA (kway-nay-coo'-rah), Araucanian soldier, b. in the province of Catiray, Chili, in 1578; d. in October, 1609. Being hereditary cacique of Catiray, and officer of the Araucanian army under Cuillamachu, he accompanied this chieftain in all his battles against the Spaniards, and finally succeeded him in his command early in 1604. In 1605 he defeated the Spanish troops under the German commander, Lisperger, near Baroa, directed three fierce attacks on that city, and took it, Lisperger having been killed during its defence. In 1607 Cuenecura routed 3,000 Spaniards newly sent from Peru and marching in two columns, headed by Gens. Saravia and Pineda, and every man of that army was either killed or made a prisoner by the Indians. The captain-general of Chili went with 2,000 men to attack him in 1609, but after a well-fought battle retreated. Cuenecura was wounded then, but directed another battle before he recovered, and, seeing that his condition prevented him from continuing the fight, being exhausted, he took his own life on the battle-field. He adopted the use of artillery and other fire-arms taken from the Spaniards, and his Indians became very dexterous in handling their new weapons.

CUEVA, Beatriz de la (kway'-vah), wife of Pedro de Alvarado, the conqueror of Guatemala, b. in Spain early in the 16th century; d. in the city of Guatemala, 11 Sept., 1541. When Alvarado returned to Central America, after his second voyage to Spain in 1539, he had married there Doña Beatriz, a sister of his first wife, Doña Francisca de la Cueva, who died in Vera Cruz in 1530. In 1540 Alvarado was engaged in several expeditions in Mexico, and while crossing the mountains was killed by a fall of his horse early in July, 1541. When this news reached Guatemala, the municipal council elected Doña Beatriz to succeed her husband in the government; but on the day following her inauguration she perished, with many other people, during the terrible earthquakes and floods that destroyed the city, 11 Sept., 1541. Ever since she has been generally called "Doña Beatriz la sin ventura" (Doña Beatriz, the unfortunate).

CUEVAS DÁVALOS, Alonso, Mexican prelate, b. in the city of Mexico, 25 Nov., 1590; d. 2 Sept., 1665. He was the first native Mexican elected to the archiepiscopal see of Mexico. He studied at the college of San Ildefonso, won the doctor's degree in theology, and then filled the chair of theology in the University of Mexico. He was sent to Puebla as first canon of the cathedral in 1635, and distinguished himself by his charitable work during an epidemic in 1642–'3. Eight years afterward he was translated to the capital, and filled high offices both in the cathedral and in the university, after which he was promoted to the bishopric of Oaxaca, where he succeeded in restoring peace among the revolted population of Tehuantepec, the king of Spain thanking him by a special decree, 2 Oct., 1662. He received in June, 1664, his appointment to the see of Mexico, which he occupied until his death. He had begun important reforms, but did not live to finish them.

CUFFEE, Paul, Indian preacher, b. in 1757; d. in Montauk, Long Island, 7 March, 1812. He was a member of the Shinnecock tribe of Indians on

Long Island, and was the fourth missionary employed among them by the New York missionary society, preaching there thirteen years.

CUFFEE, Paul, philanthropist, b. on one of the Elizabeth isles, near New Bedford, Mass., in 1759; d. 7 Sept., 1818. His father was a negro, born in Africa, who had been a slave, and his mother an Indian. He followed a seafaring life, became owner of a vessel, which he manned entirely with negroes, and acquired a large fortune. He was an influential member of the Society of Friends. In his later years he interested himself in the scheme of colonizing American freedmen on the western coast of Africa, corresponded with friends of the enterprise in England and Africa, visited the colony in his own ship in 1811 to study its advantages, and in 1815 carried out thirty-eight colored emigrants and provided means for establishing them in Africa. He applied to the British government for leave to land other companies of colored people in Sierra Leone, but died before the permission came.

CUICUITZCATZÍN (kwee-kweets-cah-tseen′), twelfth king of Texcoco, crowned in 1520. He was a brother of Cacamatzín, or Caminatzín, who, having determined to make war against the Spaniards, would not listen to the entreaties of envoys sent by Cortés. Subsequently the conqueror managed to have him dethroned by Moctezuma, and replaced by Cuicuitzcatzín, but this king ruled his nation only three or four months, as Coanacatzín succeeded him in 1521. After serious trouble with the Spaniards, he was imprisoned and taken to Tlascala, and escaped thence to Texcoco, where his brother Coanacatzín ruled. But the latter, thinking him to be a spy for the Spaniards, ordered his immediate execution.

CUIENTUR (kwee-en′-toor), Araucanian cacique of the province of Nancú, Chili, b. there in 1578; d. in 1627. He entered the Araucanian army as a private, and was gradually raised to the rank of a general after rendering great services to the Araucanians. In 1618 he succeeded Loncotegna in the command of their army, and one of his first operations was to defeat a Spanish detachment and take possession of their 400 horses. In the following year he routed the Spaniards under the mayor of Chillán (who was killed) near that city, and afterward pillaged the whole province. He then attacked the town of San Felipe de Austria, ransacked other neigboring towns, and finally took up a position in the Cangrejeras Pass, to oppose the Spanish troops. Commander Rebolledo first defeated him, but in a second battle was utterly routed by Cuientur. This Araucanian chief captured Neculguenu and killed every man of its garrison. He continued his operations till 1625, when, being tired of warfare, he resigned his command and retired to his own lands for the rest of his life. He used to call himself the eldest son of Fortune.

CUILLAMACHU (kweel-yah-mah′-tchu), Araucanian soldier, b. in the Uthanmapu valley, Chili, in 1534; d. in December, 1603. He was cacique of Uthanmapu, and while very young joined, with the warriors of his tribe, the rest of the Araucanian army. Having taken part in many battles against the Spaniards, he was given the supreme command in 1593, and organized a large army at Lumaco. Two years later he attacked and took Fort Jésus, and then spread his forces about the districts near the Spanish settlements in 1594, causing them great troubles. In 1597 he took the important fortresses of Purén and Lumaco, and on 22 Nov., 1598, surprised in an ambuscade the governor of Chili, Loyola (a nephew of the founder of the Jesuit order), who was crossing the Curalava valley with his family, sixty officers, and three priests, the whole party perishing after a desperate resistance. Cuillamachu immediately ordered that not only all the Araucanians, but the Cuncos and Guilliches also, rise in arms to kill every Spaniard or creole found outside of the fortified cities or towns; and during the year he closely invested the cities of Osorno, Valdivia, Villarrica, Imperial, Cañete, Angol, and Coya, as well as the fortress of Arauco. In the mean time he crossed Biobio river, burned the cities of Concepcion and Chillán, pillaged every populated place in those provinces, and returned to his quarters with a large booty. The royal troops under Gen. Quiñones had several undecisive encounters in 1599 with the Araucanians along the banks of the Biobio, especially at Yumbel, where 2,000 Indians under the cacique made a determined resistance against 2,000 Spanish soldiers. On 24 Nov., at daybreak, he crossed Callavalla river, at the head of 4,000 men, surprised the city of Valdivia, and obtained plunder valued at nearly two million dollars. He then set fire to the buildings, killed many of the people, attacked the ships in the harbor, and returned to his quarters, near the Biobio, with all the Spanish artillery and war material, and over 400 prisoners. In 1600 a Dutch expedition tried to land at Valdivia; but the cacique at once attacked and drove it away. In 1602 the Indian chieftain took possession of the city of Villarrica, which had been closely besieged for nearly three years, and the cities of Osorno and Imperial also surrendered to him in 1603. Cuillamachu was the most famous of the Araucanian generals, and the only one that succeeded in re-establishing independence in his country after it was conquered by the Spaniards. In his long career as a warrior he was wounded forty-four times. On one occasion the governor of Chili invited him to negotiate for peace; but he answered that he would never submit to a foreign power while a drop of blood remained in the veins of his warriors.

CUILLAVILU II (kweel-yah-ve-loo′), cacique of the Araucanian Indians called Puelches, b. in the Yumbel district, Chili, in 1580; d. 3 Oct., 1612. He was noted for his bravery, gave continual trouble to the Spanish authorities, and fought many battles against Merlo, the governor of Chili, and against his successor, Juan Jaraquemada. In 1612 Cuillavilu received a letter from the king of Spain, Philip III., suggesting an arrangement for peace and establishment of the Christian religion; but he paid little attention to it, thinking it was intended to delude him and prepare his ruin, and at once directed new operations, but not long afterward was killed in a battle near Chillán.

CUITLAHUATZÍN, or **CUITLAHUATL** (kweet-lah-wah-tseen′), tenth Mexican or Aztec king (twelfth king, according to other chroniclers), b. in 1490; d. 12 Oct., 1520. Being one of the sons of Axayacatl, he was also the lord of Tztapalapán and a general of the Mexican army, when elected king upon the death of his brother, Moctezuma II. His rank of generalissimo was won in the battles of Atlixco, Mixtecapan, and Tehuantepec. While ruling at Tztapalapán, he improved and enlarged that city by means of important public works. Before and after the occupation of the city of Mexico by the Spaniards he advocated a policy of resistance to the invaders, advised other native princes to oppose any advance made by Cortés, and also sent ambassadors to Tlaxcala to ask aid from that republic. But he was unsuccessful in this attempt, after having caused Cortés the defeat and subsequent troubles that gave rise to the events of

"La noche triste," and died of small-pox, which had recently been introduced into Mexico by a slave of Narvaez. Cuitlahuatzín's rule lasted but three months.

CULBERTSON, Matthew Simpson, clergyman, b. in Chambersburg, Pa., 18 Jan., 1818; d. in China in August, 1862. He was graduated at the U. S. military academy in 1839, and served with the rank of second lieutenant of artillery at Rouse's Point during the Canada border disturbances, and as assistant professor of mathematics at the military academy. He resigned his commission, 15 April, 1841, studied theology at Princeton, and upon graduation in 1844 was ordained as a missionary to China, and labored in that country until his death. He was engaged for several years in preparing a revised Chinese translation of the Bible (1855). He published "Darkness in the Flowery Kingdom, or Religious Notions and Popular Superstitions in North China" (New York, 1857).

CULLOM, Shelby Moore, senator, b. in Monticello, Wayne co., Ky., 22 Nov., 1829. His father settled in Tazewell county, Ill., in 1830, where he became prominent among the pioneers of the state, a member of the legislature, and a trusted friend of Abraham Lincoln. The son received a classical education, began the study of law in Springfield, Ill., in 1853, and as soon as he was admitted to the bar was elected city attorney. He practised law in Springfield, was a candidate for presidential elector on the Fillmore ticket in 1856, elected to the legislature in 1856 and 1860, chosen speaker in his second term, a member of the war commission that sat at Cairo in 1862, and a member of congress from Illinois from 4 Dec., 1865, till 3 March, 1871, representing the Springfield district, which before his election was democratic. During his third term he served as chairman of the committee on territories, conducted an investigation into the question of polygamy in Utah, and secured the passage of a bill for the extirpation of polygamy, which failed to come to a vote in the senate. In 1872 he returned to the Illinois house of representatives, was elected speaker in 1873, and in 1874 served another term in the legislature. After his return from Washington he became a banker at Springfield. He was a member of the Republican national convention in 1868, and, as chairman of the Illinois delegation, placed Gen. Grant in nomination at Philadelphia in 1872 and Gen. Logan in 1884. He was elected governor of Illinois in 1876, and re-elected in 1880, serving from 8 Jan., 1877, to 5 Feb., 1883, when he resigned, having been chosen U. S. senator as a republican, to succeed David Davis, independent democrat, for the term expiring on 3 March, 1889. Mr. Cullom has been prominently connected with the question of railroad regulation. As speaker of the house of representatives he appointed the committee that drafted the stringent railroad law of Illinois, which was one of the first states to take action on the subject. During his service of six years as governor it became his duty to appoint the Illinois railroad commissioners, and to see that they secured the enforcement of the law, which was sustained by the courts and practically put in operation during his administration. As senator he has been zealous and active in endeavoring to secure national legislation upon the same subject, and in 1885, as chairman of the senate committee on interstate commerce, conducted an investigation into the question of the regulation of railroad corporations by national legislation. His report upon this subject, submitted to the senate, 18 Jan., 1886, is an elaborate review of the whole subject, and has attracted attention at home and abroad, resulting in the passage by the senate of the bill that bears his name, which was referred to a conference committee of the two houses.

CULLUM, George W., soldier, b. in New York city, 25 Feb., 1809. He was graduated at the U. S. military academy in 1833, entered the engineer corps, was promoted captain on 7 July, 1838, superintended the construction of fortifications and other public works at New London, Conn., and in Boston harbor, organized ponton-trains for the army in Mexico, was engaged in 1847–'8 in preparing a "Memoir on Military Bridges with India-Rubber Pontons," and from 1848 till 1855 was instructor of practical military engineering at the military academy, except two years, during which he travelled abroad on sick-leave. In 1853–'4 he constructed for the treasury department the assay-office in New York city, after which he was employed for five years on fortifications and harbor improvements at Charleston, S. C., and superintended works at New Bedford, Newport, New London, and the eastern entrance to New York harbor. On 9 April, 1861, he was appointed aide-de-camp to the commander-in-chief of the army. He was promoted major of engineers on 6 Aug., 1861, commissioned brigadier-general of volunteers on 1 Nov., appointed chief engineer of the Department of the Missouri, was chief of staff to Gen. Halleck while commanding the Departments of the Missouri and the Mississippi, and general-in-chief of the armies, directed engineer operations on the western rivers, was for some time in command at Cairo, was engaged as chief of engineers in the siege of Corinth, and, after accompanying Gen. Halleck to Washington, was employed in inspecting fortifications, examining engineering inventions, and on various engineer boards. He was also a member of the U. S. sanitary commission from 1861 till 1864. In the autumn of 1864 he was employed in projecting fortifications for Nashville, Tenn., which had been selected as a base of operations and depot of supplies for our western armies. From 8 Sept., 1864, till 28 Aug., 1866, he was superintendent of the U. S. military academy. He was brevetted colonel, brigadier, and major-general for meritorious services during the rebellion on 13 March, 1865, and mustered out of the volunteer service on 1 Sept., 1866. He was a member of the board for improving the defences of New York, and then of the board for fortifications and river and harbor obstructions required for the national defence from 1867 till 13 Jan., 1874, when he was retired from active service, after which he resided in New York, and devoted himself to literary, scientific, and military studies. He was chosen in that year vice-president of the American geographical association, and has been president of the geographical library society since 1880. He has published a "Biographical Register of the Officers and Graduates of the United States Military Academy, from 1802 to 1850," afterward enlarged to cover the period until the army reorganization of 1867, with a supplement continuing the register to 1879 (New York, 1879); a translation of Duparcq's "Elements of Military Art and History" (1863); "Systems of Military Bridges" (1863); "Sketch of Major-General Richard Montgomery, of the Continental Army" (1876); "Campaigns and Engineers of the War of 1812–'5" (1879); "Historical Sketch of the Fortification Defences of Narragansett Bay since the Founding, in 1638, of the Colony of Rhode Island" (Washington, 1884).

CULPEPER, John, surveyor-general and political leader in the Carolinas, b. in England. He was a refugee from the southern or Clarendon colony, and in 1678 headed an insurrection in the northern or Albemarle colony in favor of popular liberty. The grievances that led to the uprising were the interference of the executive in elections, and the imposition of excessive taxes on commerce. Under his lead the people deposed the president and deputies of the proprietaries, seized the public funds, appointed new magistrates and judges, called a parliament, and took all the functions of government into their own hands. After the new government was organized, Culpeper was sent to England to negotiate a compromise. He was there indicted for high treason, but was acquitted, on the ground that there existed no regular government in Albemarle at the time of the rebellion. He returned to Carolina, and in 1680 laid out Charles Town (Charleston).

CULPEPER, or **COLEPEPER, Thomas,** Lord, colonial governor of Virginia, b. in England; d. there in 1719. He was one of the royal favorites to whom, in 1673, King Charles II. granted for the period of thirty-one years the entire territory of Virginia, depriving the royal colonists of the very titles of their lands. Culpeper, in 1675, purchased of the Earl of Arlington, his co-grantee, the latter's rights between the Rappahannock and Potomac rivers. He was appointed one of the commissioners for plantations in July, 1675, and proclaimed governor of Virginia for life. He came to the colony in 1680. Under his administration was passed an act of indemnity for offences committed during the rebellion under Gov. Berkeley; also an act to enable the governor to grant naturalization, and one to prevent the frequent meeting of slaves. Returning to England in 1683, in violation of his orders, he was arrested immediately on his arrival; and, as he had corruptly received presents from the assembly, a jury of Middlesex found that he had forfeited his commission. He was shrewd and capable, but enriched himself by bribery and extortion. His estates, consisting of lands on the Isle of Wight, manors in Kent, and the tract of the Northern Neck in Virginia, containing 5,700,000 acres, descended through his daughter, CATHERINE, who married Baron Fairfax, to her son, Lord Fairfax, patron of Washington.

CULTZHAYOTL (cooltz-ay-yot'-l), Aztec poet, b. in 1370; d. in 1421. He was the son of the Tlaxcaltec prince Xentiple. His first work was a long poem entitled "Zempaxochitl." The Count of Regla, as descendant and heir of Hernán Cortés, has preserved the original, a translation of which was made by Peredo, who calls Cultzhayotl the Aztec Virgil. His second work, "Huitzilopoxtli," is considered superior to the first. Clavijero, a profound scholar, finds in it many features resembling those of Dante's "Divine Comedy." Cultzhayotl was the first that gave a vigorous character and form to tragedy in Mexico, and had the war-dances replaced by dialogues and tableaux. The Aztec king and nobility attended the performance of his tragedy, "Mihua"; but the noblemen thought the play was a satire on religion, and caused the poet to be imprisoned and subsequently buried alive, to the neck, in a field near Chapultepec. According to Netzahualcoyotl, a lady of the court saved him, leaving in place of the victim a Toltec prisoner. He wandered about until the priests of the Mitla temple offered him protection. While in retirement he wrote a powerful satire, called "Cuitlacochitl," against the Moctezuma dynasty and the corrupt nobility. Fearing that the Mitla priests might assassinate him, he took refuge in Cholula, where the people made his arrival the occasion for a magnificent display. But he soon had to leave Cholula also, and hid for the rest of his life in the Cacahuamilpa cave, a description of which is found in his poem, "Cacahuamitl."

CULWER, Daniel, pioneer, b. in Maryland in 1793; d. in California in 1857. He was the first American that went to upper California, and the first that built a house in San Francisco (on the same ground now occupied by the Palace Hotel). He was also the founder of the town of Santa Barbara. At the beginning of the Mexican war, in 1847, Culwer went to New Orleans, organized a company at his own expense, and joined the expedition under Gen. Scott. When the American navy had bombarded Vera Cruz, Culwer advanced toward Jalapa and defeated a guerilla band; but, having gone farther into the country, he was captured by the Mexican chief Father Jaranta, who was about to have him hanged at Plan de Barrancas when Sergeant Lincoln, of the volunteer force, saved him. He specially distinguished himself at the battle of Cerro Gordo, when he almost effected the capture of Gen. Santa Anna, and did take his richly caparisoned horse. He was dangerously wounded at the capture of the city of Mexico, returned to the United States, and again settled in California, where he resided for the rest of his life, and accumulated a fortune, a large part of which was bequeathed to charity.

CULYER, John Yapp, civil engineer, b. in New York city, 18 May, 1839. He studied surveying and architecture, after which he spent three years in general engineering. Subsequently he became assistant engineer in Central park, New York, and during the civil war was assistant secretary of the U. S. sanitary commission. He also served for a time on the defences south of the Potomac. In 1865 he returned to Central park, remaining there for a year, when he was appointed assistant engineer in charge of the Brooklyn parks, and from 1872 till 1886 was chief engineer and superintendent. He has acted in the capacity of associate engineer to the Albany parks, to the parks and the riverside improvement in Chicago, and to the state capitol grounds in Nashville. He was a member of the first rapid transit commission in Brooklyn, and later engineer of the sixth rapid transit commission, besides being connected with a great variety of general railroad work and public improvement. Col. Culyer has invented implements for improved road construction and for the transplanting of large trees. He is a member of the American society of civil engineers. For more than twenty years he has been a contributor to scientific, literary, and art journals, and he has also edited educational and sanitary journals.

CUMBERLAND, Frederic William, Canadian architect, b. in London, England, in 1820; d. in Toronto, 5 Aug., 1881. He was educated at the Collegiate school, Dublin, and subsequently at King's college, London. After completing his course, he was apprenticed to a civil engineer, was in 1844 appointed to the engineering department of the admiralty, and superintended the construction of the dry docks and sea-walling at Chatham, and assisted Sir William Denison and Capt. James, R. E., during 1845–'7, in editing "The Professional Papers of the Corps of Royal Engineers." In 1847 he arrived in Toronto, Canada, and at once attained prominence as an architect and railway constructor. In 1852 he undertook the superintendence and construction of the Ontario, Simcoe and Huron railway (subsequently the Northern railway) to its terminus at Collingwood, on the Georgian bay, of which road he afterward became managing director. Having completed the construction, he resigned in 1854, and gave his attention solely to architectural work. He designed the plans of St. James cathedral, the normal school, and Osgood hall, in Toronto, and that of the University of Toronto. The last named is said to be the finest specimen of Norman Gothic architecture on this continent. In 1861, at the time of the "Trent" affair, he organized in Toronto the regiment now known as the Royal Grenadiers, became its first colonel, and retained the command until 1864, when he was appointed aide-de-camp to the governor-general, ceasing to be such by his resignation on the departure of Lord Dufferin. At the time of the Fenian raid in 1866 he had charge of the railway service. He represented Algoma district in the legislature of Ontario in 1867, and in 1871 in the dominion parliament.

CUMING, Sir **Alexander,** British officer, b. about 1700. He was sent in 1730 by the English government on a mission to the Creeks and Cherokees, the object of which was to counteract the designs of the French, who were endeavoring to win the friendship of those tribes, in pursuance of a scheme for the annexation of the interior regions in America lying between their colonies in Canada and those at the mouth of the Mississippi.

CUMMING, Alexander, clergyman, b. in Freehold, N. J., in 1726; d. in Boston, Mass., 25 Aug., 1763. He was a nephew of Rev. Samuel Blair (see BLAIR), and received his education partly under his uncle's direction. He was licensed to preach by the "New Side" presbytery of Newcastle in 1746. He was the first Presbyterian minister that preached within the bounds of Tennessee. He was ordained in 1750 as colleague of Rev. Mr. Pemberton in New York, and in 1753 both pastors requested a dismission on account of troubles in the church in respect to matters of ecclesiastical order. Mr. Cumming was relieved on 25 Oct., and on 25 Feb., 1761, was installed as colleague pastor with Dr. Sewall, of the Old South church, Boston, where he remained until his death. He published his installation sermon (1761), and "Animadversions on Rev. Mr. Croswell's late Letter," etc. (1763).

CUMMING, Gilbert W., lawyer, b. in Delaware county, N. Y., in 1817. He was apprenticed to a carriage-maker, but spent his spare hours in study. He began to study law in 1838, and became prominent in his profession. During the anti-rent troubles of 1845 he commanded a military regiment, and succeeded in restoring quiet. He removed, in 1853, to Janesville, Wis., and in 1858 to Chicago. In September, 1861, he raised the 51st Illinois regiment, and was appointed its colonel. He was afterward assigned to the command of a brigade, and did good service at Island Number Ten, New Madrid, and Corinth.

CUMMING, Kate, author, b. about 1835. She is of Scottish descent, and has resided in Mobile, Ala., since her childhood. During the civil war she was with one of the Confederate armies, receiving the wounded and assisting in organizing the field hospitals in the campaigns in Tennessee, Kentucky, and Georgia, when the army was retreating. Every evening she spent a few moments over her diary, recording the incidents that had taken place around her. She published "Hospital Life in the Army of Tennessee" (Louisville, Ky., 1866).

CUMMING, William, soldier, b. in Georgia about 1790; d. in Augusta, Ga., in February, 1863. He studied at the Litchfield, Conn., law-school, but inherited a fortune and never practised. He was appointed major in the 8th infantry on 25 March, 1813, and was wounded in the battle of Chrysler's Field, 11 Nov. He was made adjutant-general, with the rank of colonel, on 16 Feb., 1814, being severely wounded at Lundy's Lane on 25 July, and resigning 31 March, 1815. He declined the appointment of quartermaster-general, with the rank of brigadier-general, in April, 1818, and also that of major-general, tendered him by President Polk on 3 March, 1847. Col. Cumming was a leader of the Union party in the nullification struggle, and his quarrel with George McDuffie, of South Carolina, on this issue was notorious. The two men, attended by a long train of friends in their own equipages, rushed from one point to another in the attempt to find a place of meeting, and loudly accused each other of betraying their intentions to the officers of the law. They were widely caricatured, and their actions were watched with interest all over the country. They finally succeeded in meeting twice, and exchanged three shots, by one of which McDuffie was wounded in the hip and lamed for life.—His brother, **Alfred,** governor of Utah, b. about 1802; d. in Augusta, Ga., 9 Oct., 1873, was a sutler during the Mexican war. He had been superintendent of Indian affairs on the upper Missouri, and in 1857 President Buchanan appointed him governor of Utah territory, and sent him there with a force of 2,500 men to protect him in the discharge of his functions, which constituted the famous "Utah Expedition" of that year. On 27 Nov. the governor issued a proclamation declaring the territory to be in a state of rebellion, and this document was sent to Salt Lake City by a Mormon prisoner, accompanied by a letter to Brigham Young, evincing a willingness to temporize. The expedition went into winter quarters at Camp Scott, on Black's Fork, and in March, 1858, Col. Thomas L. Kane arrived in the camp, having been sent by the president as special envoy to Brigham Young. The relations between Gov. Cumming and Gen. Albert Sidney Johnston, commander of the expedition, had become somewhat strained, and, soon after Col. Kane's arrival, that gentleman, taking offence at a fancied slight, wrote a challenge to Gen. Johnston with Gov. Cumming's consent. During the spring difficulties constantly arose, through a misunderstanding on Cumming's part, as to the power he possessed over the troops. On 8 March Judge Cradlebaugh made requisition for soldiers to protect his court, sitting at Provo, during the trial of the Mormons indicted for complicity in the Mountain Meadows massacre, and they were furnished by Gen. Johnston, whereupon Gov. Cumming protested against their use, and on 27 March issued a proclamation denouncing the general's action. The secretary of war afterward forbade Gen. Johnston to use troops for

such purposes. After the proclamation of pardon to the Mormons, in accordance with the temporizing policy adopted by Buchanan's administration, Gov. Cumming objected to the farther advance of the army, but, notwithstanding his protest, it was marched into Salt Lake City, and did much to preserve order. Gov. Cumming held his office till 1861, when he was succeeded by Stephen S. Harding.—Alfred's nephew, **Alfred,** b. in Augusta, Ga., 30 Jan., 1829, was graduated at the U. S. military academy in 1849. He was aide to Gen. Twiggs at New Orleans in 1851–'3, was made first lieutenant on 3 March, 1855, and captain in the 10th infantry, 20 July, 1856. He was on the Utah expedition of 1859–'60, and on 19 Jan., 1861, resigned, and was soon commissioned lieutenant-colonel in the Confederate army. He rose to the rank of brigadier-general, and served until disabled by wounds received at the battle of Jonesboro, Ga., 31 Aug., 1864. After the war he became a planter near Rome, Ga.

CUMMINGS, Amos Jay, journalist, b. in Conkling, N. Y., in 1842. His father edited and published a weekly religious paper in Irvington, and the youth entered the printing-office at the age of twelve years. After attaining manhood, he travelled and worked at the case in many states of the Union and in Canada. He also visited Mexico, Central America, and Europe. At the beginning of the civil war he was a compositor on the New York "Tribune," but soon joined a regiment of volunteers, and fought in the battles of Fredericksburg and Chancellorsville. Soon afterward he returned to work at the "Tribune" establishment, becoming successively night editor, city editor, and political editor of that paper. At present (1887) he is on the editorial staff of the New York "Sun." In 1885–'6 he was president of the New York press club. Mr. Cummings is known as a ready extemporaneous speaker. In 1886 he was elected a representative in congress.

CUMMINGS, Andrew Boyd, naval officer, b. in Philadelphia, Pa., 22 June, 1830; d. in New Orleans, La., 18 March, 1863. He entered the U. S. navy as midshipman in April, 1847, and was successively advanced through the different grades until he became lieutenant-commander in July, 1862. During the passage of Forts Jackson and St. Philip, and the capture of New Orleans, he was executive officer of the "Richmond." During the subsequent engagement with the batteries at Port Hudson he fell mortally wounded while cheering the men at their guns. He was removed to New Orleans, but died four days later. Admiral Porter said in a letter written at that time: "He was a gallant officer, and too good a man to lose." Admiral Farragut wrote: "Poor Cummings was a great loss, both to the country and to his family."

CUMMINGS, Asa, clergyman, b. in Andover, Mass., 29 Sept., 1791; d. at sea, 5 June, 1856. He was graduated at Harvard in 1817, and during 1819–'20 was a tutor at Bowdoin, meanwhile studying at Andover theological seminary. In February, 1821, he was ordained and became pastor of the Congregational church in North Yarmouth, Me., holding that charge until 1829. Physical infirmities compelled him to relinquish preaching, and he accepted the editorship of the "Christian Mirror," at that time the organ of the Maine missionary society. Some years later, owing to conflicting opinions on the slavery question, concerning which the Maine missionary society was unwilling to take positive ground, the paper became his personal property, and he continued in editorial control of the "Mirror" until the close of 1855. A few months later he sailed for Aspinwall, on a visit to his daughter and for the benefit of his health. On the return voyage, soon after leaving the isthmus, he died. He published a "Memoir of Dr. Edward Payson" (Boston, 1846).

CUMMINGS, Ebenezer Edson, clergyman, b. in Claremont, N. H., 9 Nov., 1800; d. in Concord, 22 Feb., 1886. He was graduated at Waterville (now Colby university) in 1828, and ordained pastor of the Baptist church in Salisbury, N. H., in September of the same year. From 1832–'64 he was pastor of churches in Concord, N. H. He was especially active in promoting the educational interests of his state, having been president of the board of trustees of the New London institution from its beginning, and for some time a trustee of Colby university. In 1855 he received the degree of D. D. from Dartmouth. Dr. Cummings published several sermons, and left in manuscript "The Baptist Ministry of New Hampshire for the First Century of our History."

CUMMINGS, Jeremiah W., clergyman, b. in Washington, D. C., 5 April, 1823; d. in New York, 4 Jan., 1866. He studied at the College of the Propaganda, Rome, where he took the highest honors, and in 1848 returned to the United States. He was first stationed at the old cathedral of St. Patrick, on Mott street. In 1856 he built St. Stephen's church, and was its pastor until his death. Father Cummings was an effective preacher, a popular lecturer, and a promoter of sacred music. He published "Italian Legends" (New York, 1859); "Songs for Catholic Schools" (1862); "Spiritual Progress" (1865); and "The Silver Stole," and contributed to the "American Cyclopædia."

CUMMINGS, John, tanner, b. in Woburn, Mass., 26 Feb., 1785; d. there, 8 June, 1867. He early established himself in the tanning business, devoting his winter months to that occupation, while his summers were spent in farming. His hides were obtained from farmers through his own exertions in travelling on horseback to collect them, and bark was brought in from the adjacent country. About 1830 he began the manufacture of high grades of leather as a specialty, and gained reputation for the quality of his goods, supplying manufacturers throughout New England. Subsequently, when enamelled leather came into use, he became one of the largest tanners in the state. He continued in business until late in life, when he was succeeded by his eldest son. Mr. Cummings probably taught more young men the business of tanning, aiding them to establish themselves, than any other leather manufacturer in Massachusetts.

CUMMINGS, Joseph, educator, b. in Falmouth county, Me., 3 March, 1817. He was graduated at Wesleyan university in 1840, and then taught at Amenia, N. Y., seminary, becoming its principal in 1843. In 1846 he joined the New England conference of the Methodist Episcopal church, and was stationed successively at Malden, Chelsea, Hanover street, and Bromfield street (Boston) churches. He then became professor of theology in the Methodist general biblical institute in Concord, N. H., remaining there for the year 1853–'4, after which, until 1857, he was president of Genesee college at Lima, N. Y. From 1857 till 1875 he was president of Wesleyan university, and from 1875 till 1877 professor of mental philosophy and political economy in that institution. He preached at Malden during 1877–'9, and at Harvard street church, Cambridge, during 1880–'1. In 1881 he became president of Northwestern university, Evanston, Ill. He was a delegate to the general conference of the Methodist Episcopal church in

1864, 1876, 1880, and 1884. He has received the degrees of D. D. from Wesleyan and from Harvard, and of LL. D. from the Northwestern university. Dr. Cummings's literary work includes the editing of Butler's "Analogy of Religion" (New York, 1875) and numerous sermons and addresses, a list of which is given in the "Alumni Record of Wesleyan University."

CUMMINGS, Moses, clergyman, b. in Haverhill, Mass., about 1816; d. in New York city, 6 Jan., 1867. He entered the ministry of the Christian denomination at the age of eighteen, and labored for many years in New Jersey and New York. From 1854 till 1862 he had editorial control of "The Christian Messenger" and "The Palladium," the central organs of the sect of which he was a member. He was a determined opponent of slavery, and a friend and admirer of Horace Mann, whose peculiar educational views received his cordial support.

CUMMINGS, Thomas Seir, painter, b. in England in 1804. He came to New York in infancy, entered his father's counting-room, studying art in his spare hours, and afterward pursued his studies with Henry Inman. He worked at his profession, that of miniature portrait-painting, until the introduction of photography, numbering among his sitters many distinguished persons. He was one of the founders of the National academy in 1826, was an early vice-president, and its treasurer in 1840–'5. The schools of the academy owe most of their perfection to him, and he was the instructor of many who afterward became prominent artists. Mr. Cummings was for a long time connected with the militia, commanded a regiment for several years, and in 1838 was commissioned brigadier-general by Gov. Seward. About 1866 he retired to a farm in Connecticut. He published "Historic Annals of the National Academy from its Foundation to 1865" (Philadelphia, 1865).

CUMMINS, Ebenezer Harlow, clergyman, b. in North Carolina about 1790; d. in Washington, D. C., 17 Jan., 1835. He received a collegiate education, and then studied law. For several years he served in the state legislature of Georgia, but subsequently entered the marine corps. Later he studied theology, and after settling in Baltimore became a magistrate. He published "Geography of Alabama" (Baltimore, 1819) and "History of the Late War" (1820).

CUMMINS, Francis, clergyman, b. near Shippensburg, Pa., in 1732; d. in Greensborough, Ga., 22 Feb., 1832. His early life was spent on a farm, and he received a collegiate education at "Queen's Museum," in Mecklenburg county, N. C., whither his family had removed in 1772. After graduation, he was a teacher in South Carolina and Georgia, numbering among his pupils many who subsequently became famous, including Senator William Smith and President Jackson. In 1775 he was an ardent patriot, was present at all of the Mecklenburg whig meetings, and at the exciting scene during the reading of the celebrated Declaration in the Mecklenburg court-house. Meanwhile he studied theology under Rev. Dr. James Hall, and was ordained to preach by the presbytery of Orange in December, 1780. Afterward he filled the office of pastor to twenty parishes in different localities in Georgia and the Carolinas. In 1778 he was a member of the South Carolina convention held to decide upon the constitution of the United States, and voted for its adoption. The University of Georgia conferred upon him the degree of D. D. in 1820. He published sermons and political and scientific pamphlets.

CUMMINS, George David, assistant P. E. bishop, b. in Kent county, Del., 11 Dec., 1822; d. 26 June, 1876. He was graduated at Dickinson college, Carlisle, Pa., in 1841, and entered the Methodist ministry, but subsequently took orders in the Protestant Episcopal church, being ordained deacon in 1845 and priest in 1847, and becoming rector of churches in Virginia, Maryland, and Illinois. He was consecrated assistant bishop of Kentucky, 15 Nov., 1866, but soon became dissatisfied with the state of things in the Episcopal church, chiefly on account of the progress of ritualism, and in 1873 abandoned his office and took steps toward founding a new sect, designated by itself "The Reformed Episcopal church," becoming its first bishop. He was formally deposed from the Protestant Episcopal ministry, under the canon provided for similar cases, by the presiding bishop, the Rt. Rev. Benjamin Bosworth Smith.

CUMMINS, Maria Susanna, author, b. in Salem, Mass., 9 April, 1827; d. in Dorchester, 1 Oct., 1866. She was the daughter of Judge David Cummins, and received her education at Mrs. Charles Sedgwick's school in Lenox. About 1850 she turned her attention to literature, and beside her novels contributed various articles to the "Atlantic Monthly" and other magazines. Her first book, "The Lamplighter" (Boston, 1854), achieved great popularity, and upward of 40,000 copies were sold within two months. It passed through several editions in this country and in England, and its entire sale has exceeded 119,000 copies. Her later publications include "Mabel Vaughan" (1857), which is considered by many critics superior to her first book; "El Fureidis," a story of Palestine and Syria (1860); and "Haunted Hearts" (1864). Miss Cummins was a writer of great power; her characters were drawn with skill, and there was always a motive in her productions aside from their general interest.

CUNARD, Sir **Samuel,** founder of the Cunard steamship line, b. in Halifax, N. S., 15 Nov., 1787; d. in England, 28 April, 1865. He was the son of a mechanic, and became a successful merchant in several kinds of business. In 1838 he formed the Cunard company, and made a contract with the British government to carry the mails fortnightly for seven years between Liverpool, Halifax, and Boston. The "Britannia," "Acadia," "Caledonia," and "Columbia" steamships, of 1,200 tons register and 440 horse-power, were built for this service, and formed the first line of mail steamers. Mr. Cunard was created a baronet, 9 March, 1857.—His son, Sir **Edward,** b. in Halifax, N. S., 1 Jan., 1816; d. in New York, 6 April, 1869, was educated in his native province, and was for thirty years agent of the Cunard line of steamers at New York. He succeeded to his father's title.

CUNEQUEO (coo-nay-cay'-o), Araucanian heroine, b. in the Mariguena district, Chili, in the latter part of the 16th century; d. about 1612. While very young she married Quepotan, an Araucanian officer, and began her career as a warrior by accompanying her husband, fighting by his side, against the Spaniards. She distinguished herself during the long defence of Liben. After Quepotan had been killed, she resolved to avenge his death; and in 1590 was at the head of an army of Pulches, with which she attacked every Spanish settlement in Arauco, and put to death all Europeans taken prisoners by her troops. The governor of Chili, with a large force, went to meet her army, but Cunequeo, by remaining in well-chosen positions and ably directing attacks upon the Spaniards, forced him to retreat. Then she

moved toward the fortress of Puchanqui, defeated and killed Maj. Aranda and part of his troops that had left the place to prevent her from advancing. But she failed to take the fortress, and was obliged to go into winter quarters near the city of Villarrica, which her warriors kept besieged until, early in 1591, its governor came out with a large number of men. She commanded her forces during several attacks, and did not leave the field until the Spanish artillery had decimated her ranks. After this campaign she retired to private life. Cunequeo always went on horseback among her officers, fought like the bravest of her warriors, and on several occasions killed Spanish soldiers with her own hands. Ercilla, the author of "La Araucana," devoted many pages of his great epic to a description of her prowess.

CUNHA BARBOSA, Januario da (koon'-yah bar-bo'-sa), Brazilian statesman, b. 10 July, 1780; d. 22 Feb., 1846. He was chaplain of John VI., and afterward professor of moral philosophy. On 15 Dec., 1821, he established, in conjunction with Ledo, the "Reverbero Constitucional," a political journal, at Rio de Janeiro, favoring Brazilian independence. After this had been declared, Cunha was arrested, 7 Dec., 1822, and banished to France. To repair this injustice, he was appointed in 1824 canon of the imperial chapel. In 1826 he became a member of the assemby. In concert with Gen. Cunha, he founded the Historical and geographical society of Rio de Janeiro. He also edited a political journal favorable to the government, and an agricultural paper, and was imperial historiographer and director of the national library. He left a small volume of poems.

CUNHA DE AZEVEDO COUTINHO, José Joaquim da (koon'-ya day ah-thay-vay'-do kooteen'-yo), Brazilian bishop, b. in San Salvador do Campo dos Goitacazes, Rio Janeiro, 8 Sept., 1743; d. in Rio Janeiro, 12 Sept., 1821. After studying in the capital of his province, he finished his education at Coimbra, Portugal, and returned to his country. In 1784 he went to Lisbon as deputy to the Inquisition, and was appointed bishop of Pernambuco in 1794, where he at once devoted himself to benevolent work, specially the building of hospitals, also founding a seminary for the instruction of priests, for which Queen Mary of Portugal gave him several estates that had belonged to the Jesuits. He was appointed bishop of Braganza in 1802, archbishop of Braga in 1806, and bishop of Beja in 1817, and although he declined to be removed from his diocese, he was obliged to serve as president of the board in charge of monastic affairs. He died soon after his election as deputy to the Brazilian cortes. He had distinguished himself by his patriotism during the Napoleonic wars, and left works highly esteemed in Brazil and Portugal, which have been translated into several languages.

CUNHA MATTOS, Raimundo José da (koon'-yah-mah'-tos), Brazilian soldier, b. in Faro, province of Algarve, 2 Nov., 1776; d. in March, 1840. He entered the Portuguese army in 1790, served three years in the south of France, and eighteen years in Africa, then served in Rio Janeiro, and was afterward acting governor of St. Thomas. In 1817 he returned to Brazil, commanded the artillery of Pernambuco, and subsequently governed the province of Goyaz. He published a work on the interior of Brazil (1836). Removing to Rio de Janeiro in 1826, he was elected to the legislature, directed the military academy of Rio in 1832, and was made commander-in-chief of the Brazilian army. He was secretary for life of the Industrial aid society, and one of the founders, and for several years vice-president, of the Historical society of Rio de Janeiro.

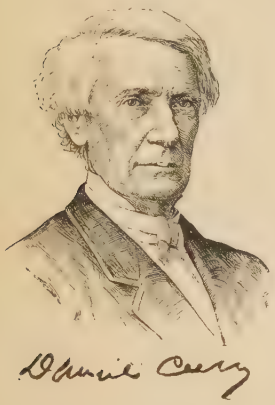
CUNNINGHAM, Robert, loyalist, b. in Ireland about 1739; d. in Nassau, W. I., in 1813. In 1769 he settled in the district of Ninety-Six (now Abbeville), S. C., and soon became a judge. He incurred the enmity of the whigs by his disapproval of their action in sustaining the cause of Massachusetts and in the adoption of the non-importation act. In 1775 he was imprisoned in Charleston, and after his release joined the British forces. During 1780 he was commissioned brigadier-general, and placed in command of a garrison in South Carolina. In the following year he served in the field against Gen. Thomas Sumter. His estate was confiscated in 1782. After the war he petitioned to be allowed to remain in South Carolina, but this request was refused, and he removed to the Bahamas and settled in Nassau. The British government made him a liberal allowance for his losses, and gave him an annuity.

CUNNINGHAM, William, provost-marshal, b. in Dublin; d. in London, 10 Aug., 1791. From his confession, published at the time of his death, he appears to have been the son of a trumpeter in the dragoons, and to have been born in the barracks in Dublin. He arrived in New York in 1774, and was occupied for a time in the breaking of horses and in giving riding-lessons. His course at the beginning of the Revolutionary war rendered him obnoxious to the whigs in New York, and he fled to Boston, where, continuing his opposition to the popular movement, he attracted the attention of Gen. Thomas Gage, who appointed him provost-marshal to the royal army. In 1778 he had charge of the prisons in Philadelphia, and later of those in New York; and in both places his cruelties to the prisoners became notorious. The details of his crimes are horrible. Of the prisoners under his care, 2,000 were starved to death, and more than 250 were hanged without trial. At the close of the war he went to England, and settled in Wales. Later he resided in London, where he became exceedingly dissipated, and, in order to relieve his embarrassment, mortgaged his half-pay, and subsequently forged a draft. For this offence he was convicted and executed.

CURANTEO (coo-ran-tay'-o), Araucanian cacique of the Prŏmanco tribe, b. in Purén, Chili, in 1726; d. there in 1785. He became famous among the Araucanian warriors, and they appointed him their generalissimo to direct the war against the Spaniards in 1766. He began operations by destroying several towns and settlements of the whites. At the head of 8,000 Indians, he fought a battle at Tucapel (1767) against the Spanish Gen. Gonzala, who, after a long and tenacious resistance, was forced to retreat to Chillán, and subsequently besieged by Curanteo. In 1768 he fought and won another important battle in the Arauco valley, but lost a leg in the struggle. In a fierce battle near Angol with Gen. Ponte, governor of Chili, in 1768, he was badly defeated. From that time until 1772 Curanteo had many encounters with the Spaniards, his principal purpose being to damage the settlers rather than obtain victories in the field. In April, 1773, he was again defeated near Quillero in one of the most terrible battles known in the history of Chili. In 1780 he won a battle against the Spanish army, whose commander signed a treaty of peace granting the Araucanian chief what he demanded. Curanteo retired to his native town, and, although his body was covered with wounds, attained an advanced age.

CURRIE, James George, Canadian statesman, b. in Toronto, 24 Nov., 1827. He was educated at Niagara, Ontario, studied law, and was admitted to the bar in 1853. He was speaker of the Ontario assembly from 21 Dec., 1871, till 30 March, 1873, when he resigned and represented Niagara in the legislative council of Canada from 1862 till August, 1866. In 1875 he introduced measures in the Ontario legislature in favor of manhood suffrage in local parliamentary elections, for the establishment of cumulative voting in municipalities, and for the abolition of grand juries.

CURRY, Daniel, clergyman, b. near Peekskill, N. Y., 26 Nov., 1809. He was graduated at Wesleyan university, Middletown, Conn., in 1837, and in the same year became principal of the Troy conference academy. He was called to a professorship in the female college at Macon, Ga., in 1839, and in 1841 entered the Georgia conference of the Methodist Episcopal church, holding pastorates at Athens, Savannah, and Columbus. When the church separated into a northern and a southern branch, Mr. Curry joined the New York conference, and filled important stations in New Haven, Brooklyn, New York, and Hartford. Wesleyan university gave him the degree of D. D. in 1852, and from 1854 till 1857 he was president of Indiana Asbury university, at Greencastle, Ind. He then resumed pastoral work till 1864, when he was chosen to the editorship of the New York "Christian Advocate," retaining it till 1876. He edited the "National Repository" in 1876–'80, and resumed his ministerial duties till 1884, when he became chief editor of the "Methodist Review," having been an associate editor since 1881. Syracuse university gave him the degree of LL. D. in 1878. Besides about sixty articles in periodicals, Dr. Curry has published "New York: a Historical Sketch" (New York, 1853); "Life-Story of Bishop D. W. Clark" (1873); "Fragments, Religious and Theological" (1880); and "Platform Papers" (1880). He has also edited Southey's "Life of John Wesley" (1847).



CURRY, George Law, governor of Oregon, b. in Philadelphia, Pa., 2 June, 1820; d. in Portland, Oregon, 28 July, 1878. His grandfather was a native of England, and his father, George Curry, commanded the Philadelphia "Washington Blues" as first lieutenant in the battle of Bladensburg in 1812. Young Curry removed with his family to Caracas, Venezuela, in 1824, but soon returned, residing near Holmesburg, Pa., till his father's death in 1829. From 1831 till 1840 he lived with his uncle in Boston, where he was apprenticed to a jeweller. In 1838 he was president of the Mechanic apprentices' library, and delivered several addresses and poems before the association. He went to St. Louis in 1843 and connected himself with Joseph M. Field in the publication of the "Reveille." He removed to Oregon City, Oregon, in 1846, took charge of the "Oregon Spectator," the first newspaper published on the Pacific coast, and in 1848 founded the "Oregon Free Press." He was appointed secretary of the territory in 1853, and, after twice acting as governor for short periods, was appointed to that office in 1854, and held it till the admission of Oregon into the Union in 1859. His administration was marked by the rapid development of the territory and by several Indian wars, one of which—in 1855—was the most bloody in the history of the northwest coast. Besides U. S. troops, about 2,500 volunteers were kept in the field for several months, and Gov. Curry distinguished himself by his services in conquering a peace. He was afterward thanked by the legislatures of Oregon and Washington territories. In 1860 he came within one vote of an election to the U. S. senate. In 1866 he worked earnestly in behalf of the Northern Pacific railroad, which he had first advocated in St. Louis in 1845. He afterward retired to his farm on Willamette river. He was subsequently state land commissioner.

CURRY, Jabez Lamar Monroe, educator, b. in Lincoln county, Ga., 5 June, 1825. He removed with his father to Talladega county, Ala., in 1838, was graduated at the University of Georgia in 1843, and at Harvard law-school in 1845. After entering on the practice of his profession in Talladega county, he served in the Mexican war as a private of Texas rangers in 1846, but resigned on account of his health. He was chosen to the Alabama legislature in 1847, 1853, and 1855, and in 1856 was an elector on the democratic ticket. He was then elected to congress without opposition, as a state-rights democrat, and served from 7 Dec., 1857, till 21 Jan., 1861, when he resigned, having previously joined with the other Alabama representatives at Washington in advising the immediate secession of the state. He was a deputy from Alabama to the provisional Confederate congress, a representative in the first Confederate congress, and in 1864–'5 served in the Confederate army, under Gen. Joseph E. Johnston, as lieutenant-colonel of cavalry. At the close of the war he was ordained as a Baptist clergyman, was president of Howard college, Ala., in 1866–'8, and professor of English, philosophy, and constitutional law in Richmond college, Va., in 1868–'81. He was president of the foreign mission board of the southern Baptist convention in 1874–'85, and of the trustees of Richmond college in 1882–'5. In 1881–'5 Dr. Curry was general agent of the Peabody educational fund, and he has "labored in behalf of public-school education, higher, normal, and industrial, for all the people of both races." Dr. Curry is one of the most effective platform speakers in the country, and has declined numerous invitations to become a pastor, preferring to preach occasionally. An address made by him before the Evangelical alliance, urging the complete separation of church and state, was reprinted and distributed in England by the disestablishment party. In the spring of 1885 Dr. Curry was appointed U. S. minister to Spain, and in that capacity he has settled several important questions that have been pending for years. Mercer university, Georgia, gave him the degree of LL. D. in 1867, and Rochester university that of D. D. in 1871. He is a contributor to the religious press, and has published speeches and pamphlets.

CURRY, Otway, journalist, b. in Greenfield, Ohio, 26 March, 1804; d. in Marysville, 17 Feb., 1855. He removed with his father to Pleasant Valley, Ohio, in 1811, and his early education was interrupted by the war. He went to Lebanon in 1823, learned the carpenter's trade, and worked at it in various towns till 1829, at the same time

writing poetry for the newspapers. He was then a farmer in Union county till 1839, and served in the legislature in 1836–'7. He became one of the editors of the "Hesperian," at Columbus, Ohio, in 1838, and in 1839 began to study law at Marysville. He was again in the legislature in 1842, and in that year bought the "Greene County Torchlight," published in Xenia, Ohio. He returned to Marysville in 1845, and practised his profession till his death, except in 1853–'4, when he edited the "Scioto Gazette," in Chillicothe. He published "Love of the Past," a poem (Cincinnati, 1838). See Coggeshall's "Poets and Poetry of the West."

CURTIN, Andrew Gregg, governor of Pennsylvania, b. in Bellefonte, Centre co., Pa., 22 April, 1815. His father, Roland Curtin, emigrated from Ireland in 1793, and in 1807 established near Bellefonte one of the first manufactories of iron in that region. Andrew studied law in Dickinson college law-school, was admitted to the bar in 1839, and soon became prominent. He early entered politics as a whig, laboring for Harrison's election in 1840, and making a successful canvass of the state for Clay in 1844. He was a presidential elector in 1848, and a candidate for elector on the whig ticket in 1852. In 1854 Gov. Pollock appointed him secretary of the commonwealth and ex-officio superintendent of common schools, and in the discharge of his duties Mr. Curtin did much toward reforming and perfecting the school system of the state. In his annual report of 1855 he recommended to the legislature the establishment of normal schools, and his suggestion was adopted. In 1860 he was the republican candidate for governor. The democrats, though divided in national politics, were united in Pennsylvania, but Mr. Curtin was elected by a majority of 32,000. In his inaugural address he advocated the forcible suppression of secession, and throughout the contest that followed he was one of the "war governors" who were most earnest in their support of the national government. He responded promptly to the first call for troops, and when Gen. Patterson, who was in command in Pennsylvania, asked for twenty-five thousand more, they were immediately furnished. Gen. Patterson's requisition was afterward revoked by the secretary of war, on the ground that the troops were not needed; but Gov. Curtin, instead of disbanding them, obtained authority from the legislature to equip them at the state's expense, and hold them subject to the call of the national government. This body of men became known as the "Pennsylvania Reserve," and was accepted by the authorities at Washington a few weeks later. Gov. Curtin was untiring in his efforts for the comfort of the soldiers, answering carefully the numerous letters sent him from the field, and originated a system of care and instruction for the children of those slain in battle, making them wards of the state. He thus became known in the ranks as "the soldiers' friend." Gov. Curtin's health began to fail in 1863, and he signified his intention of accepting a foreign mission that had been offered him as soon as his term should expire, but in the mean time he was renominated, and re-elected by 15,000 majority. In November, 1865, he went to Cuba for his health, and in that year declined another offer of a foreign mission. In 1869 Gen. Grant appointed him minister to Russia, and in 1868 and 1872 he was prominently mentioned as a candidate for vice-president. He returned home in August, 1872, supported Horace Greeley for the presidency, and subsequently joined the democratic party, by which he was elected to congress for three successive terms, serving from 1881 till 1887.

A. G. Curtin

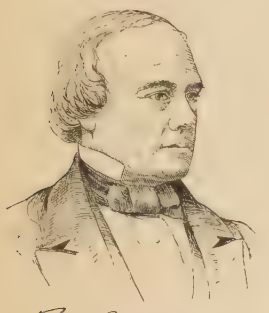
CURTIN, Jeremiah, linguist, b. in Milwaukee, Wis., about 1835. He had little education in childhood, but at the age of twenty or twenty-one prepared himself to enter Phillips Exeter academy, made extraordinary progress, and soon entered Harvard college, where he was graduated in 1863. By this time he had become noted among his classmates and acquaintances for his wonderful facility as a linguist. On leaving college he had acquired a good knowledge of French, Spanish, Portuguese, Italian, Rumanian, Dutch, Danish, Swedish, Icelandic, Gothic, German, and Finnish, besides Greek and Latin. He had also made considerable progress in Hebrew, Persian, and Sanskrit, and was beginning to speak Russian. When Admiral Lissofsky's fleet visited this country in 1864, Curtin became acquainted with the officers and accompanied the expedition on its return to Russia. In St. Petersburg he obtained employment as a translator of polyglot telegraphic despatches, but he was presently appointed by Mr. Seward to the office of secretary of the U. S. legation, and he held this place till 1868. During this period he became familiar with the Polish, Bohemian, Lithuanian, Lettish, and Hungarian languages, and made a beginning in Turkish. From 1868 till 1877 he travelled in eastern Europe and in Asia, apparently in the service of the Russian government. In 1873, at the celebration at Prague of the 500th anniversary of the birth of John Huss, he delivered the oration, speaking with great eloquence in the Bohemian language. During his travels in the Danube country he learned to speak Slovenian, Croatian, Servian, and Bulgarian. He lived for some time in the Caucasus, where he learned Mingrelian, Abkasian, and Armenian. At the beginning of the Russo-Turkish war in 1877, he left the Russian dominions, and, after a year in London, returned to his native country. Since then he has been studying the languages of the American Indians, and has made valuable researches under the auspices of Maj. John W. Powell and the bureau of ethnology. He is said to be acquainted with more than fifty languages.

CURTIS, Alfred A., R. C. bishop, b. in Somerset county, Md., in 1833. He began his studies for the Protestant Episcopal church in 1854, supporting himself during his course by teaching. In 1856 he was ordained deacon and sent to St. John's parish, Worcester, and in 1859 was ordained priest. At the close of the year he had charge of Catoctin Furnace parish, Frederick co., Md. While there he received a call as assistant rector of St. Luke's, Baltimore, where he ministered until 1864, when he was sent to officiate at Chestertown, Md. He was recalled at the close of the year and placed in charge of Mount Calvary church, Baltimore, where he remained rector until December, 1870, when he resigned. He went to England in 1871, was received into the Roman Catholic church the same year by Cardinal Newman, returned to Baltimore,

and entered the Seminary of St. Sulpice. He was ordained by Archbishop Bayley in 1874, being appointed his secretary and assistant at the cathedral, and he was created bishop of Wilmington in 1886.

CURTIS, Alva, physician, b. in New Hampshire in 1797; d. in Ohio in 1881. He lectured in the Botanic medical college of Ohio for some time, and from 1837 till 1852 was editor of the "Botanico-medical Recorder," also of the "Journal of Education and of Physiological and Medical Reforms." Dr. Curtis published "Medical Discussions" (1833); "Lectures on Midwifery" (1838); "Theory and Practice of Medicine" (1842, republished in England); and "Medical Criticisms" (1856).

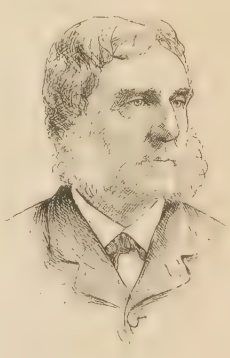
CURTIS, Benjamin Robbins, jurist, b. in Watertown, Mass., 4 Nov., 1809; d. in Newport, R. I., 15 Sept., 1874. He was graduated at Harvard in 1829, admitted to the bar in 1832, and, after practising for a short time in Northfield, Mass., removed to Boston. The extent and readiness of his attainments, his accuracy, and his logical mind, soon made him prominent in his profession. In 1851 President Fillmore appointed him to the U. S. supreme bench. In the celebrated "Dred Scott" case he dissented from the decision of the court and made a powerful argument in support of his conclusions. He upheld the right of congress to prohibit slavery, and declared his dissent from "that part of the opinion of the majority of the court in which it is held that a person of African descent cannot be a citizen of the United States." On this memorable occasion only one other justice of the seven coincided with the opinion of Judge Curtis. He resigned in 1857, and resumed practice in Boston, frequently appearing before the supreme court at Washington in important cases. He was for two years a member of the Massachusetts legislature, but took little part in politics, devoting himself with earnestness to his profession. In the impeachment trial of President Johnson in 1868 Judge Curtis was one of the counsel for the defence. The answer to the articles of impeachment was read by him, and was largely his work. He opened the case in a speech that occupied two days in delivery, and that was commended for legal soundness and clearness. He was the democratic candidate for U. S. senator in 1874. He published "Reports of Cases in the Circuit Courts of the United States" (2 vols., Boston, 1854); "Decisions of the Supreme Court of the United States," with notes and a digest (22 vols., Boston); and "Digest of the Decisions of the Supreme Court of the United States," from the origin of the court to 1854. Of his "Memoir and Writings" (2 vols., Boston, 1880), the first volume contains a memoir by George Ticknor Curtis, and the second "Miscellaneous Writings," edited by his son, Benjamin R. Curtis.—His brother, **George Ticknor,** lawyer, b. in Watertown, Mass., 28 Nov., 1812, was graduated at Harvard in 1832. He was admitted to the bar in 1836, and engaged in the practice of the law in Boston till 1862, when he removed to New York.



While in Boston, Mr. Curtis held the office of U. S. commissioner, and as such, in 1851, returned to his master a fugitive slave named Thomas Sims, for which act he was severely denounced by the abolitionists. He also served for two or three years in the Massachusetts legislature, but has allowed politics to interfere but little with his profession and his historical investigations. He has published a "Digest of English and American Admiralty Decisions" (Boston, 1839); volumes ii. and iii. of a "Digest of the Decisions of the Courts of Common Law and Admiralty in the United States" (3 vols., 1840–'6); "Rights and Duties of Merchant Seamen" (1841); "American Conveyancer" (1846); "Law of Copyright" (1847); "Law of Patents" (1849; 4th ed., 1873); "Equity Precedents" (1850); "Inventor's Manual," "Commentaries on the Jurisprudence, Practice, and Peculiar Jurisdiction of the Courts of the United States" (2 vols., 1854–'8); "History of the Origin, Formation, and Adoption of the Constitution of the United States" (2 vols., 1855–'8); "Life of Daniel Webster" (New York, 1870); "Life of James Buchanan" (1883); and "Creation or Evolution" (1887).

CURTIS, Calvin, artist, b. in Stratford, Conn., 5 July, 1822. He studied art in the National academy in 1841, and also under Daniel Huntington. After painting portraits in New York for some years, he went to Bridgeport, Conn., in 1850, and afterward to Stratford. His works include portraits of Chief-Justice Thomas B. Butler, Gen. W. U. Noble, Judge C. B. Beardsley, and Rev. Dr. Nathaniel Hewitt. Mr. Curtis has also given some time to landscape-painting. He has suffered from a spinal disease for thirty years, and it has been said that "every touch of his pencil has been attended with a twinge of nervous pain."

CURTIS, George William, author, b. in Providence, R. I., 24 Feb., 1824. After attending a school in Jamaica Plain, Mass., he removed to New York with his father in 1839, and for a year was a clerk in a mercantile house in that city. He with his elder brother, in 1842, joined the community of Brook Farm, in West Roxbury, Mass., and, after eighteen months of study and farm labor, the brothers went to Concord, Mass., where they spent eighteen months more in a farmer's family, afterward tilling a small piece of land on their own account for six months. In 1846 Mr. Curtis went abroad, living for some time in Italy and Germany, and afterward travelling in Egypt and Syria. He returned to this country in 1850, and soon afterward became one of the editorial staff of the New York "Tribune." Mr. Curtis was one of the editors of the first series of "Putnam's Monthly" from its appearance in 1852 till it ceased to exist. About three years after it was established the magazine passed into the hands of the firm of Dix, Edwards & Co., in which Mr. Curtis was a special partner, pecuniarily responsible, but taking no part in its commercial management. In the spring of 1857



the house, which had also undertaken to publish books, was found to be insolvent for a large amount, and Mr. Curtis sank his private fortune in the endeavor to save its creditors from loss, which he finally accomplished in 1873. In 1853 he began in "Harper's Monthly" the series of papers entitled the "Editor's Easy Chair," and in the same year entered the lecture field, meeting with great success. He soon gained reputation as a popular orator, and in the presidential canvass of 1856 spoke in behalf of the republican candidates. Soon after the establishment of "Harper's Weekly," in 1857, he became its leading editorial writer, which place he still holds, and on the establishment of "Harper's Bazar" in 1867 he began a series of papers under the title of "Manners upon the Road," which was continued weekly until the spring of 1873. He was a delegate to the Republican national conventions of 1860 and 1864, and in the latter year was an unsuccessful candidate for congress in the 1st New York district. In 1862 he declined the office of consul-general in Egypt, offered him by President Lincoln. In 1867 he was elected a delegate at large to the Constitutional convention of New York, in which he was chairman of the committee on education. In 1868 he was nominated a republican presidential elector, and in 1869 declined the republican nomination for secretary of state of New York. Mr. Curtis has always been an earnest advocate of civil-service reform, and in 1871 was appointed by President Grant one of a commission to draw up rules for the regulation of the civil service. He was elected chairman of the commission and of the advisory board in which it was subsequently merged, but resigned in March, 1873, on account of difference of views between him and the president in regard to the enforcement of the rules. He was a delegate to the National republican convention of 1876 that nominated President Hayes, and at the beginning of the administration he was asked to select a foreign mission, which he declined, and he also declined the special offer of the mission to Germany. Mr. Curtis was chairman of a meeting of independent republicans that met in New York on 16 June, 1884, to take action against the nomination of James G. Blaine, made by the Chicago convention, and he subsequently supported the democratic candidate, Grover Cleveland. Since 1864 Mr. Curtis has been one of the regents of the University of the state of New York, and is now (1886) its vice-chancellor. He has published "Nile Notes of a Howadji" (New York, 1851); "The Howadji in Syria" (1852); "Lotus-Eating," letters originally written to the New York "Tribune" from various watering-places (1852); two volumes of selections from his contributions to "Putnam's Magazine," entitled "Potiphar Papers" (1853) and "Prue and I" (1856); and "Trumps," a novel, which had appeared in "Harper's Weekly" in 1858–'9 (1862).—His half-brother, **Joseph Bridgham,** soldier, b. in Providence, R. I., 25 Oct., 1836; killed near Fredericksburg, Va., 13 Dec., 1862, was graduated at the Lawrence scientific school of Harvard in 1856. In 1857 he became a member of the New York Central park engineer corps, and in April, 1861, was appointed engineer, with the rank of captain, in the 9th New York volunteers. After that regiment was mustered out, he became, on 16 Sept., 1861, second lieutenant in the 4th Rhode Island volunteers, and was promoted to first lieutenant on 2 Oct. He served with Burnside in North Carolina, distinguished himself by his coolness and daring at the capture of Roanoke Island, 7 Feb., 1862, and on 9 June was appointed assistant adjutant-general on Gen. Rodman's staff. In August he was promoted, at Gen. Burnside's special request, to the lieutenant-colonelcy of the 4th Rhode Island regiment, joined the Army of the Potomac, and was with it in the succession of battles between the Rappahannock and Washington. In the battle of Antietam his regiment suffered so much that it was withdrawn from the field by the general's command, whereupon Col. Curtis took a musket and cartridge-box from a dead soldier and did duty as a private in a Pennsylvania regiment till the close of the battle. He was killed at Fredericksburg while in command of his regiment, the colonel having been disabled by a wound. See a memoir by George William Curtis, in John R. Bartlett's "Rhode Island in the Rebellion" (1867).—Joseph Bridgham's brother, **Edward,** b. in Providence, R. I., 4 June, 1838, was graduated at Harvard in 1859, and received his medical degree from the University of Pennsylvania in 1864. He had entered the army as medical cadet on 6 Sept., 1861, became acting assistant surgeon on 5 May, 1863, assistant surgeon in 1864, and was brevetted captain and major on 13 March, 1865. He resigned from the army in 1870, and began practice in New York city. During the later years of his army service he was in charge of the microscopical section of the medical museum, and was especially engaged in developing the art of photographing through the microscope. He became lecturer on histology in the College of physicians and surgeons in 1870, and in 1873 was given the chair of materia medica and therapeutics, becoming professor emeritus in 1886. He was made assistant surgeon to the New York eye and ear infirmary in 1872, surgeon in 1874, and in 1876 became medical director of the Equitable life assurance society, retiring from active practice. Dr. Curtis has published a "Catalogue of the Microscopical Section of the U. S. Army Medical Museum" (Washington, 1867), and "Manual of General Medicinal Technology" (New York, 1883).—Another brother, **John Green,** became, in 1873, adjunct professor of anatomy in the College of physicians and surgeons, New York city.

CURTIS, Harvey, clergyman, b. in Adams, Jefferson co., N. Y., 30 May, 1806; d. in Galesburg, Ill., 18 Sept., 1862. He was graduated at Middlebury, in 1831, with the highest honors of his class, and studied for the next three years at Princeton theological seminary. He was licensed to preach by Troy presbytery, and, on 18 Feb., 1836, was ordained pastor of the Congregational church in Brandon, Vt. In 1841 he accepted an appointment from the American home missionary society as their agent for Ohio and Indiana, and from 1843 till 1858 held pastorates in Madison, Ind., and Chicago, Ill. He was chosen president of Knox college, at Galesburg, Ill., in 1858.

CURTIS, Josiah, physician, b. in Wethersfield, Conn., in 1816. He was graduated at Yale in 1840, and soon afterward became principal of an academy in Salem, N. J., and later taught in Philadelphia, where he studied medicine, and in 1843 was graduated at Jefferson medical college. After spending a year in lecturing on physiology and public health, he settled for practice in Lowell, Mass. In 1849 he removed to Boston, and between 1850 and 1855 twice visited Europe for the purpose of studying the sanitary condition of the large cities. In 1861 he was called to Washington to superintend the mortality statistics of the U. S. census of 1860. He there entered the army, and remained with it until 1865, when he took up his residence in Knoxville, Ky. In 1872 Dr. Curtis filled the place of

surgeon, microscopist, and naturalist to the U. S. geological survey, and in 1873 became chief medical officer of the U. S. Indian service. He has published numerous articles on ventilation and kindred subjects, and is the author of a report on the "Hygiene of Massachusetts" (1849), and earlier reports to the Massachusetts legislature on the registration of births, marriages, and deaths. He is noted as the discoverer of collodion.

CURTIS, Newton Martin, soldier, b. in De Peyster, St. Lawrence co., N. Y., 21 May, 1835. He was educated at common schools, and at Gouverneur Wesleyan seminary, in 1854–'5. He became a prominent democrat, was postmaster of his native town in 1857–'61, and democratic candidate for assembly in 1860. He enrolled a volunteer company on 14 April, 1861, was commissioned captain in the 16th New York regiment on 7 May, and served in the Army of the Potomac. He became lieutenant-colonel and then colonel of the 142d New York infantry, and during the battle of Cold Harbor was assigned to the command of a brigade whose leader had been killed in the action. He was brevetted brigadier-general of volunteers, 28 Oct., 1864, and for his services at the capture of Fort Fisher was promoted on the field to brigadier-general of volunteers, and was also thanked by the legislature of New York. He was brevetted major-general of volunteers, 13 March, 1865, and assigned to duty as chief of staff to Gen. E. O. C. Ord. · On 1 July, 1865, he was given the command of southwestern Virginia, with headquarters at Lynchburg, and was mustered out on 15 Jan., 1866. He was collector of customs in the district of Oswegatchie, N. Y., in 1866–'7, special agent of the U. S. treasury from 1867 till his resignation in 1880, and a member of the legislature in 1883–'5, having been elected as a republican. He was president of the state agricultural society in 1880, and has been secretary and trustee of the state agricultural station since its organization in that year.

CURTIS, Samuel Ryan, soldier, b. in New York state, 3 Feb., 1807; d. in Council Bluffs, Iowa, 26 Dec., 1866. He removed when a child to Ohio, and was graduated at the U. S. military academy in 1831, but resigned from the army in 1832, and became a civil engineer, superintending the Muskingum river improvements in 1837–'9. He then studied law, and practised in Ohio from 1841 till 1846. He had become a captain of militia in 1833, was lieutenant-colonel in 1837–'42, colonel in 1843–'45, and in 1846 was made adjutant-general of Ohio for the special purpose of organizing the state's quota of volunteers for the Mexican war. He served in that war as colonel of the 2d Ohio regiment, and was commandant of Camargo, a large military depot, holding it on 18 Feb., 1847, against Gen. Urrea, and then pursuing the enemy by forced marches through the mountains to Ramos, Mexico, thus opening Gen. Taylor's communications. After the discharge of his regiment he served on Gen. Wool's staff, and as governor of Saltillo, Mexico, in 1847–'8. He then engaged in engineering in the west, and in 1855 settled as a lawyer in Keokuk, Iowa. While a resident of this place he was elected to congress as a republican, and served two terms and part of a third, from 1857 till 1861, being a member of the committees on military affairs and the Pacific railroad. He was also a delegate from Iowa to the peace congress of February, 1861. He resigned from congress in 1861 to become colonel of the 2d Iowa regiment, and on 17 May was commissioned brigadier-general of volunteers, being on the first list sent to the senate for confirmation. He took charge of the large camp of instruction near St. Louis in August and September, 1861, commanded the southwestern district of Missouri from 26 Dec., 1861, till February, 1862, and the army of the southwest till August, 1862. On 6–8 March, at Pea Ridge, Ark., he gained a decisive victory over a Confederate force, commanded by Gens. Price and McCulloch. He was promoted to major-general of volunteers on 21 March, 1862, and from 14 July till 29 August occupied Helena, Ark., having marched over one thousand miles through wildernesses and swamps. While on leave of absence, from 29 Aug. till 24 Sept., 1862, he was president of the Pacific railroad convention in Chicago. He was at the head of the Department of the Missouri from September, 1862, till May, 1863, and of that of Kansas from 1 Jan., 1864, till 7 Feb., 1865, commanding at Fort Leavenworth during the Price raid of October, 1864, and aiding in the defeat and pursuit of Gen. Price's army. He commanded the Department of the Northwest from 16 Feb. till 26 July, 1865, was U. S. commissioner to negotiate treaties with various Indian tribes from August till November, 1865, and to examine the Union Pacific railroad till April, 1866.

CURTIS, Thomas, clergyman, b. in England about 1780; d. in 1858. He came to the United States in 1829, was pastor for some years of the Wentworth street Baptist church in Charleston, S. C., and subsequently established a young ladies' school at Limestone Spring. Dr. Curtis was a man of extensive knowledge and very powerful as a preacher. While in England he was the publisher of the "Encyclopædia Metropolitana." He perished in a burning steamer on the Potomac river. —His son, **Thomas F.,** b. in England, 26 Sept., 1815; d. in Cambridge, Mass., 9 Aug., 1872, was educated at a southern college, and studied theology. After holding a pastorate near Boston for several years, he accepted the chair of theology in Lewisburg university, Pa., but resigned in 1865, and in 1867 removed to Cambridge, Mass. He suffered with softening of the brain for some time before his death. Dr. Curtis published "Communion: the Distinction between Christian and Church Fellowship"; "Progress of Baptist Principles in the last Hundred Years"; and, after his resignation, "The Human Element in the Inspiration of the Sacred Scriptures," in which he took similar views with Bishop Colenso, but went beyond him in some particulars, repudiating both the inspiration and authenticity of much of the Old Testament and part of the New (1867).

CURTIS, William Edmund, jurist, b. in Litchfield, Conn., in 1824; d. in Watertown, Conn., 6 July, 1880. He was graduated at Trinity in 1843, admitted to the bar in 1847, and practised in New York city, where he rose rapidly in his profession. In 1871 he was elected judge of the New York supreme court, and at the time of his death was chief justice of the superior court. He was commissioner of the board of education, and for four years its president, and also vice-president of the geographical society. Judge Curtis received the degree of LL. D. from Trinity in 1862.

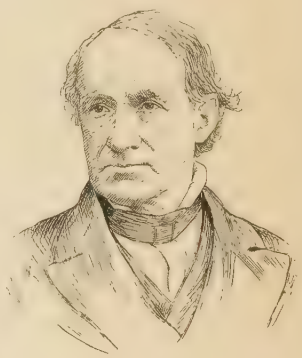
CURTISS, Abby Allin, poet, b. in Pomfret, Conn., 15 Sept., 1820. Her father, Daniel Allin, was a sea-captain of Providence, R. I. In 1852 she married Daniel S. Curtiss, a Chicago journalist, and soon afterward removed with him to a farm in Madison, Wis. Her first piece, "Take me Home to Die," appeared in "Neal's Gazette" in 1846. She has published "Home Ballads" (Boston, 1850), and contributed to periodicals under the signature of "Nillo."

CURTISS, Samuel Ives, educator, b. in Union, Conn., 5 Feb., 1844. He was graduated at Amherst in 1867, and at Union theological seminary in 1870, engaged in missionary work in New York, and in 1870–'2 was connected with the Fifth avenue Presbyterian church. He travelled in Ireland and Scotland in 1872–'3, was ordained by the New York presbytery in 1874, and in 1874–'8 was pastor of the American chapel at Leipsic, of which he was one of the founders. While in Leipsic he attended lectures at the university, receiving the degree of Ph. D. in 1876, and was afterward made a licentiate by Berlin university. Iowa college gave him the degree of D. D. in 1878, and in the same year he became professor of biblical literature in the Congregational theological seminary, Chicago. In 1879 he was transferred to the chair of Old Testament literature and interpretation. He is the author of "The Name Machabee," his doctor's thesis (Leipsic, 1876); a translation of Bickell's "Outlines of Hebrew Grammar" (1877); of Delitzsch's "Messianic Prophecies" (Edinburgh, 1880); and "Old-Testament History of Redemption" (1881); "The Levitical Priests" (1877); "De Aaronitici sacerdotii atque thoræ Elohisticæ origine," his licentiate thesis (Berlin, 1878); "Ingersoll and Moses" (Chicago, 1879); and contributions in the "Current Discussions in Theology" (1883 *et seq.*).

CURWEN, Samuel, loyalist, b. in Salem, Mass., 28 Dec., 1815; d. there, 9 April, 1802. He was graduated at Harvard in 1735, and studied for the ministry, but became a merchant in his native place. In the winter of 1774–'5 he was a captain in Sir William Pepperell's expedition against Louisburg. In 1759 he became impost officer for Essex county, Mass., and in 1775 was judge of the admiralty court. From 1775 until 1784, as a loyalist, he resided abroad, returning to his native place in the autumn of 1784. His "Journal and Letters" (New York, 1842) contains interesting and valuable information concerning the lives of loyalist exiles while abroad.

CUSACK, Mary Frances, philanthropist, known as the Nun of Kenmare, b. near Dublin, Ireland, 6 May, 1830. She spent most of her early life in England, and began to write when very young. She entered an Anglican religious sisterhood, soon afterward became a Roman Catholic, and, returning to Ireland, joined at Newry, in 1859, a community of Franciscan nuns, known as the Irish Poor Clares, engaged in teaching poor girls. Two years later she established a convent of the Sisters at Kenmare, one of the most destitute parts of Ireland, and in 1884, in a personal interview with Pope Leo XIII., obtained permission to leave the Poor Clares and found a new order, the Sisters of Peace, intended for the establishment and care of homes for friendless girls, where domestic service would be taught and moral habits be inculcated. She opened the first house of the new order at Nottingham, England, and in 1885 a similar house in Jersey City, N. J., the first foundation of the Sisters of Peace in the United States. Her active efforts for the relief of the wretched peasants of Kenmare brought her into controversy with the Marquis of Lansdoune, the Earl of Kenmare, and some others of the greater landlords of that region, and with a section of the Catholics of England; but she seems to have enjoyed from the beginning the sympathy of most of the leading Catholics, lay and clerical, of her own country. She was in the United States in 1886. She has published more than fifty works, chief among which are a "Student's History of Ireland"; "Woman's Work in Modern Society"; lives of Daniel O'Connell, St. Patrick, St. Columba, and St. Bridget; "The Pilgrim's Way to Heaven"; "Jesus and Jerusalem"; and "The Book of the Blessed Ones."

CUSHING, Caleb, statesman, b. in Salisbury, Mass., 17 Jan., 1800; d. in Newburyport, Mass., 2 Jan., 1879. He was graduated at Harvard in 1817, and for two years was a tutor in mathematics and natural philosophy. He then studied law, was admitted to the bar, and settled in Newburyport. He rose rapidly in his profession, and, although busily engaged with his practice, found time to devote to literature and politics, and was a frequent contributor to periodicals. In 1825 he was elected a representative to the lower house of the Massachusetts legislature, and in 1826 a member of the state senate. At this time he belonged to the then republican party. In 1829 Mr. Cushing visited Europe, and remained abroad two years. In 1833 he was again elected a representative from Newburyport to the Massachusetts legislature for two years, but in 1834 was elected from the Essex north district of Massachusetts a representative to congress, and served for four consecutive terms, until 1843. He supported the nomination of John Quincy Adams for the presidency, and was a whig until the accession of John Tyler. When the break in the whig party occurred, during the administration of President Tyler, Mr. Cushing was one of the few northern whigs that continued to support the president, and became classed as a democrat. Soon afterward he was nominated for secretary of the treasury, but the senate refused to confirm him. He was subsequently confirmed as commissioner to China, and made the first treaty between that country and the United States. On his return he was again elected a representative in the Massachusetts legislature. In 1847 he raised a regiment for the Mexican war at his own expense, became its colonel, and was subsequently made brigadier-general. While still in Mexico he was nominated by the democratic party of his state for governor, but failed in the election. From 1850 till 1852 he was again a member of the legislature of his native state, and, at the expiration of his term, was appointed associate justice of the state supreme court. In 1853 President Pierce appointed him U. S. attorney-general, from which office he retired in 1857. In 1857, 1858, and 1859 he again served in the legislature of Massachusetts. In April, 1860, he was president of the Democratic national convention in Charleston, S. C., and was among the seceders from that body who met in Baltimore. At the close of 1860 he was sent to Charleston by President Buchanan, as a confidential commissioner to the secessionists of South Carolina; but his mission effected nothing. Mr. Cushing was frequently employed during the civil war in the departments at Washington,



Cushing

and in 1866 was appointed one of the three commissioners to revise and codify the laws of congress. In 1868 he was sent to Bogotá to arrange a diplomatic difficulty. In 1872 he was one of the counsel for the United States at the Geneva conference for the settlement of the Alabama claims, and in 1873 was nominated for the office of chief justice of the United States; but the nomination was subsequently withdrawn. A year later he was nominated and confirmed as minister to Spain, whence he returned home in 1877. His publications include a "History of the Town of Newburyport" (1826); "The Practical Principles of Political Economy" (1826); "Historical and Political Review of the Late Revolution in France" (2 vols., Boston, 1833); "Reminiscences of Spain" (2 vols., Boston, 1833); "Growth and Territorial Progress of the United States" (1839); "Life of William H. Harrison" (Boston, 1840); and "The Treaty of Washington" (New York, 1873).

CUSHING, Frank Hamilton, ethnologist, b. in Northeast, Erie co., Pa., 22 July, 1857. He manifested in early childhood a love for archæological pursuits, and at the age of eight years began to collect fossils and minerals, made a complete Indian costume, and lived in a bark hut in the woods. He learned from observation that wherever Indian encampments had been long established the soil and vegetation had undergone a change, which materially assisted him in his search for relics. At the age of fifteen he had discovered the process of making arrow-heads from flint by pressure with bone. In 1870 his father removed to Medina, N. Y., where the son's researches found new ground and a greater wealth of material. In the town of Shelby were ancient remains of fortifications rich in relics, and they, with ancient fortifications, burial-grounds, and camp sites in the counties of Madison and Onondaga, were carefully searched, as well as the Hamilton group of rocks. In the spring of 1875 he became a student in Cornell university, but spent most of his time as assistant to Dr. Charles Rau in the preparation of the Indian collections of the National museum for the Centennial exposition at Philadelphia, and was curator of the entire collection until the close of the exhibition, when he was appointed curator of the ethnological department of the National museum. During the summer of 1876 he gained his first knowledge of the Pueblo Indians, and joined Maj. J. W. Powell in his expedition of 1879 to New Mexico, as assistant ethnologist of the U. S. bureau of ethnology, of the Smithsonian institution. The expedition spent two months among the Zuñi Indians, and Mr. Cushing, at his own request, was left there. He adopted the costume, habits, and life of the race, and for three years lived strictly the life of an Indian among the Indians, studying their habits, language, and history. During the second year of his sojourn he had so far made himself one of the tribe, and gained the esteem of the chiefs, that he was formally adopted and initiated into the sacred esoteric society of priests, the "Priesthood of the Bow." In 1882 he visited the east with a party of six Zuñis, who came for the purpose of taking water from the Atlantic ocean, or "Ocean of Sunrise," as a religious ceremony, and carrying it to their temple in the Pueblos. Four of the Zuñis returned, while Mr. Cushing remained with the other two during the summer in Washington, for the purpose of writing, with their aid, his contribution to the bureau of ethnology on Zuñi fetiches. In September of the same year he returned to Zuñi; but, in the spring of 1884, failing health obliged his return for two years to the east. He brought with him three Indians to aid him in the preparation of a dictionary and grammar of the Zuñi language, and translations of myth and beast stories, hero legends, songs, and rituals. Mr. Cushing's publications and contributions to periodical literature include "Antiquities of Orleans County" (Washington, 1874); "Zuñi Fetiches" (1881); "The Relationship between Zuñi Sociologic and Mythic Systems" (1882); "The Nation of the Willows" (1882); "Adventures in Zuñi" (1883); "Studies of Ancient Pueblo Keramic Art, as Illustrative of Zuñi Culture-Growth" (1884); and "Zuñi Breadstuff" (1885).

CUSHING, Jonathan Peter, educator, b. in Rochester, N. H., 12 March, 1793; d. in Raleigh, N. C., 25 April, 1835. In his boyhood he was apprenticed; but, by skilfully managing the proceeds of his overwork, he purchased a portion of his time, and immediately entered Phillips Exeter academy. By working a portion of each day and by teaching, he paid his way through college, being graduated at Dartmouth in 1817. His health failed, and he went south, became a tutor in Hampden Sydney college in the November following his graduation, and professor of chemistry and natural philosophy two years later. This chair he held for two years, when he became the president of the college. By his exertions, the institution, which had been sadly disorganized and broken down, was built up again; but the labor and responsibility of the enterprise exhausted his strength and hastened his death.

CUSHING, Luther Stearns, jurist, b. in Lunenburg, Mass., 22 June, 1803; d. in Boston, 22 June, 1856. He was the only graduate at the Harvard law-school in 1826. For some years after leaving college he was associated with Charles Sumner and George S. Hillard in the editorship of "The American Jurist and Law Magazine" in Boston, when in 1832 he was made clerk of the house of representatives, an office which he held for fourteen years. In 1844 he was chosen a member of the legislature, then for four years was judge of the court of common pleas in Boston, after which he became reporter of the decisions of the supreme court of the commonwealth, and prepared twelve volumes (55 to 66 inclusive) of law reports, extending from 1850 to the time of his death. In 1848 he became lecturer on Roman law in Harvard law-school, and filled the chair until his death. His name is best known in connection with his "Manual of Parliamentary Practice" (Boston, 1844), which immediately became an authority for proceedings in deliberative assemblies. He also published a "Treatise on Trustee Process" (1837); "Treatise on Remedial Law" (1837); English translation of Sarigny's "Recht des Besitzes," law of possession (1838); translation of Pothier's "De la vente," contract of sale (1839); translation of Mattermaier on "Effect of Drunkenness on Criminal Responsibility" (1841); translation of Domat's "Les lois civiles dans leur ordre naturel" (1850); "Reports of Controverted Election Cases in Massachusetts" (1852); "Introduction to the Study of Roman Civil Law" (1854); and "Lex Parliamentaria Americana," a comprehensive work on parliamentary law (1856).

CUSHING, Nathaniel, soldier, b. in Pembroke, Mass., 8 April, 1753; d. in Marietta, Ohio, in August, 1814. He joined the forces that went from Massachusetts in 1775, became a lieutenant in Brewer's regiment in July of that year, was advanced to a captaincy in 1777, organized a surprise, and captured forty of the De Lancey loyalists in May, 1780, after many fruitless attempts

had been made by others. He participated in many engagements, and received in 1782 the brevet of major. At the close of the war he removed to Belpre, Ohio.

CUSHING, Thomas, statesman, b. in Boston, Mass., in 1725; d. there in 1788. He was the son of a wealthy merchant, in whose counting-house Samuel Adams was for a short time employed. He fell under the influence of Adams, and presently became prominent among the popular leaders who were preparing the way for the Revolution. In May, 1766, he was elected to the Massachusetts assembly, and immediately afterward, when James Otis, who had been chosen speaker, was refused by Gov. Bernard, Mr. Cushing was chosen speaker in his stead. He was speaker of the house until 1774, and as such occupied, in the eyes of the British, a prominence greater than his abilities entitled him to. Dr. Johnson, in one of his silly pamphlets about American affairs, asserted that one of the objects of the Revolution was to place a diadem on the head of Thomas Cushing. He was not fitted for leadership, and on several occasions showed himself weak-kneed. In 1772, along with Hancock, he opposed the formation of committees of correspondence, and afterward refused to serve on one to which he had been appointed. At the same time he is described by John Adams as possessing a rare faculty for procuring secret intelligence, which made him useful to the patriot leaders. He was elected in June, 1774, to the first Continental congress, and in February, 1775, to the second. He was one of those whom the king instructed Gage, in April, 1775, to seize and send over to England, to be tried for treason. In July, 1775, when Massachusetts formed a new government, Mr. Cushing was chosen a member of the council. In the Continental congress he opposed a declaration of independence, and consequently, in the third annual election of delegates, 19 Jan., 1776, he did not receive a single vote, but Elbridge Gerry was elected instead. In 1783 and several following years he was lieutenant-governor of Massachusetts. He was a member of the convention, held in January and February, 1788, that ratified the Federal constitution.

CUSHING, Thomas Humphrey, soldier, b. in 1755; d. in New London, Conn., 19 Oct., 1822. He served during the Revolutionary war, beginning as a sergeant, was in Arnold's naval battle on Lake Champlain, and for his bravery was successively advanced until in July, 1812, he had reached a brigadier-generalship. In January, 1816, he was appointed collector of customs in New London. Some time after this he became involved in a quarrel with William J. Lewis, member of congress from Virginia, and the ball from Mr. Lewis's weapon struck Gen. Cushing's watch. The differences between the two gentlemen were amicably adjusted, and Lewis, stepping up to the general, said: "I congratulate you, general, on having a watch that will keep time from eternity."

CUSHING, Thomas Parkman, merchant, b. in Ashburnham, Mass., in 1787; d. in Boston, 23 Nov., 1854. He carried on business in Boston, and bequeathed the bulk of his fortune, supposed to amount to $150,000, for the maintenance of two schools in his native town.

CUSHING, William, jurist, b. in Scituate, Mass., 1 March, 1732; d. there, 13 Sept., 1810. He was graduated at Harvard in 1751, studied law with Jeremy Gridley, became attorney-general of Massachusetts, was appointed judge of probate of Lincoln county, Me., in 1768, became judge of the Massachusetts superior court in 1772, chief justice in 1777, and in 1780 was chosen the first chief justice of Massachusetts under the state constitution. At the beginning of the Revolution he stood almost alone among the superior officials in supporting the cause of independence. His grandfather and his father (both named John) were judges of the superior court, and his father, whom he succeeded as chief justice, presided over the trial of British soldiers for the Boston massacre of 5 March, 1770. On 27 Sept., 1789, Judge Cushing was appointed an associate justice of the U. S. supreme court. President Washington nominated him chief justice in 1796, but he declined. He was one of the founders of the American academy of arts and sciences in 1780. In 1788 he was vice-president of the Massachusetts convention that ratified the federal constitution.

CUSHING, William Barker, naval officer, b. in Wisconsin, 24 Nov., 1842; d. in Washington, D. C., 17 Dec., 1874. He was appointed to the naval academy from New York in 1857, but resigned on 23 March, 1861. In May, 1861, he volunteered, was appointed master's mate, and on the day of his arrival at Hampton Roads captured and brought into port a tobacco-schooner, the first prize of the war. He was attached to the north Atlantic blockading squadron during the war, and repeatedly distinguished himself by acts of bravery. He was commissioned lieutenant on 16 July, 1862. In November, 1862, he was ordered in the steamer "Ellis" to capture Jacksonville, Fla., intercept the Wilmington mail, and destroy the salt-works at New Juliet. He captured a large mail, took two prizes, and shelled a Confederate camp, but was unable to cross the bar that night, and in the morning ran aground. The crew transferred everything except the pivot-gun to one of the captured schooners, and sailed to a place of safety, a mile and a half away; but Cushing remained with six volunteers on board the steamer until she was disabled by a cross-fire from the shore, when he set her on fire and made his escape to the schooner in a row-boat. He distinguished himself the same year on the Blackwater and in the sounds of North Carolina. In 1863 he added to his reputation for bravery and judgment by an expedition up the Cape Fear and Little rivers and operations on the Nansemond. His most brilliant exploit was the destruction of the Confederate iron-clad ram "Albemarle" on the night of 27 Oct., 1864. This powerful vessel had successfully encountered a strong fleet of U. S. gunboats, and fought them for several hours without sustaining material damage. There was nothing able to cope with her in the sounds. Cushing volunteered to destroy her, and with a steam launch and a volunteer crew he ascended Roanoke river, towing an armed cutter. The river was lined with pickets to guard against just such an attack as this; but Cushing's luck did not desert him, and he was within a few

W. B. Cushing

yards of the "Albemarle" before he was discovered. Casting off the boat that was in tow, he ordered its crew to attack a picket-post near by, while, with a full head of steam, he drove the launch straight at the huge bulk of the iron-clad, whose crew rushed to quarters and at once opened fire. The launch replied effectively with her howitzer. A raft of heavy logs surrounded the larger vessel, but the launch was driven over them, and by the time she had received her death-wound from the "Albemarle's" guns Cushing had coolly swung the torpedo-boom under the great ship's overhang and exploded the charge. A large hole was blown in the iron-clad's side, she sank at her moorings, and was never raised. Telling his companions to look out for themselves, Cushing left his sinking launch and swam down stream, reaching the bank, thoroughly exhausted, half a mile below. As soon as he recovered his strength he plunged into the dense swamp, and after many hours of tedious wading came out upon the shore of a creek, where, with his usual good luck, he found a picket-boat, and at 11 P. M. the following night reached a U. S. gun-boat at the mouth of the river. Of the gallant fellows who risked their lives with him, only one escaped besides himself. Two were drowned, and most of the others captured. Lieut. Cushing did not expect to return alive from this enterprise, whether he succeeded in sinking the "Albemarle" or not, and before setting out he had visited Massachusetts in order to bid his friends good-by. Five times the secretary of the navy officially wrote him commendatory letters, and for the "Albemarle" affair he received the thanks of congress, and was promoted lieutenant-commander, 27 Oct., 1864. At Fort Fisher, under a constant and heavy fire, he buoyed out the channel in a small skiff, and continued the work for six hours till he had completed it. At the final assault on Fort Fisher he led a force of sailors and marines from the "Monticello" in an attack on the sea-front of the fort, and amid an unceasing fire at short range, which cut down his men in windrows, he crossed a hundred yards of sand, rallied his men, and lent such efficient assistance to the troops that before midnight the fort was surrendered. After the war he served in the Pacific and Asiatic squadrons, being in command of the steamer "Lancaster" in 1866–'7, and of the "Maumee," in the Asiatic squadron, in 1868–'9. On the return of the "Maumee" to the United States, Lieut.-Com. Cushing was advanced to the rank of commander, 31 Jan., 1872, being the youngest officer of that rank in the navy. He was allowed leave of absence, but his health, which had been impaired by over-exertion, failed completely, and he died of brain fever.

CUSHMAN, Charlotte Saunders, actress, b. in Boston, Mass., 23 July, 1816; d. there, 18 Feb., 1876. She was a descendant in the eighth generation from Robert Cushman. Her father rose from poverty to be a successful West India merchant, but lost his fortune, and died, leaving his family in straitened circumstances. Charlotte was a remarkably bright, sportive child, excelling her schoolmates and developing a voice of remarkable compass and richness, with a full contralto register. Two friends of her father, one of them John Mackey, in whose piano factory Jonas Chickering was then foreman, provided her with the best musical instruction. She sang in choirs, and aided in the support of the family from the age of twelve. When Mrs. Joseph Wood visited Boston in 1834, Capt. Mackey introduced Miss Cushman, who sang with her in two of her concerts. Through Mrs. Wood's influence she became an articled pupil to James G. Maeder, that lady's musical director, and under his instruction made her first appearance in opera in the Tremont theatre as the Countess Almaviva in the "Marriage of Figaro" with great success, and her second as Lucy Bertram in "Guy Mannering." She went with his company to New Orleans, where her voice, which had been strained by the soprano parts assigned to her, suddenly failed. Seeking the counsel of James H. Caldwell, manager of the principal theatre of New Orleans, she was advised by him and by Barton, the tragedian, to become an actress, and given the part of Lady Macbeth to study, in which she made her appearance with complete success in 1835. Going to New York, she declined a trial at the Park theatre, to enter into a three years' engagement with Thomas Hamblin, of the Bowery theatre, where she appeared for a season in leading tragic rôles. Miss Cushman brought her mother, who had supported the family by keeping a boarding-house, to New York; but soon after this the theatre was burned, and her wardrobe, for which she was in debt, was destroyed. Miss Cushman then secured an engagement in Albany, where she acted for five months, and made many acquaintances among politicians through her relative, Gov. Marcy, then in the U. S. senate. Convinced that she had not served a proper apprenticeship in her art, she applied to the manager of the Park theatre for any place that might be vacant, was engaged to do general utility business, and soon made her mark as a leading actress. This engagement lasted from 1837 till 1840. In 1842 she assumed the management of the Walnut street theatre in Philadelphia, which she retained till 1844, when she accompanied Mr. Macready on a tour in the northern states, in the course of which she undertook the higher range of tragic parts with great success. She was an ardent student, and rapidly added new characters to her list, such as Elvira, Bianca, Helen McGregor, Emilia, Queen Katherine, Cardinal Woolsey, Ophelia, Pauline, Viola, and Katherine in "Taming of the Shrew." She was powerful and electric in tragedy, masterful in the depicting of every passion, great in Shakespearian characters, and in her young days was distinguished as a performer in high comedy parts. On 26 Oct., 1844, Miss Cushman sailed for England. In London she immediately achieved a triumphant success in the parts of Lady Macbeth, Rosalind, Mrs. Haller, Bianca in "Fazio," and Emilia. She sent for her family, and began her second season at the Haymarket as Romeo, a part she had chosen in order to bring out her sister as Juliet. The power of her impersonation created a sensation in London, and afterward in Dublin, while her sister's grace and beauty added to the success. She played other male companion parts with her sister, achieved a great success as Julia in "The Hunchback," Meg Merrilies, a part that she had first performed at the Park theatre, New

York, in 1841, Nancy Sykes, Lady Gay Spanker, and other characters, constantly added to her professional reputation, and made warm friends in the intellectual society of England. In August, 1849, she returned to the United States and played throughout the country. She took her farewell at the Broadway theatre, 15 May, 1852, visited friends in England, and travelled on the continent, but began playing again in December, 1853. Her house in Mayfair became a centre of artistic and literary society, and during the dramatic season she acted with undiminished popularity in London and the provinces, while part of her winters she passed in Rome. In 1857 she returned to the United States and performed during the winter and the spring of 1858, and returned to Rome, establishing herself in a spacious permanent winter home in January, 1859. In 1860 she again acted in New York, and appeared on several occasions for the benefit of the Sanitary commission. During the last six years of her life Miss Cushman developed a remarkable ability as a dramatic reader, giving scenes from Shakespeare, ballad poetry, dialect poems, and humorous pieces with a success not less decided than her early histrionic triumphs. In 1871, after a residence in Europe, she resumed her career in the United States as a reader, besides fulfilling several dramatic engagements. Her farewell appearance was announced at least seven times in as many different years. Her final performance in New York at Booth's theatre, where she played the part of Lady Macbeth, was signalized by social and literary demonstrations. She took a similar demonstrative farewell in the same character in Philadelphia and other cities, and her career closed in Boston, at the Globe theatre, on 15 May, 1875. After a reading-tour to Rochester, Buffalo, and Syracuse, she retired with a large fortune to her villa at Newport, where she was seized with her final illness, and in October went to Boston and placed herself under medical treatment. An obelisk copied from Cleopatra's Needle was placed over her tomb in Mount Auburn cemetery in 1880. See "Charlotte Cushman, her Letters and Memories of her Life," edited by Emma Stebbins, the sculptor, who was her intimate friend and companion at Rome for several years (Boston, 1878).—Her sister, **Susan Webb,** b. in Boston, Mass., 17 March, 1822; d. in Liverpool, England, 10 May, 1859, made her *début* on the stage in April, 1837, at the Park theatre, New York city, as Laura Castelli in Epes Sargent's play, "The Genoese," and achieved an immediate success. She played Desdemona to George Vandenhoff's Othello, Grace Harkaway to her sister's Lady Gay Spanker, and other prominent parts in New York and Philadelphia, and made a remarkable success in "Satan in Paris." In England her impersonation of Ophelia was regarded as of the first rank, her Juliet ran 200 nights, and in her old and many new characters her acting was greatly admired for its grace and delicacy. In 1847 she retired from the stage, and in March, 1848, married Dr. James Sheridan Muspratt, of Liverpool, the distinguished chemist and author.

CUSHMAN, Elisha, clergyman, b. in Kingston, Mass., 2 May, 1788; d. in Hartford, Conn., 26 Oct., 1838. He abandoned the carpenter's trade to become a preacher at the age of twenty, was licensed by the Baptist church in Kingston after a short course of study, and ordained a pastor in Hartford. He took a prominent part in establishing the Connecticut Baptist missionary society in 1814, which was reorganized as the Baptist convention in 1822, and in 1822 founded and edited a denominational journal called the "Christian Secretary." In 1825 he resigned his charge in Hartford to become pastor of a church in Philadelphia, but returned to Connecticut in 1829, and after preaching in Fairfield became pastor of the church in New Haven in 1831. In 1835 he removed to Plymouth, Mass., but on the failure of his health in 1838 returned to Hartford a few weeks before his death, for the purpose of resuming the editorship of the "Christian Secretary."

CUSHMAN, Pauline, spy, b. in New Orleans, La., 10 June, 1833. She was the daughter of a Spanish refugee, who became a tradesman in New Orleans, and afterward an Indian trader at Grand Rapids, Mich. After reaching womanhood she returned to the south as a variety actress, and attracted attention by her beauty. When acting in Louisville, Ky., in March, 1863, she was offered a bribe if she would give a toast to Jefferson Davis during the performance, and, on informing the provost-marshal, Col. Moore, was induced to carry out the plot. She was afterward employed by the government as a detective to discover the southern sympathizers and spies in Louisville, and their methods of conveying information and medical supplies across the lines, and frequently also as a scout. Securing a theatrical engagement at Nashville, where she was welcomed as a secessionist, she performed valuable services for the army police in detecting thefts from the government stores, trade in contraband, and the practices of guerillas. Thence she was sent beyond the lines in May, 1863, ostensibly as a rebel sympathizer, in order to gain information of the strength of the Confederate forces and fortifications, the extent of their supplies, and their contemplated movements. She was captured, taken to the headquarters of Gen. Bragg, and sentenced by a court-martial to be hanged as a spy, but was left behind at the evacuation of Shelbyville, where she was found by the Union troops. The fame of her adventures extended over the country, and after her escape from imprisonment she was given by the soldiers the title of major, and was accoutred as an officer. Her knowledge of the roads in Tennessee, Georgia, Alabama, and Mississippi was of great service to the Army of the Cumberland. See her "Life," by F. L. Sarmiento (Philadelphia, 1865).

CUSHMAN, Robert, Plymouth pilgrim, b. in Kent, England, about 1580; d. in England in 1625. With John Carver he was instrumental in effecting the emigration of the pilgrims to Holland, where he joined them after they had been in Leyden several years. He became a leading member of the community in Leyden, and took a deep interest in the project of settling in an English colony. In 1617 he was sent with Deacon Carver to London to negotiate with the Virginia company, which had secured a grant from the king of all the territory between boundaries 200 miles north and 200 miles south of Point Comfort, for permission to settle on their lands, and to apply to King James to grant them liberty of conscience there. The king would only grant them permission to settle, and refused to issue a charter under his seal, though he promised not to molest them. Cushman undertook a subsequent mission to England for the same object with Elder Brewster in 1619, when a patent was obtained in which the king granted toleration for their form of religion so long as they remained faithful subjects. The arrangement with the London merchant adventurers was concluded through his agency. He and Carver then returned to England to collect subscriptions, make purchases, and prepare for the voyage. They chartered the "Mayflower," and, while Carver was busy with the ship

at Southampton, Cushman, at the solicitation of the adventurers, altered the agreement on his own responsibility, abandoning the two days a week for their private affairs that had been reserved to the colonists in the original contract. Robert Cushman, who was given the office of assistant governor, embarked with his family on the "Speedwell" on 5 Aug., 1620, when the two vessels began the voyage together; but when the "Mayflower" sailed again alone on 6 Sept., with only a part of the company, he remained behind to act as their financial agent in England and send them supplies. In 1621 he published a pamphlet on "Emigration to America," urging the advantages of that country for settlement, and in July he sailed for New England in the "Fortune," taking with him his only son, Thomas, and arriving 21 Nov. He returned to Europe to manage the business of the colonists there, but left his son in the family of Gov. Bradford. Before his departure he preached on the "Sin and Danger of Self-Love," 9 Dec., 1621, noted as the first discourse delivered in New England that was published (London, 1622). It was reprinted in Boston in 1724, in 1780, and, with a biographical sketch by Judge John Davis, in 1785 (Plymouth). It is also contained in the "Cushman Genealogy," and was photo-lithographed from one of the three existing examples in 1870. On 13 Dec., 1621, he sailed for England, and continued as agent for the colonists in London. On the voyage he was captured and plundered by the French, and taken to France, but released after two weeks' detention. On his arrival in England he published an eloquent vindication of the colonial enterprise, and an appeal for Christian missions to the North American Indians. In 1623, with Edward Winslow, he obtained from Lord Sheffield a grant of territory on Cape Ann, where a new band of Puritans made the first permanent settlement within the limits of the Massachusetts bay colony.—His son, **Thomas,** b. in England in 1608; d. in Plymouth, Mass., 11 Dec., 1692. He married Mary, third daughter of Isaac Allerton, about 1635. He was always the confidential friend of Gov. Bradford, and became ruling elder of the church on the death of Brewster in 1649. His wife survived him, and was the last of the "Mayflower" passengers, dying in 1699 at the age of ninety years. A large granite monument to the memory of the first Cushmans was erected at Plymouth, Mass., by their descendants in 1858.

CUSICK, Nicholas, Indian chief, b. in Oneida, N. Y., in 1756; d. in Tuscarora village, near Niagara, N. Y., 29 Oct., 1840. His Indian name was "Kayhnatho." In the war of the Revolution he served on the American side five years, and at one time saved the life of Gen. Lafayette. Cusick belonged to the Tuscarora tribe.—His nephew, **David,** published a pamphlet with four illustrations, entitled "Sketches of the Ancient History of the Six Nations" (Lockport, N. Y., 1848).

CUSTER, George Armstrong, soldier, b. in New Rumley, Harrison co., Ohio, 5 Dec., 1839; d. in Montana, 25 June, 1876. He was graduated at the U. S. military academy in June, 1861, and reported for duty at Washington. Gen. Winfield Scott gave him despatches to carry to Gen. Irwin McDowell, then in command of the Army of the Potomac, he was assigned to duty as lieutenant in the 5th cavalry, and participated, on the day of his arrival at the front, in the first battle of Bull Run. Gen. Philip Kearny selected him as his first aide-de-camp, and he afterward served on the staff of Gen. William F. Smith. While on this duty he was given charge of the balloon ascensions, to make reconnoissances. In May, 1862, Gen. George B. McClellan was so impressed with the energy and perseverance that he showed in wading the Chickahominy alone, to ascertain what would be a safe ford for the army to cross, and with his courage in reconnoitring the enemy's position while on the other side, that he was appointed aide-de-camp, with the rank of captain, to date from 15 June, 1862. Capt. Custer applied at once for permission to attack the picket-post he had just discovered, and at daylight the next morning surprised the enemy, drove them back, capturing some prisoners and the first colors that were taken by the Army of the Potomac. After Gen. McClellan's retirement from command of the army, Capt. Custer was discharged from his volunteer appointment and returned to his regiment as lieutenant. He had served there but a short time when Gen. Alfred Pleasonton, on 15 May, 1863, made him aide-de-camp on his staff. For daring gallantry in a skirmish at Aldie and in the action at Brandy Station, as well as in the closing operations of the Rappahannock campaign, he was appointed brigadier-general of volunteers, dating from 29 June, 1863, and assigned to duty as commander of the Michigan brigade. At Gettysburg his brigade, together with those of Gregg and McIntosh, defeated Gen. Stuart's efforts to turn the left flank. For this action he was brevetted major in the U. S. army, to date from 3 July, 1863. At Culpepper Court-House he was wounded by a spent ball, which killed his horse. He took part in Gen. Sheridan's cavalry raid toward Richmond, in May, 1864, and was brevetted lieutenant-colonel for gallant and meritorious services in the battle of Yellow Tavern, 11 May. In Gen. Sheridan's second raid on Richmond the Michigan brigade made a most gallant fight at Trevillion Station; but so great was their peril that the colors of the brigade were only saved from capture by Gen. Custer's tearing them from the standard, held in the grasp of a dying color-sergeant, and concealing the flag in his bosom. On 19 Sept., 1864, he was made brevet-colonel, U. S. army, for gallantry at the battle of Winchester, and on 19 Oct. he was brevetted major-general of volunteers for gallantry and meritorious services at Winchester and Fisher's Hill. On 30 Sept. he assumed command of the 3d division of cavalry, with which he fought the brilliant battle of Woodstock on 9 Oct., where he was confronted by his former classmate at West Point, the Confederate Gen. Rosser. He drove the enemy twenty-six miles, capturing everything they had on wheels except one gun. At Cedar Creek he confronted the enemy from the first attack in the morning until the battle ended. The 3d division recaptured, before the day was over, guns and colors that had been taken from

the army earlier in the fight, together with Confederate flags and cannon. After this brilliant success Gen. Custer was sent to Washington in charge of the captured colors, and recommended for promotion. In the spring of 1865, when Gen. Sheridan moved his cavalry toward Richmond again, the 3d division fought alone the battle of Waynesboro. The enemy's works were carried, and 11 guns, 200 wagons, 1,600 prisoners, and 17 battle-flags were captured. On reaching Fredrickshall Station, Gen. Custer found that Gen. Early had rallied from his retreat at Waynesboro and was preparing for another attack. He therefore sent a regiment to meet him at once. Gen. Early was nearly captured, his command destroyed, and a campaign ended in which he lost his army, every piece of artillery, and all his trains. For gallant and meritorious services at the battles of Five Forks and Dinwiddie Court-House, Gen Custer was brevetted brigadier-general, U. S. army, to date from 13 March, 1865. In a general order addressed to his troops, dated at Appomattox Court-House, 9 April, 1865, Gen. Custer said: "During the past six months, though in most instances confronted by superior numbers, you have captured from the enemy in open battle 111 pieces of field artillery, 65 battle-flags, and upward of 10,000 prisoners of war, including seven general officers. Within the past ten days, and included in the above, you have captured 46 field-pieces of artillery, and 37 battle-flags. You have never lost a gun, never lost a color, and never been defeated; and, notwithstanding the numerous engagements in which you have borne a prominent part, including those memorable battles of the Shenandoah, you have captured every piece of artillery which the enemy has dared to open upon you."

Gen. Custer received the first flag of truce from the Army of Northern Virginia, and was present at the surrender at Appomattox Court-House. He was brevetted major-general for his services in the last campaign, and appointed major-general of volunteers, to date from 15 April, 1865. He participated in all but one of the battles of the Army of the Potomac. After the grand review he was ordered to Texas, to command a division of cavalry. In November, 1865, he was made chief of cavalry, and remained on this duty until March, 1866, when he was mustered out of the volunteer service, to date from February, 1866. He then applied to the government for permission to accept from President Juarez the place of chief of Mexican cavalry in the struggle against Maximilian. President Johnson declined to give the necessary leave of absence, and Gen. Custer decided to accept the lieutenant-colonelcy of the 7th cavalry, his appointment dating from 28 July, 1866. He joined his regiment at Fort Riley, Kansas, in November, 1866, and served on the plains until 1871. On 27 Nov. he fought the battle of the Washita, in Indian territory, and inflicted such a defeat upon the Indians that the entire tribe of Cheyennes were compelled to return to their reservation. He was ordered, with his regiment, to Kentucky, in 1871, where he remained until 1873. In the spring of that year he was sent, with the 7th, to Fort Rice, Dakota, and from there accompanied an expedition to the Yellowstone. On 4 Aug. he fought the Sioux, with his regiment, on the Yellowstone, near the mouth of Tongue river, and on the 11th had another engagement three miles below the mouth of the Big Horn. In July, 1874, the government ordered an expedition, commanded by Gen. Custer, into the Black Hills, which resulted in a hitherto unexplored region being opened to miners and frontiersmen. On 15 May, 1876, Gen. Custer commanded his regiment in a campaign against the confederated Sioux tribes. The Indians were discovered encamped on the Little Big Horn river, in a region almost unknown. Eleven tribes, numbering nearly 9,000, had their villages on and in the vicinity of the Little Big Horn. The government expedition consisted of 1,100 men. The strength of the enemy not being known, Gen. Custer was ordered to take his regiment and pursue a trail. He arrived at what was supposed to be the only Indian village on 25 June, and an attack was made by a portion of the regiment numbering fewer than 200 cavalry, while Gen. Custer, with 277 troopers, charged on the village from another direction. They were met by overwhelming numbers, and Gen. Custer, with his entire command, was slain. The officers and men were interred upon the battle-field, and in 1879 it was made a national cemetery. A monument recording the name and rank of all who fell was erected by the U. S. government on the spot where Gen. Custer made his last stand. In 1877 his remains were removed to the cemetery at West Point, N. Y.

He was nearly six feet in height, broad-shouldered, lithe, and active, with a weight never above 170 pounds. His eyes were blue, his hair and mustache of golden tint. He was a man of immense strength and endurance, and, as he used neither liquors nor tobacco, his physical condition was perfect through all the hardships of his life. Eleven horses were shot under him in battle. At the age of twenty-three he was made a brigadier-general, at twenty-five a major-general. The close of the war reduced his command from thousands to hundreds; but his enthusiastic devotion to duty was not diminished, and his form was seen at the head of his men in his Indian service just as it had been during the civil war. He reverenced religion, he showed deference to the aged, he honored womankind, he was fond of children, and devoted to animals. His domestic life was characterized by a simplicity, joyous contentment, and fondness for home that was surprising when it is remembered that, out of the thirty-seven years of his brief life, fourteen were spent in active warfare. One of his friends wrote his history under his name in one sentence, "This was a man." In 1871 Gen. Custer began to contribute articles on frontier life to the "Galaxy," which were published in book-form under the title "My Life on the Plains" (New York, 1874). He was engaged on a series of "War Memoirs" for the "Galaxy" at the time of his death. He occasionally contributed articles on hunting to "Turf, Field, and Farm" and "Forest and Stream." His life has been written by Frederick Whittaker (New York, 1878).—His wife, **Elizabeth Bacon,** whom he married in February, 1864, was with him at the front during the last year of the war, and also accompanied him in his nine years' service on the western frontier. She has published "Boots and Saddles, or Life with Gen. Custer in Dakota" (New York, 1885), and is now (1887) at work upon a volume of reminiscences of the general's service in Texas and Kansas.—His brother, **Thomas Ward,** soldier, b. in New Rumley, Harrison co., Ohio, 15 March, 1845; d. in Montana, 25 June, 1876. After repeated attempts, which failed on account of his youth, he succeeded in enlisting as a private in an Ohio regiment, and served in the west until he was made aide-de-camp on his brother's staff, then with the Army of the Potomac. His appointment as second lieutenant in the 6th Michigan cavalry dated from 8 Nov., 1864. His horse was often neck and neck with that

of his brother in the famous cavalry charges, and in the fight at Namozine Church, 2 April, 1865, he captured a Confederate flag. At Sailor's Creek, 6 April, he captured a second flag, but was shot by the standard-bearer and severely wounded in the face. He was preparing to charge again, when stopped by his brother and told to go to the rear and have his wound dressed. As he paid no attention to this request, it became necessary for Gen. Custer to order him under arrest before he could check his ardor. He received a medal from congress for the capture of the colors at Sailor's Creek. In the spring of 1865 he accompanied Gen. Custer to Texas and served on the staff until mustered out of service in November. He received the brevets of captain, major, and lieutenant-colonel. On 23 Feb., 1866, he was appointed second lieutenant in the 1st infantry of the regular army, and on 28 July was promoted to a first lieutenancy in his brother's regiment, the 7th cavalry, with which he served on frontier duty until he fell beside his brother in the battle of the Little Big Horn. When he was asked his opinion of his brother, just before the final campaign, Gen. Custer said: "If you want to know my opinion of Tom, I can only say that I think he should be the general and I the captain."

CUSTINE, Adam Philip (kus-teen'), Count de, French soldier, b. in Metz, 4 Feb., 1740; d. in Paris, 28 Aug., 1793. After serving as a captain in the seven years' war under Frederick the Great, he became a colonel in 1762. He took part in the Revolutionary war, and was quartermaster-general of the French forces in America in 1778–'83. He was present at the surrender at Yorktown, and on his return to France in 1783 was made mareschal-de-camp and governor of Toulon. In 1789 he was deputed to the states-general by the nobility of Metz, and advocated the cause of reform. He subsequently commanded the army of the north, received in June, 1792, the command of the army of the lower Rhine, and after some successes again took command of the northern army in May, 1793, from which, however, he was soon recalled by the committee of safety and placed at the bar of the revolutionary tribunal, and, notwithstanding a spirited defence, was sentenced to be guillotined.

CUSTIS, George Washington Parke, author, b. at Mount Airy, Md., 30 April, 1781; d. at Arlington House, Fairfax co., Va., 10 Oct., 1857. His father, Col. John Parke Custis, the son of Mrs. Washington by her first husband, was aide-de-camp to Washington at the siege of Yorktown, and d. 5 Nov., 1781, aged twenty-eight. The son had his early home at Mount Vernon, pursued his classical studies at St. John's college and at Princeton, and remained a member of Washington's family until the death of Mrs. Washington in 1802, when he built Arlington House on an estate of 1,000 acres near Washington, which he had inherited from his father. After the death in 1852 of his sister, Eleanor Parke Custis, wife of Maj. Lawrence Lewis, he was the sole surviving member of Washington's family, and his residence was for many years a favorite resort, owing to the interesting relics of that family which it contained. Mr. Custis married in early life Mary Lee Fitzhugh, of Virginia, and left a daughter, who married Robert E. Lee. The Arlington estate was confiscated during the civil war, and is now held as national property, and is the site of a national soldiers' cemetery. The house is represented in the accompanying illustration. Mr. Custis was in his early days an eloquent and effective speaker. He wrote orations and plays, and during his latter years executed a number of large paintings of Revolutionary battles. His "Recollections of Washington," originally contributed to the "National In-

telligencer," was published in book-form, with a memoir by his daughter and notes by Benson J. Lossing (New York, 1860).

CUTBUSH, James, chemist, b. in Pennsylvania; d. at West Point, N. Y., 15 Dec., 1823. Concerning his early history, very little is known, except that he taught chemistry. He was appointed to the army with the rank of assistant apothecary-general in 1814, served first in Philadelphia, was afterward attached to the northern division of the army, and was chief medical officer of the U. S. military academy and the post at West Point from June, 1820, till November, 1821. On the reorganization of the army he became assistant surgeon and acting professor of chemistry and mineralogy at West Point, in which capacity he continued until his death. He was president of the Columbian chemical society in Philadelphia, wrote several papers in the earlier volumes of Silliman's "American Journal of Sciences," and was the author of "Useful Cabinet" (1808); "Philosophy of Experimental Chemistry" (1813); and "Treatise on Pyrotechnics" (Philadelphia, 1825).

CUTHBERT, Alfred, senator, b. in Savannah, Ga., about 1781; d. near Monticello, Ga., 9 July, 1856. He was graduated at Princeton college in 1803, studied law, was admitted to the bar, and began to practise in Monticello, Jasper co., Ga. He was first elected to the state legislature, then a representative from Georgia in the 13th and 14th congresses, serving till 1816, when he resigned. He was again elected to the 17th, 18th, and 19th congresses, serving from 3 Dec., 1821, till 3 March, 1827. He was elected U. S. senator from Georgia in place of John Forsyth, who resigned 27 June, 1834, and was re-elected for a full term, serving from 12 Jan., 1835, till 3 March, 1843.

CUTHBERT, James Hazzard, clergyman, b. in Beaufort, S. C., 13 Dec., 1823. He was graduated at Princeton in 1843, studied theology under his uncle, Rev. Richard Fuller, D. D., and became in 1847 pastor of the Wentworth street Baptist church, Charleston, S. C. In 1855 he was called to the pastorate of the 1st Baptist church, Philadelphia, Pa., where he remained until the beginning of the civil war in 1861. Returning to the south, he preached for some years in Augusta, Ga., and in 1869 became pastor of the 1st Baptist church in Washington, D. C., where he still remains (1886). He has received the degree of D. D. from Wake Forest college, N. C. He is the author of "The Life of Richard Fuller, D. D." (New York, 1879).

CUTHBERT, John A., jurist, b. in Savannah, Ga., 3 June, 1788; d. near Mobile, Ala., 22 Sept., 1881. His father was a colonel in the Revolution-

ary army. He was graduated at Princeton in 1805, and in 1809 became a law student in New York. In 1810 he was elected to the legislature of Georgia, from Liberty county, which he continued to represent for years. During the war of 1812 he commanded a volunteer company to protect the coast. In 1818 Georgia elected her representatives in congress on one general ticket, and Cuthbert was thus chosen. At that time the Missouri question occupied the attention of congress, and Judge Cuthbert took an active and zealous part in maintaining the southern side of it. In 1831 he became editor, and subsequently proprietor, of "The Federal Union," a paper published at Milledgeville, Ga., and in 1837 removed to Mobile to practise his profession. In 1840 he was elected judge of the county court of Mobile, and in 1852 appointed judge of the circuit court.

CUTLER, Benjamin Clarke, clergyman, b. in Roxbury, Mass., 6 Feb., 1798; d. in Brooklyn, N. Y., 10 Feb., 1863. He was for some time a clerk in the mercantile house of Messrs. Andrews & Co., Boston. He was graduated at Brown in 1822, studied theology under the direction of Bishop Griswold, and by him was ordained deacon in November, 1822. His first settlement was in Quincy, Mass., where he remained about seven years, but left on account of failing health, and spent the winter of 1830 in Savannah. He returned to New England on horseback, and subsequently passed a year as rector of the Episcopal church in Leesburg, Va. In the summer of 1832 he took charge of the first city mission of the Episcopal church in New York; and in April, 1833, accepted a call to St. Anne's church, in Brooklyn, where he spent the last thirty years of his life. In 1835 he received the degree of D. D. from Columbia. He left a volume of sermons (Philadelphia, 1857).

CUTLER, Elbridge Jefferson, educator, b. in Holliston, Middlesex co., Mass., 28 Dec., 1831; d. in Cambridge, Mass., 27 Dec., 1870. In 1865 he was appointed professor of modern languages at Harvard, a chair which he held at the time of his death. He was a brilliant writer, and an able though generous critic. His published works were "War Poems" (Boston, 1867) and "Stella" (1868). A memoir of Prof. Cutler was published by Andrew P. Peabody (Cambridge, 1872).

CUTLER, Enos, soldier, b. in Brookfield, Mass., 1 Nov., 1781; d. in Salem, 14 July, 1860. He was graduated at Brown in 1800, and was a tutor there for one year. He studied law, and, being called to the bar, settled in Cincinnati. He joined the army, and was appointed lieutenant in the 7th infantry in 1808, rising by successive promotions to be colonel of the 4th infantry in 1836. He resigned on 30 Nov., 1839. He saw service in the war of 1812, in the first Seminole campaign with Gen. Jackson, and in the Creek war.

CUTLER, Ephraim, pioneer, b. in Edgarton, Martha's Vineyard, Mass., in 1767; d. in Amestown, Ohio, in 1853. His early life was spent in Connecticut on a farm, where he acquired a knowledge of mathematics and surveying. In 1788 he was appointed agent of the Ohio company, and soon afterward engaged in mercantile business until 1794. Finding his ventures unprofitable, he removed to Ohio, where he had an interest in some land. His journey thither required more than three months, and was delayed by privations, adventure, and sickness. On his arrival in Ohio, Gov. St. Clair appointed him judge of quarter sessions and judge of common pleas. In 1797 Judge Cutler exchanged his possessions for an estate in the township of Ames, where he spent the remainder of his life. He erected a log cabin in the wilderness, planted a few acres of corn, and reassumed the duties of his judgeship, periodically making his way through the wilds to Marietta to attend court. He says that during seven years, in which he served in three courts, his "dividend was not sufficient, but in a single instance, to pay the weekly board." He early interested himself in education, and stimulated the people of Ames and Dover townships to establish a public library. The necessary funds were obtained by the sale of furs procured by native hunters. This is thought to have been the first incorporated public library in the west. Toward the close of his life Judge Cutler wrote: "More than sixty individuals have grown to maturity within this circle, two have become professors in colleges, three are ministers of the gospel, one of them a bishop, at the head of them Thomas Ewing, several judges of courts, and one general." His last public service was in 1839 as a delegate to the whig convention at Harrisburg. He was the author of a "History of the First Settlement of Amestown in Athens County, Ohio," and "The First Settlement of Athens County," etc., both published in Hildreth's "Pioneer Settlers."

CUTLER, Hannah Maria Tracy, physician, b. in Becket, Berkshire co., Mass., 25 Dec., 1815. She is a daughter of John Conant, and was educated in the common school of Becket. In 1834 she married the Rev. J. M. Tracy, who died in 1843. Subsequently she prepared herself for teaching, and was matron of the Deaf and dumb asylum at Cleveland, Ohio, in 1848–'9. In July, 1851, she visited England as a newspaper correspondent at the World's fair. She was also at the same time a delegate from the United States at the peace congress in London, and while in England delivered the first lectures ever given there on the legal rights of women. In 1852 she married Samuel Cutler and removed to Illinois, where she labored assiduously for the reform of the laws relating to women. She was president of the Western union aid commission, Chicago, Ill., in 1862–'4. In 1873 she visited France, in company with her son, J. M. Tracy, artist, and remained there till 1875. After her graduation as a physician at the Homœopathic college in Cleveland, Ohio, in 1879, she settled at Cobden, Ill., where she has practised with success. She is the author of "Woman as she Was, Is, and Should be" (New York, 1846); "Phillipia, or a Woman's Question" (Dwight, Ill., 1886); and "The Fortunes of Michael Doyle, or Home Rule for Ireland" (Chicago, 1886).

CUTLER, Henry Stephen, musician, b. in Boston, Mass., 7 Oct., 1824. He was organist and choir-master in Trinity church, New York, from 1860 till 1868. He compiled "The Psalter, with Chants" (Boston, 1858); "Trinity Psalter" (New York, 1863); and "Trinity Anthems" (1868). The last named contains several of his own compositions. In 1864 he received the honorary degree of Doctor in Music from Columbia.

CUTLER, Lizzie Petit, author, b. in Milton, Albemarle co., Va., in 1836. She was instructed until her fourteenth year at a seminary in Charlottesville, Va., after which her education was continued very irregularly. Her first novel, "Light and Darkness" (New York, 1855), was republished in London and translated into French. This was followed by "Household Mysteries, a Romance of Southern Life" (1856), and "The Stars of the Crowd, or Men and Women of the Day" (1858). As Miss Petit (her maiden name), she gave, in 1860, a series of public readings. About 1858 she married Mr. Cutler, a New York lawyer.

CUTLER, Lysander, soldier, b. in Maine about 1806; d. in Milwaukee, Wis., 30 July, 1866. He offered his services to the government at the beginning of the civil war, and was given command of the 6th Wisconsin regiment, which he speedily brought into a state of discipline, and rendered one of the best in the service. Subsequently he was in command of the "Iron Brigade" (originally Meredith's), of the Army of the Potomac, to which his regiment was attached, and won the promotion of brigadier- and afterward major-general. He was twice wounded.

CUTLER, Manasseh, clergyman, b. in Killingly, Conn., 3 May, 1742; d. in Hamilton, Mass., 28 July, 1823. He was graduated at Yale in 1765, after which he engaged in the whaling business, and opened a store in Edgartown, Martha's Vineyard. Meanwhile he continued his studies, principally legal, and was admitted to the Massachusetts bar in 1767. He conducted a few cases in the court of common pleas, but, finding the profession uncongenial, he gave it up and removed to Dedham, where he studied theology under the direction of the Rev. Thomas Balch, whose daughter he had married. In 1770 he was licensed and preached for six months as a candidate at the Hamlet parish (then a part of Ipswich, but since 1793 the town of Hamilton). He was ordained pastor of the Congregational society in this parish on 11 Sept., 1771, and remained associated with this organization until his death. Soon after the battle of Lexington he addressed the minute-men, then mustering in Ipswich, and accompanied them on horseback to Cambridge, where he saw the British as they retreated into Boston. He received a commission as chaplain in September, 1776, and served under Col. Ebenezer Francis in the 11th Massachusetts regiment. For his gallantry in the action in Rhode Island, on 28 Aug., 1778, he was presented with a fine horse by his commander. Toward the close of the war, when the physician of the Hamlet parish was employed in the army, and the people were without proper medical advice, Mr. Cutler at once applied himself to the study of medicine, and soon mastered the science sufficiently to practise. For several years thereafter his attention was divided between the physical and spiritual wants of his congregation. About this time his mind was directed to the study of botany by casually meeting with an English work on the subject, and he was the first to examine the flora of New England. Over 350 species were inspected by him, and classified according to the Linnæan system. His papers published on this subject are the first attempts at a scientific description of the plants of New England. In 1784, with six others, he ascended the White mountains, and his party is said to have been the first to reach the summit. With the instruments that Dr. Cutler carried, it was computed that Mount Washington was 10,000 feet above the level of the sea—an error of about 3,400 feet. Two years later he became associated with a number of Revolutionary officers who, owing to the uncertain condition of affairs, had determined to settle in the west, and formed the Ohio company for the purpose of having their bounty lands located together. He was appointed, with Maj. Winthrop Sargent, agent of the company, and in this capacity visited Washington, where he contracted with the authorities for 1,000,000 acres of land northwest of the Ohio river, obtaining also an additional grant of 500,000 acres as an allowance for bad lands and incidental charges. On his return home, an expedition was fitted out for the intended settlement. He had a large wagon built and covered with black canvas, on which was painted in white letters the words "Ohio, for Marietta on the Muskingum." Forty-five men were engaged to accompany it, and to assist in the settlement and defence of the new country for three years. In December, 1787, the expedition left Cutler's house, their number was increased to sixty, and after a long journey they reached their destination, where, under Gen. Rufus Putnam, on 7 April, 1788, the settlement of Marietta was begun. Cutler made the trip in a sulky, and travelled in twenty-nine days a distance of 750 miles. During his stay in the west he examined the fortifications and mounds in the neighborhood, which he regarded as the work of a people more civilized than any existing tribes of Indians. After remaining a short time in Marietta he determined to return home, and, bidding farewell to the colony he did so much toward establishing, he departed for New England. In 1791 the degree of LL. D. was conferred on him by Yale. In 1795 he was tendered a commission as judge of the supreme court of the Ohio territory, but declined it. Later he was elected to the Massachusetts legislature, and then was sent to congress as a federalist, serving from 7 Dec., 1801, till 3 March, 1805. During his previous stay in Washington he drafted for Nathan Dane the celebrated ordinance of 1787, which excluded slavery from the northwest territory. He declined a re-election to congress in 1804, and continued until his death to be pastor of the church in Hamilton. He was elected a member of the American academy in 1781, and contributed the following papers to its "Proceedings": "On the Transit of Mercury over the Sun, 12 Nov., 1782"; "On the Eclipse of the Moon, 29 March, 1782, and of the Sun in the following April"; "Meteorological Observations, 1781, '82, '83"; "An Account of some of the Vegetable Productions Naturally growing in this Part of America"; and "Remarks on a Vegetable and Animal Insect." He was a member of the American philosophical society, and of other learned and scientific bodies. The chapter on trees and plants in Belknap's "History of New Hampshire" was prepared by him, assisted by Dr. William D. Peck. He was also the author of a "Century Discourse" delivered at Hamilton, 27 Oct., 1814.—His son, **Jervis,** pioneer, b. in Edgartown, Martha's Vineyard, Mass., 19 Sept., 1768; d. in Evansville, Ind., 25 June, 1844. He was one of the pioneers from New England, led by Gen. Rufus Putnam, who settled in Marietta, Ohio, in 1788. He was an officer in the militia, and also in the regular army. He acquired the art of engraving, and for years devoted his time to this pursuit. In 1823 Mr. Cutler removed to Nashville, Tenn., and in 1841 settled in Evansville. He published "Topographical Description of the Western Country, with an Account of the Indian Tribes" (1812).

CUTLER, Timothy, clergyman, b. in Charlestown, Mass., in 1683; d. in Boston, in August, 1765. He was graduated at Harvard in 1701, became pastor of a Congregational society in Stratford, Conn., in 1710, and soon acquired a high reputation as a preacher. Yale college having become established in New Haven, Mr. Cutler was appointed rector in 1719, and entered upon his duties with zeal and energy. It was not long, however, before the new rector, having read some standard church works in the college library (such as those of Barrow, Patrick, South, Sherlock, etc.), was persuaded that Presbyterian and Congregational ordination was invalid. A discussion was held on this subject in the college library in Octo-

ber, 1722, when the rector and Mr. Johnson, of Stratford, upheld the divine right of episcopacy. Of course, Mr. Cutler could not remain in Yale college, and the trustees promptly voted his dismissal. He thereupon, in company with Mr. Johnson and Mr. Browne, sailed for England, in November, 1722, was ordained by the bishop of Norwich, in March, 1723, and received the degree of D. D. from both Oxford and Cambridge. He was appointed missionary by the Propagation society, returned to America, and took charge of Christ church, Boston, which was first opened for public worship on 29 Dec. Dr. Cutler continued in this place during his long and useful life, always a consistent churchman, yet rarely engaging in controversy. He published several single sermons, and was one of the most influential and learned of the Episcopal clergy in colonial days.

CUTT, John, colonial governor of New Hampshire, b. in Wales in 1625; d. in Portsmouth, N. H., 27 March, 1681. He came to this country with his brothers, Richard and Robert, before 1646. Richard, b. in 1627, settled on the Isles of Shoals and became a fisherman, but afterward removed to Portsmouth. Robert, b. in 1628, became a noted ship-builder in Kittery, while John established himself in Portsmouth as a merchant, becoming also a farmer and a mill-owner, and acquired a large property. During the union with Massachusetts he was sent as deputy to the general court, and was one of a committee from Portsmouth appointed under the jurisdiction of Massachusetts and against the claims of Capt. John Mason. He was appointed president of the province by Charles II. in 1679, and continued in that office until his death, when he was succeeded by Richard Waldron. The descendants of these brothers (who now spell the name Cutts) include all the families on both sides of the Piscataqua.—**Charles,** senator, b. in Portsmouth, N. H., 31 Jan., 1769; d. in Fairfax county, Va., 25 Jan., 1846. He is descended from John Cutt, who was his great-grandfather. He was graduated at Harvard in 1789, studied law with Judge Pickering, and was admitted to the bar. In 1804 he was elected to the New Hampshire legislature, becoming speaker of that body during the same year. He was elected a senator from New Hampshire, served from 3 Dec., 1810, till 3 March, 1813, and subsequently was appointed senator to fill a vacancy during a recess of the legislature, holding office from 24 May till 21 June, 1813. From 1814 till 1825 he was secretary of the U. S. senate.—**Richard,** politician, b. on Cutts island, near Saco, Me., 22 June, 1771; d. in Washington, D. C., 7 April, 1845. He was a first cousin of Charles, and was descended from Robert. He was graduated at Harvard in 1790, after which he studied law, but was diverted to business, was extensively engaged in commerce, and spent some time in Europe. On his return he became a member of the Massachusetts legislature, serving in 1799 and in 1800. He was elected as a democrat to congress, and with subsequent re-elections served continuously through six terms, from 7 Dec., 1801, till 3 March, 1813, but was finally defeated by Cyrus King, when a candidate for the 13th congress. In June, 1813, he was appointed superintendent-general of military supplies, an office which he continued to fill until it was abolished, in March, 1817, after which he was appointed second comptroller of the treasury, remaining as such until 1829. He continued to reside in Washington in retirement until his death. In 1804 he married Anna Payne, sister of President Madison's wife.—His son, **James Madison,** b. on Cutts island, near Saco, Me., 29 July, 1805; d. in Washington, D. C., 11 May, 1863. He was educated in Washington, and was destined for the bar. but the war of 1812 swept away much of his father's property, and young Cutts, then a student in William Wirt's office, was compelled to give up his studies. He was appointed in the treasury department, becoming chief clerk in the second comptroller's office, and ultimately, during Buchanan's administration, second comptroller. This office he held until his death, through the administration of President Lincoln. His daughter Ada married, first, Senator Stephen A. Douglas, and, several years after his death, Col. Robert Williams, U. S. A.—Another son, **Richard Dominicus,** surveyor, b. in Washington, D. C., 21 Sept., 1817; d. there, 13 Dec., 1883. He was educated at Georgetown college, and entered the coast survey in 1843, remaining in its service for over forty years. His first efforts were directed toward raising the standard of topographical work, which he accomplished with eminent success. Of late years the higher scientific work of the survey has occupied his attention, and his operations have extended to all parts of the country. The shores of the Chesapeake, the coasts of the Pacific, the plains of Texas, and the mountains of New England equally bear testimony to his professional ability. To him the navigators of the Pacific are indebted for the first surveys of San Francisco, San Diego, and Monterey bays, and some other minor harbors on the coast. In 1855 he was appointed U. S. surveyor upon the International fisheries commission for the settlement of the limits of the fishing-grounds between the United States and the British dominions in North America. In the civil war he was on the staff of Gen. Henry W. Halleck, and received the brevet rank of brigadier-general of volunteers in March, 1865. In 1873 he was one of the U. S. commissioners to the Vienna international exposition, and in 1883 he attended the International geodesic conference in Rome, which was convened for the purpose of considering a universal prime meridian and the unification of time. He held at his death the office of first assistant superintendent of the coast survey, having direct charge of the office and topography. In 1845 he married Martha Jefferson Hackley, granddaughter of Thomas Mann Randolph, of Tuckahoe, Ga.

CUTTER, Ammi Ruhamah, physician, b. in North Yarmouth, Me., 4 March, 1735; d. in Portsmouth, N. H., 8 Dec., 1819. His father, the first minister of that town, was chaplain of a New England regiment at the siege of Louisburg in 1745. His son was graduated at Harvard in 1752, and afterward studied medicine with Dr. Clement Jackson, of Portsmouth. He was surgeon of Col. Robert Roger's rangers until they were disbanded, and in 1758 surgeon of the New Hampshire troops in the successful expedition against Louisburg. He was physician-general of the eastern department, stationed at Fishkill from April, 1777, until the beginning of 1778, when he resumed practice at Portsmouth. He was a delegate to the New Hampshire constitutional convention, a Whig, and long president of the New Hampshire medical society.

CUTTER, Calvin, physician, b. in Jaffrey, N. H., in 1807; d. in Greene, Me., 25 March, 1830. He was a pupil at the New Ipswich academy, and afterward taught in Wilton, N. H., and Ashby, Mass. In 1829 he studied medicine, and practised his profession in Rochester, N. H., from 1831 till 1833, in Nashua from 1834 till 1837, and in Dover from 1838 till 1841. Between 1842 and 1856 Dr. Cutter visited twenty-nine states of the Union, delivering

medical lectures. In 1847 he began the compilation of "Cutter's Physiology," a text-book for schools and colleges, of which, prior to 1871, about 500,000 copies had been sold. It has been translated into several oriental languages. In 1856 Dr. Cutter was chosen to convey a supply of Sharpe's rifles to Kansas, a hazardous task, which was successfully performed. Later in the same year he led into Kansas the Worcester armed company of sixty men, and also the force known as "Jim Lane's army," which he commanded for nearly a year. He was president of the military council in Kansas, and instrumental in the capture of Col. Titus. In 1861 Dr. Cutter became surgeon of the 21st Massachusetts infantry, and served in the national army nearly three years. He was twice wounded, and made prisoner at Bull Run. During most of his term of service he had charge of the medical depot of the 9th army corps as surgeon-in-chief.

CUTTER, Charles Ammi, author, b. 14 March, 1837. He was graduated at Harvard in 1855, and appointed librarian of the Boston athenæum in January, 1869, an office that he now (1886) holds. He has prepared a new classification for libraries, and written "Rules for a Printed Dictionary Catalogue" (Washington bureau of education, 1876); "Boston Athenæum: How to get Books, with an Explanation of the New Way of marking Books" (Boston, 1882); and edited "Catalogue of the Library of the Boston Athenæum, 1807–'71" (5 vols., Boston, 1874–'82). Since January, 1881, he has edited the "Library Journal" of New York.

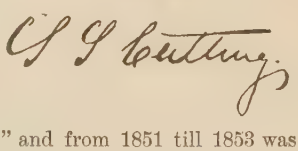
CUTTER, George Washington, poet, b. in Massachusetts in 1801; d. in Washington, D. C., 24 Dec., 1865. He studied law, and followed his profession with success in Kentucky until about 1845. During the Mexican war he raised a company of infantry, of which he became captain, and which subsequently was included in the 2d Kentucky volunteers under Col. McKee. Later he married Miss Drake, an actress of Cincinnati, and for a time made his home in Covington, Ky. Afterward he became interested in politics, and was known favorably as an eloquent orator. His services were rewarded with a clerkship in the treasury department, an office that he retained during several administrations. "The Song of Steam," "The Song of the Lightning," and "E Pluribus Unum," are his best-known pieces. He published "Buena Vista and other Poems" (Cincinnati, 1848); "Song of Steam and other Poems" (1857); and "Poems, National and Patriotic" (Philadelphia, 1857).

CUTTING, Francis Brockholst, jurist, b. in New York city in 1805; d. there, 26 June, 1870. He studied at Columbia, was admitted to the bar, and rapidly rose to distinction in his profession. In 1836 he was elected a member of the state legislature, as a democrat. From 1840 till 1853 he devoted himself to his large and lucrative practice in his native city, and from 1853 till 1855 represented one of its districts in congress, where he was a war democrat. On the renomination of Abraham Lincoln for the presidency, he aided in his re-election, and thereafter was active in supporting the cause of the Union. After the war Mr. Cutting retired from politics and quietly pursued his profession.

CUTTING, Hiram Adolphus, geologist, b. in Concord, Vt., 23 Dec., 1832. After years spent in teaching the natural sciences in the Vermont Methodist seminary at Montpelier, and in Norwich university, he was appointed in 1871 curator of the state cabinet of natural history, and in 1872 became state geologist of Vermont. In 1880 he was made secretary of the Board of agriculture, and in 1881 fish commissioner. He has made numerous experiments on the growth of plants, the means and proper methods of fertilizing the soil, and various observations on insects. His publications include "Mining in Vermont" (Montpelier, 1872); "Meteorological Tables and Climatology of Vermont" (1877); "Microscopic Revelations" (1878); "Farm Pests, including Insects, Fungi, and Animalcules" (Manchester, 1879); "Notes on Building Stones, also on Plant Growth" (Montpelier, 1880); "Lectures on Plants, Fertilization, Insects, Forestry, Farm Homes," etc. (1882); "Lectures on Milk, Fertilization," etc. (1884); "Scientific Lectures" (1884); "Farm Lectures" (1884); and also "Reports of Geologist and Curator of State Cabinet" (1874–'80); "Biennial Reports of Fish Commissioners of Vermont" (1881–'2 *et seq.*); and "Vermont Agricultural Reports" (1882 *et seq.*). Prof. Cutting has for many years lectured during the winter months on "The Bible: its History and Scientific Relations"; "God in Creation," etc.

CUTTING, James Ambrose, inventor, b. in Massachusetts in 1814; d. in Worcester, Mass., 31 July, 1867. His early years were spent in Haverhill, Mass., where he lived in straitened circumstances. He invented a new bee-hive, and for the patent received sufficient encouragement to settle in Boston, where he then devised several improved processes, but deriving no important benefit from them, and soon lost all his property. Afterward turning his attention to the new art of making daguerreotypes, he discovered the process of making pictures on glass, which after his own name he called ambrotypes. This he at once patented, and then disposed of his rights, both in this country and abroad. He established an aquarium in Boston, and subsequently the aquarial gardens.

CUTTING, Sewall Sylvester, educator, b. in Windsor, Vt., 19 Jan., 1813; d. in Brooklyn, N. Y., 7 Feb., 1882. He was graduated at the University of Vermont, and in 1836 was ordained pastor of the Baptist church in West Boylston, Mass., but soon removed to Southbridge, Mass., where he remained eight years as pastor of the Baptist church in that place. In 1845 he assumed editorial charge of the "Baptist Advocate" in New York, changing its name to the "New York Recorder." In his hands the paper at once rose in character and greatly increased in circulation. In 1850 he retired from the "Recorder," and was for a short time secretary of the American and Foreign Bible society. From 1849 till 1852 he was editor of the "Christian Review," and from 1851 till 1853 was on the editorial staff of the "Watchman and Reflector," published in Boston. In the last-named year he was recalled to the editorship of the "New York Recorder." In 1855, in connection with Dr. Edward Bright, he bought the New York "Baptist Register," consolidating it with the "Recorder," and changing the name to "The Ex-



aminer." In the same year he was called to the professorship of rhetoric and history in the University of Rochester, a chair which he held until 1868. He was the first secretary of the Baptist educational commission, an association formed in 1867 "to promote education and the increase of the ministry in the Baptist denomination." In 1870 the scope of this commission was enlarged by affixing "American" to its name and extending its care to the interests of higher education in general. Of this enlarged commission Dr. Cutting remained secretary. This organization, having accomplished its aim, discontinued its agency in 1876. From September, 1876, till May, 1879, Dr. Cutting was corresponding secretary of the American Baptist home mission society. He was the author of "Historical Vindications" (Boston, 1859); "Struggles and Triumphs of Religious Liberty" (New York, 1876); and "Ancient Baptistries" (published posthumously). Several of his poems, as well as many occasional discourses, were printed. He received the degree of D. D. from the University of Vermont.

CUTTS, Maria, sister superior, b. in Loughborough, Leicester, England, in 1811; d. at Grand Coteau in 1853. She entered the novitiate of the Society of the Sacred Heart in Paris at the age of seventeen, and on becoming a professed nun, in 1836, asked to be sent on the American mission. She was named superior of the Grand Coteau convent after her arrival, and afterward was made superior of all the convents of her order in the west of the United States.

CUYLER, Sir **Cornelius,** soldier, b. in Albany, N. Y., about 1740; d. at St. John's Lodge, Hertfordshire, England, 8 March, 1819. In May, 1759, he joined the 55th regiment of foot (British) as an ensign, and was present at the reduction of Ticonderoga in that year, and of Montreal in 1760. Serving through the old French war, he became captain in the 46th foot, 9 May, 1764, and was aide-de-camp to Gen. Sir William Howe from July, 1775, till 15 Jan., 1776, when he was promoted major of the 55th regiment. He continued on Gen. Howe's staff, and was at the battles of Long Island, Brandywine, and Germantown. He was promoted to lieutenant-colonel, 16 Nov., 1777, and commanded his regiment at the battle of Monmouth. After the conclusion of peace he was transferred to the West Indies, where he was quartermaster-general of the British forces, and was afterward in chief command. He attained the full rank of general in 1799.

CUYLER, Cornelius C., clergyman, b. in Albany, N. Y., 15 Feb., 1783; d. 31 Aug., 1850. His ancestors were among the early Dutch settlers of the neighborhood, and so common was the name Cornelius among them that those who bore it were obliged to adopt distinguishing initials to prevent mistakes. This accounted for the middle "C." of Dr. Cuyler's name. In 1806 he was graduated at Union, and began to study theology under Drs. Livingstone and Bassett. In 1809 he was ordained pastor of the Reformed Dutch church in Poughkeepsie, N. Y., where he remained for twenty-five years, strengthening and uniting a congregation which he found in a weak and almost divided condition. As a preacher he was exceptionally successful, and several revivals occurred under his ministry. An invitation from the 2d Presbyterian church of Philadelphia was accepted in 1834, and the pastoral relation then assumed continued during the remainder of his life. For many years he was president of the board of trustees of Jefferson medical college. In 1838 he received the degree of S. T. D. from Union. Besides a large number of sermons, published separately, he was the author of "A Narrative of a Revival of Religion in the Reformed Dutch Church, Poughkeepsie, 1815," and three tracts issued by the Presbyterian board of publication. Their titles are "The Parity of the Ministry," "Evidences of a Gracious State," and "Who shall dwell in Heaven?" He also wrote for the religious press, notably a series of essays on the Atonement, published in the "Journal and Telegraph," of Albany.

CUYLER, John M., surgeon, U. S. army, b. in Georgia, about 1810; d. in Morristown, N. J., 26 April, 1884. He entered the army as assistant surgeon in 1834, being among the first to pass the rigid examination instituted in 1833. He was actively engaged in the Creek war of 1838, and the Seminole war of 1840, and served with distinction through the Mexican war, receiving promotion as major and surgeon on 16 Feb., 1847. From 1848 till 1855 he served at West Point. As senior medical officer at Fort Monroe, during the first years of the civil war, his services were invaluable in organizing the medical department of the armies congregated there. He served afterward as medical inspector and acting medical inspector-general. He served on examining boards, and sought to uphold a high professional standard among army surgeons. He was promoted lieutenant-colonel and medical inspector on 11 June, 1862, brevetted brigadier-general on 13 March, 1865, and promoted to the rank of colonel on 26 June, 1876. After the war he was medical director of important departments until his retirement, 30 June, 1882.

CUYLER, Theodore Ledyard, clergyman, b. in Aurora, N. Y., 10 Jan., 1822, of which town his great-grandfather, Gen. Benjamin Ledyard, was the founder. He was graduated at Princeton in 1841, and at the Princeton theological seminary in 1846. Two years afterward he was ordained into the Presbyterian ministry, and for a short time was pastor of the church in Burlington, N. J. Shortly afterward he was installed pastor of the 3d Presbyterian church in Trenton, N. J., and remained there until 1853, when he accepted an invitation from the Market street Reformed Dutch church in the city of New York. During the seven years of his ministry to this congregation occurred the remarkable and wide-spread religious revival of 1858. In the impressive services connected with this awakening Dr. Cuyler took a prominent part. In April, 1860, he was invited by the Lafayette avenue Presbyterian church, Brooklyn, N. Y., to become its first pastor, and under his charge the church rapidly grew to be one of the largest and most prosperous in the denomination, and it has twice outgrown its spacious buildings and sent out "colonies." As a preacher he has been remarkably influential, and nearly 3,500 members have been borne on the rolls of his church. He is a regular writer for the religious press, to which he has contributed nearly 3,000 articles, many of which have been republished and translated into foreign languages. He has also written a large number of tracts on temperance. The titles of his books are "Stray Arrows" (New York, 1851); "The Cedar Christian" (1863); "The Empty Crib" (1868); "Heart Life" (1871); "Thought Hives" (1872); "Pointed Papers" (1876); "From the Nile to Norway" (1881); "God's Light on Dark Clouds" (1882); "Wayside Springs" (1884); and "Right to the Point" (spare-minute series, Boston, 1884). A large volume of miscellaneous articles on religious topics has been published in Dutch, and still another in Swedish.

D*

DABLON, Claudius, clergyman, b. in Dieppe, France; d. in Canada in 1700. He arrived in New France in 1655, and was immediately sent among the Onondagas. In 1661 he accompanied Druilettes on his expedition to Hudson bay. He was next with Marquette on Lake Superior in 1668, after the latter had founded the mission of Sault St. Mary, and was appointed superior of all the missions in 1670. He edited the "Relation" of 1671–'2, and compiled other narratives, which are still in manuscript. He is also the author of a description of Marquette's journey, published in the "Discovery and Exploration of the Mississippi Valley," by John Gilmary Shea (New York, 1853).

DABNEY, Charles William, consul, b. in Alexandria, Va., 19 March, 1794; d. in Fayal, Azores, 12 March, 1871. In 1826 he became U. S. consul at Fayal, and won the affections of the islanders in a remarkable degree by his efforts for their welfare. In the famines that visited the island from time to time during his residence, some of which were very severe, he furnished the inhabitants with food, assisted them to replant their fields, advised and suggested the culture of new and more varied crops, encouraged the despondent, and restrained the oversanguine. During the whole of his residence in the island he acted the part of a wise and judicious father to the people, and, wherever he went, their blessings and gratitude were manifested.

DABNEY, Richard, author, b. in Louisa county, Va., in 1787; d. there in November, 1825. His name was originally the same as that of the historian D'Aubigné. He applied himself to the acquisition of Latin, Greek, and Italian, acquiring a remarkable proficiency in those languages, and was employed as a teacher in a school in Richmond. At the burning of the theatre in December, 1811, he sustained severe injuries. In 1812 he published a volume of "Poems, Original and Translated," of which an improved edition was printed in Philadelphia in 1815. The collection contained spirited and elegant translations from Euripides, Alcæus, Sappho, Martial, Seneca, and Petrarch. The second edition was published by Matthew Carey, who employed Dabney for a few years. Carey's political tract, called the "Olive Branch, or Faults on Both Sides," is supposed to have been in great part written by Dabney. In a few years he returned to Virginia and taught a class of boys. The painful injuries received at a fire, together with the use of opium, taken to allay his sufferings, and indulgence in intoxicating drinks, caused his early death.—His nephew, **Robert Lewis,** clergyman, b. in Louisa county, Va., 5 March, 1820. He studied at Hampden Sidney college, and was graduated at the University of Virginia in 1842. After teaching for two years, he studied at the Union theological seminary in Virginia, was licensed to preach in 1846, ordained by the Lexington presbytery in July, 1847, and became pastor of Tinkling Spring church in Augusta county, Va., where he remained for six years. In 1853 he accepted the professorship of church history in Union seminary, Virginia, and remained until 1883, except during the civil war, when he was actively engaged in the Confederate service as chaplain of the 18th Virginia regiment, and afterward as chief of staff to Gen. T. J. Jackson. In 1883 he was elected to the chair of moral philosophy in the University of Texas. The degree of D. D. was conferred on him by Hampden Sidney college in 1853, and that of LL. D. by the Southwestern Presbyterian university, Tenn., in 1877, and simultaneously by Hampden Sidney college. Besides being a voluminous contributor to periodical literature, Dr. Dabney has published "Life of Rev. Dr. F. S. Sampson" (Richmond, 1854); "Life of Gen. T. J. (Stonewall) Jackson" (London, 1864); "Sacred Rhetoric" (Richmond, 1866); "Defence of Virginia and the South" (New York, 1868); "Sensualistic Philosophy of the Nineteenth Century Considered" (1876); "A Course of Systematic and Polemic Theology" (St. Louis, 1878); and "The Christian Sabbath" (Philadelphia, 1881).—**Charles William,** son of Robert Lewis, chemist, b. in Hampden-Sidney, Va., 19 June, 1855. He was graduated at Hampden-Sidney college in 1873, and, after teaching for a year, spent some time at the University of Virginia, following special studies, principally scientific. In 1877 he became professor of chemistry and mineralogy in Emory and Henry college, but relinquished this chair at the end of a year and visited Germany, where in 1880 he received the degree of Ph. D. from the University of Göttingen. In October, 1880, he became state chemist of North Carolina and director of the North Carolina agricultural experiment station, and to these offices was added, in November, 1886, that of director of the North Carolina weather service. He has edited numerous technical circulars giving valuable scientific information to farmers, and prepared the annual reports from 1881 till 1886. Dr. Dabney is a member of several scientific societies, and has been secretary of the American association of official agricultural chemists, editing in that capacity the reports of their proceedings. He has discovered numerous minerals in North Carolina, not previously known in that state, such as tin and arsenic ores, and he has published scientific investigations in the "American Chemical Journal."

DABNEY, Virginius, author, b. at Elmington, Gloucester co., Va., 15 Feb., 1835. He was graduated at the University of Virginia in 1855, and practised law. But he had abandoned this profession for literature when the civil war began in 1861. He became a staff officer in the Confederate army, and served through the war. He has published "The Story of Don Miff, as told by his Friend, John Bouche Whacker, a Symphony of Life" (Philadelphia, 1886). This book reached its fourth edition in six months.

DABOLL, Nathan, educator, b. about 1750; d. in Groton, Conn., 9 March, 1818. He was famous as a teacher, and instructed as many as 1,500 persons in navigation. He published a treatise on arithmetic, entitled the "Schoolmaster's Assistant" (New London, 1799), which was for a long time a standard text-book; also the "Practical Navigator." In 1773 he began the annual publication of the "Connecticut Almanac."—His son, **Nathan,** b. in Groton, Conn., in 1782; d. there in 1863, was a member of the Connecticut house of representatives in 1832–'3, of the senate in 1835–'6, and judge of probate in 1843–'5. He was joint author of

* In a work like this there is always difficulty in deciding where to place many of the names that begin with De. The general rule is, that if the name retains its original form, it should be placed under the initial letter of the main word; but if the particle has coalesced with the main word, it should be found under D. If the reader misses any well-known name here, he should look for it under another letter.

Daboll's "New Arithmetic," and compiled the "New England Almanac" from his father's death in 1818 until his own death.—**David Austin,** son of the second Nathan, b. in Groton, Conn., in 1813, sat continuously in the state house of representatives from 1846 till 1871, and then served a term in the senate. He assisted his father in the preparation of the "New Arithmetic," and since his father's death has continued the publication of the "New England Almanac."—Another son, **Celadon Leeds,** inventor, b. in Centre Groton, Conn., 18 July, 1818; d. in New London, Conn., 13 Oct., 1866, was a merchant in New London, and from 1854 till 1861 was employed in the interior department at Washington. He conceived the idea of applying the principle of the clarionet to a large trumpet, to serve as a fog signal for mariners.—Another grandson of Nathan, **Charles Miner,** inventor, b. in Groton, Conn., 14 Oct., 1823, was trained as a practical mechanic in the works of the Wilson manufacturing company, New London, of which he rose to be superintendent. He is the inventor of the cast-iron bell-bottom jack-screw barrel, now in general use throughout the world, for raising buildings and other massive objects, and of a lathe for cutting the thread of jack-screws, which has been in successful operation for twenty-five years, as has also his oval slide parallel bench-vise. He has invented also a breast-drill, a self-centring brace for bits, a mowing-machine, and the Daboll bushing. He developed his cousin's suggestion of a steam fog-trumpet, consisting of a steel reed vibrating within a horn, using a hot-air engine to force cold air by means of an air-pump into a boiler, from which it escapes into the horn through a valve, causing the vibrations of the reed, which are regulated by an automatic cam. He has held various local offices, and in recent years that of U. S. government inspector, for Connecticut and Rhode Island, of boilers on steam vessels.

DABOUR, John, artist, b. in Smyrna, Asia, in 1837. He was a pupil at the Academy of fine arts in Paris, and studied also at the Art museum of France. Fifteen years of his professional life were spent in the United States, painting portraits, which are to be found in the principal cities of the country, but chiefly in Baltimore. Among the more prominent of those that have been sitters in his studio are Archbishop Spaulding, of Baltimore; Archbishop Purcell, of Cincinnati; Senator Cameron, of Pennsylvania, and his son, Senator Davis, of Virginia; and Gov. Groome, of Maryland.

DACIAN, Jakob (dah-see-an'), Danish monk, b. in Copenhagen in 1496; d. in Tarecuato, Mexico, in 1562. He belonged to the Danish royal family, became a Franciscan at the age of twenty-four, and was appointed provincial of his order in 1529. A few years afterward he had to leave his country to escape persecution by the Lutherans, and went to Spain, where the emperor, Charles V., recommended him to the civil and church authorities of New Spain. Dacian at once left for Mexico, and there filled important offices in his order, and for many years worked most successfully as a missionary among the Indians, especially in the provinces of Santo Evangelio, Michoacan, and Guadalajara. He preached to the natives in their Tarasc language, which he mastered, as well as Spanish, Latin, Greek, Hebrew, and Arabic. While he was guardian of the Tarecuato convent he founded the town of Arancara. Dacian left many works in various languages, most of which have been lost. The best known is his "Declamación del pueblo bárbaro de los Indios, que habiendo recibido el bautismo, desean recibir los demás sacramentos."

DA COSTA, Jacob M., physician, b. in the island of St. Thomas, West Indies, 7 Feb., 1833. His literary and classical education was received in Germany, his medical in Jefferson college, Philadelphia, where he was graduated in 1852, and in the hospitals and schools of Paris and Vienna, where he passed two years. In 1854 he returned to Philadelphia, established himself there in practice, and made a special study of diseases of the heart and lungs. In 1864 he was appointed lecturer on clinical medicine in Jefferson medical college, and in the spring of 1872 was chosen professor of the theory and practice of medicine in the same institution. His contributions to medical literature include "Epithelial Tumors and Cancers of the Skin" (1852); "An Inquiry into the Pathological Anatomy of Acute Pneumonia" (1855); "The Physicians of the Last Century" (1857); "On Serous Apoplexy" (1859); "Medical Diagnosis, with Special Reference to Practical Medicine" (1864); and "Inhalation in the Treatment of Diseases of the Respiratory Passages" (1867). He has also contributed many articles to the "Pennsylvania Hospital Reports," in the "American Journal of the Medical Sciences," and his clinical lectures have appeared in the "Medical and Surgical Reporter" and the "Philadelphia Medical Times."

DACRES, James Richard, British naval officer, b. in Lowestoft, Suffolk, England, 22 Aug., 1788; d. at his country-seat in Hampshire, 3 Dec., 1853. His father was Vice-Admiral Dacres, who in the Revolutionary war commanded the "Carleton," which engaged Gen. Arnold's flotilla on Lake Champlain in 1776. He entered the navy in 1796 as a first-class volunteer on board the "Serapis," commanded by his father, with whom he also served on the "Barfleur" in 1797. He afterward accompanied the expedition against Ferrol, in August, 1800, and was present, in the "Boadicea," in the action with the French ship "Duguay Trouin," in August, 1803. He received his first commission 15 Nov., 1804, and on 5 July, 1805, was given command of the sloop "Elk," from which he was transferred, 14 Jan., 1806, to the "Bacchante." On 14 Feb., 1807, he captured the French schooner "Dauphin," and after other distinguished services returned to England in December, 1807. On 16 March, 1811, he was assigned to the command of the "Guerrière," and participated in the pursuit of the "Constitution," having previously had his vessel's name vauntingly printed in large letters on her foretopsail, and inquired of every ship he met for the "President," intimating that he would chastise her for the punishment she had given the "Little Belt." After the loss of the "Guerrière" he was transferred to the "Constitution," and was put on shore, on parole, at Boston, on 31 Aug., 1811. By the court-martial that, on 6 October following, assembled on board the "Africa," at Halifax, to try Capt. Dacres for surrendering his ship to the enemy, he was honorably acquitted of all blame for her loss. While in command of the "Tiber" he took, on 8 March, 1815, the American privateer "Leo." He was on duty on the Newfoundland and Channel stations from 1833 till 1837. He attained flag rank 28 June, 1838, and in 1845 was appointed commander-in-chief at the Cape of Good Hope. See Gen. Jas. Grant Wilson's address on "Commodore Isaac Hull and the Frigate Constitution" (New York, 1880).

DADD, George H., veterinary surgeon, b. about 1813. He was a native of England, but removed to the United States in 1839. He turned his attention to the diseases of the brute creation, and became a successful practitioner. He pub-

lished "The Modern Horse Doctor" (New York, 1854); "The Manual of Veterinary Science" (1855); "Anatomy and Physiology of the Horse" (Boston, 1856); and "The American Cattle Doctor."

DADE, Francis Langhorn, soldier, b. in Virginia; killed by Indians near Fort King, Fla., 28 Dec., 1835. He was appointed third lieutenant in the 12th infantry on 13 March, 1813, became first lieutenant in 1816, captain in 1818, and brevet major in 1828. When killed he was on the march to Fort King with a detachment, which was nearly destroyed by a treacherous attack of the Seminole Indians. A beautiful monument was erected at West Point to his memory and that of his command.

DAGG, John L., educator, b. in Middleburg, Loudon co., Va., 13 Feb., 1794; d. in Haynesville, Ala., 11 June, 1884. He was ordained to the Baptist ministry in 1817, preached for some years in Virginia, and in 1825 removed to Philadelphia, Pa., where he became pastor of the 5th Baptist church. Retiring from the pastorate in 1833 on account of a diseased throat, he thenceforth devoted himself to teaching and authorship. In 1836 he took charge of the Alabama female athenæum in Tuscaloosa, and in 1844 was made president of Mercer university at Penfield, Ga., where he remained for twelve years, giving instruction in theology in addition to his duties as president. In 1856 he resigned the presidency of Mercer university. His published works are "Manual of Theology"; "Treatise on Church Order"; "Elements of Moral Science"; "Evidences of Christianity"; and several pamphlets, including "The More Excellent Way"; "An Interpretation of John III.: 5"; "An Essay in Defence of Strict Communion"; and "A Decisive Argument against Infant Baptism, furnished by One of its Own Proof-Texts."

DAGGETT, David, jurist, b. in Attleborough, Mass., 31 Dec., 1764; d. in New Haven, Conn., 12 April, 1851. He was graduated at Yale in 1783, studied and practised law in New Haven, became state's attorney in 1811, mayor of the city in 1828, and held other local offices. From 1791 till 1813 he was a member of the Connecticut legislature, serving in 1794 as speaker, and from 1797 till 1804 and 1809 till 1813 as a member of the council or upper house. He voted as a presidential elector for Charles C. Pinckney in 1804 and 1808, and for De Witt Clinton in 1812. He was elected a U. S. senator in the place of Chauncey Goodrich, who resigned, and served from 24 May, 1813, till 3 March, 1819, when he returned to his extensive practice at the bar in Connecticut. From 1826 till 1832 he was a judge of the Connecticut supreme court, and then chief judge till 1834, when he reached the age of seventy years, and was retired under the statute. He became an instructor in the New Haven law-school in 1824, and was professor of jurisprudence from 1826 until he was compelled by the infirmities of age to resign the chair. A sketch of his life by the Rev. Samuel W. S. Dutton, D. D., appeared in 1851.—His son, **Oliver Ellsworth,** clergyman, b. in New Haven, Conn., 14 Jan., 1810; d. in Hartford, Conn., 1 Sept., 1880, was graduated at Yale in 1828, studied in the law-school at New Haven, and, after being admitted to the bar in 1831, spent two years in the divinity-school. From 1837 till 1843 he was pastor of the South church in Hartford, Conn., and of the Congregational church in Canandaigua, N. Y., from 1845 till 1867. In September of the latter year he was chosen professor of divinity at Yale, where he remained till 1870, officiating during the same period as pastor of the college church. From 1871 till 1877 he was minister of the Congregational church in New London, Conn., after which he resided in Hartford. He published sermons and magazine articles, assisted in compiling a book of psalms and hymns (1845), and left a small volume of poems, printed posthumously.

DAGGETT, Naphtali, clergyman, b. in Attleborough, Mass., 8 Sept., 1727; d. in New Haven, Conn., 25 Nov., 1780. His grandfather was the great-grandfather of David Daggett. He was graduated at Yale in 1748, studied theology, was ordained pastor of the Presbyterian church in Smithtown, L. I., in 1751, and in 1756 became professor of divinity at Yale, which post he retained until his death. When President Clapp resigned in 1766, he was chosen president *pro tempore*, in which capacity he officiated until 1777, when he was succeeded by Dr. Ezra Stiles. When the British attacked New Haven in July, 1779, Dr. Daggett took part in the defence with a shot-gun, but was taken prisoner, and compelled by the enemy to act as a guide, and repeatedly pricked with bayonets until his strength failed, and he never fully recovered. He published several sermons and an account of the famous dark day in New England (1780).

DAHLGREN, John Adolph, naval officer, b. in Philadelphia, Pa., 13 Nov., 1809; d. in Washington, D. C., 12 July, 1870. His father, Bernard Ulric Dahlgren, was Swedish consul at Philadelphia till his death in 1824. The great object of the son's early ambition was to enter the navy of the United States, and he received his midshipman's warrant on 1 Feb., 1826, making his first cruise in the "Macedonian," of the Brazil squadron, in 1827–'9. He was attached to the sloop "Ontario," of the Mediterranean squadron, in 1830–'2, and made passed midshipman in the latter year, and in 1834, owing to his mathematical proficiency, detailed for duty on the coast survey. In this year he wrote a series of letters on naval topics to the Philadelphia "National Gazette," signed "Blue - Jacket."

He was commissioned lieutenant in 1837, and in the same year his hitherto exceptionally fine sight became so impaired by incessant labor as to threaten entire loss of vision, and an absolute rest was needed. During this period of enforced inaction Lieut. Dahlgren resided on a farm. In 1842 he resumed duty, and in 1843 went to the Mediterranean in the frigate "Cumberland," returning late in 1845 to the United States, the cruise having been shortened by the prospect of a war with Mexico. In January, 1847, Lieut. Dahlgren was assigned to ordnance duty at Washington, although he desired, and made an effort to obtain, active duty at sea. Then began those labors as an ordnance officer which for sixteen years demanded the most extraordinary energy, and which finally made Dahlgren chief of ordnance, and gave him the world's recognition as a man of science and inventive genius. He saw almost at once the defects in gunnery then existing,

and soon offered the remedy in the style of cannon known by his name, which for so many years constituted the naval armament of the United States. It was proposed by him in 1850, and the first gun according to his design was cast in May of that year. These guns are of iron, cast solid, and cooled from the exterior. They are distinguished by great thickness at the breech, rapidly diminishing from the trunnions to the muzzle, and were the first practical application of results obtained by experimental determination of pressures at different points along the bore. They are chiefly smooth-bores of nine- and eleven-inch calibre; but Dahlgren also invented a rifled cannon, and introduced boat-howitzers with iron carriages, which were unsurpassed for combined lightness and accuracy. Under the sole direction of Lieut. Dahlgren, the ordnance department at Washington acquired the most extensive additions, including the foundry for cannon, gun-carriage shops, the experimental battery, and equipment of all kinds. He was made commander in 1855, and, in order to introduce innovations that completely revolutionized the armament of the navy, and to remove objections particularly to his eleven-inch gun, which was then considered too heavy for use at sea, he was permitted to equip the sloop-of-war "Plymouth" entirely as he wished. The experimental cruise of this vessel lasted from 1857 till 1859. He was on ordnance duty at the Washington navy-yard in 1860–'1, and on 22 April, 1861, after the resignation of Franklin Buchanan, who entered the Confederate service, was given command of the yard, which was not only of great importance on account of naval resources, but also as the key of the defences of Washington on the left. Commander Dahlgren hastened to secure the only route left to the capital by the Potomac river, and, when Alexandria was seized, he moved down the left wing of the column under Col. Ellsworth. He was appointed chief of the ordnance bureau on 18 July, 1862, and shortly afterward promoted to be captain, his commission being antedated to 16 July. On 7 Feb., 1863, he was made a rear-admiral, receiving at the same time the thanks of congress, and ten years additional on the active list, which, however, he did not live to enjoy. In July, 1863, he was ordered to relieve Admiral Dupont in the command of the South Atlantic blockading squadron. In July, August, and September of that year he co-operated with the land forces under Gen. Gillmore in various attacks on the defences of Charleston, and succeeded, by silencing Fort Sumter and the batteries on Morris island, in obtaining for the monitors a safe anchorage inside the bar, thus putting a stop to blockade-running. His failure to take Charleston provoked some hostile criticism, but his operations had the continuous approval of the navy department. He led a successful expedition up St. John's river in February, 1864, to aid in throwing a military force into Florida, co-operated with Sherman in the capture of Savannah, on 23 Dec., and entered Charleston with Gen. Schimmelpfennig on its evacuation in February, 1865. In 1866 he was given command of the South Pacific squadron. He was again chief of the ordnance bureau in 1868–'70, and a few months before his death was relieved at his own request and appointed to the command of the Washington navy-yard. His death was the result of heart-disease. Admiral Dahlgren was a man of great personal bravery, dignified in manner, and of exemplary character. He published many scientific works on ordnance, which have been used as text-books in the navy. They include "Thirty-two-pounder Practice for Rangers" (1850): "System of Boat-Armament in the U. S. Navy" (1852; French translation, 1855); "Naval Percussion Locks and Primers" (1852); "Ordnance Memoranda" (1853); "Shells and Shell-Guns," explaining his own system (1856); and various reports on ordnance, armored vessels, and coast defences. After his death appeared "Notes on Maritime and International Law," with a preface by his widow, indicating the plan of an uncompleted work (Boston, 1877). See "Memoir of John A. Dahlgren," by his widow (Boston, 1882).—His son, **Ulric**, b. in Bucks county, Pa., in 1842; d. near King and Queen's Court-House, Va., 4 March, 1864, removed to Washington with his father in 1848. In the intervals of study he spent his time in the navy-yard, where he became familiar with the construction and use of artillery, and was taught by the sailors to swim and row. He began the study of civil engineering in 1858, and in 1860 began also to study law in Philadelphia; but, at the beginning of the civil war, he returned to Washington, and just after the first battle of Bull Run was sent by his father to place and take charge of a naval battery on Maryland heights. He then became aide to Gen. Sigel, and served through Frémont's mountain campaign and through Pope's campaign, acting as Sigel's chief of artillery at the second battle of Bull Run. In November, 1862, he attacked Fredericksburg at the head of Sigel's body-guard of 57 men, and held the town for three hours, returning with 31 prisoners, and for his gallantry was detailed as special aide on Gen. Burnside's staff. He was afterward on Gen. Hooker's staff, distinguished himself at Chancellorsville, and as aide to Gen. Meade performed much dangerous and important service in the Gettysburg campaign at the head of a hundred picked men. On the retreat of the enemy from Gettysburg he led the charge into Hagerstown, and was severely wounded in the foot. His leg was amputated, and for a time his life was in danger; but he recovered, was promoted to colonel for his gallantry, and, though obliged to walk on crutches, returned at once to active service. He lost his life in a raid planned by him, in concert with Gen. Kilpatrick, to release the Union prisoners at Libby prison and Belle Isle. A memoir of him, written by his father, was revised and published by his stepmother (Philadelphia, 1872).—Admiral Dahlgren's second wife, **Madeleine Vinton**, b. in Gallipolis, Ohio, about 1835, is a daughter of Samuel F. Vinton, for over twenty years a leader of the whig party. At an early age she married Daniel Convers Goddard, of Zanesville, who died, leaving two children. She married Admiral Dahlgren on 2 Aug., 1865, and has three children of this marriage. As early as 1859 she published sketches and poems under the pen-name of "Corinne." In 1870–'3 she actively opposed the movement for female suffrage, and drew up a petition to congress, which was extensively signed, asking that the right to vote should not be extended to women. The literary society of Washington, of which she was one of the founders, held its meetings in her house for six years, and she was elected its vice-president. She was for some time president of "The Ladies' Catholic Missionary Society of Washington," and has built the chapel of "St. Joseph's of the Sacred Heart of Jesus," in South Mountain, Md. Mrs. Dahlgren's works include "Idealities" (Philadelphia, 1859); "Thoughts on Female Suffrage" (Washington, 1871); "South Sea Sketches" (Boston, 1881); "Etiquette of Social Life in Washington" (Philadelphia, 1881); "South Mountain Magic" (1882); "A Washington Win-

ter" and "Memoirs of John A. Dahlgren" (1882); and "The Lost Name" and "Lights and Shadows of a Life" (Boston, 1886). She has translated from the French, Montalembert's "Pius IX" and De Chambrun's "Executive Power" (Lancaster, Pa., 1874), the preface to the latter being written by James A. Garfield, and from the Spanish, Donoso Cortes's "Catholicism, Liberalism, and Socialism," for which she received the thanks of Pius IX.

DAILLÉ, Pierre, clergyman, b. in France in 1649; d. in Boston, Mass., 21 May, 1715. He had been a professor at Saumur, one of the four great Protestant schools of France. The school was destroyed by order of Louis XIV. in 1685, and about 1683 Daillé was banished on account of his Huguenot faith, and was called by the consistory of the Reformed church in New York to labor for the French there. The scattered Huguenot families in Staten Island, Bushwick, Hackensack, and Harlem were also under his care. In 1686 Rev. Laurentius Vandenbosch drew away two thirds of his country congregation, and established a new church on Staten Island, but he was suspended a few years later, and in 1692 the churches were reunited. Daillé received a colleague, Pastor Peiret, in 1687, and from that time till 1692 he was an itinerant. Up to 1688 the French congregation worshipped in the Dutch church in the fort, but in that year they put up a church of their own in Marketfield street, or Petticoat lane, half way between Broad and Whitehall streets. In 1692 Daillé fell under Jacob Leisler's displeasure for exhorting the commander to meekness, and disapproving of his violent measures, and both he and Peiret were threatened with imprisonment. Notwithstanding this, the pastor showed his Christian spirit by subsequently endeavoring to prevent Leisler's execution. For his efforts in this matter he was cited before the assembly and narrowly escaped imprisonment as a "promoter of sedition." He went to Boston in 1696, took charge of the School street church, and remained there till his death. The Boston "News-Letter" spoke of him as "a Person of great Piety, Charity, affable and courteous Behaviour, and of an exemplary Life and Conversation."

DAIN, Charles, French magistrate, b. in Guadeloupe, West Indies, 29 Sept., 1812; d. there in 1873. He was graduated in law and admitted to the bar in Paris. Having made the acquaintance of the economist Considerant, he neglected his profession for communistic disputes, and became a follower of the phalansterian doctrines, then professed by Fourier, Enfantin, and Marquis de Saint Simon. He took a prominent part in the European congress that was opened in Paris in 1833 by the French royal historical institute, and opposed the Christian philosophers Buchez and Roux-Lavergne. He was a contributor to "La democratie pacifique," in which he denounced slavery and urged its abolition in the French colonies. After the revolution of 1848 the slaves emancipated in Guadeloupe elected Dain their representative in the French chamber of deputies, and soon his radical colleagues recognized him as their leader. As such he denounced the conduct of President Cavaignac, and went so far as to ask, on the floor of the legislative assembly, for the immediate arrest of the president and all the members of his cabinet. When Louis Napoleon was elected president of the republic, Dain tendered his resignation, but the assembly refused to accept it. He returned to Guadeloupe in 1852 as judge of the supreme court, which office he held until his death.

DAKIN, Thomas Spencer, merchant, b. in Orange county, N. Y., in 1831; d. in Brooklyn, 13 May, 1878. He was the eldest of four children, and, until he was seventeen years of age, worked on his father's farm. He then walked, about seventy-five miles, to New York, and began life as an office-boy. In 1858 he established the firm of Thomas S. Dakin & Co., commission agents, continuing it until 1861, when he engaged in the oil trade, and became the head of the firm of Dakin & Gulick. In 1870 he retired from business. He was elected captain in the 13th regiment, Brooklyn, in 1862, and served in the Virginia campaign as a member of the staff of Gen. Crook, who then commanded the 5th brigade. After the war he became major-general of militia, and was widely known as a member of the American rifle team. He especially practised shooting at long range, and took part in the first international contest at Creedmoor in September, 1874, when the Irish team, under Maj. Leech, was defeated by the American team. In the following year the Americans again defeated the Irish team at Dolly Mount, Ireland, when Gen. Dakin made the remarkable score of 165 in a possible 180. He was afterward elected a member of the legion of honor of France. In the international match in 1876, when the Americans defeated teams from Ireland, Scotland, Australia, and Canada, their success was mainly due to the instructions of Gen. Dakin. In the first day's shooting he made the highest score, 203. He also took part in the Irish-American return match of the same year, when his score was again the highest, reaching 208. He was the only rifleman that shot in every international contest held either in this country or in Europe. He was a director in the National and several other rifle associations. In 1876 he was the democratic nominee for congressman in the third congressional district, but was defeated by a small majority.

DALCHO, Frederick, physician, b. in London, England, in 1770; d. in Charleston, S. C., 24 Nov., 1836. His father, a distinguished officer under Frederick the Great, had retired to England for his health, and at his death Frederick came to Baltimore, Md., at the invitation of his uncle, who had removed to that place a few years before. Here he received a classical education, and then studied medicine, giving special attention to botany. He then entered the medical department of the army, and was stationed at Fort Johnson, Charleston harbor, but, in consequence of some difficulty with his brother officers, resigned in 1799, and practised in Charleston, where he was active in establishing the botanical garden. About 1807 he left his practice and became one of the editors of the Charleston "Courier," a daily Federal newspaper. He began to be interested in theological studies in 1811, was ordained deacon in the Protestant Episcopal church in 1814, and priest in 1818. On 23 Feb., 1819, he became assistant minister of St. Michael's church, Charleston, where he remained until his death. A monument, erected to his memory by the vestry, stands near the south door of the church. Dr. Dalcho published "The Evidence of the Divinity of Our Saviour" (Charleston, 1820); "Historical Account of the Protestant Episcopal Church in South Carolina" (1820); and "Ahiman Rezon," for the use of freemasons (1822).

DALE, James Wilkinson, author, b. in Cantwell's Bridge (now Odessa), Del., 16 Oct., 1812; d. in Media, Pa., 19 April, 1881. He was graduated at the University of Pennsylvania, in 1831, at the head of his class, and began the study of law, but abandoned it for that of theology, which he pursued at Andover and Princeton. He wished to become a missionary, and was appointed by the Ameri-

can board to a station in India; but financial embarrassment prevented his departure, and to fit himself more thoroughly for mission work he entered the medical department of the University of Pennsylvania, where he received his degree in 1838. He had been ordained at Andover in 1837, and, after supplying pulpits in Philadelphia, was agent of the American Bible society in 1838–'45. He then held pastorates at Ridley, Middletown, Media, and Wayne, Pa., till 1876, when he retired and devoted himself to literature. Dr. Dale was at one time a leader in the temperance movement in Media. The University of Pennsylvania gave him the degree of D. D. in 1868. His principal work is an exhaustive "Inquiry into the Meaning of Βαπτίζω as determined by Usage," including "Classic Baptism" (Philadelphia, 1867); "Judaic Baptism" (1869); "Johannic Baptism" (1871); and "Christic and Patristic Baptism" (1874). Dr. Dale's conclusions are adverse to the views of the Baptists on the subject; but the work is considered an authority by scholars of all other denominations, and has received from them the highest praise. A memorial of Dr. Dale was written by the Rev. James Roberts, D. D. (Philadelphia, printed privately, 1886).

DALE, Richard, naval officer, b. near Norfolk, Va., 6 Nov., 1756; d. in Philadelphia, Pa., 26 Feb., 1826. He entered the merchant service at the age of twelve, and at nineteen commanded a ship. In 1776 he became a lieutenant in the Virginia navy, and was soon afterward captured and confined in a prison-ship at Norfolk, where some royalist school-mates persuaded him to embark on an English cruiser against the vessels of his state. He was wounded in an engagement with an American flotilla, and, while confined to his bed in Norfolk, resolved "never again to put himself in the way of the bullets of his own countrymen." After the Declaration of Independence he became a midshipman on the American brig "Lexington," which was captured on the coast of France by the English cutter "Alert" in 1777. Dale was thrown into Mill prison, at Plymouth, with the rest of the officers and crew of the "Lexington," on a charge of high treason, but escaped, with many of his fellow-prisoners, in February, 1778, was recaptured, escaped again, disguised as a British naval officer, and reached France, where he joined John Paul Jones's squadron as master's mate. Jones soon made him first lieutenant of the "Bon Homme Richard," and in that capacity he fought with distinction in the famous battle with the "Serapis," on 23 Sept., 1779, and received a severe splinter wound. After the sinking of the "Bon Homme Richard" in that engagement, Dale served with Jones in the "Alliance," and afterward in the "Ariel." He returned to Philadelphia on 28 Feb., 1781, was placed on the list of lieutenants in the navy, and joined the "Trumbull," which was captured in August of that year by the "Iris" and the "Monk." Dale received his third wound in the engagement. He was exchanged in November, obtained leave of absence, and served on letters of marque and in the merchant service till the close of the war. He was appointed captain in 1794, but, with the exception of a short cruise in the "Ganges," during the troubles with France, was not in active service till 1801, when he was given command of a squadron and ordered to the Mediterranean during the hostilities with Tripoli. Although he was greatly hampered by his instructions, so that no serious enterprise could be attempted, he prevented the Tripolitans from making any captures during his command. He returned to the United States in April, 1802, and was again ordered to the Mediterranean, but, becoming dissatisfied, he resigned his commission on 17 Dec., and, having gained a competency, spent the rest of his life in retirement. Dale enjoyed the distinction of having been praised by Lord Nelson, who, after critically watching the seamanship of the commodore's squadron, said that there was in the handling of those trans-Atlantic ships a nucleus of trouble for the navy of Great Britain. The prediction was soon verified. Two of Com. Dale's sons held commissions in the navy.

R. Dale

DALE, Samuel, pioneer, b. in Rockbridge county, Va., in 1772; d. in Lauderdale county, Miss., 24 May, 1841. His parents were Pennsylvanians of Scotch-Irish extraction. Samuel went with them in 1775 to the forks of Clinch river, Va., and in 1783 to the vicinity of the present town of Greensborough, Ga. In both these places the family lived with others in a stockade, being exposed to frequent attacks from Indians, and young Dale thus became familiar with savage warfare. After the death of his parents in 1791 he enlisted in 1793 as a scout in the service of the United States, and soon became a famous Indian fighter, being known as "Big Sam." His most noted exploit was his "canoe fight," a struggle in a canoe with seven Indians, all of whom he killed. This remarkable contest took place on 13 Nov., 1813, at Randon's landing, on the Alabama river, and all its circumstances were afterward verified before the Alabama legislature. The death of the last of the Indians, Tar-cha-chee, a noted wrestler and the most famous ball-player of his clan, is thus described by Dale: "He paused a moment in expectation of my attack, but, finding me motionless, he stepped backward to the bow of the canoe, shook himself, gave the war-whoop of his tribe, and cried out, 'Sam tholocco, Iana dahmaska, ia-lanestha-lipso-lipso-lanestha!' 'Big Sam, I am a man; I am coming, come on!' As he said this, with a terrific yell he bounded over the dead body of his comrade, and directed a blow at my head with his rifle, which dislocated my left shoulder. I dashed the bayonet into him. It glanced around his ribs, and, the point hitching to his backbone, I pressed him down. As I pulled the weapon out, he put his hands upon the sides of the canoe and endeavored to rise, crying out, 'Tar-cha-chee is a man; he is not afraid to die!' I drove my bayonet through his heart." Dale commanded a battalion of Kentucky volunteers against the Creeks in February, 1814, and in December carried despatches for Gen. Jackson from Georgia to New Orleans in eight days with only one horse. After the war he became a trader at Dale's Ferry, Ala., was appointed colonel of militia, held various local offices, and was a delegate in 1816 to the convention that divided the territory of Mississippi. He was a member of the first gen-

eral assembly of Alabama territory in 1817, of the state legislature in 1819–'20 and 1824–'8, and of that of Mississippi in 1836. In 1821 he was one of a commission to locate a public road from Tuscaloosa through Pensacola to Blakely and Fort Claiborne, and, on the completion of his duty, was made brigadier-general by the Alabama legislature and given a life-pension. In 1831 he was appointed by the secretary of war, together with Col. George S. Gaines, to remove the Choctaw Indians to their new home on the Arkansas and Red rivers. See "Life and Times of Gen. Sam. Dale," from notes of his own conversations, by John F. H. Claiborne (New York, 1860).

DALE, Sir **Thomas,** colonial governor of Virginia; d. near Bantam, East Indies, early in 1620. He had been a soldier of distinction in the Low Countries, and had been knighted by King James in June, 1606. The London company, before the retirement of Lord Delaware, had sent him to Virginia with supplies, and on his arrival in the Chesapeake he assumed the government. He found the colony, then consisting of about 200 men, in great despondency over the departure of Delaware, and gave them new cause for sorrow by his administration of the government, which he carried on under a code (chiefly compiled from the rules of war of the United Provinces) sent to Virginia, without the company's authority, by its treasurer, Thomas Smythe. Notwithstanding this introduction of martial law, Dale has received praise for his vigor and industry. Seeing the feeble state of the colony, he wrote at once to England for aid; and in August, 1611, a new fleet reached Jamestown under Sir Thomas Gates, who relieved Dale in the government. The latter continued, however, to be active in colonial affairs, founding the new settlement of Henrico, and conquering the Appomattox Indians. On Gates's return to England in March, 1614, the government was again left with Dale, and he administered it till 1616, when he sailed for home in the same vessel with Pocohontas and John Rolfe, who had been married during his term of office. Dale was in Holland in February, 1617, and in January, 1619, made commander of the East Indian fleet, participating in an engagement with the Dutch near Bantam. The climate at his post proved fatal to him. Dale deserves special praise for the important changes that he introduced in the colonial land-laws, under which, as established by him, the cultivator was given a chance of becoming proprietor of the soil, which was an impossibility under the old system.

DALE, William Johnson, physician, b. in Gloucester, Mass., 5 Sept., 1815. His grandfather, William Johnson, fought at Bunker Hill; his paternal grandfather, Ebenezer, at Lexington; and his father, Ebenezer, was a surgeon in the war of 1812. He was graduated at Harvard in 1837, at its medical school in 1840, and began practice in Boston. In June, 1861, he was commissioned surgeon-general of Massachusetts, holding the rank of colonel, and in December of that year was appointed acting assistant surgeon of the U. S. army, which place he retained till the close of the war. He was on duty in Boston, Mass., during the civil war, and had general supervision of all matters connected with the medical staff and the care and treatment of the sick and wounded that were sent home. In October, 1863, he was raised to the rank of brigadier-general, in connection with his appointment as surgeon-general of Massachusetts. In recognition of his services, the U. S. authorities gave his name to a general hospital established at Worcester, Mass., opened in September, 1865. He is a member of the Massachusetts medical society, and was its anniversary chairman.

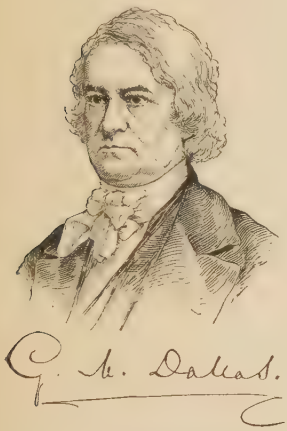
DALHOUSIE, George Ramsay, Earl of, Scottish general, b. in 1770; d. at Dalhousie castle, near Edinburgh, Scotland, 21 March, 1838. He entered the British army as a cornet in the guards, raised a company, and was made captain. He was wounded at Martinique, and served in Ireland, during the rebellion of 1798, in the expedition to the Helder, at Belleisle and Minorca, and under Sir Ralph Abercrombie in Egypt, attaining the rank of major-general in 1805. He subsequently fought at the Scheldt and at Flushing, and through the Peninsular war, distinguishing himself at the battles of Vittoria and the Pyrenees. In 1815 he was raised to the peerage as Baron Ramsay. In 1816 he was sent to Nova Scotia as commander-in-chief of the forces, and after the death of the Duke of Richmond, in 1819, was appointed governor-general of British North America. During his administration efforts to effect a union of the provinces were continued, provoking the intense hostility of the French population, and ceaseless disputes took place between the executive and the assembly respecting the civil list and the crown lands. He left Canada in September, 1828, and served in India as commander-in-chief, but returned to Scotland with broken health in 1832.

DALL, Charles Henry Appleton (dal), clergyman, b. in Baltimore, Md., 12 Feb., 1816; d. in Calcutta, British India, 18 July, 1886. He was educated in the Boston public and Latin schools, and was graduated at Harvard in 1837, and at Harvard divinity-school in 1840. In November, 1841, he was ordained an evangelist of the Unitarian church in St. Louis, after which he was settled in Baltimore, Md., Portsmouth, N. H., Needham, Mass., and Toronto, Canada. Failing health, from excessive pastoral duties, with a preference for missionary work, induced him to take up that occupation as his life labor. He became the first foreign missionary of the Unitarian church in America, and in February, 1855, sailed for Calcutta. There he instituted the first girls' school for natives, the first school for homeless and friendless children, and the first children's temperance society. Mr. Dall was elected a member of the American oriental society and the Asiatic society of Bengal, and a foreign associate of the Hungarian Unitarian consistory. He was the author of many tracts, educational and moral, for circulation in British India, a small work on the Suez canal, many hymns and devotional poems, and notes of travel contributed to periodicals in the United States and India. The number of pamphlets written by Mr. Dall in India exceeded one hundred, and many of them were several times reprinted in response to a demand from the natives for whose instruction they were intended.—His wife, **Caroline Wells,** daughter of Mark Healey, b. in Boston, Mass., 22 June, 1822, was educated at private schools and academies, after which she became a teacher, and in 1840 was made vice-principal of the then celebrated "Miss English's school for young ladies," in Georgetown, D. C. In September, 1844, she married Mr. Dall, and, although occupied thenceforth with duties incidental to the life of a clergyman's wife, she continued her studies and literary activity. Her early work was especially devoted to reform topics, principally the opening of new fields of labor to women. Mrs. Dall's later labors have been chiefly literary and critical. In 1877 she received the degree of LL. D. from Alfred university. She has published many books, among which are "Essays and Sketches" (Boston, 1849); "Historical Pictures Retouched,

a Volume of Miscellanies" (1859); "Woman's Right to Labor" (1860); "Life of Dr. Marie Zakrewska, being a Practical Illustration of 'Woman's Right to Labor'" (1860); "Woman's Rights under the Law" (1861); "Sunshine; A Name for a Popular Lecture on Health" (1864); "The College, the Market, and the Court, or Woman's Relation to Education, Employment, and Citizenship" (1867); "Egypt's Place in History" (1868); "Patty Gray's Journey to the Cotton Islands" (3 vols., 1869–'70); "Romance of the Association, or One Last Glimpse of Charlotte Temple and Eliza Wharton" (1875); "My First Holiday, or Letters Home from Colorado, Utah, and California" (1881); and "What we Really Know about Shakespeare" (1885).—Their son, **William Healey**, naturalist, b. in Boston, Mass., 21 Aug., 1845, was educated at the Boston public schools, and then became a special pupil in natural sciences under Louis Agassiz, and in anatomy and medicine under Jeffries Wyman and Daniel Brainerd. In 1865 he was appointed lieutenant in the International telegraph expedition, and in this capacity visited Alaska in 1865–'8. From 1871 till 1880 he was assistant to the U. S. coast survey, and under its direction spent the years 1871 till 1874, and 1884 in that district. His work, beside the exploration and description of the geography, included the anthropology, natural history, and geology of the Alaskan and adjacent regions. From the field-work and collections have resulted maps, memoirs, coast pilot, and papers on these subjects or branches of them. From 1884 till 1886 he was paleontologist to the U. S. geological survey, and since 1869 he has been honorary curator of the department of mollusks in the U. S. national museum. In this office he has made studies of recent and fossil mollusks of the world, and especially of North America, from which new information has been derived concerning the brachiopoda, patellidæ, chitonidæ, and the molluskfauna of the deep sea. These studies have grown out of those devoted to the fauna of northwestern America and eastern Siberia. Mr. Dall has been honored with elections to nearly all of the scientific societies in this country, and to many abroad. In 1882 and in 1885 he was vice-president of the American association for the advancement of science, and presided over the sections of biology and anthropology. His scientific papers include about two hundred titles. Among the separate books are "Alaska and its Resources" (Boston, 1870); "Tribes of the Extreme Northwest" (Washington, 1877); "Coast Pilot of Alaska, Appendix I., Meteorology and Bibliography" (1879); "The Currents and Temperatures of Bering Sea and the Adjacent Waters" (1882); "Pacific Coast Pilot, and Islands of Alaska, Dixon Entrance to Yakutat Bay, with the Inland Passage" (1883); "Prehistoric America," by the Marquis de Nadaillac, edited (New York, 1885); and "Report on the Mollusca Brachipoda and Pelecypoda" of the Blake dredging expedition in the West Indies (Cambridge, 1886).

DALLAS, Alexander James, statesman, b. in the island of Jamaica, 21 June, 1759; d. in Trenton, N. J., 14 Jan., 1817. He was the son of a Scottish physician who emigrated to Jamaica about 1750. The son was educated in Edinburgh and at Westminster under James Elphinston, the friend of Dr. Johnson, whose acquaintance and that of Dr. Franklin he made while a student. He then studied law in London, returned to Jamaica in 1780, and, upon the remarriage of his mother and his exclusion from the inheritance of his father's estate, removed in April, 1783, to Philadelphia. He took the oath of allegiance to the commonwealth of Pennsylvania in June, 1783, was admitted to the bar in July, 1785, and a few years later was admitted to practice in the United States courts, and became eminently successful as a lawyer in Philadelphia. He wrote for periodicals, and was for a time editor of the "Columbian Magazine." In January, 1791, he was appointed secretary of the commonwealth of Pennsylvania, and in December, 1793, his commission was renewed. While in this office he prepared an edition of the laws of Pennsylvania, with notes. He also compiled four volumes of "Reports of Cases ruled and adjudged by the Courts of the United States and of Pennsylvania, before and since the Revolution" (Philadelphia, 1790–1807). He accompanied an armed force to Pittsburg, in the capacity of paymaster-general, in 1794. He was again appointed secretary of state in December, 1796, and held the office until Thomas Jefferson became president in 1801 and appointed him, as an ardent supporter of the republican party, U. S. district attorney for the eastern district of Pennsylvania, which office he held till 1814, when he was called into the cabinet as secretary of the treasury by President Madison. When he entered upon this office, 6 Oct., 1814, the government was seriously embarrassed in its finances through the war with Great Britain, and the committee of ways and means in congress applied to Mr. Dallas for suggestions as to the best mode of raising money for the requirements of the government, and of sustaining the public credit. In a masterly report he showed that the money required could not be raised by taxation alone, but must be obtained in part by loans. He proposed for the purpose of raising a loan the establishment of a government bank. The house, in committee of the whole, reported in favor of the bank on 24 Oct., 1814, and a bill was passed on 20 Jan., 1815, but was vetoed by President Madison. Having been interrogated as to the probable effect of a large issue of treasury-notes, Secretary Dallas made a reply that had much influence in restoring public confidence and arousing the spirit of patriotism. On 3 April, 1816, an act to incorporate a national bank was passed by congress and received the signature of the president. Mr. Dallas's administration of the treasury department was able and energetic. Treasury-notes, which were scarcely current when he assumed office, were sold at par, with interest added, a few months later. The bank had the effect of greatly improving the credit of the government. After March, 1815, he discharged the duties of secretary of war in addition to the direction of the treasury department, and superintended the reduction of the army consequent upon the restoration of peace. Having contributed, to the extent of his ability, to extricate the government from its financial difficulties, and having seen the United States bank firmly established, he retired from office in November, 1816, and returned to the practice of law in Philadelphia, but died a few weeks afterward. Besides the works mentioned above and his treasury reports, he published "Features of Jay's Treaty" (Philadelphia, 1795); "Speeches on the Trial of Blount"; "Address to the Society of Constitutional Republicans" (1805); and "Exposition of the Causes and Character of the War of 1812–'15." He left unfinished a "History of Pennsylvania." The third edition of his "Reports of Cases," with notes by Thomas J. Wharton, appeared in Philadelphia in 1830.—His son, **Alexander James,** naval officer, b. in 1791; d. in Callao bay, Peru, 3 June, 1844, was appointed a midshipman on 22 Nov., 1805, became a lieutenant

on 13 June, 1810, commander on 5 March, 1817, and captain on 24 April, 1828. He served under Rodgers on board the "President" in 1812, and afterward under Chauncey on Lake Ontario, and was with Porter in his cruise for the extermination of pirates in the West Indies.—Another son, **George Mifflin,** statesman, b. in Philadelphia, Pa., 10 July, 1792; d. there, 31 Dec., 1864, was graduated with first-class honors at Princeton in 1810, and then studied law in his father's office, being admitted to the bar in 1813. The same year he received the appointment of private secretary to Albert Gallatin, and accompanied that gentleman on his mission to Russia, to negotiate a treaty of peace with England. On his return to this country, in the following year, he assisted his father for some months in his duties as secretary of the treasury, and then began the practice of law in New York city, and was solicitor of the U. S. bank. In 1817 he was appointed deputy attorney-general for Philadelphia county. Taking an active part in politics, and supporting the candidacy of Gen. Jackson for the presidency in 1824 and 1828, Mr. Dallas was in 1829 elected mayor, and, on the elevation of Gen. Jackson to the presidency, in 1829 was appointed U. S. attorney for that district. He retained this office till 1831, when he was elected to the U. S. senate in the place of Isaac D. Barnard, who had resigned. He took a prominent part in the debates of that body until the expiration of his term, in 1833, when he declined a re-election, returned to the practice of the law, and filled the office of attorney-general of Pennsylvania from 1833 till 1835. In 1837 President Van Buren appointed him minister to Russia, which post he retained till October, 1839, when he was recalled, at his own request, and again resumed legal practice. George M. Dallas and James Buchanan were for many years rival leaders of the democratic party in Pennsylvania, and aspirants for the presidency of the United States. In May, 1844, the democratic convention at Baltimore nominated him for vice-president of the United States on the ticket with James K. Polk for president. The democratic candidates were elected by an electoral vote of 170 out of 275. The questions of the time were the tariff and the annexation of Texas. Mr. Polk's election caused the admission of Texas to the Union just before the close of Mr. Tyler's term of office, but the subject of the tariff was left for the new administration. The appointment of his rival, Buchanan, as secretary of state, left Mr. Dallas without influence on the policy of the administration; but the tie in the senate on the free-trade tariff of 1846, and its adoption by his casting vote, gave him prominence. A bill that levied duties on imports for the purpose of revenue only, abandoning the protective policy, was passed by the house of representatives in 1846, but when it reached the senate that body was evenly divided, so that the decision rested with the vice-president.



In giving his vote Mr. Dallas said that, though the bill was defective, he believed that proof had been furnished that a majority of the people desired a change, to a great extent, in principle, if not fundamentally; but in giving the casting vote for a low tariff he violated pledges made to the protectionists of Pennsylvania that had secured the vote of the state for his party in the presidential election. His term expired in 1849. In 1856 Mr. Dallas succeeded Mr. Buchanan as minister to Great Britain, and continued in that post from 4 Feb., 1856, until the appointment by President Lincoln of Charles F. Adams, who relieved him on 16 May, 1861. At the very beginning of his diplomatic service in England he was called to act upon the Central American question, and the request made by the United States to the British government that Sir John Crampton, the British minister to the United States, should be recalled. Both these delicate questions were managed by Mr. Dallas in a conciliatory spirit, but without any sacrifice of national dignity, and both were settled amicably. At the close of his diplomatic career Mr. Dallas returned to private life and took no further part in public affairs except to express condemnation of secession. Many of his speeches were published, among them "An Essay on the Expediency of erecting any Monument to Washington except that involved in the Preservation of the Union" (1811); "A Vindication of President Monroe for authorizing Gen. Jackson to pursue the Hostile Indians into Florida" (1819); "Speech in the Senate on Nullification and the Tariff" (1831); "Eulogy on Andrew Jackson" (1845); "Speech on giving his Casting Vote on the Tariff of 1846" (1846); "Vindication of the Vice-President's Casting Vote in a Series of Letters" (1846); "Speech to the Citizens of Pittsburg on the War, Slavery, and the Tariff" (1847); "Speech to the Citizens of Philadelphia on the Necessity of maintaining the Union, the Constitution, and the Compromise" (1850). A "Series of Letters from London," written while he was minister there, in 1856–'60, was edited and published by his daughter Julia (Philadelphia, 1869).—The third son of Alexander James was a lawyer and judge in Pittsburg, Pa.—The son of George M., **Philip Mifflin,** b. in 1825; d. in Philadelphia, Pa., 8 March, 1866, was a lawyer practising in Philadelphia, and, while his father held the English mission, was secretary of legation in London.—**Robert Charles,** author, a brother of Alexander James, b. in Kingston, Jamaica, in 1754; d. in Normandy, France, in 1824, was educated under Mr. Elphinston, studied law in the Temple, returned to Jamaica at the age of twenty-one, married in England three years later, and returned to Jamaica to fill a lucrative post, but gave it up on account of his wife's health, and resided in France until the French revolution. He then came to the United States, but was not pleased with the country, and consequently returned to England, where he followed a literary career. He was a friend and counsellor of Lord Byron, the poet, whose uncle, Capt. Byron, married his sister. Among his publications were "Poems," "Lucrecia, a Tragedy, and Moral Essays" (London, 1797); "Aubrey," a novel (1804); "Memoirs of Marie Antoinette," from the French of Joseph Weber (1805); and many more translations and original tracts in defence of royalty in France, and in condemnation of the Revolution; "The Morlands, Tales illustrative of the Simple and the Surprising" (1805). In the year of his death he published "Recollections of the Life of Lord Byron from 1808 to the End of 1814."—His

son, **Alexander Robert Charles,** after serving with distinction as a British officer through the Peninsular war and at the battle of Waterloo (where his cousin Charles was wounded), entered the Anglican priesthood, following his cousin's example, and became eminent as the organizer of missions in the west of Ireland. He was the author of many popular devotional books.—Another distinguished member of the family in Great Britain was Sir **George,** a political author, b. in London in 1758; d. in 1833. His principal publication was a work entitled "Thoughts on our Present Situation, with Remarks on the Policy of a War with France" (1793).

DALLING, Sir **John,** British soldier, d. in 1798. He served under Loudoun as major of infantry in 1757, was engaged at Louisburg in 1758, and commanded a body of light infantry under Gen. Wolfe at Quebec in 1759. He was made lieutenant-colonel of the 43d foot in 1760, and commanded the regiment at the siege of Havana in August, 1762. In 1767 he was appointed lieutenant-governor, and a few years later governor, of Jamaica. He was promoted major-general in 1777, conducted an expedition against the Spanish colonies in 1780, became lieutenant-general in 1782, and was made a baronet in 1783.

DALSHEIMER, Alice, poet, b. in New Orleans, La., 1 Dec., 1845; d. there, 15 Jan., 1880. Her maiden name was Solomon. She received her education in the city schools, and in 1865 became a teacher, in her examination as to qualifications standing at the head of 250 applicants. She married, in 1867, Mr. Dalsheimer, a lawyer, and gave up teaching, but resumed it in 1873, when she became principal of the girls' department of a school under the management of the Hebrew educational society, where she remained until 1878. Her writings consist of numerous sketches, short stories, and poems, principally the latter, all of which appeared in the daily papers of New Orleans under the pseudonym of "Salvia Dale," but have never been collected and published in book-form. Of her poems, those entitled "Motherhood" and "Twilight Shadows" are among the best.

DALTON, John, R. C. bishop in Newfoundland, d. in Harbor Grace, Newfoundland, in April, 1869. He was nominated bishop on the creation of the see in 1856, and was consecrated the same year.

DALTON, John Call, physiologist, b. in Chelmsford, Mass., 2 Feb., 1825. He was graduated at Harvard in 1844, and at the medical department of that university in 1847. His attention was at once directed to physiology, and in 1851 he obtained the annual prize offered by the American medical association by his essay on "Corpus Luteum." Subsequently his researches on the anatomy of the placenta, the physiology of the cerebellum, intestinal digestion, and other experimental observations, embodied in his treatise on physiology, gained for him a reputation as one of the first of modern physiologists. He became professor of physiology in the medical department of the University of Buffalo, and was the first in the United States to teach that subject with illustrations by experiments on animals. This chair he resigned in 1854, and accepted a similar professorship in the Vermont medical college in Woodstock, where he remained until 1856. From 1859 till 1861 he filled the chair of physiology in the Long Island college hospital in Brooklyn. During the winter of 1854–'5 he lectured on physiology at the College of physicians and surgeons, New York, temporarily filling the place of Dr. Alonzo Clark. In 1855 he was elected to that professorship, which he continued to fill until his resignation in 1883. In 1884 he again succeeded Dr. Clark as president of the College of physicians and surgeons. During the civil war he was a surgeon in the national service, going to Washington in 1861 in that capacity with the 7th New York regiment. Subsequently he was appointed surgeon of volunteers, and held important offices in the medical corps until his resignation in March, 1864. Dr. Dalton has been an active member of many medical societies, and held prominent offices in them. In 1864 he was elected a member of the National academy of sciences. His contributions to the literature of physiology have been numerous since 1851. He has published articles in the "American Journal of the Medical Sciences," the "Transactions of the New York Academy of Sciences," the "American Medical Monthly," and other medical journals in New York; and also many valuable articles in his specialties in the American and other cyclopædias. He has published in book-form "A Treatise on Human Physiology" (New York, 1859; 6th ed., 1882); "A Treatise on Physiology and Hygiene for Schools, Families, and Colleges" (1868); "The Experimental Method of Medicine" (1882); "Doctrines of the Circulation" (1884); and "Topographical Anatomy of the Brain" (1885).—His brother, **Edward Barry,** physician, b. in Lowell, Mass., 21 Sept., 1834; d. in Santa Barbara, Cal., 13 May, 1872, was graduated at Harvard in 1855, and at the College of physicians and surgeons, New York, in 1858. Dr. Dalton then settled in New York, and was resident physician of St. Luke's hospital when the civil war began. He at once volunteered as a surgeon, and served from April, 1861, till May, 1865. At first he was a medical officer in the navy, after which he was commissioned surgeon of the 36th New York volunteers, and subsequently surgeon of U. S. volunteers, serving as medical inspector of the 6th army corps, and as medical director of the Department of Virginia. In March, 1864, he was transferred to the Army of the Potomac, where he remained throughout the campaign of that year, from the Wilderness to City Point, having charge of all the wounded, and establishing and moving the hospitals. At City Point he was made chief medical officer of the depot field-hospitals, Army of the Potomac, till the final campaign in March and April, 1865, when he accompanied the troops as medical director of the 9th army corps. After his discharge he was successively appointed brevet lieutenant-colonel and colonel of volunteers. In March, 1866, he was appointed sanitary superintendent of the New York metropolitan board of health, in which office he remained until his resignation in January, 1869. In 1869 he originated the present city ambulance system for the transportation of the sick and injured. His health had then begun to fail, and, after trying various resorts, he finally visited California, where he died from consumption. He published papers on "The Disorder known as Bronzed Skin, or Disease of the Supra-renal Capsules" (1860); "The Metropolitan Board of Health" (1868); and "Reports of the Sanitary Superintendent of the Metropolitan Board of Health" from 1866 till 1869.

DALTON, Tristram, senator, b. in the part of the town of Newbury that afterward became Newburyport, Mass., 28 May, 1738; d. in Boston, Mass., 30 May, 1817. He was prepared for college in Dummer academy, Byfield, under Samuel Moody, and graduated at Harvard in 1755. He then studied law, but engaged in mercantile pursuits with his father-in-law, Robert Hooper, and attend-

ed to his large estate, called Spring Hill, in West Newbury. He was an ardent patriot, and a leader of the whigs of Essex county, among whom were many notable men. He was distinguished for his elegance of manners and scholarly accomplishments, and entertained Washington, Adams, Talleyrand, and other famous persons at Spring Hill. He was a delegate from Massachusetts to the convention of committees of the New England provinces that met in Providence, R. I., 25 Dec., 1776, speaker of the house of representatives, and a member of the senate of Massachusetts, and was chosen a senator in the 1st congress, and drew the lot for the short term, serving from 14 April, 1789, till 3 March, 1791. Following the advice of his friend, President Washington, he sold his property in Massachusetts to invest in real estate in Washington; but through the mismanagement of his agent he lost a great part of the sum thus invested, and commercial losses that occurred at the same time reduced him to poverty. In 1815 he obtained the post of surveyor of the port of Boston, which he held until his death.

DALY, Augustin, dramatist, b. in Plymouth, N. C., 20 July, 1838. His education was received partly in Norfolk, Va., and in the public schools of New York city. He began his literary career as dramatic editor of the "Sunday Courier," in New York city, in 1859, and continued as such on the "Sunday Courier," the New York "Times," the "Sun," the "Express," and the "Citizen," until 1869, when he opened the Fifth Avenue theatre on Twenty-fourth street. This building was destroyed by fire in 1873, and three weeks later he opened another theatre, formerly the "Globe," in Broadway, under the former name. In 1879 he established Daly's theatre in Broadway, near Thirtieth street. He has three times taken his entire company to California, twice to England, and once to Germany and France, where the merits of his management and training were warmly acknowledged. His career as a dramatic author began in 1862 with an adaptation from the German of Mosenthal's "Deborah," and since then he has produced original plays—among them "Divorce," "Pique," "Horizon," "Under the Gaslight," and many adaptations from French and German authors. Most of his productions have won popular success. Mr. Daly has also, for several seasons, managed the "Grand Opera House" in New York. His noted achievement is the organization of combinations of players, complete scenic presentations, and elevation of dramatic purposes. He is an enthusiast and a hard worker in his profession, devoting all his time to the success of his theatre, a great reader, and a well-informed student of the dramatic literature of many nations.

DALY, Charles Patrick, jurist, b. in New York city, 31 Oct., 1816. He received a little schooling, early went to sea before the mast, serving three years, and later became a mechanic's apprentice. Afterward he studied law in his native city, was admitted to the bar in 1839, elected a member of the legislature in 1843, became justice of the court of common pleas in 1844, first judge in 1857, and chief justice from 1871 to 1886, his term expiring by limitation of age, when he returned to the practice of his profession. In 1860 he received from Columbia the degree of LL. D. Justice Daly has for many years been president of the American geographical society, lectured at Columbia law-school, delivered discourses before learned societies, and made public addresses. He has visited Europe on five occasions. It has been said of Justice Daly that, as a lawyer, no large fee has ever tempted him to enlist his services on behalf of an undeserving cause. He is the author of numerous biographical, scientific, and legal papers, most of them issued in pamphlet-form. His publications embrace "Historical Sketch of the Judicial Tribunals of New York from 1623 to 1846"(New York, 1855); "History of Naturalization and its Laws in Different Countries" (1860); "Are the Southern Privateersmen Pirates?" (1862); "Origin and History of Institutions for the Promotion of Useful Arts by Industrial Exhibitions" (Albany, 1864); "When was the Drama introduced in America?" (1864); 13 vols. of "Reports of Cases in the Court of Common Pleas, City and County of New York" (New York, 1868–'87); "First Settlement of Jews in North America" (1875); "What we know of Maps and Map-making before the Time of Mercator" (1879).

Chas. P. Daly

DALY, Sir Dominick, governor of Prince Edward island, b. in 1798; d. in Adelaide, south Australia, 19 Feb., 1868. He was acting chief secretary in Canada for nearly twenty-six years, and in 1851 was appointed governor of the island of Tobago. In 1854 he was knighted, and transferred to Prince Edward island, of which he was governor till 1859. In 1861 he was appointed governor of South Australia.

DALZELL, James, soldier, d. near Detroit, Mich., 30 July, 1763. Of his early life nothing is known. He was a companion of Israel Putnam in some of the most adventurous passages of that rough veteran's life, and afterward an aide-de-camp to Gen. Jeffrey Amherst. He led a detachment of 260 men to the relief of the garrison of Detroit, reaching that place at daybreak, 29 July, 1763. After one day's rest, Capt. Dalzell led a night sally against the Indians, in which his command of 247 men was surprised on the banks of a rivulet, called Parent's creek, defeated and dispersed. Dalzell fell and was scalped while attempting to bring off the wounded. His heart was torn out, and with it the Indians wiped the faces of their prisoners. The stream received the name of "Bloody Run," by which it is known to this day.

DALZELL, Robert M., inventor, b. near Belfast, Ireland, in1793; d. in Rochester, N. Y., 22 Jan., 1873. His ancestors were Scotch, and his father, John Dalzell, a leader in the Irish rebellion of 1798, in consequence of which the old family mansion was burned, and he forced to put to sea in an open boat. He was rescued by a vessel bound for New York, where he settled and where his family soon followed him. When Robert was about thirty-three years of age he removed to Rochester. He was a millwright, unusually skilful and ingenious, and many of the flour-mills in the city of Rochester were built under his supervision. He invented and introduced the "elevator system" in handling and stowing grain, which is now in general use.

DAMEN, Arnold, clergyman, b. in Holland about 1800. After entering the Society of Jesus, he came to the United States, and the development of the Roman Catholic church in the west is considered to be largely his work. In 1857 he erected a Jesuit establishment in Chicago; he also built the great Church of the Holy Trinity, and founded the College of St. Ignatius in the same city. His success as a missionary has been very great. As a pulpit orator he ranks very high in the religious body to which he belongs.

D'AMICO, Carlos A. (da-am-e'-ko), Argentine statesman, b. in Buenos Ayres in 1844. At the age of twenty-one he was graduated in law at the university of his native city, and opened an office in Buenos Ayres. At the same time he took an active part in politics, affiliating himself in the national autonomist party, of which he is still one of the chief supporters. In 1868, when the allied armies, having repelled the forces of Lopez, were about to invade Paraguay, D'Amico accepted a commission in a regiment of national guards, was present at all the battles of the allied armies on Paraguayan territory, and rose to the rank of major. He then returned to his law practice, but soon was elected secretary of the federal senate, and in 1877 to congress as member for Buenos Ayres. In October, 1880, he was appointed secretary of state of the government of the state of Buenos Ayres, which office he held until, in 1883, he was called to the federal senate as senator for Buenos Ayres. At the expiration of the term of Gov. Rocha, in 1884, D'Amico was chosen governor of the state of Buenos Ayres. He is, perhaps, the most popular orator of the Argentine republic, and in the chamber of deputies, as well as in the senate, uses his gifts to defend the interests of his native state and the federation in general. As minister of the state government, he initiated measures granting increased facilities for communications with Europe and the countries of both Americas, and fostering emigration and the public-school system. He was one of the originators of the railroad to Mendoza, destined to cross the Andes after traversing the immense pampas, and to put Chili in communication with the Atlantic seaboard. During his term as minister he worked incessantly for the execution of the project to found a new capital, and, when his idea was accepted by Gov. Rocha, the foundations of the new city, La Plata, were laid in 1882. When he became governor he pushed the progress of this favorite city still more energetically, and its growth and embellishment made rapid strides. Under his administration were either begun or completed the palace of the government, the ministerial buildings, the house of congress, the progreso bank, and a great number of public-school buildings. His term as governor will expire in the latter part of 1887.

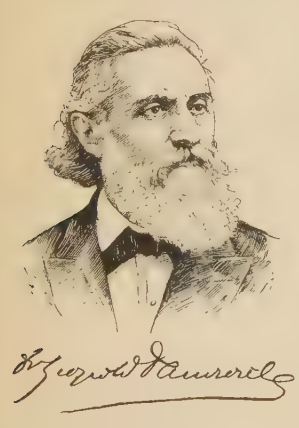
DAMON, David, clergyman, b. in East Sudbury (now Wayland), Mass., 12 Sept., 1788; d. in Reading, Mass., in 1843. His father was a farmer, barely able to support his family, so that the son was dependent for his education entirely upon his own exertions. He prepared himself for college at Phillips Andover academy, and was graduated at Harvard in 1811. He was one of the founders of the Harvard Lyceum, at Cambridge, in 1810–'11, and was the third scholar in a class of which Edward Everett and N. L. Frothingham were the first and second. He studied theology at Andover, but was not graduated, was licensed to preach 22 Nov., 1813, ordained 1 Feb., 1815, and installed as pastor of the Unitarian church in Lunenburg, Mass. He occupied various parishes in New England until 1835, when he settled in East Cambridge, Mass. In January, 1841, he delivered the annual sermon before the legislature of Massachusetts, and in May of the same year the Dudleian lecture at Harvard. The degree of D. D. was conferred upon him by his alma mater in 1843. His death was caused by apoplexy, which attacked him while he was officiating at the funeral of his friend, Edmund Parker. His publications consisted principally of sermons and addresses.

DAMON, Howard Franklin, physician, b. in Scituate, Mass., in 1833; d. in Boston, 17 Sept., 1884. He was graduated at Harvard in 1858, and at the medical department of that institution in 1861. He was physician and superintendent of the Boston dispensary in 1862–'4, and was afterward admitting physician to the city hospital, and physician to the department of skin diseases among outdoor patients. He was a member of the American medical association, of the Boston society for medical improvement, the Boston microscopical society, and was corresponding member of the New York dermatological society. He was the author of "Leucocythæmia," a Boylston prize essay (Boston, 1864); "Photographs of Skin Diseases" (Boston, 1870); "Neuroses of the Skin" (Philadelphia, 1868); "Structural Lesions of the Skin" (Philadelphia, 1869); and "Some General Remarks on the Frequency of Skin Diseases" (1870).

DAMPIER, William, navigator, b. in East Coker, Somersetshire, about 1652; the place and date of his death are unknown. Early in life he was left an orphan, when he was taken from school and placed on board of a vessel bound for Newfoundland, and on his return he engaged as a common sailor on a vessel sailing for the East Indies. He served in the Dutch war during 1673 under Sir Edward Sprague, but failing health led him to settle in the country. In 1674 he became undermanager of an estate in Jamaica, but soon engaged in the coasting trade, and made two voyages to the bay of Campeachy, where he also remained for some time with the logwood-cutters as a common workman, and subsequently published an account of his experiences. In 1678 he returned to Jamaica, and then sailed to England, but again returned to the West Indies during the following year, when he was persuaded to join a party of buccaneers, with whom he crossed the isthmus of Panama, and spent 1680 on the Peruvian coast, successfully plundering several towns. After another privateering voyage on the Spanish main, he set out on an expedition, under Capt. John Cook, against the Spaniards in the South sea. They sailed from Virginia in August, 1684, cruised along the coasts of Guinea, and then, doubling Cape Horn, entered the Pacific. Here the expedition was joined by another ship from London, bent on a similar errand, and, after stopping at the island of Juan Fernandez, they cruised together up the coast of South America, capturing several prizes. While near Cape Blanco, off the coast of Mexico, Capt. Cook died, and was succeeded by Capt. Davis. Here a vessel commanded by Capt. Swan joined the expedition. Unsuccessful attacks were made on Guayaquil, and also on a Spanish fleet laden with treasures from Peru, but they succeeded in capturing several prizes. After a time Dampier left Davis and, joining Swan, set out for the East Indies across the Pacific ocean. On reaching Mindanao, the crew mutinied, and Swan, with others, was left on the island. Dampier continued cruising in East Indian waters for several years, until he landed at Bencoolen, where he acted as a gunner in the English fort. In 1691 he sailed for England, reaching home in September. Subse-

quently he entered the British navy, and commanded the "Roebuck." He was sent on a voyage of discovery and sailed to Brazil, and thence to Australia, where he spent some time in exploration and circumnavigated the island, to which he gave the name of New Britain. The small archipelago and the strait between Papua and New Britain were named for him at this time. After other discoveries, he returned by a new route to Ceram, in the Moluccas, and in February, 1701, arrived off the island of Ascension, where his vessel sprung a leak and foundered. He reached England, however, during the latter part of the year. He had command of a ship in the South seas about 1705, and sailed with Capt. Stradling, whose vessel foundered at sea. Later Dampier accompanied Woodes Rogers in his voyage around the world during 1708–'11 in the capacity of pilot. On this expedition Guayaquil was taken. He published "A Voyage around the World," and a supplement to it, describing the countries of Tonquin, Malacca, etc.; "Two Voyages to Campeachy"; "A Discourse of Trade Winds, etc., in the Torrid Zone" (1707); and "A Voyage to New Holland" (1709). The best edition of his collected voyages is in four volumes (London, 1729).

DAMROSCH, Leopold, musician, b. in Posen, Prussia, 22 Oct., 1832; d. in New York city, 15 Feb., 1885. At the age of nine years he began to study the violin, but was obliged to practise at the house of friends, on account of the opposition of his parents. Acceding to their wishes, he entered the University of Berlin, was graduated with high honors, and received a diploma as doctor of medicine. But every leisure moment was given to music. He studied the violin under Ries, and thorough bass with Dehn and Bohmer. After his graduation, Dr. Damrosch devoted his time and energies to the study of music, and his fame as a violinist soon reached the large cities of Germany, where he appeared with success. Shortly afterward he went to Weimar, and was cordially received by Liszt, who appointed him solo-violinist in the Ducal orchestra, of which he was the director. Liszt dedicated one of his symphonic poems, "Le Triomphe Funèbre de Tasse," to Dr. Damrosch, an honor extended to two others only—Wagner and Berlioz. Dr. Damrosch's first appearance as a conductor was at the Philharmonic concerts in Breslau in 1859, where he was highly successful, and conducted them for three years. In these concerts he gave a judicious mixture of popular and classic as well as modern pieces, and in 1862 founded a symphonic society in that city, with an orchestra of eighty performers, modelled after the Gewandhaus concerts of Leipsic. The fame of this society soon extended throughout Germany, and several of the performances were directed by Liszt. Wagner also accepted the invitation to conduct his own manuscript compositions in the winter of 1867. In 1871 Dr. Damrosch came to New York upon the invitation of the Arion society, and made his first appearance, on 6 May, 1871, at Steinway hall, as conductor, composer, and violinist. He founded the Oratorio society in 1873. The societies that had previously existed had failed, from various causes, and the only organizations of this character were the old Harmonic society and the Church-Music association. The work was begun with enthusiasm, and in the year of its organization the first concert was given, with a programme consisting of selections from Bach, Händel, Palestrina, etc. The growth of the society was such that in the following year the first oratorio, Händel's "Samson," was performed with full orchestra, and on Christmas evening of that year the "Messiah" was given with great effect. It performed Bach's, Beethoven's, Brahm's, Händel's, Haydn's, Mendelssohn's, Mozart's, Palestrina's, and other great works, many of which had never been given in the United States. In 1877 Dr. Damrosch, in connection with a number of persons interested in the cultivation of orchestral music, established the Symphony society. Although a separate organization, it has become identified with the Oratorio society by the joint performance of several notable works. The co-operation of these societies reached its climax in the great "musical festival" which was held in the armory of the 7th regiment in New York, from 3 till 7 May, 1881. The chorus numbered 1,200, the main body being the Oratorio society, which was augmented by various choral societies from neighboring towns. An additional chorus of 1,000 young ladies from the Normal college and 250 boys from the church choirs took part in the afternoon concerts. The orchestra was composed of 250 pieces, and a large number of artists were selected for soloists by Dr. Damrosch. Among the choral works performed were Händel's "Dettingen Te Deum" and "Messiah"; Rubinstein's "Tower of Babel" (first time); Berlioz's "Grande Messe des Mortes" (first time); and Beethoven's "Ninth Symphony." The audience numbered from 8,000 to 10,000 at each concert, and the enthusiasm for the projector of this enterprise resulted in an ovation on the last night. The degree of Doctor of Music was conferred upon him by Columbia in 1880. In 1883 Dr. Damrosch travelled extensively through the west with his orchestra, meeting everywhere with great success. Italian opera, which, through its "star" system and small repertory, had been losing its hold upon American audiences, received its death-blow in 1884 when Dr. Damrosch proposed German opera to the directors of the new Metropolitan opera-house. In one month, September, 1884, he engaged his company, and began the most remarkable series of operatic performances ever held in this country. The company comprised some of the greatest artists of the German opera-houses, and, in contrast with the hitherto prevailing mode, every part, even the smallest, was carefully presented. Twelve of the operas performed were comparative novelties, the most important of which were Wagner's "Tannhäuser," "Lohengrin," and "Die Walküre," and Beethoven's "Fidelio." This proved to be Dr. Damrosch's last effort. He conducted every performance except during the last week of his life, when he took a severe cold, from which he never recovered. His musical compositions include several violin concertos "Sulamith," a biblical idyl, and a "Festival Overture." He had thorough command over the modern resources of instrumentation, and his musical ideas are characterized by great nobility and refinement. His violin compositions are prized by violinists as valuable additions to



the literature of that instrument. It was as a conductor, however, that he gained his greatest celebrity. He possessed strong personal magnetism, united with power to impart his ideas, which made him an ideal conductor. His aim was always to produce the inner meaning and spirit of a composition. Through his gentle bearing and high culture he gained many warm friends. Never seeking for immediate fame or personal success, he found that high truth which he extended in his art.—His son, **Walter Johannes**, b. in Breslau, Prussia, 30 Jan., 1862, received his musical education chiefly from his father, but also had instruction from other noted musicians. During the great music festival given by Dr. Damrosch in May, 1881, he first acted as conductor in drilling several sections of the large chorus, one in New York, and another in Newark, N. J. The latter, consisting chiefly of members of the Harmonic society, elected him to be their conductor. Under his leadership this society regained its former reputation, and during this time a series of concerts was given, in which such works as Rubinstein's "Tower of Babel," Berlioz's "Damnation de Faust," and Verdi's "Requiem" were performed. He was then only nineteen years of age, but showed marked ability in drilling large masses. During Dr. Damrosch's last illness his son was suddenly called upon to conduct the German opera, which he did with success, and after his father's death was appointed to be assistant director and conductor at the Metropolitan opera-house, and also to succeed him as conductor of the Symphony and Oratorio societies. One of his principal achievements was the successful performance of "Parsifal," perhaps the most difficult of Wagner's operas, for the first time in the United States, in March, 1886, by the Oratorio and Symphony societies. During his visit to Europe in the summer of 1886 he was invited by the Deutsche Tonkünstler-Verein, of which Dr. Franz Liszt was president, to conduct some of his father's compositions at Sondershausen, Thuringia. Carl Goldmark's opera "Merlin" was produced for the first time in the United States under his direction, at the Metropolitan opera-house, 3 Jan., 1887.

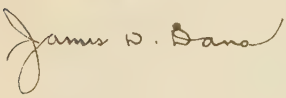
DANA, Charles Anderson, editor, b. in Hinsdale, N. H., 8 Aug., 1819. He is a descendant of Jacob, eldest son of Richard Dana, progenitor of most of those who bear the name in the United States. His boyhood was spent in Buffalo, N. Y., where he worked in a store until he was eighteen years old. At that age he first studied the Latin grammar, and prepared himself for college, entering Harvard in 1839, but after two years a serious trouble with his eyesight compelled him to leave. He received an honorable dismissal, and was afterward given his bachelor's and master's degrees. In 1842 he became a member of the Brook Farm association for agriculture and education, being associated with George and Sophia Ripley, George William Curtis, Nathaniel Hawthorne, Theodore Parker, William Henry Channing, John Sullivan Dwight, Margaret Fuller, and other philosophers more or less directly concerned in the remarkable attempt to realize at Roxbury a high ideal of social and intellectual life. One of the survivors of Brook Farm speaks of Mr. Dana as the only man of affairs connected with that unitarian, humanitarian, and socialistic experiment. His earliest newspaper experience was gained in the management of the "Harbinger," which was devoted to social reform and general literature. After about two years of editorial work on Elizur Wright's Boston "Chronotype," a daily newspaper, Mr. Dana joined the staff of the New York "Tribune" in 1847. The next year he spent eight months in Europe, and after his return he became one of the proprietors and the managing editor of the "Tribune," a post which he held until 1 April, 1862. The extraordinary influence and circulation attained by that newspaper during the ten years preceding the civil war was in a degree due to the development of Mr. Dana's genius for journalism. This remark applies not only to the making of the "Tribune" as a newspaper, but also to the management of its staff of writers, and to the steadiness of its policy as the leading organ of anti-slavery sentiment. The great struggle of the "Tribune" under Greeley and Dana was not so much for the overthrow of slavery where it already existed as against the further spread of the institution over unoccupied territory, and the acquisition of slave-holding countries outside of the Union. It was not less firm in its resistance of the designs of the slave-holding interest than wise in its attitude toward the extremists and impracticables at the north. In the "Tribune's" opposition to the attempt to break down the Missouri compromise and to carry slavery into Kansas and Nebraska, and in the development and organization of that popular sentiment which gave birth to the Republican party and led to the election of Abraham Lincoln in 1860, Mr. Dana bore no unimportant part. Writing of the political situation in 1854, Henry Wilson says, in his "Rise and Fall of the Slave Power": "At the outset, Mr. Greeley was hopeless and seemed disinclined to enter the contest. He told his associates that he would not restrain them, but, as for himself, he had no heart for the strife. They were more hopeful; and Richard Hildreth, the historian, Charles A. Dana, the veteran journalist, James S. Pike, and other able writers, opened and continued a powerful opposition in its columns, and did very much to rally and reassure the friends of freedom and to nerve them for the fight." In 1861 Mr. Dana went to Albany to advance the cause of Mr. Greeley as a candidate for the U. S. senate, and nearly succeeded in nominating him. The caucus was about equally divided between Mr. Greeley's friends and those of Mr. Evarts, while Ira Harris had a few votes which held the balance of power, and, at the instigation of Thurlow Weed, the supporters of Mr. Evarts went over to Judge Harris. During the first year of the war the ideas of Mr. Greeley and those of Mr. Dana in regard to the proper conduct of military operations were somewhat at variance; and this disagreement resulted in the resignation of Mr. Dana, after fifteen years' service on the "Tribune." He was at once employed by Secretary Stanton in special work of importance for the war department, and in 1863 was appointed assistant secretary of war, which office he held until after the surrender of Lee. His duties as the representative of the civil authority at the scene of

military operations brought him into close personal relations with Mr. Stanton and Mr. Lincoln, who were accustomed to depend much upon his accurate perception and just estimates of men and measures for information of the actual state of affairs at the front. At the time when Gen. Grant's character and probable usefulness were unknown quantities, Mr. Dana's confidence in Grant's military ability probably did much to defeat the powerful effort then making to break down the rising commander. Of this critical period Gen. Sherman remarks in his "Memoirs": "One day early in April, 1863, I was up at Grant's headquarters [at Vicksburg], and we talked over all these things with absolute freedom. Charles A. Dana, assistant secretary of war, was there, and Wilson, Rawlins, Frank Blair, McPherson, etc. We all knew, what was notorious, that Gen. McClernand was intriguing against Gen. Grant, in hopes to regain command of the whole expedition, and that others were raising clamor against Grant in the newspapers of the north. Even Mr. Lincoln and Gen. Halleck seemed to be shaken; but at no instant did we (his personal friends) slacken in our loyalty to him." Mr. Dana was in the saddle at the front much of the time during the campaigns of northern Mississippi and Vicksburg, the rescue of Chattanooga, and the marches and battles of Virginia in 1864 and 1865. After the war his services were sought by the proprietors of the Chicago "Republican," a new daily, which failed through causes not within the editor's control. Returning to New York, he organized in 1867 the stock company that now owns the "Sun" newspaper, and became its editor. The first number of the "Sun" issued by Mr. Dana appeared on 27 Jan., 1868, and for nearly twenty years he has been actively and continuously engaged in the management of that successful journal, and solely responsible for its conduct. He made the "Sun" a democratic newspaper, independent and outspoken in the expression of its opinions respecting the affairs of either party. His criticisms of civil maladministration during Gen. Grant's terms as president led to a notable attempt on the part of that administration, in July, 1873, to take him from New York on a charge of libel, to be tried without a jury in a Washington police court. Application was made to the U. S. district court in New York for a warrant of removal; but in a memorable decision Judge Blatchford, now a justice of the supreme court of the United States, refused the warrant, holding the proposed form of trial to be unconstitutional. Perhaps to a greater extent than in the case of any other conspicuous journalist, Mr. Dana's personality is identified in the public mind with the newspaper that he edits. He has recorded no theories of journalism other than those of common sense and human interest. He is impatient of prolixity, cant, and the conventional standards of news importance. Mr. Dana's first book was a volume of stories translated from the German, entitled "The Black Ant" (New York and Leipsic, 1848). In 1855 he planned and edited, with George Ripley, the "New American Cyclopædia." The original edition was completed in 1863. It has since been thoroughly revised and issued in a new edition under the title of "The American Cyclopædia" (16 vols., New York, 1873–'6). With Gen. James H. Wilson he wrote a "Life of Ulysses S. Grant" (Springfield, 1868). His "Household Book of Poetry, a collection of the best minor poems of the English language," was first published in 1857, and has passed through many editions, the latest, thoroughly revised, being that of 1884. He has also edited, with Rossiter Johnson, "Fifty Perfect Poems" (New York, 1883).

DANA, James, clergyman, b. in Cambridge, Mass., 11 May, 1735; d. in New Haven, Conn., 18 Aug., 1812. He was a nephew of Richard, and descendant through Caleb, second son of Daniel, who was the youngest son of Richard Dana. He was graduated at Harvard in 1753, and remained in the college as a resident graduate for several years, studying theology and general literature. In October, 1758, he was ordained and made pastor of the Congregational church in Wallingford, Conn., succeeding the Rev. Samuel Whittlesey. After he had accepted this call, the consociation prohibited his ordination; but the church and society, together with Mr. Dana, persisted in their action. Subsequently the consociation pronounced a sentence of non-communion against them, and declared the ministers and delegates of the ordaining council to be "disorderly persons, and not fit to sit in any of our ecclesiastical councils until they shall clear up their conduct to the satisfaction of the consociation of New Haven county." The controversy was essentially between the "Old-Light" and the "New-Light" parties. Mr. Dana was regarded as a partisan of the liberal school of Boston, and the ministers forming the consociation of New Haven were little disposed to have one of their prominent churches committed to the care of a pastor whom they considered as having departed so far from their own standard of Christian doctrine. Mr. Dana and the ordaining clergy then formed an association by themselves, which continued until about 1772, when the controversy was terminated by pacific overtures made by the ministers then constituting the consociation. It is evident that the ordination was a departure from the Saybrook platform, because the ordaining council was not limited to the consociation. It was tantamount to an assertion of independence of the church, in disregard of the platform. The members of the council were regarded as inclining to Arminianism. However, the prejudice against Mr. Dana gradually disappeared, and he made himself very popular by the decided stand that he took in favor of the American cause in the events that led to the Revolution. His patriotic sermons, delivered in New Haven while the legislature was in session, were effective in winning many to his support. In 1789 he became pastor of the first church in New Haven, and was installed on 29 April. Here he came into controversy with Jonathan Edwards and Samuel Austin; but, for the most part, his ministry was peaceful, though not eminently successful. He was succeeded in this pastorate by the Rev. Moses Stuart in 1805, but his relation was severed only by an ecclesiastical council. This procedure deeply wounded Dr. Dana, and thereafter he worshipped in the college chapel, although subsequent to Mr. Stuart's departure he again appeared in his old church and officiated as moderator at the installation of Dr. N. W. Taylor in April, 1812. The University of Edinburgh conferred on him the degree of D. D. in 1768. He published, besides memorial and other sermons, "Examination of Edwards on the Will," anonymous (Boston, 1770), and "An Examination of the Same Continued" (New Haven, 1773).—His son, **Samuel Whittlesey,** senator, b. in Wallingford, Conn., 13 Feb., 1760; d. in Middletown, 21 July, 1830, was graduated at Yale in 1775, and became a distinguished lawyer. He was elected to congress as a federalist, and, with subsequent re-elections, served from 3 Jan., 1797, till 1 May, 1810, when he was selected as U. S. senator to succeed James Hillhouse. He

remained in the senate until 3 March, 1821, and afterward made his home in Middletown, where for many years he was mayor.

DANA, James Dwight, mineralogist, b. in Utica, N. Y., 12 Feb., 1813. He was attracted to New Haven by the reputation of Prof. Benjamin Silliman, under whose guidance many of the subsequent leaders in American science received their earliest training. He was graduated in 1833 and appointed instructor of mathematics to midshipmen in the U. S. navy, and in this capacity visited the seaports of France, Italy, Greece, and Turkey while on the "Delaware" and the "United States." In 1836–'8 he was assistant in chemistry to Prof. Silliman. Meanwhile, in December, 1836, he was appointed mineralogist and geologist to the U. S. exploring expedition, then about to be sent by the government of the United States to the Southern and Pacific oceans under the command of Capt. Charles Wilkes. The expedition sailed in August, 1838, and Mr. Dana was on board the "Peacock" until it was wrecked on a sand-bar at the mouth of Columbia river. In June, 1842, after an absence of three years and ten months, Mr. Dana returned home. Besides the mineralogy and geology, he had under his supervision the zoölogical departments, including the crustacea and corals. During the thirteen years that followed he was occupied principally in studying the material that he had collected, making drawings, and preparing the reports for publication. From 1842 till 1844 he resided in Washington, and then removed to New Haven, where he married Henrietta Frances, third daughter of Prof. Silliman, and has since continued to reside. The results of his labors were given in his "Reports on Zoöphytes" (4to, with an atlas of 61 folio plates, 1846), in which he proposed a new classification, and described 230 new species; the "Report on the Geology of the Pacific" (4to, with an atlas of 21 plates, 1849); and the "Report on Crustacea" (4to, with an atlas of 96 folio plates, 1852–'4). These were published by the government in Washington, and only 100 copies of each were issued. With few exceptions, the drawings in the atlases were made by Mr. Dana himself. He was appointed Silliman professor of natural history and geology at Yale in 1850, and entered on the administrations of the chair in 1855. The subsequent delivery of the lectures on natural history by others led to a change in the title of the professorship, in 1864, to that of geology and mineralogy. Prof. Dana became, about 1850, associate editor of the "American Journal of Science and Arts," founded by the elder Silliman in 1819. Subsequent to the death of Prof. Silliman he became its senior editor, and now, in conjunction with his son, Edward S. Dana, continues its publication. In 1872 the Geological society of London conferred on him its Wollaston medal, and in 1877 he received the Copley gold medal from the Royal society of London. He is a member of scientific societies in the United States and abroad, including the Royal society of London, the Institute of France, the Royal academy of the Lincei of Rome, the Royal academies of Berlin, Vienna, and St. Petersburg, and was one of the original members of the National academy of sciences in the United States. Prof. Dana was elected president of the American association for the advancement of science in 1854, and in August of the following year delivered his retiring address at the Providence meeting. In 1872, on the celebration of the fourth centennial of the University of Munich, he received the degree of Ph. D., and in 1886, at the Harvard celebration, the degree of LL. D. was conferred upon him. His contributions to the "American Journal of Science and Arts," to the "Proceedings of the American Academy," to the "Transactions of the Lyceum of Natural History of New York," and to the "Proceedings of the Academy of Natural Sciences of Philadelphia," include hundreds of titles. His works in book-form are "System of Mineralogy" (New Haven, 1837; 5th ed., revised, New York, 1868); "Manual of Mineralogy" (New Haven, 1848; 4th ed., revised, New York, 1886); "Coral Reefs and Islands" (New York, 1853); "Manual of Geology" (Philadelphia, 1863; 3d ed., revised, New York, 1880); "Text-Book of Geology" (1864; 4th ed, revised, 1883); "Corals and Coral Islands" (New York, 1853); "The Geological Story briefly told" (1875).—His son, **Edward Salisbury,** mineralogist, b. in New Haven, Conn., 16 Nov., 1849, was graduated at Yale in 1870, where, in 1876, he received the degree of Ph. D., and has also studied in Heidelberg and in Vienna. In 1874 he became tutor in mathematics at Yale, and also curator of the mineral cabinet in the Peabody museum. He was appointed assistant professor of natural philosophy and astronomy in 1879, and in 1875 became one of the editors of Silliman's "American Journal of Science." Dr. Dana is a member of many scientific societies, and in 1884 was elected a member of the National academy of sciences. In 1885 he was made a trustee of the Peabody museum of Yale. Besides memoirs on mineralogical and kindred subjects, contributed to scientific journals in the United States and in Europe, he has published "Appendix II." (1875) and "Appendix III." (1883) of Dana's "System of Mineralogy"; "Text-Book of Mineralogy" (New York, 1877); and "Text-Book of Mechanics" (1881).



DANA, Joseph, clergyman, b. in Pomfret, Conn., 2 Nov., 1742; d. in Ipswich, Mass., 16 Nov., 1827. He was a grandson of Benjamin, the third son of Richard, the progenitor of all that bear the name in the United States, who, according to the family tradition, was the son of a French Huguenot that settled in England in 1629. Joseph was graduated at Yale in 1760, studied theology, and was ordained on 7 Nov., 1765, minister of the South society of Ipswich, over which he presided for sixty-two years. Many of his occasional discourses were published.—His grandson, **Israel Thorndike,** physician, b. in Marblehead, Mass., 6 June, 1827, studied under his father, Samuel, who was minister of Marblehead, and in the academy of that town, attended medical lectures at Harvard, was graduated M. D. in 1850, and during the three following years studied medicine in New York city, Dublin, and Paris. In 1853 he settled in Portland, and gave special attention to diseases of the heart and lungs. He was one of the founders of the Portland school of medical instruction, and of the

Maine general hospital, of which he has been attending physician since its opening in 1875. In 1860–'1 he was professor of materia medica, and in 1861–'9 of the theory and practice of medicine in the Medical school of Maine, connected with Bowdoin college. This chair he resumed in 1880. He has contributed to professional literature papers on the use of the stethoscope in determining the position of the fœtus in utero, on abortion, and on defective drainage and sewerage, and has published various addresses. He also prepared the articles on "Dropsy" and "Inflammation of the Intestines" in Wood's "Reference Hand-Book of the Medical Sciences." Sisters of Dr. Dana married Seth Ames, Jacob Abbott, and William R. Lawrence. Israel Thorndike was his uncle.—**Samuel,** nephew of Joseph, clergyman, b. in Cambridge (now Brighton), Mass., 14 Jan., 1739; d. in Amherst, N. H., 1 April, 1798, was graduated at Harvard in 1755, having among his classmates John Adams and Tristram Dalton, after which he studied theology. In 1761 the town of Groton invited him to become their minister "with a settlement of £200, a salary of £80, and firewood not to exceed thirty cords per annum." He accepted this call, and was installed on 3 June as successor to Caleb Trowbridge. During the troubles that preceded the Revolutionary war, believing that resistance would lead to greater evils than were then endured, he used his influence on the side of non-resistance. This course gave great offence to his parishioners, who prevented him from entering the meeting-house, although the whig committee of Groton published a card to the effect that Mr. Dana had fully atoned for his offences. The good will of his people had become alienated, and his dismissal soon followed. He continued to reside in Groton, where he cultivated a small farm, and in 1780 preached to a separate society. On the death of John Bulkeley, he became executor of his will, and, removing the extensive law library to his own residence, he studied for that profession. Subsequently he was admitted to the bar and practised in Amherst, N. H., where in 1787 he was made judge of probate for Hillsborough county, and in 1793 was state senator.—His son, **Samuel,** lawyer, b. in Groton, Mass., 26 June, 1767; d. in Charlestown, 20 Nov., 1825. He studied law, and became prominent in that profession in Charlestown, where he and Timothy Bigelow were professional and political rivals, Mr. Dana being a Jeffersonian democrat, and Mr. Bigelow a federalist. In his speeches at the bar he was smooth, gentle, and insinuating, as Mr. Bigelow was bold, rapid, and vehement. He filled various local offices, was a member of the Massachusetts senate, and its president for eight years, and served in congress from 22 Sept., 1814, till 3 March, 1815. Subsequently he received the appointment of chief justice of the circuit court of common pleas. —**James Freeman,** nephew of Samuel and grandson of Samuel, chemist, b. in Amherst, N. H., 23 Sept., 1793; d. in New York city, 14 April, 1827. He was graduated at Harvard in 1813, and at the medical department in 1817. He studied with Dr. John Gorham, and developed such ability that in 1815 he was selected by the authorities of Harvard to procure for the chemical laboratory a new outfit of apparatus. For this purpose he visited London, where for six months he worked in the laboratory of Friedrich Christian Accum. On his return to the United States he settled in Cambridge, where he practised medicine and was appointed assistant to the chair in chemistry. In 1817 he was invited to lecture on chemistry at Dartmouth, and in 1820 became the first professor of chemistry and mineralogy in that institution. He was chosen professor of chemistry in the College of physicians and surgeons in New York in 1825, and continued as such until his death. While a student in Cambridge, he received the Boylston prize for a dissertation on the "Tests for Arsenic," and again in 1817 received the same prize for an essay on the "Composition of Oxymuriatic Acid." He contributed numerous scientific memoirs to Silliman's "American Journal of Science" and to the "Annals of the New York Lyceum of Natural History." His larger works are, with his brother, "Outlines of Mineralogy and Geology of Boston and its Vicinity" (Boston, 1818), and "Epitome of Chemical Philosophy" (Concord, N. H., 1825).—His brother, **Samuel Luther,** chemist, b. in Amherst, N. H., 11 July, 1795; d. in Lowell, Mass., 11 March, 1868. He studied at Phillips Exeter academy, and was graduated at Harvard in 1813. Desirous of becoming a military engineer, he applied for an appointment to the U. S. military academy, but instead was commissioned a lieutenant in the 1st artillery. He served during the war in New York and Virginia, and at its close resigned from the army. Subsequently he studied medicine, and was graduated at Harvard medical school in 1818. From 1819 till 1826 he practised in Waltham, Mass., where he was brought into intimate relations with the early cotton manufacturers of the state, and his fondness for physical science determined him to devote his attention to chemistry as applied to the manufacture and coloring of cotton goods. About 1826 he established a laboratory in Waltham for the manufacture of sulphuric acid and bleaching-salts, which afterward was merged in the Newton chemical company, and he was its chemist until 1834. In 1833 he visited Europe, and spent some time in England prosecuting chemical investigations. On his return he removed to Lowell, where he became resident and consulting chemist to the Merrimack manufacturing company, and continued as such until his death. His investigation in the bleaching of cotton led to the invention of the so-called "American system" of bleaching, which attracted much attention abroad when first published in 1838 in the "Bulletin de la société industrielle de Mulhouse." Many other important improvements in the printing of cottons and the chemical processes involved in that work were made by him, and gave to the goods produced in Lowell a high reputation in the United States. His researches on the action of cow-manure as a mordant, showing that its fixing properties are due to the sodium phosphate that it contains, with the subsequent introduction of "substitutes," was a decided advance in the art of calico-printing. Dr. Dana prepared for the city of Lowell a valuable report on the injurious influence of lead pipes for water used for drinking and culinary purposes. His interest in this subject led him subsequently to translate from the French a "Treatise on Lead Diseases." He contributed many papers on technical topics to the "North American Review" and Silliman's "American Journal of Science," and, in conjunction with his brother, James Freeman Dana, he published "Outlines of Mineralogy and Geology of Boston and its Vicinity" (Boston, 1818). His other works include "Chemical Changes occurring in the Manufacture of Sulphuric Acid" (1833), and his investigations in chemistry applied to agriculture led to the publication of "Muck Manual for Manures" (Lowell, 1842), for which he received a prize from the Massachusetts society for promoting agriculture, and also an "Essay on Manures" (New

York, 1843). Prof. Benjamin Silliman, Jr., wrote of him: "In point of time, originality, and ability, Dr. Dana stood deservedly first among scientific writers on agriculture in the United States."—**Napoleon Jackson Tecumseh,** nephew of Samuel Luther and James Freeman, soldier, b. in Fort Sullivan, Eastport, Me., 15 April, 1822. He was graduated at the U. S. military academy in 1842, and, after being appointed in the 7th infantry as second lieutenant, served on garrison duty in the southwest. During the Mexican war he served with distinction, and was present at many of the important engagements, being severely wounded in storming the intrenchments at the battle of Cerro Gordo. He became captain on the staff and assistant quartermaster in March, 1848, and until 1855 served in garrison duty, principally in Minnesota. From 1855 till 1861 he was a banker in St. Paul, Minn., and was brigadier-general of the militia from 1857 till 1861. During the civil war he accompanied the 1st Minnesota infantry as colonel to the front, becoming brigadier-general of volunteers in February, 1862, and attached to the Army of the Potomac. He served in the battles before Richmond, and at Antietam commanded a brigade in Gen. John Sedgwick's division of Gen. Edwin V. Sumner's corps, and was severely wounded. He was commissioned major-general of volunteers in November, 1862, and was in command of the defences of Philadelphia during the invasion of Pennsylvania by the Confederate army in 1863. Afterward he joined the Army of the Gulf, and commanded the expedition by sea to the Rio Grande, landing at Brazos Santiago, and driving the Confederate forces as far as Laredo, Texas. He then successively commanded the 13th army corps, the district of Vicksburg, the 16th army corps, the districts of west Tennessee and Vicksburg, and finally the Department of the Mississippi. In May, 1865, he resigned from the army and engaged in mining operations in the western states. From 1866 till 1871 he was general agent of the American-Russian commercial company of San Francisco, in Alaska and Washington, after which he became superintendent of railroads in Illinois, and in 1878 of the Chicago, Burlington, and Quincy railroad.

DANA, Judah, senator, b. in Pomfret, Conn., 25 April, 1772; d. in Fryeburg, Me., 27 Dec., 1845. His mother was the eldest daughter of Gen. Israel Putnam. His father, John Winchester, and the Rev. Joseph, of Ipswich, were both grandsons of Benjamin, the third son of Richard. He was graduated at Dartmouth in 1795, studied law, and began practice, in 1798, in Fryeburg, then in Massachusetts. He was government attorney for Oxford county in 1805–'11, judge of probate in 1811–'22, judge of the court of common pleas from 1811 till 1823, judge of the circuit court, a delegate to the convention that framed the state constitution of Maine in 1819, and in 1833 was elected a member of the executive council. He was an adherent of the democratic party, and, on the resignation of Ether Shepley, was appointed U. S. senator, serving from 21 Dec., 1836, till 3 March, 1837.—His son, **John Winchester,** governor of Maine, b. in Fryeburg, Me., 21 Jan., 1808; d. near Rosario, New Grenada, 22 Dec., 1867. He was for many years an active democratic politician in Maine, and from 1847 till 1850 was governor of the state. In 1853 he went to Bolivia as chargé d'affaires, was commissioned minister resident on 29 June, 1854, and held that post till 10 March, 1859. In 1861 he was again a candidate for governor of Maine, but was defeated. Soon afterward he went to South America, where he resided at the time of his death.

DANA, Stephen Winchester, clergyman, b. in Canaan, N. Y., 17 Nov., 1840. He was the son of a Congregational clergyman, and descended in the eighth generation from Richard, through Benjamin, the third son. He was graduated at Williams in 1861, taught in Hinsdale, Mass., for two years, and then studied theology in the Union theological seminary, New York city, where he was graduated in 1866. He was pastor of a Presbyterian church in Belvidere, N. J., from November, 1866, till July, 1868, when he was called to the Walnut street church in West Philadelphia, which has steadily grown under his pastoral care and earnest preaching. He has published sermons and religious tracts. —His cousin, **William Parsons,** artist, b. in Boston, Mass., 18 Feb., 1833, was attracted to a sailor's life, and made several voyages, then decided to study art, went to Paris in 1852, became a pupil of Picot and Le Poitevin and a student in the School of arts, and spent his summers sketching in Normandy and Brittany. He returned to the United States in 1862, was chosen a national academician in 1863, painted in New York city and Newport, and afterward established his studio in Paris, France. His first pictures were marine views, but subsequently he treated genre subjects with success, and has been happy in painting children, horses, and dogs. Some of his principal works are "Chase of the Frigate Constitution"; "Waiting for the Fishing-Boat"; "Low Tide at Yport"; "French Peasant-Girl"; "Maternal Care"; "Heart's-Ease"; "Emby's Admirals"; "Land of Nod"; "English Greyhound"; and "Gathering Seaweed."

DANA, Richard, jurist, b. in Cambridge, Mass., 7 July, 1699; d. 17 May, 1772. He was the third son of Daniel, who was the son of Richard, who came from England, settled in Cambridge in 1640, and died there about 1695. He was graduated at Harvard in 1718, studied law, practised in Marblehead and Charlestown, and then removed to Boston and became one of the leaders of the bar of Massachusetts. During the critical period that preceded the Revolution he took a prominent part in the protests against the new and oppressive taxes imposed by the British parliament and the appointment of highly paid crown officials, and was a leader in the popular resistance to the usurpations of the British government. He occasionally presided over the Boston town-meetings between 1763 and 1772, was chairman of the committee chosen by the town in 1765 to give instructions to the representatives in the general court with reference to the stamp-act and other new taxes, for the collection of which revenue officers had been sent over from England, and reported the instructions to the representatives of Boston on 20 Nov., 1767, and 8 May, 1770. He was a member of the association of the Sons of Liberty, and at the meeting of 17 Dec., 1769, administered to Andrew Oliver, secretary of the province, an oath binding him not to execute the stamp-act. After the British soldiery fired on the people in the night of 5 March, 1770, he was appointed on a committee to investigate the incidents of the massacre and the order in which they occurred. He took depositions of respectable citizens who had heard threats from the soldiers some days previous to the tragedy, and who swore that the soldiers under Capt. Preston attacked the citizens with violence; that after some of the latter had been struck, young men and boys returned abusive language, and some threw snowballs and pieces of ice at the soldiers; that these fired into the crowd, killing and mortally wounding several persons, when there was no danger to themselves; and that therefore the firing could not have been in self-

defence, and was unjustifiable. (See ATTUCKS, CRISPUS.) Mr. Dana was at one time during the ante-Revolutionary crisis a representative from Boston in the assembly, but he generally declined office, devoting himself exclusively to his profession, except when the call of patriotism impelled him to take a public stand in the cause of liberty. The letters of leading patriots contain mention of him as a man of great value in the movement, and of his death as a serious loss to the cause. He was at the head of the Boston bar, and is more frequently cited in Judge Story's work on American precedents than any other pleader except Judge Trowbridge, whose sister he married in 1737.—His son, **Francis,** jurist, b. in Charlestown, Mass., 13 June, 1743; d. in Cambridge, Mass., 25 April, 1811, was graduated at Harvard in 1762, studied law with Edmund Trowbridge, then regarded as the ablest lawyer in the province, was admitted to the bar in 1767, and practised in Boston. He devoted himself early to the cause of colonial rights and popular liberty, joined the associated Sons of Liberty, in whose discussions he took a leading part, and became an active whig. In 1769 he was counsel in the famous Lechmere slave case. In 1773 he was associated with John Adams in the prosecution in behalf of the Rhode Island patriots in the matter of the Rome and Moffatt letters. When Gov. Hutchinson sailed on 1 June, 1774, the Boston bar sent an address to the retiring governor, which Dana, though one of the youngest of them, opposed with vigor. In September, 1774, he was the delegate from Cambridge to the 1st provincial congress of Massachusetts. In the beginning of April, 1775, he sailed for England (where his brother Edmund was settled as a minister at Wroxeter), bearing confidential letters on the critical state of colonial feeling from Josiah Quincy, Joseph Warren, Dr. Samuel Cooper, and other patriots. Through his brother, who was allied by marriage with the Kinnaird and Pulteney families, he came in contact with persons of political influence in England, and in April, 1776, after his return, he informed Washington that there was no reason to expect peace from Britain. While in England he became acquainted with Dr. Richard Price, and furnished him with information which he embodied in his work in defence of the colonies (London, 1776). In May, 1776, he was chosen by the Massachusetts assembly a member of the executive council, which united executive with legislative functions, and was re-elected annually until 1780. In November, 1776, he was chosen a delegate from Massachusetts to the continental congress, and took part in framing the articles of confederation, and was again sent to the congress of 1778, and made chairman of the committee charged with the reorganization of the army. He remained in the camp at Valley Forge with Joseph Reed, Gouverneur Morris, and other members of the committee from January till April, 1778, and, in consultation with Gen. Washington, drew up the plan of annual drafts that was submitted to congress, and returned to the commander-in-chief on 4 June, with directions that he should proceed with it, with the advice and assistance of Messrs. Reed and Dana, or either of them. He served with Gouverneur Morris and William H. Drayton on the committee to which Lord North's conciliatory bills were referred in 1778, on whose report these overtures were unanimously rejected, and the intended effect of the peace commission frustrated. Gov. Johnstone, with whom he had become acquainted in England, was one of the commission, and wrote to him in the hope of securing his co-operation. This letter, with others received by Reed and Robert Morris, was transmitted to congress on 18 July. On 29 Sept., 1779, Mr. Dana was appointed secretary to the embassy of John Adams, who was appointed commissioner to negotiate treaties of peace and commerce with Great Britain. He sailed with Mr. Adams, on 13 Nov., 1779, in the French frigate "Sensible." They landed at Ferrol, Spain, and reached Paris 9 Feb., 1780. When Adams, in consequence of a diplomatic quarrel with Vergennes, left Paris for Amsterdam on 27 July, Dana remained in Paris until the commission of congress (to Mr. Adams, and eventually to himself, to raise loans in Europe) reached him on 12 Sept. He then joined Adams in Amsterdam, and remained with him till December. Returning to Paris, he received, on 15 March, 1781, a commission from congress as minister to the court of St. Petersburg, having been appointed to that post on 18 Dec., 1780. He remained with Mr. Adams in Holland from April till 7 July, when he left for St. Petersburg, journeying by way of Frankfort and Berlin. He resided at the Russian court two years, where he had frequent and friendly communications with Count Ostermann, the foreign minister, but was unable to secure the recognition of the independence of the United States. When, even after the signature of the preliminaries of peace, the government of the Empress Catherine still refused to receive him as an accredited minister of an independent and friendly power, he asked for his leave from congress, and departed from St. Petersburg on 4 Sept., 1783, sailing direct to Boston, where he arrived in December. In February, 1784, he was elected by the assembly a delegate to the continental congress, took his seat on 24 May, and was appointed to represent Massachusetts on the committee of the states, which was vested with some of the powers of congress during the recess, and continued in session till 11 Aug. On 18 Jan., 1785, Gov. Hancock appointed him a justice of the supreme court of Massachusetts. On 29 Aug., 1786, he was elected a delegate to the Annapolis convention, which fixed the time and place for the Federal convention of 1787 that adopted the constitution of the United States. He was also elected a delegate to this body on 9 April, 1787, but was prevented from attending by his judicial duties and the state of his health, which had been impaired by his residence in St. Petersburg. He was chosen a member of the Massachusetts state convention that met in January, 1788, to ratify the Federal constitution. In that body, on whose decision depended the fate of the Federal constitution, a majority of the members were at first opposed to the new form of government. Judge Dana labored to secure the ratification of the constitution with John Hancock, Theophilus Parsons, and others, and aided in obtaining a majority for its adoption on 6 Feb., 1788. On 29 Nov., 1791, after the death of Judge Sargent, he was appointed chief justice of Massachusetts, and held that office for fifteen years, during which he took no part in political affairs, except as a presidential elector in 1792 and 1800. On 5 June, 1797, President Adams appointed him a special envoy to the French republic, with Cotesworth Pinckney and John Marshall; but he was compelled, by the precarious state of his health, to decline the office, which was then given to Elbridge Gerry. He retired from the bench in 1806, and was succeeded by his friend, Theophilus Parsons. He vigorously opposed Jefferson's embargo in public speeches at Cambridge, but seldom took part after that in public discussions. He was one of the founders of the American academy of arts and sciences, and interested

himself in enterprises for the benefit of the neighborhood of Boston. After his retirement he was frequently visited at his house by the old leaders of the Federal party who had been his associates in political life, and entertained the younger literary society of Cambridge. Judge Dana possessed a large fortune, chiefly in lands. He was a typical representative of the Federal gentry of New England, who looked upon themselves as the guardians of the people, and sought to preserve distinctions of birth and station. He possessed a high sense of honor and of public duty, was ardent and passionate in temperament, intolerant of timid or temporizing measures, of an active and energetic character, remarkable for his nervous and impressive eloquence, an acute and learned jurist, and an austere and dignified magistrate. —**Richard Henry,** son of Francis, b. in Cambridge, Mass., 15 Nov., 1787; d. in Boston, 2 Feb., 1879, entered Harvard in the class of 1808, but took part in an insurrection of his class against the faculty, known as the "Rotten Cabbage Rebellion," in 1807. The memory of this disturbance is still commemorated in the name of the "Rebellion tree," standing on the college grounds. As a consequence of his revolt, he failed to complete his college course, although an excellent scholar; but fifty-eight years later he received his degree as of 1808. Removing to Newport, R. I., he continued his studies there for two years, then entered the law-office of his cousin, Francis Dana Channing, at Boston, and afterward went to Baltimore, Md., to familiarize himself with Maryland practice in the office of Robert Goodloe Harper. He was admitted to the Massachusetts bar in 1811, and settled in Cambridge, where he engaged in politics on the Federal side, and became a member of the legislature. In 1814 he joined the Anthology club, an association of gentlemen in Cambridge and Boston, including William Tudor, John Quincy Adams, and others, who had for some time conducted "The Monthly Anthology," an unsuccessful magazine. They now projected and began to issue "The North American Review," the first number of which appeared in May, 1815. Mr. Dana's first publications appeared in that periodical; among them were an "Essay on Old Times," and a criticism of Hazlitt's "Lectures on the English Poets," in which the writer boldly ventured to dispute the English critic's opinions. He also gave cordial recognition to Wordsworth's poems, an act of temerity which, in the then reigning taste for Pope, brought condemnation upon him. His association with Prof. E. T. Channing in the editorship of the "Review" was brought to a close in 1821. In 1821–'2 he published in New York, in six numbers, with the aid of contributions from Bryant and Allston, "The Idle Man," a miscellany of stories, essays, criticisms, and poems, which had marked literary merit, but received little encouragement from the public, and was discontinued. His first poem, "The Dying Raven," written when he was thirty-eight years old, appeared in the "New York Review," then edited by Bryant. He brought out his first volume of "Poems" in Boston in 1827, which was well received by the critics and found a limited audience. Prof. John Wilson, in "Blackwood's

Richd H. Dana

Magazine," said of the leading poem: "We pronounce it by far the most powerful and original of American poetical compositions." In 1833 "Poems and Prose Writings" (Boston) was issued, containing additional poems and Dana's own contributions to "The Idle Man." A portion of this was republished in London in 1844 as "The Buccaneer, and other Poems." Although his father had been a Unitarian, the son joined the Congregationalists in 1826, and wrote vigorously against Dr. Channing in "The Spirit of the Pilgrims" during the Trinitarian agitation in New England from 1825 till 1835. Subsequently he became an Episcopalian. In 1850 he brought out a new edition of "Poems and Prose Writings" in two volumes, including his essays and literary papers from the "North American Review," forming a complete collection of his works. His further literary efforts were confined to a course of lectures on Shakespeare, which he delivered in Boston, New York, and Philadelphia, in 1839–'40. The larger part of his career was spent in retirement from literary work, at his country-seat on Cape Ann (see illustration), and in Boston. For the first fifty years of his life he was an invalid, but after this his health began to mend, and for a number of years he was not only physically well, but maintained an intellectual vigor that remained unimpaired until within a few days of his death at the age of ninety-two. He had lived through the whole history of the United States under the constitution, and distinctly remembered the death of Washington. He was the last of his generation to achieve success in both prose and verse, and won high rank among the most vigorous American authors of the first half of the present century. He never became a popular writer, and his poetry is now little read; but it evinced decided qualities of imagination, reflection, and independence, without any noticeable gift of melody. His prose stories, "Tom Thornton" and "Paul Felton," are gloomy in tone, but show vivid imagination and contain brief passages of great excellence. His essay on Kean's acting, in "The Idle Man," and other of his critical essays, prove that he possessed a delicate, firm faculty of original criticism which, at the time when he wrote, was rare in the United States; and his place in the history of our literature should be measured by the important service that a mind like his was able to render in the general cultivation of public taste during the formative period. See "Homes of American Authors"

(New York, 1855), and "Bryant and his Friends" (1886).—His son, **Richard Henry,** lawyer, b. in Cambridge, Mass., 1 Aug., 1815; d. in Rome, Italy, 7 Jan., 1882. In early life, as he assured the writer, he had a strong passion for the sea, and, had he consulted his inclination only, he would have entered the American navy. But, influenced by his father and other members of the family, he became a student of Harvard university. Here he was exposed to one of those difficulties which college faculties put in the way of students by their mismanagement, and Dana, like his father, was rusticated. Returning to Harvard, he was compelled to suspend his studies by an affection of the eyes, finally graduating in 1837. In the mean time, for a remedy, recalling his early love of the sea, he resolved to rough it on a Pacific voyage as a sailor, although he had, of course, every facility for ordinary travel. He accordingly shipped before the mast as a seaman on the brig "Pilgrim," of Boston, for a voyage round Cape Horn to the western coast of North America. During the cruise Dana performed with cheerfulness and spirit the duties of a common sailor, which he has charmingly described in his well-known work, "Two Years Before the Mast." The manuscript was sent, in 1839, by the elder Dana to Bryant, who offered it to various New York publishers, and at last, although he said it was as good as "Robinson Crusoe," sold it to the Harpers for $250. The work was issued in the following year. It was immediately successful, passing through numerous editions, being reprinted in England, where the Board of admiralty adopted it for distribution in the navy, and translated into several continental languages. This personal narrative of a sailor's life at sea is probably the most truthful and accurate work of its character ever published. "In reading it," says Mr. Whipple, "anybody can see it is more than an ordinary record of a voyage, for there runs through the simple and lucid narrative an element of beauty and power which gives it the charm of romance." The work was republished in 1869, with an additional chapter giving an account of a second visit to California, and some of the persons and vessels mentioned in the original edition. Mr. Dana studied law under Judge Story, and was admitted to the bar of Massachusetts in 1840, speedily attaining eminence as an advocate. In 1841 he published a work on sea-usages and laws, under the title of "The Seaman's Friend," which has been reprinted in England as the "Seaman's Manual," and in 1859 an account of a vacation trip, entitled "To Cuba and Back" (Boston). He occasionally contributed to the "North American Review," the "Law Register," and the "American Law Review," and he prepared biographical sketches of his kinsmen, Prof. Edward Channing and Washington Allston. During the years 1859–'60 Mr. Dana made a tour round the world. Six years later, by request of the family of the late Henry Wheaton, he engaged in the preparation of a new edition of Wheaton's "International Law" (Boston, 1866), bringing up that standard work from 1848, when Mr. Wheaton died, to the time of the publication of the revised book. This task, which in many respects Mr. Dana performed successfully, entailed upon him much subsequent trouble. Some of his original annotations were regarded with particular favor, and his note on the neutrality laws of the United States and Great Britain was translated, by order of our government, to be used by the arbitrators in 1872. In 1866 Mr. Dana received the degree of LL. D. from Harvard college, and he lectured on international law in the Cambridge law-school in 1866–'7. He ran against Gen. Butler in the Essex district in 1868, and was defeated. This act on his part also led to subsequent annoyance. In March, 1876, Gen. Grant nominated Mr. Dana minister to England as successor to Gen. Schenck. At first there was no thought of any opposition, and it was regarded by the public with peculiar favor, but personal and private feelings soon began to exercise their influence. Great opposition to his confirmation arose chiefly through the exertions of Gen. Butler, who had not forgotten Mr. Dana's canvass against him as a candidate for congress, and of William Beach Lawrence, who charged that Mr. Dana had pirated the notes of his edition of "Wheaton's International Law." It is unnecessary to review the dreary details of this literary controversy. Mr. Dana complained that the charges against him were made *ex parte* before the senate committee, while he was denied any opportunity of defence. The nomination Gen. Grant utterly refused to withdraw. The result was that it was rejected by a vote of thirty-one to seventeen. The controversy continued to rage even after the rejection, and attracted some notice abroad, several London journals characterizing the affair as "a paltry intrigue." It is sufficient to say that if Mr. Dana erred in the matter, he did so unintentionally. He undoubtedly felt the indignity as deeply as it would be possible for any man to feel it, and if he unwittingly did Mr. Lawrence any wrong, he paid the penalty. In 1878 Mr. Dana went abroad for the purpose of pursuing his studies of international law, his intention being to publish an exhaustive work on that subject. He spent much time in Paris, and near the close of 1881 visited Rome. He joined a merry Christmas party of American friends, was taken ill the following day, and died of pneumonia, 7 Jan., 1882. Two days later the beautiful American Episcopal church in the Via Nationale was crowded with his countrymen, assembled to attend his funeral services. His remains were interred in the Protestant cemetery at Porte Pia, near those of the poets Keats and Shelley, and a monument has since been erected to his memory. Mr. Dana was a representative of the best culture of his native state, and had acquired a permanent reputation on both sides of the Atlantic. He had taken part in many of the most conspicuous litigations of the last half-century, and it is perhaps not too much praise to place him among the great lawyers of the land. His death, following closely on that of Mr. Lawrence, deprived the restricted circle of American writers on international law of their most brilliant leaders. As a diplomate he would doubtless have acquitted himself with as much success as those other men of Massachusetts —Everett, Abbott Lawrence, Adams, Motley, and Lowell—who represented the United States at the court to which he was appointed. Dana never had an opportunity of being known in the national councils of the country. Had he obtained a seat

Richd. H Dana Jr

in the senate, he would have met there few men who were his superiors in knowledge of public affairs, in comprehension of the principles of statesmanship, or in the ability to engage in their discussion.—**Richard Henry,** son of the preceding, b. in Cambridge, Mass., 3 Jan., 1851, was graduated at Harvard in 1874, being chosen class orator, and at Harvard law-school in 1877. In that year he received from President Hayes the nomination of secretary of legation at London, but declined the office. He married Miss Edith Longfellow, second daughter of Henry Wadsworth Longfellow, the poet, 6 Jan., 1878. While continuing the practice of law, he has been a regular contributor to the "Civil Service Record," besides writing occasionally for the press on questions of political reform.—Another son of Richard Henry, **Edmund Trowbridge,** b. in Cambridge, Mass., 29 Aug., 1818; d. there, 18 May, 1869, was graduated at the University of Vermont in 1839, and at Cambridge law-school in 1841. Subsequently he practised in partnership with his brother, Richard, in Boston for several years, when failing health compelled him to reside in Europe, where he continued his studies, devoting special attention to Roman civil law, and to history and philosophy in their bearings upon law. In 1854 he received the degree of J. U. D. from the University of Heidelberg, and returned to the United States two years later. He wrote occasionally for periodicals, and attempted the translation of the works of Von Mohl and other eminent German jurists.

DANE, Nathan, jurist, b. in Ipswich, Mass., 27 Dec., 1752; d. in Beverly, Mass., 15 Feb., 1835. He was graduated at Harvard in 1778, and, after studying law, was admitted to its practice and settled in Beverly. His acquirements made him a safe and able counsellor, and with his large and diversified experience he became one of the most prominent lawyers of New England. He entered at once into political life, and from 1782 till 1785 was a member of the Massachusetts legislature. In 1785 he was a delegate to the continental congress, and was continued as such by re-election until 1788. During his career in the national legislature he rendered much efficient service by his work on committees, and was the framer of the celebrated ordinance passed by congress in 1787 for the government of the territory northwest of the Ohio. It was adopted without a single alteration, and contains the emphatic statement "that there shall be neither slavery nor involuntary servitude in the said territory." He also incorporated in this ordinance a prohibition against all laws impairing the obligation of contracts, which the convention that formed the constitution of the United States a few months afterward extended to all the states of the Union by making it a part of that constitution. In 1790 he was elected to the Massachusetts senate, and again elected in 1794 and 1796. He was appointed judge of the court of common pleas for Essex county in 1794, but, after taking the oath of office, almost immediately resigned, and in 1795 was appointed a commissioner to revise the laws of the state. In 1811 he was delegated to revise and publish the charters that had been granted in Massachusetts, and in 1812 was selected to make a new publication of the statutes. During the same year he was chosen a presidential elector. He was a delegate to the Hartford convention in 1814, and also to the Massachusetts constitutional convention in 1820, but declined serving on account of deafness. For fifty years he devoted his Sundays to theological studies, excepting during the hours of public worship, reading generally the Scriptures in their original languages. In 1829 he gave $10,000, which he increased by $5,000 in 1831, for the foundation of the Dane professorship of law in Harvard law-school, requesting that his friend, Judge Joseph Story, should occupy the chair, which he did until his death. He published "A General Abridgment and Digest of American Law" (9 vols., Boston, 1823–'9), and "Appendix" (1830).

DANELS, John Daniel, soldier, b. in Baltimore, Md., in 1786; d. there in 1856. He became a captain in the Colombian navy in 1818, and served the republican cause in South America as commander of a squadron, by fitting out vessels, and by his credit as a rich man. When the Republic of Colombia was established, he returned to the United States, and gave up his claims for money due for his services, for supplies provided by him for the Revolution of 1818, for expenses incurred by his three ships in the blockade of Cumana in 1821, for the use of his three ships in the blockade of Puerto Cabello and in guarding La Guayra, and for the expenses of a journey to the United States to raise funds for the sloop-of-war "Bolivar." The executive power of Colombia gave him a vote of thanks, and the congress of Venezuela in 1845 decreed that his name should have an honorable place as captain of the navy in the military list of the republic.—His son, Simon Bolivar Daniel Danels, was consul for Venezuela, stationed at Baltimore, Md., for many years.

DANENHOWER, John Wilson, arctic explorer, b. in Chicago, Ill., 30 Sept., 1849. He received his early education in the common schools of Chicago and Washington, entered the U. S. naval academy in 1866, was graduated in 1870, commissioned as ensign, 12 July, 1871, as master, 27 Sept., 1873, and as lieutenant, 2 Aug., 1879. He served on a surveying expedition in the North Pacific in the "Portsmouth" in 1873–'4, took part in suppressing an insurrection in Honolulu, Hawaii, in 1873, and served on board the "Vandalia" during Gen. Grant's visit to Egypt and the Levant. In 1878 he joined the arctic steamer "Jeannette" at Havre, France, and made the voyage to San Francisco, and thence through Bering straits into the Arctic ocean. The expedition left San Francisco, 8 July, 1879, under command of Lieut. George W. De Long. The vessel was beset in the ice-pack for twenty-two months. Lieut. Danenhower, who was second in command, suffered severely from ophthalmia, and was confined in a dark room most of the time. From the place where the steamer was crushed the party made a retreat for ninety-five days over the ice, dragging the ship's boats, and then sailed in the three boats, but were separated by a gale. The boat that Lieut. Danenhower commanded reached the Lena delta, where the crew were rescued by Tunguses. After landing, 17 Sept., 1881, while waiting for the return of native messengers sent to Bulun, Danenhower made an ineffectual search on the delta for the crews of the other boats. With his crew he made the journey of 6,000 miles to Orenburg, leaving Engineer Melville to continue the search for the captain and his party, and arrived in the United States in June, 1882. He has published "The Narrative of the Jeannette" (Boston, 1882).

DANFORTH, Charles, inventor, b. in Massachusetts about 1797; d. in Paterson, N. J., 22 March, 1876. He was educated and spent his early life in New England, where he invented in 1824 a counter-twister, spinning-speeder, and a throstle-frame. These inventions he successfully introduced, both in the United States and in England. Later he settled in Ramapo, N. Y., and there in-

vented his cap spinning-frame, and also a bobbin and flyer. About 1830 he removed to Paterson, N. J., where he induced the firm of Godwin, Rogers & Co. to manufacture his spinners, and this led to a large business, which in time embraced other forms of machinery. Mr. Danforth acquired an interest in the firm, which became Charles Danforth & Co., and later a stock company with the title of the Danforth Locomotive and Machine Company, of which he was president. He amassed a large fortune, and at the time of his death was considered more familiar with the details of cotton-spinning and manufacturing machinery for that purpose than any other person in the United States.

DANFORTH, George Franklin, jurist, b. in Boston, Mass., 5 July, 1819. He was graduated at Union in 1840, and, after studying law, began practice in Rochester, N. Y., where he was eminently successful, and soon rose to the front rank of the profession. In 1876 he was the republican candidate for judge of the court of appeals of the state of New York, but was defeated by Robert Earl. Two years later he was again nominated for a similar office, and after being elected took his seat on the bench, 1 Jan., 1879.

DANFORTH, Joshua Noble, clergyman, b. in Pittsfield, Mass., 1 April, 1798; d. in New Castle, Del., 14 Nov., 1861. He was graduated at Williams in 1818, and spent two years at the Princeton theological seminary. After being ordained by the New Brunswick presbytery, on 30 Nov., 1825, he was installed pastor of the church in New Castle, Del., where he remained until 1828, when he accepted a call to Washington. In 1832–'4 he was agent of the American colonization society, from 1834 till 1838 pastor of the Congregational church in Lee, Mass., and then for fifteen years in charge of the 2d Presbyterian church in Alexandria, Va. In 1860 he again accepted an agency for the American colonization society. Dr. Danforth received in 1855 the degree of D. D. from Delaware college. He contributed largely to the religious and secular press, and wrote "Gleanings and Groupings from a Pastor's Portfolio" (New York, 1852).

DANFORTH, Moseley Isaac, engraver, b. in Hartford, Conn., 7 Dec., 1800; d. in New York city, 19 Jan., 1862. He became a pupil of the Hartford graphic company in 1818, where he acquired a knowledge of bank-note engraving, and three years later settled in New Haven. Here he executed a plate after Raphael Morghen's engraving of the "Parce somnum rumpere," which was so well done that the publisher refrained from printing it for years, intending to dispose of the proofs as genuine Morghens. Subsequently he came to New York and studied drawing, meanwhile continuing the practice of his art. He was one of the founders of the New York drawing association in 1825, and in January, 1826, of the National academy of design. His large, full-length engraving of "Lafayette" was completed at this time, and secured him a cordial welcome by the artists of London on his arrival in England in 1827. For ten years he resided in London, studying in the Royal academy, where his drawings from the Elgin marbles were much admired, and enjoying the friendship of Thomas Lawrence, Charles R. Leslie, Stewart Newton, and David Wilkie. Several of his best-known engravings were made during this period, including the "Sentry-Box" after Leslie, portraits of Washington Irving and Sir Walter Scott by the same artist, and "Don Quixote," although most of his work while in London seems to have been given to smaller plates for books. On his return to New York he engraved vignettes for bank-notes, and subsequently became partner in a bank-note engraving firm, which in 1858 was merged in the American bank-note company, of which corporation he was vice-president at the time of his death. His work was characterized by extraordinary finish and exquisite delicacy of tint.

DANFORTH, Thomas, colonial governor, b. in Framlingham, Suffolk, England, in 1622; d. in Cambridge, Mass., 5 Nov., 1699. He was the eldest son of Nicholas Danforth, and came with his father and brother, Samuel, to New England in 1634. Soon after his arrival in this country he acquired great influence in the management of public affairs. Bancroft speaks of him as the probable author of the report on natural and chartered rights, made by Simon Bradstreet, Increase Mather, John Norton, and others, in 1661. From 1659 till 1678 he was an assistant under the Massachusetts government, becoming in 1679 deputy governor. In the latter year he was elected president of the province of Maine, then independent of the colony of Massachusetts. He opened his court at York, and granted several parcels of land. The offices of deputy governor and president were held by him until the arrival of Sir Edmund Andros in 1688. Meanwhile he had also been made a judge of the superior court, and in 1681, with Daniel Gookin, Elisha Cooke, and others, opposed the acts of trade and asserted the charter rights of the country. During the witchcraft delusion in 1692 he showed his correctness of judgment by the firmness with which he condemned the proceedings of the court.—His brother, **Samuel,** clergyman, b. in Framlingham, Suffolk, England, in September, 1626; d. in Roxbury, Mass., 19 Nov., 1674, was graduated in 1643 at Harvard, where he was at once appointed a tutor and the second fellow. In 1641 he was invited by the Rev. Thomas Welde to become—with the Rev. John Eliot, whose numerous missionary engagements interfered with his ministerial labors—colleague pastor of the church in Roxbury. The call was accepted, and he was ordained on 24 Sept., 1650, and continued with this congregation until his death. His sermons were elaborate, judicial, and methodical. He showed great interest in astronomy, publishing a number of almanacs, and also "An Astronomical Description of the Comet of 1664," in which he maintained that a comet was a heavenly body moving in accordance with divine laws, and that the appearance was indicative of approaching misfortunes. His other publications are "An Election Sermon" (1670) and "The Cry of Sodom Inquired into, upon occasion of the Arraignment and Condemnation of Benjamin Goad for his Prodigious Villanies" (1674).—**John,** son of Samuel, clergyman, b. in Roxbury, Mass., 8 Nov., 1660; d. in Dorchester, 26 May, 1730, was graduated at Harvard in 1677, and was for some time a fellow in that university. On 28 June, 1682, he was ordained as pastor of the Congregational society in Dorchester, and he continued with this charge until his death, receiving as his colleague the Rev. Jonathan Bowman in 1729. Mr. Danforth was a man of great learning, possessed an uncommon acquaintance with mathematics, and had a taste for poetry. He published a "Sermon at the Departure of the Rev. Joseph Lord and his Church for Dorchester, S. C." (1697); "The Right Christian Temper in every Condition, endeavored (as the Lord vouchsafed to assist) to be set forth and recommended" (1702); "The Vile Profanations of Prosperity by the Degenerate among the People of God"; "Fast Sermon at Boston" (1703); "The Blackness of Sins against Light, or Men's offering

Violence to their Knowledge, a Sermon" (1710): "A Sermon on King Hezekiah's Bitterness and Relief" (1710); "Judgment begun at the House of God and the Righteous scarcely Saved" (1716); "Two Sermons occasioned by the Earthquake, to which is added a Poem on Peter Thatcher, of Milton, and Samuel Danforth, of Taunton" (1727); also, "Kneeling to God, at Parting with Friends; or the Fraternal Intercessiory Cry of Faith and Love: Setting Forth and Recommending the Primitive Mode of taking Leave," to which were annexed poems to the memory of Mrs. Anne Eliot, and John Eliot, the apostle to the Indians (Boston, 1697).—**Samuel,** another son of Samuel, clergyman, b. in Roxbury, Mass., 18 Dec., 1666; d. in Taunton, Mass., 14 Nov., 1727. He was graduated at Harvard in 1683, and subsequently became pastor of the Congregational church in Taunton. All of his contemporaries represent him as a person of great learning and as having influence among young people. During 1705 unusual attention to religion prevailed among his congregation, of which he gives an interesting account in three letters published in Prince's "Christian History." He also published "A Eulogy on Thomas Leonard" (1713); "An Election Sermon" (1714); and "An Essay concerning the Singing of Psalms" (1723). Mr. Danforth left a manuscript Indian dictionary, a part of which is now in the library of the Massachusetts historical society. It seems to have been formed from Eliot's Indian Bible, as there is a reference under every word to a passage of Scripture.—**Samuel,** son of John, b. in Dorchester, Mass., in 1696; d. in Cambridge, Mass., in 1777. He was graduated at Harvard in 1715, and became prominent in the Massachusetts colony. For several years he was president of the council, and also a judge of probate for Middlesex county. In 1774 he was made a mandamus councillor. Subsequent to the last appointment, the county convention adopted the following: "Resolved, That, whereas the Hon. Samuel Danforth and Joseph Lee, Esquires, two of the judges of the inferior court of common pleas for the county, have accepted commissions under the new act, by being sworn members of his majesty's council, appointed by said act, we therefore look upon them as utterly incapable of holding any office whatever." Mr. Danforth was distinguished for his love of natural philosophy and chemistry.—**Samuel,** son of the third Samuel, physician, b. in Cambridge, Mass., in August, 1740; d. in Boston, Mass., 16 Nov., 1827. He was graduated at Harvard in 1758, and studied medicine with Dr. Isaac Rand. At first he settled in Newport, but soon removed to Boston, where he acquired a valuable practice. During the Revolutionary war his professional pursuits were disturbed, and he was harshly treated by the whigs on account of his loyalty to Great Britain, but later he regained the confidence of his patients. In all difficult medical cases his opinion was relied on as being the utmost effort of human skill. He practised with success until nearly eighty years of age, and increased his reputation by his chemical studies. Dr. Danforth was a member of the Academy of arts and sciences, and from 1795 till 1798 was president of the Massachusetts medical society.—**Thomas,** son of the third Samuel, lawyer, b. in Massachusetts about 1742; d. in London, England, in 1825. He was graduated at Harvard in 1762, and was one of the addressers of Gov. Thomas Hutchinson. Subsequently he studied law, and became a councillor in Charlestown. He was the only lawyer in that town, as well as the only inhabitant, who sought protection from the parent country at the beginning of the Revolution. After being proscribed and banished, he departed for Halifax in 1776, and later took up his residence in England.

DANIEL, Antony, clergyman, b. in Dieppe, France, in 1601; d. in Canada in 1648. He became a Jesuit at the age of twenty, and was sent to Canada in 1633. He labored at first among the Indians of Cape Breton, but from July, 1634, till July, 1648, gave his attention exclusively to the Hurons. Although he made St. Josephs his principal residence, he ministered to the entire tribe. When celebrating mass, on 4 July, he heard a confused noise, and, as soon as he had finished the service, he ran to the quarter from which the cries proceeded. He was at once surrounded by women and children, and learned that the village was being attacked by a hostile tribe while the warriors were absent. Father Daniel exhorted all who could to escape to the woods, and endeavored to inspire those who were unable to do so, from sickness or age, with a sentiment of Christian heroism. He himself refused to escape, and, in order to gain time for his flock to reach the forest, he advanced toward the enemy. At first the savages recoiled, awed by his calmness and daring. When they recovered from their astonishment, they shot their arrows at him and he fell to the ground, and, after lingering some time in agony, was despatched by an Indian.

DANIEL, John Moncure, editor, b. in Stafford county, Va., 24 Oct., 1825; d. in Richmond, Va., 30 March, 1865. His father was the son of an eminent surgeon in the U. S. army, who married a daughter of Thomas Stone, of Maryland, signer of the Declaration of Independence. John Moncure was educated mainly by his father, and studied law with Judge Lomax in Fredericksburg, Va., but did not complete his studies, his father's death rendering it necessary to earn a support for himself and aid his brothers. In 1845 he went to Richmond, where he obtained the place of librarian in a small public library, which, though it brought little money, supplied opportunity for indulging his passion for reading. The first exhibition of his prowess as a writer was on an agricultural monthly, "The Southern Planter," to which he attracted so much notice that he was invited to a place on the staff of a new democratic newspaper (1847), the "Richmond Examiner," which speedily became the leading paper of the south. The brilliant invective of the paper led to his fighting several duels. Mr. Daniel's "democratic" principles were of the philosophical European school, and he was enabled to harmonize his pro-slavery radicalism with these by the adoption of Carlyle's theory (in "The Nigger Question"), which he interpreted as meaning that negroes were not to be considered as men in the same sense as whites. He was heretical in religious opinions, and his columns bore witness to much admiration for Emerson and Theodore Parker. He even published Parker's famous sermon on Webster in his paper. The literary character of the "Examiner" was very high. Mr. Daniel was a friend of Edgar A. Poe, whom he aided with money, and of whom he wrote a remarkable sketch in the "Southern Literary Messenger." Some of Poe's poems were revised for this paper. Mr. Daniel was perhaps the earliest apostle of the secessionists in Virginia. In 1853 he was appointed by President Buchanan minister to the court of Victor Emanuel, and while there he took high ground in demanding the same immunities for an Italian naturalized in the United States and visiting Sardinia as for any other American, and was indignant that Mr. Marcy did not support him in threat-

ening a rupture of diplomatic relations. He caused some scandal by escorting to a royal ball at Turin (on occasion of the betrothal of Prince Napoleon and Princess Clotilde) the Countess Marie de Solms (afterward Madame Ratazzi), who had not been invited. This matter was the subject of a curious correspondence between Cavour and his minister at Washington. Garibaldi requested Daniel to annex Nice to the American republic, which Daniel declined on the ground that it was contrary to the Monroe doctrine! His social relations at Turin were for a time rendered unpleasant through the imprudent publication by a friend in Richmond of a private letter in which he ridiculed the *habitués* of the court, the letter having found its way to Turin. Nevertheless, Daniel passed more than seven agreeable years abroad. At the beginning of the civil war he hastened home, and served on the staff of Gen. A. P. Hill. His arm being shattered, he resumed editorship of the Richmond "Examiner." He attacked Jefferson Davis and Mr. Elmore (Confederate treasurer) with great severity, was challenged in 1864 by the latter, and met him in a duel, where he was unable to point his pistol on account of his wounded arm. He was shot in the leg in this duel. He predicted the collapse of the Confederacy, and died three days before it occurred. Frederick S. Daniel has printed privately a volume containing his brother's leading articles during the war, with a memoir.

Jno. M. Daniel

DANIEL, John Reeves Jones, b. in Halifax county, N. C., about 1802; d. in Louisiana. He was graduated at the University of North Carolina in 1821, studied law, and practised with success, sat in the legislature in 1832–'4, and was elected attorney-general in the latter year. In 1840 he was elected, as a democrat, to congress, and served continuously from 1 May, 1841, to 3 March, 1853. He afterward removed to Louisiana.

DANIEL, Peter Vivian, jurist, b. in Stafford county, Va., 24 April, 1784; d. in Richmond, Va., 30 June, 1860. His father, Travers Daniel, was a son of Peter Daniel, who married a daughter of Raleigh Travers, of the Virginia house of burgesses. The residence of Travers Daniel, Crow's Nest, near the mouth of Potomac creek, was celebrated for its hospitalities, and the family bore an important part in public affairs. Peter Vivian was graduated at Princeton in 1805, and studied law in the office of Edmund Randolph (of Washington's cabinet), whose daughter, Lucy Nelson Randolph, he married in 1811. He was chosen a member of the privy council of Virginia in 1812, and served part of the time as lieutenant-governor of the state until 1835. In 1836 he was appointed by President Van Buren to be judge of the district circuit court of Virginia, and was raised to the supreme court, 3 March, 1841, to succeed Mr. Justice Barbour. Judge Daniel was a democrat, and a personal as well as political friend of President Jackson. He was a gentleman of fine taste in literature, possessed musical accomplishments, and his judicial opinions are marked by care and clearness.

DANIEL, Raleigh Travers, jurist, b. in Stafford county, Va., 15 Oct., 1805; d. in Richmond, 16 Aug., 1877. His father was an eminent physician, his mother a daughter of Thomas Stone, signer of the Declaration of Independence. His early education was acquired from John Lewis, who kept a classical school in Spottsylvania county, and was perhaps the best teacher of Latin and Greek in that region. At the age of seventeen he entered the office of his uncle, Judge P. V. Daniel (afterward of the U. S. supreme court), at Richmond, and, after a careful training for the profession of law, took a high position at the bar. In the early part of his career he was appointed commonwealth's attorney for Henrico county, in which Richmond is situated, and held that office until 1852. Though belonging to a democratic family, he was the leader of the whig party in Richmond while yet a young man, and was repeatedly elected to represent that city in the legislature. He was the favorite orator of his party in Virginia, always chairman of its state committee, and on its electoral ticket; and in the presidential canvasses of 1840 and 1844 he confronted the democratic champions in every part of the state. Such was the admiration felt for him by his opponents that in 1847 a democratic assembly elected him one of the three members of the governor's council. By seniority he became lieutenant-governor of the state. He was a strong Union man so long as that sentiment was possible in his state; but when the war came he considered service to his state the paramount duty. When Richmond was occupied by the national forces Mr. Daniel was removed by Gen. Schofield from the office of city attorney. When the autonomy of the state was restored in 1868, he devoted himself to the work of organizing the conservative party, which triumphed in the election of Gilbert C. Walker as governor. In 1872 he was elected attorney-general of Virginia, and in this office showed such capacity for mastering the novel questions and difficulties that had followed the confusion of affairs that at the next convention he was re-nominated by acclamation. He was elected by an overwhelming majority, on 11 Aug., 1877, but died from a hæmorrhage four days later. His culture, eloquence, and social qualities are still remembered in every part of Virginia, where no man of his political opinions had ever been so popular.

DANIEL, William, jurist, b. in Cumberland county, Va., in 1770; d. in Lynchburg, Va., 20 Nov., 1839. He was a member of the Virginia house of delegates, and gained reputation as an orator by his defence of the "Resolutions of '98." He became circuit judge and *ex-officio* member of the old general court of Virginia. His judicial opinions are high authority, and some of his sayings are proverbial in his neighborhood.—His son, **William,** jurist, b. in Winchester, Va., 26 Nov., 1806; d. in Lynchburg, Va., 28 March, 1873, was educated at Hampden Sidney college and at the University of Virginia, and while yet a youth was a lawyer of large practice and wide reputation for eloquence. He was elected to the Virginia house of delegates before he was of age. He was an elector on the Polk ticket in 1844. He was a judge of the supreme court of appeals of Virginia from 1847 till 1865.—His son, **John Warwick,** senator, b. in Lynchburg, Va., 5 Sept., 1842, received a classical education, and in May, 1861, volunteered in the Confederate army, in which he served throughout the war, rising to be major and adjutant-general of Early's division in the Army of

Northern Virginia. In 1865–'6 he studied law at the University of Virginia, and soon after entering upon practice gained a high reputation as an advocate. He has published "Attachments" (1869) and "Negotiable Instruments" (1876). He was elected to the state house of delegates in 1869, and to the state senate in 1875 and 1879. In 1876 he was an elector-at-large on the Tilden and Hendricks ticket. He was nominated for governor, in 1881, by the debt-paying democracy, and resigned from the state senate to accept the nomination, but was defeated by William E. Cameron, the readjuster candidate. On 4 Nov., 1884, he was elected a representative in congress, and on 15 Dec., 1885, was chosen U. S. senator to succeed William Mahone, whose term expires 3 March, 1887.

DANIEL, William, candidate for the vice-presidency, b. on Deal's island, Somerset co., Md., 24 Jan., 1826. He was graduated at Dickinson college in 1848, and admitted to the bar in 1851. He was elected to the legislature in 1853, and introduced a bill similar to the Maine liquor law, was re-elected on the temperance issue by the American party, and on the completion of his term sent to the state senate in 1857 as a supporter of local option. After the first session he resigned, and removed to Baltimore. He became an earnest anti-slavery republican, and in 1864 was a member of the State constitutional convention for the emancipation of the slaves. He was chosen president of the Maryland temperance alliance on its organization in 1872, and continued in that post in subsequent years. Through the efforts of that society and the energy and eloquence of its president, the Maryland option law was enacted, and adopted by thirteen counties of the twenty-three composing the state. On 14 July, 1884, the alliance joined the national prohibition party. Mr. Daniel appeared at the head of the Maryland delegation in the prohibitionist convention in Pittsburg, Pa., acted as temporary chairman of the convention, and was nominated by it for vice-president of the United States. The St. John and Daniel ticket received 150,369 ballots, or 1·49 per cent. of the total popular vote.

DANIELS, William Haven, author, b. in Franklin, Mass., 18 May, 1836. He entered Wesleyan university, then travelled in Europe, became librarian in Northwestern university in 1866, and was professor of rhetoric in Illinois Wesleyan university in 1868–'9. He joined the Rock River conference of the Methodist Episcopal church in 1869, was a minister in Chicago, Ill., in 1870–'4, then at River Forest, went to Europe with Dwight L. Moody, the revivalist, in 1875, became a supernumerary in 1876, and since 1881 has devoted himself to literature, and to the work of an evangelist, to enter upon which he resigned his connection with the New England conference in 1885. He is the author of "D. L. Moody and his Work" (London and Hartford, 1875); "That Boy: Who shall Have Him?" (Cincinnati and London, 1878); "The Temperance Reform and its Great Reformers" (New York, 1878); "Moody, his Words, Work, and Workers" (1879); "The Illustrated History of Methodism in the United States" (1880); "Graduated with Honor: Memorials of Gilbert Haven" (Cincinnati, 1880); and "A Short History of the People called Methodist" (London, 1882).

DANIELSON, Timothy, patriot, b. in Brimfield, Mass., in 1733; d. there, 19 Sept., 1791. He was graduated at Yale in 1756, and studied theology, but did not preach. He was chairman of the Hampshire county convention in September, 1774, and a delegate to the provincial congress that met at Concord in the following month. In May, 1774, being a representative, he was chosen a member of the council, but his election was annulled by Gov. Gage. In February and May, 1775, he attended the provincial congress at Cambridge and Watertown. He commanded one of the twenty-five regiments of provincial militia organized under the act of May, 1775, but served the cause of independence chiefly in the legislative body, where he sat for several years. He was a member of the State constitutional convention of 1779, and afterward of the senate and executive council. In his last years he was chief justice of Hampshire county.

DANKS, Hart Pease, musician, b. in New Haven, Conn., in 1834. He removed with his parents to Saratoga Springs, N. Y., and in 1850 went to Chicago, Ill. His first musical composition was inserted in Bradbury's "Jubilee," under the name of "Lake Street," and is well known. In 1856 his first song, arranged with piano-forte accompaniment, "The Old Lane," was published in Chicago, since which time he has issued several hundred. Two of them, "Silver Threads among the Gold" and "Don't be angry with me, Darling," have attained immense popularity, each selling to the extent of several hundred thousand copies. The publishers paid the author thirty dollars for the copyright, and realized several thousands. From 1858 till 1861 Mr. Danks lived in Cleveland, Ohio, from 1861 till 1864 in Chicago, and from 1864 till 1887 in New York city. He has published books of anthems that have met with favorable acceptation.

DAOUST, Jean Baptist, Canadian politician, b. in St. Eustache, Quebec, 18 Jan., 1817. After having been magistrate, commissioner, and municipal officer, he was elected by acclamation in 1854, for Two Mountains, to the old parliament of Canada, in which he held his seat until the confederation of the provinces in 1867, when he was elected to the house of commons by acclamation. In 1872 he retired for a short time from political life. In 1876 he was re-elected to the house of commons by acclamation, being chosen again at the general election in 1878, and again in 1882. He is a conservative.

DA PONTE, Lorenzo, dramatist, b. in Ceneda, Italy, 10 March, 1749; d. in New York city, 17 Aug., 1838. He was for two years professor of rhetoric in the seminary of Porto Gruaro, and then removed to Venice. But, after a short stay in that city, he was exiled for writing a political satire against the pope and government. His next place of residence was in Vienna, where he became Latin secretary at court, and also wrote opera libretti and dramas for the theatres of Prague and Vienna. Among his productions were "Don Giovanni" and "Nozze di Figaro," both rendered famous and enduring by the musical setting of Mozart. Da Ponte next passed several years in London as secretary and dramatist of the Italian opera. In 1805 he emigrated to the United States and settled in New York city, where for many years he gave private lessons in the Italian language and literature. In 1828 he was appointed professor of Italian in Columbia college. Besides his many plays, he wrote sonnets and translations from the English into Italian, and also several books of elementary instruction in the Italian language. He published his own "Life" (3 vols., New York, 1823), and "History of the Florentine Republic and the Medici" (2 vols., 1833).

DARBY, John, educator, b. in North Adams, Mass., 3 Sept., 1804; d. in New York, 18 Sept., 1877. He was graduated at Williams in 1831, and remained there as an instructor till he accepted a professorship in Wesleyan female college at Macon, Ga. Afterward he became professor of mathematics at

Williams. In 1845 he was obliged, on account of his health, to go to a warm climate. He was connected with the educational departments of Georgia and Florida, was the founder of the Culloden female college, and afterward professor of natural science in Auburn college, Ala. In 1869 he was elected president of the Wesleyan university of Kentucky, but in 1875 resigned, and removed to New York city. He was a regular contributor to the religious press, and was the author of several educational and scientific works, including "Manual of Botany" (Macon, 1841); "The Botany of the Southern States" (New York, 1855); and "Chemistry" (1860).

DARBY, William, geographer, b. in Pennsylvania in 1775; d. in Washington, D. C., 9 Oct., 1854. He was an officer under Gen. Jackson in Louisiana, and one of the surveyors of the boundary between the United States and Canada. With Theodore Dwight, Jr., he edited the "United States Gazetteer" in 1830. His works include "Geographical Description of Louisiana" (1816); "Plan of Pittsburg and Adjacent Country" (1817); "Emigrant's Guide to the Western Country" (1818); "Tour from New York to Detroit" (New York, 1819); "Geography and History of Florida," with a map (1821); third edition of "Brooke's Universal Gazetteer" (1823); "View of the United States" (Philadelphia, 1828); "Lectures on the Discovery of America" (1828); "Mnemonica, a Register of Events from the Earliest Period to 1829" (Baltimore, 1829); and "Geographical Dictionary" (1843).

DARCEY, John S., physician, b. in Hanover, Morris co., N. J., 24 Feb., 1788; d. in Newark, N. J., 22 Oct., 1863. His father was a physician, and with him he studied and succeeded to his large practice. He was a member of the state legislature in 1819. In 1832, on the first appearance of Asiatic cholera in this country, he removed to Newark, N. J., and by his skill in the treatment of that disease, and his devotion to his patients and sympathy with their sufferings, attained a practice more extensive and exacting than any other in the state, which finally impaired his remarkably vigorous constitution. In 1835–'41 he was U. S. marshal for New Jersey. He exerted great influence in his party in the state, but was averse to holding office. On the incorporation of the New Jersey railroad company he was elected its president, and held the office till his death, a period of over thirty years. In 1849, his health failing, he made the overland journey to California, but his health was rather injured than benefited.

DARDEN, Miles, giant, b. in North Carolina in 1798; d. in Henderson county, Tenn., 23 Jan., 1857. He was seven feet six inches in height, and at his death weighed more than one thousand pounds. Until 1853 he was active, energetic, and able to labor, but from that time was obliged to remain at home, or be moved about in a wagon. In 1850 it required thirteen and a half yards of cloth, one yard wide, to make him a coat. His coffin was eight feet long, thirty-five inches deep, thirty-two inches across the breast, eighteen across the head, and fourteen across the feet.

DARE, Virginia, the first child of English parents born in the New World, b. at Roanoke, Va., in August, 1587. She was the granddaughter of John White, governor of the colony sent out by Sir Walter Raleigh to found an agricultural state. The expedition sailed from Plymouth, England, 26 April, 1587, and reached the island of Roanoke, Virginia, in July of the same year. The mother of the child was the wife of one of her father's assistants. Virginia was born about a month after the arrival of the expedition. Nine days after her birth Gov. White sailed for England, and when he returned, a year later, all vestiges of the colony had disappeared. An inscription on the bark of a tree pointed to Croatan, a place supposed to belong to a friendly tribe of Indians, but Croatan was never found.

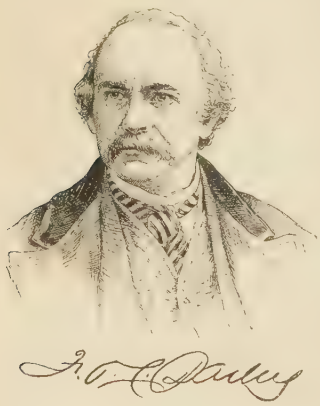
DARGAN, Clara Victoria, poet, b. near Winnsboro, S. C., about 1840. She was of French descent, and of a family whose wealth was lost in the downfall of the Confederacy. Her early education was very carefully conducted, and she was especially skilled in music. From 1852 till 1865 she resided with her family in Columbia, S. C. She began writing sketches and songs at the age of ten, and a year later produced a story that was much admired. Her first published poem was "Forever Thine," in the Charleston "Courant" in 1859, under the pseudonym of "Claudia." During the following year she wrote several stories for the "Southern Guardian," signed "Esther Chesney." In 1863 she edited the literary department of the "Edgefield Advertiser," and became a contributor to various other periodicals. After the close of the civil war she became a teacher in Yorkville, S. C. She is the author of "Riverlands," a story of life on the River Ashley, which originally appeared as a prize story in the "Southern Field and Fireside" (1863), and of another novel that obtained a prize and was published as a serial.

DARGAN, Edmund Spawn, jurist, b. in Montgomery county, N. C., 15 April, 1805; d. in Mobile, Ala., in November, 1879. He was the son of a Baptist minister of Irish descent, at whose death he was left without means. By his own exertions he obtained a fair knowledge of English, Latin, and Greek, although he was at work on a farm until he was twenty-three years old. He read law, was admitted to the bar in 1829, went to Alabama, and taught three months in Washington, Autauga co. Here he was elected a justice of the peace, and filled the office for several years, meanwhile engaging in the practice of law. In 1833 he removed to Montgomery, and in 1841 was elected to the bench of the circuit court of the Mobile district, and removed to Mobile. He resigned the office of judge in 1842, and in 1844 was elected to the state senate. He was also mayor of Mobile the same year. He resigned from the senate the following year, and was elected to congress, serving from 1 Dec., 1845, till 3 March, 1847. On the question of the northwestern boundary of Oregon he made an able speech, and offered some valuable amendments to the resolution of notice. He was the first proposer of the line of adjustment finally adopted on the settlement of the question with the British government. He declined a renomination, and in 1847 was elected to fill a vacancy on the bench of the supreme court of Alabama. In July, 1849, by the resignation of Justice Collier, he became chief justice, which office he resigned in December, 1852, and resumed the practice of law in Mobile. In 1861 he was a delegate to the State convention, and voted for the ordinance of secession. He also served for one term as a representative in the Confederate congress.

DARGAN, Theodore A., physician, b. in Sleepy Hollow, S. C., in 1823. He was of Scotch-Irish descent, and received his early education in Darlington, S. C. He was graduated at the South Carolina medical college in 1844 at the age of twenty-one. At the beginning of the civil war he entered the Confederate service as surgeon, and served until the end. In 1859 he published a paper on the subject of "Typhoid Fever," which was extensively noticed.

DARKE, William, soldier, b. in Philadelphia county, Pa., in 1736; d. in Jefferson county, Va., 26 Nov., 1801. When he was four years old his parents removed to Virginia. At the age of nineteen he joined the army, and was with Braddock at his defeat in 1755. At the beginning of the Revolutionary war he was made a captain, and was taken prisoner at the battle of Germantown. Afterward he was colonel commanding the Hampshire and Berkeley regiments at the capture of Cornwallis. He was often a member of the Virginia legislature, and, in the convention of 1788, voted for the Federal constitution. In 1791 he was commissioned lieutenant-colonel in a regiment of "levies," and commanded the left wing of St. Clair's army at its defeat by the Miami Indians on 4 Nov., 1791. He made two gallant and successful charges with the bayonet in this fight, in the second of which his youngest son, Capt. Joseph Darke, was killed and himself wounded, narrowly escaping death. He was afterward major-general of Virginia militia.

DARLEY, John, actor, b. in England in 1765; d. in Philadelphia, Pa., in 1853. He made his first appearance on the American stage in Philadelphia in 1794, and afterward became a lieutenant of marines in the U. S. navy, but returned to the stage, and appeared at the Park theatre, New York, 20 July, 1801. He had a manly, well-proportioned person, and a handsome face, and, although not warmly attached to his profession, possessed great merit as a singer, and played Frenchmen and walking gentlemen well.—His son, **Felix Octavius Carr,** artist, b. in Philadelphia, 23 June, 1822. At the age of fourteen he was placed in a mercantile house, but spent his leisure hours in drawing. Some of his humorous sketches attracted attention, and he received from the publisher of the "Saturday Museum" a handsome sum for a few designs, which encouraged him to devote himself to art. For several years he was employed by large publishing-houses in Philadelphia, during which he produced the series of drawings for the "Library of Humorous American Works," which became very popular in the southern and western states. He removed in 1848 to New York, where he occupied himself in illustrating Irving's humorous writings. In 1856 he published a series of designs in outline from Sylvester Judd's novel of "Margaret," which met with such favor that he was commissioned by the American art union to illustrate in similar style "Rip Van Winkle" and "Sleepy Hollow." His elaborate outline drawings of these subjects led to his recognition, both at home and abroad, as a worthy successor of Retzsch and Flaxman. He declined an advantageous offer to settle in London, and applied himself assiduously to his art. In addition to illustrating James Fenimore Cooper's works, for which he furnished more than 500 designs, he was also engaged in the preparation of vignettes for bank-notes. He also illustrated Dickens's works and Simms's novels, and executed the "Massacre at Wyoming," and various Revolutionary pieces. Mr. Darley was elected a member of the Academy of design in 1852, became a member of the Artists' fund society, and was one of the early members of the American society of painters in water-colors. In 1859 appeared his drawing of the wedding procession in Longfellow's "Courtship of Miles Standish." Since then he has executed many large works, among which were four ordered by Prince Napoleon, viz.: "Emigrants attacked by Indians on the Prairie," "The Village Blacksmith," "The Unwilling Laborer," and "The Repose." During the civil war he delineated many dramatic and characteristic scenes, including one representing "Dahlgren's Charge at Fredericksburg," and another representing "Sherman's March to the Sea." Some of the most elaborate figures and scenes on the government bonds and legal-tender notes of the national banks were designed by him. Toward the close of the war he visited Europe, added many scores of sketches to his portfolio, studied models in Rome, and made a large number of drawings, many of which appeared in periodicals. On his return to the United States he published "Sketches Abroad with Pen and Pencil" (New York, 1868), for which he furnished both letter-press and illustrations. His "Cavalry Charge at Fredericksburg, Va.," was at the Paris exposition of 1867. His "Street Scene in Rome," in water-color, was at the Centennial exhibition of 1876. In 1875 he engaged in preparing 500 drawings to illustrate a "History of the United States" by B. J. Lossing. His later work consists of "Outlines to the 'Scarlet Letter'" of Hawthorne (1879), and twelve outline illustrations to the "Evangeline" of Longfellow, issued, not in lithograph print as heretofore, but in phototypes taken from the originals (1883), and "Illustrations to Shakespeare's Plays" (1886).



DARLING, Henry, clergyman, b. in Reading, Pa., 27 Dec., 1823. He was graduated at Amherst in 1842, studied theology in Union seminary, New York, in 1842–'3, at Auburn in 1843–'5, and was ordained by the presbytery of Columbia, 30 Dec., 1847. He first settled in Vernon, N. Y., then became pastor in Hudson in 1847–'53, pastor of the Clinton street church, Philadelphia, in 1852–'62, and permanent clerk of the Presbyterian general assembly in 1854–'63. He was an invalid in 1861–'3, after which he removed to Albany, and became pastor of the 4th Presbyterian church, where he remained until 1881. In that year he was elected president of Hamilton college. He presided as moderator to the general assembly in 1881. The degree of D. D. was conferred upon him in 1860 by Union, and the degree of LL. D. by both Hamilton and Lafayette in 1881. In addition to many pamphlets and articles in periodicals, he has published "The Closer Walk" (Philadelphia, 1862), "Slavery and the War" (1863), "Conformity to the World" (1873), "Not Doing, but Receiving" (Albany, 1875).

DARLING, Noyes, agriculturist, b. in Woodbridge, Conn., in 1782; d. in New Haven, 17 Sept., 1846. He was graduated at Yale in 1801, and was a tutor there in 1804–'8, after which he engaged in mercantile pursuits in New York city. He was especially interested in horticulture, and also in investigating the habits of insects injurious to vegetation, and wrote many valuable papers on the subject. The latter years of his life were passed in New Haven, of which city he was at one time mayor. He had also served for a long time as county surveyor, and was at the time of his death a judge of the county court.

DARLING, William, physician, b. in Berwickshire, Scotland, in 1815. His early education was obtained at a private seminary, after which he went to the University of Edinburgh, where he obtained a prize by competitive examination for his proficiency in the classics. He studied medicine in the College of physicians and surgeons in New York for six years, and, in 1840, was appointed physician to Bellevue hospital, and also took charge of some of the hospitals on Ward's island. His degree of M. D. was received in 1842 from the University of the city of New York, which also in a few weeks appointed him its prosector of surgery. In 1845 he was called to the professorship of demonstrator of anatomy, where he remained until 1853, when he became connected with the quarantine hospital, Staten Island. In 1855 he served as senior assistant surgeon in the emigrants' hospital, Ward's island. In 1856 he went to London, England, and, on 21 Nov. in that year, was admitted a member of the Royal college of surgeons of England. He remained in Europe ten years, most of the time in London, attending the lectures and cliniques at the hospitals, as well as lectures at the College of surgeons, the Royal institution, Gresham college, School of arts, School of mines, etc. During the same period he also attended various lectures in Paris, Edinburgh, and Glasgow. On 14 June, 1866, shortly before his departure for the United States, he received the fellowship of the Royal college of surgeons. On his return to the United States he was appointed professor of anatomy in the University of New York, and in 1868 censor of the New York college of veterinary surgeons. In 1873 he was appointed professor of anatomy in the University of Vermont. He is a member of many medical societies, at home and abroad, and on 8 Nov., 1877, was elected correspondent of the Société d'anthropologie of Paris.

DARLING, William, Canadian merchant, b. in Edinburgh, Scotland, in 1819; d. in Montreal, 1 Nov., 1885. He arrived in Canada in 1840, and, taking up his residence in Montreal, established an iron and hardware business, which ultimately became the wholesale firm of William Darling & Co. He actively promoted the commercial welfare of that city, and was for some years president of its board of trade, and also vice-president of the Dominion board of trade. He was largely instrumental in framing the insolvent act of 1875. During the Mackenzie administration he was appointed arbitrator on the Lachine canal claims, an office in which he was continued by Sir John A. Macdonald. He was a director of the Merchant's bank, and chairman of the Temporalities board of the Presbyterian church of Canada. In 1878 he was a candidate for a seat in the Dominion parliament, in the liberal interest, but was defeated.

DARLINGTON, William, scientist, b. in Birmingham, Pa., 28 April, 1782; d. in West Chester, Pa., 23 April, 1863. His parents were Quakers, and his early education was received in the country school. He began the study of medicine at the age of eighteen, and was graduated at the University of Pennsylvania in 1804. He studied languages and botany two years, and in 1806 went to India as a ship's surgeon, for which (joining a military organization) he was disowned by the Society of Friends. A sketch of his voyage, under the title of "Letters from Calcutta," was published in the "Analectic Magazine." He returned to the United States in 1807, and for several years practised medicine in West Chester. Here he entered into politics, wrote in defence of the policy of President Madison, and at the beginning of the war of 1812 aided in raising an armed corps in his neighborhood, and, after the destruction of Washington in 1814, was chosen major of a volunteer regiment. He founded an athenæum, and a society of natural history, of which he became the president. In 1813 he began a descriptive catalogue of plants growing around West Chester, with the title "Florula Cestrica" (1826), afterward enlarged as the "Flora Cestrica" (1837; new ed., 1853), containing a complete description and classification of every plant known in the county. He was a member of congress from 4 Dec., 1815, till 3 March, 1817, and from 6 Dec., 1819, till 3 March, 1823. In 1843 he edited the correspondence of his friend, Dr. William Baldwin, with a memoir, entitling the work "Reliquiæ Baldwiniana." In 1853 the name of *Darlingtonica California* was given, in his honor, to a new and remarkable variety of pitcher-plant found in California, in addition to which a number of rare plants were named in his honor by naturalists in Switzerland and America. The degree of LL. D. was conferred on him by Yale in 1848, and in 1855 that of Doctor of Physical Science, by Dickinson college. He was a member of forty learned societies in America and Europe. In addition to the works noted above, he published "Mutual Influence of Habits and Disease" (1804) and "Agricultural Botany" (Philadelphia, 1847).

DARRAH, Mrs. **Lydia,** heroine. Of her birth and early life nothing is known, except that she was a Quaker. During 1777, while the British army held possession of Philadelphia, the adjutant-general rented one of her chambers, a retired room, for private conferences. On 2 Dec. he went to her, required that the room be ready with fire and candles by seven o'clock, that her family retire to their beds, and that the utmost silence be kept regarding the visit. These minute directions excited her curiosity, and, divested of her shoes, she crept to the door, listened at the key-hole, and heard an order read for all the British troops to march out on the evening of the 4th and attack Washington's army, then at White Marsh, eight miles distant. Returning to her room, she feigned sleep when called by the officer, at the close of the meeting, that he might depart. Keeping the secret from her husband, she at an early hour in the morning informed the family that they were out of flour, and she would go to Frankfort, outside of the British lines, and procure some. A pass was readily procured from Gen. Howe, and she was soon beyond the British lines, and, leaving her bag at the mill, hastened to the American army, walking in a snowy road for several miles. She met Lieut.-Col. Craig, who knew her, and, under a solemn pledge of secrecy regarding her agency, received the information that placed the American army on its guard. She returned to the mill, procured her flour, and went home. That night she watched the British troops departing, and when they returned she did not dare to seek any information. The next evening the adjutant-general asked her to walk up to his room, locked the door, and inquired whether any of the family were up when he and the other officers met. She told him they had all "retired at eight o'clock." He then said: "It is very strange; I know *you* were asleep, for I knocked at your chamber-door three times before you heard me, yet it is certain that we were betrayed. I am entirely at a loss to imagine who gave Gen. Washington information of our intended attack. On arriving near his encampment we found his cannon mounted, the troops under arms, and prepared at every point to meet us, and we have been compelled to march back like a parcel of fools."

D'ARUSMONT, Madam. See WRIGHT, FRANCES.

DASHIELL, George, clergyman, b. in Stepney, Md., in 1780; d. in New York city in April, 1852. He was licensed as lay-reader at the age of twenty, and admitted to orders by Bishop White in 1805. He was in charge of several parishes in Maryland, was distinguished for pulpit eloquence, was a delegate to the general convention, and became rector of St. Peter's church, Baltimore. Mr. Dashiell was violently opposed to the election of the Rev. Dr. Kemp as suffragan bishop of Maryland in 1814, and with a small number of sympathizers began a schismatical movement, by which (as he said) it was proposed to make "the evangelical part of the church a distinct body, and to enlarge its boundaries by admitting faithful men to labor in the work of the Lord." Attempts were made to get some one of the bishops to consecrate Mr. Dashiell for the purpose, but without success, and he was degraded for contumacy early in 1816. Some adherents of his in St. Peter's church endeavored to aid him in keeping possession of St. Peter's, but loyal members of the church invoked the help of the courts to prevent it. As the judges disagreed, no result was attained. A new vestry was elected, and the difficulty was disposed of by choosing the Rev. Dr. Henshaw to be rector. Mr. Dashiell, however, as he could not get Episcopal orders, undertook to ordain ministers for what he called "The Evangelical Episcopal Church." In this he was the forerunner of the movement, half a century later, known as "The Reformed Episcopal Church," originated by Dr. Cummins, assistant bishop of Kentucky. Mr. Dashiell's movement lasted only a few years, and bore no fruit. He removed to a western state in 1826, and spent there most of the remainder of his life.

DASTON, Sarah, one of the later victims of the witchcraft delusion in Salem, b. about 1613. In January, 1693, when "the jails were full, 150 prisoners awaited trial, and 200 more were under accusation," the grand jury went into session, and dismissed more than half the complaints. Public feeling was changing, but the party of superstition desired one conviction. The victim selected was Sarah Daston, a woman eighty years old. In February she was tried in Charlestown, but the common mind was disenthralled, and she was acquitted, while her persecutor, Minister Parris, was soon afterward driven from Salem.

DAUCHER, Louis, musician, b. in France in 1837; d. in Nancy, France, 16 Aug., 1878. He came to the United States when still a young man, and early embraced the musical profession. He was for over six years organist of St. Ann's Roman Catholic church in New York, where he was at one time the proprietor of a music-store. He was the author of "Daucher's Mass" and several other works, and received the first prize for original composition at the Paris conservatory of music.

DAUILA, Alonso de (dah-wee'-lah), Spanish soldier, b. in Toledo in the latter part of the 15th century; d. in Guatitlan, Mexico, in 1536. On 16 Nov., 1518, he sailed from Santiago de Cuba in the expedition under command of Hernan Cortes as a lieutenant in Juan Velasquez's company. He assisted in the whole Mexican campaign, beginning in 1519 in Tabasco, and is said to have taken part in seventy battles. When Narvaez, sent by Diego Velasquez, jealous of Cortes, landed in Mexico and was defeated, Dauila was commissioned by Cortes to go to Hispaniola and ask of the audiencia of that island that he might not be hampered in his enterprise by further interference from Velasquez. He obtained a favorable result of his mission, and returned to Mexico on the day of the entry of Cortes after his victory of Panuco. To recompense Dauila for this service, and also because he mistrusted him on account of his friendly relations with Bishop Fonseca, the president of the Indian council, Cortes, besides giving him a considerable amount of gold, appointed him military governor of the village of Guatitlan. In 1522 Dauila was commissioned by Cortes to carry to the emperor a tribute of 80,000 ounces of gold in bars obtained from the treasure of Montezuma. With Antonio de Quiñones he left Vera Cruz on this commission with two ships, 20 Dec., 1522, and reached the Terceira islands. During their stay there to take stores, Quiñones was killed in a brawl. Dauila set sail for Spain, but his ships were captured by the French corsair "Jean Florin." As the French demanded a heavy ransom for him, he was for a long time prisoner, but won the friendship of the officer that guarded him, and was enabled to send the despatches and letters received from Cortes to the emperor, who at the time was in Flanders. Later he escaped from prison and went to Spain, presenting himself at court, and returned to Mexico in 1526 with the appointment of treasurer of Yucatan; but in later years joined Cortes again in the capital.

DAULAC, Adam, b. in France in 1635; d. in Long Sault, Canada, in 1660. He was trained to the profession of arms, and came to Canada in 1657. He was appointed commander of the garrison in Montreal soon after his arrival. As the Iroquois were devastating the French settlements, he adopted a desperate plan to repel their attacks. He persuaded sixteen young men of the garrison to devote themselves to the safety of the colony. They took their way up the Ottawa in canoes, and, on reaching the foot of Long Sault, landed and took possession of an abandoned palisade fort, constructed of small trees, and almost defenceless. They were joined afterward by forty Hurons and four Algonquins, who asked to be allowed to share their enterprise. Next day the Frenchmen fired on two canoes containing Iroquois, killing several. The survivors rushed to the woods and informed their companions, who, to the number of 200, attacked the fort, but they were repelled with great loss, and built a fort at some distance. In a second and third assault they fared still worse, and then sent for 500 warriors who were on their way to join in an attack on Quebec. On the arrival of this re-enforcement, the French were deserted by all the Hurons except the chief. Daulac, however, still held the palisade, and for three days repelled every assault of the 700 Iroquois and their Huron allies. Many of the Indians were now desirous to retreat, but others insisted that a final attack should be made, led by a body of their bravest warriors. This assault was successful, a breach was made, and Daulac and his companions were killed after they had slain a large number of the enemy.

DAUVRAY, Helen, actress, b. in San Francisco, Cal., 14 Feb., 1859. Her true name is Gibson, and she was also known as "Little Nell, the California diamond." During her childhood she resided in Virginia City, Nev., and made her first appearance on the stage in San Francisco, playing Eva in "Uncle Tom's Cabin." Afterward she appeared as the Duke of York in "Richard III.," as the child in "The Scarlet Letter," with Matilda Heron, and in other rôles. About 1869 she was announced as a child star, and her first tour, opening in the west, was made in protean plays, such as "Fidela," "No Name," and "Katy Did." She continued eastward, meeting with indifferent success, reached New York in June, 1870, appear-

ing at Wood's museum, where she played twice a day in "Popsey Wopsey," and also appeared in "Andy Blake." She again went west, and later sailed for Australia. After playing in that country for some time, she returned to the United States, and, withdrawing from the stage, went to Europe, where she acquired the French language. Her old fondness for the stage reviving, she determined on an appearance abroad. Paul Ferrier adapted for her a French version of "Nan the Good-for-nothing," which he called "Miss Maggie," and on 1 Sept., 1884, she acted at the Folies Dramatiques in Paris, under the name of Mlle. Helene Dauvray. Her engagement lasted over three months, after which she returned to the United States. The novel of "Mrs. Geoffrey" was adapted for her, under the name of "Mona," by Felix Morris, and she took the titular character in the Star theatre, New York, 27 April, 1885, but without success. Miss Dauvray had forsaken her old *soubrette* parts, and was ambitious of winning distinction in serious rôles. She then attempted comedy, and Bronson Howard wrote for her "One of our Girls," which was originally produced in the Lyceum theatre, New York, 10 Nov., 1885. This play ran for several months, and proved a great success. A year later, Mr. Howard prepared for her "Met by Chance," which was first played on 11 Jan., 1887, but was not successful.

DÁVALOS, Gil de (dah'-vah-los), Spanish soldier, b. in Baeza de Castilla, Spain; d. in Quito, Ecuador, in 1562. He went to Peru with the viceroy, Antonio de Mendoza, and in 1557 founded the city of Cucuca by order of Viceroy Andres Hurtado de Mendoza, by whom he was also ordered to conquer Quijos and Macas, which he did. In 1559 he founded Quijos, the capital of Baeza; also Archidona, Avila, Logroño, and other towns, and the town of Sevilla del Oro, or Macas, capital of this district. Gil de Davalos had been mayor of Cuzco at the time of the disturbances at Chuguisaca in 1553, and when the "encomenderos" were asking for the revocation of some instructions given by the audiencia of Lima, which were opposed to their interests, Davalos set about carrying out these instructions with such diligence as to destroy a bill presented to him on the subject by Capt. Francisco Hernandez Giron. It was believed that this act of Davalos precipitated the revolution at Cuzco at the close of that year. The agitators persuaded Nuño Mendiola to go to the mayor on some pretext and stab him. This was not done; but, at the moment of the revolt, Davalos was made a prisoner and taken out of the city to a distance of sixty miles, where he was left at liberty. He went to Lima and served in the army of the king during the campaign that ended with the defeat and death of Giron. From November, 1556, till his death, Davalos was chief justice of Quito.

DAVEISS, Mrs. **Maria** (Thompson), author, b. in Harrodsburg, Ky., 31 Oct., 1814. Her early education was received in the schools of Harrodsburg. In 1839 she married William Daveiss. Her poem in compliment to a bride was extensively copied, and was followed by "The Nun" and "A Harvest Hymn." "Roger Sherman, A Tale of '76," and "Woman's Love," are her best-known stories. She received from the Kentucky state agricultural society a premium for an essay on the "Cultivation and Uses of the Chinese Sugar-Cane," which she introduced into the state. She has been an extensive contributor to agricultural papers, and has published a "History of Mercer and Boyle Counties, Ky." (1886).

DAVENPORT, Adolphus Hoyt, actor, b. in Stamford, Conn., 4 Aug., 1828; d. in New Orleans, La., 22 Oct., 1873. An early fondness for the stage influenced him to become an actor, and, transposing his name, which was Adolphus Davenport Hoyt, he became known as "Dolly Davenport." His first appearance was as Willis, in "Paul Pry," at the Baltimore athenæum during 1848, and his success was such that he was soon intrusted with the rôle of Claude Melnotte, which he played to Mrs. W. H. Russell's (now Mrs. John Hoey) Pauline. At the solicitation of his parents, he studied law with Homer H. Stewart, of New York, and, after two years' preparation, was admitted to the bar. But he soon reappeared on the stage, and played in Wallack's old theatre, for the benefit of David S. Palmer, as Box in "Box and Cox." Early in 1853 he appeared as Montano in "Othello," and as Capt. Charles in "Who Speaks First?" at the old Broadway theatre. His first appearance in Philadelphia was at the old Chestnut street theatre, and he was a member of the company during 1853–'4. Subsequently he was a member of the Walnut street theatre's company, and played there during the season of 1855–'6. He then drifted southward, and acted principally in southern cities. He was manager of the Mobile theatre during 1872, and was connected with Bidwell's academy of music.

DAVENPORT, Bennett Franklin, sanitary chemist, b. in Cambridge, Mass., 28 May, 1845. He was graduated at Harvard in 1867, then spent some time in the university in Tübingen, after which he was graduated at Harvard medical college in 1871, and also at the College of physicians and surgeons in New York in 1871. After settling in Boston, he devoted his attention to sanitary chemistry. In 1879 he became professor of chemistry in the Massachusetts college of pharmacy, and in 1882 inspector of milk and vinegar to the city of Boston, and also analyst to the Massachusetts state board of health. In these capacities he has regularly furnished reports to the annual documents of the Boston and State board of health. He has also prepared the semi-annual reports on foods and drugs in the Boston "Medical and Surgical Journal." Dr. Davenport is a member of the chemical societies of London, Berlin, and New York, and of other scientific bodies.

DAVENPORT, Edward Loomis, actor, b. in Boston, Mass., 15 Nov., 1814; d. in Canton, Pa., 1 Sept., 1877. He made his first appearance on the stage in Providence, R. I., in 1836, as Parson Will in "A New Way to Pay Old Debts," with Junius Brutus Booth as Sir Giles Overreach, a part in which Mr. Davenport afterward became famous. He then appeared in New York at the Bowery theatre, under the management of Thomas H. Hamlin, and in 1838 played first in Philadelphia, in the Walnut street theatre, as Count Montalban in "The Honeymoon." But he appeared chiefly in Boston until 1847, when, with Mrs. Anna Cora Mowatt, he visited England, appearing with her, on 6 Dec., 1847, at the Manchester theatre, as Claude Melnotte to her Pauline. While in England he supported William C. Macready for two seasons, including his farewell engagement, and became very popular at the Haymarket theatre, London, as William in "Black-eyed Susan." He returned to the United States in 1854, and filled various engagements under the management of Mrs. J. B. Barrow, Henry C. Jarrett, Mark Smith, James W. Wallack, and William Wheatley. In 1859 he became manager of the Howard athenæum, in Boston, and ten years later undertook the management of the Chestnut street theatre in Philadelphia. Dur-

ing 1873 he acted in Wood's museum, New York, and in 1875–'6 played with great success the part of Brutus in a protracted engagement of "Julius Cæsar" at Booth's theatre, New York. His last appearance in New York was also in Booth's theatre, where he played in "Daniel Druce." He was one of the most finished actors on the American stage, and possessed great versatility, being equally successful in tragedy and comedy.—His wife, **Fanny Elizabeth Vining,** b. in London, 6 July, 1829, was the daughter of Frederick Vining, manager of the Haymarket theatre in London. Her professional education began with playing baby parts when she was but three years old. Subsequently she spent a few years at boarding-school, and then made her first appearance, in 1847, as Juliet, with G. V. Brooke as Romeo and her father as Mercutio. She continued to play leading juvenile parts at the Haymarket and Drury Lane theatres with Charles Kean, William C. Macready, and other distinguished actors, until her marriage with Mr. Davenport, on 8 Jan., 1849. Her first appearance in the United States was as Margaret Elmore, in "Love's Sacrifice," in the Broadway theatre, New York, on 11 Sept., 1854. Afterward she was associated with her husband in many of his starring engagements, and she has played in the principal cities of the United States.—Their daughter, **Fanny Lily Gipsy,** b. in London, 10 April, 1850, was educated in the public schools of Boston, and made her first appearance at the Howard athenæum as the child in "Metamora." In New York she appeared first as King of Spain in "Faint Heart never Won Fair Lady," on 14 Feb., 1862, at Niblo's Garden. Subsequently she acted at the Little Tremont theatre, Boston, and in the south, where she played soubrette parts for a season. Afterward she played in the Arch street theatre, Philadelphia, then under the management of Mrs. John Drew, where she attracted the attention of Augustin Daly, who introduced her in New York at his Fifth avenue theatre in 1869. There she played Lady Gay Spanker in "London Assurance"; Rosalind in "As You Like It"; Nancy Sykes in "Oliver Twist"; Lady Teazle in "School for Scandal"; Lu and Fanny Ten Eyck in "Divorce"; the title-rôle in "Leah"; and Mabel Renfrew in "Pique," a play in which she won great success, and which ran for 250 nights. She has made starring tours throughout the United States, frequently adding new parts to those previously played. In 1880 she played Olivia successfully in Philadelphia, and afterward brought out, in New York, Miss Anna Dickinson's play of "An American Girl." She also introduced in New York Sardou's "Feodora," acting the title-rôle, and received much approbation for the magnificent manner in which the play was mounted. On 30 July, 1879, she married Edwin H. Price, an actor.—Another daughter, **Blanche** (Blanche Maria), b. in London, 11 July, 1852, was educated in the public schools of Boston, and in the convent of Notre Dame. In 1867 she played at the Boston museum, where she attracted attention by her singing, and afterward studied there under M. Adavani. In 1869 she went to Milan to cultivate her voice, and remained abroad six years, studying and afterward singing. She was a great favorite in Naples, as well as Milan. She returned to America under Maurice Strakosch in October, 1879, and made her *début* in opera in Philadelphia. Her personation of Marguerite in "Faust" met with warm praise, both for her pure, clear soprano voice and her dramatic skill. She filled an engagement at Booth's in 1880. She sings in most of the Italian operas, her favorite being "La Traviata."—Another daughter, **Lily** (Lily Antoinette), b. in Glasgow, Scotland, 2 Nov., 1854; d. in Philadelphia, 13 Jan., 1878. She made her first appearance in the Chestnut street theatre, Philadelphia, while her father was manager, and played juvenile parts there and elsewhere until 1875. She married Frost Thorn in 1874.—Another daughter, **May** (Marion Caroline), b. in Boston, 21 July, 1857, made her first appearance at the Chestnut street theatre, Philadelphia, under her father's management, in 1872, and has since played in juvenile parts. In the winter of 1879 she filled an engagement at the Standard theatre, New York, playing in "My Uncle's Will." She acted at the Boston museum, in the winter of 1880, as Lady Gwendoline Loftus in Boucicault's "Daddy O'Dowd," and May Edwards in the "Ticket-of-Leave Man." She married William Seymour in 1882.—A son, **Edgar Loomis,** b. in Boston, 7 Feb., 1862, played with his sister Fanny in 1879 at the Grand Opera-house, New York, personating Thorsby Gill in "Pique."—Another son, **Henry George Bryant,** b. in New York city, 19 Jan., 1866, has played at the Walnut street theatre, Philadelphia, as Hendrick, with Joseph Jefferson in the comedy of "Rip Van Winkle," and in 1879 he appeared at Wallack's theatre, New York, as Sir Joseph Porter in the juvenile "Pinafore" troupe.

DAVENPORT, Franklin, senator, b. in Philadelphia, Pa.; d. in Woodbury, N. J., about 1829. He received an academic education, and, after studying law, was admitted to the bar, and practised in Woodbury. During the Revolutionary war he served as captain of the artillery in Col. Newcomb's New Jersey brigade, and for some time was under Col. Samuel Smith in Fort Mifflin. He was a colonel in the New Jersey line during the whiskey insurrection in 1794, and marched with the troops to Pittsburg. Subsequently he became the first surrogate of Gloucester county, and was appointed U. S. senator to fill the vacancy caused by the resignation of John Rutherford, serving from 19 Dec., 1798, till 3 March, 1799. He was then sent to congress, and served through the entire term from 2 Dec., 1799, till 3 March, 1801.

DAVENPORT, Henry Kallock, naval officer, b. in Savannah, Ga., 10 Dec., 1820; d. in Franzensbad, Bohemia, 18 Aug., 1872. He entered the navy as midshipman in February, 1838, and served on various vessels until 1844, when he was made passed midshipman and attached to the coast survey. Later he sailed on the "Columbia," and from 1849 till 1853 was connected with the mail-steamship service. After being promoted to lieutenant in December, 1852, he spent some time on sea duty in various squadrons, being present at the capture of the Barrier forts, Canton river, in 1856, and later on shore duty at the U. S. observatory in Washington. During the civil war he was attached to the "Cumberland," and was present at the engagement off Hatteras Inlet. From 1861 till 1864 he commanded the steamer "Hetzel," and was en-

gaged in the naval fight on James river in 1861, in the battle of Roanoke Island, at Newbern, and was senior officer in command of the sounds of North Carolina in 1862–'4, during which time he was in several battles and expeditions in these waters, covering the flanks of the army. He became commander in July, 1862, and from 1864 till 1866 served in the Pacific squadron, commanding the "Lancaster" and "Powhatan." In 1868 he was promoted captain, and, after being engaged in navigation duty in Washington navy-yard during 1867–'70, was given command of the "Congress," of the European squadron.

DAVENPORT, John, clergyman, b. in Coventry, England, in 1597; d. in Boston, Mass., 15 March, 1670. His father had been mayor of the city. He was educated at Oxford, and became chaplain in Hilton castle, near Durham. Subsequently he preached in London, and later became minister of St. Stephen's church in Coleman street. Here he became celebrated not only for his high accomplishments as a preacher, but for very faithful discharge of his pastoral duties. In 1625 he returned to Oxford and passed his examinations for the B. D. and M. A. degrees. During the following year, in conjunction with Drs. Richard Sibbs and William Gouge, the lord-mayor of London, and others, he devised a plan to purchase "lay impropriations," from the profits of which a number of ministers should be maintained over destitute congregations. But Archbishop Laud regarded it as favorable to the cause of non-conformity, and procured its condemnation, with the confiscation of the money to the king's use. A few years later Davenport was summoned before the archbishop and subjected to considerable trouble and expense on account of his puritan principles. About this time John Cotton had resigned his charge, with a view of escaping to America, and Davenport, after an interview with him, became convinced of the desirability of withdrawing from the Established church. He then resigned from St. Stephen's, and near the end of 1633 removed to Holland, where he became the colleague of Rev. John Paget, pastor of the English church in Amsterdam; but, as he objected to the promiscuous baptism of infants, he relinquished his pastoral work and conducted private classes until 1635, when he returned to England. Meanwhile he had been actively concerned in obtaining the patent of the Massachusetts colony, and had contributed both money and time in its aid. A favorable account of the success of the colony having reached him, he sailed on the "Hector," reaching Boston on 26 June, 1637. He was heartily welcomed, and was regarded as an important aid in sustaining the interests of religion. During August of the same year he sat with the famous synod of Cambridge. In March, 1638, with many of the families that had accompanied him from England, he sailed from Boston to Quinipiac, which they afterward named New Haven.

The party reached their new home on 14 April, and on the following day, which was the Sabbath, Mr. Davenport preached under the branches of a large oak on "The Temptations of the Wilderness." In June of the following year "all the free planters" met in a barn for the purpose of holding a constitutional assembly. It was resolved that only church members should be burgesses, and Davenport was chosen one of the "seven pillars" to support the civil government. His carefulness in regard to the admission of members to the church gave him also the keys of political power. When the regicides, William Goffe and Edward Whalley, were flying in 1660, he concealed them in his own house for more than a month, and delivered a sermon, for the purpose of enlisting sympathy in their behalf, from the text "Make thy shadow as the night in the midst of noonday, hide the outcasts, bewray not him that wandereth." He continued in New Haven until 1667, when, on the death of John Wilson, he was invited to succeed him as pastor of the first church in Boston. This call he accepted, and was installed on 9 Dec., 1668. The "half-way covenant," which had been adopted by the synod held in Boston in 1662, provided that all persons who had been baptized in their infancy, and who, on arriving at years of discretion, would recognize their covenant obligations, should be allowed to bring their children for baptism. This Mr. Davenport was unwilling to accept, and he vigorously opposed its execution; consequently some of the members withdrew from the first church, and were organized into the "Old South church." The controversy continued between the two churches for many years, but Mr. Davenport died of apoplexy soon after it began, and was buried in the tomb of his friend, John Cotton. He published many sermons, theological tracts, and controversial pamphlets, and also "Instructions to Elders of the English Church" (1634); "Catechism containing the Chief Heads of Christian Religion" (1659); and "A Discourse about Civil Government in a New Plantation" (1673).—His son, **John,** b. in England in 1635; d. in Boston, Mass., 21 March, 1677, appears to have remained in England "in care of kind friends" until 1639, when he came to New Haven in one of the only two ships that ever arrived at that port from England. In May, 1657, he was admitted a freeman in New Haven, and later appears to have been one of the judges in the courts of New Haven. He removed to Boston in 1668, and was register of probate in 1675–'6, and also a merchant.—His son, **John,** clergyman, b. in Boston, 22 Feb., 1668; d. in Stamford, Conn., 5 Feb., 1731, was graduated at Harvard in 1687, and began preaching in 1690. Early in the following year he was invited to the church in Easthampton, L. I., but declined the offer, and in 1694 was ordained pastor of the church in Stamford, where he remained until his death. Prior to his settling in Stamford he appears to have taught the Hopkins grammar-school in New Haven, and he was a member of the corporation of Yale college from 1707 till 1731.—His son, **Abraham,** lawyer, b. in Stamford, Conn., in 1715; d. there, 20 Nov., 1789, was graduated at Yale in 1732, and practised law in his native town. During the Revolution he was a staunch patriot, and served on the state committee of safety. He was a man of stern integrity and generous beneficence, and in times of scarcity and high prices sold the product of his farm to the poor at less than the current value. For some time he was a member of the executive council of Connecticut, for twenty-

five years he was a member of the state legislature, and state senator from 1766 till 1784. He also held the office of judge of the court of common pleas. When he was a member of the council in Hartford, on the dark day in 1780, it was proposed to adjourn, as some thought the day of judgment was at hand; but he objected, saying: "That day is either at hand or it is not: if it is not, there is no cause of adjournment; if it is, I choose to be found doing my duty. I wish, therefore, that candles may be brought."—**James,** another son of John, clergyman, b. in Stamford, Conn., in 1716; d. in Hopewell, N. J., 10 Nov., 1757, was graduated at Yale in 1732, and subsequently pursued his theological studies in New Haven. He is supposed to have preached first in New Jersey, and then was called to Southold, L. I., where he was ordained on 26 Oct., 1738. Soon after his settlement the revival known as the "Great awakening" occurred, during which he was very active and successful. Subsequently he held services at Baskingridge, N. J., where likewise there was a revival, and in 1741 he visited Connecticut, preaching in various places, everywhere exciting great attention, At Stonington one hundred persons are said to have been converted by his first sermon. Thence he proceeded to Westerly, R. I., accompanied by the people in solemn procession, singing as they moved along the road. His zeal in effecting conversions, and the methods employed, were not altogether to the liking of his Connecticut brethren, and later the assembly decided "that the behavior, conduct, and doctrines advanced by said James Davenport, do, and have a natural tendency to disturb and destroy the peace and order of this government. Yet it further appears to this Assembly that the said Davenport is under the influence of enthusiastic impressions and impulses, and thereby disturbed in the rational faculties of his mind, and therefore to be pitied and compassionated, and not to be treated as otherwise he might be." He was expelled from the colony, but shortly afterward appeared in Boston, where his erratic actions led to his arrest and imprisonment. In the trial that followed he was declared "*non compos mentis*, and therefore not guilty." His relations with the Southold congregation were severed by a council of ministers in 1742, and a curious document giving the reasons for such action was published. In March, 1743, he went to New London, by request of a company of his partisans, to organize them into a church. Here he continued his peculiar habits, destroying by fire "wigs, cloaks, breeches, hoods, gowns, rings, jewels, necklaces, and certain books," in order "to cure his people of their idolatrous love of worldly things." He was prostrated by a serious illness, and influenced to publish a retraction of his errors in the Boston "Gazette" in July, 1744. In September, 1746, he became a member of the New Brunswick presbytery, and two years later was transferred to the New York presbytery, preaching in various places. In 1750 he visited Virginia for his health, where his labors proved acceptable and successful. On his return he was installed, in October, 1754, as pastor of the Newside church of Hopewell and Maidenhead. During the same year he was moderator of the New York synod, and delivered the opening sermon, with the title "The Faithful Minister Encouraged." Mr. Davenport continued with this parish until his death, and lies buried near Pennington, N. J. Whitefield speaks of him as "a sweet, pious soul."—**John,** son of Abraham, lawyer, b. in Stamford, Conn., 16 Jan., 1752; d. there, 28 Nov., 1830, was graduated at Yale in 1770, and was a tutor there during 1773–'4. After studying law, he was admitted to the bar and practised in Stamford. During the Revolutionary war he served in the commissary department, and attained the rank of major. He was elected to congress as a federalist, and served continuously from 2 Dec., 1799, till 3 March, 1817. —**James,** son of Abraham, lawyer, b. in Stamford, Conn., 12 Oct., 1758; d. there, 3 Aug., 1797. He was graduated at Yale in 1777, and served in the commissary department in the war of the Revolution. He was a judge of the court of common pleas, and a representative in congress from 5 Dec., 1796, till 3 Aug., 1797. He was a member of the corporation of Yale college from 1793 till 1797, and President Dwight says of him: "Few persons have been more, or more deservedly, esteemed than the Hon. James Davenport."

DAVENPORT, Nicholas T., actor, b. in 1831; d. in Boston, Mass., 26 Aug., 1867. His real name was Deven, and his first appearance on the stage was in 1849, at the Chatham theatre, New York. In September, 1850, he made his first appearance in Philadelphia, at the Arch street theatre, as Valaire in "The Secret," but the greater portion of his life was spent in Boston, where he was connected with a theatre company that was organized in that city. He was a careful and conscientious actor, and maintained a good position in society by his talents and integrity. Mr. Davenport was likewise an excellent sketch-writer.

DAVENPORT, Richard, colonist, b. in England in 1606; d. in Boston, Mass., 15 July, 1665. He came to America in the ship "Abigail" with John Endicott, leaving Weymouth, England, 20 July, 1628. In November, 1636, he was elected ensign of Gov. Endicott's company, and at his command cut out the cross from the British flag. In memory of this circumstance he subsequently named a daughter Truecross. He was lieutenant of a Salem company in the Pequot war, and became commander of the castle in Boston harbor in July, 1645. He was killed by lightning.—His grandson, **Addington,** jurist, b. in Boston, Mass., 3 Aug., 1670; d. there, 2 April, 1736. He was graduated at Harvard in 1689, visited England, Spain, and the West Indies, and, on his return to Boston, became register of deeds for Suffolk county. He was one of the founders of Brattle street church in 1698. He was afterward successively clerk of the house of representatives, supreme court, and court of common pleas, was elected a member of the council, served as a representative in 1711–'3, and was judge of the supreme court from 1715 till the time of his death.—His son, **Addington,** b. in Boston, Mass., 16 May, 1701; d. in London, England, 8 Sept., 1746, was graduated at Harvard in 1719, studied law, and was attorney-general from 1828 till 1832, but turned his attention to the ministry and went to England to receive orders. On his return he became minister of St. Andrew's church, Scituate, Mass., on 15 April, 1730, and remained until 15 April, 1737, when he was chosen assistant minister of the 1st Episcopal church in Boston (King's chapel). Here he remained until 8 May, 1740, when he was elected the first rector of Trinity church, Boston. On leaving Scituate he gave his house and land to the Society for propagating the gospel in foreign parts.

DAVENPORT, Thomas, inventor, b. in Williamstown, Vt., 9 July, 1802; d. in Salisbury, Vt., 6 July, 1851. He was apprenticed at the age of fourteen to a blacksmith, and his opportunities for education were limited. In 1833 he began the study of electro-magnetism, and in 1835 exhibited

a rotary engine driven by electricity, at the Rensselaer institute in Troy, and the Franklin institute in Philadelphia. Late in the year he constructed a small circular railway driven by an electro-magnetic engine. Patents were secured, a company formed, and the manufacture of electro-magnetic engines, as a motive power, begun. But in New York city in 1837, by the dishonesty of its agent, the company became embarrassed and was disbanded. In the prosecution of his experiments he found that a bolt of iron could be drawn with great force into a helix of wire whenever the battery current was suffered to pass through the coil. He immediately constructed a small engine on this principle, which resembled a little steam-engine, the repeated reversal of the magnetic poles producing a movement like that of a piston-rod, instead of the rotary motion hitherto employed. Patents were secured, engines manufactured, and he began the publication of a newspaper, "The Electro-Magnet," which was printed on a press propelled by one of these engines. His experiments were so numerous and costly as to exhaust his resources, and in 1842 he returned with his family to his home in Brandon, Vt., and thence to Salisbury. In 1846 he turned his attention to the application of the electric current to the strings of musical instruments. As applied by him, the impulsive and evanescent nature of the tone is changed at the will of the player into a full, perfect, and prolonged vibration. The caveats protecting this invention were prepared for filing in the U. S. patent-office, when he was stricken by a fatal illness.

DAVENPORT, William, philanthropist, b. in Culpepper county, Va., 12 Oct., 1770; d. in Walnut Fountain, Caldwell co., N. C., 19 Aug., 1859. About the close of the Revolutionary war he went with his father to what is now Mitchell county, N. C. He represented Burke county in the legislature in 1800, and was state senator in 1802. He was also justice of the peace, county surveyor, and a colonel of militia. Col. Davenport was the chief founder of Davenport female college, at Lenoir, N. C. He married the widow of Maj. Charles Gordon, one of the heroes of King's Mountain.

DAVENPORT, William, soldier, b. in North Carolina; d. in Philadelphia, Pa., 12 April, 1858. He was appointed captain in the 16th infantry, 28 Sept., 1812, and distinguished himself at Chippewa and Lundy's Lane in the war with Great Britain. He was brevetted major on 28 Sept., 1822, "for ten years' faithful service," and made major in the 6th infantry, 16 Dec., 1825, lieutenant-colonel in the 1st infantry, 4 April, 1832, and was distinguished at the battle of Bad Axe, under Gen. Atkinson, in the Black Hawk war. He was brevetted colonel "for meritorious service in Florida," 7 July, 1838, was made colonel of the 6th infantry, 14 June, 1842, transferred to the 1st infantry in July, 1843, and resigned on 31 Jan., 1850.

DAVENPORT, William, clergyman, b. in Kentucky in 1797; d. in Nebraska City, Neb., 24 June, 1869. He was a slave-holder in early life, but manumitted his slaves before 1834 and removed to Tazewell county, Ill., where he was pastor of the Christian denomination for over thirty years. In 1848, with his brother, he established a school at Walnut grove, which afterward became Eureka college. He was a Union man during the civil war, and was taken prisoner by Gen. John Morgan's men.

DAVID, Edward (dah-veed'), Flemish buccaneer, lived in the latter part of the 17th century. He enrolled himself in early life in the Brotherhood of the Coast, was soon acknowledged as a leader, and sailed in 1683 with an expedition, consisting of the frigate "Tiger," of 36 guns, and two smaller vessels, with an English crew, for the Pacific coast of South America, by way of the strait of Magellan. The Viceroy of Peru, Duke of La Plata, received information, 12 March, 1684, that David's ships had been sighted on the coast of Chili, and in the King's islands, on the northern coast. David was joined by two parties of French filibusters, who had landed in the gulf of Darien and, crossing the isthmus to Panama, had captured some vessels, with which they were devastating the coast of Mexico. With this re-enforcement, his squadron consisting now of five vessels and a fire-ship, he attacked the Peruvian coast and vessels, and laid waste a number of fertile districts of Peru and Chili. The viceroy fitted out an expedition against the audacious buccaneer, and after many delays the squadron, consisting of four powerful galleons and two fire-ships, sailed, 7 May, 1685, from Callao under the command of the chief admiral of the Pacific coast, Antonio Beas, together with the viceroy's brother-in-law, Tomás Paravicino, Vice-Admiral Santiago Pontejos, and a large number of the nobility of Lima. After landing the government treasure and silver remittances of the Lima merchants in the port of Pericos, to be transported overland to Porto Bello, he sailed in search of the pirates, whom he met near the King's islands. On 8 June a spirited battle was fought, and the buccaneers were almost defeated, when the want of united action among the Spanish leaders gave the buccaneers an opportunity to escape. The French filibusters now separated from David, one of their ships sailing for the coast of Mexico, and the other for Chili, intending to return to the Atlantic coast of the continent through the straits of Magellan. The Spanish fleet was also in need of repairs, and anchored in Paita, where, by carelessness, the admiral's ship took fire, and over 400 persons perished in the flames, only a son of the vice-admiral, Pontejos, being saved. Emboldened by this disaster to the Spanish navy, David returned to continue his depredations on the Peruvian coast, and in the latter part of 1685 sacked the cities of Guayaquil, Paita, Santa, and Casma, and in March, 1686, the city of Saña. At Casma he ordered the priest to be killed, as he thought he was concealing his treasures. At Huaura he took prisoner the mayor, Blas de la Carrera, and, a large sum for his ransom not being delivered promptly, David had the mayor's head cut off and hoisted at the yard-arm of his frigate. He afterward occupied and plundered Cañete, Pisco, and, on 11 June, after a severe fight, the city of Parácas, taking prisoners the principal persons of the city, whom he released for a ransom of $24,000. Hearing that a new and powerful expedition was fitting out at Callao against his forces, he abandoned the coast of Peru, sailing to the northern shores, where he continued his plundering expeditions against the cities along the coasts of Mexico and Central America. In 1688 he took advantage of an amnesty granted by James II. and returned to England, where he lived in peace to old age, enjoying the riches gathered during his five years' cruise.

DAVID, Jean Baptist, R. C. bishop, b. near Nantes, France, in 1761; d. in Bardstown, Ky., in 1841. At the age of fourteen he was sent to a college conducted by Oratorian priests, after which he entered the diocesan seminary of Nantes. He was ordained deacon in 1783, joined the Sulpitians, and, on the completion of his theological studies in their college of Issy, near Paris, was raised to the priesthood in 1785. Until 1790 he discharged the duties

of professor of philosophy and theology in the colleges of his order. During the next two years he was obliged to conceal himself from the terrorists. He embarked for this country in 1792, and studied English during the voyage. Bishop Carroll sent him to superintend some missions in the lower part of Maryland. He was the first American priest to institute spiritual retreats for the benefit of the laity. In 1804 he was recalled and appointed professor in Georgetown college, where he remained two years. In 1806, in compliance with the desire of the Sulpitians of Baltimore, he accepted a professorship in the theological seminary and college of St. Mary's. Though his health was impaired by his labors, he offered his services to Bishop Flaget, and accompanied him to the west in 1810. He established the theological seminary of St. Thomas in Bardstown, Ky., and discharged the office of president, as well as attending several congregations in other parts of the state. Father David also introduced the Sisters of Charity into Kentucky, founded a convent of the order, and was appointed their spiritual director by Bishop Flaget. He was nominated bishop of Philadelphia, but declined the honor. Yet when Bishop Flaget petitioned the pope, in 1817, to appoint him coadjutor of the diocese of Bardstown, he reluctantly accepted the place. In 1823 he obtained a charter from the legislature of Kentucky, raising the college he had founded to the rank of a university. Bishop David published a large number of works, chiefly controversial or religious, and translations from the French. The principal are "Vindication of the Catholic Doctrine concerning the Use and Veneration of Images," "Address to his Brethren of other Professions," "On the Rule of Faith," "True Piety, or the Day Well Spent," and a Catholic hymn-book.

DAVIDGE, William Pleater, actor, b. near Ludgate Hill, London, England, 17 April, 1814. He joined an amateur dramatic society, and made his first appearance, at Drury Lane theatre, in the minor part of James in "The Miller's Maid." He appeared at Nottingham in 1836, and acted in London, on 26 Sept. of that year, in the "Haunted Tower." After acting in various parts of Great Britain, he settled in Manchester, and in 1850 came to the United States, where he made his first appearance in the old Broadway theatre, New York, as Sir Peter Teazle. He supported the popular stars of the day—Edwin Forrest, Gustavus V. Brooke, Julia Dean, Lola Montez, and others—and, after leaving the old Broadway theatre in 1855, made a tour through the country. He was a member of F. B. Conway's "star combination," and in 1863 was one of Mrs. John Wood's company at the Olympic theatre, where he remained two seasons. He afterward took part in the Shakespearean revivals at Winter Garden theatre, and, in August, 1867, appeared as Eccles, in "Caste," at the new Broadway theatre near Broome street. He was at Daly's Fifth avenue theatre from 1869 till 1877, then travelled with Miss Fanny Davenport's company, and in 1879 was the original Dick Deadeye, in "Pinafore," at the Standard theatre. In 1885 he became a member of the Madison square theatre company. Mr. Davidge has played over one thousand parts during his career, and played them all with zeal, intelligence, and humor. Among his best parts, besides those already mentioned, are Bishopriggs in "Man and Wife," Old Hardy in the "Belle's Stratagem," Hardcastle in "She Stoops to Conquer," and Croaker in "The Good-Natured Man." In Shakespeare's comedies he has been successful as Caliban, Touchstone, Dogberry, Nick Bottom, and Old Gobbo.—His son, **William,** comedian, b. in Manchester, England, 11 March, 1847, made his first appearance in the French theatre, New York, in the burlesque of "The Lady of the Lions."

DAVIDSON, George, astronomer, b. in Nottingham, England, 9 May, 1825. He came to the United States in 1832, and was graduated at the Central high-school in Philadelphia in 1845, standing first in his class. While a student he had shown interest in scientific work, and had assisted Alexander D. Bache in his observations of the magnetic elements at Girard college. On his graduation he became the secretary of Prof. Bache, who had been appointed superintendent of the coast-survey. In 1846–'50 he was occupied in geodetic field-work, and in astronomy, serving in the different eastern states. In 1850 he went to California under the auspices of the coast-survey, and was for several years engaged in the determination of the latitude and longitude of prominent capes, bays, etc., and of the magnetic elements of the Pacific coast, reporting also upon the proper locations for lighthouses. His work included a survey of Washington and Puget sounds, and he had charge of the main triangulation of the coast in the region of San Francisco. From 1861 till 1867 he was on the Atlantic seaboard, principally engaged in engineering work on coast and river defences. At one time he was in command of the coast-survey steamer "Vixen," and later performed astronomical work along the eastern coast. In 1866 he became chief engineer of an expedition for the survey of a ship-canal across the isthmus of Darien, and, in 1867, was appointed to make a special examination and report upon the geography and resources of Alaska, pending its purchase; and his published report and conferences with congressional committees influenced the passage of the bill. He was placed in charge, during 1867, of the work of the coast-survey on the Pacific, planned work for the land parties from 1868 till 1875, and inspected all the fields of work. From 1876 till 1886 he had charge of the main triangulation and astronomical work on the western coast; and the records of the computing division show that the results of his observations stand higher than any ever executed in America, Europe, or India, and they have been characterized as "unique in the history of geodesy." In 1881 he measured the Yolo base line, the longest yet attempted in trigonometrical operations, and the system of triangulation directly connected therewith is called in his honor the "Davidson quadrilaterals." He founded the Davidson observatory in San Francisco, which was the first astronomical observatory on the Pacific coast of North America, and in 1869 brought the Pacific geodetic of the coast survey in telegraphic longitude connection with Greenwich. His astronomical work includes the observation of the total solar eclipse under the 60th parallel, in 1869; determination of the 120th

meridian in 1873; charge of the U. S. transit of Venus expedition, in 1874; recovery of the transit of Venus station of 1769 in Lower California occupied by Auteroche de la Chappe; observation of the total solar eclipse of 7 Jan., 1880; and in 1882 charge of the party to observe the transit of Venus in New Mexico. He holds the honorary chair of geodesy and astronomy in the University of California, and was a regent of that institution from 1877 till 1884. Prof. Davidson has been appointed on many important government commissions, and in such capacity has made valu able reports to the departments. He is a member of numerous scientific societies, and has been president of the Geographical society of the Pacific states since 1881, and of the California academy of sciences from 1871 till 1886. In 1874 he was elected to the National academy of sciences. His publications, besides numerous papers contributed to the California academy of sciences, are principally special reports contained in government publications, and the "Coast Pilot of California, Oregon, and Washington" (1857–'87) and the "Coast Pilot of Alaska" (Part I., 1868).—His brother, **Thomas,** naval constructor, b. in Nottingham, England, 28 Aug., 1828; d. in Philadelphia, Pa., 18 Feb., 1874, came to the United States, at the age of four years, with his parents, who settled in Philadelphia. He early developed a talent for mechanical invention and construction, in consequence of which he was apprenticed to the trade of ship-building with Matthew Van Dusen, at the same time studying mathematics with his brother George. His capabilities soon attracted the attention of John Lenthall, then chief constructor of the U. S. navy. In 1850, when but twenty-two years old, he built his first vessel "from the stumps" on the banks of the James river, and soon afterward entered into business in Philadelphia. In 1861 he was appointed quartermaster over the ship-carpenters in the Philadelphia navy-yard, and in 1863 was promoted to assistant naval constructor. He attained the full grade in 1866, with the relative rank of commander, which office he held until his death. At one time during the civil war he was conducting the repairs, at the Philadelphia navy-yard, of forty-two vessels, large and small, and also building several new ones. The "Tuscarora," sister ship of the "Kearsarge," was built under his direction in fifty-eight working days, and the "Miami" in twenty-seven days. But his greatest feat was the building, in seventy days, of the "Juniata" (1,240 tons, 7 guns) from the frame of a Florida live-oak frigate that had been seasoned for twenty-three years. Mr. Davidson displayed his engineering abilities in the floating of the "Monongahela," which had been driven inland on the island of Santa Cruz during the earthquake of 18 Nov., 1867, and left stranded forty feet high. With a body of skilled men selected from the different navy-yards, in a little over three months he succeeded in moving the ship sidewise to the water's edge, and thence for 2,500 feet over the coral-bed to deep water. Subsequently he was ordered on duty at the bureau of construction in Washington, and was busy with plans for developing a navy of armored vessels, torpedo-boats, and fast cruisers. The models and drawings for the first large torpedo-boats built in New York were executed by him. He was about to be sent to Europe for an exhaustive study of foreign navies and navy-yards, when his health failed.

DAVIDSON, James Wood, author, b. in Newberry district, S. C., 9 March, 1829. He was graduated at South Carolina college, Columbia, in 1852, studied languages under private tutors, in 1854–'9 was professor of Greek in Mount Zion college, Winnsboro, S. C., and in 1859 became principal of Carolina high-school, Columbia. In 1862–'3 he was adjutant of infantry in Jackson's corps of Lee's army. He left Columbia in 1871, and lived two years in Washington, D. C., and eleven years in New York city, where he was literary editor of the "Evening Post" in 1873, and American correspondent of the London "Standard" in 1873–'8. He removed to Figulus, Dade co., Fla., in 1884, where he continues his literary work, and is engaged in fruit-culture. In 1885 he was a member of the Florida constitutional convention. Mr. Davidson has published "Living Writers of the South" (New York, 1869); "School History of South Carolina" (Columbia, 1869; new ed., 1886); and "The Correspondent" (New York, 1886); and has edited "Lyrics and Sketches," by William M. Martin (1865), and "The Educational Year-Book" (1872). He has in preparation a "Dictionary of Southern Authors," and "Helen of Troy," a fiction of Homeric times.

DAVIDSON, John Wynn, soldier, b. in Fairfax county, Va., 18 Aug., 1824; d. in St. Paul, Minn., 26 June, 1881. He was graduated at the U. S. military academy in 1845, assigned to the 1st dragoons, and accompanied Gen. Kearny to California in 1846, in charge of a howitzer battery. During the Mexican war he served in the Army of the West, being present at the combats of San Pasqual, San Bernardo, San Gabriel, and Mesa. He was a scout in 1850, and was at the action of Clear Lake, 17 May, and at Russian River, 17 June, under Capt. Nathaniel Lyon. From this time till the civil war he continued on frontier and garrison duty. He fought the battle of Cieneguilla, New Mexico, on 30 March, 1854, against the Apache and Utah Indians, losing three fourths of his command, and, being himself wounded. He was promoted to captain on 20 Jan., 1855, to major on 14 Nov., 1861, and, after serving in defence of Washington, was commissioned brigadier-general of volunteers on 3 Feb., 1862. In the Virginia peninsular campaign of 1862 he commanded a brigade in Gen. Smith's division, and received two brevets for gallant conduct—that of lieutenant-colonel for the battle of Gaines's Mills, and that of colonel for Golding's Farm. He was also engaged at Lee's Mills, Mechanicsville, Savage Station, and Glendale. He commanded the St. Louis district of Missouri from 6 Aug., till 13 Nov., 1862, the Army of Southeast Missouri till 23 Feb., 1863, and the St. Louis district again till 6 June, co-operating with Gen. Steele in his Little Rock expedition and directing the movements of troops against Pilot Knob and Fredericktown, and in the pursuit of the enemy during Marmaduke's raid into Missouri. He led a cavalry division from June till September, commanded in the actions at Brownsville, Bayou Metre, and Ashley's Mills, Ark., and took part in the capture of Little Rock. He was made chief of cavalry of the military division west of the Mississippi on 26 June, 1864, and on 24 Nov. led a cavalry expedition from Baton Rouge to Pascagoula. He was brevetted brigadier-general in the regular army on 13 March, 1865, for the capture of Little Rock, and major-general for his services during the war. He was made lieutenant-colonel of the 10th cavalry on 1 Dec., 1866, was acting inspector-general of the Department of the Missouri from November, 1866, till December, 1867, and professor of military science in Kansas agricultural college from 1868 till 1871. He then commanded various posts in Idaho and Texas, and, in 1877–'8, the district of Upper Brazos, Tex. On 20 March, 1879, he was made colonel of the 2d cavalry.

DAVIDSON, Lucretia Maria, poet, b. in Plattsburg, N. Y., 27 Sept., 1808; d. there, 27 Aug., 1825. Her father, Oliver Davidson, was a physician, and her mother, Margaret Miller, was an author. A volume of selections from Mrs. Davidson's writings was published, with a preface by Miss C. M. Sedgwick, in 1844, after the poems of her daughter had made them famous. Lucretia, when four years old, was sent to Plattsburg academy, where she learned to read and to form the Roman letters in sand. Soon afterward her mother observed that her writing-paper was disappearing strangely, and finally discovered a pile of little blank-books, containing artfully sketched pictures, with descriptions in poetry, all printed in Roman letters, turned and twisted in curious fashion. The child was so mortified at the discovery of what she had been doing that she burned all her work. She learned to write in her seventh year, and developed a great fondness for reading. Before she was twelve she had read much history, and the dramatic works of Shakespeare, Goldsmith, and Kotzebue, with many popular novels and romances. She continued to write poetry, and, when nine years old, composed an "Epitaph on a Robin," which is the earliest remaining specimen of her verse. She wrote poetry rapidly, when in the mood, but preferred to be alone while composing, often burning an unfinished piece that had been seen by others. She was fond of childish sports, but would often stop in the midst of them to write, when struck with an idea for a poem. When about fourteen years old she was allowed to attend a ball in Plattsburg, but, in the midst of her preparations, was found sitting in a corner writing verses on "What the World Calls Pleasure." Her mother's friends advised that pen and ink be kept from her, and, hearing of this, she voluntarily gave up her favorite pursuit for several months, till her mother, seeing that she grew melancholy, advised her to resume it. In October, 1824, a gentleman visiting Plattsburg saw some of her verses, and offered to give her a better education than her parents could afford. She was accordingly sent to Mrs. Willard's school in Troy, N. Y., but her studies undermined her health, and she returned home. After her recovery she was sent to Miss Gilbert's school in Albany, but remained there only about three months before she was taken home to die. Miss Davidson was a small, delicately formed brunette. "She had all the elements of personal beauty," wrote Mrs. Willard, "yet she was so shy that many a girl less perfectly endowed in that respect would be sooner noticed by a stranger." Her poetical writings include, beside the numbers of pieces destroyed by her, 278 poems of various lengths. Among these are five pieces, of several cantos each. The poet Southey said of her: "In our own language, except in the cases of Chatterton and Kirke White, we can call to mind no instance of so early, so ardent, and so fatal a pursuit of intellectual advancement." Her poems were collected and published, with a sketch by S. F. B. Morse, under the title "Amir Khan, and Other Poems" (New York, 1829; new ed., edited by her brother, M. O. Davidson, with illustrations by Darley, 1871). See a biography by Catharine M. Sedgwick in Sparks's "American Biographies," vol. vii.—Her sister, **Margaret Miller,** b. in Plattsburg, N. Y., 26 March, 1823; d. in Saratoga, N. Y., 25 Nov., 1838, had the same sensibility and precocity, and began to write at six years of age. At ten, while visiting in New York, she wrote, in two days, a drama entitled the "Tragedy of Alethia," and acted in it with some young friends, taking the principal part. Notwithstanding her sister's fate, her intellectual activity was not restrained. Her poems were introduced to the world by Washington Irving, and the works of the two sisters were afterward published together (New York, 1850).—Their brother, **Levi P.,** b. in 1817; d. in Saratoga, N. Y., 27 June, 1842, was graduated at the U. S. military academy in 1837, assigned to the 1st dragoons, and after serving on frontier duty at Fort Leavenworth, Kan., and Fort Wayne, Indian Territory, was promoted 1st lieutenant in 1840. He wrote verses with elegance and ease.

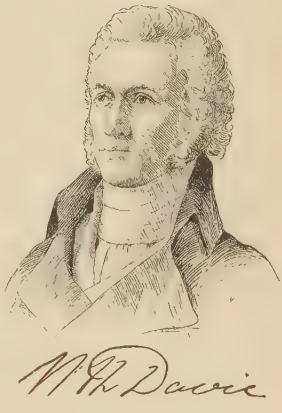
DAVIDSON, Robert, educator, b. in Elkton, Md., in 1750; d. 13 Dec., 1812. He was graduated at the University of Pennsylvania in 1771, appointed instructor there in 1773, and in 1774 was given the chair of history and belles-lettres. In the latter year he was also licensed to preach, and a year later was ordained by the second Philadelphia presbytery, becoming Dr. Ewing's assistant in the first church. In 1775 he composed a metrical dialogue, which was recited at commencement before the Continental congress, and in July of the same year, one month after the battle of Bunker Hill, delivered before several military companies a sermon from the text "For there fell down many slain, because the war was of God." In 1777 the occupation of Philadelphia by the British compelled him to retire to Delaware. In 1784 he was appointed vice-president of the newly organized Dickinson college, Carlisle, Pa., and given the chair of history and belles-lettres there, also acting as pastor of the Presbyterian church in Carlisle. He held this last office till his death, and succeeded by his tact in harmonizing the discordant elements in his congregation. In 1794 he preached twice before troops on their way to suppress the whiskey insurrection, and in 1799 delivered a eulogy of Washington. After Dr. Nisbet's death in 1804, Dr. Davidson discharged the duties of president of the college till 1809, when he resigned. He had a high reputation as a scholar, but was especially fond of astronomy, and invented an ingenious cosmosphere or compound globe. He was also a skilful draughtsman, and was the composer of several pieces of sacred music. Besides numerous sermons, he published an "Epitome of Geography, in Verse," for the use of schools (1784); "The Christian's A, B, C," or the 119th psalm in metre, each stanza beginning with a different letter (1811); and a "New Metrical Version of the Psalms," with annotations (1812).—His son, **Robert,** clergyman, b. in Carlisle, Pa., 23 Feb., 1808; d. in Philadelphia, Pa., 6 April, 1876, was graduated at Dickinson college in 1828, and at Princeton theological seminary in 1831. He was pastor of the second Presbyterian church in Lexington, Ky., in 1832–'40, and in the latter year became president of Transylvania university there. After his resignation in 1842 he held

pastorates in New Brunswick, N. J., in 1843–'59, New York city in 1860–'4, and Huntington, L. I., in 1864–'8, removing to Philadelphia in the last-named year. Mr. Davidson was for a quarter of a century a member of the American board of commissioners for foreign missions, was permanent clerk of the general assembly in 1845–'50, and in 1869 was a delegate to the general assembly of the Free church of Scotland, in Edinburgh.

DAVIDSON, Thomas, philosopher, b. in the parish of Deer, Aberdeenshire, Scotland, 25 Oct., 1840. He was graduated at the University of Aberdeen in 1860, being a first graduate and Greek prizeman. From 1860 till 1863 he was rector of the grammar-(Latin-) school of Old Aberdeen, and from 1863 till 1866 master in several English schools, spending his vacations on the continent. In 1866 he removed to Canada, to occupy a place in the London collegiate institute. In the following year he came to the United States, and, after spending some months in Boston, removed to St. Louis, where, in addition to work on the New York "Round Table" and the "Western Educational Monthly," he was classical master in the St. Louis high-school, and subsequently principal of one of the branch high-schools. In 1875 he removed to Cambridge, Mass. He has travelled extensively in Europe, especially in Greece and Italy. In the former country he devoted himself mainly to archæology and modern Greek, in the latter to the study of the Catholic church, of scholastic philosophy, of Dante, and of Rosmini. For studying the Catholic church unusual opportunities were thrown open to him, chiefly through the Princess Carolyne of Sayn-Wittgenstein and Cardinal Hohenlohe, who offered him an apartment in his episcopal palace at Albano, and also in the villa D'Este at Tivoli. His interest in Thomas Aquinas having come to the ears of the pope through Bishop (now Cardinal) Schiaffino, he was invited to the Vatican, where the holy father suggested that he should settle in Rome and aid his professors in editing the new edition of St. Thomas. For more than a year he lived at Domodossola, in Piedmont, where the Institute of charity, founded by Rosmini, has its novitiate. Here he produced the work that first brought Rosmini to the notice of English-speaking students: "The Philosophical System of Antonio Rosmini-Serbati, translated, with a Sketch of the Author's Life, Bibliography, Introduction, and Notes" (London, 1882). At the same time he wrote essays on classical subjects, mainly archæological, published under the title "The Parthenon Frieze and Other Essays" (London, 1882). He also translated "Rosmini's Psychology" (3 vols., London, 1884). In 1883 he occupied a villa in Capri, and there translated Rosmini's "Anthropology." Mr. Davidson has been a frequent contributor to periodicals, and delivered courses of lectures, before the Lowell institute in Boston and elsewhere, on modern Greece, on Greek sculpture, etc. He was mainly instrumental in founding "The Fellowship of the New Life," which has branches in London and New York. He speaks French, German, Italian, and modern Greek. Besides the works named, Mr. Davidson has published "The Fragments of Parmenides," in English hexameters, with introduction and notes (St. Louis, 1869); "On the Origin of Language," from the German of W. H. J. Bleek (New York, 1869); "A Short Account of the Niobe Group" (New York, 1874); "The Place of Art in Education" (Boston, 1886); "Giordano Bruno, and the Relation of his Philosophy to Free Thought" (Boston, 1886); and a "Hand-Book to Dante, from the Italian of Scartazzini, with Notes and Additions" (Boston, 1887).

DAVIDSON, William, soldier, b. in Lancaster county, Pa., in 1746; killed at the battle of Cowan's Ford, N. C., 1 Feb., 1781. His father removed with his family to Rowan county, N. C., in 1750, and William, the youngest son, was educated at Queen's museum, afterward Liberty hall, Charlotte. At the beginning of the Revolution he was appointed major in one of the first regiments raised in North Carolina, and was in the engagements at Brandywine, Germantown, and Monmouth. In November, 1779, he was detached to re-enforce the army of Gen. Lincoln in the south, at which time he commanded his regiment with the rank of lieutenant-colonel. In an engagement with a party of loyalists, near Calson's Mill, a ball passed through his body; but he took the field eight weeks later, with the rank of brigadier-general conferred on him by the state of North Carolina, and exerted himself to interrupt the progress of Cornwallis. Detached by Gen. Greene on 31 Jan., 1781, to guard the wagon ford chosen by Cornwallis for his night passage of the Catawba, Gen. Davidson posted himself on the bank of the river with 250 men. The British army forced its way across, reserving its fire until it had reached the bank, when the militia fled. Gen. Davidson was the last on the field, and was pierced by a rifle-ball through the breast. Congress voted $500 for a monument to him, but it has never been erected. Davidson college, N. C., is named in his honor, and his sword hangs in one of its halls.

DAVIE, William Richardson, soldier, b. in Egremont, near Whitehaven, England, 20 June, 1756; d. in Camden, S. C., 8 Nov., 1820. He came to this country with his father in 1763, and was adopted by his uncle, Rev. William Richardson, who lived near the Catawba, in South Carolina. Young Davie was graduated at Princeton, in the autumn of 1776, after serving with a party of his fellow-students as a volunteer in the vicinity of New York during the summer of that year. He then began to study law in Salisbury, N. C., but was commissioned lieutenant of a newly organized company of dragoons on 5 April, 1779, and, succeeding to the command of the troop, joined Pulaski's legion and rose to the rank of major. At the battle of Stono Ferry, 12 June, 1779, he received a severe wound in the thigh, and on his recovery returned to Salisbury, resumed his studies, and was admitted to the bar in September, 1779. In the winter of 1780 he raised a body of cavalry, spent in its equipment the last shilling of the estate bequeathed to him by his uncle, and with this force protected the southwestern part of the state from the attacks of the British in South Carolina. He fought in the battles at Hanging Rock and Rocky Mount, did good service in saving the remnant of the army after Gates's defeat at Camden, and on 5 Sept., 1780, was appointed colonel commanding the cavalry in North Carolina. He surprised the



enemy at Wahab's plantation, and when Cornwallis entered Charlotte, N. C., he withstood three charges by Tarleton's legion, in the presence of the whole British army, and then retired in good order. In 1781 Col. Davie, yielding his hopes of gaining additional honor in the field, accepted, at the urgent request of Gen. Greene, the post of commissary-general of the southern army, and, by his zeal, influence, and local knowledge in this difficult position, added much to the success of the military operations that followed. After the war he settled at Halifax, N. C., in the practice of his profession, and, by his sagacity and eloquence, soon rose to eminence. He served many terms in the legislature, and was a member of the convention that framed the Federal constitution, favoring the equal representation of the states in the national senate, and the taking into account of the slaves in assigning representatives to the south. His name does not appear as a signer of the document, as he was called home by illness, but he was one of its most earnest defenders in the North Carolina convention that followed. He drew up the act for establishing the University of North Carolina, which, after much opposition, was passed in 1789, and was active in providing for its support. The erection of its buildings, the choice of professors, and the arrangement of studies, received his personal attention. He was influential in securing the cession of the present state of Tennessee, was three times a commissioner to settle boundary disputes between North and South Carolina, and in 1794 was made major-general of militia. He was elected governor of the state in 1799, but before the close of his term was sent by President Adams, with Oliver Ellsworth and William V. Murray, on a special embassy to the French government, the result of which was the convention signed 30 Sept., 1800. President Jefferson appointed him to treat with the Tuscarora Indians in 1802. In 1803 he was an unsuccessful candidate for congress, and after his defeat he withdrew to his farm on the Catawba river, S. C., where he spent the rest of his days, declining a major-general's commission in the U. S. army in 1813 on account of failing health. He was a man of commanding appearance and dignified yet affable manners. See his life, by Fordyce M. Hubbard, in Sparks's "American Biographies."

DAVIES, Charles, mathematician, b. in Washington, Litchfield co., Conn., 22 Jan., 1798; d. in Fishkill Landing, N. Y., 17 Sept., 1876. When a boy he removed with his father to a farm in St. Lawrence county, N. Y., then an unsettled part of the state. He entered the U. S. military academy in December, 1813, graduating in December, 1815, and was assigned to the light artillery. After brief service in New England garrisons, he was transferred to the engineer corps in 1816, and ordered to duty at West Point, but resigned on 1 Dec., 1816, and became principal assistant professor of mathematics and natural and experimental philosophy. He was made full professor of mathematics on 1 May, 1823, and held the office till 31 May, 1837, when he was forced to resign by illness consequent upon overwork in preparing his mathematical text-books. A trip to Europe restored his health, and he accepted the chair of mathematics in Trinity college, Hartford, Conn., holding it from 1839 till 1841, when he was again forced to resign by threatened illness, and was appointed paymaster in the U. S. army, with the staff rank of major. He served as treasurer of the U. S. military academy from 1841 till 1846, and in 1848 became professor of mathematics and philosophy in the University of New York. In the following year he retired to Fishkill Landing, on the Hudson, that he might have leisure to complete his series of text-books. After teaching in the Normal school at Albany, he was made professor of higher mathematics in Columbia college, 18 May, 1857, and in June, 1865, emeritus professor. His works, which are distinguished by plainness and close logical arrangement, include an entire series of mathematical text-books (1837–'67), extending from a primary arithmetic to the higher mathematics, and including editions of Legendre's "Geometry" (1840) and Bourdon's "Algebra" (1851). Among his more advanced works are "Descriptive Geometry" (New York, 1826); "Surveying and Navigation" (1830); "Shades, Shadows, and Perspective" (1832); "Differential and Integral Calculus" (1836); "Logic and Utility of Mathematics" (1850); and a "Mathematical Dictionary," written in conjunction with his son-in-law, Prof. William G. Peck, of Columbia (1855). His last work was a treatise on "The Metric System" (1870).—His brother, **Henry Eugene,** b. in Black Lake, near Ogdensburg, N. Y., 8 Feb., 1805; d. in New York city, 17 Dec., 1881, spent his early years upon his father's farm, and, after receiving a common-school education, began in 1819 the study of law with Judge Alfred Conkling, living, as was then the custom, in the family of his preceptor. He was admitted to the bar at Utica, N. Y., in 1826, and began to practise in Buffalo, where he soon became prominent in politics as a whig. He removed to New York in 1830, and formed a partnership with Judge Samuel A. Foot, which was dissolved in 1848, and Mr. Davies entered into a new one with Judge William Kent, son of Chancellor Kent. In 1850 he was chosen corporation counsel, and was elected justice of the state supreme court in 1855, but was obliged to establish his right to the office by litigation, as no notice of a vacancy had been filed with the sheriff. In the summer of that year he accompanied ex-President Fillmore to Europe, having been his confidential adviser during his term of office as chief magistrate. In the autumn of 1859 Judge Davies was elected to the court of appeals, where he served from 1 Jan., 1860, till 1869, being the chief justice for several years. He then entered into partnership with Judge Noah Davis, with whom he practised until the latter was elevated to the bench. After that time Judge Davies was conspicuous only in his practice as counsel and trustee of the Mutual life insurance company, receiver of the Erie railway, counsel for the American exchange bank, and member of the commission to determine the advisability of constructing an underground railroad in Broadway. The day before his last illness he sat for many hours listening to testimony on that subject. For several years before his death he took no part in politics, but served often as referee or chamber-counsel in important legal cases.—Another brother, **Thomas Alfred,** soldier, b. in St. Lawrence county, N. Y., in December, 1809, was graduated at the U. S. military academy in 1829, and assigned to the 1st infantry. After serving on frontier duty, he resigned on 31 Oct., 1831, and was employed on the Croton aqueduct as a civil engineer till 1833, when he became a merchant in New York city, but was again employed on the aqueduct in 1840–'1. He re-entered the national service on 15 May, 1861, as colonel of the 16th New York regiment, was at the battle of Bull Run, and in the defences of Alexandria from November, 1861, till 7 March, 1862, when he was made brigadier-general of volunteers. He was engaged in the siege of Corinth in April and May, 1862,

the battle of Corinth on 3–4 Oct., and commanded the district of Columbus, Ky., in 1862–'3, that of Rolla, Mo., in 1863–'4, that of North Kansas in 1864–'5, and that of Wisconsin from April till June, 1865. He was brevetted major-general of volunteers on 11 July, 1865, and shortly afterward returned to New York city. He has published "Cosmogony: or Mysteries of Creation," an analysis of the natural facts stated in the Hebraic account of creation (New York, 1858); "Adam and Ha-Adam" (1859); "Genesis Disclosed" (1860); "Answer to Hugh Miller and Theoretical Geologists" (1861); "How to make Money, and How to keep It" (1866); and "Appeal of a Layman to the Committee on the Revision of the English Version of the Holy Scriptures, to have Adam and Ha-Adam restored to the English Genesis where left out by former Translators" (1875).—Henry Eugene's son, **Henry Eugene,** lawyer, b. in New York city, 2 July, 1836, was educated at Harvard, Williams, and Columbia, where he was graduated in 1857. He then studied law, was admitted to the bar, and began practice. He entered the army in April, 1861, as a captain in the 5th New York volunteers, became major in the 2d New York cavalry in July, and subsequently its colonel. He was made a brigadier-general of volunteers on 16 Sept., 1863, and served with distinction in the cavalry corps of the Army of the Potomac till the close of the war. He was brevetted major-general of volunteers, 1 Oct., 1864, given his full commission on 4 May, 1865, and commanded the middle district of Alabama till his resignation on 1 Jan., 1866. He was public administrator of New York city in 1866–'9, assistant district attorney of the southern district of New York in 1870–'2, and since 1873 has been engaged in law practice.

DAVIES, Louis Henry, Canadian statesman, b. in Charlottetown, Prince Edward island, 4 May, 1845. He was educated at the Central academy and Prince of Wales college, Charlottetown, and was admitted to the bar in 1866. He was solicitor-general of his native province in 1869, and again in 1872–'3; was the leader of the opposition in the legislative assembly until September, 1876, when he became premier and attorney-general, which portfolios he retained till 1879, when his administration resigned. He was elected to the local legislature in 1872, and re-elected from time to time till 1879, when he was defeated. In 1882 he was elected to represent Queen's county, Prince Edward island, in the Dominion parliament, and still (1886) represents that constituency. He was counsel for the tenantry of Prince Edward island, before the land commission, presided over by the Right Hon. H. C. E. Childers, which sat in 1875–'6, when the estates of all proprietors in the island were expropriated by the province. He was also one of the counsel representing Great Britain before the international fishery commission, which sat at Halifax, N. S., in 1877, under articles of the Washington treaty. He is a liberal.

DAVIES, Marianne, musician, b. in New England about 1736; d. in London in 1792. She was the elder of two sisters, both of whom made a European reputation as musicians. They were daughters of a relative of Benjamin Franklin. Marianne achieved some distinction as a performer on the harpsichord and piano, but about 1762 acquired much greater repute for her skill on the harmonica or musical glasses, which had then been recently improved by Franklin. She was subsequently compelled to retire from the profession, owing to the effect on her nerves of constant playing upon the harmonica. This was so frequent a result of its use that it was banished from many continental towns by official prohibition.—Her sister, **Cecilia,** vocalist, b. in 1740; d. in London, England, 3 July, 1836, visited Europe in company with Marianne, with whom she always resided. Her first public appearance was made at the concert-room, Dean street, Soho, London, 28 April, 1756. After a successful career in the English metropolis, Cecilia and Marianne left England in 1768, and visited Paris and Vienna. While they were in the latter city Metastasio wrote, and Hasse composed the music for, an ode that was sung by Cecilia, accompanied by Marianne on the harmonica. In a letter dated 16 Jan., 1772, the poet describes the beautiful tone of the instrument, and the admirable manner in which Cecilia assimilated her voice to it, making it difficult to distinguish the one from the other. From Vienna the sisters went to Milan, where the younger appeared with great success, in 1771, in the opera of "Ruggiero," by Metastasio and Hasse. Cecilia was the first English-speaking woman to whom the Italians accorded the rank of prima donna, bestowing on her the sobriquet "l'Inglesina," and admitting her to be the superior of any Italian singer of that time, except Gabrielli. Cecilia afterward sang in Florence, and returned in 1773 to London, where she appeared successfully in Italian opera. Her voice is described as being deficient in both power and volume, but she possessed a neat and facile execution. She revisited Florence, and sang there until 1784, when she once more returned to England, and retired from the profession soon after the death of her sister. About 1817 she published a collection of six songs by Hasse, Jomelli, Galuppi, and others. She lingered until her ninety-sixth year, borne down by the accumulated weight of years, disease, and poverty.

DAVIES, Samuel, clergyman, b. near Summit Ridge, Newcastle co., Del., 3 Nov., 1724; d. in Princeton, N. J., 4 Feb., 1761. His parents were of Welsh descent. He was educated at home and in Rev. Samuel Blair's seminary at Fogg's Manor, and licensed to preach by Newcastle presbytery in 1746. He was ordained as an evangelist in 1747, and sent to Hanover county, Va., which the enmity of the civil authorities toward dissenters made a very difficult field. Through the influence of the governor he obtained a license to officiate at four places of worship about Hanover, which in 1748 was extended to three additional churches. He subsequently engaged in a controversy with Peyton Randolph, the king's attorney, as to whether the English act of toleration extended to Virginia. Mr. Davies argued his side of the case before the general court, and afterward, when on a visit to England, brought the matter before the king in council, by whom the question was decided in the affirmative. In 1753 Mr. Davies undertook a successful mission to England, with Gilbert Tennent, to solicit funds for the College of New Jersey, and was received with much favor as a preacher. He returned amid the excitement of the French and Indian war, and shortly after Braddock's defeat delivered a sermon on that event. In a note to another published sermon, delivered in the following August, he alludes prophetically to "that heroic youth, Col. Washington, whom I cannot but hope Providence has preserved in so signal a manner for some important service to his country." The first presbytery in Virginia was established in 1755 through his exertions, and in 1758 he was chosen to succeed Jonathan Edwards as president of Princeton. He declined the honor, but it was again urged upon him in the following year, and he then accepted it, but held it only

eighteen months before his death. He was a fine pulpit orator, and published numerous sermons, a collection of which appeared after his death (London, 1767) and passed through several editions, both in this country and in Great Britain, one of which (3 vols., New York, 1851) contains an essay on the "Life and Times of Davies" by the Rev. Albert Barnes. Dr. Davies also wrote verses of merit, including an elegy on his old preceptor, Samuel Blair.—His son, **William,** leaving Princeton college in 1765, entered the army, became inspector-general under Steuben in 1778, and enjoyed the friendship of Washington. He was afterward in the auditor's office, in Richmond, Va.

DAVIES, Thomas, clergyman, b. in Kinton, Herefordshire, England, 21 Dec., 1736; d. in New Milford, Conn., 12 May, 1766. His grandfather, John Davies, emigrated from England about 1740, and settled at Davies Hollow, then a part of Litchfield, Conn., but now a part of the town of Washington. He was the first Episcopalian in the town, and by his efforts the present parish of St. Michael's was organized in 1745. He gave it a tract of land, and contributed largely to the erection of a church. There is a tablet to his memory in the present St. Michael's church, Litchfield. Thomas was graduated at Yale in 1758, and ordained by the archbishop of Canterbury on 23 Aug., 1761. He then returned to this country with a commission from the Society for propagating the gospel, as missionary to New Milford, Roxbury, Sharon, New Preston, New Fairfield, and Litchfield. Here he labored zealously, holding occasional services also in other towns. Though he met with many obstacles from the intolerance of the times, he overcame them by his prudent and conciliatory spirit, and to him the growth of the Episcopal church in that part of the state was largely due. The church at New Milford and several others were built under his care.

DAVIESS, Joseph Hamilton, lawyer, b. in Bedford county, Va., 4 March, 1774; killed in the battle of Tippecanoe, 7 Nov., 1811. He accompanied his parents in 1779 to Kentucky, where they settled first in Lincoln county and then near Danville. Young Daviess received his education in an academy at Harrodsburg, becoming an excellent classical and mathematical scholar, and afterward pursued a wide course of reading. He served for six months as a volunteer in the Indian campaign of 1793, and then studied law. In 1795 he was admitted to the bar and, settling in Danville, entered on a career that made his name a household word in the west. Being a federalist, he was excluded from any hope of political advancement, and consequently devoted himself to his profession and attained a high position at the bar. His eccentricities made him famous. Instead of "riding the circuit," he used to shoulder his rifle and range the woods from town to town; and he usually appeared in court in a hunting costume. In 1799 he acted as second to John Rowan in a duel in which Rowan's antagonist was killed, when both principal and seconds fled to avoid prosecution. Daviess was for some time a fugitive; but, after hearing that Rowan had been arrested, returned, appeared in court as his counsel, and secured his acquittal. It is said that he was the first western lawyer that ever argued a case in the U. S. supreme court. He came to Washington in a dilapidated hunting uniform, gained an important suit, and returned home in the same peculiar costume. About this time he married a sister of Chief-Justice Marshall, and afterward became U. S. attorney for Kentucky, in which capacity, on 3 Nov., 1806, he moved for an order requiring Aaron Burr to appear and answer to a charge of levying war against a nation with which the United States was at peace. The judge overruled the motion; but Burr appeared in court next day and requested that the motion be granted. After this was accomplished, Burr, with his counsel, Henry Clay, boldly courted investigation; but the witnesses upon whom the prosecution relied could not be brought into court, and it was impossible to sustain the charges. This event almost entirely destroyed the popularity of Daviess, which even the subsequent revelation of Burr's plot could not fully restore. In 1811 he joined the army of Gen. William H. Harrison as major of Kentucky volunteer dragoons, and served in the campaign against the northwestern Indians. In the battle of Tippecanoe, seeing that an exposed angle of the line was likely to give way before a determined assault, he led a cavalry charge against the savages at that point. The manœuvre was completely successful, but Maj. Daviess fell, shot through the breast. Counties in Indiana, Illinois, Kentucky, and Missouri have been named for him. He published "A View of the President's Conduct concerning the Conspiracy of 1806" (1807).

DÁVILA, Gil Gonzalez (dah'-vee-lah), Spanish-American author, b. in Ávila, Peru, in 1570; d. in Madrid, Spain, in 1658. He was an attendant of Cardinal Deza at Rome, studied there, and returned to Spain, where he published several works that met with public approval, and was appointed prebendary of the cathedral of Salamanca, chronicler of Castile, and in 1612 chronicler of Spanish America. His publications include "Historia de las antigüedades de Salamanca" (1606); "La vida de Don Alonso Tostado de Madrigal Obispo de Ávila" (1611); "Teatro de las grandezas de Madrid" (1625); "Vida del rey de Castilla Don Enrique III." (1638); "Teatro de las iglesias de España" (1640); and "Teatro de las iglesias de las Indias Occidentales, sus arzobispos y obispos y cosas memorables" (2 vols., 1645–'9). He left unpublished works, including "La vida de Felipe III." He was the first to write the ecclesiastical history of Spanish America.

DÁVILA, Nepomuceno, naturalist, b. in Castro Urdiales, Spain, in 1574; d. in the city of Mexico in 1647. He was a monk, and arrived in Mexico about 1600, and devoted his whole energy to the foundation of a convent for his order. In 1619 he acquired for $3,000, from the Count de Cortina, the title-deed of the ground on which afterward the convent of San Augustin was built, which to-day is occupied by the National library. But he did not live to see his work finished, as in 1640 he was thrown, by order of the Inquisition, into its dungeons, on a charge of sorcery, and died after seven years of incarceration and torture. Dávila was a close student of natural history, especially the Mexican fauna, and wrote several treatises, of which the most notable one is "Afinidades entre algunas plantas y los mamíferos." The principal cause of his imprisonment was, besides his advanced ideas about the sensibility of plants and the intelligence of certain animals, and the relations existing between them, the finding in his cell of many dried and stuffed animals, and collections of plants, as Dávila devoted his leisure to studies of the animal and vegetable kingdoms. He wrote also the following works, which have never been published, but are preserved in the National library of Mexico: "Un año de caza en Sierra Madre," "Los Anfibios del Pacífico," "Los Fósiles de la Mesa Central," and "Los Paquidermos de América."

DÁVILA, Pedro Franco, Spanish-American naturalist, b. in Guayaquil in 1713; d. in 1785. He went to Paris in 1748, and there formed an extensive cabinet of natural history. In 1767 this cabinet was sold for 800,000 reals. In 1769 he went to Madrid, and was chosen perpetual director of the cabinet of natural history, which, under his management, became one of the finest in Europe. He belonged to the Royal society of Madrid, the Royal society of London, and the Royal society of Berlin. The catalogue of his cabinet is held in high estimation.

DÁVILA Y PADILLA, Agustin, Mexican historian, b. in the city of Mexico in 1562; d. in 1604. He was a Dominican lecturer on philosophy and theology in the colleges of Puebla and Mexico, and became archbishop of Santo Domingo in 1601. He visited Rome and Spain to represent the Dominicans of Mexico, and was appointed preacher of the king, Philip III. He left several works, including "Historia de la Provincia de Santiago de Méjico de la órden de Predicadores" and "Historia de las antigüedades de los indios."

DAVION, Antony, clergyman, b. in Issigny, Normandy; d. in New Orleans in 1727. He was educated in the seminary of the Foreign missions, Paris, and after his ordination embarked for Quebec in 1690. He was appointed pastor of a church in Quebec, and continued a year in this place. In the early part of 1700 he went to the Mississippi, and in July reached Biloxi. He then labored among the Tonica tribe, but after a time was compelled to take refuge in a French fort. In 1704 the Tonicas sent deputies to Mobile, where he was stationed, begging him to come back to them, and he returned. He was allowed to preach without interruption, but, finding them deaf to his appeals, he destroyed their temple and quenched their sacred fires. He was at once compelled to fly from the village; but the Tonicas had become very much attached to him, and invited him to return again. He made few converts among them, although he persuaded the chief to be baptized in 1716 and to wear European costume. On leaving the Tonicas he went to New Orleans.

DAVIS, Andrew Jackson, spiritualist, b. in Orange county, N. Y., 11 Aug., 1826. His youth was passed in hard labor, and with little education, owing to the extreme poverty of his parents. In 1843 Mr. Levington, of Poughkeepsie, is said to have developed in him extraordinary clairvoyant powers. Although quite uninstructed, it was said that he was able to discourse fluently upon medical, psychological, and general subjects. On 7 March, 1844, he fell into a trance, which lasted sixteen hours, during which time he asserts he conversed with spiritual beings and received instructions as to his future teaching from the interior state. In November, 1845, while clairvoyant, he dictated to the Rev. William Fishbough, in New York, his first work, "The Principles of Nature, her Divine Revelations, and a Voice to Mankind." This book presents a wide range of subjects, and rejects any especial authority in the teachings of the Bible. Mr. Davis has been more successful as a writer than as a lecturer, and has been principally instrumental in promoting the movement of "Spiritualism." The philosophical and theological portions of his remaining works are regarded as little more than repetitions of his first book, interspersed with startling assertions concerning things in heaven and earth which admit of no verification. These works are "The Great Harmonia" (6 vols., New York, 1850–'61); "Philosophy of Spiritual Intercourse" (1851); "The Present Age and Inner Life," a sequel (1854; 2d ed., Boston, 1870); "The Approaching Crisis," a review of Dr. Bushnell on Spiritualism (New York, 1852); "The Penetralia" (Boston, 1856); "The Magic Staff" an autobiography (New York, 1857); "The Harbinger of Health" (1862); "Appetites and Passions" (Boston, 1863); "The World's True Redeemer" (1863); "Principles of Nature" (2d ed., 1863); "Morning Lectures" (1865); "Tale of a Physician" (1867); "Stellar Key to the Summer Land" (1867); "Arabula, or the Divine Guest" (1867); "Memoranda of Persons, Places, and Events" (1868); "The Fountain, with New Jets of Meaning" (1870); and "Mental Diseases and Disorders of the Brain" (New York, 1871).

DAVIS, Asahel, antiquary, b. in Massachusetts in 1791. He published an address on "The Discovery of America by the Northmen" (1840), and "Ancient America and Researches of the East" (New York, 1847).

DAVIS, Benjamin Franklin, soldier, b. in Alabama in 1832; d. at Beverly Ford, Va., 9 June, 1863. He was graduated at the U. S. military academy in 1854, and distinguished himself in both the infantry and cavalry service in New Mexico. In 1862 he became colonel of the 8th New York cavalry. He was instantly killed while commanding a brigade at Beverly Ford, Va.

DAVIS, Caroline E., author, b. in Northwood, N. H., in 1831. Her maiden name was Kelly, and under that name she first gained reputation. She resided in Exeter, N. H., until her marriage in 1867, when she removed to Andover, Mass. She has written a large number of books for Sunday-school libraries, founded on her experience as teacher in a mission-school. Her works include "The Child's Bible Stories" (4 vols.); "Little Sermon Talks"; "No Cross, No Crown"; and many other attractive books for children.

DAVIS, Charles, lawyer, b. in Mansfield, Conn., 1 Jan., 1789; d. in Vermont in 1863. His ancestors were Puritans, who had emigrated from England early in the 17th century and settled in Mansfield, where his father resided until 1792, when he removed to Rockingham, Vt. He was graduated at Middlebury in 1811, studied law under Daniel Chipman, of Middlebury, and in 1814 was admitted to the bar. During his residence there he became engaged in the exciting political subjects connected with the war of 1812–'5, and for some years edited the "Vermont Mirror," which opposed that war. He always advocated the duty of defending the country, however, and often served in the militia. In 1816 Judge Davis removed to Barton, Orleans co., and in 1818 to Waterbury, Conn. He settled in Danville in 1828, and was elected state's attorney for the county of Caledonia, which office he held seven years, and was re-elected in 1838. In 1841–'5 he was U. S. district attorney of Vermont, and in 1845 was elected judge of probate for the district of Caledonia, and re-elected in 1846. A bill was passed in that year for the election of an additional judge of the supreme court, and the place was offered to him. His opinions were published in the 19th and 20th volumes of the "Vermont Reports." He was chosen to be a representative in the state legislature, although the majority of the town were opposed to the whig party, of which he was a member.

DAVIS, Charles Augustus, merchant, b. in New York in 1795; d. there, 27 Jan., 1867. For many years he was in the iron trade with Sidney Brooks, and in a letter to Halleck, written from Athens, he says: "I do not know how I can go back to business and pig iron in John street." He was well versed in commercial and financial affairs, and

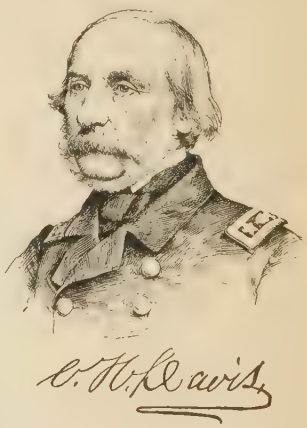
wrote brilliantly and intelligently upon those subjects. The "Peter Scriber Letters" and "Major Jack Downing's Letters" (New York, 1834), first published in the "Commercial Advertiser," detail his interviews with President Jackson and the plans for overthrowing the U. S. bank. For many years his house in New York was the resort of the poet Halleck and other of the Knickerbocker writers.

DAVIS, Charles Henry Stanley, physician, b. in Goshen, Conn., 4 March, 1840. He received his medical education in the University of Maryland and at the medical-school of the New York university, where he was graduated in 1865. He studied afterward in the hospitals of New York and Boston, Paris and London, and settled in Meriden, Conn. He was a member of the Connecticut state legislature in 1873, 1884, and 1885. He has travelled extensively in Europe, and has studied hospital practice in London and Paris. He was one of the founders of the American philological society in 1864, and was its first corresponding secretary and its vice-president. He is a member of numerous medical and historical societies, among which is la Societé d'Anthropologie of Paris, has contributed to many of the medical and scientific periodicals of this country and of Europe, and was the editor of the first volume of the "Boston Medical Register," 1865. He has published a "History of Wallingford and Meriden" (Meriden, 1870); "The Voice as a Musical Instrument" (Boston, 1879); "Education and Training of Feeble-Minded, Imbecile, and Idiot Children" (New York, 1883); and an "Index to Periodical Literature" (American News Company, New York, 1878–'81).

DAVIS, Cushman Kellogg, senator, b. in Henderson, Jefferson co., N. Y., 16 June, 1838. He removed with his parents, when a child, to Waukesha, Wis., attended Carroll college in that town, and was graduated at Michigan university in 1857. He then studied law, and in 1859 began practice at Waukesha. He became a 2d lieutenant in the 28th Wisconsin regiment in 1861, and served as assistant adjutant general during most of the civil war on the staff of Gen. Willis A. Gorman. He was compelled to leave the army in 1864 by an attack of typhoid fever, and in 1865 went to Minnesota and resumed the practice of his profession at St. Paul. He was elected to the Minnesota legislature in 1866, was U. S. district attorney for Minnesota in 1867–'71, and in 1873 was elected governor of the state on the Republican ticket, serving one term, and declining a re-nomination. He was an unsuccessful candidate for U. S. senator in 1875, and again in 1881, but on 18 Jan., 1887, was elected to the office. Michigan university gave him the degree of LL. D. in 1886. He has delivered many lectures, of which the best known is "Modern Feudalism" (1870), and has published "The Law in Shakespeare" (1884).

DAVIS, Daniel, lawyer, b. in Barnstable, Mass., 8 May, 1762; d. in Cambridge, Mass., 27 Oct., 1835. He settled in Portland (then called Falmouth) in 1782, and held offices in Massachusetts, of which Maine was then a part. In 1804 he removed to Boston, and in 1832 to Cambridge. He was U. S. attorney for Maine in 1796–1801, and solicitor-general of Massachusetts in 1800–'32. He was author of several legal works, the principal ones being "Criminal Justice" (Boston, 2d ed., 1828) and "Precedents of Indictments" (Boston, 1831).

—His son, **Charles Henry,** naval officer, b. in Boston, Mass., 16 Jan., 1807; d. in Washington, D. C., 18 Feb., 1877. He entered the U. S. navy as a midshipman in 1823, and was attached to the frigate "United States," of the Pacific squadron, in 1827–'8. In March, 1829, he became passed midshipman, and was ordered to the "Ontario," of the Mediterranean squadron. He received his commission as lieutenant in March, 1834, and, after serving in 1837–'8 on the "Vincennes," of the Pacific squadron, and in 1840–'1 on the "Independence," of the Brazil squadron, was on special duty from 1842 till 1856, being engaged first on ordnance duty and then as assistant in the coast survey. During 1846–'9 he was occupied in a survey of the waters about Nantucket, in the course of which he discovered the "new south shoal" and several smaller shoals directly in the track of vessels sailing between New York and Europe, and of coasting vessels from Boston. These discoveries were thought to account for several wrecks and accidents before unexplained, and called forth the special acknowledgments of insurance companies and merchants. He became commander in June, 1854, and was given the "St. Marys," in the Pacific squadron, during 1857–'9, after which he was appointed superintendent of the "American Nautical Almanac." He had filled this place in 1849–'56, and the existence of the "Almanac" was largely due to his efforts. In November, 1861, he became captain, and during that year was a member of the board of officers convened for the purpose of making a thorough investigation of the southern coast and harbors, their access and defences. The information thus acquired led to the organization of the expedition against Port Royal, S. C., in which Capt. Davis was chief of staff and fleet-officer.



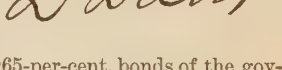
C. H. Davis

In May, 1862, he was appointed flag-officer of the Mississippi flotilla, succeeding Andrew H. Foote in that capacity. Soon after his arrival, the Confederate fleet lying below Fort Pillow, consisting of eight iron-clad steamers, four of which were fitted up as rams, steamed up for an engagement. The flotilla was quickly put in motion to receive them, and, after an action lasting about an hour, three of the Confederate gun-boats were disabled, and the fleet retreated under the guns of Fort Pillow. Subsequently (5 June) the fort was abandoned. Three days later the flotilla moved down the river near Memphis, and again engaged the Confederate fleet. A running fight ensued, in which all the Confederate vessels were either captured or destroyed, except the "Van Horn." After the engagement Capt. Davis received the surrender of Memphis, then joined Admiral Farragut, and was engaged in operations around Vicksburg, and in expeditions up the Yazoo river. He was commissioned commodore in July, 1862, and became chief of the bureau of navigation in Washington, and was made rear-admiral, to date from February, 1863. In 1865 he was appointed superintendent of the naval observatory in Washington, and in 1867 commanded the South Atlantic squadron. He returned to Washington in 1869, and, after being

made a member of the light-house board, became commander of the Norfolk navy-yard, but later resumed his old place of superintendent of the naval observatory. He was a member of numerous scientific societies, and in February, 1877, was elected a member of the National academy of sciences. Admiral Davis, during his connection with the coast survey, was led to investigate the laws of tidal action, and published a "Memoir upon the Geological Action of the Tidal and other Currents of the Ocean," in the "Memoirs of the American Academy" (Boston, 1849), and "The Law of Deposit of the Flood Tide; its Dynamical Action and Office," being vol. iii. of the "Smithsonian Contributions" (Washington, 1852). He contributed various translations and articles on mathematical astronomy and geodesy to periodicals, and was the author of an English translation of Gauss's "Theria Motus Corporum Cœlestium" (Boston, 1858).—His son, **Charles Henry,** naval officer, b. in Cambridge, Mass., 28 Aug., 1845, was graduated at the U. S. naval academy in 1864, and served in the Mediterranean squadron till 1867, meanwhile becoming ensign and master in 1866. From 1867 till 1870 he was on the "Guerrière" in the South Atlantic squadron, and from 1872 till 1874 on the Pacific. He received his commission as lieutenant in March, 1868, and became a lieutenant-commander in December of the same year. From 1875 till 1885 he was engaged principally in astronomical work, at first in the naval observatory in Washington, and then in expeditions for the determination of longitude by means of the submarine cables from Europe to the Atlantic islands and the eastern coast of South America during 1877–'9; in India, China, and Japan during 1881–'2, and on the western coasts of South and Central America during 1883–'4. In 1885 he was made commander and given the training-ship "Saratoga." His investigations have been published by the government, and are entitled "Chronometer Rates as affected by Temperature and other Causes" (1877); with Lieut.-Com. Francis M. Green, "Telegraphic Determination of Longitudes, embracing the Meridians of Lisbon, Madeira, Porto Grande, Para, Pernambuco, Bahia, Rio de Janeiro, Montevideo, and Buenos Ayres, with the Latitudes of the Several Stations" (1880); "Telegraphic Determination of Longitudes in India, China, and Japan" (1883); and with Lieut. John A. Norris, "Telegraphic Determination of Longitudes, in Mexico and on the West Coasts of Central and South America" (1885).

DAVIS, Daniel, soldier, d. 17 Sept., 1814. He was appointed lieutenant-colonel of New York volunteers, 29 June, 1812, and brigadier-general in 1814. He was killed at the head of his brigade in the sortie from Fort Erie.

DAVIS, David, jurist, b. in Cecil county, Md., 9 March, 1815; d. in Bloomington, Ill., 26 June, 1886. He was graduated at Kenyon college, Ohio, in 1832, studied law in Massachusetts, and went through a course at the law-school of New Haven, removed to Illinois in 1835, and was admitted to the bar, after which he settled in Bloomington. He was elected to the state legislature in 1844, was a member of the convention that formed the state constitution in 1847, elected judge of the eighth judicial circuit of the state in 1848, re-elected in 1855, and again in 1861, resigning in October, 1862. He was an intimate friend of Abraham Lincoln, and rode the circuit with him every year. He was a delegate at large to the Chicago convention that nominated Mr. Lincoln for the presidency in 1860, accompanied him on his journey to Washington, and in October, 1862, was appointed a justice of the supreme court of the United States. After President Lincoln's assassination Judge Davis was an administrator of his estate. In 1870 he held, with the minority of the supreme court, that the acts of congress making government notes a legal tender in payment of debts were constitutional. In February, 1872, the National convention of the labor reform party nominated him as its candidate for president, on a platform that declared, among other things, in favor of a national currency "based on the faith and resources of the nation," and interchangeable with 3·65-per-cent. bonds of the government, and demanded the establishment of an eight-hour law throughout the country, and the payment of the national debt "without mortgaging the property of the people to enrich capitalists." In answer to the letter informing him of the nomination, Judge Davis said: "Be pleased to thank the convention for the unexpected honor which they have conferred upon me. The chief magistracy of the republic should neither be sought nor declined by any American citizen." His name was also used before the Liberal Republican convention at Cincinnati the same year, and received 92½ votes on the first ballot. After the regular nominations had been made, he determined to retire from the contest, and so announced in a final answer to the labor reformers. He resigned his seat on the supreme bench to take his place in the U. S. senate on 4 March, 1877, having been elected by the votes of independents and democrats to succeed John A. Logan. He was rated in the senate as an independent, but acted more commonly with the democrats. After the death of President Garfield in 1881 Judge Davis was chosen president of the senate. He resigned his seat in 1883, and retired to his home in Bloomington, where he resided quietly till his death. The degree of LL. D. was conferred on him by Williams college, Beloit college, and the Wesleyan university at Bloomington.



DAVIS, Edwin Hamilton, archæologist, b. in Ross county, Ohio, 22 Jan., 1811. He was educated at Kenyon college, and was graduated at Cincinnati medical college in 1838. He practised in Chillicothe till 1850, when he was called to the chair of materia medica and therapeutics in the New York medical college. Dr. Davis was for a time one of the conductors of the "American Medical Monthly." He has given much attention to the subject of American antiquities, aided Charles Whittlesey in explorations of ancient mounds in 1836, and from 1845 till 1847, assisted by Ephraim G. Squier, he surveyed nearly one hundred groups of works, and opened two hundred mounds at his own expense. He gathered the largest collection of mound-relics ever made in this country, which now forms part of the collection of Blackmore's museum in Salisbury, England. A

second collection of duplicates, with the results of subsequent collecting, is now in the possession of the American museum of natural history, New York. The results of his extensive explorations are embodied in "Ancient Monuments of the Mississippi Valley," which formed the first volume of the Smithsonian contributions to knowledge (1848). This work was characterized by the distinguished Swiss archæologist, A. Morlot, in a paper before the American philosophical society in 1862, as being "as glorious a monument of American science as Bunker Hill is of American bravery." During the spring of 1854 Dr. Davis delivered a course of lectures on archæology before the Lowell institute in Boston, which were repeated in Brooklyn and New York.—His son, **John Woodbridge,** civil engineer, b. in New York city, 19 Aug., 1854, after some experience in connection with railroad surveying parties, was graduated with the degree of C. E. at Columbia college school of mines in 1878. While an undergraduate he published "Formulæ for the Calculation of Railroad Earthwork and Average Haul" (New York, 1876), which, within a year after its publication, was adopted as a text-book in six engineering schools in the United States. During 1879 he published in "Van Nostrand's Engineering Magazine" a series of mathematical papers devoted to original solutions of engineering calculations. The material of these articles has since been incorporated into the text-books on engineering, mechanics, and mathematics. His method for calculating land surveys has been introduced in the principal treatises on that subject, and is now used in lieu of older methods for determining areas of land. For several years after graduation he was professionally occupied, and then established and became principal of the Woodbridge school in New York city, which has for its special purpose the preparing of students for technical schools.—**Joseph Slocum,** brother of Edwin Hamilton, lawyer, b. in Pickaway county, Ohio, 21 Nov., 1812; d. in Mount Vernon, Ohio, 21 Dec., 1884. He was graduated at Kenyon in 1835, and, after studying at the Cincinnati law school, was admitted to the bar in 1837. Mr. Davis settled in Mount Vernon, and there practised his profession in connection with Columbus Delano. He was twice elected judge, and held other offices, both national and local. He was mayor of Mount Vernon for several terms, and paymaster in the U. S. army during 1864–'5.—**Werter Renick,** another brother, clergyman, b. in Circleville, Ohio, 1 April, 1815, was educated at Kenyon college, and received the degree of M. D. from the College of medicine and surgery in Cincinnati. Subsequently he became a minister in the Methodist church, and entered the Ohio conference in 1835. He then filled various pastorates in West Virginia and Ohio until 1853, when he was transferred to the Missouri conference and stationed at St. Louis. In 1854 he became professor of natural sciences in McKendree college, where he remained until 1858, acting as president during his last year at that institution. He was then elected president of Baker university, but afterward resigned, and for fourteen consecutive years was appointed to a presiding eldership. During the civil war he went to the front as chaplain of the 12th Kansas infantry, and then was commissioned lieutenant-colonel to raise and organize the 16th Kansas cavalry in 1862, of which he became colonel, and continued in command of that regiment until the close of the war. Dr. Davis was a member of the first state legislature of Kansas, and also held the office of superintendent of public instruction in Douglas county. He was a member of the general conferences of 1868, 1872, and 1880, and a delegate to the Œcumenical Methodist conference in London, and to the Centennial conference held in Baltimore, Md., in 1884. He edited, in 1859, "The Kansas Message," the first paper published in Baldwin City, and has published several sermons.

DAVIS, Emerson, clergyman, b. in Ware, Mass., 15 July, 1798; d. in Westfield, Mass., 8 June, 1866. He was graduated at Williams in 1821, and took charge of the academy at Westfield until the following year, when he became tutor at Williams. He returned to the academy of Westfield, remaining there until 1836, and was then installed pastor of the Congregational church of that town. In 1861 he was made president of Williams college, which place he held until 1868. He published an "Historical Sketch of Westfield" (1826); "The Teacher Taught" (Boston, 1839); and "The Half Century" (Boston, 1851), a work of great labor, which gives, in a condensed form, facts relative to the intellectual, moral, physical, and mechanical progress and discoveries of the nineteenth century. This work had a large circulation, and was reprinted in Great Britain. He published essays and sermons, and left five manuscript volumes of biographical writings upon the Congregational clergymen of New England.

DAVIS, Garrett, senator, b. in Mount Sterling, Ky., 10 Sept., 1801; d. in Paris, Ky., 22 Sept., 1872. He received an academic education, and was employed as a writer in the county and circuit courts of his district. He studied law, and was admitted to the bar in 1823. He was elected to the state legislature in 1833, and twice re-elected. He was a member of the State constitutional convention from 1839 till 1847, when he became a representative in congress from Kentucky, but declined a re-election, devoting himself to agriculture. He was elected U. S. senator for Kentucky in 1861 for the term ending in 1867, and served on the committees on foreign relations, on territories, claims, and pensions. In 1864 he was appointed a regent of the Smithsonian institution. In January, 1867, he was re-elected to the senate for the term ending in 1873. He was of small physique, but endowed with wonderful endurance. His speeches were characterized by sarcasm and fierce invective, as well as laborious research. Early in life he became the friend of Henry Clay, possessing his confidence and high regard.—His brother, **Amos,** lawyer, b. in Mount Sterling, Ky.; d. in Owingsville, Ky., 5 June, 1835, received an academic education, and studied and practised law at Mount Sterling. He was a member of the Kentucky legislature in 1819, 1825, 1827, and 1828, and a representative in congress from 1833 till 1835.

DAVIS, George Thomas, lawyer, b. in Sandwich, Mass., 12 Jan., 1810; d. in Portland, Me., 17 June, 1877. He was graduated at Harvard in 1829, admitted to the bar, and began to practise at Greenfield in 1832. In that year he established the "Franklin Mercury," which he conducted with ability until its sale in 1836. He was a member of the Massachusetts senate from 1839 till 1840, and of congress from 1851 till 1853. His conversation was extremely brilliant, winning admiration from Thackeray. His "Speeches in Congress" were published (Washington, 1852).

DAVIS, Henry, clergyman, b. in East Hampton, N. Y., 15 Sept., 1771; d. in Clinton, N. Y., 8 March, 1852. His ancestors were from Kidderminster, England, and parishioners of Richard Baxter. They settled in New Haven, Conn., and

finally in East Hampton. His father was a farmer, shoemaker, and tanner. Henry was prepared for college at Clinton academy, and was graduated at Yale in 1796, when he accepted a tutorship in Williams, which he held till January, 1798, going in that year to Somers, Conn., in order to study theology with Dr. Charles Backus. In July of the following year he was licensed to preach by the Association of Tolland county, and shortly afterward appointed tutor in Yale, where he remained until 1803. In 1806 he was called to the professorship of Greek in Union, and, after spending three years there, became president of Middlebury, and was ordained at the same time. The degree of D. D. was conferred upon him by Union, and the Greek professorship again offered him, which he declined. He was appointed president of Hamilton college, where he remained until his resignation in 1833. He was active in establishing the theological seminary at Auburn, and the American board of commissioners for foreign missions. After his resignation, Dr. Davis published a "Narrative of the Embarrassments and Decline of Hamilton College" (1833). He also published many sermons and addresses.—His son, **Thomas T.,** lawyer, b. in Middlebury, Vt., 22 Aug., 1810; d. in Syracuse, N. Y., 2 May, 1872, was graduated at Hamilton college in 1831. He studied law, and was admitted to the bar of Syracuse in 1833. He was counsel for the principal manufacturing establishments of that city, and took an active interest in railroad and mining enterprises. In 1862 he was elected to congress, and re-elected in 1864. After that date he resided in Syracuse, devoting himself to his law practice.

DAVIS, Henry Winter, statesman, b. in Annapolis, Md., 16 Aug., 1817; d. in Baltimore, 30 Dec., 1865. His father, Rev. Henry Lyon Davis, of the Protestant Episcopal church, was the president of St. John's college, at Annapolis, and rector of St. Ann's parish. He lost both offices on account of his Federal politics, and removed to Wilmington, Del., leaving his son with Elizabeth Brown Winter, an aunt, who possessed a noble character, and was rigid in her system of training children. The boy afterward went to Wilmington, and was instructed under his father's supervision. In 1827 the family returned to Maryland and settled in Anne Arundel county. Here Henry Winter became much attached to field-sports, and gave little promise of scholarly attainments. He roamed about the country, always attended by one of his father's slaves, with an old fowling-piece upon his shoulder, burning much powder and returning with a small amount of game. The insight into slavery that he thus gained affected him strongly. He said, in after years: "My familiar association with the slaves, while a boy, gave me great insight into their feelings and views. They spoke with freedom before a boy what they would have repressed before a man. They were far from indifferent to their condition; they felt wronged, and sighed for freedom. They were attached to my father, and loved me, yet they habitually spoke of the day when God would deliver them." He was educated in Alexandria, and at Kenyon college, where he was graduated in 1837. His father died in that year, leaving a few slaves to be divided between himself and his sister, but he would not allow them to be sold, although he might have pursued his studies with ease and comfort. Rather than do this he obtained a tutorship, and, notwithstanding these arduous tasks, read the course of law in the University of Virginia, which he entered in 1839. The expenses of his legal studies were defrayed with the proceeds of some land that his aunt had sold for the purpose. He began practice in Alexandria, Va., but first attained celebrity in the Episcopal convention of Maryland by his defence of Dr. H. V. D. Johns against the accusation of Bishop Whittingham for having violated the canon of the Episcopal church in consenting to officiate in the Methodist Episcopal church. In 1850 he removed to Baltimore, where he held a high social and professional position. He was a prominent whig, and known as the brilliant orator and controversialist of the Scott canvass in 1852. He was elected a member of congress for the 3d district of Maryland (part of Baltimore) in 1854, and re-elected in 1856, serving on the committee of ways and means. After the dissolution of the whig party he joined the American or Know-nothing party. He was re-elected to congress in 1858, and in 1859 voted for Mr. Pennington, the republican candidate for speaker, thus drawing upon himself much abuse and reproach. The legislature of Maryland "decorated him with its censure," as he expressed it on the floor of the house; but he declared to his constituents that, if they would not allow their representative to exercise his private judgment as to what were the best interests of the state, "You may send a slave to congress, but you can not send me." After the attack on the 6th Massachusetts regiment in Baltimore in 1861, Mr. Davis published a card announcing himself as an "unconditional union" candidate for congress, and conducted his canvass almost alone, amid a storm of reproach and abuse, being defeated, but receiving about 6,000 votes. When Mr. Lincoln was nominated in 1860, Mr. Davis was offered the nomination for vice-president, but declined it; and when the question of his appointment to the cabinet was agitated, he urged the selection of John A. Gilmer in his stead. He was again in congress in 1863–'5, and served as chairman of the committee on foreign affairs. Although representing a slave state, Mr. Davis was conspicuous for unswerving fidelity to the Union and advocacy of emancipation. He heartily supported the administration, but deprecated the assumption of extraordinary powers by the executive, and denounced congress as cowardly for not authorizing by statute what it expected that department to do. He early favored the enlistment of negroes in the army, and said, "The best deed of emancipation is a musket on the shoulder." In the summer of 1865 he made a speech in Chicago in favor of negro suffrage. Mr. Davis was denounced by politicians as impractical. He used to say that he who compromised a moral principle was a scoundrel, but that he who would not compromise a political measure was a fool. Mr. Davis possessed an unusually fine library, and was gifted with a good memory and a brilliant mind, which was united with many personal advantages. Inheriting force and scholarship from his father, he had received

also a share of his mother's milder qualities, which won many friends, although, to the public, he seemed stern and dictatorial. At his death congress set apart a day for the commemoration of his public services, an honor never before paid to an ex-member of congress. He published a book entitled the "War of Ormuzd and Ahriman in the Nineteenth Century" (Baltimore, 1853). His collected speeches, together with a eulogy by his colleague, John A. J. Cresswell, were published in New York in 1867.

DAVIS, Isaac, patriot, b. in 1745; d. in Concord, Mass., 19 April, 1775. He was captain of the Acton minute-men, and led them against the British at Concord bridge, saying: "I have not a man that is afraid to go." He was killed by the first volley. Bancroft describes him as "stately in his person, a man of few words; earnest even to solemnity." His body, with those of two of his company, was brought to his home and laid in the bedroom of his wife, from whom he had parted only a few hours before. The three men "were followed to the village graveyard by a concourse of the neighbors from miles around." Mrs. Davis lived to a great age. When she was over ninety, "the United States in congress bethought themselves to pay honors to her husband's martyrdom."

DAVIS, Isaac, lawyer, b. in Northborough, Mass., 2 June, 1799; d. in Worcester, Mass., 1 April, 1883. He was graduated at Brown in 1822, studied law, and began the practice of his profession in Worcester, Mass., where he soon rose to eminence. He was mayor of Worcester for three years, and for eleven years a member of the Massachusetts senate. Mr. Davis was a zealous promoter of popular education. He was chosen a member of the board of trustees of Brown university in 1838, and a fellow in 1851. For forty years he was president of the board of trustees of the Worcester academy, and for some time was an active member of the Massachusetts board of education. He has received the degree of LL. D.

DAVIS, Jefferson, statesman, b. in that part of Christian county, Ky., which now forms Todd county, 3 June, 1808. His father, Samuel Davis, had served in the Georgia cavalry during the Revolution, and, when Jefferson was an infant, removed with his family to a place near Woodville, Wilkinson co., Miss. Young Davis entered Transylvania college, Kentucky, but left in 1824, on his appointment by President Monroe to the U. S. military academy. On his graduation, in 1828, he was assigned to the 1st infantry, and served on the frontier, taking part in the Black Hawk war of 1831–'2. He was promoted to first lieutenant of dragoons on 4 March, 1833, but, after more service against the Indians, abruptly resigned on 30 June, 1835, and having married, after a romantic elopement, the daughter of Zachary Taylor, then a colonel in the army, settled near Vicksburg, Miss., and became a cotton-planter. Here he pursued a life of study and retirement till 1843, when he entered politics in the midst of an exciting gubernatorial canvass. He was chosen an elector on the Polk and Dallas ticket in 1844, made a reputation as a popular speaker, and in 1845 was sent to congress, taking his seat in December of that year. He at once took an active part in debate, speaking on the tariff, the Oregon question, and military matters, especially with reference to the preparations for war with Mexico. On 6 Feb., 1846, in a speech on the Oregon question, he spoke of the "love of union in our hearts," and, speaking of the battles of the Revolution, said: "They form a monument to the common glory of our common country."

In June, 1846, he resigned his seat in the house to become colonel of the 1st Mississippi volunteer rifles, which had unanimously elected him to that office. Having joined his regiment at New Orleans, he led it to re-enforce Gen. Taylor on the Rio Grande. At Monterey he charged on Fort Leneria without bayonets, led his command through the streets nearly to the Grand Plaza through a storm of shot, and afterward served on the commission for arranging the surrender of the place. At Buena Vista his regiment was charged by a Mexican brigade of lancers, greatly its superior in numbers, in a last desperate effort to break the American lines. Col. Davis formed his men in the shape of a letter V, open toward the enemy, and thus, by exposing his foes to a covering fire, utterly routed them, though he was unsupported. He was severely wounded, but remained in the saddle till the close of the fight, and was complimented for coolness and gallantry in the commander-in-chief's despatch of 6 March, 1847. His regiment was ordered home on the expiration of its term of enlistment, and on 17 May, 1847, Col. Davis was appointed by President Polk a brigadier-general, but declined the commission on the ground that a militia appointment by the Federal executive was unconstitutional. He was appointed by the governor of Mississippi to fill a vacancy in the U. S. senate in August, 1847, and in January, 1848, the legislature unanimously elected him senator, and re-elected him in 1850 for a full term. He was made chairman of the senate committee on military affairs, and here, as in the house, was active in the discussions on the various phases of the slavery question and the important work of the session, including the fugitive-slave law, and the other compromise measures of 1850. Mr. Davis proposed the extension of the Missouri compromise line to the Pacific, and continued a zealous advocate of state rights. He was the unsuccessful state-rights or "resistance" candidate for governor of his state in 1851, though by his personal popularity he reduced the Union majority from 7,500 to 999. He had resigned his seat in the senate to take part in the canvass, and, after a year of retirement, actively supported Franklin Pierce in the presidential contest of 1852. After the election of Gen. Pierce, Mr. Davis received the portfolio of war in his cabinet, and administered it with great credit. Among other changes, he proposed the use of camels in the service on the western plains, introduced an improved system of infantry tactics, iron gun-carriages, rifled muskets and pistols, and the use of the Minié ball. Four regiments were added to the army, the defences on the sea-coast and frontier were strengthened, and, as a result of experiments, heavy guns were cast hollow, and a larger grain of powder was adopted. While in the senate, Mr. Davis had advocated the construction of a Pacific railway as a military necessity, and a means of preserving the Pacific coast to the Union, and he was now put in

charge of the organization and equipment of the surveying parties sent out to examine the various routes proposed. He also had charge of the appropriation for the extension of the capitol. Mr. Davis left the cabinet at the close of President Pierce's term in 1857, and in the same year entered the senate again. He opposed the French spoliation bill, advocated the southern route for the Pacific railroad, and opposed the doctrine of "popular sovereignty," often encountering Stephen A. Douglas in debate on this question. After the settlement of the Kansas contest by the passage of the Kansas conference bill, in which he had taken a chief part, he wrote to the people of his state that it was "the triumph of all for which we contended." Mr. Davis was the recognized democratic leader in the 36th congress. He had made a tour of the eastern states in 1858, making speeches at Boston, Portland, Me., New York, and other places, and in 1859, in reply to an invitation to attend the Webster birthday festival in Boston, wrote a letter denouncing "partisans who avow the purpose of obliterating the landmarks of our fathers," and containing strong Union sentiments. He had been frequently mentioned as a democratic candidate for the presidency, and received many votes in the convention of 1860, though his friends announced that he did not desire the nomination. Before congress met, in the autumn of 1860, Mr. Davis was summoned to Washington by members of President Buchanan's cabinet to suggest some modifications of the forthcoming message to congress. The suggestions were made, and were adopted. In the ensuing session Mr. Davis made, on 10 Dec., 1860, a speech in which he carefully distinguished between independence, which the states had achieved at great cost, and the Union, which had cost "little time, little money, and no blood," taking his old state-rights position. He was appointed on the senate committee of thirteen to examine and report on the condition of the country, and, although at first excused at his own request, finally consented to serve, accepting the appointment in a speech in which he avowed his willingness to make any sacrifice to avert the impending struggle. The committee, after remaining in session several days, reported, on 31 Dec., their inability to come to any satisfactory conclusion. On 10 Jan., 1861, Mr. Davis made another speech on the state of the country, asserting the right of secession, denying that of coercion, and urging the withdrawal of the garrison from Fort Sumter. Mississippi had seceded on 9 Jan., and on 24 Jan., having been officially informed of the fact, Mr. Davis withdrew from the senate and went to his home, having taken leave of his associates in a speech in which he defended the cause of the south, and, in closing, begged pardon of all whom he had ever offended.

Before he reached home he had been appointed by the convention commander-in-chief of the army of Mississippi, with the rank of major-general; but on 18 Feb., 1861, he exchanged this office for that of president of the Confederate states, to which the provisional congress at Montgomery had elected him on 9 Feb. He selected for his cabinet Robert Toombs, of Georgia, as secretary of state; Leroy P. Walker, of Alabama, secretary of war; Charles G. Memminger, of South Carolina, secretary of the treasury; Stephen R. Mallory, of Florida, secretary of the navy; Judah P. Benjamin, of Louisiana, attorney-general; and John H. Reagan, of Texas, postmaster-general. The last three continued in the cabinet as long as the Confederate government maintained its existence. Toombs, Walker, and Memminger were succeeded by others. In his inaugural address Mr. Davis asserted that "necessity, not choice," had led to the secession of the southern states; that the true policy of the south, an agricultural country, was peace; and that "the constituent parts, but not the system," of the government had been changed. The attack on Fort Sumter, on 12 April, precipitated the war, and Mr. Davis, in his first message to the provisional Confederate congress, on 29 April, after a review of events (from the formation of the United States constitution till 1861), which, in his judgment, had led to the contest, commended this act, while avowing a desire to prevent the shedding of blood. The message also condemned, as illegal and absurd, President Lincoln's proclamation calling for troops, and that announcing a blockade of southern ports, and ended with the famous words, "All we ask is, to be let alone," followed by a promise to resist subjugation to the direst extremity. Shortly after the change of the Confederate capital from Montgomery to Richmond, which he had strongly advised, Mr. Davis removed thither, and was met on his way with many marks of popular favor, every railway station swarming with men, women, and children, who greeted him with waving handkerchiefs. Soon after his arrival the fine residence of James A. Seddon was bought and put at Mr. Davis's disposal by citizens of Richmond. His first days in the new capital were spent in reviewing troops and in speech-making. He exhorted his hearers to remember the dignity of the contest, and "to smite the smiter with manly arms, as our fathers did before us," and declared his willingness to lay down his civil office and take command of the army, should the extremity of the cause ever warrant such action. Before his arrival in Virginia an army of about 30,000 men had been raised, and as fast as new troops arrived their officers were assigned to a rank in the Confederate service, regulated by that which they had formerly held in the U. S. army. On 20 July, Mr. Davis sent his second message to the provisional congress, then in session at Richmond. In this message he complained of barbarities committed by National troops, and again asserted the impossibility of subduing the south. On the morning succeeding the delivery of this message he set out for Manassas, where a contest was thought to be impending, and arrived there in time to witness the close of the battle of Bull Run, reaching the field when victory had been assured to the Confederates.

The battle of Bull Run was followed by a period of inaction, and Mr. Davis was blamed by many for this policy, as well as for his "failure to organize the troops of the several states into brigades and divisions formed of the soldiers of each," as the law directed. In answer to these complaints, he has urged the length of time necessary to organize "the terrible machine, a disciplined army," and protested that, as far as in him lay, he favored an advance and endeavored to comply with the legal plan of army organization. The question of the treatment of Confederate prisoners by the National authorities soon demanded his attention. On 17 April, 1861, two days after Mr. Lincoln's call for troops, Mr. Davis had issued a proclamation inviting applications for letters of marque and reprisal. The "Savannah," a private vessel commissioned in accordance with this offer, was captured off Charleston, and her officers and crew were tried for piracy in New York and sentenced to death. Later the captain and crew of the privateer "Jefferson Davis" were similarly convicted in Philadelphia. Thereupon, in November, 1861, Mr. Davis ordered retaliatory measures to be taken,

and fourteen Union prisoners were selected by lot and held as hostages for the safety of the condemned men. The latter were ultimately put on the footing of prisoners of war by order of the National government, and subsequently a cartel was adopted for the exchange of prisoners, which remained in force till its suspension in 1864, caused by disagreement as to the status of negro soldiers. In November, 1861, a presidential election was held in the Confederacy, and Mr. Davis was chosen president for six years without opposition. In his message to the provisional congress at its last session, 18 Nov., 1861, he briefly sketched the situation at the close of the first year of the war, alluding to the Confederate successes, the contest for the possession of Kentucky and Missouri, and to the "Trent" affair. (See WILKES, CHARLES.) He urged the construction of another railway line through the Confederacy, asserted the improvement of the south in military means and financial condition, and the inefficiency of the blockade, and said: "If it were indeed a rebellion in which we were engaged, we might find ample vindication for the course we have adopted in the scenes which are now being enacted in the United States." The first congress under the permanent constitution met in Richmond, on 18 Feb., 1862, and Mr. Davis was inaugurated on 22 Feb. The Confederacy had just met with its first serious reverses in the fall of Forts Henry and Donelson; but in his inaugural, after a vindication of the right of secession, Mr. Davis indulged in many favorable hopes. "The final result in our favor," said he, "is not doubtful. Our foes must sink under the immense load of debt which they have incurred. . . . In the heart of a people resolved to be free, these disasters tend but to stimulate to increased resistance." In his short messages of 25 Feb. and 15 Aug. he suggested various measures for the improvement of the Confederate forces. The result of the reverses in the early months of the year, to which had now been added the capture of New Orleans, began to show itself in a growing opposition to Mr. Davis's administration, which up to this time had seemed all but universally popular, and this opposition increased in force up to the latest days of the war. One of the first acts of the congress was to pass a sweeping conscription law, to which Mr. Davis reluctantly assented. This was stoutly resisted in some quarters, and led to a spirited correspondence between Mr. Davis and Gov. Joseph E. Brown, of Georgia, who disputed the constitutionality of the measure. Congress also authorized the suspension of the habeas corpus act for ten miles around Richmond, and the formation of a military police, for the alleged reason that the government was continually in danger from the presence in Richmond of National spies, and the consequent plots and intrigues. Mr. Davis was present with Gen. Lee at the battle of Fair Oaks on 31 May, and, after the wounding of Gen. Joseph E. Johnston in that engagement, assigned Lee to the command of the Army of Northern Virginia, having previously, on 13 March, charged him, "under the direction of the president, with the conduct of military operations." During a visit to the army in the western department, in December, 1862, Mr. Davis, in an address to the Mississippi legislature, defended the conscription law and declared that "in all respects, the Confederacy was better prepared for war than it was a year previous."

The proclamation of emancipation by President Lincoln, to take effect 1 Jan., 1863, called out from Mr. Davis a retaliatory proclamation, dated 23 Dec., 1862, in which, after reciting, among other acts, the hanging of William B. Mumford for tearing down the United States flag at New Orleans, after the city was captured by the National forces, Gen. Benjamin F. Butler was declared a felon, and it was ordered that all commissioned officers serving under him, as well as any found serving in company with slaves, should be treated as "robbers and criminals deserving death." These threats, however, were not generally executed, though supported by the legislation of the congress. In his message of January, 1863, Mr. Davis announced his intention of turning over National prisoners for prosecution in state courts, as abettors of servile insurrection; but this proposition was rejected by congress, and provision made for their trial by military tribunals. The two long messages sent by Mr. Davis to congress in 1863 consist largely of discussions of the position of foreign powers, especially Great Britain, with reference to the war. The one dated 7 Dec. announces the fall of Vicksburg and Port Hudson, and urges "the compulsory reduction of the currency to the amount required by the business of the country," together with other measures for improving the finances, which had become hopelessly depreciated. They had never been on a sound basis, and the currency had declined in value till it was nearly worthless. In April, 1863, in compliance with a request of the Confederate congress, Mr. Davis had issued an address to the people of the south, in which he drew the happiest conclusions as to the success of the Confederacy, from the way in which, in the face of obstacles, it had already organized and disciplined armies. "At no previous period of the war," said he, "have our forces been so numerous, so well organized, and so thoroughly disciplined, armed, and equipped as at present."

The disasters of July—at Gettysburg and Vicksburg—coming in the face of this assertion, and the state of the currency just mentioned, emboldened the opposition party in all parts of the Confederacy fiercely to assail the administration. Mr. Davis was held responsible for the advance into Pennsylvania, and accused of partiality in appointing Pemberton to command in the west. Charles G. Memminger, secretary of the treasury, resigned, and his place was filled by George A. Trenholm; but the new secretary was unable to stop the depreciation of the currency. The lack of coin in the country, the inability of the people to bear more taxation, and the spirit of speculation fostered by the enormous issues of paper money, hastened the financial ruin of the Confederacy. Food, too, was scarce. Kentucky and Tennessee, whence had come most of the meat supplies, were lost to the Confederacy, and the army was on half-rations. At this time there was a clamor against the commissary-general, Col. Northrop. A committee of the Confederate congress investigated the matter and exonerated him; but the opponents of the administration have continued to hold him, and Mr. Davis through him, responsible for the scarcity of food in the Confederacy, and therefore, indirectly, for much of the sufferings of Union prisoners during the war. The exchange of prisoners had been interrupted for some time by the refusal of the Confederate government to recognize negroes as National soldiers, and after many futile attempts to come to an understanding with the National government, "We offered," says Mr. Davis ("Rise and Fall of the Confederate Government," vol. ii., p. 601), "to the United States government their sick and wounded, without requiring any equivalents."

The year 1864 opened with Confederate successes in Florida, the southwest, and North Caro-

lina; and Mr. Davis, in his message of 2 May, said: "The armies in northern Virginia and Tennessee still oppose, with unshaken front, a formidable barrier to the progress of the invader." That progress, however, was not long to be stayed. By an order issued on 17 July, 1864, Mr. Davis removed Gen. Joseph E. Johnston from the command of the army opposed to Gen. Sherman in Georgia. The cause and alleged injustice of this removal have not yet ceased to be subjects for controversy, it being asserted by Mr. Davis's opponents that personal reasons influenced him against an officer with whom he had never been very friendly, while his supporters, denying this, fully justify the act. The reasons given in Adjt.-Gen. Cooper's brief despatch were, that Gen. Johnston had "failed to arrest the advance of the enemy to the vicinity of Atlanta, and expressed no confidence that he could defeat or repel him." In answer to which Gen. Johnston wrote: "I assert that Sherman's army is much stronger, compared with that of Tennessee, than Grant's compared with that of northern Virginia. Yet the enemy has been compelled to advance much more slowly to the vicinity of Atlanta than to that of Richmond and Petersburg, and penetrated much deeper into Virginia than into Georgia." Gen. John B. Hood, successor of Gen. Johnston, was obliged to evacuate Atlanta on 1 Sept. Mr. Davis then visited Georgia and endeavored to raise the spirits of the people there, and to restore harmony between the Confederate and state governments. Gov. Brown, who had opposed the conscription act, continued to be hostile to the administration, notwithstanding an interview with Mr. Davis in which the latter tried to convince him that his complaints were unjust. He reviewed and addressed Hood's army on 18 Sept., and afterward, in speeches made in Macon, Augusta, and elsewhere, strove to inspire the people with the spirit of renewed resistance, and to persuade them that an honorable peace was impossible. As is evident from the tone of these and other speeches, the peace party in the south was daily gaining strength. Besides those who really desired peace, there were others who hoped that a rejected attempt to treat with the National government might fire the south with indignation. As early as 30 Dec., 1863, Gov. Zebulon B. Vance, of North Carolina, had written to Mr. Davis urging negotiation. The latter, in his answer, dated 8 Jan., 1864, cited previous unsuccessful attempts to communicate with the authorities at Washington, and concluded that another would be undesirable. In January, 1865, however, after an interview with Francis P. Blair, Sr., who had gone to Richmond, unofficially, in the hope of bringing about peace, Mr. Davis agreed to send three commissioners to confer with the National government. The result was an unsatisfactory meeting on a steamer in Hampton Roads. On the return of the commissioners public meetings were held, at which there seemed to be a return of the enthusiasm of the early days of the war. Peace with the independence of the south was now seen to be impossible, and the horrors of subjugation by the north were painted in gloomy colors by the speakers. Mr. Davis, always an able and impressive speaker, made what has been called the most remarkable speech of his life. But this outburst of enthusiasm was only temporary. The evacuation of Atlanta had been followed by Sherman's march to the sea, and Hood's disastrous campaign in Tennessee. Gen. Hood himself said, in speaking of it, when taking leave of his army in January, 1865: "I alone am responsible for its conception." These reverses, however, with Grant's steady advance on Richmond, and, above all, the re-election of President Lincoln, had produced a growing conviction in the south that defeat was inevitable. The Confederate congress that met in November, 1864, was outspoken in opposition to the administration, and in January, 1865, the Virginia delegation urged a change in the cabinet, expressing their want of confidence in its members. As a consequence of this, James A. Seddon, then secretary of war, sent in his resignation.

In his last message to congress, dated 13 March, 1865, Mr. Davis, while acknowledging the peril of the Confederacy, asserted that it had ample means of meeting the emergency. On Sunday, 2 April, 1865, while seated in his pew in St. Paul's church, Richmond, he was handed a telegram from Gen. Lee, announcing the latter's speedy withdrawal from Petersburg, and the consequent necessity for the evacuation of the capital. That evening, accompanied by his personal staff, members of the cabinet, and others, he left by train for Danville. On his arrival there he issued, on 5 April, a proclamation of which he afterward admitted that, "viewed by the light of subsequent events, it may fairly be said it was over-sanguine." In it he said: "Relieved from the necessity of guarding particular points, our army will be free to move from point to point, to strike the enemy in detail far from his base." Danville was abandoned in less than a week, and after a conference at Greensboro, N. C., with

Gens. Johnston and Beauregard, in which his hopes of continuing the war met with little encouragement, he went to Charlotte, where he heard of the assassination of Mr. Lincoln. His wife had preceded him with a small escort, and it was just after he had overtaken her, while encamped near Irwinsville, Ga., that the whole party were captured, on 10 May, by a body of cavalry under Lieut.-Col. Pritchard. He was taken to Fort Monroe, and kept in confinement for two years.

On 21 Sept., 1865, the U. S. senate called on the president for information on the subject of his trial, and in response reports were submitted from the secretary of war and the attorney-general, their substance being that Virginia was the proper place for the trial, and that it was not yet possible peacefully to hold a U. S. court in that state. On 12 Oct., in reply to a letter from President Johnson, Chief-Justice Chase said that he was unwilling to hold court in a district still under martial law. On 10 April, 1866, the judiciary committee of the house of representatives reported that there was no reason why the trial should not be proceeded with, and that it was the duty of the government to investigate, without delay, the facts connected with Lincoln's assassination. On 8 May, 1866, Mr. Davis was indicted for treason by a grand jury in the U. S. court for the district of Virginia, sitting at Norfolk under Judge Underwood, the charge of com-

plicity in the assassination of the president having been dropped. On 5 June, at a session of the court held in Richmond, James T. Brady, one of Mr. Davis's counsel, urged that the trial be held without delay; but the government declined to proceed on the indictment, urging the importance of the trial and the necessity of preparation for it. The court refused to admit the prisoner to bail. On 13 May, 1867, he was brought before the court at Richmond on a writ of habeas corpus, and admitted to bail in the amount of $100,000, the first name on his bail-bond being that of Horace Greeley. Mr. Davis's release gave much satisfaction to the southern people. The interest taken in him during his imprisonment, and their prevalent idea that he was to suffer as a representative of the south, rather than for sins of his own, and was "a nation's prisoner," had made him more popular there than he had been since the first days of the war. After an enthusiastic reception at Richmond he went to New York, then to Canada, and in the summer of 1868 visited England, a Liverpool firm having offered to take him as a partner, without capital. This offer, after investigation, was declined, and, having visited France, he returned to this country. He was never brought to trial, a *nolle prosequi* being entered by the government in his case in December, 1868, and he was also included in the general amnesty of that month. After his discharge he became president of a life insurance company at Memphis, Tenn. In 1879 Mrs. Dorsey, of Beauvoir, Miss., bequeathed to him her estate, where he has since quietly resided, giving much of his time to literary pursuits. In June, 1871, in a speech at a public reception in Atlanta, Ga., he said that he still adhered to the principle of state sovereignty, was confident of its final triumph, and was "not of those who 'accept the situation.'" In 1876, when a bill was before the house of representatives to remove all the political disabilities that had been imposed on those who took part in the insurrection, James G. Blaine offered an amendment excepting Jefferson Davis, and supported it by a speech in which he accused Mr. Davis of being "the author of the gigantic murders and crimes at Andersonville." Senator Benjamin H. Hill, of Georgia, spoke in reply, defending Mr. Davis from this charge. Again, in 1879, Mr. Davis was specially excepted in a bill to pension veterans of the Mexican war, the adoption of an amendment to that effect being largely the result of a speech by Zachariah Chandler. In October, 1884, at a meeting of Frank P. Blair post, of the Grand Army of the Republic, in St. Louis, Gen. William T. Sherman asserted that he had seen letters and papers showing that Mr. Davis had abandoned his state-rights doctrines during the war, and had become practically a dictator in the south. Mr. Davis, in a letter to a newspaper, denied the charge, and Gen. Sherman then filed with the war department at Washington papers that, in his view, substantiated it. On 28 April, 1886, Mr. Davis spoke at the dedication of a monument to Confederate soldiers at Montgomery, Ala., and was enthusiastically received. The engraving on the preceding page is a view of his early home in Mississippi.

Two biographies of Mr. Davis have been written, both by southern authors, which illustrate the extremes of southern opinion. That by Frank H. Alfriend (New York, 1868) represents those who are friendly to Mr. Davis, while that by Edward A. Pollard, with the sub-title "Secret History of the Confederacy" (Philadelphia, 1869), holds him responsible for all the disasters of the war. Mr. Pollard, who was an editor of the Richmond "Examiner," a paper hostile to the administration, concedes that Mr. Davis was thoroughly devoted to the cause of the south, and had indomitable pluck, but accuses him of vanity, gross favoritism, and incompetency. In addition to these works, see Dr. Craven's "Prison Life of Jefferson Davis" (New York, 1866). Mr. Davis himself has published "The Rise and Fall of the Confederate Government" (2 vols., New York, 1881).—His brother, **Joseph Emory,** lawyer, b. near Augusta, Ga., 10 Dec., 1784; d. in Vicksburg, Miss., 18 Sept., 1870, was the oldest of the ten children of Samuel Davis, and in 1796 removed with his father to Kentucky. He was placed in a mercantile house at an early age, studied law in Russellville and in Wilkinson county, whither he accompanied his father in 1811, was admitted to the bar in 1812, and practised in Pinckneyville, and afterward in Greenville, rising to high rank in the profession. He was the delegate from Jefferson county in the convention that organized the state government in 1817, and took a prominent part in framing the constitution. In 1820 he removed to Natchez, and formed a copartnership with Thomas B. Reed, then the leader of the Mississippi bar. In 1827 he decided to retire from the profession in which he had won success by his learning, argumentative powers, and oratorical ability, in order to become a planter. In this occupation he was also very successful, and at the beginning of the civil war he possessed one of the finest plantations on the Mississippi river. During the war he was driven from his home with his family, and endured many hardships. He returned to Vicksburg at its close, and, after a controversy with the officers of the Freedmen's bureau, regained possession of his estate, but continued to reside in the city of Vicksburg. Mr. Davis was noted for his benevolence, and many youths of both sexes were indebted to him for a liberal education.

DAVIS, Jefferson C., soldier, b. in Clark county, Ind., 2 March, 1828; d. in Chicago, Ill., 30 Nov., 1879. His ancestors were noted in the Indian wars of Kentucky. At the age of eighteen, while pursuing his studies in the Clark county, Ind., seminary, he heard of the declaration of war with Mexico, and enlisted in Col. Lane's Indiana regiment. For gallant conduct at Buena Vista he was on 17 June, 1848, made second lieutenant of the 1st artillery. He became first lieutenant in 1852, took charge of the garrison in Fort Sumter, S. C., in 1858, and was there during the bombardment in April, 1861, at the beginning of the civil war. In May, 1861, he was promoted to a captaincy and given leave of absence to raise the 22d Indiana volunteers, of which regiment he became colonel, and was afterward given a brigade by Gen. Frémont, with whom he served in Missouri. He also commanded a brigade under Gens. Hunter and Pope. For services rendered at Milford, Mo., on 18 Dec., 1861, where he aided in capturing a superior force of the enemy, with a large quantity of military supplies, he was made brigadier-general of volunteers. At the battle of Pea Ridge he commanded one of the four divisions of Gen. Curtis's army. He participated in the siege of Corinth, and, after the evacuation of that place by the Confederate forces, was assigned to the Army of the Tennessee. On 29 Sept., 1862, he chanced to meet in Louisville Gen. William Nelson, from whom he claimed to have received treatment unduly harsh and severe. An altercation ensued, and in a moment of resentment he shot Nelson, instantly killing him. He was arrested, and held for a time, but no trial was ordered, and he was released and assigned to duty at Covington, Ky. He led his old division of the

20th army corps into the fight at Stone river, and for his bravery was recommended by Gen. Rosecrans for major-general. In 1864 he commanded the 14th corps of Sherman's army in the Atlanta campaign and in the march through Georgia. In 1865 a brevet major-generalship was given him, and he was made colonel of the 23d infantry, 23 July, 1866. He afterward went to the Pacific coast, and commanded the U. S. troops in Alaska, and in 1873, after the murder of Gen. Canby by the Modoc Indians in northern California, took command of the forces operating against them, and compelled them to surrender.

DAVIS, John, navigator, b. in Sandridge, England, about 1550; d. at sea, near the coast of Malacca, in December, 1605. He went to sea at an early age, and in 1585 was given command of an expedition for the discovery of a northwest passage to India. He sailed from Dartmouth on 7 June, 1585, with the "Sunshine," of fifty tons, and the "Moonshine," of thirty-five, manned by twenty-three and seventeen men respectively. He sailed as far north as 66° 40′, entering the strait that has since borne his name, and, finding no hindrance to his progress, concluded that he had discovered the northwest passage, but was obliged by stress of weather to return, arriving at Dartmouth on 30 Sept. On 7 May, 1586, he sailed again from Dartmouth with the "Sunshine," the "Moonshine," the "Mermaid," of 100 tons, and the "North Star," a pinnace of ten tons. At the end of July the crew of the "Mermaid" became discontented and put back for England, after the "Sunshine" and the pinnace had been sent to explore eastward of Greenland. Capt. Davis pursued the voyage alone, and, after reaching a point not as far north as in his first voyage, but about as far west, returned to England, arriving early in October. On 19 May, 1587, he sailed again from Dartmouth with the "Elizabeth," the "Sunshine," and the "Helen," a smaller vessel. He took the same course as before, and was confirmed in his belief that he had found the passage; but, not having provisions for a long voyage, he was obliged to return to England. Notwithstanding his discovery of the entrance to Baffin bay, there was no new expedition in quest of the northwest passage till that of Waymouth, fifteen years later. In 1591 Davis accompanied Cavendish on his second and very disastrous voyage to the South sea. He afterward made five voyages to the East Indies as a pilot, and in the last was killed, while serving under Sir Edmund Michelbourne, in an engagement with the Japanese in the straits of Malacca. He is said to have been the inventor of a quadrant for taking the sun's altitude at sea, which preceded Hadley's sextant. He published "Seaman's Secrets," a treatise on navigation (London, 1594), and "The World's Hydrographical Descriptions" (1595), in which the arguments of Sir Humphrey Gilbert, showing the probability of a northwest passage to China, are in part repeated. See "Voyages and Works of John Davis, the Navigator," by Capt. Albert A. Markham, published by the Hakluyt society (London, 1880).

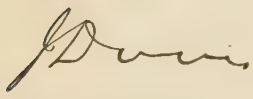
DAVIS, John, clergyman, b. in Pennepek, Pa., 10 Sept., 1721; d. in Harford county, Md., in 1809. He was ordained a Baptist minister in 1756, went to Maryland the same year, and became pastor of Winter Run church in Harford county, the first permanently established church of his denomination in the state. His labors extended into Baltimore and Frederick counties, and into the city of Baltimore. Notwithstanding the constitutional guarantees and the tradition of religious freedom in Maryland, his zeal in spreading a form of faith that was new in the community subjected him to intimidation and violence, but before his death he had established flourishing churches in Baltimore, Frederick City, and elsewhere.

DAVIS, John, clergyman, b. in Newcastle county, Del., in 1737; d. in Ohio, 13 Dec., 1772. His father came from Wales in 1710, and was made pastor of the Baptist church in Welsh Tract, Newcastle co. The son was graduated at Philadelphia college, and, while supplying his father's pulpit after the death of the latter, attracted attention by his eloquence, and was called to the pastorate of the 2d Baptist church in Boston, Mass. He was appointed agent of the Baptists of the colony, to represent their grievances under the exclusive laws then in force in Massachusetts, and took the ground that the charter granted religious equality, and that Congregationalism was not the established religion of the commonwealth. When, after receiving the representations of the grievance committee, the general court passed a new certificate law, requiring that certificates issued to Baptists should state that they were "conscientiously" of that faith, the committee, of which he was the head, decided not to accept the act in that form. In 1772 his health failed, and he returned in July to Delaware, then undertook a journey for his health down the Ohio, and died in the wilderness below the present site of the city of Wheeling, W. Va.

DAVIS, John, jurist, b. in Plymouth, Mass., 25 Jan., 1761; d. in Boston, Mass., 14 Jan., 1847. He was graduated at Harvard in 1781, and for a time was a tutor in the family of Gen. Joseph Otis at Barnstable, studied law, and began practice at Plymouth in 1786. At the convention of 1789, which adopted the Federal constitution, he was the youngest delegate, and he survived all the others. He was for several years a member of the Massachusetts legislature, and in 1795 was elected to the state senate. On 26 June of the same year he entered on the office of comptroller of the U. S. treasury, and served till 1 July, 1796. He was then appointed district attorney for Massachusetts, and in 1801 U. S. district judge in the same state, in which office he remained to the end of his life. He was a scholar in various departments of knowledge, and especially eminent for his acquaintance with the history and antiquities of New England. In 1813 he delivered an address on the "Landing of the Pilgrims" before the Massachusetts historical society, of which he was president from 1818 till 1843. He published an edition of Morton's "New England Memorial," with copious and valuable notes (Boston, 1826); a "Eulogy on George Washington"; and "An Attempt to Explain the Inscription on Dighton Rock." See a memoir by Thomas Kinnicutt in "Archæologia Americana."

DAVIS, John, statesman, b. in Northborough, Mass., 13 Jan., 1787; d. in Worcester, Mass., 19 April, 1854. He was graduated at Yale with honor in 1812, studied law, was admitted to the bar in 1815, and practised with success in Worcester. He was elected to congress as a whig in 1824, and re-elected for the four succeeding terms, sitting from December, 1825, till January, 1834, and taking a leading part as a protectionist in opposing Henry Clay's compromise tariff bill of 1833, and in all transactions relating to finance and commerce. He resigned his seat on being elected governor of Massachusetts. At the conclusion of his term as governor he was sent to the U. S. senate, and served from 7 Dec., 1835, till January, 1841, when he resigned to accept the governorship a second time. In the senate he was a strong opponent of the administrations of Jackson and Van Buren, and took

a conspicuous part in the debates as an advocate of protection for American industry, replying to the free-trade arguments of southern statesmen in speeches that were considered extremely clear expositions of the protective theories. A declaration in one of his speeches, that James Buchanan was in favor of reducing the wages of American workingmen to ten cents a day, was the origin of the epithet "ten-cent Jimmy," which was applied to that statesman by his political opponents for several years. A short speech against the sub-treasury, delivered in 1840, was printed during the presidential canvass of that year as an electioneering pamphlet, of which more than a million copies were distributed. He was again elected U. S. senator, and served from 24 March, 1845, till 3 March, 1853, but declined a re-election, and died suddenly at his home. He protested vigorously against the war with Mexico. In the controversy that followed, over the introduction of slavery into the U. S. territories, he earnestly advocated its exclusion. The Wilmot proviso received his support, but the compromise acts of 1850 encountered his decided opposition. He enjoyed the respect and confidence of his constituents in an unusual degree, and established a reputation for high principles that gained for him the popular appellation of "honest John Davis."—His wife, who was a sister of George Bancroft, the historian, died in Worcester, Mass., 24 Jan., 1872, at the age of eighty years.—His son, **John Chandler Bancroft,** diplomatist, b. in Worcester, Mass., 29 Dec., 1822, was graduated at Harvard in 1840, studied law, and began practice. On 31 Aug., 1849, when Mr. Bancroft left the English court, he succeeded John R. Brodhead as secretary of legation, and acted as chargé d'affaires during the absence of the minister, Abbott Lawrence, for several months in that and the two succeeding years. He resigned on 30 Nov., 1852, was American correspondent of the London "Times" from 1854 till 1861, and during that time practised law in New York city. In 1868 he was elected to the New York legislature, and on 25 March, 1869, appointed assistant secretary of state, which post he resigned in 1871 to act as agent of the U. S. government before the Geneva court of arbitration on the Alabama claims. On 24 Jan., 1873, he was reappointed assistant secretary of state. While in the department of state he acted as arbitrator in a dispute between Great Britain and Portugal. In 1871 he was a member, and the secretary, of the high commission that concluded the treaty of Washington. He resigned his place on receiving the appointment of minister to the German empire. After his return from Berlin, in 1877, he was made a judge of the U. S. court of claims in Washington, D. C., and served from January, 1878, till December, 1881. In November, 1882, he was again appointed to the same post, and on 5 Nov., 1883, became reporter of the U. S. supreme court. He has published "The Massachusetts Justice" (Worcester, 1847); "The Case of the United States laid before the Tribunal of Arbitration at Geneva" (Washington, 1871); "Treaties of the United States, with Notes" (revised ed., 1873); and vols. 108–118 of "United States Reports."—Another son, **Hasbrouck,** soldier, b. in Worcester, Mass., 19 April, 1827; drowned at sea, 19 Oct., 1870, was graduated at Williams in 1845, and afterward studied in Germany. He taught in the Worcester high-school for a year, and was settled as pastor of the Unitarian society in Watertown, Mass., in 1849. He afterward studied law, was admitted to the Massachusetts bar in 1854, and went to Chicago in 1855. He was mustered into the United States service in 1862 as lieutenant-colonel of the 11th Illinois cavalry. He served with conspicuous gallantry in Stoneman's pursuit of the Confederates after their retreat from Yorktown in April, 1862, and in the autumn distinguished himself at Martinsburg and Harper's Ferry, where he was in command of the Union cavalry, and led them, on the night of 14 Sept., 1862, through the enemy's lines to Greencastle, Pa., capturing an ammunition-train on the way. He was promoted colonel, 5 Jan., 1864, and at the close of the war was brevetted brigadier-general. After returning to Chicago, he was elected city attorney. He was lost on the steamer "Cambria" in the voyage to Europe.—**John,** son of Hasbrouck, b. in Newton, Mass., 16 Sept., 1851, studied in the universities of Heidelberg, Berlin, and Paris. After holding various posts in the department of state and the diplomatic service, he was appointed clerk to the court of Alabama claims in 1874. He practised law in Washington and New York, and was assistant counsel for the United States before the Franco-American claims commission in 1881. On 7 July, 1882, he became assistant secretary of state, and while holding that office was several times acting secretary. On 20 Jan., 1885, he was appointed judge of the U. S. court of claims.—Another son, **Horace,** manufacturer, b. in Worcester, Mass., 16 March, 1831. He was graduated at Harvard in 1849, and, after beginning the study of law, went to California in 1852, and engaged in manufacturing. He represented the San Francisco district in congress from 1877 to 1881. He contributed a paper to the American antiquarian society on the "Likelihood of an Admixture of Japanese Blood on the Northwest," which was afterward published separately. He also published "Dolor Davis, a Sketch of his Life" (1881), and "American Constitutions," in the Johns Hopkins series (Baltimore, 1885).—Another son, **Andrew McFarland,** antiquarian and author, b. in Worcester, Mass., 30 Dec., 1833. He was graduated at the Lawrence scientific school of Harvard university in 1854, studied law, and was admitted to the bar in 1859. After practising a short time in Massachusetts he went to California, and was for several years a partner of his brother in the manufacturing business. He published articles in the "Overland" and "Atlantic Monthly" magazines, presented a paper on the "Journey of Moncacht-Apé" to the American antiquarian society, afterward printed separately (Worcester, 1883), published a paper on "Indian Games" in the "Bulletin" of the Essex institute, which was also printed separately (Salem, 1886), and contributed to Justin Winsor's "Narrative and Critical History of America" the chapter on "Louisiana and Canada" and that on "Border Warfare during the Revolution."



DAVIS, John A. G., jurist, b. in Middlesex county, Va., in 1801; d. in Williamsburg, Va., 14 Nov., 1840. He was educated at William and Mary college, practised law in Albemarle county, edited a weekly journal at Charlottesville, and in 1830

was chosen professor of law at the University of Virginia. He died from a pistol-shot wound at the hands of a refractory student, whom he was endeavoring to arrest under the university laws. Among his publications are a treatise on "Estates Tail, Executory Devises, and Contingent Remainders under the Virginia Statutes modifying the Common Law"; "Treatise on Criminal Law, and Guide to Justices of the Peace" (1838); and a tractate "Against the Constitutional Right of Congress to pass Laws expressly and especially for the Protection of Domestic Manufacturers."

DAVIS, John Lee, naval officer, b. in Carlisle, Sullivan co., Ind., 3 Sept., 1825. He entered the U. S. service as a midshipman on 9 Jan., 1841, was warranted passed midshipman on 10 Aug., 1847, and, while serving as acting lieutenant, commanding one of the boats of the "Preble," of the East India squadron, he boarded a piratical Chinese junk off Macao in November, 1849, with another officer and sixteen men, and captured the vessel and crew. He was commissioned lieutenant on 15 Sept., 1855, was attached to the Gulf squadron in 1861, and, as executive officer of the "Water Witch," took part in engagements with the Confederate ram "Manassas" at the head of the Mississippi passes and the squadron near Pilot Town on the same day, 12 Oct., 1861. He was commissioned lieutenant-commander on 16 July, 1862, and attacked Fort McAllister on 19 Nov., when his vessel was pierced by a solid shot below water. The leak was stopped temporarily, and after the action the vessel was taken on shore and patched at the falling of the tide. He again engaged the fort on 27 Jan. and 1 Feb., 1863, and on 28 Feb., when the privateer "Nashville" was destroyed. On 19 March he sank the blockade-running steamer "Georgiana" when she attempted to enter Charleston harbor. He was transferred to the command of the iron-clad "Montauk," and took part in the engagements with Forts Sumter, Gregg, Moultrie, and Battery Bee, in the beginning of September, 1863, and in the attacks on Fort Sumter on 5, 9, and 10 Nov., and that on Fort Moultrie on 16 Nov., 1863. In 1864–'5 he commanded the steamer "Sassacus," of the North Atlantic blockading squadron, which towed the powder-boat "Louisiana" from Norfolk to Fort Fisher in December, and engaged that fort on 24 and 25 Dec., 1864, 13 and 14 Jan., 1865; Fort Anderson, in Cape Fear river, on 18 Feb.; and Fort Strong on 20 and 21 Feb., on which last day the vessel was struck under the water-line, but the leak was kept under till dark, and then effectually stopped. He was commissioned commander on 25 July, 1866, promoted captain on 14 Feb., 1873, and was a member of the light-house board in 1876, and of the board of inspection in 1882. He was promoted commodore on 4 Feb., 1882, commanded the Asiatic station in 1883–'6, and on 30 Oct., 1885, received his commission as rear-admiral, and was in November, 1886, relieved of his command of the Asiatic squadron and placed on the retired list.

DAVIS, John W., statesman, b. in Cumberland county, Pa., 17 July, 1799; d. in Carlisle, Ind., 22 Aug., 1859. He received a classical education, studied medicine, and was graduated at the Baltimore medical college in 1821, removing in 1823 to Carlisle, Ind. He was for several years a member of the Indiana house of representatives, being chosen speaker in 1832. In 1834 he was appointed a commissioner to negotiate a treaty with the Indians. He was elected to congress by the democrats, and served from 7 Dec., 1835, till 3 March, 1837, was re-elected and again served from 1839 till 1841, and from 1843 till 1847. During his last term he was speaker of the house of representatives, having been elected 1 Dec., 1845. He was U. S. commissioner to China in 1848–'50, and governor of Oregon in 1853–'4. He presided over the convention held at Baltimore in 1852 that nominated Franklin Pierce for the presidency,

DAVIS, L. Clark, journalist, b. near Sandusky, Ohio, 25 Sept., 1835. He was educated in the common schools, and early turned his attention to journalism, becoming an editorial writer for various Philadelphia papers. In 1869 he assumed the management of the Philadelphia "Inquirer," which he has held ever since. To his efforts are due the first passage of laws for regulating the admission of the insane into asylums in Pennsylvania, and the amelioration of their condition. Mr. Davis has been a contributor to magazine literature since 1867, has written many short stories and essays on the dramatic art, and has also published "The Stranded Ship" (New York, 1869).—His wife, **Rebecca Harding,** author, b. in Washington, Pa., 24 June, 1831, passed her early life in West Virginia, and first attracted attention as a writer by her "Life in the Iron-Mills," published in the "Atlantic Monthly" in 1861. To the same periodical she contributed, a few months later, "A Story of To-Day," published in book-form, under the title of "Margaret Howth" (1861). In 1863 she was married and went to reside in Philadelphia. In 1869 she became an editorial writer on the staff of the New York "Tribune." In addition to sketches, stories, and editorial work, she has published "Waiting for the Verdict" (Philadelphia, 1867); "Dallas Galbraith" (1868); "John Andross" (1875); "Berrytown" (1876); and "A Law unto Herself" (1878).

DAVIS, Matthew L., author, b. in 1766; d. in Manhattanville, N. Y., 21 June, 1850. He was by trade a printer, became a skilful writer, and attached himself to the political fortunes of Aaron Burr, whom he supported in his candidacy for the presidency. For many years he wrote letters from the national capital to the New York "Courier and Enquirer" under the pen-name of "The Spy in Washington." He also corresponded with the London "Times," signing his letters "The Genevese Traveller." He was associated with Philip Freneau in the publication of the "Timepiece and Literary Companion" in New York city, which was begun on 15 Sept., 1797, and ceased on 30 Aug. of the following year. For many years before Burr's death Davis was his only intimate friend and associate. He published "Memoirs of Aaron Burr, with Miscellaneous Correspondence" (New York, 1836–'7), and edited Burr's "Private Journal during his Residence in Europe" (1838).

DAVIS, Nathan Smith, physician, b. in Greene, Chenango co., N. Y., 9 Jan., 1817. He was graduated at the medical college in Fairfield, N. Y., in 1837, established himself in practice at Binghamton, contributed notable papers on the nervous system to medical journals, and was instrumental in establishing the National medical association, of which he was president in 1864–'5. He removed to New York in 1847, assumed the editorship of the "Annalist" in 1848, and in 1849 went to Chicago, Ill., to take the chair of physiology and pathology in the Rush medical school. In 1850 he assumed charge also of the department of practice of medicine. He assisted in organizing a state and a city medical association, and was one of the principal founders of Mercy hospital. His connection with the medical college continued until he assumed the editorship of the Chicago "Medical Examiner" in 1860. He also conducted

for more than twenty years the "Northwestern Journal," of which he took charge in 1855. He was one of the founders of Northwestern university, the Chicago academy of sciences, and the Washingtonian home for the reformation of inebriates, of which he was chosen president. This office he resigned, and also gave up the editorship of the "Medical Examiner." In 1883 he was appointed editor of the "Journal of the American Medical Association." In May, 1886, he was elected president of the International medical congress. In the Chicago medical college, the medical department of the Northwestern university, he assumed the professorship of the principles and practice of medicine and of clinical medicine, and is also dean of the faculty. His principal published writings are an "Essay on the Philosophy of Medicine"; "Medical Education and Reform"; "Remedial Value and Proper Use of Alcoholic Drinks"; "History of Medical Education in the United States"; "An Experimental Inquiry concerning the Functions of Assimilation, Nutrition, and Animal Heat"; "Clinical Lectures" (1873); the chapter on "Bronchitis" in the "American System of Practice of Medicine"; "Lectures on the Principles and Practice of Medicine" (Chicago, 1884); and an article on "Insanity from Acute and Chronic Alcoholism" in the "Hand-Book of Medicine" (New York, 1886).

DAVIS, Nelson Henry, soldier, b. in Oxford, Worcester co., Mass., 20 Sept., 1821. He was graduated at the U. S. military academy in 1846, and assigned to the 3d infantry. He served in the war with Mexico, received the brevet of 1st lieutenant for gallantry at Contreras and Churubusco, and was also at the siege of Vera Cruz, the battle of Cerro Gordo, and the capture of the city of Mexico. He was promoted 1st lieutenant 8 June, 1849, and then served on the frontier, being engaged in several actions while on the Sierra Nevada expedition of 1849–'50, and taking part in the Rogue river expedition of 1853. He was made captain on 3 March, 1855, was at the battle of Bull Run, and from 4 Sept. to 12 Nov., 1861, was colonel of the 7th Massachusetts volunteers. He then became major and assistant inspector-general, and served with the Army of the Potomac till the autumn of 1863, receiving the brevet of lieutenant-colonel for gallantry at Gettysburg. He was then transferred to New Mexico, was brevetted colonel 27 June, 1865, for his services against the Apache Indians, and also received the brevet of brigadier-general for his services in the civil war. He was inspector-general of the district of New Mexico in 1868, of the department of Missouri in 1868–'72, was on a tour of inspection till 1876, and then became inspector-general of the division of the Atlantic. He was commissioned brigadier-general on 11 March, 1885, and retired on 20 Sept.

DAVIS, Noah, jurist, b. in Haverhill, N. H., 10 Sept., 1818. He was educated at Albion, N. Y., whither his parents removed in 1825, and in the seminary at Lima, studied law, was admitted to the bar in 1841, and practised in Gaines, and then in Buffalo. In 1844 he formed a partnership with Sanford E. Church, with whom he practised in Albion for fourteen years, until he was appointed, in March, 1857, a justice of the New York supreme court, to which office he was subsequently twice elected. After serving for two years as judge, he resigned in November, 1868, having been elected as a Republican to the National house of representatives. He served in congress from 4 March, 1869, till 20 July, 1870, when he resigned, having been appointed by President Grant U. S. attorney for the southern district of New York. He resigned that office on 31 Dec., 1872, being elected a justice of the New York state supreme court for the term expiring in December, 1887. The trial of the case of Edward Stokes for the murder of Fisk, and that of William M. Tweed for malfeasance in office, were held before him soon after he took his place on the bench. He sentenced Tweed to a year's imprisonment for each of the twelve counts of the indictment; but, two years later, the court of appeals decided that this cumulative sentence was contrary to law. In 1874 he became presiding justice. In January, 1887, he was retired from the bench, and resumed practice. On his retirement, he said: "It is my nature to form strong convictions, and sometimes I express them too strongly, but neither by speech nor silence have I ever designed to injure any suitor or his counsel. In searching the record of my judicial life I can find no entry that I ever decided any cause or matter contrary to my then convictions of right." A committee of lawyers presented Judge Davis's portrait by Daniel Huntington to the supreme court.

Noah Davis

DAVIS, Noah Knowles, educator, b. in Philadelphia, Pa., 15 May, 1830. He was graduated at Mercer university, Ga., in 1849, and then spent several years in Philadelphia, chiefly in the study of chemistry. While here he edited the "Model Architect" and the "Carpenter's Guide." In 1852 he became professor of natural science in Howard college, Marion, Ala., and in 1859 principal of the Judson female institute at the same place. In 1868 he was elected president of Bethel college, Russellville, Ky. In 1873 he was called to the chair of moral science in the University of Virginia. Dr. Davis is the author of "The Theory of Thought, a Treatise on Deductive Logic" (New York, 1880); and has contributed to various reviews. He has received the degree of LL. D. In religious profession Dr. Davis is a Baptist, and is prominent and active in the councils of that denomination.

DAVIS, Paulina (Wright), reformer, b. in Bloomfield, N. Y., 7 Aug., 1813; d. in Providence, R. I., 24 Aug., 1876. She married Francis Wright, of Utica, N. Y., in 1833, and after his death became in 1849 the wife of Thomas Davis, of Providence, R. I., who was a member of congress in 1853–'5. For thirty-five years she labored zealously to promote the rights of women, established "The Una," the first woman-suffrage paper, wrote a history of woman-suffrage reform, and gave lectures in the principal cities of the United States.

DAVIS, Reuben, lawyer, b. in Tennessee, 18 Jan., 1813; d. in Columbus, Miss., 15 Dec., 1873. He studied medicine, and after a few years' practice abandoned that profession for the study of law. He removed to Aberdeen, Miss., and was prosecuting attorney for the 6th judicial district from 1835 till 1839. He was appointed judge of the high court of appeals in 1842, but resigned after four months' service. He served, in the war with Mexico,

as colonel of the 2d regiment of Mississippi volunteers. He was a member of the state house of representatives from 1855 till 1857, and was elected to congress from Mississippi, serving from 1857 till 1861, when he retired and entered the Confederate army as brigadier-general, commanding a brigade of Mississippi militia in Kentucky. He resumed his law practice, and, while defending a prisoner in the court-house of Columbus, was shot by the prosecuting attorney after a verbal altercation.

DAVIS, Richard Bingham, poet, b. in New York city, 21 Aug., 1771; d. in New Brunswick, N. J., in 1799. He was educated at Columbia, but was not graduated. He pursued the business of his father, wood-carving, until 1796, when he became editor of the "Diary," a daily gazette published in New York, for which he wrote about one year. He then engaged in mercantile business. In appearance he is said to have been somewhat like Oliver Goldsmith—awkward in manner and person, as well as in speech. His poems are expressions of personal sentiment, tinged with melancholy. They were collected and published by the "Calliopean Society," of which he was a member (New York, 1807). An "Ode to Imagination" shows his earnestness, and an "Elegy on an Old Wig, found in the Street," his humor. He was also a contributor to the "Drone Papers," published in the "New York Magazine," for which he wrote a well-drawn character-sketch of himself, under the name of "Martlett."

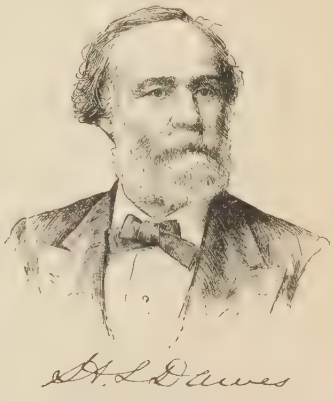
DAVIS, Sylvanus, pioneer, d. in Boston in 1704. In June, 1659, he bought a tract of land of the Indians in Damariscotta, Maine. He resided for some time at Sheepscott, was severely wounded while making his escape from Fort Arowsic, and captured by Indians in August, 1676. He accompanied Maj. Waldron's expedition early in 1677, and resided in Falmouth, where he owned land, in 1680. He commanded Fort Loyal, Falmouth, and after a five days' defence was obliged to surrender it to the French and Indians in May, 1690. He was carried to Quebec, and exchanged four months later. He was a counsellor in 1691–'2. His account of the conduct of the war is preserved in the Massachusetts historical collections.

DAVIS, Thomas Frederick, clergyman, b. in Wilmington, N. C., 8 Feb., 1804; d. in Camden, S. C., 2 Dec., 1871. He was graduated at the University of North Carolina, Chapel Hill, in 1822, studied law, and practised, but subsequently studied theology, and was ordained deacon in Wilmington by Bishop Ives, 27 Nov., 1831, and priest by the same bishop in Pittsboro', 16 Dec., 1832. He officiated in Pittsboro' while in deacon's orders, became rector of St. James's church, Wilmington, and St. Luke's church, Salisbury, N. C. In November, 1846, he removed to South Carolina, and became rector of Grace church, Camden. He was elected bishop of the diocese, and consecrated in St. John's chapel, New York, 17 Oct., 1853. Bishop Davis received the degree of D. D. from Columbia college in 1853, and the same year from the University of North Carolina.

DAVIS, William Bramwell, physician, b. in Cincinnati, 22 July, 1832. His parents emigrated to the United States from Wales. He was graduated at Wesleyan university in 1852, and in 1855 at Miami medical college, where since 1873 he has been professor of therapeutics. During the civil war he was surgeon of the 137th regiment of Ohio volunteers, and surgeon at the West End military hospital in Cincinnati. He has been identified with many of the public offices of that city, as well as the medical and educational associations. In 1872 he travelled in Europe. Some of his principal publications are "Report on Vaccination" (Ohio state medical society, 1870); "Consumption and Life Insurance" (1875); "Re-vaccination" (Cincinnati medical society, 1875); "Vaccino-Syphilis and Animal Vaccine" (1876); "Intestinal Obstruction" (1880); "Progress of Therapeutics" (1881); and "The Alcohol Question" (1886).

DAVIS, Woodbury, jurist, b. in Standish, Me., 25 July, 1818; d. in Portland, 15 Aug., 1871. At an early age he removed with his parents to Brooks, Waldo co., where he was educated. He studied law in Belfast, began to practise his profession in Portland, and was elected a judge of the supreme court. In 1866 he was appointed postmaster of Portland, and relinquished law practice. Judge Davis took an active interest in the temperance reform, and was instrumental in shaping the legislation of the state upon that question. He was an anti-slavery man, and one of the founders of the republican party. He contributed many articles on political and legal subjects to the newspapers of his native state, to the New York "Independent," and to various periodicals, and published "The Beautiful City," a religious book (New York, 1859).

DAWES, Henry Laurens, statesman, b. in Cummington, Mass., 30 Oct., 1816. He was graduated at Yale in 1839, became a teacher, and edited the Greenfield "Gazette," and subsequently the Adams "Transcript." He was admitted to the bar in 1842, and served in the legislature from 1848 till 1850, when he became a member of the state senate. He was a member of the Constitutional convention in 1853, and attorney for the western district of Massachusetts, continuing until 1857, when he was elected to congress, and served as a member of the committee on Revolutionary claims. He remained in congress by successive re-elections until 1873. In 1866 he was a delegate to the Loyalists' convention in Philadelphia, and in 1875 he succeeded Charles Sumner in the senate, and was re-elected in 1881 and 1887. He has been chairman of the committee on ways and means, has served on committee on public buildings and grounds, and inaugurated the measure by which the completion of the Washington monument was undertaken. He is the author of many tariff measures, and assisted in the construction of the wool and woollen tariff of 1868, which was the basis of all wool and woollens from that time until 1883. He is also a member of the committees on approbations, civil service, fisheries, Revolutionary claims, and Indian and naval affairs. He was appointed on a special committee to investigate the Indian disturbances in the Indian territory, upon which he made a valuable report. The entire system of Indian education due to legislation was created by Mr. Dawes. Among the important bills of his authorship passed are the severalty bill, the Sioux bill, and the bill making Indians subject to and



protected by our criminal laws. One of his most important measures was the introduction of the "Weather Bulletin," in 1869, at the suggestion of Prof. Cleveland Abbe, for the purpose of collecting and comparing weather reports from all parts of the country.—His daughter, ANNA LAURENS, is known as a writer on political topics.

DAWES, James W., senator, b. in McConnelsville, Ohio, 8 Jan., 1845. In 1856 he removed with his parents to Newport, Wis., where he received a common-school education. After studying law at Fox Lake, Wis., he was admitted to the bar in 1871. He was engaged in mercantile business until 1877, and since that time has practised his profession. He was a member of the Nebraska constitutional convention in 1875, and was chosen a U. S. senator from that state in 1876. He was chairman of the Republican state central committee of Nebraska from 1876 till 1882. In 1880 he was a delegate to the Republican national convention at Chicago, and was a member of the National republican committee for Nebraska for a term of four years. Since 1875 he has been trustee and secretary of Doane college at Crete, Neb. He was elected governor of Nebraska in 1882, and re-elected in 1884.

DAWES, Thomas, patriot, b. in Boston, 5 Aug., 1731; d. there, 2 Jan., 1809. He was a mechanic, and had received a common-school education. During the controversy with Great Britain he was made colonel of the Boston regiment in 1773, serving until 1778. He often presided at the town-meetings of Boston. He was a member of the house and of the senate, as well as state councillor, and also a member of the Academy of arts and sciences. —His son, **Thomas**, jurist, b. in Boston, 8 July, 1757; d. there, 22 July, 1825, was graduated at Harvard in 1777. He was a member of the State constitutional conventions of 1780 and 1820, and of that which adopted the Federal constitution in 1789. He was judge of the supreme court of Massachusetts from 1792 till 1803, judge of the municipal court from 1803 till 1823, and judge of probate until his death. His literary productions were popular, and his witticisms proverbial. He published an "Oration" (July, 1787), an "Oration on the Boston Massacre," and the "Law Given on Mount Sinai" (1777). He was a member of the Academy of arts and sciences.—His son, **Rufus**, poet, b. in Boston, 26 Jan., 1803; d. in Washington, D. C., 30 Nov., 1859, entered Harvard in 1820, but was refused a degree, owing to his supposed participation in a breach of discipline. He resented this accusation, which was afterward proved to be unjust, by publishing a satirical poem on the faculty. He studied law, and was admitted to the bar, but never practised. He contributed poems to the "United States Literary Gazette," published in Cambridge, and conducted for a time a weekly paper in Baltimore, called the "Emerald." He published "The Valley of the Nashaway, and other Poems" (1830); "Geraldine," a composition resembling "Don Juan" in form and treatment (1839); "Athena of Damascus," a tragedy founded on the siege of Damascus by the Turks, A. D. 634 (1839); "Nix's Mate," a spirited and successful romance (1840); an "Ode on the Death of Walter Scott"; also several songs and poems, some of which were sung at the laying of the corner-stone of Bunker Hill monument. Mr. Dawes held a government office in one of the departments in Washington during the latter years of his life. He was a Swedenborgian, and frequently preached.

DAWES, William, patriot, of Lexington. He was despatched to Lexington, with Paul Revere, on 18 April, 1775, and rode through Roxbury, Revere going by way of Charlestown. In the morning of 19 April the message from Warren reached Adams and Hancock. Revere and Dawes, joined by Samuel Prescott, from Concord, rode forward, calling the inhabitants. At Lincoln they were surprised by a party of British officers, and both Dawes and Revere were seized and taken to Lexington. Prescott made his escape to Concord.

DAWSON, Benjamin Franklin, physician, b. in New York city, 28 June, 1847. He studied at Columbia, served in the last year of the civil war as assistant surgeon in the U. S. army, and was graduated at the College of physicians and surgeons in 1866. He then established himself in New York, making a special study of obstetrics and diseases of women and children. He invented a new galvanic battery for galvano-caustic surgery in 1876, the superior qualities of which have done much to advance that branch of surgery. In 1868 he founded the "American Journal of Obstetrics and Diseases of Women and Children," which he edited until 1874. Among his publications are a translation, in conjunction with Prof. Joseph Kamerer, of Klob's "Pathological Anatomy of the Female Sexual Organs" (1868); an American edition of Barnes's "Obstetric Operations," with additions (1870); and several monographs entitled "The Use and Comparative Merits of the Bichloride of Methyline as an Anæsthetic (1874); and "Relations between Alimentation and the Gastro-intestinal Disorders of Infants and Young Children" (1875).

DAWSON, George, journalist, b. in Falkirk, Scotland, 14 March, 1813; d. in Albany, N. Y., 17 Feb., 1883. Though without the advantages of early schooling, he obtained an education through his own exertions. At five years of age he was brought to this country by his parents, and at eleven was placed in a printing-office in Niagara county, N. Y. In 1826 he removed to Rochester and found employment in the office of the "Anti-Masonic Inquirer," edited by Thurlow Weed. In 1830 he accompanied Mr. Weed to Albany, and became foreman in the office of the "Evening Journal." From 1836 till 1839 he was editor of the Rochester daily "Democrat," and from 1839 till 1842 of the Detroit daily "Advertiser," when he returned to Rochester and resumed the editorial charge of the "Democrat." In 1846 he became associate editor of the Albany "Evening Journal," and, on Mr. Weed's retirement in 1862, assumed control of the paper as senior editor and proprietor, remaining in that relation until 1877. He was postmaster of Albany from 1861 till 1867. In 1850 he travelled in Europe. Though ardently devoted to the republican party, Mr. Dawson was far above the narrow partisan. He was an able and zealous advocate of all patriotic and philanthropic enterprises, and especially of free schools. He was a devout Christian, especially active in the benevolent works of the Baptist denomination, to which he belonged. He gave much time and attention to the subject of Sunday-school missions, in connection with which he was teacher, superintendent, and lay preacher. He was the author of "The Pleasures of Angling" (New York, 1876).

DAWSON, Henry Barton, historian, b. in Gosberton, Lincolnshire, England, 8 June, 1821. He came with his parents to New York in 1834. In 1840 he began contributing to the daily press, and in 1845–'6 devoted his evenings to the editorship of the "Crystal Fount," a temperance newspaper. His first historical composition was a "History of the Park" and its vicinity, which was published in the "Corporation Manual" (1855). In 1858 he began the publication, in serial form, of his "Battles

of the United States by Sea and Land," and became involved in a controversy concerning the merits of Gen. Israel Putnam. The controversy was carried on by correspondence in the Hartford "Post," and attracted much attention, and the legislature of Connecticut took special action on the subject. The letters were subsequently published in book-form, and copies were sold as high as $50. In 1862 Mr. Dawson made a complete transcript of the receipts and disbursements of moneys for the municipal purposes of New York during the occupation of that city by the British army, 1776 to 1783, from the original vouchers. In 1863 he edited the "Fœderalist," the distinguishing feature of his work being the restoration of the original text and the rejection of unauthorized mutilations. Its publication called forth an attack by John Jay and James A. Hamilton, and a long controversy ensued, which was afterward reprinted in a volume entitled "Current Fictions tested by Uncurrent Facts" (1864). In 1865 he became editor of the "Gazette," a democratic newspaper published in Yonkers. The first page of the paper was occupied by historical and bibliographical material. Judge Nelson, of the U. S. supreme court, once ordered a case to be reargued, in order that articles bearing on it which had appeared in the "Gazette" after the case had been argued, might be judicially admitted as authorities. In 1866 Mr. Dawson became editor of the "Historical Magazine," which in 1877 he enlarged to double its previous size. He is a member of many learned societies, and has read before them a large number of papers. He has published in book-form "Battles of the United States by Sea and Land" (New York, 1858); "The Fœderalist" (1863; 3d ed., 1864); "Current Fictions" (1864); "Recollections of the Jersey Prison-Ship, by Capt. Thomas Dring, one of the Prisoners," edited from the original manuscript (1865); "Rutgers against Waddington" (1866); and "Westchester County in the Revolution" (1886).

DAWSON, John, statesman, b. in Virginia in 1762; d. in Washington, D. C., 30 March, 1814. He was graduated at Harvard in 1782, studied law, and was admitted to the bar. He was a presidential elector on the Washington ticket in 1793, a member of the Virginia legislature, and a representative of congress from Virginia for nine consecutive terms, serving from 15 May, 1797, till 30 March, 1814. He was bearer of despatches from President Adams to France in 1801, and in the war of 1812–'5 was one of Gen. Jackson's aides.

DAWSON, John Littleton, lawyer, b. in Uniontown, Pa., 7 Feb., 1813; d. there, 18 Sept., 1870. He was educated at Washington college, studied law, and was admitted to the bar, practising first in Brownsville, Pa. In 1845 he was appointed U. S. district attorney for the western district of Pennsylvania. He was a member of congress from 1851 till 1855, and was elected again in 1867. He was the author of the Homestead bill of 1854. In 1855 he was appointed governor of Kansas, but declined the office. He was a delegate to the Democratic national conventions of 1844, 1848, 1860, and 1868.

DAWSON, Sir **John William,** Canadian geologist, b. in Pictou, Nova Scotia, 13 Oct., 1820. His father came from the north of Scotland early in the century and settled at Pictou. The son received his early training at the college of Pictou, and, having finished his course there, entered Edinburgh university, returning to Nova Scotia after passing a winter in study. So early as his tenth year he manifested that love of science which subsequently became his chief characteristic, and while prosecuting the regular course of study at Pictou college he made extensive collections in the natural history of his native province. In 1842 he accompanied Sir Charles Lyell on his scientific tour in Nova Scotia, made several original discoveries in paleontology, and followed up his investigations by studies of the carboniferous rocks of Nova Scotia, on which he contributed two important papers to the Geological society of London. In 1846 he returned to Edinburgh university, studying practical chemistry and other subjects. In 1850 he was appointed superintendent of education for Nova Scotia, an office which he held for three years. He also aided materially in establishing a normal school in Nova Scotia, and in regulating the affairs of the University of New Brunswick, as a member of the commission appointed for that purpose. In connection with these labors he published elaborate reports on the schools of Nova Scotia, and a hand-book entitled "Scientific Contributions toward the Improvement of Agriculture." In 1855 he became principal and professor of natural history in McGill college, Montreal. When Prof. Dawson was appointed, the medical department of the college alone was in a flourishing condition, but soon after he assumed the management all the other departments became prosperous. In 1857 he secured the establishment of McGill normal school for the training of Protestant teachers, became its principal, and lectured in it on natural science until 1870. In 1858 he established a school of civil engineering, which was discontinued in 1863 by an act of the legislature, but which he revived in 1871 as the department of practical and applied science in connection with the college over which he presided. Dr. Dawson was elected a fellow of the Geological society of London in 1854, and of the Royal society in 1862; was elected president of the American association and of the Royal society of Canada in 1882, and of the British association in 1886. He was created a companion of the order of St. Michael and St. George in 1882, and knighted in 1885. In 1852 he discovered the *Dendrerpeton acadianum*, *Pupa vetusta*, and other fossil reptiles, and in 1864 the *Eozoon canadense*, the most important of his geological discoveries. This fossil had been before noticed by Sir William Logan; but Dr. Dawson, to whom he submitted his specimens, was the first to demonstrate its foraminiferous character and to describe its structure. Hitherto the Laurentian rocks had been regarded as devoid of life, and were known as the azoic, but Dr. Dawson now substituted the name eozoic. When the theory of evolution was gaining ground among men of science, Dr. Dawson strongly opposed the extreme view, and he has always shown an aversion to those scientific hypotheses which seem to threaten the foundations of religious faith. In a course of lectures delivered in New York in 1874–'5 he contended that the discoveries of modern science, so

J. Wm. Dawson

far as they are facts, harmonize completely with the sacred record. In 1883 Dr. Dawson travelled in Egypt and Syria. His numerous scientific papers include "The Formation of Gypsum," "Boulder Formation," "The Renewal of Forests destroyed by Fire," "Mode of Accumulation of Coal," and "On the Triassic Red Sandstone of Nova Scotia and Prince Edward Island." He has published in book-form "Hand-Book of Geography and Natural History of Nova Scotia"; "Acadian Geology" (1855); "Archaia, or Studies of Creation in Genesis" (1859); "Air-Breathers of the Coal Period"; "Notes on the Post-Pliocene of Canada" (1873); "The Story of the Earth and Man" (New York, 1873); "Science and the Bible" (1875); "The Dawn of Life" (1875); "The Origin of the World" (1877); "Fossil Men and their Modern Representatives" (1878); "The Change of Life in Geological Time" (1880); "Chain of Life" (1884); and "Egypt and Syria" (1885).—His son, **George Mercer,** Canadian geologist, b. in Pictou, Nova Scotia, 1 Aug., 1849, was educated at McGill college and at the Royal school of mines, London, gaining at the latter the Edward Forbes medal in paleontology and the Murchison medal in geology, and being graduated as R. S. M. in 1872. In 1873–'4 he was geologist and naturalist in connection with Her Majesty's North American boundary commission, and since then has been assistant director of the geological survey of Canada. He has travelled extensively in British Columbia, the Canadian northwest, and in Europe, in connection with the investigation of mining industries. He is the author of "Geology and Resources of the Forty-ninth Parallel," reports in connection with geological survey, and numerous papers on geology, natural history, and ethnology.

DAWSON, Samuel K., soldier, b. in Pennsylvania about 1818. He was graduated at the U. S. military academy in 1839, and assigned as second lieutenant to the 1st artillery. He served on the northern frontier at Plattsburg, N. Y., during the Canada border disturbances of 1839, and on the Maine frontier, pending the "disputed territory" controversy in 1840. During the war with Mexico he was present at the battles of Palo Alto, Resaca de la Palma, and Cerro Gordo, and took part in the siege of Vera Cruz. He was promoted to be first lieutenant, 18 June, 1846, brevet captain, 18 April, 1847, captain, 31 March, 1853, and major of the 19th infantry, 14 May, 1861. Capt. Dawson took part in the campaigns against the Seminoles, 1851–'6, and was attached to the party engaged in the pursuit of Cortinas's Mexican marauders in 1859. During the civil war he was present at the bombardment of Fort Pickens, in 1861, and served in the Tennessee campaign of 1863, being severely wounded at the battle of Chickamauga, for which he was promoted to be brevet colonel, and subsequently brevet brigadier-general, for gallant and meritorious services during the war. He was commissioned colonel of the 19th infantry, 28 July, 1866. In 1865 and 1866 he commanded a detachment of the 15th infantry at Mobile, and the entire regiment at Macon, Ga.

DAWSON, Simon James, civil engineer, b. in Scotland about 1820. He came to Canada when a boy. In 1851 he was appointed to plan and superintend the construction of extensive works then contemplated on the St. Maurice, to open up the vast pine regions of that river and its tributaries (previously almost inaccessible to the lumber trade), which works he performed successfully. He was appointed in 1857 to explore the country from Lake Superior to the Saskatchewan, completed the work, and reported upon its adaptability for settlement. For some years afterward he carried on business as a timber-merchant on the St. Maurice. In 1868 he was commissioned to begin the construction of the route to Red River, now known as the "Dawson route"; and in 1870 he conducted the Red river expeditionary force under Col. (now Lord) Wolseley, to suppress the half-breed insurrection in the northwest. In 1873 he was joint commissioner with the lieutenant-governor of Manitoba and the Indian commissioner of the northwest in concluding a treaty with the Saulteux tribe of the Ojibway Indians. He resigned the charge of the Dawson route on becoming a candidate for Algoma, for which he was returned at the general election for Ontario in 1875. He resigned his seat in the local legislature, and was elected for Algoma for the Canadian parliament in 1878, and again in 1882. Mr. Dawson has done much to improve his constituency and to ameliorate the condition of the Indians, and in parliament has advocated the formation into a separate province of the great region between the 81st to the 95th meridian—*i. e.*, from French river to the Lake of the Woods.

DAWSON, William C., senator, b. in Greene county, Ga., 4 Jan., 1798; d. in Greensborough, Ga., 5 May, 1856. He was graduated at Franklin college in 1816, and completed his law studies in Litchfield, Conn. In 1818 he was admitted to the bar, and settled in Greensborough, where he was successful as a jury lawyer. He was clerk of the house of representatives of the general assembly of the state for twelve years, and several times senator and representative in the legislature. He was a member of congress from 1836 till 1842, being chairman of the military committee and of the committee on claims. He was appointed judge of the Ocmulgee circuit in 1845, and U. S. senator from 1849 till 1855, serving on important committees, and speaking on many questions of national interest. He published "Laws of Georgia" (1831).

DAY, George Edward, author, b. in Pittsfield, Mass., 19 March, 1815. He was graduated at Yale in 1833, and at Yale theological seminary in 1838, when he became assistant instructor there until 1840. From 1840 till 1851 he was settled as a pastor in Marlboro and Northampton, Mass. He was professor of biblical literature in Lane theological seminary from 1851 till 1866, when he was appointed professor of the Hebrew language, literature, and biblical theology in the theological department of Yale. He edited the "Theological Eclectic" from 1863 till 1871, when it was united with the "Bibliotheca Sacra." He has translated Van Oostersee's "Titus," in Lange's "Commentary," and also Van Oostersee's "Biblical Theology of the New Testament." He was a contributor to Smith's "Bible Dictionary," and has published articles in periodicals and "Reports on the Instruction of the Deaf and Dumb" (1845 and 1861).

DAY, George Tiffany, clergyman, b. in Concord (now Day), Saratoga co., N. Y., 8 Dec., 1822; d. in Providence, R. I., 21 May, 1875. At five years of age he was set to work in a cotton-mill in Hope, R. I., and for several years his time was occupied alternately in the cotton-mill and at school. He studied theology, and in 1846 was ordained and entered upon his first pastorate in Grafton, Mass., where he remained till 1850. While serving in various other places he became connected in 1849 with the "Morning Star" as assistant editor. He was also one of the editorial council of the "Free-will Baptist Quarterly," begun in 1853. He visited Europe in 1857 and 1866. In December, 1866, he

resigned pastoral duties and became editor-in-chief of the "Morning Star," a Free-will Baptist weekly paper, published in Dover, N. H., and afterward removed to Boston. In this editorship he continued until his death. See his "Memoirs" by the Rev. William H. Bowen, D. D. (Dover, N. H., 1876).

DAY, Hannibal, soldier, b. in Vermont about 1802. He is the son of Dr. Sylvester Day, assistant surgeon, U. S. army. He was graduated at the U. S. military academy in 1823, and made second lieutenant in the 2d infantry. On 4 April, 1832, he was commissioned first lieutenant, and in the same year took part in the Black Hawk expedition, but was not on duty at the seat of war. He also served in the Florida wars in 1838–'9 and 1841–'2, and in the war with Mexico in 1846–'7. He was commissioned captain, 7 July, 1838, major, 23 Feb., 1852, lieutenant-colonel, 25 Feb., 1861, and colonel, 7 Jan., 1862. He commanded a brigade of the 5th corps in the Pennsylvania campaign in 1863, taking part in the battle of Gettysburg. He was retired from active duty, "on his own application after forty consecutive years of service," 1 Aug., 1863, and employed on military commissions and courts-martial from 25 July, 1864. On 13 March, 1865, he was brevetted brigadier-general for long service.

DAY, Henry, lawyer, b. in South Hadley, Mass., 25 Dec., 1820. He was graduated at Yale in 1845. He took charge of the classical academy at Fairfield, Conn., until 1847, studied in the Harvard law-school, was admitted to the bar in the autumn of 1848, and settled in New York city. He was a member of the Presbyterian (old school) general assembly that convened in St. Louis in 1867, and of the assembly that met in Albany in 1868. He strongly advocated the union of the old and new schools, and was one of the committee that visited the new-school assembly, then in session in Harrisburg, and laid before it the views of the old-school assembly on the subject of union. He afterward drafted the articles for the basis of union, which were ratified in 1869 at Pittsburg by the joint meeting of the two assemblies. He became a director in the Princeton theological seminary in 1865, and a trustee and director in the Union theological seminary in 1870. He has published "The Lawyer Abroad, or Observations on the Social and Political Condition of Various Countries" (New York, 1874); and "From the Pyrenees to the Pillars of Hercules" (1883).

DAY, Henry Wright, Canadian physician, b. in the township of Kingston, 6 Sept., 1831. He was educated at Newburg academy, and at Queen's university, Kingston, being graduated M. D. in 1859. He began practice in Trenton, and in 1869 was elected a member of the council of physicians and surgeons of Ontario for the Quinté and Cataraqui districts. He has also been president of the council of the College of physicians and surgeons of Ontario. When the first Fenian raid occurred, in 1866, he organized a battery of garrison artillery. He was the first mayor of Trenton, and has been president of the provisional board of directors of the Central Ontario railway.

DAY, Horace H., manufacturer, b. in 1813; d. in Manchester, N. H., 23 Aug., 1878. He was a licensee under Charles Goodyear's rubber patents, which were granted in 1842, and identified with the India-rubber trade from its inception. He was the exclusive licensee under the patents for the manufacture of shirred goods, which were subsequently found to be objectionable. Charles Goodyear, owner of the patents, brought suits against Mr. Day for infringement of the woven-goods right of the patent. Mr. Day instituted cross-suits, and extensive litigation was the result. The most celebrated of all the suits was tried at Trenton, N. J., Daniel Webster appearing as counsel for Mr. Goodyear, and Rufus Choate for Mr. Day. Mr. Webster left his seat in the U. S. senate to try the case. He received $15,000 as a retainer, and his argument at the trial was regarded as one of his best. He won the case, and Mr. Day surrendered his license, transferred his factory and machinery to William Judson, a representative of Mr. Goodyear, and agreed to retire from the business for the sum of $350,000, and counsel-fees amounting to $21,000 additional, all of which amounts were paid to him in 1862. Previous to this time Mr. Day had conceived the idea of utilizing the water-power of Niagara falls. As early as 1856 he had discussed the subject in pamphlets and newspapers, and had organized a company, with himself as vice-president, treasurer, and leading director. A canal was constructed at great cost, the estate of Walter Bryant alone expending $200,000. The canal began about half a mile above the falls, and terminated one fourth of a mile below them. It was 100 feet wide, with a depth of ten feet along its whole length. When Mr. Day bought the property the canal was not finished, and the Bryant estate had been exhausted in the enterprise. Mr. Day completed the canal, bought Grass island for a harbor, and expended $700,000. But the work was sold out to satisfy mortgages in 1877. Mr. Day's next venture was the establishment of a mammoth rubber enterprise in New Jersey, but he received $40,000 to withdraw from it. His later speculations were unfortunate, his large fortune was gone, and he became comparatively poor.

DAY, Jeremiah, clergyman, b. in Colchester, Conn., 26 Jan., 1738; d. in Connecticut, 12 Sept., 1806. He was descended from Robert Day, who emigrated from England in 1634, and whose name is recorded upon a monument erected to the memory of the first settlers of Hartford by the 1st Congregational church of that city. His father, Thomas, great-grandson of Robert Day, settled upon a farm, and, on discovering the boy's fondness for study, sent him to Yale, where he was graduated in 1756. After leaving college, he taught in Sharon until he began his clerical studies, in 1757, with the Rev. Joseph Bellamy, of Bethlehem. Having a valuable farm on Sharon mountain left to him by his brother's will, he occupied it, and devoted his life to mathematical and ethical studies, as well as to agricultural labor. In reference to this period he afterward wrote a "Poem on the Pleasures of a Country Life." After the death of his wife he resolved again to devote his life to the ministry, and resumed his theological studies, under the direction of the Rev. Cotton Mather Smith. In September, 1769, he was licensed to preach, and ordained pastor of the Congregational church in New Preston, Conn. He was one of the first missionaries from Connecticut to the new settlements in the country, making his first tour in 1788. At the Commencement of Yale in 1791 he preached the "Conscio ad Clerum," his subject being the eternal pre-existence of the world. Mr. Day published a sermon delivered before the Litchfield county association on the "Wisdom of God in the Permission of Sin" (1774). There is a volume of his discourses entitled "Sermons Collected" (1797). He also planned a long poem, "The Vision of St. John," which was not published. He was one of the editors of the "Connecticut Evangelical Magazine" from its establishment until his death. —His son, **Jeremiah,** educator, b. in New Preston, Conn., 3 Aug., 1773; d. in New Haven, Conn., 22

Aug., 1867. He was graduated at Yale with high honor in 1795. When Dr. Dwight was appointed president of that college, Mr. Day was invited to be his successor as head-master in Greenfield school, where he remained one year. The following year he became a tutor at Williams, where he remained until 1798, when he was offered a similar place at Yale. He began to preach as a candidate for the ministry, but before taking charge of any parish was elected to the professorship of mathematics and natural philosophy at Yale, in 1801, but was not able to enter upon these new duties until 1803. He was made president of Yale in 1817, which office he held until his resignation in 1846. Having previously studied theology, Dr. Day was ordained the same day that he was inaugurated president. In 1817 he received the degree of LL. D. from Middlebury, in 1818 the degree of D. D. from Union, and the latter also from Harvard in 1831. His learning and talents, united with kindness of heart and soundness of judgment, secured the respect of his pupils as well as their affection. He published an "Algebra" in 1814, which passed through numerous editions, the latest of which was issued in 1852, by the joint labors of himself and Prof. Stanley. He wrote also "Mensuration of Superficies and Solids" (1814); "An Examination of President Edwards's Inquiry as to the Freedom of the Will" (1814); "Plane Trigonometry" (1815); "Navigation and Surveying" (1817); "An Inquiry on the Self-determining Power of the Will, or Contingent Volition" (1838; 2d ed., 1849); and occasional sermons. He contributed papers to the "American Journal of Science and Arts," the "New Englander," and other periodicals. An address commemorative of his life and services was delivered by President Woolsey (1867).—His daughter, **Martha,** poet, b. in New Haven, Conn., 13 Feb., 1813; d. there, 2 Dec., 1833, attained great proficiency in mathematics and languages. A collection of her "Literary Remains, with Memorials of her Life and Character," was published by her friend and relative, Prof. Kingsley (New Haven, 1834).—**Henry Noble,** clergyman and author, nephew of the second Jeremiah, b. in New Preston, Conn., 4 Aug., 1808, was graduated at Yale in 1828, and was tutor there from 1831 till 1834. He then travelled for fifteen months in Europe, and in 1836 was appointed pastor of the 1st Congregational church in Waterbury, Conn., where he remained until 1840. He was professor of rhetoric and homiletics in Western reserve college, Ohio, from 1840 till 1858. During that time he was engaged in the management of the Cleveland and Pittsburg railroad, and for ten years, that, with three important connecting railroads (of two of which he was president) occupied his time. In 1858 he became president of Ohio female college, where he remained until his resignation in 1864. Prof. Day has published "The Art of Elocution" (New Haven, 1844; revised ed., Cincinnati, 1860); "Fundamental Philosophy from Krug" (Hudson, Ohio, 1848); "The Art of Rhetoric" (Hudson, 1850; revised under the name of the "Art of Discourse," New York, 1867); "Rhetorical Praxis" (Cincinnati, 1860); "The Art of Book-keeping" (1861); "The Logic of Sir William Hamilton" (1863); "Elements of Logic" (New York, 1867); "The Art of Composition" (1867); "The American Speller" (1869); "Introduction to the Study of English Literature" (1869); "The Young Composer" (1870); "Logical Praxis" (New Haven, 1872); "The Science of Æsthetics" (1872); "The Elements of Psychology" (New York, 1876); "The Science of Ethics" (1876); "Outlines of Ontological Science, or a Philosophy of Knowledge and of Being" (1878); "The Science of Thought" (1886); and "The Elements of Mental Science" (1886). He has received the degree of D. D. from Farmer's college, Cincinnati, and that of LL. D. from Ingham university of New York, and also from the State university of Iowa.—Another son, **Thomas,** jurist, b. in New Preston, Conn., 6 July, 1777; d. in Hartford, 1 March, 1855, was graduated at Yale in 1797, studied law at Litchfield, and from September, 1798, till September, 1799, was a tutor in Williams college. He was admitted to the bar in December, 1799, and began practice in Hartford. In 1809 he was appointed assistant secretary of the state of Connecticut, and in 1810 secretary, an office which he retained until 1835. In May, 1815, he became associate judge of the county court of Hartford, acting in this capacity, with the exception of one year, till May, 1825, when he was made chief judge of that court, and so continued until June, 1833. He was a judge of the city court of Hartford from 1818 till 1831, and one of the committee to prepare the statutes of 1808, and also of 1821 and 1824. He reported the decisions of the court of errors from 1805 till 1853, which were published in twenty volumes. He also edited several English law-works, amounting altogether to forty volumes, in which he introduced notices of American decisions, and also of later English cases. He was an original member of the Connecticut historical society, of which he was president from 1839 until his death.

DAY, Mahlon, publisher, b. in Morristown, N. J., 27 Aug., 1790; d. at sea, 27 Sept., 1854. He acquired a competence as a bookseller in New York city, and for fifteen years before his death devoted his life to charitable and educational objects. He was a member of the Society of Friends. He was lost in the wreck of the steamship "Arctic" off Cape Race, Newfoundland.

DAY, Samuel Stearns, missionary, b. in Leeds county, Canada, in 1808; d. in Cortlandville, N. Y., in October, 1871. He was graduated at the Hamilton literary and theological institution (now Madison university) in 1835, was ordained, and sailed for India, landing at Calcutta in February, 1836. He went to Vizigapatam, and in 1837 to Madras, in order to qualify himself for his work. He was appointed to the Telugus, a large and intelligent race of Hindoos, numbering about 14,000,000, and occupying the country between Orissa and Madras, removed to Nellore, the centre of his field, in 1840, and labored zealously among the Telugus for eighteen years He made a short visit to the United States in 1845, and returned to India. He could not endure the climate of the Madras coast, and was compelled to return to his native country in 1863. Where he toiled alone in the east and without apparent results, several churches and schools are now established for the education and training of native missionaries.

DAY, Thomas, English author, b. in London, 22 June, 1748; d. 28 Sept., 1789. He studied law, but never practised, having inherited a large fortune. He sympathized with the American patriots, and advocated their cause at public meetings. Having adopted the peculiar social views of Rousseau, he selected two girls from a foundling hospital, with the intention of educating them and making one of them his wife, but the experiment did not succeed. He is the author of "The Dying Negro," written in conjunction with Mr. Bicknell (1773); "The Devoted Legions," a poem against the war with America (1776); "The Desolation of America," a poem (1777); "Reflections on the Present State of England and the Independence

of America" (1782); "Letters of Marius" (1784); "History of Sandford and Merton," his best known book (1783–'9); and other works.

DAYAN, Charles, lawyer, b. in Amsterdam, N. Y., 16 July, 1792; d. in Lowville, N. Y., 25 Dec., 1877. His early life was spent on a farm, and he received a public-school education and became a teacher. He studied law, was admitted to the bar, and practised at Lowville. He was a member of the state senate in 1827–'9, being president the second year; acting lieutenant-governor in 1829, and as such was president of the court of errors. He was elected to congress from New York as a democrat, serving from 5 Dec., 1831, till 2 March, 1833. He was a member of the state house of representatives in 1835–'6, and was district attorney for Lewis county from 1840 till 1845.

DAYE, Stephen, the first printer in the English-American colonies, b. in London in 1611; d. in Cambridge, Mass., 22 Dec., 1668. In connection with the founding of Harvard college in 1638, the first printing-press was established in this country. Through the instrumentality of the Rev. Joseph Glover, a wealthy non-conformist minister, a press and material were shipped from England, accompanied by Mr. Glover and Thomas Daye, whom he had engaged in London. Daye was supposed to be a descendant of John Day, one of the most eminent and wealthy of early English typographers. On the passage over Mr. Glover died, but Daye duly entered upon the work, set up the press, and, by direction of the magistrates and elders, in January, 1639, printed the "Freeman's Oath," which was the first issue of the colonial press. It was claimed that Daye had served an apprenticeship in London; but his deficiencies as a compositor, indicated by errors of punctuation and spelling, by the division of monosyllables by a hyphen at the end of lines, and similar technical blunders, lead to the presumption that, though bred a printer, he had been chiefly accustomed to press-work, in which he was more successful. The second work printed was an almanac, made by William Pierce, mariner (1639); then the Psalms, "newly turned into metre, for the edification and comfort of the saints" (1640). He also printed a "Catechism," "Body of Liberties," containing one hundred laws of the colony (1641; 2d ed., 1648), which were ordered to be sold in quires at three shillings each. Daye was superseded in the management of the press, in 1649, by the appointment by the magistrates and elders, although no reason was ever given for their action, of Samuel Green as printer. The general court of Massachusetts, in October, 1641, showed a due appreciation of Daye's thirteen years' work by granting him 300 acres of land for "being the first that sett upon printing."

DAYTON, Amos Cooper, physician and clergyman, b. in Plainfield, N. J., 4 Sept., 1813; d. in Perry, Ga., 11 June, 1865. He was graduated at the Medical college of New York city in 1834, and soon removed to the south in search of health. He was at first a Presbyterian, but became dissatisfied with his church relations, and in 1852, while residing in Vicksburg, Miss., having adopted Baptist views, united with that denomination. Henceforth he was distinguished for his controversial writings. Besides being associate editor of the "Tennessee Baptist," he was the author of two religious novels, "Theodosia" and "The Infidel's Daughter." The first had a wide circulation.

DAYTON, Elias, Revolutionary officer, b. in Elizabethtown, N. J., in July, 1737; d. there, 17 July, 1807. He began his military career by joining the British forces, and fought in the "Jersey blues" under Wolfe at Quebec. Subsequently he commanded a company of militia, with which he marched on an expedition against the northern Indians. He was a member of the committee of safety at the beginning of the Revolutionary war, and in conjunction with William Alexander, Lord Stirling, commanded a party which captured a British transport off Elizabethtown (July, 1775). About 1777 he served as colonel of the 3d New Jersey regiment, and aided in suppressing the mutiny of the New Jersey line in 1781. He was made brigadier-general in 1783, and was in active service during the entire war, taking a prominent part in the battles of Springfield, Monmouth, Brandywine, and Yorktown. He had three horses shot under him; one at Germantown, one at Springfield, and one at Crosswick's Bridge. After the war he served several terms in the legislature of his native state, and was made major-general of militia, and member of the Continental congress from 1787 till 1788. Upon the formation of the New Jersey Society of the Cincinnati, Gen. Dayton was elected president, which office he held until his death.—His son, **Jonathan,** statesman, b. in Elizabethtown, N. J., 16 Oct., 1760; d. there, 9 Oct., 1824, was graduated at Princeton in 1776, studied law, and was admitted to the bar. He entered the Continental army, and was appointed paymaster of his father's regiment, 26 Aug., 1776. He held other commissions during the war, was in many battles, and at Yorktown had command under Lafayette. He was for a few years a member of the New Jersey house of representatives, and its speaker in 1790. He was a delegate from New Jersey to the convention that framed the Federal constitution in 1787. He was elected to congress from New Jersey in 1791, and re-elected for three consecutive terms, being speaker during the two last congresses, and serving till 3 March 1799. He was elected U. S. senator from New Jersey, and served from 2 Dec., 1799, till 3 March, 1805. He was arrested for alleged conspiracy with Aaron Burr, but was not tried. He received the degree of LL. D. from Princeton in 1798.

DAYTON, John, jurist, b. in 1762; d. in Charleston, S. C., in 1822. After holding several subordinate stations he was elected governor of South Carolina in 1800, and re-elected in 1808. He afterward became a judge of the U. S. district court of South Carolina, and held that office until his death. He published "A View of South Carolina," and "Memoirs of the Revolution," in that state.

DAYTON, William Lewis, statesman, b. in Baskingridge, N. J., 17 Feb., 1807; d. in Paris, France, 1 Dec., 1864. He was graduated at Princeton in 1825, and received the degree of LL. D. from that college in 1857. He studied law in Litchfield, Conn., and was admitted to the bar in 1830, beginning his practice in Trenton, N. J. In 1837 he was elected to the state council (as the senate was then called), being made chairman of the judiciary committee. He became associate judge of the supreme court of the state in 1838, and in 1842

Wm. L. Dayton

was appointed to fill a vacancy in the U. S. senate. His appointment was confirmed by the legislature in 1845, and he was also elected for the whole term. In the senate debates on the Oregon question, the tariff, annexation of Texas, and the Mexican war, he took the position of a free-soil whig. He was the friend and adviser of President Taylor, and opposed the fugitive-slave bill, but advocated the admission of California as a free state, and the abolition of slavery in the District of Columbia. In 1856 he was nominated by the newly formed republican party for vice-president. In March, 1857, he was made attorney-general for the state of New Jersey, and held that office until 1861, when President Lincoln appointed him minister to France, where he remained until his death.—His son, **William Lewis,** who was graduated at Princeton in 1858, and practised law in Trenton, was appointed by President Arthur minister to the Netherlands.

DAZA, Hilarión (dah'-thah), Bolivian statesman, b. at Sucre, in 1840, of humble parentage, partly Indian. The name of his father, a Spaniard, was Grosoli, but the son adopted his maternal family name, Daza. When eighteen years of age he volunteered in the army of the liberals. Subsequent successful revolutions brought him into notice, and won him the patronage and confidence of Melgarejo. To explore the courses of the rivers Pilcomayo and Bermejo, flowing into the Paraguay, numerous fruitless expeditions have been organized; and in one of these, during the brief lull in political strife that marked the dictatorship of Melgarejo, the year 1867 found young Daza second in command, with the rank of lieutenant-colonel. He was conspicuous in January, 1871, in league with his colonel, Juan Granier, against his former friend and patron. On the deposition of Melgarejo, Daza, at the head of his regiment of cuirassiers, held in check the turbulent factions at La Paz, for which services he was rewarded by President Morales with further promotion and the portfolio of war. As minister and general he succeeded in maintaining order after the death of Morales in 1872, and insured the peaceful accession of the constitutional successor. In the same year he supported the candidature of Bollivian, and on the death of the latter became himself a candidate for the presidency against Salinas (the civil candidate), Oblitas, and Vasquez (the representative of the Corral party). When the elections were over a dispute ensued as to the majority, and Daza, it is contended, seized the office as his right, and was inaugurated on 4 May, 1876. His government was popular, and troubled with as few revolutions as that of any of his predecessors. At the beginning of the war with Chili, 1 March, 1879, he set out at the head of his troops, leaving the government in charge of Señor Guerra, minister of foreign affairs. Of Daza's part in this war Markham says: "The Bolivian army under his command, 4,000 strong, arrived at Tacna, in Peru, on 30 April, but in the short duration of his command Daza proved himself as incapable as cowardly. Two battalions were detached under Col. Villamil's command to garrison Pisagua on 25 May, and when, on 2 Nov., the Chilian army invaded the province of Tarapaca, Daza's army, according to arrangements made with the commander-in-chief of the allied forces, was to advance from Arica to take the invaders in the rear while they were engaged with the army of Tarapaca. Daza began his march from Tacna with 3,000 men, loitered three days at Arica, started again on 11 Nov., and on the 12th marched over fifteen miles of sandy desert to the little river Vitor. He advanced one more march to the defile of the river Camarones, but there stopped again, and on 16 Nov. abandoned the work he had undertaken, leaving the army of Tarapaca to its fate, and returned to Tacna, his own soldiers threatening to shoot him as a coward." On 27 Dec., having been called to Arica for a consultation by Admiral Montero, Daza received the news that during his absence his army had rebelled and deposed him, and on his return voyage to La Paz he heard at Arequipa, in January, 1880, of a revolution at the capital, which proclaimed Gen. Narciso Campero as his successor. He then went to Paris.

DEALY, Patrick Francis, clergyman, b. in New York, of Irish parentage, in 1836. He was educated in the grammar-schools of New York city, and afterward entered St. John's college, Fordham. After teaching in Fordham and in the Jesuit college of Montreal, he was sent to Europe to finish his theological studies. He continued his ecclesiastical course in France, and afterward in Rome, but, owing to the danger of disturbances there in 1859, he was sent by his superiors to the University of Innspruck. He returned to the United States in 1863, and was appointed professor of rhetoric in St. John's college, Fordham. He was afterward rector of the church of St. Francis Xavier, New York. During his pastorate the new church was completed, principally through his instrumentality. He was selected by Cardinal McCloskey to take charge of the first pilgrimage that ever left America for Rome, and was treated with great distinction by the pope and cardinals. He founded the Xavier Union in 1871, and took a prominent part in the formation of the Catholic union, a body consisting of the leading Catholics of the state, which watches over Catholic interests. He was appointed their spiritual director by Cardinal McCloskey, and was the medium of communication between them and the cardinal. On his appointment as rector of Fordham college in 1880, the representative Catholics of New York petitioned the general of the order to allow him to remain in the city, as the numerous societies with which he was connected would suffer by his absence. This was refused, but he was allowed to continue his connection with the Xavier and Catholic unions. Father Dealy did much for the development of St. John's college, Fordham. He founded four scholarships of the yearly value of $400, open to competitors without distinction of creed, and established a special scientific course. He is a member of Convocation, and has lectured before the historical societies of New York and Brooklyn, principally on the early history of New York.

DEAN, Amos, lawyer, b. in Barnard, Vt., 16 Feb., 1803; d. 26 Jan., 1868. He was graduated at Union in 1822, studied law, and on his admission to the bar formed a partnership of long continuance with Azor Tabor, and soon attained a high reputation for his legal attainments. In 1833 he projected the Young men's association of Albany, of which he was a lifelong friend and supporter, and in 1834 delivered before it a course of lectures, subsequently published. He prepared numerous treatises on law subjects, which have been recognized as standard works. In 1851, on the organization of the law-school, he was appointed a professor, and he had also filled the chair of medical jurisprudence in the Albany medical school from its organization in 1839. He is the author of "Lectures on Phrenology" (1835); "Manual of Law" (1838); "Philosophy of Human Life" (Boston, 1839); "Medical Jurisprudence" (1854); and "Bryant and Stratton's Commercial Law" (New York, 1861). He left unfinished an elaborate work on the "History of Civilization" (7 vols., Albany, 1869–'70).

DEAN, Gilbert, jurist, b. in Pleasant Valley, Dutchess co., N. Y., 14 Aug., 1819; d. in Poughkeepsie, 12 Oct., 1870. He was graduated at Yale in 1841. Afterward he studied law, was admitted to the bar in Connecticut, and in May, 1844, in New York. He practised in Poughkeepsie in 1844–'55, and then removed his office to New York city. He was chosen to congress from the districts composed of Dutchess and Putnam counties, and served from 1851 till 1853; was re-elected for a second term, but resigned to accept the office of justice of the supreme court of New York, to which he was appointed by the governor, in June, 1854, to fill the unexpired term of Seward Barculo, deceased. He served on the bench almost eighteen months, and was during the last year (1855) one of the judges of the court of appeals.

DEAN, James, educator, b. in Windsor, Vt., 26 Nov., 1776; d. in Burlington, Vt., 20 Jan., 1849. He was descended from James Dean, of Stonington. He was graduated at Dartmouth in 1800, was a tutor in the University of Vermont in 1807–'9, and a professor of mathematics and natural philosophy there from 1809 till 1814. He was also professor in Dartmouth till the supreme court decided in favor of the old college, and the new ceased to exist, when he resumed his place in the University of Vermont, holding it from 1821 till 1824. He published a "Gazetteer of Vermont" (1808), and an address delivered on his induction as professor (1810).

DEAN, John Ward, author, b. in Wiscasset, Me., 13 March, 1815. His youth was spent in Portland, Me. From 1839 till 1843 he resided in Providence, R. I., and since then in and near Boston. He has filled for many years several offices in the New England genealogical society, to whose "Register" he has contributed valuable papers. Among the papers edited by him for the society is a curious piece of ancient writing, "A Declaration of Remarkable Providences in the Course of My Life, by John Dane, of Ipswick, 1682." In May, 1870, Mr. Dean was chosen president of the Prince society, of which he was one of the founders; and he has also been recording secretary of the American statistical association. He has accumulated an amount of historical knowledge such as few men possess. He has edited the first and a portion of the second volumes of the first series, and one number of the fourth volume of the second series, of the "Historical Magazine." He is the author of "Memoir of Rev. Nathaniel Ward," with notices of his family (Albany, 1868); and "Memoir of Rev. Michael Wigglesworth" (Albany, 1871); has published pamphlets, and has also edited the "New England Historical and Genealogical Register."

DEAN, Julia, actress, b. in Pleasant Valley, N. Y., 22 July, 1830; d. in New York city, 6 March, 1868. She was the daughter of Julia Drake, an actress, who married Thomas Fosdick for her first husband, and later Edmund Dean, a well-known manager of Buffalo and Rochester theatres. Her education for the stage was accomplished under his direction. She appeared first as Lady Ellen in "The Lady of the Lake," during 1845, in Louisville, Ky. Later in the same year she filled an engagement at the Bowery theatre, New York, and appeared as Julia in "The Hunchback." Her success was flattering, and in November, 1846, she played the same part at the Arch street theatre, Philadelphia. In 1855 she married Dr. Arthur Hayne, of Charleston, S. C. In May, 1856, she sailed for San Francisco, and after an absence of nearly two years returned to the east with the proceeds of a very successful tour. She was divorced from her husband, on the ground of his failure to support her, and in 1866 married James Cooper, of New York. Her last appearance in New York was in October, 1867. She excelled in juvenile tragedy and high comedy parts.

DEAN, Paul, clergyman, b. in Barnard, Vt.; d. in Framingham, Mass., 1 Oct., 1860. In 1808 he was ordained pastor of the Universalist society in Barre, Vt. He was pastor of the Hanover street church, Boston, Mass., from 1813 till 1823, and of the Bulfinch street church from May, 1823, till May, 1840. This congregation was known as "Restorationists," and in 1838 changed its name, and has since been Unitarian. He was afterward settled over a Unitarian congregation at Easton, Mass. He published "Lectures on Final Restoration" (1832), and sermons and addresses.

DEAN, William, missionary, b. in Eaton, N. Y., 21 June, 1807. He was graduated at the Hamilton literary and theological institution (now Madison university) in 1833, and in the same year was ordained to the Baptist ministry, and sailed from Boston for Siam to engage in missionary work with the Chinese living at Bangkok. In 1842 he transferred his labors to Hong-Kong, where he remained until 1845, when he returned to spend a year in this country. He resumed his work in Hong-Kong in 1847, and continued it until 1865, when he once more took up his residence in Bangkok. He returned in 1884 to spend his closing days in this country. His long, honorable, and fruitful service as a missionary has few parallels. He has received the degree of D. D. His publications, mainly translations, are all in the Chinese language. They embrace "The New Testament" (Canton, 1847; followed by other editions, the first issue being printed by Chinamen from wooden blocks); "Revision of the Pentateuch" (1853); "Commentary on Matthew" (1859); "Commentary on Genesis" (1868); "Commentary on Mark" (1870); "Commentary on Exodus" (1875); Stow's "Daily Manna," and smaller tracts.

DEANE, Charles, author, b. in Biddeford, Me., 10 Nov., 1813. He is descended from Walter Deane, one of the first settlers of Taunton, Mass. He was educated at a classical school and at Thornton academy, Saco, Me. When nineteen years of age he went to Boston, where for twenty-five years he was a merchant. He retired from business in 1864, and became a resident of Cambridge. Mr. Deane acquired a taste for the study of American history many years ago, and his collection of books is among the most valuable in New England relating to its early history. In 1856 he received the degree of LL. D. from Bowdoin. He is a member of the Phi Beta Kappa society, and of the chief historical and kindred societies of the country. Among his publications are "Some Notices of Samuel Gorton" (1850); "First Plymouth Patent" (1854); "Bibliography of Gov. Hutchinson's Publications" (1857); "Wingfield's Discourse of Virginia" (1860); "Letters of Phillis Wheatley" (1864); Smith's "True Relation" (1866); "Remarks on Sebastian Cabot's Mappe Monde" (1867); "Memoir of George Livermore" (1869); and "The Forms in issuing Letters-Patent by the Crown of England" (1870). Several of these (and others not here enumerated) originally appeared in the publications of the Massachusetts historical society, others in the "Archæologia Americana." Mr. Deane has edited Gov. Bradford's "History of Plymouth Plantation" (1856) and Bradford's "Dialogue, or Third Conference," between old men and young men (1870), and several volumes of the Collections and Proceedings of the

Massachusetts historical society, of which body he is the recording secretary.

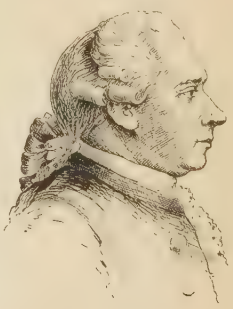
DEANE, James, Indian missionary, b. in Groton, Conn., 20 Aug., 1748; d. in Westmoreland, Oneida co., N. Y., 10 Sept., 1823. He was graduated at Dartmouth in 1773. In 1773–'4 he was a missionary to the Canadian Indians, and he was afterward employed by congress to pacify the northern Indians, a work for which he was peculiarly fitted, being familiar with their language, having been, when twelve years of age, associated with the Rev. Mr. Mosely, a missionary to the Six Nations. During the Revolutionary war he was commissioned as a major, and served as an Indian agent and interpreter at Fort Stanwix. He was taken prisoner by the Indians, and would have been killed but for the pleadings of their women. At the close of the war the Oneidas granted him a tract of land two miles square, near Rome, Oneida co., which he afterward exchanged for a tract in Westmoreland, whither he removed in 1786. He was for a long time a judge in Oneida county, and held other offices of trust. Deansville was named in his honor. He wrote an essay on Indian mythology, which is lost.

DEANE, James, naturalist, b. in Coleraine, Mass., 14 Feb., 1801; d. in Greenfield, 8 June, 1858. He passed his early life on his father's farm, and in 1822 removed to Greenfield, where, after writing for four years in a lawyer's office, he studied medicine. He was graduated as M. D. in 1831, and practised from that date until his death. In the spring of 1835 he discovered fossil footprints in the red sandstone of the Connecticut valley, and, having called the attention of scientific men to the fact, his investigations were afterward extended by Prof. Edward Hitchcock and others. American geologists were soon convinced of the genuineness of the footprints; but those in England were skeptical until a box of impressions, with a communication, had been sent by Dr. Deane to Dr. G. A. Mantell, by whom they were placed before the Geological society of London. At the time of his death he was about publishing an illustrated work embodying the results of twenty-four years of geological study and labor, which has since been issued by the Smithsonian institution. He contributed frequently to Silliman's "Journal" and the Boston "Medical and Surgical Journal," and was the author of a paper on the "Hygienic Condition of the Survivors of Ovariotomy," in which he favored the morality of the operation.

DEANE, John H., lawyer, b. in Canada. He removed to the United States at an early age. He entered Rochester university, but in 1862 left college and enlisted as a private soldier in defence of the Union. He was captured at the battle of Gettysburg, and was for some time confined in a Confederate prison. After being exchanged, he entered the navy and served until the close of the war. He then studied law, was admitted to the bar, and began practice in the city of New York. Mr. Deane has been especially distinguished for his gifts to benevolent institutions under the control of Baptists. To Rochester university he has given $100,000, besides considerable sums to the Rochester theological seminary and to Vassar college.

DEANE, Samuel, clergyman, b. in Mansfield, Mass., 30 March, 1784; d. 9 Aug., 1834. He was graduated at Brown in 1805, and in 1810 became pastor of the second church at Scituate, Mass., a charge which he retained for twenty-four years. He published "The Populous Village," a poem (1826); a "History of Scituate" (1831); and a number of sermons and short poems.—His nephew, **William Reed,** antiquary, b. in Mansfield, Mass., 21 Aug., 1809; d. there, 16 June, 1871, was engaged many years in mercantile life in Boston, and also contributed largely to the Unitarian and the secular press. He wrote valuable articles for the "New England Historical and Genealogical Register" and "The Historical Magazine," and was thoroughly acquainted with the early history of New England. He published genealogical histories of the Deane (in 1849), Leonard (1851), and Watson (1864) families, and also edited "Madam Knight's Journal," reprinted in "Littell's Living Age," 26 June, 1858. He was one of the earliest members of and held various offices in the New England historic-genealogical society.

DEANE, Silas, diplomatist, b. in Groton, Conn., 24 Dec., 1737; d. in Deal, England, 23 Aug., 1789. He was graduated at Yale in 1758, and, engaging in mercantile pursuits at Wethersfield, Conn., took a leading part in the movements that led to the outbreak of the Revolution. He was sent as a delegate from Connecticut to the Continental congress, 1774–'6. In 1776 he was ordered to France as a secret political and financial agent, where he made arrangements for securing substantial aid from that country, and, with Dr. Franklin and Arthur Lee, negotiated treaties of amity and commerce between France and the United States that were signed in Paris, 6 Feb., 1778. He also personally obtained the services of Lafayette, De Kalb, and other foreign officers. These contracts were subsequently made the basis of charges against him by congress on the ground of extravagance, and he was recalled in consequence by resolution passed 21 Nov., 1777. Reaching Philadelphia in 1778, he found that many reports had been circulated to his discredit. These seem to have originated with his late colleague, Arthur Lee, who had quarrelled with him in Paris, but Deane had warm friends in Jay and Adams, the latter having succeeded him in his mission to France. After a heated controversy with influential members of congress, and being required by that body to make a full statement of his financial transactions in France, he was compelled to return to that country to procure the requisite papers. There he found that the publication of certain of his private despatches had embittered the French government against him, and he was thus forced to retire to Holland, whence he passed over to England, where he died in great poverty, estranged from his native land and feeling that he had been unjustly dealt with. In 1842 congress vindicated his memory by deciding that a considerable sum of money was due him, and directed its payment to his heirs. Deane published, in his own defence, "Letters to Hon. Robert Morris" (New London, 1784); "An Address to the Free and Independent Citizens of the United States of North America" (Hartford and London, 1784); and "Paris Papers, or Mr. Silas Deane's late Intercepted Letters to his Brother and other Friends" (New York, 1781).



Silas Deane.

DEARBORN, Benjamin, inventor, b. in Portsmouth, N. H., in 1755; d. in Boston, 22 Feb., 1838. He served an apprenticeship as a printer, and afterward opened an academy for girls. About 1790 he removed his school to Boston. In 1784, under the signature of "A Friend of Industry," he wrote an article for "The New Hampshire Gazette," in which he first suggested the employment of convict labor for profit. He was the inventor of the spring balance.

DEARBORN, Henry, soldier, b. in North Hampton, N. H., 23 Feb., 1751; d. in Roxbury, Mass., 6 June, 1829. After studying medicine, he began its practice at Nottingham Square in 1772. Having employed his leisure in the study of the art of war, he set out on the day after the battle of Lexington for Cambridge, at the head of sixty minute-men, reaching that place early the next day. On his return he was appointed captain in Stark's regiment, and subsequently took part in the battle of Bunker Hill, where he covered the retreat of the American forces. In September he accompanied Arnold's expedition to Canada, but was for some time seriously ill. He recovered in time to assist in the attack on Quebec, 31 Dec., where he was made prisoner. He was released on parole in May, 1776, and exchanged in March, 1777, when he was appointed major in Scammell's regiment. He fought in the battles of Stillwater, Saratoga, Monmouth, and Newtown, distinguishing himself at Monmouth by a successful charge. In 1781 he joined Washington's staff as deputy quartermaster-general, with the rank of colonel, and served at the siege of Yorktown. In June, 1784, he took up his residence at Monmouth, Me. He was chosen brigadier-general of militia in 1787, and major-general in 1795. In 1789 he was appointed U. S. marshal for Maine. He was elected to the 3d congress as a democrat, and re-elected to the 4th, serving from 1793 till 1797. President Jefferson appointed him secretary of war, which office he occupied from 1801 till 1809. In the latter year President Madison gave him the collectorship of the port of Boston, which place he filled until appointed senior major-general in the U. S. army, 27 Jan., 1812, and assigned to the command of the Northern Department. He succeeded in capturing York (now Toronto) on 27 April, 1813, and Fort George on 27 May following. On 6 July he was recalled, on the ostensible ground of impaired health, but really in consequence of being charged with political intrigue, and placed in command of the city of New York. His request for a court of inquiry was not granted. He served from 7 May, 1822, till 30 June, 1824, as minister to Portugal, when he offered his resignation, which was accepted. He then settled at Roxbury, Mass., where he spent the remainder of his life, paying annual visits to his farm in Maine. In person he was large and commanding, frank in his manners, and remarkable for his integrity. He published an account of the battle of Bunker Hill, and wrote a journal of his expedition to Canada, imprisonment in Quebec, and other adventures.—

His son, **Henry Alexander Scammell,** lawyer, b. in Exeter, N. H., 3 March, 1783; d. in Portland, Me., 29 July, 1851. He was graduated at William and Mary college in 1803, and studied law with Judge Story in Salem, Mass., where for a short time he practised. He succeeded his father in 1812 as collector of the port of Boston, filling that office until 1829. He superintended the forts at Portland, and was appointed brigadier-general of militia, commanding the defences of Boston harbor, in 1812. He was a member of the State constitutional convention of 1820, of the state house of representatives in 1829, and of the state senate in 1830. He served in congress from 5 Dec., 1831, till 2 March, 1833, and acted as adjutant-general of Massachusetts from 1834 till 1843, when he was removed for loaning the state arms to the state of Rhode Island, to be used in suppressing the Dorr rebellion. He also served as mayor of Roxbury, Mass., in 1847–'51, being re-elected annually. He was a strenuous advocate of internal improvements, the construction of the Great Western railroad of Massachusetts and the tunnelling of Hoosac mountain being largely due to his labors. He was fond of horticulture and landscape gardening, and the cemeteries of Roxbury and Mount Auburn owe much to his taste, industry, and skill. He constantly led a busy public life, and his literary activity was very great, although but few of his works have been published. Among these are "Memoir on the Black Sea, Turkey, and Egypt," with charts (3 vols., Boston, 1819); "Letters on the Internal Improvements and Commerce of the West" (Boston, 1839); and "History of Navigation and Naval Architecture" (2 vols.). His manuscript remains include a "Diary"; a "Life of Maj.-Gen. Dearborn"; "Life of Com. Bainbridge"; "Life of Jesus Christ"; and "Writings on Horticulture." See "Address on Henry Dearborn," by Daniel Goodwin (Chicago, 1884).

DEARBORN, Nathaniel, engraver, b. in 1786; d. in South Reading, Mass., 7 Nov., 1852. He was one of the earliest engravers on wood in Boston, and published "The American Text-Book for Making Letters" (Boston); "Boston Notions; an Account of 'That Village' from 1630 to 1847" (1848); "Reminiscences of Boston, and Guide through the City and Environs" (1851); and "Guide through Mount Auburn" (1857).

DEARING, James, soldier, b. in Campbell county, Va., 25 April, 1840; d. in Lynchburg in April, 1865. He was a great-grandson of Col. Charles Lynch, of Revolutionary fame, who gave his name to the summary method of administering justice now known as "Lynch law," through his rough-and-ready way of treating the tories. He was graduated at Hanover, Va., academy, and was appointed a cadet in the U. S. military academy, but resigned in 1861, to join the Confederate army when Virginia passed the ordinance of secession. He was successively lieutenant of the Washington artillery of New Orleans, captain of Latham's battery, major and commander of Denny's artillery battalion, and colonel of a cavalry regiment from North Carolina, and was promoted to the rank of brigadier-general for gallantry at the battle of Plymouth. He participated in the principal engagements between the Army of Northern Virginia and the Army of the Potomac. On the retreat of the Confederate forces from Petersburg to Appomattox Court-House, he was mortally wounded near Farmville in a singular encounter with Brig.-Gen. Theodore Read, of the National army. The two generals met, on 5 April, at the head of their forces, on opposite sides of the Appomattox, at High Bridge, and a duel with

pistols ensued. Gen. Read was shot dead, but Gen. Dearing lingered until a few days after the surrender of Lee, when he died in the old City hotel at Lynchburg, Va.

DEAS, Charles, painter, b. in Philadelphia in 1818; died insane. His maternal grandfather was Ralph Izard, the South Carolina patriot. He showed an early taste for art, and studied under John Sanderson in his native city, and in the schools of the National academy of design, New York. In 1840 he visited the "far west" of that day, and spent several years at St. Louis in the successful practice of his profession. He was a man of decided ability; but mental derangement cut short his career many years before his death. Among his more important pictures that have become widely known through engravings are "The Turkey Shoot," "Walking the Chalk," "Long Jake," "The Wounded Pawnee," "Indian Guide," "A Group of Sioux," "Hunters on the Prairie," and "The Last Shot." His "Council of the Shawnees at North Bend" portrays an incident in the life of Gen. George Rogers Clarke.

DE AYOLAS, Juan. See AYOLAS.

DE BAR, Benedict, actor, b. in London, England, 5 Nov., 1812; d. in St. Louis, Mo., 14 Aug., 1877. He made his *début* at the Theatre Royal, Margate, England, in 1832, and came to the United States in 1834, appearing the following year at the St. Charles theatre, New Orleans, as Sir Benjamin Backbite in the "School for Scandal." In 1837 he opened the old National theatre in New York city, and in 1838 played at the old St. Louis theatre, afterward appearing in various cities of the west. In 1840 he played successively in New York and London, and in the same year returned to New York, where he played at the Bowery theatre, In 1842 he became stage-manager for Hamblin at the Bowery, in 1849 purchased the Chatham theatre, New York, retaining it for three years, and afterward went on a four years' starring tour, playing in the principal cities of the United States. In 1853 he became proprietor of the St. Charles theatre, New Orleans, and in 1855 of the St. Louis theatre, leasing it in 1873, when he bought a large interest in the Grand opera house of that city. After the death of Hackett the dramatic stage lacked a great Falstaff until Mr. De Bar undertook its representation, making a specialty of this character, which others had adopted and soon relinquished. His appearance in Brooklyn in this character, after his success in the west and south, was a dramatic event of note. He acquired a large fortune, being successful both as an actor and manager.—His wife, **Florence,** b. in Philadelphia in 1828, made her *début* in 1839 as a danseuse at the Walnut street theatre, Philadelphia. Her maiden name was Vallee. She travelled with Fanny Ellsler, and at the old Park theatre in 1848 played the "French Spy." She retired from the stage in New Orleans in December, 1857.

DE BEGNIS, Giuseppe, opera-singer, b. in Lugo, Italy, in 1795; d. in New York city in August, 1849. He began his musical studies at the age of seven years, and sang soprano till he was nearly fifteen, when his voice broke. He then studied for a comedian, and later resumed lessons as a baritone vocalist. He made his first appearance as an operatic buffo singer at Modena, in 1813, with sufficient success to decide his continuance as a performer on the lyric stage. In 1816 he married the noted prima-donna and famous beauty, Signorina Ronzi. They sang throughout Italy with great success, and in 1819 made their first appearance at the Italian opera in Paris, remaining three seasons. In 1821 they performed in London, and thereafter in the various capital cities of Europe, in concerts and operas. About 1845 De Begnis came to the United States, appearing frequently in New York city in concerts and operas with only moderate success. His voice had lost its freshness, and his style seemed antiquated. He was still notable as one of the purest and most natural of Italian buffo singers; but that kind of vocalist was not appreciated in this country. In the old Rossinian comic operas the flexibility of his voice and his rapid pronunciation were altogether remarkable. His countenance was severely marked by small-pox; but in his make-up for performance he gave no evidence of facial disfigurement. Disappointed in his reception by the American public, he longed to return to the scenes of his early success; but the horrors of sea-sickness and hazards of the voyage prevented. He died of cholera, not without means, but neglected and almost forgotten.

DE BERDT, Dennis, colonial agent, b. early in the 18th century; d. in England, about 1771. He was a London merchant, with extensive commercial connections in this country. About November, 1766, when the colonial legislature of Massachusetts dismissed Richard Jackson from its service, the house elected the honest and aged Dennis de Berdt as its own particular agent. From this time Hutchinson, who had made pretence of being a friend to colonial liberty, dated the revolt of the American colonies, and his correspondence and advice conformed to the opinion. Samuel Adams divined the evil designs, now so near their execution, and instructed De Berdt to oppose the establishment of a military force in America, as needless for protection and dangerous to liberty. "Certainly," said he, "the best way for Great Britain to make her colonies a real and lasting benefit is to give them all consistent indulgence in trade, and to remove any occasion of their suspecting that their liberties are in danger. While any act of parliament is in force which has the least appearance of a design to raise a revenue out of them, their jealousy will be awake." The closing of the affairs of Mr. De Berdt's firm in England, which was found to be irretrievably bankrupt, was undertaken by Joseph Reed, a young colonial visitor to England, who had practised law in the New Jersey courts, and later had held, as his first political appointment, the office of deputy secretary for the province of New Jersey. He had visited England in 1763–'5, and had met the family of Mr. De Berdt. In May, 1770, he married Esther de Berdt. Dr. Franklin was chosen to succeed Dennis de Berdt as colonial agent at the time of his death.

DEBERRY, Edmund, politician, b. in Mount Gilead, N. C., 14 Aug., 1787; d. there, 12 Dec., 1859. He received a public-school education and engaged in agricultural pursuits. He was a member of the state legislature, with occasional intermissions, from 1806 till 1828, and was elected to congress as a whig, serving from 1829 till 1831. He was defeated when a candidate for re-election, but was elected again in 1833, and for each succeeding term till 1845, and was again in congress from 1849 till 1851.

DE BHAQUIÈRE, Peter Boyle, Canadian statesman, b. in Dublin, 27 April, 1784; d. in Yorkville (now a part of Toronto), 23 Oct., 1860. He was the youngest son of John, Lord de Bhaquière, of Ardkill, county Londonderry, Ireland. He entered the navy when quite young, and served as a midshipman at the battle of Camperdown. He left the navy after a brief period of service, and in 1837 emigrated to Canada. From 1838 till his death he was a member of the legislative council. On the remodelling of Toronto university, he was appointed

its chancellor, but subsequently resigned. He was also a member of the Anglican synod.

DE BOLT, Rezin A., jurist, b. in Fairfield county, Ohio, 20 Jan., 1828. He received a common-school education and worked on a farm till his seventeenth year, when he was apprenticed to a tanner. After serving his time he followed his trade for a few years, but in the mean time studied law, and was admitted to the bar in February, 1856. He removed to Trenton, Grundy co., Missouri, in 1858, and began the practice of law. He was appointed school commissioner of Grundy county in 1859, and re-elected to the same office in 1860, serving until the beginning of the civil war. He entered the National service in 1861 as captain in the 23d Missouri infantry, was captured at the battle of Shiloh, 6 April, 1862, and held as prisoner until the following October. In 1863 he resigned his commission on account of impaired health, and resumed his profession, but in 1864 re-entered the army as major in the 44th Missouri infantry, and was mustered out of service in August, 1865. He was elected judge of the circuit court for the 11th district of Missouri in November, 1863, which office he held until his election as a representative from Missouri in the 44th congress, closing his congressional career in 1877.

DE BONNE, P. A., Canadian jurist, b. about 1750. He was a nephew of the French governor of Canada, Marquis de la Jonquière. He was a member of the executive council in 1794, and also of the legislative assembly, in which he opposed Mr. Cuthbert's motion to abolish slavery. He eventually became leader of the Canadian party in the house, and displayed great ability as a debater; but, as his expressions were objectionable to the assembly, he was dismissed from the house by a simple vote of its members. He was also a judge in Lower Canada, and was the only member of the judiciary who held a seat in the house.

DEBORRE, Preudhomme, soldier. He was a French officer, who had seen thirty-five years of European service, and was given a commission in the American army about 1777. On 22 Aug. of that year he commanded a brigade in Sullivan's attack on Staten Island. At the battle of the Brandywine, on 11 Sept., Gen. Deborre claimed the post of honor on the right wing of the army; but Sullivan would not yield this to him, and when Deborre pertinaciously insisted on taking it, the former made a long and circuitous march for the purpose of outreaching him, which did not accomplish its object, and in consequence of which his brigade was not formed for action when the battle began. Deborre's brigade was the first to give way before the British attack. His insubordination was made the subject of a congressional inquiry, and he resigned his commission. He was unpopular in the army, and totally unfit to command American troops.

DE BOW, James Dunwoody Brownson (debo'), statistician, b. in Charleston, S. C., 10 July, 1820; d. in Elizabeth, N. J., 27 Feb., 1867. He was employed in a commercial house for seven years, was graduated at Charleston college in 1843, and in the following year was admitted to the bar. He had a predilection for statistical science and literature, and before adopting the legal profession was a contributor to the "Southern Quarterly Review," of which he became editor in 1844. His elaborate article on "Oregon and the Oregon Question" attracted wide attention in the United States and Europe, appeared in French, and was the occasion of a debate in the French chamber of deputies. In 1845 Mr. De Bow withdrew from its editorship and removed to New Orleans, where "De Bow's Commercial Review" was established by him, and attained immediate success. In 1848 he became professor of political economy and commercial statistics in the University of Louisiana, and was one of the founders of the Louisiana historical society, since merged into the Academy of science. He left the university about 1850 to assume charge of the census bureau of Louisiana, holding the office three years, during which time he collected a vast mass of statistical matter relating to the population and products of the state, and the commerce of New Orleans. President Pierce appointed him superintendent of the census in 1853, and he performed the duties of this office two years, continuing to edit his "Review." He devoted himself almost wholly to political economy, writing extensively on commercial statistics and finance, and contributing articles on American topics to the eighth edition of the "Encyclopædia Britannica." He delivered various addresses before literary, agricultural, and commercial associations. Apart from his literary pursuits he was one of the most industrious men of his time, and, notwithstanding his delicate organization and frequent ill health, his public lecturing and executive duties were apparently unabated. He was active in enterprises for the material and intellectual interests of the south, and was a member of every southern commercial convention subsequent to that of Memphis in 1845, and was president of the Knoxville convention of 1857. During the civil war his "Review" was necessarily suspended, though his voice and pen were employed in advocacy of the Confederacy, previous to which he had uttered bitter denunciations against the northern states and their institutions. After the overthrow of the Confederacy his views changed, he admitted the superiority of the free-labor system of the northwest to the slave-labor system of the south, and urged the legislatures of the southern states to encourage immigration. His "Review" was first resumed in New York city, and subsequently in Nashville, Tenn. He was author of an "Encyclopædia of the Trade and Commerce of the United States" (2 vols., 1853), and "The Industrial Resources and Statistics of the Southwest," compiled from his "Review" (3 vols., New York, 1853). He collected and prepared for the press, in 1854, a greater part of the material for the three volumes of the quarto edition, and compiled the octavo volume entitled "Statistical View of the United States," being a compendium of the Seventh Census (that of 1850), of which 150,000 copies were ordered by congress (Washington, 1854). He was also author of "The Southern States, their Agriculture, Commerce, etc." (1856), and edited a work on mortality statistics.

DE CAMP, John, naval officer, b. in New Jersey in 1812; d. in Burlington, N. J., 25 June, 1875. He was appointed to the navy from Florida in October, 1827, and served on the sloop "Vandalia," of the Brazil squadron, in 1829–'30. He was promoted to passed midshipman in 1833, was in the West India squadron till 1837, and commissioned lieutenant in 1838, and served on the frigate "Constitution" along the coast of Africa in 1854. He was commissioned commander in 1855, and served in the navy-yard, New York, as light-house inspector, and as commander of the store-ship "Relief." He commanded the steam sloop "Iroquois" at the attack upon Forts Jackson and St. Philip, and the capture of New Orleans (April, 1862), and participated in various actions on the Mississippi, including Vicksburg, while in command of the "Wissahickon." He was commissioned captain in

1862, and was in the South Atlantic squadron in 1863–'4. He was promoted to the rank of commodore in 1866, commanded the receiving-ship "Potomac" in 1868–'9, and was retired in 1870 with the rank of rear-admiral.

DECAMPO, Gonzalve, R. C. archbishop, b. in Madrid, Spain; d. in Lima, Peru, in 1617. He was successively canon of Seville, archdeacon of Niebla, and bishop of Cadiz, and in 1614 was consecrated archbishop of Lima. He wrote a treatise on the government of Peru, which has not been printed, and published a work entitled "Carta pastoral á todos los curas de almas de su arzobispado."

DECANESORA, Indian orator, b. about 1640. He was a chief of the Onondagas, one of the Six Nations. Attending the conference at Albany, held in 1679 with the agent of Virginia, he, with other chiefs, presented the claims of the Indian people. It was said of the speakers, by those who were present at the conference, that they all "had great fluency of words, and much more grace in manner than any man could expect among a people entirely ignorant of the liberal arts and sciences." And of Decanesora it was said that he had "a graceful elocution that would have pleased in any part of the world."

DECATUR, Stephen, naval officer, b. in Newport, R. I., in 1751; d. in Frankford, near Philadelphia, 14 Nov., 1808. His father was a native of Rochelle, in France, and an officer in the French navy, who had emigrated to the United States, and married an American lady. Stephen was captain of a merchantman at an early age, and during the Revolution commanded the privateers "Royal Louis" and "Fair American," gaining distinction by the capture of English vessels. He was appointed post-captain in the navy on 11 May, 1798, at the beginning of hostilities with France, and in the "Delaware," twenty guns, cruised on the American coast and in the West Indies, and captured the French privateers "Le Croyable" and "Marsuin." He commanded a squadron of thirteen vessels on the Guadeloupe station in 1800, and after his discharge from the service, under the peace establishment of 1801, engaged in business in Philadelphia.—His son, **Stephen,** naval officer,

Stephen Decatur

b. in Sinnepuxent, Md., 5 Jan., 1779; d. near Bladensburg, Md., 22 March, 1820. He made a voyage with his father in 1787. At the age of seventeen he was employed by Messrs. Gurney and Smith, of Philadelphia (who were agents for the navy), and went to New Jersey to superintend the getting out of the keel-pieces for the frigate "United States," in which ship he was launched, and which he successfully commanded in the war of 1812–'5. Through the aid of Com. Barry, he obtained a warrant as midshipman, dated 30 April, 1798, and was placed on board the frigate "United States." He was at that time nineteen years of age, well informed for his age, chivalrous in temper, courteous in his deportment, and adding grace of manner to an attractive person. While attached to the frigate "United States" under Com. Barry, Decatur cruised in the West Indies, capturing several French privateers that were preying upon American commerce. He labored hard to make himself master of his profession. On one occasion the "United States" chased the French privateer "L'Amour de la Patrie," of six guns, which vessel, in attempting to escape, received a twenty-four-pound shot at her water-line from the "United States." She at once shortened sail and surrendered, and Decatur was sent in a boat to take possession. When he got alongside, "L'Amour de la Patrie" was sinking fast, and the crew, stripped of their clothing, were assembled at the side, begging to be taken into the boat. As it was impossible to take on board sixty men, Decatur ordered the French captain to put his helm up and run down to the frigate as the only chance of saving the crew. This was done, and though the vessel sank when within fifty yards of the "United States," the crew was saved to a man. In a short time Decatur became a good officer and an excellent sailor. A contemporary said he was a man of an age, an officer of uncommon character and rare promise, one not equalled in a million. Just at the time this remark was made, the cry "Man overboard!" resounded through the ship, and boats were called away. Without hesitation, Decatur sprang from the mizzen-chains, and in a few moments his muscular arms were holding the drowning man above the waves, which he continued till the boats reached the spot, when he passed the nearly dying youth into one of them, and then climbed in himself. It is of such men that heroes are made, and the one Decatur saved, while himself gaining celebrity, lived to see his preserver attain a fame unsurpassed by that of any officer of his time in the American navy. In 1799 Decatur was commissioned lieutenant. He sailed again with Com. Barry when he conveyed the commissioners to France. On the return of the "United States" she was laid up for thorough repairs. Decatur obtained orders to the "Norfolk," of eighteen guns, Commander Thomas Calvert, but in September, 1800, again joined his old ship the "United States." When the French war was ended, and the treaty of peace between France and the United States had been ratified by the senate on 3 Feb., 1801, and promulgated by the president, congress passed a law directing the sale of the whole navy except six ships, and discharging from the service all but nine of the twenty-eight captains, all of the commanders, and all but thirty-six of the one hundred and ten lieutenants. Stephen Decatur was one of those selected to remain in the navy. His brother James also remained as a midshipman, while the gallant commander (the elder Decatur) resigned his commission and returned to private life. The discharge of the officers and crews was no sooner effected than the pacha of Tripoli, though the United States paid him yearly tribute most faithfully and shamefully, felt slighted because our government had presented a fine frigate to the dey of Algiers, and had sent him none; and also because one of the ministers of the bey of Tunis had received $40,000 from the United States, whereas he (the pacha) had received but little more. On 10 May, 1801, the impudent pacha declared war against the United States, cut down the American flag-staff, and began hostilities against the Ameri-

can merchant marine, at that time totally unprotected. A squadron of four vessels, under the command of Com. Richard Dale, was fitted out, and Decatur joined the "Essex," one of the squadron, being selected by Capt. Bainbridge to fill the important place of first lieutenant when he had been but three years in the navy. After performing effective service in restraining the Barbary powers from molesting American vessels, and convoying American merchantmen safely into the Atlantic, the "Essex" sailed for New York on 17 June, 1802, reaching that port on 22 July. Decatur joined there the frigate "New York," Capt. James Barron, and sailed again for the Mediterranean. He was transferred to the command of the "Norfolk," of eighteen guns, and afterward to the schooner "Enterprise," of twelve guns, under Com. Preble. The latter, hearing of the loss of the "Philadelphia" off Tripoli by striking on a reef, sailed in the frigate "Constitution" for that place, taking Decatur with him. On 23 Dec. Decatur captured the ketch "Mastico" off Tripoli, which vessel was named the "Intrepid," and afterward was used to destroy the "Philadelphia," then moored under the guns of Tripoli, the Tripolitans having succeeded in getting her afloat and taking her into the harbor. Decatur volunteered for this service, left Syracuse in midwinter, and arrived off Tripoli, 16 Feb., 1804, and, with a picked crew of officers and men, stood into the harbor, boarded the "Philadelphia," and carried her. Then the order was given to set fire to her, and in ten minutes she was ablaze. Decatur and his crew escaped to the "Intrepid," and made their way out of the harbor amid the rapid firing and falling shot of 141 guns. The "Philadelphia" was totally destroyed. Admiral Nelson pronounced this "the most daring act of the age." In the subsequent attack on Tripoli, Decatur took charge of a division, and greatly distinguished himself in taking vengeance on the Tripolitans for the death of his brother James. He received his commission as captain, in reward for his gallant services in destroying the "Philadelphia," on 22 May, 1804. He served at Tripoli during the war, and in September was appointed by Preble to the command of the "Constitution," from which he was afterward transferred to the frigate "Congress." Peace between Tripoli and the United States having been concluded, 3 June, 1805, Decatur returned home, laid up the "Congress," and was received most enthusiastically throughout the country. In February, 1808, he was appointed a member of the court-martial that tried Com. James Barron for surrendering the "Chesapeake" to the British man-of-war "Leopard." Decatur was next appointed to command the "Chesapeake." This was during the time that the embargo was laid on British commerce. He was afterward ordered to the frigate "United States," in which ship, in 1810, he hoisted his broad pennant as commodore of the southern station. This command was held by him when war began between England and the United States in 1812. Putting to sea, he soon fell in with the British frigate "Macedonian," which he captured after a short, sharp action, in which the enemy's ship was completely dismasted and much cut to pieces. Jury-masts were rigged, and the "Macedonian" brought safely into port. In the spring of 1814 Decatur took command of the frigate "President" and a squadron consisting of the "Peacock," the "Hornet," and the store-ship "Tom Bowline." He left his squadron in New York to escape the British blockade; but, having grounded in going to sea and injured his vessel, he decided to return to port for repairs, but fell in with four British frigates, to which the "President" was obliged to surrender after a most obstinate resistance, in which one frigate, the "Endymion," was so cut up as to be obliged to haul out (or she drifted out) of action. The "President" was not surrendered until she was surrounded by the three other frigates—the "Majestic," the "Pomone," and the "Tenedos"—and when her decks had the appearance of a slaughter-house. She had twenty-five killed and sixty wounded—one quarter of her crew. While the war of 1812 was in progress, the dey of Algiers began to capture American merchantmen; and, when peace was established, the United States fitted out two squadrons to punish Algiers for her treachery and the violation of her treaty. Decatur was given the command of one squadron and Bainbridge of the other. On Decatur's arrival in the Mediterranean, he captured the Algerine frigate "Mashouda," forty-six guns, flag-ship of Admiral Rais Hammida, after a brave resistance. He also captured, subsequently, the Algerine brig-of-war "Estedio." He arrived off Algiers on 28 June, 1815, where peace was concluded on terms very favorable to the United States. It was stipulated that the United States should never pay tribute to the dey of Algiers, and all Christian captives were to be released. This treaty and the demands of Decatur gave the death-blow to that cruel system which for centuries, to the shame of Christendom, had elevated the Barbary powers into baneful importance. Decatur next went to Tunis and demanded indemnity from the bey for violating treaty stipulations, which demand was conceded. He then made a similar demand on the pacha of Tripoli, and for the release of Neapolitan and Danish prisoners, all of which was granted, thus ending forever the pretensions of the Barbary powers. For this Decatur received the thanks of all Europe; and, on the assembling of congress in December, 1815, President Madison began his message with a high eulogium upon his success against the Barbary states. Decatur arrived in Washington in January, 1816, and was appointed navy commissioner with Commodores Rodgers and Porter, in which office he gave all his zeal, skill, and experience in building up the young navy of the republic. While attached to the board of navy commissioners Decatur made some remarks of a censorious nature against Com. Barron, which the latter objected to, and which Decatur refused to retract, though he disclaimed any intention to be insulting. A long correspondence ensued, in which Decatur did all that an honorable man could do to remove unfavorable impressions from Com. Barron's mind, but nevertheless the latter challenged Decatur. The meeting occurred at Bladensburg, 22 March, 1820, Capt. Elliott being Barron's second, and Com. Bainbridge Decatur's. When the word "fire" was given, Barron fell, wounded in the hip, where Deca-

tur said he would shoot him. Decatur was shot in the abdomen, and fell soon after Barron. He was taken to his home, where he died that night. No man was ever more regretted by the country than this heroic officer, to whom the highest honors were accorded, and he was followed to his grave by the largest concourse of people—public and private—that had ever assembled in Washington city.—His younger brother, **James,** entered the navy as midshipman, 21 Nov., 1798, and was promoted to be lieutenant, 20 April, 1802. In the attack of 3 Aug., 1804, on the Tripolitans, he commanded one of the American gun-boats, and was instantly killed by a musket-ball while attempting to board one of the enemy's vessels.

DE CELLES, Alfred Duclos, Canadian journalist, b. in St. Laurent, near Montreal, 15 Aug., 1844. He was educated at Quebec seminary and Laval university. He was editor of "Le journal de Quebec" from 1867 till 1872, and of "La Minerve" from 1872 till 1880, when he was appointed assistant librarian of parliament. He was also connected editorially with "L'opinion publique."

DE CHARMS, Richard, clergyman, b. in Philadelphia, 17 Oct., 1796; d. 20 March, 1864. His ancestors were Huguenots, who took refuge in England in 1685 upon the revocation of the edict of Nantes. In early life he was a printer. In 1825 he engaged in the study of Swedenborgian theology under the Rev. Thomas Worcester, of Boston, at the same time superintending the publication of the "New Jerusalem Magazine" in that city, the first three numbers of which he set in type and printed with his own hands. Subsequently, by the assistance of a friend, he was enabled to enter Yale, where he was graduated in 1826, and, at the suggestion of the same friend, he began the study of theology in London, to qualify himself for the Swedenborgian ministry. During the two years passed in England he supported himself by his labor as a journeyman printer. His theological studies were continued in Baltimore, and his first sermon, on the "Paramount Importance of Spiritual Things," was published in that city in 1828, and was afterward reprinted in London. After a year of pastoral labor in Bedford, Pa., he went to London, and studied under the Rev. Samuel Noble. On returning to this country in 1832, he became pastor in Cincinnati, 1832–'9, and conducted a periodical called "The Precursor." He subsequently preached in Philadelphia, 1839–'45, Baltimore, 1845–'50, and New York. In his later days he devoted much attention to mechanical contrivances and inventions of his own. He rendered valuable service to the periodical literature of his church, and issued several volumes of sermons on the fundamental doctrines of Swedenborg. He published also "Freedom and Slavery in the Light of the New Jerusalem"; "Sermon illustrating the Doctrine of the Lord" (Philadelphia, 1840); "Series of Lectures delivered at Charleston, S. C." (1841); and "The New Churchman Extra" (1 vol.), a treatise devoted to polemics and church history in the United States and Europe.

DE COSMOS, Amor, Canadian journalist, b. in Windsor, Nova Scotia, about 1830. He was educated in his native place and in Halifax. He went to California in 1852, and to British Columbia in 1858, in which year he founded the "British Colonist" newspaper, which he owned and edited from that date until 1863. In 1870 he founded the "Daily Standard," and was its editor and proprietor until 1872, when he retired. The same year he formed an administration in British Columbia, and held the portfolio of president of the executive council (without salary) from the date of the formation of the government until he retired from local politics in 1874, in consequence of the operation of the act against dual representation. Mr. De Cosmos was the first in British Columbia to advocate the introduction of responsible government into the colony, the first to recommend the union of the Pacific provinces, which he accomplished in 1867, and also the first to advocate the union of British Columbia with the Dominion, and was subsequently instrumental in securing the unanimous acceptance of the terms of union made with Canada. He represented Victoria in the Vancouver island assembly after the union of that island with British Columbia, and sat in the legislative council almost uninterruptedly from 1867 till 1871. In 1871 British Columbia was united to Canada, and Mr. De Cosmos was elected to both the local assembly and the Canadian parliament. He was re-elected to the Dominion parliament in 1872, and again in 1874 and 1878.

DE COSTA, Benjamin Franklin, clergyman, b. in Charlestown, Mass., 10 July, 1831. He was graduated at the Biblical institute, Concord, N. H., in 1856, and entered the Protestant Episcopal church. He was rector at North Adams, Mass., from 1857 till 1858, when he went to Newton Lower Falls, where he remained until 1860. During the civil war he was chaplain of the 5th and 18th Massachusetts infantry, and was in the battles of Bull Run and Yorktown. In 1863 he settled in New York and engaged in journalism. He was the editor of the "Christian Times" in 1863, of the "Episcopalian" in 1864, and of the "Magazine of American History" in 1882, and one of the founders of the Huguenot society of America. In 1884 he organized the first branch of the "White Cross Society," and is its president. He was also one of the original promoters and organizers of the Church Temperance Society, of which he was the first secretary. He is now (1887) rector of the Church of St. John the Evangelist in New York city, and, in addition to his religious work, is active in social movements, and has often addressed the working-men upon the relations between capital and labor. The degree of D. D. was conferred upon him in 1881 by the College of William and Mary. He is a member of various literary associations. He has published "The Pre-Columbian Discovery of America by the Northmen" (Albany, 1869); "Sailing Directions of Henry Hudson, prepared for his Use in 1608" (1869); "The Northmen in Maine" (1870); "The Moabite Stone" (New York, 1870); "The Rector of Roxburgh," a novel, under the *nom de plume* of William Hickling (1873); several monographs in regard to Mount Desert and Lake George; and "Cabo de Baxos" and "Cabo de Arenas," studies in cartology. He contributed to volumes iii and iv of the "Narrative and Critical History of America." He has edited White's "Memoirs of the Protestant Episcopal Church" (1881).

DE COUDRES, Louis, brass-founder, b. in 1789; d. in Brooklyn, N. Y., 16 Dec., 1872. He was apprenticed at the age of thirteen to James P. Allaire, who was carrying on a small brass and bell foundry. At this establishment the brass castings were made for McQueen, who had a machine-shop, and did the work for Robert Fulton, in applying his steam-engine to the first paddle-wheel boat, the "Clermont," on the North river. Several years later Mr. Allaire established his steam-engine works in Cherry street, New York, which became famous for the number and character of the engines it supplied to the early steam-

boats. Mr. De Coudres continued with Mr. Allaire more than half a century, some of the time as superintendent of the iron-foundry, and all of the time in charge of the brass-casting department, in which art his reputation was pre-eminent. This branch of the Allaire works possessed for many years almost a monopoly in bell-casting. The first great fire-alarm bells put up in the City Hall park were cast by Mr. De Coudres.

DEEMS, Charles Force, clergyman, b. in Baltimore, Md., 4 Dec., 1820. He was graduated at Dickinson college, Carlisle, Pa., in 1839, and entered the Methodist ministry in New Jersey. Soon afterward he became general agent for the American Bible society in North Carolina. In 1841 he accepted the professorship of logic and rhetoric in the University of North Carolina, at Chapel Hill, holding this office five years, after which he was for one year professor of natural sciences in Randolph-Macon college, at Ashland, Va. Returning to North Carolina, he was stationed as a Methodist pastor at New Berne, and in 1850 was a delegate to the general conference of the Methodist Episcopal church, south, which met in St. Louis. While there he was elected to the presidency of Greensboro, N. C., female college, and also to the presidency of Centenary college, at Jackson, La. He chose the former, and served till 1854, from which time he was engaged in the regular pastorate till 1858. Afterward he was the presiding elder of the Wilmington and New Berne districts of the North Carolina conference. At the close of 1865 he went to New York, was occupied for a time in literary pursuits, and subsequently established the Church of the Strangers, of which he is still (1887) the pastor. He was at one time president of Rutgers female college, New York city. He has been the president of the American institute of Christian philosophy since 1881, and is now (1887) editor of "Christian Thought," a monthly magazine. He has also edited Frank Leslie's "Sunday Magazine," and five volumes of the "Southern Methodist Pulpit," and compiled three volumes of "Annals of Southern Methodism." He has received the degree of D. D. from Randolph-Macon college, and that of LL. D. from the University of North Carolina. Besides the publication of several volumes of sermons, and many addresses, he has been a frequent contributor to periodical literature, and is the author of "Triumph of Peace and other Poems" (New York, 1840); "Life of Rev. Dr. Clarke" (1840); "Devotional Melodies" (1842); "Twelve College Sermons" (1844); "The Home Altar" (1850); "What Now?" (1853); "Weights and Wings" (1874); "A Scotch Verdict in Re-Evolution" (1886); and "The Light of the Nations" (1868), in which the author does not attempt to present the biography of Christ, but takes the records of the evangelists who write about the man Jesus, the Son of Mary, as he would the narratives of the classic authors, and strives to represent the consciousness of Jesus without reference to theological conclusions. He has written with considerable force in opposition to the doctrine of evolution.

DEERING, Nathaniel, author, b. 25 June, 1791; d. near Portland, Me., in 1881. His grandfather was Nathaniel Deering, to whose energy and enterprise Portland owes so much of its early prosperity. Mr. Deering studied at Phillips Exeter academy, and was graduated at Harvard in 1810. He entered the counting-house of Asa Clapp, in Portland, but soon relinquished business pursuits for the law, and he was admitted to the bar in 1815, and practised in Canaan, and afterward in Milburn (now Skowhegan), Me. It was while Mr. Deering was living at Canaan that Lydia Maria Child wrote a well-known epigram upon his name:

"Whoever weds the young lawyer at C.
Will surely have prospects most cheering,
For what must his person and intellect be,
When even his name is N. Deering?"

He returned to Portland in 1836, devoted himself to literary pursuits, and was for some time editor of a political paper, the "Independent Statesman." While still at Milburn he published "Carabasset," a tragedy founded upon the story of the massacre of Father Rasle and the Norridgewock Indians by the British in 1720. This work was followed by "The Clairvoyants," a comedy, which has been several times produced upon the stage in Boston and Portland. His miscellaneous writings include humorous tales of "down-east" life. His most finished play is "Bozzaris," a tragedy (1851).

DE FOREST, John William, author and soldier, b. in Humphreysville (now Seymour), Conn., 31 March, 1826. He attended no college, but pursued independent studies, mainly abroad, was a student in Latin, and became a fluent speaker of French, Italian, and Spanish. While yet a youth, he passed four years travelling in Europe, and two years in the Levant, residing chiefly in Syria. Again, in 1850, he visited Europe, making extensive tours through Great Britain, France, Italy, Germany, Greece, and Asia Minor. From that time until the civil war began he wrote short stories for periodicals, having already become an author of several books. In 1861, as captain, he recruited a company for the 12th Connecticut volunteers, and served constantly in the field till January, 1865, taking an active part under Gens. Weitzel and Banks in the southwestern states, and under Gen. Sheridan in the Shenandoah valley, and leaving the army with the brevet of major. Graphic descriptions of battle-scenes in Louisiana, and of Sheridan's battles in the valley of the Shenandoah, were published in "Harper's Monthly" during the war by Maj. De Forest, who was present on all the occasions thus mentioned, and was fortunate enough, while experiencing forty-six days under fire, to receive but one trifling wound. He was one of only two or three American literary men that laid down the pen for the sword. From 1865 till 1868 he remained in the army as adjutant-general of the veteran reserve corps, and afterward as chief of a district under the Freedman's bureau. Since then he has resided in New Haven, except when travelling in Europe. The honorary degree of A. M. was conferred upon him by Amherst college in 1859. Besides essays, a few poems, and about fifty short stories, numerous military sketches, and book-reviews, most of which were anonymous, he, in 1873, contributed to the "Atlantic Monthly" a short serial story, entitled "The Lauson Tragedy." He has published "The History of the Indians of Connecticut, from the

J. W. De Forest

Earliest-known Period to 1850" (Hartford, 1853); "Oriental Acquaintance," a sketch of travels in Asia Minor (New York, 1856); "Witching Times" (1856); "European Acquaintance" (1858); "Seacliff," a novel (Boston, 1859); "Miss Ravenel's Conversion" (New York, 1867); "Overland" (New York, 1871); "Kate Beaumont" (Boston, 1872); "The Wetherell Affair" (New York, 1873); "Honest John Vane" (New Haven, 1875); "Justine Vane" (New York, 1875); "Playing the Mischief" (1876); "Irene Vane" (1877); "Irene, the Missionary" (Boston, 1879); "The Oddest of Courtships, or the Bloody Chasm" (New York, 1881).

DEFREES, John D., politician, b. in Sparta, Tenn., 8 Nov., 1811; d. in Berkeley Springs, West Va., 19 Oct., 1882. In 1818 he was apprenticed by his father to a printer in Ohio, and at the same time began to study law. He was admitted to the bar of Indiana in 1836, having removed to that state a few years before to establish a newspaper in conjunction with his brother. He was soon elected to the legislature, and was several times re-elected. In 1844 he resigned his seat in the state senate, and bought the "Indiana State Journal," a weekly paper published at Indianapolis. He removed there and made that paper a daily, which he edited for several years. After the Whig party was dissolved he united with the Republican, and in 1856 became the first chairman of the republican state committee, which place he occupied until 1860. Mr. Defrees was a friend of many leading politicians, among whom were Clay, Crittenden, Webster, and Corwin, who regarded him as an adroit politician. President Lincoln appointed him to the office of government printer, which he filled for many years.

DEGOLLADO, Santos (day-gol-yah'-do), Mexican general, b. in Morelia, state of Michoacan, Mexico, 30 July, 1819; d. in June, 1861. He had a good education, but little is known of his life until he became prominent at the beginning of 1854 by revolting against the then powerful dictator, Santa Anna, and, together with Epitacio Huerta and Pueblita, headed the rising in the city of his birth. He organized an army about 2,000 strong, at the head of which he marched resolutely toward the city of Mexico, issuing on the way a proclamation, adopting the principles of the "Plan de Ayutla," issued on 11 March, by Gen. Juan Alvarez, whose forces he joined. After several victorious engagements with the troops of the dictator and the flight of the latter (16 Aug., 1856), Gen. Alvarez was proclaimed president, and Degollado with the liberal army entered the capital, 15 Nov., 1855. Degollado belonged to the liberal party, and with Juarez, Lerdo de Tejada, Leon Guzman, and Ezequiel Montes, devoted all his energy to the success of the principles proclaimed at Ayutla, and was one of the deputies who signed the new Federal constitution, 5 Feb., 1857. During the ensuing troubles of the reactionary or church party, headed by Miramon, he was in the field again in aid of the liberal government represented by Juarez, and commanded the constitutional forces at the unsuccessful battle of Tacubaya, 11 April, 1859, against the reactionary army under Leonardo Marquez. In the same year he was elected governor of the state of Michoacan, which office he filled until 1861, when serious political complications called him to the capital of the republic. Notwithstanding the final defeat of Miramon's forces at the battle of Calpulalpam, 22 Dec., 1860, and his subsequent flight from the country, the church party rose again, and forces under Zuloaga, Marquez, and Negrete threatened the government, and Degollado hastened to tender his services, but in the meanwhile he had been again elected to congress. When in June, 1861, his friend, Melchor Ocampo, was taken prisoner by forces under the command of Cajiga, and, on the road to Morelia, was assassinated at Tepeji by order of Marquez, the government, indignant at this new outrage, took active measures, and Degollado asked of congress permission to take the command of the forces sent against the rebels. Impatient of the arrival of a convoy commanded by Gen. O'Horan, he left the city at the head of 150 men, and, in the dense woods called Monte de las Cruces, met the enemy under command of Galvez and Buitron, who were in ambush. After a desperate fight of several hours, his ammunition was exhausted, his troops scattered, and Degollado taken prisoner. He was robbed and dragged away on foot, when suddenly Galvez's voice was heard, and Degollado was assassinated by his captors.

DE GROOT, Albert, captain, b. on Staten Island about 1810. He was taken into service by Cornelius Vanderbilt, and soon rose to the rank of captain, commanding some of the principal boats on the Hudson. He erected the Prescott House, on Broadway, in 1857, and constructed the steamer "Jenny Lind." During the war he built the steamers "Resolute" and "Reliance," which were purchased for the navy. He was active in promoting the erection of the Vanderbilt bronzes, and presented to the printers of New York the statue of Benjamin Franklin, which stands in front of the "Times" and "Tribune" buildings.

DE HAAS, John Philip, soldier, b. in Holland about 1735; d. in Philadelphia, 3 June, 1786. His ancestors were an ancient family of northern France. In 1750 he removed with his father to the United States, settling in Lancaster county, Pa. He was ensign in the old French war, and took part in Bouquet's battle with the Indians at Bushy Run, near Pittsburg, 5 and 6 Aug., 1763. In 1776 he was appointed colonel of the 1st Pennsylvania regiment. He served in Canada and at Ticonderoga, and after the battle of Long Island was promoted to brigadier-general, 21 Feb., 1777, serving until the close of the war. In 1779 he went to Philadelphia, where he spent the latter years of his life. His son served as ensign in his own regiment.

DE HAAS, William Frederick, marine painter, b. in Rotterdam, Holland, in 1830; d. in Fayal, Azores, 16 July, 1880. He studied in his native city and at the Hague, emigrated to New York in 1854, and devoted himself to painting coast-scenery. He exhibited at the National academy, New York, in 1867, "Sunrise on the Susquehanna"; in 1875, "Fishing-Boats off Mt. Desert," "Boon Island, Coast of Maine," and "Midsummer Noon, Biddeford Beach"; in 1876, "The Lower Harbor of Halifax" and "Evening at Halifax"; in 1877, "Narragansett Pier."—His brother, **Maurice Frederick Hendrick,** b. in Rotterdam in 1832, studied at Rotterdam and the Hague, and went to London in 1851, where he painted in water-colors for a year. He made many sketches on the English and Dutch coasts, and in 1857 was appointed artist to the Dutch navy. The subjects of his earlier pictures are chiefly from the English Channel and French coast. Among them are "Storm off the Isle of Jersey" and "After the Wreck." In 1859 he removed to New York, where he was elected an associate to the National academy in 1863, an academician in 1867, and was one of the original members of the American society of painters in water-colors. Among his numerous pictures are "Farragut's Fleet passing the Forts below New Orleans," "The Yacht Dauntless off Dover," "Deserting the Burn-

ing Ship," "Off the Coast of France," "Sunset at Sea," "The Breaking up of a Storm at Star Island," "The Beach at West Hampton," "Early Morning off the Coast," "White Island Lighthouse," "Drifted Ashore in a Fog," "Long Island Sound by Moonlight," "The Shipwreck," "Moonrise and Sunset," "Dundle Cove, Isle of Wight," "Sunset at Cape Ann," "A Marine View, Scarborough," and "The Rapids above Niagara."

DE HART, William, lawyer, b. in Elizabethtown, N. J., 7 Dec., 1746; d. in Morristown, N. J., 16 June, 1801. He practised law before the Revolution. He was appointed major of the 1st New Jersey battalion, 7 Nov., 1775, and lieutenant-colonel in 1776. Before the close of the war he resigned his commission and resumed law-practice at Morristown. One of his two brothers was also engaged in the service as aide to Gen. Wayne, and fell at Fort Lee in 1780. Colonel De Hart was eminent as a lawyer, and possessed much wit and humor. He was president of the St. Tammany society in 1789.—His son, **William Chetwood,** soldier, b. in New York state in 1800; d. in Elizabethtown, N. J., 2 April, 1848, was graduated at the U. S. military academy in 1820, and became a lieutenant of ordnance. He served on ordnance duty until 1822, and was in various garrisons and courts-martial till 1831, when he became aide-de-camp to Gen. Scott. In 1838 he was made captain of the 2d artillery, serving on the northern frontier during the disturbances in Canada. While on special duty from 1845–'7 he prepared his "Observations on Military Law, and the Constitution and Practice of Courts-Martial." In 1847 he served in the war with Mexico under Gen. Scott, and was lieutenant-governor of Puebla.

DE HAVEN, Edwin J., arctic explorer, b. in Philadelphia in 1819; d. there, 2 Oct., 1865. He was a midshipman when only ten years of age, and after thirty-six years of naval service was placed upon the retired list on account of his impaired vision. His last cruise was completed in 1857, when he resigned. He served in Wilkes's exploring expedition from 1839 till 1842, and commanded the first expedition fitted out, at the expense of Henry Grinnell, of New York, to search for Sir John Franklin. It consisted of two small vessels—the "Advance," of 140, and the "Rescue," of 90 tons. This expedition, of which Dr. Kane has written so graphically, left New York, 24 May, 1850, and was absent over sixteen months, wintering in the Arctic circle. On his return, Lieut. De Haven was employed in the coast survey, and in the national observatory under Lieut. Maury.

DEHON, Theodore, P. E. bishop, b. in Boston, Mass., 8 Dec., 1776; d. in Charleston, S. C., 6 Aug., 1817. He was graduated at Harvard in 1795, with the highest honors. He studied theology under the Rev. Dr. Parker, rector of Trinity church, Boston, officiating during that time as lay reader at Cambridge and Newport, R. I. He was ordained deacon by Bishop Bass, in Newburyport, 24 Dec., 1797, and early in January, 1798, entered upon the duties of rector of Trinity church, Newport. He was ordained priest, 9 Oct., 1800. In 1802–'3 he visited the south for the benefit of his health, and, after his return home, received urgent invitations from two churches in Charleston, S. C., to remove to that city, which were declined. In 1808 he was a deputy from the eastern diocese to the general convention, held in Baltimore, Md. The next year he accepted the rectorship of St. Michael's church, Charleston, and in 1810 removed thither. He was elected bishop of the diocese in February, 1812, being consecrated on 15 Oct. He was present at the general convention held in Philadelphia in May, 1814, and also at that held in New York in May, 1817. On his return to Charleston he was stricken with the yellow fever, and died tranquilly and hopefully. His mortal remains were buried in the chancel of St. Michael's church. Bishop Dehon published a number of Episcopal charges and sermons. After his death a selection from his discourses was published, which met with a large sale (London, 1821 and 1823; New York, 1857).

DEITZLER, George Washington, soldier, b. in Pine Grove, Schuylkill co., Pa., 30 Nov., 1826; d. near Tucson, Arizona, 11 April, 1884. He received a common-school education, removed to Kansas, and "grew up with the state." He was a member of the Kansas house of representatives in 1857–'8, and again in 1859–'60, and during the former period was elected speaker. He was subsequently mayor of Lawrence, and treasurer of the University of Kansas. At the beginning of the war he was made colonel of the 1st regiment of Kansas volunteers. He was promoted to be brigadier-general, 29 Nov., 1862, but resigned in August of the year following. In 1864 he was commissioned major-general of Kansas militia. He was killed by being thrown from a carriage.

DE KAY, James Ellsworth, naturalist, b. in Lisbon, Portugal, in 1792; d. in Oyster Bay, L. I., 21 Nov., 1851. He studied medicine at Edinburgh, and there took his degree as a physician. On his return to the United States he married a daughter of Henry Eckford, the naval architect, whom he subsequently accompanied to Turkey, where the latter was appointed superintendent of the naval yards at Constantinople. Dr. De Kay also became intimate with his brother-in-law, Joseph Rodman Drake, Fitz-Greene Halleck, William Cullen Bryant, and other men of mark in literature and science. He was intrusted by Mr. Eckford with negotiations with Brazil and other South American powers, relative to the ships of war that had been ordered by the latter. Upon returning to this country, he settled permanently at Oyster Bay, L. I., devoting himself to the study of natural history and contributing to the New York press. On the outbreak of cholera in the latter city, Dr. De Kay hastened to give his services to the afflicted, although the practice of his profession was repugnant to him. He was subsequently a founder of the Lyceum of natural history, afterward merged into the National academy of science. In 1836 the state ordered a geological survey, making it comprehensive enough to cover botany and zoölogy, and intrusting those departments to Dr. De Kay. The results of his researches are contained in five volumes of the "Survey" (1842–'9). Besides these, he is the author of "Travels in Turkey" (New York, 1833).—His brother, **George Coleman,** naval officer, b. in New York city in 1802; d. in Washington, D. C., 31 Jan., 1849. He was prepared for college, but ran away to sea. He became a skilful navigator, and took vessels built by Henry Eckford to South America. He volunteered in the navy of the Argentine republic, then at war with Brazil, and was given command of a brig in June, 1827. After taking several prizes, he accepted a captain's commission, which he had declined on entering the service, preferring to win it by promotion. In an engagement with the brig "Cacique," commanded by Capt. Manson, that vessel was captured, though twice the size of De Kay's, and much more heavily armed. When returning to Buenos Ayres in June, 1828, his brig, the "Brandtzen," was driven inshore in the river Plata by a Brazilian squadron. He scuttled the vessel to prevent her capture,

swam ashore with his crew, and on reaching Buenos Ayres was made commodore. After the peace he delivered a corvette to the porte for Henry Eckford. He was with him in Constantinople when he died, Eckford at the time being superintendent of the Ottoman ship-yards. Returning to New York, De Kay married in 1833 Janet, only child of Joseph Rodman Drake, the poet. In 1847 he took the U. S. frigate "Macedonian" to Ireland with supplies for the sufferers from the famine, having exerted himself to secure the passage of an act of congress permitting a government vessel to be so employed. See "Outline of the Life of Com. George C. De Kay" by Fitz-Greene Halleck (New York, 1847).—George Coleman's son, **Joseph Rodman Drake,** soldier, b. 21 Oct., 1836; d. in New York city, 9 June, 1886, served with credit during the civil war on the staffs of Gens. Mansfield, Pope, and Hooker, and won the brevet of lieutenant-colonel for gallantry in several battles.—Another son of George Coleman, **George Coleman,** soldier, b. 24 Aug., 1842; d. in New Orleans, 27 June, 1862, left his studies in Dresden, Saxony, in 1861, returned to the United States, and entered the National service as lieutenant of artillery, and afterward was on the staff of Gen. Thomas Williams till he received a mortal wound in a fight with bushwhackers at Grand Gulf.—Another son of George Coleman, **Sidney,** soldier, b. 7 March, 1845, ran away from school in the second year of the civil war and joined the 71st New York volunteers. He was afterward made lieutenant in the 8th Connecticut regiment, served on the staffs of Gens. B. F. Butler, Devens, and Terry, and received the brevet of major. After the war he went to Crete to assist the Greeks against the Turks.—Another son, **Charles,** author, b. in Washington, D. C., 25 July, 1848, has published "The Bohemian" (New York, 1878); "Hesperus" (1880); "Vision of Nimrod" (1881); "Vision of Esther" (1882); and "Love Poems of Louis Barnaval" (1883). His best known story is "Manmatha."

DE KOVEN, James, clergyman, b. in Middletown, Conn., 19 Sept., 1831; d. in Racine, Wis., 19 March, 1879. He was graduated at Columbia in 1851, and at the General theological seminary in 1854, was ordained priest in 1855, and became rector of the church of St. John Chrysostom, Delafield, Wis., and principal of St. John's hall, the preparatory department for Nashotah theological seminary. In 1859 this department, through his instrumentality, was merged in Racine college, Mr. De Koven becoming the warden. He was a leader in the high-church movement in the west, and inaugurated radical changes in the management and discipline of the college. He introduced the Oxford cap and gown in 1861, to be worn both by students and professors; inaugurated the conferring a gold tassel to be worn by the student that attained the highest proficiency; invited from England a celebrated teacher of church-music, and established the first Episcopal surpliced choir west of New York city. He was prominent in all matters of church education, and a leader in the diocesan and general conventions. The degree of D. D. was conferred upon him in 1862 by Hobart. In 1873 he lacked but a few votes of being elected bishop of Massachusetts. The election turned on the questions at issue between the high and low church parties of New England, and Dr. De Koven was the candidate of the former, being put forward as one of the most powerful orators of the Episcopalian pulpit. But more general attention was attracted to him by an address delivered in the convention of 1874. The controversy between the high and low church parties had then assumed a bitter antagonism, and threatened a serious dissension if not a final division. The address in question produced a profound impression, and Dr. De Koven was perhaps in consequence elected bishop of Illinois, but was not confirmed by the diocese. In the year following, his name was again proposed for a bishopric, but was subsequently withdrawn by his friends, there being no hope of a confirmation. Meantime he continued his work as an educator in building up the institution at Racine. By his efforts a commodious edifice was erected for the college chapel, 200 acres of adjoining land was purchased, and costly buildings were put in as extensions and connections to those already standing, until the college quadrangle was nearly completed. In 1878 he was called to be an assistant rector of Trinity church, New York, but declined. A short time before his death he was chosen rector of St. Mark's, Philadelphia, but had not time to act upon it. He was noted for his kindly courtesy, his genial humor, and his brilliant conversational powers. In the pulpit he displayed many of the best qualities of the sacred orator. His death was caused by slipping on the ice in a lonely place, on his way from the station to the college, and breaking his leg. The weather was cold, and he lay for several hours before it was known and any help reached him. He was the author of several stories for boys and "Sermons Preached on Various Occasions," published since his death, with a preface by the Rev. Morgan Dix, D. D. (New York, 1880).

DE KRAFFT, James Charles Philip, naval officer, b. in the District of Columbia, 12 Jan., 1826; d. there, 29 Oct., 1885. He was appointed midshipman from Illinois in 1841, and attached to the frigate "Congress," in the Mediterranean squadron. During the Mexican war he took part in the first attack on Alvarado in 1846. He was commissioned lieutenant, 15 Sept., 1855, and detailed to the command of the frigate "Niagara" in 1860, in which vessel he was present at the assault on Fort McCrean, one of the defences of Pensacola, the following year. In 1862–'3 he was on duty in the navy-yard at Washington, and commanded the steamer "Conemaugh," Western Gulf-blockading squadron, in 1864–'6, during which period he assisted in the operations against Fort Powell, Mobile bay. Commissioned as commander in 1866, and as captain in 1872, he served subsequently as captain of the "Hartford," as chief of staff of the Asiatic station, and had charge of the Washington and Philadelphia navy-yards. He was promoted to the rank of rear-admiral in June, 1885.

DE KROYFT, Sarah Helen, author, b. near Rochester, N. Y., 29 Oct., 1818. Her maiden name was Aldrich. She obtained a good education by teaching in winter and attending school in summer for seven years. Her attainments included French, Italian, and the higher mathematics. She was graduated at Lima, N. Y., seminary, and in 1845 married Dr. William De Kroyft, of Rochester, who died on his wedding-day of injuries received in falling from a carriage. Within the month following she awoke one morning to find her sight entirely gone. She spent a year or two at the New York institution for the blind, with the intention of becoming an organist, and while there began to write for newspapers and periodicals. In 1850 she published a collection of letters under the title "A Place in thy Memory," nearly 200,000 copies of which have been sold. She has travelled extensively in the United States. About 1865 she added Latin to the list of her acquisitions, and a few years later entered the lecture-

field with a discourse on "Darwin and Moses," which has been repeatedly delivered in the principal cities, and many of the larger villages, of New York. Her most successful sketch is "Little Jakey," a true story of a blind boy (New York, 1871). She has never recovered her sight.

DELAFIELD, John, merchant, b. in England, 16 March, 1748; d. in New York city, 3 July, 1824. Soon after coming of age he emigrated to this country. The ship upon which he took passage bore letters of marque, and captured a French vessel. Mr. Delafield volunteered in the action, and shared the prize-money to the extent of £100. He landed in New York city, 5 April, 1783, and found himself especially welcomed as the bearer of a manuscript copy of the text of the treaty of peace, which had been handed him at the moment of sailing by an official in the British service. The conditions of peace were known, but the text had not yet been made public in England; and, although the official copy had been forwarded, the "Vigilant" had outstripped the bearer of the government despatches by some days. After several experiments, Mr. Delafield established himself in New York as a merchant. He was exceptionally successful, retiring in 1798 one of the wealthiest men in the country. A twelvemonth afterward he was at the head of the private underwriters of the city. Time brought reverses, as both the French and the English were striving to sweep American commerce from the seas. While many of the private underwriters were obliged to suspend, Mr. Delafield was among those who paid every loss, but only by sacrificing his entire capital and mortgaging his real estate. He was a founder and director of the Mutual insurance company, established 15 June, 1787, that being the first company organized to take risks against fire in the city of New York after the Revolution. On 12 Jan., 1792, he was appointed a director of the branch of the U. S. bank, and was afterward elected to the same office. He was one of forty gentlemen who subscribed $10,000 each, and founded (1 Feb., 1796) the United insurance company, also acting as a director, and serving as president for many years. His summer residence on the East river, opposite Blackwell's island, known as "Sunswick," built in 1791, was one of the largest and best-appointed private houses near New York. Mr. Delafield had nine sons and four daughters. Two of his sons died young.—His son **John,** banker, b. in New York city, 22 Jan., 1786; d. 22 Oct., 1853, was graduated at Columbia in 1802, and immediately obtained employment as confidential clerk and supercargo. A few years later, having embarked in the shipping business, and being on board one of his own vessels, he was driven by stress of weather into the harbor of Corunna, Spain, and witnessed the storming of that city by the French. On the night of 17 Jan., 1808, the enemy having opened fire on the shipping, the cables were cut, and Mr. Delafield put to sea with a family of noble Spanish refugees in addition to his crew. Although short of provisions and almost in a sinking condition, the vessel was brought safely to London. There he established himself as a banker, 1808–'10. During the war of 1812–'14 he was held as a prisoner, but, through the influence of relatives in England, he was permitted to continue his business, with the privilege of travelling fifteen miles around Uxbridge, where he had a country seat, and to the city of London. His large fortune was suddenly swept away in a financial crisis, and it was then that his friend, Washington Irving, dedicated to him the graceful story entitled "The Wife," published in the "Sketch-Book." In 1820 he returned to New York and served as cashier and president of the Phœnix bank from 1820 till 1838, when he resigned to accept the presidency of the New York banking company. Mr. Delafield was the first president of the New York philharmonic society, which for several years met at his house. He also suggested the plan, and was an original member, of the Musical fund society. He obtained large subscriptions for, and greatly aided in establishing, the New York university, and expended time and money in reviving the New York historical society. However deeply engaged in similar pursuits, or in business, he still found leisure to devote to the embellishment of his country seat at Hell Gate, making it a marvel of horticultural beauty. Owing to the repudiation of their obligations by some of the western states, the New York banking company was forced to suspend, and for a second time Mr. Delafield found himself suddenly impoverished. The remainder of his life was devoted to agriculture, his favorite occupation. He purchased a large estate, "Oaklands," near Geneva, N. Y., and removed there in 1842. Before many years his was known as the model farm of the state. He was among the first to urge the importance of a chemical analysis of the soil, scientific drainage, and the value and uses of various kinds of manure. A description of his farm is given in the "Transactions" of the New York state agricultural society for 1847, pp. 200–211, of which association he was for several years chosen president. He was also the first presiding officer elected by the State agricultural college.—Another son, **Joseph,** scientist, b. in New York city, 22 Aug., 1790; d. in New York city, 12 Feb., 1875, was graduated at Yale in 1808, studied law, and was admitted to practice in 1811. He was appointed lieutenant in the 5th regiment, New York state militia, in 1810, and captain of drafted militia in 1812. At the close of the latter year he was commissioned in the U. S. service as a captain in Hawkins's regiment, and promoted to be major of the 46th infantry, 15 April, 1814, but resigned at the close of the war. He was appointed U. S. agent, under the 6th and 7th articles of the treaty of Ghent, for setting off the northern boundary of the United States, and had command of the parties in the field from 1821 till 1828. Both the president and congress formally acknowledged the fidelity with which Maj. Delafield had discharged his duties. During his sojourn in the north, he began the formation of the collection of minerals that for many years ranked as one of the best in private hands in the country. Maj. Delafield was a member of many scientific associations, both in the United States and in Europe. He served as president of the New York lyceum of natural history from 1827 till 1866, when he declined a re-election, and was a member of the society for fifty-two years. In 1830 Maj. Delafield built at his country seat on the Hudson, in the southern part of the town of Yonkers, known as "Fieldston," a lime-kiln so constructed as to burn continuously, on a plan until then unknown in this country. For several years the works yielded large profits, and served as the model for others.—**Henry** and **William,** merchants, twin brothers of the preceding, b. in "Sunswick" (now a part of Long Island City, N. Y.), 19 July, 1792; Henry d. in New York city, 15 Feb., 1875; William d. in New York city, 20 Nov., 1853. They were prepared to enter Yale, but their father yielded to their desire to begin business at once. A few years later the firm of H. & W. Delafield was founded, dealing at first with England, then

with China, India, and South America, and in the end almost exclusively with the West Indies. Both the brothers held many positions of trust and responsibility in business corporations. Henry, during the reign of the Emperor Soulouque, acted as consul for Hayti. Both brothers served as volunteers during the war of 1812.—**Edward,** physician, brother of the preceding, b. in New York city, 17 May, 1812; d. there, 13 Feb., 1875, was graduated at Yale in 1812, and at the College of physicians and surgeons in 1815. He served as a surgeon in the U. S. army in 1814. In 1817 he sailed for London, studied under Sir Astley Cooper and Dr. Abernethy, and passed several months in the hospitals of Paris. In 1820, in connection with Dr. J. Kearny Rodgers, he founded the New York eye and ear infirmary, of which institution he was attending surgeon until 1850, and consulting surgeon until 1870. He soon afterward entered into partnership with Dr. Borrowe, and almost immediately found himself possessed of a large and lucrative practice. In 1834 he was appointed one of the attending physicians of the New York hospital, and in 1835 became professor of obstetrics and diseases of women and children in the College of physicians and surgeons, but resigned both offices in 1838 on account of his increasing private practice. In 1842 he organized the society for the relief of widows and orphans of medical men, serving as its first president. He was a founder (1865) and first president of the New York ophthalmological society, and in 1858 was chosen president of the College of physicians and surgeons, remaining at its head until his death. From 1858 he was the senior consulting physician of St. Luke's hospital, and from its establishment in 1872 senior consulting physician of the Woman's hospital, and president of the medical board. From its foundation in 1854 he served as president of the medical board of the Nursery and child's hospital. At the organization of the Roosevelt hospital, in 1867, he became a member of the board of governors, and was afterward chosen president, retaining the office during his life.—**Francis,** physician, son of Edward, b. in New York city, 3 Aug., 1841, was graduated at Yale in 1860, and at the College of physicians and surgeons in 1863. He was attached for a time to the house staff of Bellevue hospital, and studied medicine in Paris, Berlin, and London. He has filled the following, among other, offices: surgeon in the New York eye and ear infirmary, and physician and pathologist to the Roosevelt hospital (1871); physician to Bellevue hospital (1874); adjunct professor (1875), and subsequently (1882) professor, of pathology and the practice of medicine in the New York college of physicians and surgeons; consulting physician to Bellevue hospital (1885); and (1886) first president of the Association of American physicians and pathologists. He has written: "Manual of Physical Diagnosis" (1878); "Hand-book of Post-Mortem Examinations and Morbid Anatomy" (1872); "Studies in Pathological Anatomy" (1882); and "Hand-book of Pathological Anatomy" (1885). —**Richard,** military engineer, son of John, senior; b. in New York city, 1 Sept., 1798; d. in Washington, 5 Nov., 1873. He was graduated at the U. S. military academy in 1818 at the head of his class, and was immediately promoted to be 2d lieutenant of engineers, being assigned to duty with the American boundary commission under the treaty of Ghent. In 1820 he received his commission as 1st lieutenant, and in 1828 was made captain. From 1819 till 1838 he was employed in the construction of the defences of Hampton Roads, as superintending engineer on the fortifications in the vicinity of the Mississippi, and those on or near Delaware river and bay. Promoted to the rank of major in 1838, he was appointed superintendent of the U. S. military academy at West Point, where he remained for seven years, and subsequently held the office from 1856 till March, 1861, when he was relieved, at his own request. From 1846 till 1855 he superintended the defences of New York harbor and the Hudson river improvements, with the exception of ten months, when he acted as chief engineer of the Department of Texas. During the Crimean war (1855–'6) he was ordered to Europe in company with Capt. (afterward Maj.-Gen.) McClellan and Maj. Mordecai to report on any changes that had been made in modern warfare. His elaborate report was printed by congress in 1860. He was made lieutenant-colonel in 1861, colonel in 1863, brigadier-general and chief of engineers in 1864, and received the brevet rank of major-general, 13 May, 1865, "for faithful, meritorious, and distinguished services in the engineer department during the rebellion." He was retired 8 Aug., 1866, his name having been borne on the army register for over forty-five years. He rendered valuable service to the government during the civil war, on the staff of Gov. Morgan, of New York (1861–'3), in the reorganization and equipment of the state forces. From 1864 till 1870 he was on duty at Washington as commander of the engineer corps, and in charge of the bureau of engineers of the war department, and served as inspector of the military academy, as member of the light-house board, and of the commission for the improvement of Boston harbor. He was also one of the regents of the Smithsonian institution.

DELAMATER, John, physician, b. in Chatham, N. Y., 18 April, 1787; d. in Cleveland, Ohio, 28 March, 1867. His family (the De la Moitres) was of French origin, his ancestors being Huguenot exiles, who found refuge in Holland. His father removed to Duanesburg, N. Y., then in Albany county, where he received a good education for those days, and at the age of nineteen was licensed to practise medicine. He entered into partnership with his uncle, Dr. Dorr, of Chatham, but in 1815 established himself in Sheffield, Mass., and during a residence of eight years in that place his professional ability began to be recognized. In 1823 he was invited to a professorship in the Berkshire medical institute, Pittsfield, Mass., and when, in 1827, a new medical school was opened by the regents of the state of New York at Fairfield, Herkimer co., Dr. Delamater was assigned to a leading place in its faculty. After residing there eight years he removed to Willoughby, Ohio, having previously visited Cincinnati, where he delivered a course of lectures. Having labored in the Medical institute at Willoughby about six years, he removed in 1842 to Cleveland, where he spent the remainder of his

life. He took part in the establishment of the Cleveland medical college, lectured at Bowdoin, Dartmouth, Geneva, and other colleges throughout the country, and at his death left the manuscript notes of over seventy different courses on almost every branch of medical science. He was an incessant student, gifted with a clear mind, a never-failing memory, and a remarkable command of language, and it is doubtful whether, as a college lecturer, he has ever been surpassed in this country. As a consulting physician, his opinions took high rank. In 1860 he resigned his work in connection with the college, and was made professor emeritus, at the same time receiving the degree of LL. D. He subsequently delivered fifty lectures, taking the place of a member of the faculty called away on duties arising from the civil war, which was his last appearance in public.

DE LANCEY, Etienne (Stephen), merchant, b. in Caen, France, 24 Oct., 1663; d. in the city of New York, 18 Nov., 1741. Having been compelled, as a Protestant, to leave France on the revocation of the Edict of Nantes (18 Oct., 1685), he escaped into Holland. Deciding to become a British subject and to emigrate to America, he crossed to England and took the oath of allegiance to James II. He landed in New York, 7 June, 1686. His mother had given him, on his departure from Caen, a portion of the family jewels. He sold them for £300, became a merchant, and amassed a fortune of £100,000. He married Anne, second daughter of Stephanus van Cortlandt, 23 Jan., 1700. He took a prominent part in public affairs, representing the fourth ward of New York as alderman in 1691–'3, and was a member of assembly for twenty-four years. While sitting in the latter body he gave his salary, during one session, to purchase the first town-clock erected in New York; and with the aid of his partner imported and presented to the city the first fire-engine that had been brought into the province. Mr. De Lancey was buried in the family vault in Trinity church, New York. The three of his sons that left descendants are mentioned below. His eldest daughter married Sir Peter Warren, K. C. B. The De Lancey house, which is now (1887) the oldest building in the

city of New York, was erected in 1700 by Etienne, upon a piece of land given to him by his father-in-law. Mr. De Lancey resided there until he erected a larger house in Broadway, just above Trinity church, which was removed about 1792 to build the City hotel. The site is now occupied by the "Boreel Building." The old house was then converted into a store. At Stephen de Lancey's death, in 1741, it passed to his youngest son, Col. Oliver de Lancey (the Brig.-Gen. De Lancey of the Revolution). Retiring from mercantile life, Oliver de Lancey sold it to Samuel Fraunces (or Francis, as commonly spelled), a mulatto of French origin, who bought it to establish a tavern, which he named the "Queen's Head," in honor of the new Queen Charlotte. Five years later Fraunces transferred it to John Jones, who only remained till 1767, when Bolton and Sigell succeeded and kept it till February, 1770. Bolton remained alone till May, 1770, when Samuel Fraunces (or "Black Sam," as he was usually styled) resumed possession of his property and kept it in the best style till some time after the Revolution. During all this period the house was the headquarters for all societies and clubs, being used for public and private dinners and social gatherings. There it was, in the long room, originally Mrs. De Lancey's drawing-room, with its five windows front, that, in 1783, Washington bade farewell to the officers of the Army of the Revolution. Since 1776 many centennial celebrations have been held in the old hostelry. Originally it had two stories, with a hip-roof, and raised cornice and balustrade, the upper stories being a modern addition. It is of small Holland brick, with heavy timbers, in the old Dutch style.

—**James,** chief justice and lieutenant-governor of the province of New York, eldest son of the preceding, b. in New York city, 27 Nov., 1703; d. there, 30 July, 1760. He was graduated at Cambridge, England, and subsequently studied law in the Inner Temple, London. Having been admitted to the bar, he returned to New York toward the close of 1725, and soon became prominent in public life. He was made a member of the council in 1729, and in 1731 was appointed second judge of the supreme court. The year previous he had been placed at the head of a commission to frame a new charter for the city of New York. The instrument then prepared, known as "the Montgomery charter," was mainly the work of Judge De Lancey, who, for his services, was presented with the freedom of the city, he being the first person upon whom that honor was conferred. In 1733, on the removal of Chief-Justice Lewis Morris, Judge De Lancey was appointed in his stead, and he retained the office during the remainder of his life. In 1746 occurred a contest between Gov. Clinton and the assembly regarding the former's salary. As the chief justice espoused the popular side in the controversy, he gained the ill-will of the governor, which soon developed into active hostility on the occasion of the latter's receiving a commission from the king bearing date 27 Oct., 1747, appointing De Lancey lieutenant-governor. Instead of delivering it to him as ordered, Clinton pocketed it and wrote an urgent letter to the ministry not only advising its withdrawal, but demanding De Lancey's removal from the chief justiceship. With neither of these requests did the home government comply; but Clinton maintained his hostile attitude, and it was only after his own supersedure, and the death by suicide of his successor, that he finally delivered the delayed commission (October, 1753). On 19 June, 1754, Gov. De Lancey convened and presided over the first congress ever held in America, a congress of delegates from all the colonies, held by direction of the English government for the purpose of a common defence and conciliating the Indians. It was at this congress that Benjamin Franklin proposed a plan for the union of the colonies by act of parliament. On 31 Oct., 1754, Gov. De Lancey granted the charter of King's (now Columbia) college; but so great was the opposition of the Presbyterians that he kept it in his possession until May of the following year before delivering it to the new corporation. About the same time he attended a council of the governors of the different colonies,

held at Alexandria, Va., to concert measures with Gen. Braddock against the French. In September of the same year (1755) Sir Charles Hardy arrived and assumed the functions of governor, the lieutenant-governor returning to the bench. Twenty-two months later, however, Sir Charles, who was an admiral in the English navy, having asked for active employment, sailed (2 July, 1757) from New York in command of an expedition against Louisburg, leaving De Lancey again the ruler of the province, which he remained till his death, three years later. Gov. De Lancey was a man of great learning as a jurist and almost unbounded personal influence, and was undoubtedly one of the ablest of the provincial rulers of New York. Unfortunately, he did not escape the criticisms of his contemporaries. Gov. De Lancey left three sons, two of whom are mentioned below. Of his four daughters, one, Anne, married Judge Thomas Jones, the historian. —**James,** soldier and political leader, eldest son of the preceding, b. in New York city in 1732; d. in Bath, England, in 1800. He was educated at Eton and Cambridge, and he entered the army on his return to New York at the beginning of the French war. He served in the Niagara campaign of 1755, under Sir William Johnson, and commanded the detachment that, aided by a small re-enforcement under Col. Massey, defeated the French force sent to succor Fort Niagara, and compelled the surrender of that work the day following. He also served as aide-de-camp to Gen. Abercrombie in the expedition against Ticonderoga in 1758. On succeeding to his father's estate in 1760, and thus becoming the richest man in America, he took a prominent part in public affairs. He was a member of the assembly in 1768–'75, and assumed the leadership of the conservative party, refusing a seat in the council lest it might hamper his freedom of action. He was the author of the resolution (adopted 25 March, 1775) ordering that a petition be sent to the king, a memorial to the lords, and a remonstrance to the commons, demanding redress of the grievances of the colonists. These were subsequently presented by Edmund Burke, but contemptuously refused and voted down. The remonstrance to the commons was drafted by James de Lancey. In May, 1775, he sailed for England to urge the views of the assembly of New York on the home government. But he was unsuccessful, and, as hostilities had meantime begun, he decided to remain abroad, and in the following year sent for his family. He never returned to this country. His immense estates were confiscated and he was banished, for voting against the resolutions of the congress of 1774. When, in 1788, parliament finally passed an act partially compensating the loyalists for their losses, De Lancey was chosen by those from New York to act as their representative in the board of agents, and he became, after Sir William Pepperell, its most active member. Of his five children, his two sons (one of whom was in the British navy, the other in the army) died bachelors. His eldest daughter married Sir Jukes Granville Clifton, Bart.—**John Peter,** soldier, brother of the preceding, b. in New York city, 15 July, 1753; d. in Mamaroneck, N. Y., 30 Jan., 1828. He was educated in England, entered the British army in 1771 as ensign, and was promoted to be captain of the 18th regiment of foot. During a portion of the Revolutionary war he served, by special permission, as major of the regiment of Pennsylvania loyalists, and was present at the battles of the Brandywine and Germantown, and at the capture of Pensacola. At the close of the war he returned to his regiment, and was successively stationed in the island of Jersey and at Gibraltar. Resigning from the army, he returned to the United States in 1789, and resided until his death at Mamaroneck.—**William Heathcote,** bishop of western New York, son of the preceding, b. in Mamaroneck, N. Y., 8 Oct., 1797; d. in Geneva, N. Y., 5 April, 1865. His education, beginning at the village schools in Mamaroneck, and carried on at the academy of New Rochelle under Messrs. Waite and Staples, was continued at the private school of the Rev. Seth Hart, at Hempstead, L. I., and at that of the Rev. Dr. Lewis Ernest Eizenbrodt, at Jamaica, L. I., by whom he was fitted for Yale, where he was graduated in 1817. He studied divinity under the Rt. Rev. John Henry Hobart, then bishop of New York, and was ordained deacon on 28 Dec., 1819, and priest, 6 March, 1822. As deacon he was chosen by the vestry of Grace church, N. Y., in the spring of 1820, to take temporary charge of that parish, and served till January, 1821, when the Rev. Dr. Wainwright was elected rector. Mr. De Lancey was immediately chosen by the vestry of Trinity church, N. Y., for three months, to fill the vacancy caused by Dr. Wainwright's acceptance of the rectorship of Grace. In 1821 he was called to St. Thomas's church, Mamaroneck, a parish he had founded while in Yale, with the aid of his father and Peter Jay Munro, and served it for ten months without salary, also aiding in securing the erection of a church edifice. In March, 1822, as soon as he was ordained priest, Mr. De Lancey went to Philadelphia, on the invitation of the venerable Bishop White, at the suggestion of Bishop Hobart, to become the former's personal assistant in the three united churches of Christ church, St. Peter's, and St. James's. Thus began that intimate friendship with Bishop White which was only terminated by the death of the latter in the summer of 1836, a friendship so marked that Bishop White called him his adopted son, and consulted with him privately on all matters of importance. No man had the confidence of that venerable prelate to so great an extent as he, and no man knew directly from the bishop so many of the details of the history of the inception and progress of the Protestant Episcopal church from the close of the Revolutionary war to the year 1836 as did Mr. De Lancey. In March, 1823, he was unanimously elected by the vestry of the three united churches in Philadelphia one of the assistant ministers of the parish, the other two being the Rev. James Abercrombie, D. D., and the Rev. Jackson Kemper, D. D. In May, 1823, he was chosen secretary of the Convention of the diocese of Pennsylvania, and was annually re-elected till 1830, when he declined further re-election. In the same year (1823) he was chosen secretary to the house of bishops, and re-elected by them to the office in 1826. In 1827 he was called to St. Thomas's church, New York, the wardens coming to Philadelphia to deliver the call in person. But he deemed it his duty to remain where he was. In the same year, though not quite thirty years of age, Mr. De Lancey was unanimously elected provost of the University of Pennsylvania, which had somewhat declined. At the request of Bishop White and Horace Binney, Mr. De Lancey, though he much preferred to continue in his chosen profession, accepted the office. This was that old "college in Philadelphia" founded by Benjamin Franklin, Chief-Justice Allen, and other noted men of that day. He also received (in 1827) the degree of D. D. from his alma mater, being the youngest person upon whom, up to that time, that honor had been conferred. He remained

provost five years, and, having brought the university back to a prosperous condition (taking it with 21 students and leaving it with 125), resigned, to resume his profession. In 1833 he was elected (the three united churches being separated in that year) assistant minister of St. Peter's church, Philadelphia, with the reversion of the rectorship upon the death of Bishop White, who was continued rector of all three. That event occurred in 1836, and Dr. De Lancey continued rector of St. Peter's until 1839, when, upon the division of the diocese of New York, then embracing the whole state, he was elected bishop of western New York, that half of the state west of a north-and-south line just east of the city of Utica. He was consecrated at Auburn in the new diocese on 7 May, 1839, Bishop Griswold, of Connecticut, being the consecrator, assisted by Bishop George W. Doane, of New Jersey, and Bishops Henry R. Onderdonk and Benjamin T. Onderdonk, of Pennsylvania and New York respectively. Bishop De Lancey removed to Geneva, N. Y., nearly the centre of the new diocese, and the seat of Geneva college, where he resided during his episcopate. At that date, 1839, there was not a railroad in the state of New York west of Utica, except a horse-line with wooden rails between Syracuse and Auburn, nor did a railroad reach Geneva until late in 1841. His labors, therefore, in travelling continually over so large a territory, by horse-power only, during the earlier part of his term of office, were extremely arduous. In 1852 Bishop De Lancey and the bishop of Michigan were sent by the house of bishops as delegates to the celebration in London of the 150th anniversary of the Society for the propagation of the gospel in foreign parts, in response to an invitation from the Archbishop of Canterbury. This was the first time the American church was ever represented officially in England, and the first time that American bishops took part officially with Anglican bishops in the public services in St. Paul's cathedral and Westminster Abbey. On this occasion the degree of D. C. L. was conferred by the University of Oxford upon Bishop De Lancey. He had previously spent a year (1835–'6) in Europe, and in 1859 he again went there on account of his wife's health, and travelled extensively. During this visit he was invited by the Archbishop of Canterbury to assist as a consecrator in the consecration of an English bishop for British Columbia, in Westminster Abbey, the first time an American bishop ever united in the consecration of an English bishop. The legislation of the American church during the twenty-six years of his episcopate, and her institutions as a whole, notably that of the General theological seminary, bear the impress of his judgment, his foresight, his influence, and his firm and decided, yet always courteous, character. He first proposed the adoption of the provincial system in the American church, and the change in the organization of the General theological seminary, which, though it did not occur till nearly twenty years after his death, has resulted, though in a slightly different manner, in making it practically a diocesan institution. To him western New York owes the existence of Geneva (now Hobart) college, the endowment that saved it from extinction being the result of his personal influence and labor with the vestry of Trinity church, and also the founding of De Veaux college at Niagara, and the Training-school at Geneva, the former through his influence with and his advice to his personal friend, Judge De Veaux, and the latter to his individual exertions in raising the funds. In the grounds of the latter stands a fine stone church, erected after his death by friends in Philadelphia and in western New York, as his monument. He was nearly six feet high, of graceful mien and commanding presence, united with the most courteous manners and great vivacity, and was one of the most agreeable of men. He was a most eloquent and forcible speaker, and few clergymen could read the service so well and so impressively. In debate he was most skilful, and as a parliamentarian unequalled among his professional brethren. He married, 22 Nov., 1820, Frances, second daughter of Peter Jay Munro, of Mamaroneck, N. Y., and left three sons and one daughter. Besides his various charges, official sermons, and addresses, and a few miscellaneous pamphlets, Bishop De Lancey published no other works.

W^m Ho De Lancey

—**Edward Floyd,** lawyer, eldest son of William Heathcote, b. in Mamaroneck, N. Y., 23 Oct., 1821, was educated at the University of Pennsylvania and at Hobart college, being graduated at the latter institution in 1843. He attended the law-school of Harvard in 1844–'5, and was admitted to the bar in December, 1846, beginning to practise in the city of New York, where he has since resided. He has travelled extensively in Europe, Egypt, and Asia Minor, and also the British American provinces. Mr. Delancey early evinced a talent for historical research. He has been president of the New York genealogical and biographical society (1873–'7), of the Westchester county historical society (1874–'9), and of the St. Nicholas society (1880–'1). In 1879 he was elected domestic corresponding secretary of the New York historical society, which office he still holds. He has edited Jones's "History of New York during the Revolutionary War" (New York, 1879), and the "Secret Correspondence of Sir Henry Clinton" ("Magazine of American History," October, 1883, to August, 1884). He is the author of "Memoir of the Hon. James De Lancey, Lieutenant-Governor of the Province of New York" (Albany, 1851), and in vol. iv., "Documentary History of New York" (1851); "The Capture of Fort Washington the Result of Treason" (New York, 1877); "Memoir of James W. Beekman" (New York, 1879); "Memoir of William Allen, Chief Justice of Pennsylvania" (Philadelphia, 1879); "Origin and History of Manors in the Province of New York" (New York, 1886); and "History of Mamaroneck, N. Y." (New York, 1886).

—**Peter,** member of assembly, second son of Etienne, b. in New York city, 26 Aug., 1705; d. in West Farms, Westchester co., N. Y., 17 Oct., 1770. He was a man of great wealth and influence, and sat in the New York assembly for Westchester county from 1750 till 1768, when he declined re-election in favor of his second son, John. He had six sons, several of whom are mentioned below. Of his five daughters, Alice married Ralph Izard, the South Carolina senator, and Susan became the wife of Col. Thomas Barclay, the first British consul appointed in New York after the peace of 1783.

—**Stephen,** lawyer and loyalist, son of the

preceding, b. in the city of New York about 1740; d. in Annapolis, Nova Scotia, in 1801. In 1765 he was commissioned clerk of the city and county of Albany, which latter then comprised all of the province west of Hudson river and north of Ulster county. Later he was also recorder of the same city, and several times served as a commissioner to treat with the Indians. He was a member of the Albany committee of safety in 1775. On 4 June, 1776, he was dining with the mayor and a number of loyalists in celebration of the king's birthday, when he and others were seized by the Revolutionary party and thrown into prison. A few days later they were taken to Hartford, Conn., where they remained in confinement, on a charge of "disaffection," until liberated, on 26 Dec., by order of Gov. Trumbull. De Lancey did not take up arms, but remained in New York until 1783, when he removed to Annapolis, Nova Scotia, where in 1786 he was made a member of the council.—**John,** lawyer, brother of the preceding, b. in the city of New York about 1741; d. there in 1829. He was high sheriff of Westchester county in 1769, and succeeded his father as member of assembly for that borough, serving from 1768 till 1772, and being re-elected from 1793 till 1795. He was also a member of the general committee of one hundred (May, 1776), and of the first provincial council for the city of New York in 1775–'6. He was not attainted of treason, nor was his property confiscated.—**James,** soldier, brother of the preceding, b. in West Farms, Westchester co., N. Y., about 1750; d. near Annapolis, Nova Scotia, in 1809. He succeeded his brother, John, as high sheriff of his native county in 1770, and served till 1776. He took no part in the Revolution till 1777, when Gov. Tryon commissioned him captain of a troop of light-horse of fifty men, called by that official "the *élite* of the county," and selected from the Westchester militia regiment, then commanded by Col. Hewlett. At their head he began those rapid and successful raids within the enemy's lines in Westchester and Connecticut that made him famous. He succeeded Hewlett as colonel of the regiment (or "Refugees," as they were commonly called) in 1780, after the members of his troop had been nearly all killed or captured. The latter, from their seizures of cattle, had earned the *sobriquet* of "Cowboys," a designation afterward applied to marauders who, without commissions or military organization, robbed friend and foe alike. Col. De Lancey never served outside of Westchester county and its borders, or held a commission in either of "De Lancey's battalions" commanded by his uncle, Oliver, as has been erroneously said. He was twice taken prisoner by stratagem, but the troop itself was never captured. Many plans to this end were laid by Washington and his generals; but the alertness, dash, and courage of its leader always served to bring them to naught. At the close of the war he retired to Nova Scotia, having been attainted and his estate confiscated by the act of 1779. After his arrival in Nova Scotia, he was appointed member of the council, in which body he sat for several years. By many biographical writers (notably Sabine) he has been confounded with his cousin, James, son of Lieut.-Gov. De Lancey.—**Warren,** soldier and loyalist, brother of the preceding, d. in Madison county, N. Y., in 1855. He was the youngest son of Peter, ran away from home to join the British army, and received a commission as cornet of horse in reward for his gallantry at the battle of White Plains, N. Y. After the war he resided in the city of New York and in Poughkeepsie, subsequently removing to Madison county.—**Oliver,** soldier, youngest son of Etienne, b. in New York city, 16 Sept., 1708; d. in Beverley, Yorkshire, England, 27 Nov., 1785. He was originally a merchant, being a member of the firm founded by his father. He early took an active part in public affairs, and was noted for his decision of character and his personal popularity. He represented the city of New York in the assembly in 1756–'60, and served as alderman of the out-ward from 1754 till 1757. He was active in military affairs during the entire French war, and, in 1755, obtained leave from Connecticut to raise men there for service in New York, for which he received the thanks of the assembly of his own province. In March, 1758, he was appointed to the command of the forces then being collected for the expedition against Crown Point, and succeeded in raising the entire New York city regiment within ten days. He was placed at the head of the New York contingent, under Gen. Abercrombie (about 5,000 strong), as colonel-in-chief. In the attack on Fort Ticonderoga, 8 July, 1758, he supported Lord Howe, and was near that officer when he fell mortally wounded. In November of the same year the assembly of New York again voted him its thanks "for his great service and singular care of the troops of the colony while under his command." In 1760 he was appointed a member of the provincial council, retaining his seat until 1776. In 1763 he was made receiver-general, and, in 1773, colonel-in-chief of the southern military district of the province. "In June, 1776," says the historian Jones, "he joined Gen. Howe on Staten Island; and, had that officer profited by his honest advice, the American war, I will be bold to say, would have ended in a very different manner from what it did." In September of that year he raised three regiments of loyalists, largely at his own expense, of 500 men each, known as "De Lancey's battalions." Of these regiments a brigade was formed, and Col. De Lancey was commissioned brigadier-general, becoming the senior brigadier-general in the loyalist service. He was assigned to the command of Long Island, where he remained during the war. One of his battalions served in the south with great credit under his son-in-law, Col. John Harris Cruger, doing effective service in the defence of Fort Ninety-Six against Gen. Greene. In November, 1777, his country-seat at Bloomingdale, on the Hudson, was robbed and burned at night by a party of Americans from the water-guard at Tarrytown, his wife and daughters being driven from the house in their night-dresses and compelled to spend the night in the fields, now the Central Park. Having been attainted, and his immense estates in New York and New Jersey confiscated, Gen. De Lancey retired to England, where he resided in Beverley, until his death. Of his four daughters, Susanna married Sir William Draper, while Charlotte became the wife of Sir David Dundas, K. C. B., who succeeded the Duke of York as commander-in-chief of the British army.—**Stephen,** lawyer and soldier, eldest son of the preceding, b. in New York city about 1740; d. in Portsmouth, N. H., Dec. 1798. He was educated in England, and practised law in New York before the Revolutionary war, during which he served as lieutenant-colonel and colonel of the "De Lancey's" second battalion. After the war he was appointed chief justice of the Bahama islands, and subsequently was made governor of Tobago and its dependencies. His health becoming impaired while he held the latter office, he sailed for England to rejoin his family. But he grew rapidly worse on the voyage, and, at his own request, was transferred to an American

vessel bound for Portsmouth, N. H., where he died and was buried a few days after his arrival.—Sir **William Howe,** soldier, only son of the preceding, b. in New York about 1781; d. in June, 1815, in consequence of wounds received at the battle of Waterloo. He was educated in England, and early entered the British army. He served with great distinction under Wellington in Spain, and was several times honorably mentioned in his despatches. At the close of the war he was made a Knight of the Bath. When Napoleon landed from Elba, Wellington, in forming his staff, insisted on having De Lancey appointed as his quartermaster-general. The officer really entitled to the promotion was Sir William's brother-in-law, Sir Hudson Lowe; but, as Wellington had conceived a dislike for him, he refused to accept that officer in that capacity. The military authorities, however, insisted on his appointment, and it was only when Wellington made the promotion of De Lancey a *sine qua non* of his acceptance of the supreme command that the former yielded. Six weeks before the battle of Waterloo, Sir William married the daughter of Sir James Hall, of Dunglass, the Scotch scientist. His bride accompanied him on the continent. On the second day of the battle Sir William was knocked from his horse by a spent cannon-ball, and it was at first supposed that he had been instantly killed. Thirty-six hours afterward he was discovered still alive and in his senses, but incapable of motion, although without any visible wound. Notwithstanding the skill of the surgeons, and the tender care of his wife, he succumbed to his injuries nine days after the battle.—**Oliver,** Jr., soldier, brother of the preceding, b. in New York city in 1752; d. in Edinburgh, Scotland, 3 Sept., 1822. He was educated in England, and entered the 14th dragoons, as cornet, in 1766. In May, 1773, he was appointed captain in the 17th light dragoons, in which he remained for forty-nine years, rising through every grade, and succeeding the first Duke of Newcastle as its colonel, 20 May, 1795. In 1774 he was sent to America with despatches for the commander-in-chief, and orders to provide accommodation and remount horses for the regiment. Having discharged his commissions, he joined his comrades on their arrival at Boston, 24 May, 1775, and in the following month witnessed the engagement on Bunker Hill. On the landing of Howe at Gravesend bay in August, Capt. De Lancey, with a detachment of the 17th, captured an American patrol, and seized the pass through the Long Island hills, which enabled the British general to turn the American left and win the battle of Long Island. On the evening of the 28th of the same month Sir William Erskine, with the 17th light dragoons and the 71st foot, about 700 men in all, surprised and seized at Carpenter's house, Jamaica, L. I., Gen. Woodhull and many of his men. The general, who tried to escape under cover of the night, being discovered by the sentries getting over a board fence, was cut down, severely wounded in the head and arm, and only saved from instant death by the interference of Capt. De Lancey. He, however, died of the injuries then received, in spite of careful nursing, on the 20th of the following month. In an affidavit made by Lieut. Robert Troup, 17 Jan., 1776, before the committee of the New York convention, it is declared that Woodhull said he surrendered to Oliver De Lancey, and that after the delivery of his sword the latter struck him; and that others of the party, following his example, cut and hacked him "in the manner he then was." On this sole authority rests the charge against De Lancey, first made public in 1846. On the other hand, William Warne swore before the New York committee of safety, fourteen days after the occurrence, that "one of the light-horsemen told him that he had taken Gen. Woodhull in the dark in a barn, and that before he would answer, when he spoke to the general, he had cut him on the head and both arms." These are the only statements made under oath that refer to the matter, while the weight of all the other testimony is to the effect that De Lancey, by his interference, saved Woodhull's life. The two families were related, and one of the great-great-grandsons of the American general to-day bears the Christian name of De Lancey. In 1777–'8 De Lancey served with his regiment in Pennsylvania and New Jersey, being promoted major, 3 June, 1778, and deputy quartermaster-general in the South Carolina expedition. He was present at the siege of Charleston. In 1781 he was commissioned lieutenant-colonel, and appointed adjutant-general in America, in 1780, to succeed Maj. André. After the conclusion of hostilities he was made the head of a commission to settle the accounts of the war. In 1794 he was promoted to be lieutenant-colonel of his regiment, and subsequently colonel. After serving as deputy-adjutant-general, he was appointed barrack-master-general, an office which he held for ten years. On 3 Oct., 1794, he was named major-general, in 1801 lieutenant-general, and in 1812 general. He sat for many years in parliament as a representative of Maidstone. Gen. De Lancey never married. He died while on a visit to his sister, Lady Dundas.

DELANO, Amasa, traveller, b. in Duxbury, Mass., 21 Feb., 1763; d. in 1817. His father, Samuel, was a soldier in the old French war, and an earnest patriot in 1776. Amasa enlisted in the army in 1777, but was compelled by his father to leave on account of his youth. He afterward served in the militia, and in 1779 sailed one cruise in the privateer "Mars." He became a sailor on a merchantman in 1781, and in 1783–'6 assisted his father in his trade of ship-building. His first voyage as commander was in 1786 in a vessel belonging to his uncle. He afterward made many voyages to all parts of the world. In 1810 the authorities of St. Bartholomew, West Indies, tried to sieze his ship, the "Perseverance," for an alleged violation of the revenue laws, but he put to sea under fire of their batteries and escaped. He published a work entitled "Narrative of Voyages and Travels" (Boston, 1817).

DELANO, Columbus, congressman, b. in Shoreham, Vt., 5 June, 1809. He removed to Mount Vernon, Ohio, in 1817, was educated at the common schools, studied law, and was admitted to the bar in 1831. He practised at Mount Vernon, and became eminent as an advocate and criminal lawyer. He was a delegate in 1860 to the National republican convention at Chicago which nominated Lincoln and Hamlin. He served as state commissary-general of Ohio in 1861, and was a member of the Ohio house of representatives in 1863, and was elected a member of congress from that state in 1844, 1864, and 1866. He was a delegate in 1864 to the National republican convention at Baltimore, which nominated Lincoln and Johnson. On 5 March, 1869, he was appointed by President Grant commissioner of internal revenue, and while he held office reorganized the bureau, thereby increasing the receipts over 100 per cent in eight months. He succeeded Jacob D. Cox as secretary of the interior in October, 1870, a portfolio that he retained till 1875. Mr. Delano has for many years

been one of the trustees of Kenyon college, Ohio, which conferred on him the degree of LL. D., and in connection with which he has endowed a grammar school called Delano hall.

DELAPLAINE, John Ferris, diplomatist, b. in New York city, 24 April, 1815; d. there, 14 Feb., 1885, was the son of John F. Delaplaine, an old New York shipping-merchant, who left a large fortune. The son was graduated at Columbia in 1833, studied law, and was admitted to the bar, but never practised. After residing in New York for over twenty years he went abroad, and, when he had passed five years in travel, was attached to the American legation at Vienna. In 1866 he was made secretary of the legation, a place that he retained until 1883, when he resigned, owing to his office being abolished. While in Vienna he made a large and curious collection of bric-a-brac, clocks, pictures, and statuary. He returned to New York in 1884, and a commission in lunacy was soon afterward appointed to take charge of his affairs, on account of his mental incapacity. By his will, made in 1866, he left an estate worth about $600,000, and a subsequent codicil provided for the endowment of a Delaplaine institute for the relief of the friendless. An action was brought for the construction of the will, and judgment declaring the invalidity of that trust was rendered in February, 1877.—His brother, **Isaac Clason,** lawyer, b. in New York city, 27 Oct., 1817; d. there, 17 July, 1866. He was graduated at Columbia in 1834, studied law, and was admitted to the bar. He was elected to congress from New York as a fusionist, and served from 4 July, 1861, till 3 March, 1863.

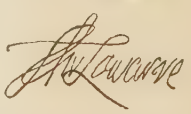
DELAPLAINE, Joseph, publisher, b. in Philadelphia, Pa., 20 Dec., 1777; d. there, 31 May, 1824. He early opened a bookstore in Philadelphia, and in 1812, with John Fanning Watson, published "Epitome Historiæ Sacræ," and in 1813 began the serial publication of his "Repository of the Lives and Portraits of Distinguished Americans," a series of engravings with biographical notices. Subsequently he exhibited his gallery of portraits in the larger cities of the Union.

DELAUNE, J., educator, b. in Côtes du Nord, France, in 1812; d. in Paris in 1849. He studied theology in the seminary of St. Brieux, and after his ordination was appointed assistant in the cathedral there. In 1839 he resolved to devote himself to the American mission. On his arrival in Indiana he received charge of the missions of St. Patrick's, St. Peter's, and St. Mary's, in Davies county, and in 1842 was appointed pastor of Madison. In the latter town he established the order of the Sisters of Providence, and built an academy for them. He also opened a school for boys. In the summer of 1846 he became president of St. Mary's college, Louisville, Ky., which he conducted for two years. His success was so pronounced that he was invited in 1848 to take charge of a similar institution in Rochester, N. Y., but was compelled to abandon the enterprise by illness, and went to Europe.

DELAVAN, Edward Cornelius, reformer, b. in Schenectady county, N. Y., in 1793; d. in Schenectady, 15 Jan., 1871. He was a wine-merchant, and acquired a fortune. At one time he owned much real estate in Albany, including the Delavan house, which he erected. In 1828, in company with Dr. Eliphalet Nott, he formed the State temperance society in Schenectady, and entered with zeal into the cause of temperance reform, devoting his ample means to its promotion, speaking, lecturing, and writing on the subject, and employing others in all these ways to further the cause. He met with great opposition in this work. In 1835 he wrote to the Albany "Evening Journal," charging an Albany brewer with using filthy and stagnant water for malting. The brewer prosecuted him for libel, and the trial, which took place in 1840 and attracted wide attention, occupied six days, and resulted in a verdict for Delavan. After this, several similar suits that had been begun against him for damages aggregating $300,000, were abandoned. Mr. Delavan had the proceedings of this trial printed in pamphlet-form for distribution as a tract. He procured, about 1840, several drawings of the human stomach when diseased by the use of alcoholic drinks, from *post-mortem* examinations made by Prof. Sewall, of Washington, D. C. These he had engraved and printed in colors, and made very effective use of them. He also published for years, at his own expense, a periodical advocating, often with illustrations, the temperance cause; this was subsequently merged in the "Journal of the American Temperance Union," to whose funds he was a most liberal contributor. He had trained himself to public speaking, and became an efficient advocate of the cause he had so much at heart. Mr. Delavan presented to Union college a collection of shells and minerals valued at $30,000. He lost a large portion of his property a few years before his death. He published numerous articles and tracts, and "Temperance in Wine Countries" (1860).

DE LA VEGA, Garcilaso. See GARCILASO.

DELAWARR, or DELAWARE, Thomas West, Lord, governor of Virginia, d. at sea, 7 June, 1618. He succeeded his father as third Lord Delawarr in 1602, and in 1609 was appointed governor and captain-general of Virginia. He arrived at Jamestown, 9 June, 1610, with three ships, after a voyage of three months and a half. His coming revived the courage of the colonists, who had been reduced almost to despair, owing to privation and misgovernment, and his judicious and energetic management soon restored order and industry. He established a post at Riquotau (now Hampton), at the mouth of James river, and built two forts, which he named Henry and Charles, in honor of the king's sons. Being ill, in March, 1611, he embarked for Nevis, in the West Indies; but, having been driven north by opposing winds, they entered the mouth of a large river, called by the natives Chickohocki, but which received the name of Delaware in his honor. He then sailed for England; but in April, 1618, urged by the colonists to return in consequence of the oppressive rule of Argall, he sailed again for Virginia, but died on the voyage. He expended large sums in establishing the colony of Virginia, and was universally regarded as a noble and philanthropic man. The present Earl Delawarr, Reginald Windsor Sackville-West, is his lineal descendant. He published "A True Relation to the Council of Virginia" (1611; reprinted, 1858).



DE LEON, David Camden, surgeon, b. in South Carolina in 1822; d. in Santa Fé, New Mexico, 3 Sept., 1872. He was educated in his native state, and graduated in medicine at the University of Pennsylvania in 1836. He entered the U. S. army as assistant surgeon on 21 Aug., 1838, served in the Seminole war, and was then stationed for several years on the western frontier. At the beginning of the Mexican war he went with Gen. Taylor to the Rio Grande, was present at most of the battles in the campaign toward Mexico, and entered that city when it surrendered. For these services, as well as for gallantry in action, where he several times took the place of commanding officers who had been killed or wounded, Dr. De Leon twice received the thanks of congress, but was again assigned to frontier duty in Mexico, on the ground of his great energy and hardihood. He was promoted to surgeon, with the rank of major, on 29 Aug., 1856, and on 19 Feb., 1861, resigned his commission and was placed at the head of the medical department of the Confederate army. At the close of the war he went to Mexico, but after a year's residence in that country he returned to New Mexico, where he had been stationed for many years, and owned property, continuing in practice until his death. He was a man of fine literary culture, and a vigorous writer.

DELÉRY, François Charles (duh-lay-ree), author, b. in St. Charles parish, La., 28 Jan., 1815; d. in Bay St. Louis, Miss., 12 June, 1880. His parents were French. He was educated in the Medical school of Paris, where he went in 1829, and returned in 1842. He became well known in his profession, and contributed frequently to the newspapers of his city on practical subjects. He was city physician in 1853–'60, and president of the Board of health in 1857–'8. His works, which are written in French, include "Essai sur la liberté" (New Orleans, 1847); "Études sur les passions" (1849); "Quelque mots sur le nativisme," translated into English (1854); "Fièvre jaune," a treatise on the epidemic of 1848 (1859); "Le roi coton" and "Confédérés et fédéraux" (1864); "Memoire sur l'épidemie de fièvre jaune qui a régné à la Nouvelle Orleans et dans les campagnes," a work of much learning and careful research (1868); "L'école du peuple," a one-act comedy in verse; "Les chroniques Indiennes" (1877); and a memoir on "Quarantine" (1878).

DELGADILLO, Diego (del-gah-deel'-yo), Spanish judge, b. in Granada, Spain, in the latter part of the 15th century; d. there in 1533. He was graduated as a lawyer at the university of Alcalá, and in 1527 appointed judge of the first audiencia or supreme court of New Spain. He left Seville in August, and landed at Vera Cruz on 6 Dec., 1528. Two other judges having died during the voyage, Delgadillo and Ortiz de Matienzo alone founded the audiencia in the city of Mexico. He awarded himself several repartimientos, and soon managed to send home a large amount of money; he obtained from the municipal council a grant of land, which was forbidden to the judges by the laws, and had his brother appointed governor of the Zapoteca province. Finally he declared himself in open enmity with Cortés, and opposed the missionaries and the bishops. To make himself popular among the Spanish colonists and the natives, he founded Antequera (now Oajaca), quelled a dangerous revolt of the Indians in that province, imported the mulberry-tree and the silk-worm in 1530, being the first to begin their culture in the New World, and the olive-tree in the following year. In the mean while his acts of maladministration had reached their utmost, when Cortés returned from Vera Cruz, 15 July, 1531, and resolved to put an end to the whole audiencia. All the judges were in accord, and intended to depose Cortés; but Archbishop Lumárraga succeeded in checking them. The audiencia was called to answer before other courts; 125 suits were begun, and Delgadillo, like the other members of the audiencia, was sentenced to lose all his repartimientos, and to pay $40,000 besides. He returned to Spain, and retired to his native city, where a severe illness, brought about by his troubles, ended his life.

DELGADO, Pedro (del-gah'-do), Spanish missionary, b. in Burgos, Old Castile, in 1487; d. in the city of Mexico in 1552. His parents belonged to the highest Castilian nobility, and had great influence at the court of Queen Isabella. Young Delgado was sent to Valladolid to study, but, being out of health, returned home. Some time afterward he entered a Dominican convent at Salamanca, where he studied arts and theology, and, on being ordained priest, went at once to Ocaña with Father Juan Hurtado, where they founded a convent and college, which is still a school for Spanish missionaries. Father Betanzos took him to New Spain in 1526, and Delgado was soon appointed prior of the Dominican convent in the city of Mexico, and provincial of his order in 1538. He was the first master of novices and preacher-general in that province, and took much interest in the conversion and instruction of the Indians, whose language he learned in order to be able to preach and teach among them. He was the best friend and assistant of Father Bartolomé de las Casas, the great protector of the Indians, and gave him much valuable information for his "Historia de Indias" and other writings. Charles V., having been informed by Las Casas about the learning and virtues of Delgado, appointed him bishop of Charcas, Peru; but he declined the appointment, preferring to continue his work in Mexico, where he remained for the rest of his life, devoting himself entirely to literary and scientific teaching and to charity. His remains were buried in the chapter-hall of Santo Domingo, Mexico.

DELINIERS-BREMONT, Jacques Antoine Marie, Spanish viceroy, b. in Niort, France, 6 Feb., 1756; d. in Buenos Ayres, 26 Aug., 1809. He entered the service of the order of Malta and afterward the Spanish navy, where he soon attained the rank of captain, and during the war with Great Britain was sent on a mission to South America. When Buenos Ayres was captured in June, 1806, by the English under Beresford, Deliniers collected a force and marched against the conquerors, who capitulated 12 Aug. with a loss of 364 killed, 1,200 prisoners, 700 muskets, 20 guns, and 3 standards. After Montevideo had been recaptured by the British forces under Auchmuty, 3 Feb., 1807, Deliniers was attacked by them in the vicinity of Buenos Ayres, driven within its walls, and besieged by an army of 10,000 men under Gen. Whitelock; but he defended the city valiantly, caused great losses to the British, took on 5 July 1,000 prisoners, forced them to raise the siege, and soon afterward, in consequence of the capitulation of 7 July, to evacuate Montevideo and abandon the whole country within two months. For these services he was made viceroy of Buenos Ayres. When the first demonstrations for independence appeared toward the end of 1808, Deliniers was driven by the insurgents from Buenos Ayres, and for his temporizing policy was superseded by Baltasar de Cisneros, sent out by the Junta de Cadiz early in 1809. Deliniers was

given the title of Count of Buenos Ayres, and ordered to return to Europe, but retired to Mendoza. His deposition produced a new revolution in Buenos Ayres, and soon compelled Cisneros to abdicate; but when Deliniers, at the head of 2,000 men, whom he had collected, marched upon the capital to re-establish the royal authority, he was defeated and captured by the revolutionists, and shot in Buenos Ayres.

DELLET, James, member of congress, b. in Ireland in 1788; d. in Claiborne, Ala., 21 Dec., 1848. His parents emigrated from Ireland and settled in South Carolina when he was a boy. He was graduated at the college of South Carolina in 1810, studied law in Columbia, was admitted to the bar in 1813, and was for a time a commissioner in equity. In 1817 he removed to Alabama and settled in Claiborne, Monroe co., where he distinguished himself as a lawyer, and by speculation in land became wealthy. He was appointed a judge of the circuit court, and frequently represented his county in the state legislature. He was a representative in congress from Alabama from 1839 till 1841, and again from 1843 till 1845.

DELLIUS, Godfreidus, clergyman, b. in Holland; d. in Antwerp about 1705. In 1683 he came to this country, and was settled at Albany as assistant to Gideon Schaats, pastor of the Reformed church there, and preached also at Schenectady. He continued in this service about sixteen years. In common with all the reform clergy, he refused to recognize Leisler's usurpation in 1689, and the latter, among other accusations, charged Dellius with being a principal actor in the French and English difficulties, and an enemy to the Prince of Orange, who had succeeded King James. After the execution of Leisler, in May, 1691, Gov. Sloughter recalled Dellius, who was on the point of embarking for Europe, and he soon returned to Albany. On the conclusion of peace between England and France, Dellius and Peter Schuyler were sent as agents, in April, 1698, to Count de Frontenac, in Canada, to announce the peace, and bring to an end the provincial hostilities. Acting under the authority of Bellomont, they took with them nineteen French prisoners, and obtained the delivery of British colonists held as prisoners by the French. Soon after his return from this mission, two Christian Indians declared on oath that Dellius, Peter Schuyler, Evert Banker, and Dirck Wessels had, in 1696, fraudulently obtained a deed for a large tract of land from the Indians. This land, the deed of which was confirmed by Gov. Fletcher, was on the eastern side of the Hudson, above Albany, and was seventy miles in length and twelve in breadth. Dellius also obtained a tract of land in the valley of the Mohawk, fifty miles by four. The Indians, at an appointed interview, told Bellomont all the circumstances of the conveyance of the deed, and the latter, in the spring of 1699, secured a bill to vacate the lands, and also a vote to suspend Dellius from ministerial duty in Albany county. The classis of Amsterdam complained to the bishop of London of Bellomont's conduct, and Albany and New York contributed £700 to enable Dellius to go to England and oppose the vacating bill before it received the king's signature. The Indians who had sworn against him afterward took counter-oaths, and, just before his departure, asked Dellius to forgive them. But, as they were his converts, and he was known to have great power over them, this circumstance loses its apparent force. Some accounts say that he returned to this country and was a missionary among the Indians from the Episcopal church in 1705–'10.

DELMAR, Alexander, political economist, b. in New York city, 9 Aug., 1836. His father was a native of Spain. He was a writer on a New York journal in 1854, and became financial editor of "Hunt's Merchants' Magazine," and of several New York papers. He established the "Social Science Review," and was its editor in 1864–'6. He was called upon to organize the U. S. bureau of statistics in 1866, was its director in 1867–'8, and in 1867 became president of the Washington statistical society. He is the author of "Gold Money and Paper Money" (New York, 1862); "Treatise on Taxation"; "Essays on Political Economy" (1865); "The National Banking System" (1865); "Statistical Hand-book" (1866); "What is Free Trade?" (1868); "Letter on the Finances" (1868); "The Suppressed Report" (1869); and "The Resources, Productions, and Social Condition of Egypt" (1874).

DELMONTE, Felix María, Dominican lawyer, b. in Santo Domingo city, Dominican Republic, about 1810. He was educated in his native city, where he was admitted to the bar. He was a member of La Trinitaria, a secret society founded by Duarte to free the country from Haytian rule. Delmonte has filled many high offices in the government of the republic, and has been many times a member of the Dominican congress. He has published "Las virgenes de Galindo," an historical tale in verse; "El Mendigo," a drama; "Ozema," a drama; and many lyrical poems. Several of his poems are included in "Poetas Contemporaneos" (Madrid), and also in the "Lira Quisqueya" (Santo Domingo).

DELMONTE Y TEJADA, Antonio, b. in Santiago de los Caballeros, Santo Domingo, in 1783; d. in 1861. He took part against the revolted slaves of Hayti, afterward studied law, and was admitted to the bar in 1805 in Santo Domingo city, but emigrated to Cuba, where he spent the rest of his life. He published "Historia de Santo Domingo," the story of the island from the discovery until the present day (3 vols., Havana).

DE LONG, George Washington, explorer, b. in New York city, 22 Aug., 1844; d. in Siberia, 30 Oct., 1881. His early education was obtained in the public schools of Brooklyn. He was appointed an acting midshipman at the U. S. naval academy in 1861, graduated in 1865, and was promoted to be ensign, 1 Dec., 1866; master, 12 March, 1868; lieutenant, 29 March, 1869; and lieutenant-commander, 1 Nov., 1879. He served in the European squadron in 1865–'9 and 1873–'4, in the South Atlantic fleet in 1870, on the North Atlantic station in 1874, and was executive officer of the school-ship "St. Mary's," off New York city, in 1875–'8. On 1 March, 1871, he married Miss Emma J. Wotton, the ceremony taking place on the U. S. steamer "Shenandoah," in the harbor of Havre, owing to the impracticability of complying with French laws as to marriage on French soil. In 1873 he was serving on the "Juniata," which, commanded by Capt. D. L. Braine, was ordered to search for the missing arctic steamer "Polaris" and its crew. Supplementary to the movements of the "Tigress" in the north water of Baffin's bay, Capt. Braine thought search along the fast ice of Melville bay important, and detached Lieut. De Long with the steam launch "Juniata." He left Upernivik, 2 Aug., with Lieut. Charles W. Chipp and seven others, crossed Melville bay in a steam launch thirty-two feet long, and reached a point less than ten miles from Cape York, but was prevented by a violent gale from landing or further pursuing the search. From October, 1873, till 1878, Lieut. De Long served as ex-

ecutive officer on the school-ship "St. Mary's." The "Jeannette" (which, as the "Pandora," had made two arctic voyages under Sir Allen Young) was purchased by James Gordon Bennett, Jr., and strengthened and fitted out at his expense for a three years' voyage of exploration via Bering strait. By special act of congress the government assumed authority, while Mr. Bennett met the expense. The "Jeannette" sailed from San Francisco, under Lieut. De Long's command, 8 July, 1879. The equipage numbered thirty-three, including five officers of the navy. Touching at Ounalaska, St. Michael's, and St. Lawrence bay, De Long proceeded to Cape Serdze Kamen, Siberia, to search for Nordenskiold, who left before his arrival. Steaming northward and taking the pack, the "Jeannette" was beset, 5 Sept., 1879, off Herald island, in about 71° 35′ N., 75° W. The vessel never escaped the pack, and, after drifting over 600 miles to the northwest, in a devious course, making twice the distance, was crushed by the ice in 77° 15′ N., 155° E., 13 June, 1881. Lieut.-Com. De Long and his party were thus adrift in the polar sea 150 geographical miles from the new Siberian islands, and over 300 from the nearest point of the mainland of Asia. De Long started southward with his party, and reached Bennett island, 28 July, and Thaddeus island (one of the new Siberian group), 20 Aug., 1881. The party had made this remarkable journey so far alternately by sledge and boat. From this point they proceeded in boats, under the command respectively of De Long, Lieut. Chipp, and Chief-Engineer George W. Melville. Chipp's boat was lost, with eight men, in a gale on 12 Sept., off the Lena delta; but Melville, with nine others, reached, through one of the eastern mouths of the river, a small village on the Lena. De Long, Dr. Ambler, and thirteen others reached the main mouth of the Lena, 17 Sept., having travelled about 2,800 miles, and reached the main-land at a point 500 miles distant from their lost ship. Obliged by new ice to abandon their boat and travel overland, they proceeded slowly up the Lena, much embarrassed by sick and helpless men and their cumbersome records. On 9 Oct. they could go no farther. Two men, sent forward by De Long to obtain relief, survived, but the others perished of exposure and starvation within twenty-five miles of a Siberian settlement. De Long's diary, written up to the last day, shows that he and two others were living on 30 Oct. Noros and Ninderman, the men sent forward by De Long, fell in with natives on 22 Oct., and with Melville, 29 Oct., at Belun. Melville pushed his search, without success, northward to the extremity of the Lena delta in November, and, renewing his search in March, 1882, found the dead bodies and the records of the expedition on the 23d of that month. By direction of the U. S. government, the remains of De Long and his unfortunate companions were brought to his native city, where they were interred with distinguished honors on 22 Feb., 1884. The attainment of the highest latitude in Asiatic seas, and the discovery of Jeannette, Henrietta, and Bennett islands, appear at first to be meagre and inadequate results from so long and disastrous a voyage. But to the positive results must be added negative discoveries; for before De Long's northwest drift the long-sought-for Wrangell land shrank, from a continent supposed to extend from the confines of Asia to Greenland, into a small island. But the hydrographical conditions of the 50,000 square miles of the polar ocean charted by De Long clearly indicate the character of 50,000 other square miles of area to the south, where doubtless a shallow sea exists, with occasional small islands of no great size. When Wrangell island proved to be an inconsiderable land, De Long's expedition was doomed to comparative failure, and Bering strait was closed as a road to high latitudes; for without a protecting coast no vessel can hope to navigate the polar seas. The valuable hydrographic, magnetic, and meteorological observations of the expedition still remain inaccessible and undiscussed (1887), although ten times the amount necessary for their proper publication has been devoted to investigations of the expedition, with the result fortunately of illustrating Commander De Long's many admirable qualities as an officer and a man. The court of inquiry, in its findings, said officially: "Special commendation is due Lieut.-Commander De Long for the high qualities displayed by him in the conduct of the expedition." De Long's journals have been edited by his widow, under the title "The Voyage of the Jeannette" (Boston, 1883), and the story of the search is to be found in Melville's "In the Lena Delta" (Boston, 1884).

DELORME, Louis, Canadian lawyer, b. in Montreal, 29 Dec., 1824. He was educated at St. Sulpice college, Montreal, and at the College of St. Hyacinthe, studied law, and was admitted to the bar of Lower Canada in 1847. He represented St. Hyacinthe in the Dominion parliament from 1870 till 1878, and was the first to propose the money-order system between the United States and Canada. He was appointed clerk of the legislative assembly of the province of Quebec in May, 1879.

DELVALLE or **DEL VALLE, Aristóbolo** (del-val′-yay), Argentine statesman, b. in Buenos Ayres in 1847. He was graduated at the university of his native city, and began practice at the bar in 1869. He identified himself with the national autonomist party, was soon acknowledged as one of its leaders, and elected in 1874 senator for the province of Buenos Ayres. He was re-elected for several terms, and distinguished himself as an orator and defender of the autonomy of the provinces against encroachments of the Federal power. In 1875 his party nominated him for governor of the province, but he was defeated. During the dispute between Chili and the Argentine Republic concerning their boundary in Patagonia, he, together with the U. S. minister, endeavored to bring about a pacific solution of the question, and their efforts were rewarded by the boundary treaty signed in Buenos Ayres, 23 Oct., 1881. In 1884 he was again one of three persons proposed by his party for the nomination for governor; but D'Amico was considered a stronger candidate, and was elected. Delvalle continues one of the most influential members of the Federal senate. He has published "Introduccion al derecho administrativo" (Buenos Ayres).

DEMAREST, David D., clergyman, b. in Harrington, Bergen co., N. J., 30 July, 1819. He was graduated at Rutgers in 1837, and at the New Brunswick theological seminary in 1840, and entered the ministry of the Reformed Dutch church. After holding pastorates in Catskill, Flatbush (Ulster co.), New Brunswick, and Hudson, he became, in 1865, professor of pastoral theology and sacred rhetoric in New Brunswick seminary. He received the degree of D. D. from Princeton in 1857. Dr. Demarest has published sermons and addresses, and "History and Characteristics of the Reformed Protestant Dutch Church" (New York, 1856); "Practical Catechetics" (1882); and "The Huguenots on the Hackensack," a paper read before the Huguenot society of America, 13 April, 1885 (New Brunswick, 1886). He was also one of the editing committee of the "Centennial of the Theological Seminary of the Reformed Church in America" (New York, 1885), and has contributed largely to the "Christian Intelligencer," and to other magazines and reviews.

DEMAREST, John, clergyman, b. in New Bridge, N. J., in 1763; d. in 1837. When a boy, he was taken prisoner by a drunken Hessian trooper, whom he pushed off his horse while fording a stream, and thus escaped. He studied under Dr. Solomon Froeligh, and was licensed as a minister in the Reformed Dutch church in 1789. He owned the farm at Tappan where Maj. John André was buried. In August, 1821, the British government, at the request of André's sisters, sent a man-of-war to transfer the remains to England. The Duke of York, uncle of Queen Victoria, was on board, and was entertained by Mr. Demarest, who afterward received from the duke a gold-lined snuff-box, made from the cedar-tree whose roots had been found entwined about the skeleton. André's sisters sent him a silver communion service, designed for the use of a Roman Catholic priest, under a mistaken idea that such was his character. Mr. Demarest returned the service, with explanations, and it was replaced by a large silver cup, appropriately inscribed. Mr. Demarest seceded from the Reformed church, with Dr. Solomon Froeligh, in 1822, and was suspended in 1824.—His grandson, **James,** b. in Williamsburg, L. I., 28 June, 1832, was graduated at Union in 1852, and at New Brunswick seminary in 1856. He has held pastorates in Hackensack and Newark, N. J., Chicago, Ill., and Kingston and Fort Plain, N. Y., and has published numerous sermons, including "Duty of the Reformed Church in the Future as foreshown by its Course in the Past" (in "Centennial Discourses," 1876). Union college gave him the degree of D. D. in 1877.

DÉMENNIER, or **DESMENNIER, Jean Nicolas** (day-men-yay'), French statesman, b. in Franche-Comté in 1751; d. in Paris in 1814. He was deputy to the états generaux in 1789. He took also a prominent part in the deliberations of the constituent assembly, which elected him to serve on the legislative committee. When the assembly dissolved, Démennier, foreseeing the reign of terror, left France in 1791. He came to New York, where he remained five years, and on his return was made a senator by Consul Bonaparte in 1803. Démennier is the author of "Voyages de Vancouver"; "Esprit des usages et des coutumes des differents peuples" (3 vols., 1776–'80); "Essai sur les états unis" (1786); and "L'Amérique indépendante" (4 vols., 1790).

DEMERS, Jérome (de-mers'), Canadian educator, b. in St. Nicholas, near Quebec, Canada, 1 Aug., 1774; d. in Quebec, 17 May, 1853. He was educated at the seminary of Quebec, where he finished his classical course in 1795, and his theological course in 1798. On 24 Aug. of the latter year he was ordained a priest of the Roman Catholic church. He became director of the Seminary of Quebec on 10 Aug., 1800, and was its superior in 1815–'21, 1824–'30, and 1836–'42, following the rule of the seminary, which permits the same person to hold the office only six years in succession. Father Demers became vicar-general in 1825. During his connection with the seminary, a period of over fifty years, he taught, successively or at the same time, physics, chemistry, astronomy, architecture, philosophy, and theology. He was distinguished as an orator, and had considerable influence, doing much to promote a taste for natural philosophy and the fine arts. He published "Institutiones Philosophicae" (Quebec, 1835), and left manuscript treatises on physics, astronomy, and architecture.

DEMERS, M., R. C. bishop, b. in Canada; d. in Vancouver's island in 1871. He went to the Northwest territory in 1838, and was engaged in missionary duty among the Indians till 1847, when he was consecrated bishop of Vancouver's island.

DE MILLE, James, Canadian author, b. in St. John, N. B., in August, 1837; d. in Halifax, N. S., 28 Jan., 1880. He was graduated at Brown in 1854, and while in college wrote several songs that are still sung by students. He also contributed to newspapers in St. John while he was very young. He held the chair of classics in Acadia college in 1860–'5, and that of history and rhetoric in Dalhousie college, Halifax, from 1865 till his death. He published "Helena's Household" (New York, 1858); "The Martyr of the Catacombs" (1858); "Andy O'Hara" (1860); "John Wheeler's Two Uncles" (1860); "The Soldier and the Spy" (1865); "The Arkansas Ranger" (1865); "The Dodge Club" (1866); "Cord and Creese" (1867); "The American Baron" (1870); "The Lady of the Ice" (1870); "The Cryptogram" (1871); "A Comedy of Terrors" (1871); "An Open Question" (1872); and "The Living Link" (1874). He was also the author of books for boys, including "B. O. W. C.," "Fire in the Woods," "Boys of Grand Pré School," "Lost in the Fog," "Among the Brigands," "The Seven Hills," "The Winged Lion," "The Young Dodge Club," "Picked up Adrift," and "Treasures of the Sea." In 1878 he finished a treatise on rhetoric, which was published in New York.

DEMING, Henry Champion, lawyer, b. in Middle Haddam, Conn., in 1815; d. in Hartford, 9 Oct., 1872. He was graduated at Yale in 1836, and at Harvard law-school in 1839. He then opened a law office in New York city, but devoted himself chiefly to literature, being engaged with Park Benjamin in editing the "New World," a literary monthly. He removed to Hartford in 1847, served in the lower house of the legislature in 1849–'50 and 1859–'61, and in 1851 was a member of the state senate. He was mayor of Hartford in 1854–'8 and in 1860–'2, having been elected as a democrat. Early in the war he opposed coercion, even after the fall of Sumter, and when asked to preside at a war-meeting on 19 April, 1861, declined in a letter in which he said that he would support the Federal government, but would not "sustain it in a war of aggression or invasion of the seceded states." When Washington was threatened, however, he favored the prosecution of the war, and on 9 Oct., 1861, was elected by acclamation speaker *pro tempore* of the state house of representatives, the republican majority thus testifying their approval of his course. In September, 1861, he accepted a commission as colonel of the "charter oak" regiment (the 12th Connecticut), re-

cruited especially for Gen. Butler's New Orleans expedition. After the passage of the forts his regiment was the first to reach New Orleans, and was assigned by Gen. Butler the post of honor at the custom-house. Col. Deming was on detached duty, acting as mayor of the city from October, 1862, till February, 1863. He then resigned, returned home, and in April, 1863, was elected to congress as a republican, and served two terms, being a member of the committee on military affairs, and chairman of that on expenditures in the war department. In 1866 he was a delegate to the Loyalists' convention in Philadelphia, and from 1869 till his death was U. S. collector of internal revenue for his district. Mr. Deming was one of the most eloquent public speakers in New England, a gentleman of fine culture and of refined literary taste. He published translations of Eugene Sue's "Mysteries of Paris" and "Wandering Jew" (1840), a eulogy of Abraham Lincoln, delivered by invitation of the Connecticut legislature in 1865, "Life of Ulysses S. Grant" (Hartford, 1868), and various addresses.

DEMING, William, the first maker of wrought-iron cannon, b. in 1736; d. in Mifflin, Cumberland co., Pa., 19 Dec., 1830. He was employed in the Revolutionary army, and contributed two wrought-iron cannon of curious construction, one of which was captured by the British at the battle of the Brandywine, and is still preserved in the Tower of London. These singular pieces of ordnance are described as being "made of wrought-iron staves, hooped like a barrel, with bands of the same material, excepting that there were four layers of staves, breaking joints, all of which were finally bound together, and then boxed and breeched like other cannon." The first gun was made at Middlesex, Pa., the second was begun at Mount Holly Springs, Pa., but as the patriotic blacksmith could find no one to assist him, on account of the heat, which is said to have been so great as to have melted the lead buttons on his coat, it was not completed. The British are said to have offered a large sum of ready money and a stated annuity to any one that would instruct them in the process of manufacture; but the sturdy artisan was not to be seduced from his allegiance. Although he had striven to serve the republic, with traditional ingratitude it refused to compensate him until near the close of his long career.

DEMPSTER, John, educator, b. in Florida, Fulton co., N. Y., 2 Jan., 1794; d. in Evanston, Ill., 28 Nov., 1863. His father, Rev. James Dempster, was bred a Presbyterian, and educated at the University of Edinburgh, but became an associate of John Wesley, and was sent by him to this country as a missionary. He died while John was a child, and the boy became a peddler of tin-ware, but after his conversion, in 1812, began to study diligently. He entered the itinerant ministry of the Methodist church in 1816, and soon distinguished himself as a powerful preacher. After laboring in western New York and Canada, he went as a missionary to Buenos Ayres in 1835, but returned in 1842, and had charge of churches in New York city for three years. In 1847 he was one of the founders of the Biblical institute at Concord, N. H., now the Boston university theological school. He filled the chair of theology there till 1854, when he founded the Garrett Biblical institute at Evanston, Ill., and was its senior professor from 1855 till his death. Plans for establishing institutes in Omaha and California failed, owing to the financial crisis of 1857. Wesleyan university, Middletown, Conn., gave him the degree of D. D. in 1848. Dr. Dempster was very successful as an educator of young men. He left many manuscripts, some of which have been published with the title "Lectures and Addresses" (Cincinnati, 1864).

DEMPSTER, William Richardson, musician, b. in Keith, Scotland, in 1809; d. in London, England, 7 March, 1871. He was apprenticed to a quill-maker in Aberdeen, but soon left the trade and devoted himself to music. He came to the United States in early life, became a naturalized citizen, and remained several years. Afterward his time was spent about equally on either side of the Atlantic. He was a successful composer and public singer, his voice being very effective in parlor singing, though lacking the volume necessary for a large hall. He set Tennyson's "May Queen" to music, which became popular, and afterward composed music for most of the songs introduced in Tennyson's longer poems, which were his favorites for his concerts. He was noted among his friends for his genial spirit and strict morality.

DENAUT, Peter (duh-no'), Canadian R. C. bishop, b. in Montreal, 20 July, 1743; d. in Longueil, 17 Jan., 1806. He was parish priest of Longueil, and vicar-general of the diocese of Quebec. During the invasion of Canada by Arnold and Montgomery, in1775, he was zealous in preventing the Canadians from joining them. As he occupied the post of danger on the route from the United States to Canada, the British authorities suggested his presentation as coadjutor bishop of Quebec, but, feeling that his presence at Longueil would be useful to them in case of another invasion from the United States, they persuaded him to reside there. He was consecrated at Montreal in 1794, and in 1797 Bishop Hubert resigned the see of Quebec in his favor. Bishop Denaut was accused of subserviency to those in power; but on a noteworthy occasion he showed firmness of character. As soon as he succeeded to the bishopric he found the aid of a coadjutor necessary. Both the people and the clergy wished the curé of Quebec, Joseph Octavius Plessis, to be appointed. The Duke of Kent, father of Queen Victoria, was then holding court in Quebec, and at the same time carrying on an intrigue with a married woman in the neighboring village of Beauport. The parish priest of this town secretly favored the liaison, and, to reward his complaisance, the young prince used every effort to have him appointed coadjutor bishop. Bishop Denaut insisted on the choice of Plessis, who had been elected by the clergy, and declared that they neither should nor would hold another election. In presence of this unexpected resistance, the Canadian government withdrew their candidate, and Bishop Denaut then retired to Longueil, where he spent the remainder of his life.

DENGLER, Frank, sculptor, b. in Cincinnati, Ohio, in 1853. He went abroad while young, studied in the Munich academy of fine arts, and received there in 1874 a silver medal for his group the "Sleeping Beauty." He was for a short time an instructor in modelling in the Boston museum art school, but resigned in 1877 on account of failing health, and removed to Covington, Ky., and afterward to Cincinnati. Among his works are "Azzo and Melda" (1877), an ideal head of "America," and several portrait busts.

DENIN, Susan, actress, b. in Philadelphia, Pa., 22 March, 1835; d. in Bluffton, Ind., 4 Dec., 1875. When very young she and her sister Kate took the part of dancing fairies at the National theatre, Philadelphia. Susan afterward became a favorite in New York and other parts of the country, and in 1869 made her first appearance in London. Her

death was the result of a fall on the stage in Indianapolis, Ind. She had been married four times. —Her sister **Kate,** b. in Philadelphia in 1837, was also a popular actress. They resembled each other in person, manner, and ability, and for a time were quite popular in melodramatic characters.

DENIO, Hiram, jurist, b. in Rome, N. Y., 21 May, 1799; d. in Utica, N. Y., 5 Nov., 1871. After a thorough education, he began to study law in his seventeenth year, was admitted to the bar in 1821, and began practice in Rome. He was district attorney in 1825–'34, and in 1826 removed to Utica. He was circuit judge for the fifth circuit in 1834–'8, and in 1836 formed a law partnership with Ward Hunt. In June, 1853, he was appointed to fill a vacancy on the bench of the court of appeals, and twice afterward was elected to the same office, serving till 1866. He had also been bank commissioner and clerk of the supreme court, and from 1835 till his death was a trustee of Hamilton college, which afterward gave him the degree of LL. D. Judge Denio was a democrat, but voted for Abraham Lincoln, and supported the war measures of the government. He was considered one of the ablest jurists that ever sat on the bench of the court of appeals. He published "Reports of Cases argued and determined in the Supreme Court and in the Court for the Correction of Error" (5 vols., 1845–'8), and with William Tracy prepared an edition of the Revised Statutes of New York (2 vols., 1852).

DENIS, Jean Ferdinand, French explorer, b. in Paris, 13 Aug., 1798; d. in 1874. He travelled several times through America, once for five years, 1816 till 1821. He was appointed librarian of the Ste. Geneviève library in Paris in 1861, and held this place till nearly the time of his death. He was the author of many works on the institutions of America, the most notable of which are "L'histoire du Brésil" (1821); "Buenos Ayres et le Paraguay" (2 vols., 1823); "La Guyane" (2 vols., 1823); "Résumé de l'histoire du Brésil, suivi du résumé sur l'histoire de la Guyane" (1825), which was translated into Portuguese in Rio de Janeiro; "Le Brésil et le Portugal," published in the collections of "L'Univers pittoresque" (1837 and 1846). He is also the author of several novels, as "Les scènes de la nature sous les tropiques" (1824) and "Une fête brésilienne célébrée à Rouen en 1850." He published in 1854 a new and revised edition, with notes, of "Les voyages de Malouet dans les forêts de la Guyane," and was a contributor to the Brazilian review, "Corographia Bresilica."

DENIS, Nicolas, French soldier, b. in Tours, France, about 1600. He was governor and proprietor of a part of Acadia and Canada. He had obtained from the king a grant of the country between Cape Canso and Gaspé, but was obliged, after making important establishments, to carry on a continued and vexatious warfare for territorial rights with his countrymen, and a conflagration completed his ruin. He returned to France about 1672, and published "Description géographique et historique des Côtés de l'Amérique septentrionale, avec l'histoire naturelle de ce pays" (2 vols., Paris, 1672).

DENISON, Andrew Woods, soldier, b. in Baltimore, Md., 15 Dec., 1831; d. there, 24 Feb., 1877. In 1862 he raised the 8th Maryland regiment for the National army, and in August of that year became its colonel, serving till the close of the war. He commanded the Maryland brigade of Robinson's division at Laurel Hill, where he lost an arm, and was again wounded at White Oak Ridge, near Petersburg. He was brevetted brigadier-general for gallantry in the first-named battle on 9 Aug., 1864, and major-general for the second, 31 March, 1865. Gen. Denison was appointed postmaster of Baltimore, 19 April, 1869, and held the office till his death.

DENISON, Charles Wheeler, author, b. in New London, Conn., 11 Nov., 1809; d. 14 Nov., 1881. Before he was of age he edited a newspaper in his native town. He afterward became a clergyman, edited the "Emancipator," the first anti-slavery journal published in New York, and took part in other similar publications. In 1853 he was U. S. consul in British Guiana. He spent some time among the operatives of Lancashire, speaking in behalf of the National cause during the American civil war, and in 1867 edited an American paper in London, being at the same time pastor of Grove Road chapel, Victoria park. During the last two years of the war he served as post chaplain in Winchester, Va., and as hospital chaplain in Washington. He published "The American Village and other Poems" (Boston, 1845); "Paul St. Clair," a temperance story; "Out at Sea," poems (London, 1867); "Antonio, the Italian Boy" (Boston, 1873); "The Child Hunters," relating to the abuses of the padrone system (Philadelphia, 1877); and a series of biographies published during the war, including "The Tanner Boy" (Grant); "The Bobbin Boy" (Banks); and "Winfield; the Lawyer's Son" (Hancock).—His wife, **Mary Andrews,** author, b. in Cambridge, Mass., 26 May, 1826, became connected, on her marriage with Mr. Denison, with the "Olive Branch," of which he was assistant editor. She continued to contribute to magazines, and, when living in British Guiana, wrote tropical sketches for American periodicals. She also contributed to English magazines while in London. Her books are mostly tales of home-life, and include "Home Pictures," a collection of sketches written for periodicals (New York, 1853); "Gracie Amber" (1857); "Old Hepsey, a Tale of the South" (1858); "Opposite the Jail" (1858); "The Lovers' Trials" (Philadelphia, 1865); "Annie and Teely" (1869); "That Husband of Mine," an anonymous book, which reached a sale of over 200,000 copies in a few weeks (Boston, 1874); "That Wife of Mine" (1877); "Rothmell" (1878); "Mr. Peter Crewett" (1878); "His Triumph" (1883); "What One Boy can Do" (1885); and numerous Sunday-school books.

DENISON, Daniel, soldier, b. in England in 1613; d. in Ipswich, Mass., 20 Sept., 1682. He came to New England about 1631, removed from Cambridge to Ipswich in 1635, and was a military leader there. He was a commissioner to treat with the French commander D'Aulny at Penobscot, in 1646 and 1653, and was subsequently major-general of the colonial forces for ten years. He represented Ipswich several years in the general court, was speaker of the house in 1649 and in 1651–'2, secretary of the colony in 1653, justice of the quarterly court in 1658, commissioner of the united colonies in 1655–'62, and assistant in 1653–'82. He was appointed commander-in-chief of Massachusetts troops in 1675, but was prevented by illness from taking the field in the Indian war of that year. Gen. Denison's daughter married President Rogers, of Harvard. He published "Irenicon, or Salve for New England's Sore" (1684).

DENISON, Frederic, clergyman, b. in Stonington, Conn., 28 Sept., 1819. He was graduated at Brown in 1847. Besides having been pastor of several Baptist churches, Mr. Denison served during three years of the late war as chaplain of the 1st Rhode Island cavalry and the 3d Rhode Island

heavy artillery. He has written a great number of poems and articles for periodicals, and is author of the following works: "The Supper Institution," "The Sabbath Institution," "The Evangelist, or Life and Labors of Rev. Jabez S. Swan" (New Haven, 1873); "History of the First Rhode Island Cavalry"; "Westerly and its Witnesses for Two Hundred and Fifty Years"; "Picturesque Narragansett, Sea and Shore"; "Illustrated New Bedford, Martha's Vineyard, and Nantucket"; "History of the Third Rhode Island Heavy Artillery Regiment"; and "Picturesque Rhode Island."—His brother, **John Ledyard,** educator, b. in Stonington, Conn., 19 Sept., 1826. His education was received at the Connecticut literary institution and at Worcester academy, and he established the Mystic river academy. Settling in Norwich, Conn., in 1855, he became subsequently secretary and treasurer of the Henry Bill publishing company, and president of the Connecticut Baptist education society. He received the degree of A. M. from Brown in 1855. He is the author of a "Pictorial History of the Wars of the United States," and has edited an "Illustrated History of the New World," in English and in German.

DENISON, George Taylor, Canadian lawyer, b. in Toronto, 17 July, 1816; d. 30 May, 1873. He was educated at Upper Canada college, Toronto, studied law, and was admitted to the bar in 1840. He served as a volunteer in the rebellion of 1837, participated in the siege of Navy Island, and was one of the officers that obtained the information that led to the capture and destruction of the steamer "Caroline." In 1846 he was appointed to the command of a cavalry troop (raised by his father, Lieut.-Col. G. T. Denison), now known as the governor-general's body-guard, and in 1855 took an active part in organizing the militia under the new law passed that year, which was the foundation of the present military system of Canada. He organized the Toronto field battery, and in 1860, at the request of Sir Edmund Head, the governor-general, organized the queen's own rifles.—His son, **George Taylor,** b. in Toronto, 31 Aug., 1839, was educated at Upper Canada college, and is an LL. D. of Toronto university. He was gazetted to the active militia in 1855 as a cornet, was made a major in 1862, and promoted to the command of the governor-general's body-guard in 1866, a command which he still (1887) holds. He was admitted to the bar in 1861, and in 1866 he served during the Fenian raid, commanding the outposts on the Niagara river, in the autumn of that year, under Col. (now Lord) Wolseley. In 1872, and again in 1873, he was sent to Great Britain to represent the Ontario government in emigration matters. In 1872 he contested Algoma for the house of commons, but was defeated. In 1877 he was appointed police magistrate of Toronto, and in 1885 served in the Riel rebellion in the northwest. In 1882 Col. Denison was appointed an original member of the English literature section of the Royal society of Canada, and in 1885 was elected its president. He is the author of "Manual of Outpost Duties" (Toronto, 1866); "History of the Fenian Raid" (1866); "Modern Cavalry" (London, England, 1868); and a "History of Cavalry" (London, 1877). The two last named have been translated into Russian, German, and Hungarian. The "History of Cavalry" was awarded the 5,000 rubles offered by the emperor of Russia as a prize for the best work on that subject. Col. Denison visited Russia on the occasion of receiving the prize, and was presented to the Czar and Czarina.—Another son, **Frederick Charles,** soldier, b. in Toronto, 22 Nov., 1846, was educated at Upper Canada college, studied law, and was admitted to the bar in 1870. He served for some months in the administrative battalion at Niagara in 1865, and the same year was gazetted cornet in the governor-general's body-guard, serving in this capacity on the Niagara frontier during the Fenian raid in 1866. He served as an orderly to Col. Wolseley on the Red river expedition of 1870, and rose to the rank of lieutenant-colonel in 1884, when he sailed from Quebec in command of a force of Canadian voyageurs, to aid in the campaign in the Soudan for the relief of Gen. Gordon. Col. Denison accompanied Gen. Earle's column, and took part in the battle of Kirbecan. The services rendered by the Canadian boatmen were thought so valuable that they received the thanks of the imperial parliament, and their officer was made a companion of the order of St. Michael and St. George. He is a fellow of the Royal historical society of England, and is the author of the "Historical Record of the Governor-General's Body-Guard," with its standing orders.

DENNETT, John Richard, journalist, b. in Chatham, New Brunswick, in 1837; d. in Westborough, Mass., 26 November, 1874. His family removed to Woburn, Mass., while he was a child, and he was fitted for college in the Woburn high-school, and graduated at Harvard in 1862. While in college he was editor of the "Harvard Magazine." His class-day poem, far superior to most such performances, was especially noticed by James Russell Lowell, for its rare poetic qualities. After graduation he went to Beaufort, S. C., to superintend a plantation, and remained there until after the civil war, when he travelled extensively through the southern states to study their political position and prospects. He contributed a series of interesting letters to the New York "Nation" upon this subject, and on returning from his tour he became one of its editors. Besides writing frequently for the "Nation," Mr. Dennett was assistant professor of rhetoric at Harvard, and discharged the duties of that office with credit until compelled to resign on account of failing health.

DENNIE, Joseph, journalist, b. in Boston, 30 Aug., 1768; d. in Philadelphia, 7 Jan., 1812. He was graduated at Harvard in 1790, and studied law at Charlestown, N. H., where he was admitted to the bar, but ultimately devoted himself to literature. In 1775 he published a series of essays on life and literature, called "The Farrago," and edited in Boston "The Tablet," a weekly journal. In three months he removed to Walpole, N. H., where he edited "The Farmers' Weekly Museum," which attained much popularity under his management. He gathered around him a number of writers, each of whom contributed to a special department. Among his compositions was "The Lay Preacher," a series of essays, which gave their author reputation as a graceful and humorous writer, and were widely copied. In 1798 the publisher became bankrupt, and Dennie was persuaded to become a candidate for congress. He was defeated, and in 1799 went to Philadelphia to become private secretary to Thomas Pickering, secretary of state. He remained here a few months, and, after editing the "United States Gazette," became editor of the "Portfolio" in Philadelphia in 1801, in connection with Asbury Dickens. This was originally a weekly quarto, but in the course of five years it became a monthly octavo. Dennie continued to be its editor until his death, under the pen-name of "Oliver Old School." The staff of able writers, among whom were Charles Brockden Brown and John

Quincy Adams (whose "Letters from Silesia" were originally published in it), maintained the "Portfolio's" high reputation for many years. It was said, after the death of Brockden Brown, that Dennie was the only man in the country that made literature a profession. His appearance was described by Buckingham in this manner: "He was rather above the average height, and of slender frame; was attentive to his dress, appearing one May morning at the office in a pea-green coat, white vest, nankeen small-clothes, white silk stockings and pumps, fastened with silver buckles which covered at least half the foot from the instep to the toe." He wrote very rapidly, and deferred the preparation of his "copy" until the last moment. One of the best of his lay sermons was written at the village tavern, where he and his friends were amusing themselves with cards. It was delivered by piece-meal, at four or five different times, and if he happened to be engaged in a game, he would ask some one to play his hand for him while he "gave the devil his due." Dennie founded in Philadelphia the "Tuesday Club," which included most of the contributors to the "Portfolio." His work was confined principally to periodicals, but two collections of his writings were published—"The Lay Preacher, or Short Sermons for Idle Readers" (Walpole, N. H., 1796), and a volume of "The Lay Preacher," collected by John E. Hall (Philadelphia, 1817). He aimed to unite "the familiarity of Franklin with the simplicity of Sterne" in these ingenious essays.

DENNIS, George R., senator, b. in White Haven, Somerset co., Md., 8 April, 1822. He was graduated at the Polytechnic institute of Troy, N. Y., and entered the University of Virginia. He studied medicine at the University of Pennsylvania, was graduated there in 1842, and, after practising for several years, he retired and has since devoted his attention to agriculture. He was a delegate to the National convention that nominated Fillmore in 1856, and to the Democratic national convention in 1868, serving as one of the vice-presidents. He was elected to the Maryland state senate in 1854, to the house of delegates in 1867, and to the senate again in 1871. While filling this office he was elected U. S. senator from Maryland as a Democrat, serving until 1873.

DENNISON, William, war governor of Ohio, b. in Cincinnati, Ohio, 23 Nov., 1815; d. in Columbus, 15 June, 1882. His father was a prosperous business man, and had him prepared for college in the best schools of Cincinnati. He was graduated at Miami in 1835, studied law in Cincinnati, under the direction of Nathaniel Pendleton and Stephen Fales, and practised in Columbus until 1848, in which year he was chosen to the state legislature. About this period Mr. Dennison became interested in banking and in railroad affairs, and was president of the Exchange bank and president of the Columbus and Xenia railroad company. In 1856 he was a delegate to the first National convention of the Republican party. He was chosen governor of Ohio in 1860 by the Republicans, and delivered his first message to the general assembly in 1861. At his suggestion the legislature voted $3,000,000 to protect the state "from invasion and insurrection," and conferred power upon the executive to raise troops. Gov. Dennison was an anti-slavery man and an ardent admirer of President Lincoln. In response to his call for 11,000 troops, he offered 30,000, sending agents to Washington to urge their acceptance. He took possession of the telegraph lines and railroads in the name of the state, and seized money *in transitu* from Washington to Ohio, which he gave to the quartermaster-general to clothe and equip soldiers. Gov. Dennison was a delegate to the Republican national convention in 1864, and was elected chairman. He was appointed by President Lincoln postmaster-general in 1864, and continued in that office, under President Johnson, until his resignation in 1866. Gov. Dennison was a member of the National Republican convention at Chicago in 1880, and was leader of the friends of Senator John Sherman during the struggle for the nomination. He was also a candidate for senator in that year. He contributed largely to Dennison college, Granville, Ohio.

W Dennison

DENNY, Thomas, banker, b. in Leicester, Mass., in 1804; d. in New York city, 21 Oct., 1874. He was graduated at Harvard, with honors, in 1823, studied law in Boston, and was admitted to the bar, but soon removed to New York and engaged in mercantile pursuits. In 1852 he became a member of the Stock Exchange, and in 1858 formed the banking-house of Thomas Denny & Co. Mr. Denny took deep interest in the promotion of education and philanthropic and Christian effort. He was an active promoter of the College of the city of New York, and of the Free School for girls, in 12th street, in that city. He was one of the founders of the Society for improving the condition of the poor, a director of the New York juvenile asylum, trustee of the Society for the relief of the ruptured and crippled, and one of the managers of the City mission.

DENNY, William, deputy governor of Pennsylvania, from August, 1756, till October, 1759. On his arrival in the colony he was warmly welcomed; but his determination to obey the instructions of the proprietors soon rendered him unpopular. He had frequent disagreements with the colonial assembly, but his need of money finally became such that he signed a bill taxing the proprietary interests, which action led to his recall.

DENONVILLE, Jacques René de Brésay, Marquis de, French governor of Canada. In 1685 he succeeded De la Barre as governor of Canada, and retained that office for four years. He was a brave soldier, but his administration of the duties of his office was such as brought the French colony in Canada to the verge of ruin. Acting on the advice of Louis XIV., he, in 1687, sent forty-one of the warriors of the Five Nations across the ocean to be chained to the oar in the galleys of Marseilles, and followed up this act of cruelty with an unprovoked attack upon the Senecas. They and other Indians retaliated so successfully that, after the massacre of the French at Lachine, there was hardly a French post left between Three Rivers and Mackinaw. During the period of his governorship he found a most determined opponent to the French claims of territorial extension in Gov. Dongan, of New York, who, in opposing Denonville and the French, was acting contrary to the instructions he had received from King Charles

and James. It was Denonville who recommended the purchase of New York by the French.

DENT, Frederick F., lawyer, b. in Cumberland, Md., in 1786; d. in Washington, D. C., 15 Dec., 1873. He was trained in commercial pursuits, and became a merchant in Pittsburg and subsequently in St. Louis, accumulated wealth, and had a wide reputation for hospitality. He was the father of Mrs. U. S. Grant. In politics Mr. Dent was a rigid and aggressive democrat, his views coinciding with the Benton-Jackson school, and he held these opinions tenaciously to the last of his life. John W. Forney, in his "Anecdotes of Public Men," refers to him as a very interesting old gentleman, kind, humorous, and genteel, indicating an independent spirit in his views, and exhibiting a wonderfully retentive memory for by-gone days." Mr. Dent was a member of his son-in-law's household after Gen. Grant became commander of the National armies, and his farm, "White Haven," near St. Louis, became the General's property.—His son, **Frederick Tracy,** soldier, b. in White Haven, St. Louis co., Mo., 17 Dec., 1820. He was graduated at the U. S. military academy in 1843, made brevet 2d lieutenant, and served on frontier duty and in garrison prior to the Mexican war, which he entered in 1847. He was engaged in the siege of Vera Cruz, the capture of San Antonio, and the battles of Churubusco, where he was severely wounded, and Molino del Rey, receiving for gallant and meritorious conduct the brevets of 1st lieutenant and captain. He served thereafter on the Pacific railroad survey, on frontier duty in Idaho, in removing the Seminole Indians, and at various points in Texas, Virginia, and Washington territory, until he joined the Yakima expedition in 1856. He participated in the Spokane expedition in Washington territory, being engaged in the combat of "Four Lakes" in 1858, in that of Spokane Plain in the same year, and in the skirmish on that river. After frontier duty at Fort Walla Walla he became a member of the Snake river, Oregon, expedition, to rescue the survivors of the massacre of Salmon Fall (1860), at which time, 1863, he was promoted to the rank of major, and was in command of a regiment in the Army of the Potomac in 1863, in New York city called to suppress anticipated riots, from September, 1863, till January, 1864, serving as a member of the military commission for the trial of state prisoners from January till March, 1864, becoming then a staff officer with Lieut.-Gen. Grant, having the rank of lieutenant-colonel. Aide-de-camp during Grant's whole time as lieutenant-general, he was present in the battles and military operations of the Richmond campaign, and as military commander of the city of Richmond, and of the garrison of Washington, D. C., in 1865, and on the staff of the general-in-chief at Washington after 1866, as colonel, aide-de-camp, and secretary to President Grant during his first term. For his gallant and meritorious services in the field during the civil war he was brevetted brigadier-general U. S. A. and brigadier-general of volunteers. He was transferred to the 14th infantry in 1866, was made lieutenant-colonel of the 32d infantry in 1867, colonel of the 1st artillery in 1881, and at his own request, after forty years of service, was retired in December, 1883.—His brother, **Louis,** lawyer, b. in St. Louis in 1822; d. in Washington, D. C., 22 March, 1874, received a liberal education in his native city, and studied law. About 1850 he went to California, where he engaged in business, afterward holding the office of judge. In 1862 he returned to St. Louis, and from 1863 till 1867 was engaged in cotton-planting in Mississippi and Louisiana. He afterward practised law in Washington. During the reconstruction period he drifted into southern politics, having removed to Mississippi, and in 1869 was nominated for governor of that state by the National union republicans, a new party, organized on the basis of equal rights, general amnesty, and reconciliation; but, contrary to his own expectation and to those of his friends, he did not receive the support of the administration in the canvass. Prior to his nomination, President Grant wrote to him: "I would regret to see you run for an office and be defeated by my act; but, as matters now look, I must throw the weight of my influence in favor of the party opposed to you." Judge Dent replied, defending the claims of his party. Although the democrats made no nomination, but gave their votes to Mr. Dent, he received only half as many as his opponent, Gov. Alcorn, the regular republican nominee. After this he settled in Washington. In December, 1873, he became a Roman Catholic.

DENT, George, member of congress, b. in Maryland, about 1760. He received a classical education. He was a representative in congress from Maryland from 1793 till 1801, and was elected temporary speaker during the illness of Speaker Dayton, 20 April, 1798. President Jefferson appointed him in 1801 U. S. marshal for the Potomac district.

DENT, John Charles, Canadian journalist, b. in Kendall, England, 8 Nov., 1841. He became an attorney in 1865, subsequently a journalist, and was on the staff of the London "Telegraph." He emigrated to Canada, and was for a time on the staff of the Toronto "Globe." He edited the "Canadian Portrait Gallery" (1880), and is the author of "Canada since the Union of 1841" (1881); "The Story of the Upper Canada Rebellion" (1885–'6), and of other works.

DENT, John Herbert, naval officer, b. in Maryland in 1782; d. in St. Bartholomew's parish, Maryland, 31 July, 1823. He became a midshipman, 16 March, 1798, under Truxtun, in the frigate "Constellation," and was on board when she captured the French frigate "Insurgente," 1 Feb., 1799. He was appointed a lieutenant, 11 July, 1799, and was in the same ship when she took the French frigate "La Vengeance," 1 Feb., 1800. He was in command of the schooners "Nautilus" and "Scourge," in Preble's squadron, during the Tripolitan war, and took part in the attacks on the city of Tripoli in 1804. He was commissioned a master commander, 5 Sept., 1804, and a captain, 29 Dec., 1811.

DENTON, Richard, clergyman, b. in Yorkshire, England, in 1586; d. in Essex, England, in 1662. He was graduated at Cambridge in 1602, and was for seven years Presbyterian minister of Coley chapel, parish of Halifax, in the north of England. The act of uniformity compelled him to relinquish his charge and to emigrate to America, where he arrived in 1630, in company with John Winthrop and Sir Richard Saltonstall. He first went to Watertown, Mass.; then in 1635 he began the settlement of Wethersfield. In 1641 his name appears among the early settlers of Stamford, and in 1644 he is recorded as one of the original proprietors of Hempstead, L. I., where he established a Presbyterian church in 1644. In 1659 he returned to England, where he remained until his death. He wrote "Soliloquia Sacra," which was much praised by his contemporaries.—His son, **Daniel,** wrote "A Brief Description of New York" (London, 1670), which was republished in New York in 1845, with notes by Gabriel Furman. This book is supposed to be the first printed description in English of New York and New Jersey.

DENVER, James W., politician, b. in Winchester, Va., in 1818. He received a public-school education, emigrated in childhood with his parents to Ohio, removed to Missouri in 1841, where he studied law, and was admitted to the bar. He was appointed captain of the 12th infantry in March, 1847, and served in the war with Mexico till its close in July, 1848. Removing to California in 1850, he was appointed a member of a relief committee to protect emigrants, and was chosen a state senator in 1852. While a member of this body in 1852, he had a controversy with Edward Gilbert, ex-member of congress, in regard to some legislation, which resulted in a challenge from Gilbert, that was accepted by Denver. Rifles were the weapons, and Gilbert was killed by the second shot. In 1853 Mr. Denver was appointed secretary of state of California, and from 1855 till 1857 served in congress. He was appointed by President Buchanan commissioner of Indian affairs, but resigned, and was made governor of Kansas. Resigning this post in 1858, he was reappointed commissioner of Indian affairs, which office he held till March, 1859. In 1861 he entered the National service, was made brigadier-general, served in the western states, and resigned in March, 1863. Afterward he settled in Washington, D. C., to practise his profession as an attorney. John W. Forney, in his "Anecdotes of Public Men," says: "Gen. Denver, while in congress, as chairman of the committee on the Pacific railroad, in 1854–'5, presented in a conclusive manner the facts demonstrating the practicability of that great enterprise, and the advantages to be derived from it."

DE PALM, Joseph Henry Louis, baron, diplomatist, b. in Augsburg, Germany, 10 May, 1809; d. in New York, 21 May, 1876. His father was Colonel and Adjutant-General Baron Johan de Palm, prince of the Roman empire, and his mother the Countess Freyen von Seibolsdorf of Thunefeldt. The Baron de Palm was for a long time in the German diplomatic service, and was also chamberlain to the king of Bavaria. In 1862 he came to the United States and spent some time among the Indians in the northwest, and subsequently he resided in New York, where, a short time before his death, he joined the Theosophical society, to which he left his property. In accordance with his own wishes, his body was burned.

DE PAUW, John, lawyer, b. in Kentucky; d. in Indiana in 1838. His father, **Charles,** a native of Ghent, French Flanders, accompanied Lafayette to America, and fought in the war of the Revolution. When the son had reached manhood he removed from Kentucky to Washington county, Ind., and, as agent for the county, surveyed, plotted, and sold the lots in Salem. He was by profession an attorney-at-law, became a judge, and was also a general of militia.—His son, **Washington Charles,** manufacturer, b. in Salem, Ind., 4 Jan., 1822, was educated at Washington county seminary, and at the age of sixteen, by the death of his father, was thrown entirely on his own resources. When nineteen years of age he entered the office of the county clerk, and became subsequently clerk of circuit, probate, and common pleas courts, resigning in February, 1856. He afterwards engaged in milling, combining farming with this business, and also dealt extensively in grain. He has declined the nominations for lieutenant-governor and governor of Indiana, as well as other offers of political preferment, during the last thirty years. After ten years' incessant study, and the expenditure of half a million dollars, Mr. De Pauw finally succeeded in making plate-glass equal to any in the world, and has been successfully engaged in its manufacture in New Albany, Ind. He has become wealthy, and has used his means freely to enlarge the city of New Albany. He established and largely endowed De Pauw university, Greencastle, Ind., De Pauw female college, at New Albany, and has also expended large sums in building churches and endowing benevolent institutions throughout Indiana and the adjoining states.

DEPEW, Chauncey Mitchell, lawyer, b. in Peekskill, N. Y., 23 April, 1834. He is of French Huguenot descent, and was born in the old homestead that has been in the possession of his family for over 200 years. He was graduated at Yale in 1856, studied law, was admitted to the bar, and began his active work at an exciting period in our political life. He served in the New York assembly in 1861–'2, and during the second session was chairman of the ways and means committee, and also acted as speaker of the assembly during a portion of the time. He canvassed the state for Mr. Lincoln in 1860, and has taken part in almost every subsequent political contest. In 1863 he was elected secretary of state, but declined a re-election in 1865. He has held various other offices, including those of tax commissioner of New York city and minister to Japan, which he resigned very soon, to devote himself to his profession. In 1866 he was appointed attorney for the New York and Harlem railroad company, and when the Hudson river road was consolidated with the New York central, in 1869, Mr. Depew was again made the general counsel of the consolidated company. He was candidate for lieutenant-governor of the state on the Liberal Republican ticket in 1872, but was defeated. In 1874 he was the choice of the legislature for regent of the State university, and was also one of the commissioners to build the capitol at Albany. During the memorable contest in the assembly, after the resignation of Senators Conkling and Platt from the U. S. senate, and in the election of the successor to Mr. Platt, Mr. Depew was a candidate for eighty-two days, receiving over two thirds of the republican vote, but retired from the contest, that the election of Warner Miller might be assured. On the reorganization of the management of the New York central railroad in 1882, Mr. Depew was made second vice-president, and on the death of James Rutter, 14 June, 1885, was elected to the presidency. He is also president of the West Shore railroad company. Mr. Depew's successful directorship of railroads is largely due to the fact that he is master of all the details pertaining to the road and its policy, and zealously supervises its interests. He is president of the Union league club of New York, and of the Yale alumni association of that city. He has been successful as a lecturer, while his ability as an after-dinner speaker has won his most popular reputation. Among his more notable public addresses are those on the unveiling of the statue of Alexan-

der Hamilton, on the centennial of the formation of the New York State constitution, on the life and character of President Garfield, on the unveiling of the Bartholdi statue of Liberty, and on the thirty-second anniversary of the Young Men's Christian Association.

DE PEYSTER, Johannes, merchant, b. in Haarlem, Holland, about 1600; d. in New Amsterdam (now the city of New York) about 1685. The name was originally spelled "Peijster," "Peister," or "Pester." He came of a French Huguenot family that took refuge in the United Provinces about the time of the massacre of St. Bartholomew. He emigrated to this country on account of religious persecution. During the brief period in 1673–'4 in which the Dutch regained possession of New Netherland, he took a prominent part in the conduct of public affairs, and he was one of the last to take the oath of allegiance to the British crown on the final cession of the province to that power. Notwithstanding this, he still continued active in municipal affairs, under English supremacy, at different times serving as alderman and deputy mayor, but refusing the mayoralty on account of his ignorance of English. At the time of his death he was one of the wealthiest citizens of the province. Of his sons (besides Abraham, mentioned below), Johannes filled the mayor's chair; Isaac was a member of the provincial legislature; and Cornelius was the first chamberlain of the city of New York, besides acting in various other public capacities.—**Abraham,** chief justice, and eldest son of the preceding, b. in New York city, 8 July, 1658; d. there, 10 Aug., 1728. He was a merchant, and amassed much wealth. He was mayor of New York in 1691–'5, and subsequently became chief justice of the province and president of the king's council, in which latter capacity he acted (in 1701) as governor. He was also appointed colonel of the forces of the city and county of New York, and treasurer of the provinces of New York and New Jersey. The mansion erected by him in 1695, which at one time was the headquarters of Washington, remained standing until 1856. It occupied the site now partly covered by the buildings numbered 178 and 180 Pearl street. The bell presented by him to the Middle Dutch church, in Nassau street, a short time before his death, now hangs in the Collegiate church, on Fifth avenue and 29th street, and is in constant use. His eldest son, Abraham, was treasurer of the province from 1721 till 1767.—**Arent Schuyler,** soldier, grandson of Col. Abraham Schuyler, b. in New York city, 27 June, 1736; d. in Dumfries, Scotland, in November, 1832. He entered the 8th regiment of foot in 1755, served in various parts of North America under his uncle, Col. Peter Schuyler, and commanded at Detroit, Mackinac, and various places in Upper Canada during the American Revolutionary war. The Indian tribes of the northwest were then hostile to the British, but De Peyster, by his tact and the adoption of conciliatory measures, entirely weaned them from the colonists. Having risen to the rank of colonel, and commanded his regiment many years, he retired to Dumfries, where he resided until his death. During the French revolution he had a large share in enlisting and drilling the 1st regiment of Dumfries volunteers, one of the original members of which was Robert Burns, who dedicated to him his poem on "Life," and with whom he once carried on a poetical controversy in the columns of the Dumfries "Journal." His nephew, Capt. Arent Schuyler De Peyster, an American navigator, sailed several times around the globe, and, in a passage from the western coast of America to Calcutta, discovered in the South Pacific a group of seventeen islands, which bear his name.—**Abraham,** soldier, nephew of Arent Schuyler De Peyster, b. in New York city in 1753; d. in St. John, N. B., about 1799. He entered the British service, and rose to be captain in the 4th, or "King's" American regiment, ranking in the loyal militia as colonel. He was originally second in command at the battle of King's Mountain, S. C. (7 Oct., 1780), and succeeded to the command on the death of Maj. Ferguson. Capt. De Peyster had been paid off on the morning of the engagement, and, when he was struck by a bullet, its course was stopped by a doubloon among the coin in his vest-pocket. He was, however, wounded and taken prisoner. At the close of the war in 1783 he was placed on the half-pay list, retired to St. John, N. B., and was one of the grantees of that city. He also acted as treasurer of the province.—**Frederick,** soldier, brother of the preceding, b. in New York city. While still a minor he commanded a company raised for the protection of his uncle, William Axtell, a member of the council. He was subsequently a captain in the New York (loyalist) volunteers. While he was swimming a river on horseback in South Carolina, a bullet passed through both of his legs and killed the horse. At the storming of Fort Montgomery in 1777, a detachment of his regiment was the first to enter the works. Like his brother Abraham, he settled in St. John, N. B., after the war, and received the grant of a city lot. In 1792 he served as a magistrate in the county of York. He afterward returned to the United States.—**James,** soldier, brother of the preceding, b. in New York city; d. in battle in Flanders, 18 Aug., 1793. He was captain-lieutenant, or lieutenant commanding the colonel's company, in the 4th, or "King's" American regiment, entering the service when nineteen years of age. In 1786 he was commissioned 1st lieutenant in the Royal artillery, commanded by his brother-in-law, Col. James. At that time he had the reputation of being one of the handsomest men in the British army. He was killed, near Menin, during the campaign in Flanders. The month previous he had a remarkable escape from death at the siege of Valenciennes, being buried alive by the explosion of a mine.—**Frederic,** Jr., lawyer, son of Frederick, b. in New York city, 11 Nov., 1796; d. in Tivoli, N. Y., 17 Aug., 1882. He was graduated at Columbia in 1816, and admitted to the bar in 1819. In 1820 he had been appointed master in chancery, and held the office until 1837, when his inherited fortune had been so largely increased by judicious investments that he was compelled to resign his office and devote himself to the management of his estate. He was at various periods a trustee of the Bible society, and served on the boards of management of many charitable and educational institutions, besides giving liberally to their support. He was at different times president of the New York historical society, a founder and director of the Home for incurables, and vice-president of the Society for the prevention of cruelty to children, founder of the Soldiers' home erected by the Grand Army of the Republic, and a trustee of the New York society library. In 1867 he received the degree of LL. D. from Columbia, and in 1877 was elected an honorary fellow of the Royal historical society of Great Britain. Several of his addresses have been published in pamphlet-form.—**John Watts,** son of the preceding, author, b. in New York city, 9 March, 1821. He was educated at Columbia, but was not graduated on account of his health. In 1845 he was elected to the colonelcy of the 111th

regiment of New York militia, and, on the military reorganization of the state, he was assigned to the command of the 22d district, and in 1851 was promoted brigadier-general. In 1855 he was appointed adjutant-general, which office he soon resigned, but in April, 1866, was brevetted major-general. Gen. De Peyster assisted in the organization of the present police force of the city of New York, and is the author of a series of reports in favor of a paid fire department, with fire-escapes and steam-engines (1852–'3). He has been a voluminous contributor to periodical literature, besides writing numerous works on military topics. Among the latter are "Life of Field-Marshal Torstenson" (1855); "The Dutch at the North Pole" (1857); "Caurausius, the Dutch Augustus" (1858); "Life of Baron Cohorn" (1860); and "Personal and Military History of Gen. Philip Kearny" (1869).—**John Watts,** Jr., soldier, son of the preceding, b. in New York, 2 Dec., 1841; d. there 12 April, 1873. In March, 1862, he left the law-school of Columbia college and joined the staff of Gen. Philip Kearny as volunteer aide, participating in the battle of Williamsburg. He for a time commanded a company of New York cavalry, was afterward major of the 1st New York artillery, and still later served on the staff of Gen. Peck. He was then prostrated by fever, and, after a severe illness of several months, returned to the field in the winter of 1863. For his zeal, capacity, and energy, displayed in the Chancellorsville campaign and in the battle of Fredericksburg, he was promoted to be lieutenant-colonel and colonel. He remained with the army until midsummer of the same year, when his increasing weakness compelled him to resign.

DE PUY, Henry Walter, lawyer, b. in Pompey Hill, Onondaga co., N. Y., in 1820; d. 2 Feb., 1876. He studied law, and was admitted to the bar of New York. He was private secretary to Gov. Horatio Seymour during his term of 1853–'4, and subsequently served as U. S. consul at Carlsrühe, and as secretary of legation at Berlin in 1854, which place he resigned to take part in the political struggle of 1860. From President Lincoln he received the appointment of secretary of the state of Nebraska, organized that territory, and served as the first speaker of its legislature. He was also Indian agent to the Pawnees, under President Lincoln, and devoted much time and energy to reform the Indian service of the government. For several years he edited and published a newspaper in Indianapolis, Ind., in support of the liberal party, being a warm friend of Gov. Chase. He was a constant contributor of political articles to the press, the author of several popular poems, and of the following works: "Kossuth and his Generals," with a brief history of Hungary (New York, 1851); "Louis Napoleon and his Times," with a memoir of the Bonaparte family (1853); "Ethan Allen and the Green Mountain Heroes of '76," with the early history of Vermont (1853); and "Threescore Years and Beyond" (1873).

DEQUEN, John, missionary, b. in France in the early part of the 17th century; d. in Quebec in 1659. He came to Canada in 1635, and labored chiefly in Quebec. He was superior of the Jesuits of Canada from 1656 till his death, which was occasioned by his devotion to the sick during a season of pestilence. He was the author of the "Relation de la nouvelle France" for 1656.

DERBIGNY, Pierre Auguste Charles Bourisgay, fifth governor of Louisiana, b. in France; d. in New Orleans, 6 Oct., 1829. Compelled to leave France during the Revolution, he first went to Santo Domingo, and thence to the United States, living for a while in Pittsburgh, Penn., where he married the sister of Chevalier de Lozier. He removed to Missouri and to Florida, and finally settled in Louisiana. In 1803 he acted as Mayor Borsée's secretary, and in the latter part of the same year his linguistic acquirements led Gov. Claiborne to appoint him interpreter of languages for the territory. During Gov. Claiborne's administration in January, 1805, the petition of "the merchants, planters, and other inhabitants of Louisiana," signed by Destréleau, Sauvé, and Derbigny, their delegates, was read and referred in the U. S. senate. The delegates in this memorial energetically insisted on the rights of the inhabitants of Louisiana to be promptly admitted into the confederacy as citizens of a sovereign state. But, notwithstanding their zeal and the ability displayed by them, Derbigny and his coadjutors were not successful in their efforts. In March, however, an act was approved "providing for the government of the territory of Orleans." The three agents set forth their views in a sensational pamphlet, having been convinced that the government was uncandid to the agents and unjust to the inhabitants of Louisiana. Mr. Derbigny afterward held other offices in the state, such as clerk of the court of common pleas, secretary of the legislative council, member of the lower house of the first state legislature, and judge of the supreme court. He delivered the first fourth-of-July oration made in the territory, and was appointed in 1820, with Livingstone and Moreau, to revise the laws of Louisiana; in the same year receiving the first license to run a steam ferry across the Mississippi at New Orleans. As a personal friend of Gen. Lafayette, he was his representative in legal and business affairs in Louisiana until his death, when Lafayette's power of attorney was transferred to the son, Charles Derbigny. In 1828, when Gov. Johnson's term of office expired, he was succeeded by Pierre Derbigny, the first year of whose administration was marked by the visit to New Orleans of Gen. Jackson, who had been invited by the legislature to participate in the celebration of the anniversary of his victory of 8 Jan., 1815. Gov. Derbigny was killed, soon after the expiration of his first year as state executive, by being thrown from his carriage.

DERBY, James Cephas, publisher, b. in Little Falls, N. Y., 20 July, 1818. He was educated at the grammar-school in Herkimer, N. Y. He was apprenticed to the book-selling business in Auburn, N. Y., in 1833, and afterward was in business on his own account, both there and in New York city. Among the American authors whose works he published were the Cary sisters, B. P. Shillaber, S. G. Goodrich, Henry Wikoff, Henry Ward Beecher, Augusta J. Evans, Thomas Bailey Aldrich, and Marion Harland. He retained for years the friendship of such men as William H. Seward, Alexander H. Stephens, and Horace Greeley. He is himself the author of "Fifty Years among Authors, Books, and Publishers" (New York, 1884).

DERBY, Richard, merchant, b. in Salem, Mass., 12 Sept., 1712; d. there 9 Nov., 1783. In 1736 he was master of the sloop "Ranger," sailing from Salem for Cadiz and Malaga, and in 1742 master and part owner of the "Volant," bound for Barbadoes and the French islands. In 1757 Capt. Derby appears to have retired from the sea, relinquished his vessels to his sons John and Richard, and become a merchant of Salem. His vessels were exposed not only to the dangers of the sea but also to the French and English cruisers. During the French war, 1756–'63, he

owned several ships and brigantines. He took a decided part in seeking redress from the British ministry for wrongs done to American shipping by English privateers. From 1769 till 1773 he was a member of the general court, in 1774, 1776, and 1777 a member of the governor's council. In 1774–'5, his son Richard was a delegate to the Provincial congress. In the narrative of the march of Leslie to Salem it is related that Capt. Derby was owner of some of the cannon that Col. Leslie desired to seize. Meeting the old gentleman before his house in Salem, he demanded the surrender of the cannon, and "urged him to deliver them up without resistance." Derby's reply was as significant as that of the old Spartan: "Find them, if you can! take them, if you can! they will never be surrendered!" His widow founded the Derby academy, at Hingham. His eldest son, Richard, was an ardent patriot; and another of his sons, John Derby, was an owner of the ship "Columbia," which, on her second voyage, discovered Columbia river. By a remarkable concurrence of events, and by the uncommon speed of two ships, owned by his father and brother, he carried to England the first news of the battle of Lexington, returned to Salem with the first intelligence of the effect it produced in London, which he laid before Gen. Washington, at Cambridge, and at the close of the war brought to America from France the first news of peace. —His son, **Elias Hasket,** merchant, b. in Salem, Mass., 16 Aug., 1739; d. there, 8 Sept., 1799. In early life he kept the books and conducted the correspondence of his father, and he seems to have been the accountant of his family. From 1760 till 1775 he not only took charge of the books, wharves, and other property, but, imbibing the spirit of his father, and acquiring through him and his captains a knowledge of commerce, he engaged extensively in trade with the English and French islands. He made important improvements in shipbuilding, and warmly espoused the cause of the colonists. He loaned the government a large proportion of the supplies for the army, furnished boats for the troops, furnished the French fleet with coal, and was the leader in building a frigate for the nation. He was also extensively and successfully engaged in privateering against British commerce. As the war progressed, he established ship-yards, studied naval architecture, and built a class of vessels superior in size, model, and speed to any previously launched in the colonies, which were able to cope with a British sloop-of-war. He united with his townsmen in the equipment of 158 private armed vessels fitted out at Salem, mounting more than 2,000 guns. In 1784 he opened the trade to St. Petersburg, and from 1785 till 1799 there is record of his sending at least 37 different vessels on 125 voyages, of which 45 were to the East Indies or China. In 1791 he embarked in the regular trade with India, and is called the father of American commerce with that country. After this his ships made many voyages to foreign ports. He first displayed the American flag before the fortress of Calcutta, and his were the first American ships that carried cargoes of cotton from Bombay to China. In 1798, under President John Adams, a navy was begun, and Mr. Derby contributed $10,000 of the $75,000 raised by citizens at once. Its establishment was the result of Mr. Derby's advice to the president and congress, which body in June passed an act authorizing the president to accept such vessels as citizens might build for the national service, and to issue a six-per-cent stock to indemnify the subscribers. Though the war seriously impaired the trade and fortunes of ship-owners, yet at Mr. Derby's death he left an estate that exceeded $1,000,000, supposed to be the largest fortune in this country during the last century; but he had contributed still more to the growth of his town, state, and the commerce of his country. His mansion, which he had occupied but a few months previous to his death, required an expensive style of living, and in consequence many of the buildings and gardens were closed for years after his death, and finally gave way to the Salem square and market-space that now bear the name of Derby.—His eldest son, **Elias Hasket,** Jr., merchant, b. in Salem, Mass., 10 Jan., 1766; d. in Londonderry, N. H., 16 Sept., 1826. His father showed high appreciation of his services, as having, by two important voyages, contributed largely to his fortune—the one to the isle of France, the other to Naples. For ten years after his father's death he occupied the paternal mansion, but, finding his fortune impaired by the requirements of its luxurious appointments and the adverse course of trade, he resumed business. On one voyage from London to Lisbon he found that large flocks of merino sheep had crossed the mountains to escape the French armies, and determined to take a flock to the United States. Until this period the export of merinos had been prohibited in Spain. The wool of this country was so coarse that an English traveller had predicted it would never rival England in cloth. Gen. Derby embarked with a flock of 1,100 merinos of the Montarco breed, and in 1811 landed them in New York, whence they were sent to his farm, "Ten Hills," near Boston. During the war he established the first broadcloth loom ever erected in the state. He remained a year in the isle of France in charge of his father's vessel, and was the first to display our ensign in the ports of Bombay and Calcutta, establishing the trade in those parts. After a residence of three years in India, the result of one of his voyages was a profit of $100,000 to his father. Soon afterward he sent a ship on the first voyage from the United States to Mocha, in the Red Sea. The children of the senior Elias Hasket completed the Derby wharf in Salem, extending it 2,000 feet into the harbor, contributed largely to the construction of a bridge and avenue, and levelled and improved the common. He received an honorary degree from Harvard university in 1803.—His eldest son, **Elias Hasket,** lawyer, b. in Salem, Mass., 24 Sept., 1803; d. in Boston, Mass., 30 March, 1880, was graduated with high honors at Harvard in 1824, studied law with Daniel Webster, began practice in Boston in 1827, and attained reputation as a railroad attorney. Before legislative committees he encountered successfully the ablest counsel of the state, and secured the extension of many important lines of road. To his unremitting efforts was largely due the construction and completion of the Hoosac tunnel. He was also zealous in his efforts to secure the construction of iron-clad vessels during the civil war, and was active in promoting the commercial interests of Boston. As U. S. commissioner in 1867, Mr. Derby transmitted to Sec. Seward an exhaustive report on the relations of the United States with the British provinces and the condition of the question of the fisheries. It was largely through his efforts that the use of jute was introduced into the United States. He was the author of "Two Months Abroad" (Boston, 1844); "Catholic Letters" (Boston, 1856); "The Overland Route to the Pacific," and numerous articles in periodicals and newspapers, some of them under the pen-name of "Massachusetts."—**George,** sanitarian, nephew of Elias Hasket, Jr.,

b. in Salem, Mass., 13 Feb., 1819; d. in Boston, Mass., 20 June, 1874, was graduated at Harvard in 1838 in the collegiate department, and in 1843 in the medical school, and began practice in Boston, giving much attention to sanitary science. He had acquired a lucrative practice and a wide reputation by his writings on sanitary subjects before he entered the army in November, 1861, at which time he was commissioned surgeon in the 23d Massachusetts volunteers, serving for four years, and holding several important offices, among them those of medical inspector of the Department of Virginia and North Carolina, and surgeon-in-chief of divisions, finally attaining the rank of brevet lieutenant-colonel of volunteers. His services were regarded as most valuable, not only to his regiments but to the health and sanitary condition of the army, and the government gave him the last-named commission when his health had compelled him to leave the army. After the war he was appointed to the command of the Soldiers' hospital at Augusta, Me., but he returned to Boston in 1866, was appointed one of the surgeons at the City hospital, and early set about the establishment of a state board of health, of which he was secretary and executive officer from January, 1866, until his death. In 1872 he was appointed to the new professorship of hygiene at Harvard medical college. His eight health registration reports were published, and gave rise to new views and reforms in sanitary science. He published a series of articles in the annual report of the Massachusetts board of health, which brought him to the notice of sanitarians at home and abroad. He issued a treatise on "Anthracite and Health" (Boston, 1868).—George's half-brother, **John Barton,** author, b. in Salem, Mass., 13 Nov., 1792; d. in Boston in 1867, was graduated at Bowdoin in 1811, studied law in Northampton, Mass., and began practice in Dedham. In the latter part of his life he lived in Boston, where he held a subordinate office in the custom-house, and afterward became a familiar object in State street, gaining a precarious living by selling razors and other small wares, and amusing himself by writing poetry. He published "Musings of a Recluse" (Boston, 1837); "The Sea" (1840); and "The Village" (1841).—John Barton's son, **George Horatio,** soldier, b. in Dedham, Mass., 3 April, 1823; d. in New York, 15 May, 1861. He was graduated at West Point in 1846, and made brevet 2d lieutenant of ordnance. He was transferred in 1846 to the corps of topographical engineers, and later in the same year served as assistant on the survey of New Bedford harbor, Mass. In the war with Mexico he served at the siege of Vera Cruz, was severely wounded in the battle of Cerro Gordo, and for gallant and meritorious conduct in that battle was brevetted 1st lieutenant. After his official duties as assistant in the topographical bureau in Washington, he conducted various surveys, 1847–'8, and also explorations in Minnesota territory, 1848–'9, and in the Departments of the Pacific and Texas, 1849–'52. He had charge of the survey and improvements of San Diego harbor, California, 1853–'4, was on the staff of the commanding general of the Department of the Pacific, and of military roads in the same division in 1854–'6, and was coast surveyor and light-house engineer in 1856–'9. He rose to the rank of captain of engineers, and for two years was employed by the government in erecting light-houses on the Florida and Alabama coast. In the discharge of his duty in Florida he suffered a sunstroke, which affected his sight and caused softening of the brain, from which he died after his removal to New York. Under the pen-name "John Phœnix" he wrote a series of sketches and burlesques, which were published with the title of "Phœnixiana" (New York, 1855). He was also the author of "The Squibob Papers" (1859), under which name other of his articles were published after his death.

DE ROSSET, Armand John, physician, b. in Wilmington, N. C., 17 Nov., 1767; d. there, 1 April, 1859. He was the son of Moses John De Rosset, of London, and Mary Ivie, a native of the West Indies. In 1784 he was matriculated at Princeton. At the close of the first session of his collegiate course, a fellow-student, Robert Goodloe Harper, observing his rigid economy and close attention to duties, and his determination to remain at the college during vacation, for want of funds to defray the expenses of the journey home, offered to be his teacher in the studies of the next year. The offer was gladly accepted, and at the opening of the next session De Rosset was promoted to an advanced class, completing his course in three years. While at the medical college he enjoyed the friendship of Dr. Benjamin Rush, with whom he held a long correspondence, many copies of the letters of the latter being still in the possession of the family. He was appointed by the president of the United States to be post-physician, which office he held for many years. During two or more terms he served in the town government. His writings were confined to communications to medical publications, no copies of which are known to exist. A pamphlet, "De febribus intermittentibus," a Latin thesis, delivered at his graduation, was published in 1790.—His son, **Moses John,** physician, b. in Wilmington, N. C., 11 Jan., 1796; d. there, 30 June, 1826, was graduated at the New York medical college in 1817 or 1818. He was associated in practice with his father from 1818 until his death.—His daughter, **Mary Jane,** married the Rev. Moses Ashley Curtis, the botanist.—His son, **Armand John,** physician, b. in Wilmington, 6 Oct., 1807, attended the medical college of Charleston, S. C., in 1826–'7, and was graduated at the medical department of the University of Pennsylvania in 1827. He practiced his profession in Wilmington from 1828 till 1837, when he engaged in mercantile affairs, which he relinquished a few years since.—His grandson, **Moses John,** physician, b. in Pittsboro, N. C., 4 July, 1838; d. in Wilmington, 1 May, 1881, in youth showed remarkable aptitude for languages and mathematics. He passed three years in Geneva at the famous school of Diedrich, and spent six months in Cologne to perfect himself in German. He was graduated at the medical department of the University of New York in 1859, was appointed resident physician at Bellevue hospital, New York, and entered upon the duties in 1859. At the beginning of the civil war he entered the Confederate army as assistant surgeon, and, after serving through Stonewall Jackson's valley campaign, was promoted to full surgeon, and assigned to duty in Richmond. Subsequently he was detached as inspector of hospitals of the Department of Henrico. At the close of the war he moved to Baltimore, where he was appointed adjunct professor of chemistry in the medical department of the University of Maryland. He was also professor of chemistry in the dental college in that city. He here prepared himself for practice in diseases of the eye and ear, and in 1873 removed to Wilmington, N. C., and devoted himself to this specialty, and became a contributor to the "North Carolina Medical Journal." He removed to San Antonio, Texas, on account of his health, but, find-

ing no relief, returned to Wilmington in September, 1881. During his residence in Baltimore he published a translation of Bouchardat's "Annual Abstract of Therapeutics, Materia Medica, Pharmacy, and Toxicology for 1867." His writings were chiefly contributions to medical journals, his last regular paper being communicated to the "American Journal of the Medical Sciences" for October, 1878, entitled "The Muscle of Accommodation, and its Mode of Action." He devised a new and efficient form of inhaler for anæsthesia, and a new form of canule scissors for operating within the eye. He demonstrated by frozen section that after the extraction of the lens the lenticular fossa disappears, and the anterior surface of the vitreous becomes convex.

DE ROTTENBURG, baron, British soldier, b. about 1756; d. in England in 1832. After serving in the British army in different parts of the world and attaining the rank of brigadier-general in May, 1810, he was transferred to the staff in Canada. He took command of the garrison of Quebec, and the same year was promoted to major-general. At the beginning of the American war in 1812 he was assigned to the Montreal district, took command of the force in Upper Canada in 1813, and was appointed also administrator of that province. In 1814–'5 he commanded the left division of the army in Canada, and in September of the latter year returned to England.—His son, who became Baron De Rottenburg at his father's death, was b. about 1807. He entered the British army as a cornet in 1825, and in 1837 served in Canada during the rebellion, and received the brevet rank of major. Subsequently he served in the 46th foot, and was nominated as assistant adjutant-general in Canada. In July, 1855, he was appointed adjutant-general of the militia of Upper Canada, which rank he retained until June, 1858, when he was appointed to the lieutenant-colonelcy of the 100th regiment (Canadian), recently organized and embodied in the British army.

DE RUSSY, Louis G., soldier, b. in New York in 1796; d. in Grand Ecore, La., 17 Dec., 1864. He was graduated at the U. S. military academy in 1814, and made 3d lieutenant in the 1st artillery. He served in the war of 1812–'5, with Great Britain, as acting assistant engineer in erecting temporary defences for New York city and its environs, and was in garrison in New York harbor in 1815–'6, when he was made battalion adjutant of artillery. In 1819 he became topographer of a commission to establish the northern boundary of the United States under the treaty of Ghent. He became captain of the 3d artillery in 1825, and in the following year was made paymaster and major. In 1842 he was dropped from the army, and became a planter at Natchitoches, La. In 1846 he served in the Mexican war at Tampico, and became colonel of the 1st Louisiana volunteers. He completed the defences of the place, opened a new channel to Tamessie river, held various civil offices, and was engaged in the fight at Callabosa river and in the skirmish of Tantayuka. He was a civil engineer from 1848 till 1861, employed in making improvements in navigation, and from 1851 till 1853 was a member of the Louisiana house of representatives, and from 1853 till 1855 of the senate. He was major-general of Louisiana militia from 1848 till 1861, when he entered the Confederate army.

DE RUSSY, René Edward, soldier, b. in New York city in 1791; d. in San Francisco, 26 Nov., 1865. He was a son of Thomas De Russy, of St. Malo, France, who came to New York in 1791, and removed to Old Point Comfort, Va., where he resided many years. The son was graduated at the U. S. military academy in 1812, and made 2d lieutenant of engineers. He served in the war of 1812–'5, with Great Britain, as assistant engineer in constructing defences at New York and at Sackett's Harbor, N. Y., and participated in the campaigns on the St. Lawrence and Lake Champlain. In 1814 he was brevetted captain for gallant conduct at the battle of Plattsburg. He was chief engineer of Gen. Macomb's army in 1814, and captain of the corps of engineers in 1815. He was assistant engineer in the construction of the fort at Rouse's Point, N. Y., in 1816, superintending engineer of the repairs and construction of fortifications in New York harbor in 1818, and of defensive works on the Gulf of Mexico in 1821. In 1824 he was brevetted major. He was superintendent of the U. S. military academy from 1833 till 1838, and lieutenant-colonel of engineers from 1838 till 1863. At the beginning of the civil war he was ordered to the defence of the Pacific coast, and constructed the fortifications of San Francisco harbor. He was also president of the board of engineers for devising projects and alterations in the land defences of San Francisco. In 1865 he was brevetted major-general in the U. S. army for long and faithful service.—His son, **Gustavus Adolphus,** soldier, b. in Brooklyn, N. Y., 3 Nov., 1818, having been three years at West Point, was appointed from Virginia, 2d lieutenant in the 4th U. S. artillery, 8 March, 1847. He served in the Mexican war, having been brevetted 1st lieutenant "for gallant and meritorious conduct" at Contreras and Churubusco, and captain, 13 Sept., 1847, for gallantry at Chapultepec. He was regimental quartermaster from 1847 till 1857, and stationed at Fort Monroe in 1848. He was made 1st lieutenant, 16 May, 1849; captain, 17 Aug., 1857; brevet major, 25 June, 1862, for bravery displayed in the action near Fair Oaks, Va.; brevet lieutenant-colonel, for the same cause in the battle of Malvern Hill, and brevet colonel, 17 March, 1863. He was promoted to be brigadier-general of volunteers, 23 May, 1863; brevet colonel, 13 March, 1865 (for services in the war of the rebellion); and brevet brigadier-general, for the same cause, on the same day. He was mustered out of the volunteer service, 13 Jan., 1866; promoted to be major in the regular army, 26 July, 1866; lieutenant-colonel, 25 Aug., 1879; colonel 30 June, 1882; and was retired by operation of law, 3 Nov., 1882.

DESANDROUINS, Vicomte, French engineer, b. 12 Dec., 1740. He accompanied Montcalm to Canada in May, 1756, as captain of the royal engineers, and became his aide and military secretary. He was engaged in the defence of Ticonderoga and in the subsequent operations in Canada. From 1780 till 1783 he was chief engineer in Rochambeau's army in this country, was brigadier-general of infantry, 5 Dec., 1781, and chef de brigade of the engineer corps. In 1789 he was a chevalier of Malta, and a member of the National assembly from Calais and Ardres.

DESAULNIERS, Louis Léon L., Canadian physician, b. in Yamachiche, province of Quebec, 16 Feb., 1823. He was educated at Nicolet seminary, and at Harvard, where he was graduated in 1846. He was lieutenant-colonel of volunteers of the county of St. Maurice, and was elected to the Canadian assembly for this constituency in 1854, serving from that time till 1857, and again from 1861 till 1867. In 1868 he resigned to accept the office of inspector of prisons and asylums for the province of Quebec. He was elected to the Dominion parliament in 1878, and again in 1882.

DE SAUSSURE, Henry William, jurist, b. in Pocotaligo, S. C., 16 Aug., 1763; d. in Charleston, 29 March, 1839. He was descended from an ancient family of Lorraine, France. His grandfather, Henry, emigrated to South Carolina in 1730, and Daniel, his father, took an active part in the Revolution, and was president of the state senate in 1790–'1. Henry William served as a volunteer during the siege of Charleston in 1780, and passed two months in a prison-ship. He was then sent to Philadelphia to be exchanged, studied law with Jared Ingersoll, and was admitted to the bar of Philadelphia in 1784, and in 1785 to that of Charleston. He was a delegate to the South Carolina constitutional convention of October, 1789, and in 1791 was a member of the legislature. In 1794 President Washington appointed him director of the U. S. mint. When dining with him on one occasion, Gen. Washington said: "I have long desired to see gold coined at the Mint, but your predecessor found insuperable difficulties. I should be gratified if it could be accomplished." The director replied, "I will try"; and a few weeks afterward he carried to the president a handful of gold eagles, the first gold coined at the Mint of the United States. He resigned the office in November, 1795, and received from Washington an autograph letter regretting his determination to retire, and expressing "entire satisfaction" with his administration. He then returned to the practice of the law in South Carolina, and was elected a chancellor of the state in 1808. From 1809 till 1829 the number of decrees in the circuit court of equity and the court of appeals was 2,888, and of these Chancellor De Saussure delivered 1,314. In 1837 his health became impaired, and he resigned. Gov. Butler, in communicating to the legislature the resignation of the chancellor, said: "He has occupied, and now occupies, a striking position to the people of the present generation. He is the last of the Revolutionary patriots who has held office under the authority of the state." He published "Reports of the Court of Chancery and Court of Equity in South Carolina from the Revolution till 1813" (4 vols., Columbia, S. C., 1817–'9; revised ed., 2 vols., Philadelphia).—His grandson, **Wilmot Gibbes,** lawyer, b. in Charleston, S. C., 23 July, 1822; d. 1 Feb., 1886, was graduated at South Carolina college in 1840, and admitted to the bar in 1843. He was a member of the legislature for ten years, was in command of the state troops that took possession of Fort Moultrie when Maj. Anderson evacuated it in December, 1860, as lieutenant-colonel was in command of the artillery on Morris Island during the bombardment of Fort Sumter in April, 1861, and was treasurer, and subsequently adjutant and inspector-general, of South Carolina. He was president of the state society of the Cincinnati, the St. Andrews society, the Charleston library society, the St. Cecilia society, and the Huguenot society of South Carolina. His published addresses include "The Stamp-Act of Great Britain, and the Resistance of the Colonies," showing that South Carolina, on 26 March, 1776, adopted a constitution by which the royal government ceased to exist there; "The Causes which led to the Surrender of Cornwallis at Yorktown"; "The Centennial Celebration of the Organization of the Cincinnati"; "Memoir of Gen. William Moultrie"; and "Muster-roll of the South Carolina Soldiers of the Continental Line and Militia who served during the Revolution." He also prepared an address on the celebration by the Huguenot society of America of the bicentennial anniversary of the revocation of the Edict of Nantes (New York, 1885).

DES BARRES, Joseph Frederick Wallet, English soldier, b. in 1722; d. in Halifax, N. S., 24 Oct., 1824. He came of a French family that fled to England on the revocation of the Edict of Nantes. After studying under the Bernoullis, he entered the Royal military college at Woolwich, and after graduation embarked, in March, 1756, for America, as lieutenant in the 60th foot. He commanded for a time a corps of field artillery, which he had himself recruited in Pennsylvania and Maryland, and in 1757 led a volunteer detachment against Indians who had attacked Schenectady, captured the chiefs, and won them over to the English. He distinguished himself as an engineer at the siege of Louisburg, in 1758, and at the siege of Quebec was aide-de-camp to Gen. Wolfe. That officer received his mortal wound while Des Barres was making a report to him, and fell, dying, in the arms of his aide. In 1760, and afterward, Des Barres conducted the engineering operations for the defence of Quebec and the reduction of Fort Jacques Cartier and other French strongholds, thus completing the conquest of Canada. He afterward made designs and estimates for fortifying Halifax, and in 1762 was directing engineer and quartermaster-general in the expedition for retaking Newfoundland, receiving public thanks for his services. He was then sent to New York to report on the expediency of establishing a chain of military posts through the colonies, and from 1763 till 1773 was engaged in surveying the coast of Nova Scotia. He returned to England in 1774, was thanked by the king for his services, and was selected by Lord Howe to prepare charts of the North Atlantic coast. Having adapted the surveys of Holland, De Brahm, and others to nautical purposes, he published them under the title "The Atlantic Neptune" (2 vols., 1777). He was made governor of Cape Breton in 1784, and given the military command of that and Prince Edward Island, founded the town of Sydney, and opened and worked the valuable coal-fields at the entrance of the river. In this office he was also engaged in aiding the royalists of the United States, and removing them from the country after the Revolution. He was made lieutenant-governor and commander-in-chief of Prince Edward Island in 1804. Even in his ninety-fifth year he was lithe and active, and planned a five years' tour in Europe. He was Capt. Cook's teacher in navigation. He wrote a work on "Cape Breton," which was printed privately (London, 1804), but afterward suppressed.—His grandson, **William Frederick,** Canadian jurist, b. at the Elysian Fields, Cumberland, Nova Scotia, 14 Feb., 1800; d. in Halifax, N. S., 16 June, 1885, was educated at the old Halifax grammar-school, studied law, and was admitted to the bar in 1821. He settled at Guysboro', and soon attained a leading place in his profession. From 1836 till 1848 he represented Guysboro' in the Nova Scotia assembly, and held the office of solicitor-general in Howe's government. In 1848 he was appointed a puisne judge of the supreme court of Nova Scotia, retaining his seat on the bench till 1881. He was the first liberal in politics appointed to a supreme court judgeship in Nova Scotia.

DESCHAMPS, Isaac, jurist, b. in 1723; d. 11 Aug., 1801. He was of Swiss extraction, and in early life settled in Nova Scotia. In 1754 he was clerk at Fort Edward (Windsor), and aided in suppressing the disturbance of the Acadian French in that year. He was a member of the assembly in 1761, and justice of the court of common pleas for Kings county. In 1768 he was judge of Prince Edward Island, and from 1770 till 1785 of the su-

preme court of Nova Scotia. He was clerk of the assembly in 1772, and appointed councillor in 1783.

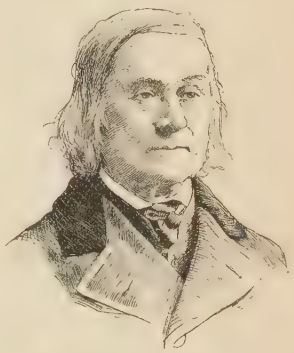
DESHA, Joseph, soldier, b. in Pennsylvania, 9 Dec., 1768; d. in Georgetown, Ky., 13 Oct., 1842. He removed to Kentucky in 1781, served in the Indian wars under Gens. Wayne and Harrison in 1794, and fought at the battle of the Thames in 1813 as a major-general. He was at one time a member of the Kentucky legislature, and was elected to congress, serving from 26 Oct., 1807, till 3 March, 1819. He was governor of Kentucky from 1824 till 1828.—His brother, **Robert,** soldier, b. in Pennsylvania; d. in Mobile, Ala., 8 Feb., 1849, removed to Tennessee in early life, served in the war of 1812 as captain of the 24th infantry, was brevetted major for services in the attempt to capture Fort Mackinaw, 4 Aug., 1814, and promoted brigadier-major in the following October. From 3 Dec., 1827, till 3 March, 1831, he was a representative in congress from Tennessee. He afterward became a merchant in Mobile, Ala.

DESHON, George, missionary, b. in New London, Conn., 30 Jan., 1823. He was graduated at the U. S. military academy in 1843, being classmate and room-mate of Gen. Grant. He had stood next to the head of his class, and after graduation was for some time instructor in mathematics and ethics. He reached the rank of captain in the army, but left it on his conversion to the Catholic faith in 1851. He studied theology in Cumberland, Md., and was ordained priest in 1855. Having joined the Redemptorist order, he was sent on several missions, and was very successful in making converts. He took a leading part in founding the congregation of St. Paul, of which he has since been a member. He has superintended the erection of the church of St. Paul, New York, which is the largest, save one, in the United States, attending to all the engineering work himself. Father Deshon is the author of a "Guide for Catholic Young Women" (New York, 1860), which has had the most extensive circulation of any Catholic book ever published in this country.

DESIRÉE, sister superior, b. in Janaph, Belgium, in 1815; d. in Lowell, Mass., in 1879. She received a thorough education in her native place, and entered the congregation of Sisters of Notre Dame at Namur. After taking her vows in 1845, she came to the United States, and was stationed at Cincinnati until 1852, when she was sent to Lowell to found a convent and schools for Catholic girls. During the twenty-seven years that she resided in Lowell she erected four large brick edifices for the accommodation of her pupils.

DESJARDINS, T. C. Alphonse, Canadian journalist, b. in Terrebonne, province of Quebec, 6 May, 1841. He was educated at Masson college and at Nicolet seminary, was admitted to the bar in 1862, and practised in Montreal until 1868, when he abandoned law for journalism, and became one of the editors of "L'Ordre." In 1872 he was appointed editor and one of the directors of "Le nouveau monde," retaining this connection for four years. In 1882 he was elected president of Le crédit foncier du bas Canada, in 1883 director of the Richelieu and Ontario navigation company, and in 1885 vice-president of the Montreal and Western railway company. He took an active part in organizing the Canadian papal zouave contingent, which went to assist the pope in 1868, and in 1872 was created a knight of the order of Pius IX., in recognition of this and other services to the church. He was one of the authors of the "Programme Catholique" (1871), proposed as a basis upon which the opposing sections of the conservative party might agree. He was first returned to the Dominion parliament for Hochelaga, province of Quebec, in 1874, was re-elected in 1878, and by acclamation in 1882.

DE SMET, Peter John, missionary, b. in Termonde, Belgium, 31 Dec., 1801; d. in St. Louis, Mo., in May, 1872. He studied in the Episcopal seminary of Mechlin, and while there he felt called to devote himself to the conversion of the Indians. When Bishop Nerinx visited Belgium in search of missionaries, De Smet, with five other students, volunteered to accompany him. The government gave orders to stop them, but they escaped from the officers and sailed from Amsterdam in 1821. After a short stay in Philadelphia, De Smet entered the Jesuit novitiate at Whitemarsh, Md. Here he took the Jesuit habit, but after two years the house was dissolved, and he was about to return to Belgium, when he was invited by Bishop Dubourg to Florissant, where he completed his education and took his vows. In 1828 he went to St. Louis and took part in establishing the University of St. Louis, in which he was afterward professor. In 1838 he was sent to establish a mission among the Pottawattamies on Sugar creek. He built a chapel, and beside it the log-huts of himself, Father Verreydt, and a lay brother. He erected a school, which was soon crowded with pupils, and in a short time converted most of the tribe. In 1840 he begged the bishop of St. Louis to permit him to labor among the Flatheads of the Rocky mountains. When it was represented to him that there was no money for such an expedition, he said that sufficient means would assuredly come from Europe, and set out on 30 April, 1840, from Westport, with the annual caravan of the American fur company, whose destination was Green River. He arrived on 14 July in the camp of Peter Valley, where about 1,600 Indians had assembled to meet him. They had retained traditions of the French missionaries of two centuries before, and De Smet found it easy to convert them. With the aid of an interpreter, he translated the Lord's prayer, the creed, and the commandments into their language, and in a fortnight all the Flatheads knew these prayers and commandments, which were afterward explained to them. During his journey back to St. Louis he was on several occasions surrounded by war-parties of the Blackfeet, but as soon as they recognized his black gown and crucifix they showed the greatest veneration for him. He thus laid the foundation of the extraordinary influence that he afterward exercised over the Indians. In the spring of 1841 he set out again, with two other missionaries and three lay brothers, all expert mechanics, and, after passing through several tribes, crossed the Platte and met at Fort Hall a body of Flatheads, who had come 800 miles to escort the missionaries. On 24 Sept. the party reached Bitter-root river, where it was decided to form a permanent settlement. A plan



P. J. De Smet S.J.

for a mission village was drawn up, a cross planted, and the mission of St. Mary's begun. The lay brothers built a church and residence, while De Smet went to Colville to obtain provisions. On his return, the Blackfeet warriors went on the winter chase, and he remained in the village familiarizing himself with the language, into which he translated the catechism. He then resolved to visit Fort Vancouver, hoping to find there the supplies necessary to make St. Mary's a fixed mission. On his way he visited several tribes, and taught them the ordinary prayers and rudiments of religion. After a narrow escape from drowning in Columbia river, he reached Fort Vancouver, but was deceived in his hope of finding supplies, and on his return to St. Mary's he resolved to cross the wilderness again to St. Louis. There he laid the condition of his mission before his superiors, who directed him to go to Europe and appeal for aid to the people of Belgium and France. He excited great enthusiasm for his work in those countries, several priests of his order asked permission to join him, and the Sisters of the Congregation of our Lady volunteered to undertake the instruction of the Flathead children. He sailed from Antwerp in December, 1843, with five Jesuits and six Sisters, and reached Fort Vancouver in August, 1844. He was offered land on the Willamette river for a central mission, and at once began to clear ground and erect buildings. The work advanced so rapidly that in October the Sisters, who had already begun their school in the open air, were able to enter their convent. In 1845 he began a series of missions among the Zingomenes, Sinpoils, Okenaganes, Flatbows, and Koetenays, which extended to the water-shed of the Saskatchewan and Columbia, the camps of the wandering Assiniboins and Creeks, and the stations of Fort St. Anne and Bourassa. He visited Europe several times in search of aid for his missions. Indeed, he calculated that his journeys up to 1853, by land and water, must have been more than five times the circumference of the earth. The ability and influence of Father De Smet were cordially acknowledged by the government of the United States, and his aid was often sought in preventing Indian wars. Thus he put an end to the Sioux war, and in Oregon he induced the Yahamas and other tribes, under Kamiakim, to cease hostilities. He was chaplain in the expedition to Utah, and opened new missions among the tribes in that territory. During his last visit to Europe he met with a severe accident, in which several of his ribs were broken, and on his return to St. Louis he wasted slowly away. Father De Smet was made a knight of the order of Leopold by the king of the Belgians. His best-known works, which have been translated into English, are "The Oregon Missions and Travels over the Rocky Mountains," "Indian Letters and Sketches," "Western Missions and Missionaries," and "New Indian Sketches."

DESNOYERS, Peter, pioneer, b. in France, 21 April, 1800; d. in Detroit, Mich., 6 March, 1880. He came to this country in early life, and settled first in Gallipolis, Ohio, and then in Pittsburg, Pa. Later he removed to Detroit, Mich., where he resided until his death. Congress, in 1807, gave him a tract of land on Detroit river, in return for his loyalty to the United States. He subsequently became U. S. marshal for the territory of Michigan, and in 1839 state treasurer. From his long residence in Detroit, he came to be regarded as one of the most influential men of the city, as well as a leading spirit among the French population.

DE SOLA, Abraham, clergyman, b. in London, 18 Sept., 1825; d. in New York, 5 June, 1882. He was called to the ministry of the Portuguese synagogue in Montreal, Canada, in 1846, soon identified himself with the various literary and scientific bodies of his adopted country, and was appointed in 1853 professor of Hebrew and oriental literature at McGill university. He received the degree of LL. D. in 1858, and was elected president of the Natural history society of Montreal. In 1872 Dr. De Sola opened the session of the U. S. congress with prayer. He labored by pen and in the pulpit to promote the welfare of his co-religionists, and was an eloquent expounder of conservative Judaism. His published works include "Scripture Zoology," "The Sanitary Institutions of the Hebrews," "Mosaic Cosmogony," "Sinaitic Inscriptions," "Notes on the Jews of Persia," and minor writings on Jewish history and literature.

DE SOTO, Fernando, Spanish discoverer, b. in Xeres de los Caballeros, Estremadura, Spain, about 1496; d. on the banks of the Mississippi in June, 1542. He was the descendant of a noble but impoverished family, and was indebted to Pedrarias Davila for the means of pursuing a course at the university, where he distinguished himself in literary studies and in athletic performances. In 1519 he accompanied Davila, who had been made governor of Darien, on his second expedition to America, during which he showed great ability and determination of character, especially as an opponent of the oppressive measures of his superior officers. He served on the expedition to Nicaragua in 1527 under Hernandez, who afterward perished by the hand of Davila in consequence of not heeding his advice. In 1528 he withdrew from the service of his patron and explored the coasts of Guatemala and Yucatan for upward of 700 miles in search of a strait, which was supposed to connect the two oceans. Later he joined Pizarro in his expedition to Peru, with the promise of being made second in command. In 1533 he was sent with fifty horsemen and a few targeteers to explore the highlands of Peru. He penetrated through a pass in the mountains, and discovered the great national road that led to the Peruvian capital. De Soto was sent by Pizarro as ambassador to visit the Inca Atahualpa, after whose capture he expostulated with his chief for treacherously refusing to release the Peruvian monarch, but in vain, although an immense sum had been paid for his ransom. He was prominent in the engagements that completed the conquest of Peru, and was the hero of the battle that resulted in the capture of Cuzco. Subsequently De Soto, who had landed in America with nothing of his own save his sword and target, returned to Spain with a fortune of $500,000, which enabled him to marry the daughter of his old patron Davila, to whom he had long been attached, and to main-

tain "all the state that the house of a nobleman requireth." The tales of returned adventurers fostered a belief in Spain that the treasures of the northern hemisphere would be found to rival in value the riches of Peru; and De Soto, in his desire to excel Cortes in glory and surpass Pizarro in wealth, sought permission from Charles V. to conquer Florida at his own expense. This privilege was readily conceded, and De Soto was made governor of Cuba. Volunteers for the expedition assembled in great numbers, both from Spain and Portugal, and De Soto selected from the "flower of the peninsula" only those who were in the "bloom of life," and, with a force of 600 men, 24 ecclesiastics, and 20 officers, sailed early in April from San Lucar. The fleet soon reached Santiago de Cuba, and then stopped at Havana, where the women were to remain until after the conquest. Leaving his wife in command, he crossed the gulf of Mexico and anchored in the bay of Espiritu Santo (now Tampa bay) on 25 May, 1539. When the soldiers were landed, De Soto, confident of success, sent his ships back to Cuba, and at the head of his followers began the long search for gold. His forces were greater in numbers and more perfect in equipment than those that had triumphed over the empires of Mexico and Peru. Everything was provided that former experience could suggest; chains for captives, the implements of a forge, weapons of all kinds then in use, bloodhounds as auxiliaries against the natives, ample stores of food, and finally a drove of hogs, which would soon swarm in the favoring climate, where the forests furnished them with abundant sustenance. To the greed for wealth religious zeal was added, priests with their assistants accompanying the expedition. Ornaments for the service of the mass were provided, and every festival was to be kept, every religious practice observed. The route was through a country already made hostile by the violence of the Spanish invader, Narvaez, and the Indians, in their efforts to rid themselves of the Spaniards, continually lured them onward by stories of wealth in regions still remote, which receded as the expedition advanced. They marched northward at first, and then passed into the country of the Appalachians, where they spent the winter. Juan Ortiz, who had been captured by the Indians from Narvaez, and enslaved by them, could give no account of any land where gold or silver was to be found. An exploring party discovered Ochus, the harbor of Pensacola, and a message was sent to Cuba, desiring that in the following year supplies might be sent to that place. Meanwhile, discontent had arisen among the Spaniards, and when they appealed to De Soto to return, he refused, saying: "I will not turn back till I have seen the poverty of the country with my own eyes." In March, 1540, they resumed their march, proceeding in a northeasterly direction, and on 18 Oct. reached the village of Marilla or Mobile, on Alabama river, where, in an engagement with the natives, the Spaniards lost more than 80 men and 42 horses, and it was claimed that 2,500 Indians were killed. Ships had meanwhile arrived at Ochus, but De Soto proudly refused to send back any message of his fortunes. He then went to the northwest, and passed his second winter in the country of the Chickasaws. In the spring of 1541 he made a demand on the chief of these Indians for 200 men to carry the burdens of the company. The chief hesitated, and in the night fired the village where the Spaniards were encamped. Forty of De Soto's followers perished in the flames, and all the baggage was destroyed. A delay of some weeks ensued, during which forges were erected, swords newly tempered, and ashen lances made. In April, De Soto resumed his march in a northwesterly direction, and, after journeying for seven days through a wilderness of forest and marshes, reached the Mississippi river. A month was spent on the banks, constructing barges large enough to hold three horsemen each, and then the army passed over to the western side; thence northward to Pacaha, where he remained ten days, and then marched successively southwest and northwest till he reached the highlands of White river, which was the western limit of the expedition. Turning south, he proceeded on his journey, passing by the hot springs of Arkansas, which his companions at first supposed to be the fabled fountain of youth, and spent his third winter in Antiamque, on Washita river. In the following spring De Soto determined to descend this river to its junction. He finally reached the Mississippi again, and while descending its banks was stricken with malignant fever. Worn out by long disappointments, and his pride changed to a wasting melancholy, he realized that death was near at hand. He gathered his followers around him, and, after appointing Luis de Moscoso his successor, succumbed to the disease on the following day. The news of his death was carefully kept from the Indians, by whom he was regarded as possessing supernatural powers, and at midnight, wrapped in his mantle, the body of the great discoverer was lowered into the waters of the river he had discovered. His followers, reduced to half their original numbers, passed the ensuing winter in the country of the Natchitoches, and in the spring returned to the Mississippi, where they built seven frail boats, in which they drifted down to the gulf of Mexico, and then followed the shore to the Mexican town of Panuco, where they dispersed. De Soto's wife expired in Havana three days after hearing of his fate. See "Life, Travels, and Adventures of Ferdinand de Soto," by Lambert A. Wilmer (Philadelphia, 1858); "Narratives of the Career of Hernando de Soto in the Conquest of Florida, as told by a Knight of Elvas, and in a Relation by Liuys Hernandez de Biedura, factor of the Expedition," translated by Buckingham Smith (New York, 1866), being number five of the Bradford club series; and Bancroft's "History of the United States" (vol. i., New York, 1885).

DESPARD, John, British soldier, b. in 1745; d. in Oswestry, England, 3 Sept., 1829. He entered the army as ensign of the 12th foot in 1760, and became lieutenant in 1762. After serving in Germany, he came with the royal fusiliers to Quebec in March, 1773, was taken prisoner at St. Johns in November, 1775, and, after being exchanged in December, 1776, became captain in March, 1777. He then joined the army in New York, and was at the capture of Fort Montgomery. In June, 1778, he was commissioned major of a corps raised by Lord Rawdon, and in December, 1779, became deputy adjutant-general. He was present at the capture of Charleston and in the campaigns of Cornwallis that ended with the surrender at Yorktown. Subsequently he served on the staff of the army, being made colonel in August, 1795, and major-general in 1798. From 1800 till 1807 he was governor of Cape Breton, and in 1814 was made full general. Gen. Despard was in twenty-four engagements, and was three times shipwrecked.

DESPREZ-CRASSIER, Jean Etienne Philibert, French general, b. in Crassier, 18 Jan., 1733; d. in Ornex about 1803. He early entered the French army, and became in 1757 a captain in the

Royal Deuxpont regiment, with which he served in Germany until the peace of 1693. After attaining the rank of lieutenant-colonel, he served in this country during the Revolutionary war, distinguishing himself at Yorktown, where his regiment, having captured two howitzers, obtained by the exploit the title of "Royal." In September, 1792, he was made lieutenant-general and given command of the advance guard of the army of the centre, which repelled the Prussians at the camp of La Lune. He was suspended as a nobleman in 1793, but was afterward restored and employed in the army of Italy, of the Pyrenees, and of the Rhine. He was deprived of his command, 26 Oct., 1795, and then retired to his estates in Ornex.

DESSALINES, Jean Jacques, Haytian emperor, b. in Guinea, Africa, in 1758; d. in Hayti, 17 Oct., 1806. He was brought, when young, to Cape Français (now Cape Haytien), where he was purchased by a French planter, whose name he subsequently assumed. In 1791 he left his master and joined the insurgent army under Biasson. In the servile war that followed he distinguished himself, and became adjutant-general of Jean François, the negro commander. Later he sided with Toussaint L'Ouverture when the latter left his Spanish allies and joined the French. In the campaign that followed, having attained the rank of lieutenant-general, he led the forces against the mulatto chief Rigaud. His success, with the promptness and energy evinced in this movement, recommended him to Toussaint, who afterward invariably sent him where the utmost severity was considered necessary. His name spread terror wherever he went, and thousands of mulattoes were slaughtered, drowned, or shot by his orders. At the same time he led a most dissolute life, and enriched himself by extensive robberies perpetrated in the guise of legal confiscations. In 1802 he conducted a guerilla war against Gen. Leclerc, who had been sent to Hayti by Napoleon. His obstinate defence of St. Marc against Gen. Boudet was characteristic. When unable to hold the town any longer, he burned it, setting fire to his own palace, and butchered all the white inhabitants of the place, and also those he met with on his retreat. Later he submitted to Gen. Leclerc, after the affair at Crete à Pierrot. Peace having been established, he was made governor of the southern portion of the island, with the rank of general. Here he plunged into the deepest debauchery, but affected much zeal for the French. He treated the vanquished negroes with the same cruelty that he had shown to the whites, and when Toussaint's nephew rose against the French, Dessalines cruelly murdered him in cold blood, with 300 of his followers. His loyalty to the French, however, was of short duration, for afterward, when yellow fever attacked the French army, numbering among its victims Gen. Leclerc. Dessalines became commander-in-chief of the negro forces. Gen. Rochambeau succeeded to the command of the French, and at once adopted retaliatory measures against their insurgents. He tortured to death the negro general, Maurepas, with his entire family. A terrible retribution was determined upon. Dessalines erected 500 gibbets, and hanged half a regiment of French that he had captured by a bold countermarch. A war of extermination followed, and in December, 1803, aided by an English squadron, the French were compelled to evacuate the island. On 1 Jan., 1804, he was appointed governor-general of Hayti for life. For a few months he ruled in a spirit of moderation, and put into force several wise and just measures toward a healthy reorganization of the commonwealth; but his brutal nature prevailed over his judgment, and shortly afterward he ordered a general massacre of the white residents, who had remained under a promise of protection. In April, 1804, he made an unsuccessful attempt to conquer the Spanish portion of the island, and after his return became more frantic than ever. He had himself crowned as emperor of Hayti on 8 Oct., 1804, in imitation of Napoleon, under title of "Jean Jacques I.," and proclaimed a new constitution, which concentrated all real power in his own hands. Subsequently his extravagance deranged the finances, his dissoluteness corrupted the morals of all classes, his cruelty increased, and he put to death every one against whom he was suspicious. His despotism soon caused an insurrection, and in 1806, while endeavoring to repress it, he fell into an ambuscade, and was assassinated by two of his officers, Christophe and Petion, of whom the former became president of Hayti. In a slender and hideous frame Dessalines united the wildest passions of the ferocious savage with extraordinary shrewdness, an undeniable keenness of judgment, and a clear statesmanlike knowledge of the men and things with whom he had to deal. However abominable his character may appear, it is nevertheless true that he understood the means of accomplishing the independence of Hayti better than even Toussaint himself. He left Hayti a ruined and desolate, though independent, state. See "Vie de J. J. Dessalines," by Louis Dubroca.

DESTRÉHAN, Jean Noel, senator, b. about 1780. He was a citizen of Louisiana, and in 1805 one of the authors of a pamphlet attacking the territorial government. He was a member of the state convention of 1811, and voted with the minority against the application of Louisiana for admission into the Union. Notwithstanding this, he was appointed one of a committee of seven to draft a constitution for the new state. In 1812 he was elected to the U. S. senate, but resigned the office before taking his seat.

DETMOLD, William Ludwig, surgeon, b. in Hanover, Germany, 27 Dec., 1808. His father was court physician to the king of Hanover. William received his medical degree from the University of Göttingen in 1830, and enlisted as surgeon in the royal Hanoverian grenadier-guard. He came to the United States on leave of absence in 1837, and sent his resignation from New York. He became professor of military surgery and hygiene at Columbia in 1862, and was made professor emeritus in 1866. Dr. Detmold introduced orthopedic surgery into the United States, and during the civil war acted as volunteer surgeon in Virginia. He introduced a knife and fork for one-handed men, which was put by Surgeon-General Barnes on the supply list, under the name of "Detmold's knife." Among his numerous contributions to medical literature is "Opening an Abscess in the Brain," in the "Journal of the Medical Sciences" for February, 1850.—His brother, **Christian Edward,** engineer, b. in Hanover, 2 Feb., 1810, was educated at the military academy in his native city, and came to New York in 1826, with the intention of embarking for Brazil, and entering the military service of Dom Pedro I. But unfavorable accounts of the condition of that country induced him to remain here, and he became well known as an engineer. In 1827 he made many surveys in Charleston, S. C., and vicinity, and in 1828 made the drawings for the first locomotive built by the Messrs. Kemble in New York. In 1833–'4 he was in the employ of the U. S. war department, and superintended the laying of the foundations of Fort Sumter during the illness of the en-

gineer in charge of the work. After making surveys for railroads in various parts of the country, he became interested in the manufacture of iron, and introduced several improvements, including the utilization of the waste gases from blast and other furnaces. In 1845–'52 he engaged in this manufacture in Maryland, and then built the New York "Crystal Palace." He afterward became president of the New Jersey zinc company, built their works at Newark, and originated and successfully developed the manufacture of "spiegel" iron from the residue of the zinc ore. He then engaged in coal-mining, but failing health forced him to go to Europe, where he lived, most of the time in Paris, till his return to New York in 1885. He has published a translation of the principal historical, political, and diplomatic writings of Machiavelli (4 vols., Boston, 1882).

DÉTRÉ, William, missionary, b. in France in 1664; d. in South America. He entered the Jesuit order, and obtained permission from his superiors to devote himself to the Indian missions. He was sent to South America either in 1701 or 1706, where his zeal and ability attracted attention, and he was made superior-general and visitor of all the missions on the Amazon for over an extent of more than 3,000 miles. As soon as he had made himself thoroughly familiar with the Inca, or Quichua, the most common language in that country, he succeeded in translating the catechism into eighteen languages spoken by the tribes under his jurisdiction. He was appointed rector of the College of Cuença in 1727. He is said to have died at an advanced age, but the date is not given. He sent to Europe the celebrated map of the Amazon, drawn by Father Fritz, who died in his arms. He left an interesting "Relation," written in 1731, giving curious details about the savage tribes that dwell on the banks of the Amazon. It is inserted in the 23d volume of the "Lettres edifiantes."

DE TROBRIAND, Philippe Régis, soldier, b. in the Château des Rochettes, near Tours, France, 4 June, 1816. His full name and title were Philippe Régis Denis de Keredern, Baron de Trobriand; but, on becoming an American citizen, he modified the name and dropped the title. His early education was for a military career. He studied at the College Saint Louis in Paris, the college of Rouen, where his father was in command, and the college of Tours; but the revolution of 1830 changed his prospects, and he was graduated at the University of Orleans as bachelier-ès-lettres in 1834, and at Poitiers as licencié-en-droit in 1838. He came to the United States in 1841, edited and published the "Revue de nouveau monde" in New York in 1849–'50, and was joint editor of the "Courrier des États-Unis" in 1854–'61. On 28 Aug. of the last-named year he entered the National army as colonel of the 55th New York regiment. He was engaged at Yorktown and Williamsburg, commanded a brigade of the 3d army corps in 1862–'3, and was at Fredericksburg, Chancellorsville, and Gettysburg. He was made brigadier-general of volunteers in January, 1864, and commanded the defences of New York city from May till June of that year. As commander of a brigade in the 2d army corps he was at Deep Bottom, Petersburg, Hatcher's Run, and Five Forks, and was at the head of a division in the operations that ended in Lee's surrender. For his services in this campaign he was brevetted major-general of volunteers on 9 April, 1865. He entered the regular army as colonel of the 31st infantry on 28 July, 1866, was brevetted brigadier-general, U. S. army, 2 March, 1867, and commanded the district of Dakota in August of that year. He was transferred to the 13th infantry on 15 March, 1869, and commanded the district of Montana, and afterward that of Green River. He was retired at his own request, on account of age, on 20 March, 1879, and is now (1887) a resident of New Orleans, La. He has published "Les gentilshommes de l'ouest," a novel (Paris, 1841), and "Quatre ans de campagnes à l'armée du Potomac" (2 vols., Paris et Bruxelles, 1867).

DEUXPONTS, Christian, Comte de Forbach des, b. in Deuxponts, Bavaria, 20 Oct., 1752. He became colonel of the Royal Deux-Ponts French regiment in 1775, served with Rochambeau in this country in 1780–'3, and was distinguished at Yorktown. He afterward commanded the Bavarian corps at Hohenlinden in 1800, and received the grand cross of the order of Maximilian Joseph for his gallantry.—His brother, **William,** b. 18 June, 1754; d. sixteen years before his brother, became lieutenant-colonel of his brother's regiment, 2 Oct., 1779, and was wounded in the attack on the redoubt at Yorktown, on the night of 14 Oct., 1781. For his services there he was made by the king of France a chevalier of the military order of St. Louis, and was mentioned particularly in Baron Viomesnil's report to Rochambeau. He afterward held the honorable post of commander of the palace guard at the Bavarian court. Col. Trumbull's painting of the surrender of Cornwallis, in the rotunda of the capitol at Washington, contains a portrait of Count des Deuxponts. He left in manuscript "Mes campagnes d'Amérique," which was found on a Paris book-stall in 1867 by Dr. Samuel Abbott Green, and published by him, with an English translation and notes (Boston, 1868).

DE VACA, Cabeza. See CABEZA DE VACA.

DEVENS, Charles, jurist, b. in Charlestown, Mass., 4 April, 1820. He was graduated at Harvard in 1838, studied in the law-school at Cambridge, and practised from 1841 till 1849 in Franklin county, Mass. He was a member of the state senate from that county in 1848 and 1849. From 1849 till 1853 he held the office of U. S. marshal for the district of Massachusetts. During this period Thomas Sims was remanded as a fugitive slave, and Mr. Devens, in obedience to what he considered the exigencies of his office, caused the process to be executed. After the rendition he endeavored, through the Rev. L. A. Grimes, in 1855, to obtain the freedom of Sims, offering to pay whatever sum was necessary for the purpose, but the effort was fruitless. At a later period, hearing that Mrs. Lydia Maria Child was making applications for money to purchase the freedom of Sims, Mr. Devens addressed her a letter requesting the return of the sums she had collected for this purpose, and that she allow him the privilege of paying the whole sum. To this Mrs. Child assented; but, before the affair could be arranged, the war rendered negotiation impossible. Sims was eventually liberated by the progress of the National armies, was pecuniarily aided by Mr. Devens in establishing himself in civil life, and at a later period appointed by him, while attorney-general of the United States, to an appropriate place in the department of justice. In 1854 Mr. Devens resumed the practice of law in Worcester. On 19 April, 1861, he accepted the office of major, commanding an independent battalion of rifles, with which he served three months, and in July was appointed colonel of the 15th Massachusetts volunteers. With this regiment he served until April, 1862, and was wounded in the battle of Ball's Bluff. He was made brigadier-general in 1862, commanded a brigade during the Peninsular campaign, was disabled by a wound at

Fair Oaks, and was in the battles of Antietam and Fredericksburg. In 1863 he commanded a division in the 11th corps at the battle of Chancellorsville, where he was severely wounded. Returning to the field in the spring of 1864, he was appointed to the command of a division in the 18th army corps, reorganized as the 3d division of the 24th corps, and his troops were the first to occupy Richmond when it was evacuated by the Confederates. Gen. Devens was brevetted major-general for gallantry and good conduct at the capture of Richmond, and remained in the service for a year after the termination of hostilities, his principal duty being as commander of the district of Charleston, which comprised the eastern portion of South Carolina. In June, 1866, at his own request, he was mustered out of service, and immediately resumed the practice of his profession in Worcester. In April, 1867, he was appointed one of the justices of the superior court of Massachusetts, and in 1873 was made one of the justices of the supreme court of the state. In 1877 he became attorney-general in the cabinet of President Hayes. On his return to Massachusetts in 1881 he was reappointed one of the justices of the supreme court of the state, which office he now holds (1887). His only publications are his legal opinions and addresses on public occasions. Of his addresses the most important are those at the centennial celebration of the battle of Bunker Hill, at the dedication of the soldiers' monuments in Boston and Worcester, on the deaths of Gen. Meade and Gen. Grant, and as presiding officer at the 250th anniversary of Harvard.

DEVEREUX, John Henry, railroad manager, b. in Boston, Mass., 5 April, 1832; d. in Cleveland, Ohio, 17 March, 1886. He was educated in the Portsmouth, N. H., academy, and in 1848 went to Cleveland, Ohio, where he served as construction engineer on several railroads. He removed to Tennessee in 1852, and became prominent in railroad affairs there. At the beginning of the civil war he offered his services to the government, and aided the Union cause as superintendent of military railroads in Virginia. He resigned in 1864, and returned to Cleveland, where he became one of the foremost railroad men in the west. He was chosen president of the Cleveland, Columbus, Cincinnati, and Indianapolis railroad in June, 1873, of the Atlantic and Great Western in 1874, and of the Indianapolis and St. Louis in 1880, being receiver of the last-named road from May till September, 1882. In 1877 Gen. Devereux, by his personal courage, prevented 800 of his men from joining in the railroad riots. He was prominent in the councils of the Protestant Episcopal church.

DEVEREUX, Thomas Pollock, lawyer, b. in Newbern, N. C., 17 Dec., 1793; d. in Connemara, Halifax co., N. C., 24 March, 1869. He was a great-grandson of Jonathan Edwards, was graduated at Yale in 1813, and studied at the Litchfield, Conn., law-school, but did not practise till pecuniary losses forced him to do so. He was U. S. district attorney for North Carolina under the administrations of John Quincy Adams and Andrew Jackson, and in 1826 was appointed reporter for the State supreme court. The death of an uncle left him, in middle life, the care of a large estate, and he spent the rest of his days on his plantation, but served for some time as chairman of the Halifax county court. He published "Reports of the North Carolina Supreme Court, 1826–'34" (4 vols., Raleigh, 1829–'36), "Reports in the Superior Court, 1834–'40" (4 vols., 1837–'40), and "Equity Reports, 1826–'40" (4 vols., 1838–'40). In the preparation of some of these he was assisted by W. H. Battle.

DEVILLE, Edward Gaston, Canadian surveyor, b. in La Charité Sur Loire Nievre, France, in 1849. He was educated at the naval school, Brest, and afterward joined the French navy, and had charge of extensive hydrographic surveys in the South Sea islands, Peru, and elsewhere. He retired from the navy in 1874 and went to Canada, and soon after his arrival there entered the service of the Quebec government, where he remained until 1879 as inspector of surveys and scientific explorer. He was commissioned as provincial land surveyor in 1877; as Dominion land and topographical surveyor in 1878; in 1881 he became inspector of Dominion land surveys, and in 1885 was appointed surveyor-general of Canada. He is a fellow of the Royal astronomical society and of the Royal society of Canada. He is the author of "Astronomic and Geodetic Calculations," and of several scientific papers.

DE VILLIERS, Charles A., soldier, b. in 1826. He had been an officer in the French army, and afterward became colonel of the 11th Ohio volunteers. At the beginning of the civil war in the United States he was taken prisoner, 17 July, 1861, and sent to Richmond. About the middle of September following he eluded the guards and escaped. Under the guise of a mendicant Frenchman, aged, infirm, and nearly blind, he succeeded in obtaining the commandant's permission to go to Fort Monroe, under a flag of truce, that he might embark "for his dear old home in France." After two weeks' delay the supposed Frenchman was assisted on board a transport at Norfolk and taken to the Union boat. When safely under his own flag, he cast off his pack, green goggles, and rags, thanked the officers for their politeness, shouted a loud huzza for the stars and stripes, and gave them the pleasing information that they had just parted with Col. De Villiers, of the 11th Ohio. He arrived safely in Washington, rejoined his regiment, and was made brigadier-general, 10 Oct., 1861. He had been the military instructor of Col. Elmer E. Ellsworth. He received his discharge from the army on 23 April, 1862, and returned to France.

DEVIN, Thomas C., b. in New York city in 1822; d. there, 4 April, 1878. He received a common-school education, followed the trade of a painter, and became lieutenant-colonel of the 1st New York militia regiment. Just after the battle of Bull Run, Mr. Devin accosted Thurlow Weed, at that time a stranger to him, and said that he wished authority to raise a cavalry company for immediate service. Mr. Weed telegraphed to Gov. Morgan for a captain's commission for Mr. Devin, obtained it, and in two days the company had been recruited and was on its way to Washington. At the end of the three months for which he had enlisted he entered the service again as colonel of the 6th New York cavalry. His command was attached to the cavalry corps of the Army of the Potomac, and participated in all the battles fought by that corps from Antietam to Lee's surrender. At Five Forks he commanded his brigade, and carried the Confederate earthworks. He was brevetted brigadier-general of volunteers, 15 Aug., 1864, for bravery at Front Royal, where his command captured two stands of colors, and where he was wounded; and major-general, 13 March, 1865, for his services during the war. He entered the regular army as lieutenant-colonel of the 8th cavalry, 28 July, 1866, commanding the district of Montana. On 2 March, 1867, he was brevetted colonel, U. S. army, for gallantry at Fisher's Hill, and brigadier-general for services at Sailor's Creek. He then commanded the district of Arizona, and on

25 June, 1877, became colonel of the 3d cavalry. Gen. Grant, in a conversation with Thurlow Weed, called Gen. Devin, next to Gen. Sheridan, the best cavalry officer in the National army.

DEVINE, Thomas, Canadian surveyor, b. in the county Westmeath, Ireland, in 1823. He was educated in Fox's engineer's academy, and in the corps of Royal engineers, and, after being employed on the ordnance survey of Ireland, emigrated to Canada. He became connected with the surveying department in Canada in 1846, and was deputy surveyor-general in 1873–'9. In 1849 he constructed for the government a map of Canada from Lake Superior to Nova Scotia (new ed., including Manitoba, 1879), and also constructed the first geological map of the Hudson bay territory before the Canadian government obtained control of it. He was elected a F. R. G. S. of London in 1860, and F. G. S. of London in 1873, and has also been elected a corresponding member of the Geographical society of Berlin and of the American geographical and statistical society. He is the author of a field-book, exclusively used in Canadian and other surveys.

DE VINNE, Daniel, clergyman, b. in Londonderry, Ireland, 1 Feb., 1793; d. in Morrisania, N. Y., 10 Feb., 1883. His family emigrated to the United States before he was a year old, settling in Charleston, Montgomery Co., N. Y., where he lived till eleven years of age. In 1819 he became a minister of the Methodist Episcopal church, and filled appointments in Louisiana and Mississippi for five years. In 1825 his dislike of slavery caused his transfer to the New York conference, in which connection he remained until his death. He was a frequent contributor to the religious press, and published in book form "The M. E. Church and Slavery" (Boston, 1844); "Recollections of Fifty Years in the Ministry" (1869); and the "Irish Primitive Church" (1870).—His son, **Theodore Low,** printer, b. in Stamford, Conn., 25 Dec., 1828, left school at fourteen years of age, and in 1844–'8 worked as a printer in the office of the Newburgh, N. Y., "Gazette." He went to New York in 1849, entered the employ of Francis Hart, and in 1859 became his partner. Mr. Hart died in 1877, and in 1883 the firm name became Theodore L. De Vinne and Company. In his own office, and as a member of the Typothetæ, the Grolier club, and the Authors' club, Mr. De Vinne has been active in efforts to improve typography. His style of book composition and his press-work of wood-cuts have given him a wide reputation in this country and abroad. He has printed "St. Nicholas" since its beginning in 1873, and the "Century" since 1874. In 1886 he removed to a new building in Lafayette place specially designed by him. He has contributed to current literature on books and printing, and has published the "Printers' Price List," an office manual (New York, 1871); "Invention of Printing" (1876); and "Historic Types" (1886).

DE VRIES, David Pieterssen, colonist, lived in 17th century. Several of the directors of the New Amsterdam chamber of the West India company took measures to secure for themselves a share of the privileges, which they offered to enterprising capitalists in the charter of 1629. A few days before the passing of the charter the agents of Samuel Godyn and Samuel Blœmmaert bought from the Indians the tract of country on the southwest side of South River bay, which purchase was ratified by the director-general and council at Fort Amsterdam on 15 July, 1630. The possession of these desert tracts of land would be of no profit unless means were adopted to cultivate them, and, in order to accomplish this, a number of associations were formed, consisting of wealthy men. Each guild was under the authority of a patroon. In October, 1630, an association was formed for planting a colony on the South river. Its members were Godyn, Blœmmaert, Van Rensselaer, De Vries, and others. On 12 Dec., 1630, two vessels, with a number of emigrants and a large stock of cattle, were sent out by De Vries, under the command of Peter Heyes, to occupy the new possessions on the Delaware. The smaller of these vessels was captured by the Dunkirk privateers before it had left the Dutch waters; the other, "The Walrus," carrying eighteen guns, arrived safely in the Delaware, and a settlement was made on Lewis creek, a short distance from the mouth of the river. The little fort, flanked by palisades, was named Fort Oplandt, and the lands were called by the poetic name of "Swanendal." The chief purpose in acquiring these lands was to cultivate grain and tobacco and to engage in the whale-fishery. Heyes, however, did nothing to establish the whale-fishery, and returned to Holland on 31 Sept., 1631, leaving Hosset in charge of the colony, which consisted of about thirty-two men. The result of this expedition was a disappointment to the stockholders, who had anticipated a large profit from the enterprise, and it was therefore decided that De Vries should command a second expedition, and become patroon of the colony. With a large vessel and a yacht he set sail, 24 May, 1632. At the moment of starting he received news that the settlers of Swanendal had been massacred by the Indians and all their possessions destroyed. On 5 Dec. he reached the Delaware, and the cry of "Whale near the ship!" stimulated their hopes, soon to be dispelled, for the sight of the settlement of Swanendal presented a melancholy spectacle. The ground was decorated with the skulls and bones of the colonists, and the heads of horses and cattle were scattered over the plain. They succeeded in communicating with the Indians on the following day, and invited them to a "nice talk." The savages came with their chief, and by the free use of presents and pacific policy De Vries gained their confidence and concluded a treaty of peace. Encouraged by their friendly disposition, De Vries moved up the river to Fort Nassau in quest of provisions. Here he met savage Indians, who had massacred the English settlers from the Virginia colony. Desirous of seeing the country, De Vries sailed for Virginia, where he was heartily welcomed by the governor, who was much surprised to know that the Dutch had a colony on the Delaware. De Vries returned to Swanendal, and found that his party had only taken seven whales, which yielded but little oil. Concluding that this enterprise was not profitable, he gathered up his effects, and, taking his party, set sail for Holland on 14 April, 1634, leaving no Europeans in the valley of the Delaware. He published "Voyages from Holland to America, from 1632 till 1644," which was translated from the Dutch by Henry C. Murphy (New York, 1853).

DEW, Thomas Roderick, educator, b. in King and Queen county, Va., 5 Dec., 1802; d. in Paris, France, 6 Aug., 1846. He was graduated at William and Mary in 1820, and afterward travelled two years in Europe. In 1827 he was appointed professor of history, metaphysics, and political economy in William and Mary, of which college he was made president in 1836. He held this office until his death, which occurred while he was travelling in Europe with his bride. His published works are: "The Policy of the Government" (1829); "An Essay in Favor of Slavery" (1833), which produced

an extraordinary effect upon the public mind, and for a while set at rest the subject of emancipation in Virginia; "A Digest of the Laws, Customs, Manners, and Institutions of Ancient and Modern Nations" (New York, 1853). This is a treatise on the history of the world from its earliest period to the first French revolution. He also published "Lectures," on "Usury," "History," "The Characteristic Difference of Man and Woman," etc., and contributed to the "Southern Literary Messenger."

DE WALDEN, Thomas Blaides, actor, b. in London, England, in 1811; d. in New York city, 26 Sept., 1873. He appeared at the Haymarket theatre, London, in 1841, and made his first appearance on the American stage at the Park theatre, New York, in 1844, as Belmour in "Is he Jealous?" After achieving moderate success upon the stage, he began to adapt and to write plays, of which he left more than one hundred. In 1857 he abandoned his profession and engaged in mercantile pursuits, but without success. He was a chaplain in the volunteer army of the United States during the civil war. He was the author of "The Upper Ten and the Lower Twenty," played at Burton's theatre, New York; "The Seven Sisters"; "Sam,' written for F. S. Chanfrau; "Kit," altered for Mr. Chanfrau; "The Jesuit," played at the Bowery theatre in 1854; "The Bell-Ringer of Boston"; "The Hypochondriac," and several adaptations from the French for Matilda Heron.

DEWART, Edward Hartley, Canadian clergyman, b. in county Cavan, Ireland, in 1828. When six years old he came with his parents to Canada, the family settling in the county of Peterborough, Ontario. He was almost wholly self-educated, with the exception of two sessions passed in the Toronto normal school. In 1851 he began preaching as a probationer of the Wesleyan Methodist church, and after completing four years in this service was ordained a minister. In 1856 he was appointed superintendent of St. Andrew's circuit, on the Ottawa river. Subsequently he preached in the Oldtown circuit, and in 1860 was stationed in Montreal west. Soon afterward he resigned his charge in consequence of illness, and after his recovery labored in St. John's circuit, Collingwood, Toronto, and Ingersoll. In 1869 he was elected editor of the "Christian Guardian," the principal organ of Methodism in Canada. At the general conference of the United Methodists in 1883 he was elected by acclamation to the editorial chair. In connection with the movement for the union of the various branches of the Methodist church, he was one of the chief advocates of lay delegation and union principles; and at the London conference in 1873, when a plan of union had been agreed upon by the Wesleyan, Eastern British-American, and New Connection conferences, he and Dr. Nelles were appointed delegates to the British conference to represent the united church and arrange the terms of settlement with the parent body. He was also present as a delegate from Canada at the Methodist œcumenical conference that met in London, England, in 1881. The degree of D. D. was conferred upon him by Victoria college, Cobourg. His writings include a prize essay against the use of tobacco (1858), and poems on "John Milton," "Niagara Falls," and "Voices of the Past."

DEWDNEY, Edgar, statesman, b. in Devonshire, England, in 1835. He went to British Columbia in 1859, and was employed on the Canadian Pacific railway survey as an engineer. He represented Kootenay in the local parliament in 1868–'9, and was returned for the Dominion parliament in 1872, again in 1874, and by acclamation at the general election in 1878. In 1879 he resigned on being appointed Indian commissioner, which office he held till appointed lieutenant-governor of the northwest territories in December, 1881.

DEWEES, William Potts, physician, b. in Pottsgrove, Pa., 5 May, 1768; d. in Philadelphia, 18 May, 1841. He was left fatherless in early life, served some time with an apothecary, attended a course of lectures in the University of Pennsylvania, and began to practise at Abington, Pa., in 1789 without having taken a degree, which, however, was soon conferred upon him by the University of Pennsylvania. Yellow fever having thinned the ranks of the physicians in Philadelphia in 1793, Dr. Dewees removed there, selecting obstetrics as his specialty, and won a high reputation in that department. In 1812 he relinquished his practice on account of delicate health and resided at Philipsburg, Pa., where he devoted himself to agriculture until 1817. In that year he returned to Philadelphia and resumed practice. In 1826 he was elected adjunct professor, and in 1834 professor of obstetrics and diseases of women and children in the University of Pennsylvania. In the latter year, his health failing, he was obliged to resign his professorship. After spending a winter in Cuba and a summer in the north, he settled in Mobile, and returned to Philadelphia a year before his death. He published a volume of "Medical Essays" (Philadelphia, 1823); "Treatise on the Physical and Medical Treatment of Children" (1825; 10th ed., 1854); "System of Midwifery" (1825; 12th ed., 1854); "Treatise on the Diseases of Females" (1826; 10th ed., 1854); and "Practice of Medicine" (1830).

DEWEY, Charles Augustus, jurist, b. in Williamstown, Mass., 13 March, 1793; d. in Northampton, Mass., 22 Aug., 1866. He was a son of Daniel Dewey, who represented Berkshire county in congress in 1813. He was graduated at Williams in 1811, studied law with Theodore Sedgwick, of Stockbridge, and began the practice of the profession in Williamstown in 1814, where he remained until in 1826 he removed to Northampton. He served as U. S. district attorney from 1830 till 1837, when he was appointed the fifth judge of the supreme court of Massachusetts. In 1840 he received from Harvard the degree of LL. D. Judge Dewey continued on the bench until his death, a period of twenty-nine years. He was a laborious member of the court, always taking upon himself his full share of the work, and never seeking to avoid any of the responsibilities of his office. Although not a brilliant lawyer, he was distinguished by the sound sense exercised in the consideration of all questions coming before him. He was thoroughly familiar with the entire body of statute law, as well as with that regulating mercantile transactions and charitable trusts, which latter received a large share of his attention at the beginning of his judicial career.

DEWEY, Chester, educator, b. in Sheffield, Mass., 25 Oct., 1784; d. in Rochester, N. Y., 5 Dec., 1867. He was graduated at Williams in 1806, studied for the ministry, was licensed to preach in 1808, and officiated at Tyringham, Mass. In the same year he became tutor at Williams, and in 1810 was appointed to the professorship of mathematics and natural philosophy. He held this place for seventeen years, during which he did much for the advancement of the college. For many years he was professor and lecturer on chemistry and botany in the medical colleges of Pittsfield, Mass., and Woodstock, Vt. In 1836 he became principal of the collegiate institute in Rochester, N. Y., where he remained till 1850, when he was appointed

professor of chemistry and natural philosophy in the University of Rochester, which was established that year. He held this office until 1860, at which time he offered his resignation, feeling unable to perform active service, but consented to retain a nominal connection with the university, and to give instruction when it suited his convenience. After the age of eighty he lived in retirement, and aided many religious and benevolent objects. His entire life was given to scientific pursuits, and he held a high position among American naturalists. He made the study of grasses a specialty, and discovered and described several new species. The degree of M. D. was conferred upon him by Yale in 1825, D. D. by Union in 1838, and LL. D. by Williams in 1850. He was a careful and accurate observer of the weather, and his notes were published in regular monthly reports. His papers on some of the "Families and Natural Orders of Plants," published in the "American Journal of Science," attracted the attention of some of the leading European botanists, and led to a correspondence with them. In the class of "carices" he was a recognized authority, and his writings on that subject make an elaborate monograph, upon which he labored for more than forty years. His "History of the Herbaceous Plants of Massachusetts" was published by that state. His latest writings were review articles on "The True Place of Man in Zoölogy" and "An Examination of some Reasonings against the Unity of Mankind."

DEWEY, Frederic Perkins, chemist, b. in Hartford, Conn., 4 Oct., 1855. He was graduated at the Sheffield scientific school in 1876, and in the autumn of that year became assistant in analytical chemistry in Lafayette college. This office he held until July, 1877, when he took charge of the chemical work of the North Jersey iron company, and continued as such until the spring of 1878, after which he worked in the laboratory of the Sheffield scientific school as a post-graduate. In April, 1879, he became chemist of the Roane iron and steel company, and in 1881 was associated with Dr. George W. Hawes in investigating the building-stones of the United States for the Tenth Census. He was appointed in December, 1882, curator of metallurgy in the U. S. national museum in Washington. His literary work includes articles on the chemical examination of iron and iron ores, contributed to various scientific journals; also, "The Chemical Examination of Building-Stones," for the Tenth Census report, a "Biographical Sketch of Dr. Hawes," for the Smithsonian report. He prepared a "Plan to Illustrate the Mineral Resources of the United States and their Utilization" at the World's Industrial and Cotton Centennial Exhibition of 1884–'5 in New Orleans.

DEWEY, Melvil, librarian, b. in Adams Centre, Jefferson co., N. Y., 10 Dec., 1851. He was graduated at Amherst in 1874, and was acting librarian there from 1873 till 1876, when he removed to Boston and devoted himself to popular education through the simplifying and systematizing of libraries and library work, the introduction of the international or metric system of weights and measures, and the simplification of English spelling. He has been a contributor to periodical literature in the advancement of his ideas, has prepared various catalogues, and edited the "Library Journal" from 1876 till 1881, "Library Notes," the "Metric Bulletin," "Metric Advocate," and "Spelling-Reform Bulletin." He became manager of the Library Bureau in 1876, chief librarian of Columbia college in 1883, and professor of library economy and director of the Columbia college library school in 1887. He is the author of a "Classification and Subject-Index for Cataloguing and Arranging the Books and Pamphlets of a Library" (Amherst, 1876); and "Decimal Classification and Relativ Index" (Boston, 1885).

DEWEY, Orville, theologian, b. in Sheffield, Mass., 28 March, 1794; d. there, 21 March, 1882. His ancestors were among the first settlers of Sheffield, where he spent his early life, alternately working upon his father's farm and attending the village school. He was naturally thoughtful, and was encouraged in his love of reading by his father. His mother's piety had great influence in the formation of his character. The strict Calvinism that colored the religious life around him was greatly tempered by his intercourse with his cousin, Paul Dewey, who was an able mathematician and a skeptic with regard to the prevailing theology. His parents had him so thoroughly prepared for college that he entered the sophomore class in Williams, where he was graduated in 1814. He then returned to Sheffield, where he engaged in teaching, and afterward went to New York, becoming a clerk in a dry-goods house. He was graduated at Andover theological seminary in 1819, and for eight months was agent for the American education society, having declined an immediate and permanent pastorate on account of his unsettled views regarding theology. Notwithstanding a very candid expression of his opinions, he was offered a pulpit in Gloucester, which he accepted temporarily. He soon became a Unitarian, and was appointed to be the assistant of Dr. Channing, in Boston, with whom he formed a lasting friendship, and whose church he supplied during its pastor's travels in Europe. In 1823 he became pastor of the Unitarian church in New Bedford, remaining there for ten years, until he went to Europe on account of his health. He was called to the 2d Unitarian church of New York in 1835, which during his ministry built the Church of the Messiah. In 1842 his health again failed, and he went a second time to Europe, returning in 1844. He was compelled to resign his charge in 1848, and retired to his farm in Sheffield, where he prepared a course of lectures for the Lowell institute of Boston, on the "Problem of Human Life and Destiny," which course was repeated twice in New York, and delivered in many other cities. This was followed by a second Lowell course, in 1855, on the "Education of the Human Race," which was widely repeated. Dr. Dewey was called to a church in Albany, where he remained one year, and to Washington, where he spent two years. In 1858 he again settled in Boston as pastor of the society called the "New South," but retired after four years of service, and once more returned to his farm in Sheffield, where he resided until his death. He lectured frequently, and appeared in public for the last time in the old Congregational church at the centennial celebration, 18 June, 1876. His controversial articles and sermons were reprinted in a cheap form by the Unitarian association. His first book was "Letters on Revivals." His works were issued in a collected edition (3 vols., New York, 1847); and again (1 vol., 8vo, London, 1844).—His daughter, **Mary E.,** author, b. in Sheffield, Mass., has translated George Sand's "Miller of Angibault," and edited "The Life and Letters of Catherine M. Sedgwick" (New York, 1871).

DE WINT, John Peter, b. in New York city in 1787; d. in Fishkill, N. Y., 17 Nov., 1870. At an early age he removed with his parents to Fishkill on the Hudson, where his father had purchased a large estate. He was a staunch republican and an eminent and wealthy citizen.—His wife, **Caro-**

line Abigail Smith, was a daughter of Col. William S. Smith, who served with distinction under Washington. She edited her mother's letters under the title of "The Correspondence of Miss Adams, daughter of John Adams" (New York and London, 1847). The greater number of these letters were written during Miss Adams's travels abroad before her marriage with Col. Smith, which took place in London, 12 June, 1786. Mrs. Smith died in Quincy, Mass., on 14 Aug., 1813, and in 1814 her daughter Caroline married Mr. De Wint.

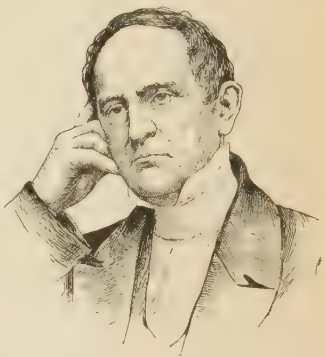
DE WITT, Benjamin, scientist, b. in 1774; d. in New York city in 1819. He was a practising physician in New York, and published a treatise on "Oxygen" (New York, 1797); "An Oration" (1808); and "Minerals in New York," in transactions of the American association of science.

DE WITT, Charles, member of the Continental congress, b. in 1728; d. in Kingston, N. Y., in September, 1787. He was a delegate from New York to the old congress during its sessions in Philadelphia, Princeton, and Annapolis in 1783, at Trenton, N. J., in 1784, and the first session in New York city in 1785.

DE WITT, John, clergyman, b. in Catskill, N. Y., in August, 1789; d. in New Brunswick, N. J., 11 Oct., 1831. He studied for a time at Union, but was graduated at Princeton in 1809, studied theology with Dr. Porter in Catskill, was licensed to preach in 1811, and held pastorates in the Reformed Dutch church at Lanesborough, Mass., and Albany, N. Y., till 1823, when he became professor of ecclesiastical history in the theological seminary at New Brunswick, N. J. In 1825 Dr. De Witt assumed also the professorship of belles-lettres, criticism, and logic in Rutgers college. The three chairs he filled until his death. His publications were confined to occasional discourses.—His son, **John,** b. in Albany, N. Y., 19 Oct., 1821, was graduated at Rutgers in 1838, and at the New Brunswick seminary in 1842. He was ordained in the Reformed church and was pastor at Ridgeway, N. Y., in 1842–'4, at Ghent in 1845–'8, at Canajoharie in 1848–'9, and at Millstone, N. J., from 1850 till 1863, when he became professor of sacred literature in the theological seminary at New Brunswick. He was a member of the Bible revision committee, and is the author of "The Sure Foundation and How to Build on it" (New York, 1860), and a new translation of the Psalms (1885).

DE WITT, Simeon, surveyor, b. in Ulster county, N. Y., 25 Dec., 1756; d. in Ithaca, N. Y., 3 Dec., 1834. He was graduated at Queen's (afterward Rutgers) college in 1776, being the only graduate in that year. He joined the army of Gen. Gates, was present at the surrender of Burgoyne, and from 1778 till 1780 was assistant topographer to the Continental army, and then chief of the topographical staff of Gen. Washington until the close of the war in 1783. In 1784 he became surveyor-general of the state of New York, in which post he remained until he died. He performed valuable services in locating lands and laying out roads, and was one of the chief promoters of the Erie canal. To Mr. De Witt it was long believed we were indebted for the extraordinary classical names of Carthage, Pompey, Sempronius, etc., given to various townships of the state. His supposed pedantry and folly afforded a fine theme for one of Drake and Halleck's "Croakers." But it is now known that the real culprit was the deputy-secretary of state of that period. In 1796 De Witt was nominated surveyor-general of the United States, but declined. He was for many years a resident of Albany, and was active in advancing its literary and material interests. He became a regent of the state university in 1798, vice-chancellor in 1817, and chancellor in 1829. He published a map of New York (1804), and a treatise on the "Elements of Perspective" (Albany, 1813). Dr. T. Romeyn Beck published a "Eulogium" on his life and services (Albany, 1835).

DE WITT, Thomas, clergyman, b. in Kingston, N. Y., 13 Sept., 1791; d. in New York city, 18 May, 1874. He was graduated at Union in 1808, studied theology with the Rev. Drs. Froeligh, of Schralenburg, N. J., and Brodhead, of Rhinebeck, N. Y., and in the Theological seminary at New Brunswick, where he was graduated in 1812. The same year he was ordained pastor of the combined congregations of New Hackensack and Hopewell, Dutchess co., N. Y., where he remained until 1827, when he accepted a call to the Collegiate Dutch church of New York city, of which he was the senior clergyman from 1858 until his death. He was vice-president for many years of the New York historical society, and its president in 1872–'4; also an active director of the Bible, Colonization, Tract, and Sunday-school societies, as well as the boards of his church. He published very little, even his sermons being generally unwritten. He was one of the last of the ministers of the Reformed Dutch church who could preach in the Dutch language.



Thomas DeWitt

DE WITT, William Radcliffe, clergyman, b. in Clinton, Dutchess co., N. Y., 25 Feb., 1792; d. in Harrisburg, Pa., 23 Dec., 1867. He was trained to mercantile life, but studied theology with Dr. Alexander Proudfit. Leaving his studies to volunteer in the war of 1812–'5, he fought under Com. McDonough on Lake Champlain. After the war he completed his theological course with the Rev. Dr. John M. Mason, of New York city, and became, in 1818, pastor of the church in Harrisburg, over which he presided until his death. From 1854 till 1867 he filled the office of state librarian, and interested himself in the public-school system of the state.—His son, **John,** clergyman, b. in Harrisburg, Pa., 10 Oct., 1842, was graduated at Princeton in 1861, studied law, then theology, in Princeton seminary and the Union theological seminary in New York city, and was ordained, 9 June, 1865. From 1865 till 1869 he was pastor at Irvington, N. Y., then till 1876 of the Central Presbyterian church in Boston, Mass., and of the 10th Presbyterian church in Philadelphia from the latter year till 1882, when he became professor of ecclesiastical history in Lane seminary, Cincinnati, Ohio. He has published "Sermons on the Christian Life" (New York, 1885).

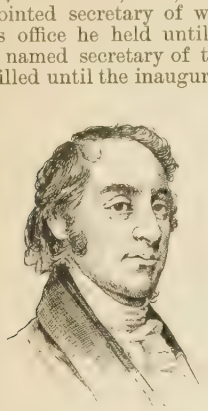
D'WOLFE, James, senator, b. in Bristol, R. I., in 1763; d. in New York city, 21 Dec., 1837. He was elected U. S. senator from Rhode Island, but served only from 3 Dec., 1821, till December, 1825, when he resigned the office.

DEXTER, Henry, sculptor, b. in Nelson, Madison co., N. Y., 11 Oct., 1806; d. in Cambridge, Mass., 23 June, 1876. His father died when Henry was a child, and in 1817 he removed with his family to Pomfret, Conn., where he worked on a farm, and was afterward indentured to a blacksmith. After serving his apprenticeship he married, and began business for himself, continuing in it seven years. He excelled as a worker in metals, and often attributed his subsequent power of using the chisel to this early training. The occupation had always been distasteful to him, however, and, determining to become an artist, he went to Providence, R. I., where, though self-taught, he had some success as a portrait-painter. He removed in 1836 to Boston, and in the following year to Cambridge, where he passed the remainder of his life. His attention was turned to sculpture about 1840, and he afterward confined himself to that art. He may be named with Crawford, Powers, and Hart as a pioneer of American sculpture; but, unlike them, he never left this country, holding with Palmer that it was not necessary for American artists to go to Italy either for inspiration or for instruction, and that our artists who live abroad lose their claim to be called distinctively American. Mr. Dexter never saw a sculptor model in clay, nor chisel the marble, until years after he was a master in his art. He achieved special success in his portrait busts, of which he made nearly 200. His first marble bust was that of Mayor Samuel Eliot, of Boston. His "Binney Child," in Mount Auburn cemetery, is said to be the first marble statue executed in this country. In 1860 he modelled the busts of all the governors of the United States then in office, with the exception of the governors of California and Oregon, giving about a week to each, and travelling 17,000 miles. The collection, numbering thirty-one busts, was intended for the capitol at Washington, but the civil war prevented the consummation of his plan. Other portrait busts by his hand are those of Charles Dickens, Longfellow, Agassiz, Henry Wilson, and Anson Burlingame. His statues include "The Backwoodsman," now at Wellesley college (1847); "The Cushing Children" (1848); "Gen. Joseph Warren at Bunker Hill" (1857); and "Nymph of the Ocean" (1870).

DEXTER, Henry Martyn, clergyman, b. in Plympton, Mass., 13 Aug., 1821. He was graduated at Yale in 1840, at Andover theological seminary in 1844, and was called to be pastor of the Congregational church at Manchester, N. H., in the same year. In 1849 he removed to Boston, and remained in charge of what is now the Berkeley street Congregational church until 1867. From 1851 till 1866 he was editor of the "Congregationalist," and from 1859 till 1866 of the "Congregational Quarterly," the publication of which he began in connection with Drs. Clark and Quint. In 1867 he resigned his pastorate to become editor-in-chief of the consolidated "Recorder" and "Congregationalist," which he still edits (1887). He has been a frequent contributor of historical essays to periodical literature. In 1865 he received the degree of D. D. from Iowa college, and in 1880 from Yale. From 1877 till 1880 he was lecturer on Congregationalism at Andover theological seminary. Among his published works are "The Voice of the Bible the Verdict of Reason" (1858); "Street Thoughts" (1859); "Congregationalism: What it is, Whence it is, How it Works, Why it is better than any other Form of Church Government, and its Consequent Demands" (1865; 5th ed., 1879); "The Verdict of Reason upon the Future Punishment of those who Die Impenitent" (1865); "The Church Polity of the Pilgrims the Polity of the New Testament" (1870); "As to Roger Williams, and his 'Banishment' from the Massachusetts Colony" (1876; 2d ed., 1877); "The Congregationalism of the last Three Hundred Years, as seen in its Literature, with Special Reference to Certain Recondite, Neglected, or Disputed Passages," with a Bibliographical Appendix (New York, 1880); "A Hand-book of Congregationalism" (Boston, 1880); "Roger Williams's Christenings make not Christians: a Long-lost Tract Recovered and Exactly Reprinted, and Edited" (Providence, 1881); "The True Story of John Smyth, the Se-Baptist, etc." (1881); and "Common Sense as to Woman Suffrage" (1885). The "Congregationalism of the Last 300 Years" is enriched with a bibliography containing 7,250 titles. He has also edited, for private reprint, Church's "Eastern Expeditions" and his "Entertaining Passages Relating to Philip's War," together with Mourt's "Relation," from the first editions. He has prepared in manuscript "A Bibliography of the Church Struggle in England during the Sixteenth Century," with 1,800 titles. For many years he has been preparing a history of "Old Plymouth Colony," the first volume of which, devoted to the "Pre-history of the Colony, with the English and Dutch Life of the Plymouth Men," will appear in 1887.

DEXTER, Samuel, merchant, b. in 1726; d. in Mendon, Mass., in 1810. He was the son of Rev. Samuel Dexter, of Dedham, Mass., who was graduated at Harvard in 1720. He accumulated a competency in mercantile pursuits in Boston before he had reached the age of fifty, and devoted much time to historical studies. In the discussion between the mother country and her colonies that preceded the Revolution, Mr. Dexter took very strong ground, basing his views on the legislative precedents in which he was well versed. While not displaying the ardor of Otis, Warren, or Hawley, nor, on some questions, perhaps, the firmness of Adams, he labored not less zealously than they, in company with such men as Bowdoin and Winthrop, to inform the people on the important questions then in debate, and to confute and expose the fallacies of Govs. Bernard and Hutchinson. He and his friends pointed out the danger of the policy pursued by the British ministry, and sought to convince their fellow-citizens that all that was dear to them was at stake. He was a member of the governor's council before the Revolution, and for several years between 1765 and 1775 served on the more important committees of both the house and the council. In 1776–'7, and subsequently, he was chosen one of the supreme executive council of the state. In his later years he retired from public service and devoted much time to religious investigations. These led him to reject the doctrines of Calvin, and to incline strongly toward the Arminian. At his death he left a legacy of $5,000 to Harvard for the encouragement of biblical criticism. He also bequeathed $40 to a clergyman, on condition that the latter should deliver a funeral sermon in his memory without making any mention of his name, the discourse to be based on the text, "The things which are seen are temporal; but the things which are not seen are eternal."—His son, **Samuel,** jurist, b. in Boston, 14 May, 1761; d. in Athens, N. Y., 3 May, 1816, was graduated at Harvard in 1781, and, having studied law at Worcester, Mass., with Levi Lincoln, was admitted to the bar in 1784. After practising for some years in Worcester and Middlesex counties, he removed to Boston, which he made his home for the remainder of his life. He was a

member of the Massachusetts house of representatives in 1788–'90, served in the lower house at Washington in 1793–'5, and was elected to the U. S. senate, in which body he sat from 2 Dec., 1799, until June, 1800, when he resigned, on being appointed secretary of war by President Adams. This office he held until 31 Dec., 1800, when he was named secretary of the treasury, which place he filled until the inauguration of President Jefferson. He then returned to the practice of the law, appearing every winter at Washington in important cases before the U. S. supreme court. He was a close reasoner and an able logician, and in pleading chose to rely more on the strength of his arguments than on *ad captandum* appeals to the jury; yet he could be pathetic and impressive in addressing himself to the feelings and the moral sense. He began life a decided federalist, but gradually separated from the party, supporting President Jefferson's war policy, and in 1812 going with the republicans in advocating a contest with England. But he never considered himself a member of the latter organization, and, on being nominated as the republican candidate for governor of Massachusetts, in 1816, a few weeks before his death, he published an address to the electors, declaring that he differed radically with that party. His name was not withdrawn, however, and he was defeated by a majority for his opponent of 2,000 out of 47,000 votes. In 1815 he was offered a special embassy to Spain by President Madison, but declined it. In 1813 he received the degree of LL. D. from Harvard. He was the first president of the first society formed in Massachusetts for the promotion of temperance, in which question he took great interest. He died of scarlet fever, in the prime of life, while visiting Athens, N. Y., to attend the wedding of his son. He was the author of the reply of the senate to the address of President Adams on the death of Washington, and published a "Letter on Freemasonry"; "Progress of Science," a poem (1780); and "Speeches and Political Papers," besides political pamphlets.—His son, **Franklin,** lawyer, b. in Charlestown, Mass., 5 Nov., 1793; d. in Beverly, Mass., 14 Aug., 1857, was graduated at Harvard in 1812, and in 1857 received from that college the degree of LL. D. He studied for the bar, and soon attained a good position in his profession. He filled many public offices, and was elected to both branches of the state legislature. In 1836 he was a member of a select committee on the revised statutes. He served as U. S. district attorney from 1841 till 1845, and was reappointed by President Taylor in 1849. His reputation for professional learning and logical acuteness was greatly increased by his able defence of the Knapps, who were tried for the murder of Capt. White, of Salem, in 1830, Daniel Webster being employed for the prosecution.



DEXTER, Simon Newton, manufacturer, b. in Providence, R. I., 11 May, 1785; d. in Whitesboro, N. Y., 18 Nov., 1862. He was a son of Andrew Dexter, the first manufacturer of cotton goods in the United States, and a nephew of Samuel Dexter, of Boston, secretary of the treasury under President John Adams. He matriculated at Brown university, but soon left that institution to engage in business in Boston. In 1815 he removed to Whitesboro, N. Y., and in 1817 built a section of the Erie canal. In 1824–'9 he performed a similar service in the construction of the Chesapeake and Delaware canal. On returning to Whitesboro he became agent of the Oriskany Manufacturing company, and in 1832 assumed charge of the Dexter company. He was also largely interested in manufactures elsewhere in the state of New York and in Elgin, Ill. He served as a trustee of Hamilton college, and for several years supported a professorship, giving the college in all about $32,000. He was president of the Whitestown bank (1833–'53), canal commissioner in 1840, and manager of the State lunatic asylum from 1849 till 1862.

DEXTER, Timothy, merchant, b. in Malden, Mass., 22 Jan., 1743; d. in Newburyport, 26 Oct., 1806. He learned the trade of leather-dressing, and in 1764 began business on his own account in Charlestown, Mass. He made much money by his trade, and also by the purchase of the depreciated continental money, which was greatly increased in value after Hamilton's funding system went into operation. Being now wealthy, Dexter assumed the title of "Lord," but failed to obtain social recognition in Boston or Salem, and removed to Newburyport, where he purchased two large mansions, one of which he sold at a profit, and the other he fitted up as his palace in a bizarre style, prompted by his capricious taste. He raised minarets on the roof of his mansion, surrounded with a profusion of gilt balls, and in his garden erected rows of columns, fifteen feet high, on which he placed colossal images of Jefferson, Adams, and others, carved in wood, Washington occupying the place of honor on a Roman arch that stood in front of the door. One peculiarity of his whim was that he continually changed the names of his great men, and the Gen. Morgan of yesterday might become the Bonaparte of to-day or the Nelson of to-morrow. Dexter placed himself among the great, whom he delighted to honor, and labelled his column "I am the greatest man in the East." There were upward of forty of the figures, including four lions, two couchant and two passant, the whole costing about $15,000. He kept a poet laureate, named Jonathan Plummer. Though his inordinate vanity and shrewdness alone saved him from complete mental imbecility, he yet had powerful passions, and the artist that lettered his images, having opposed his wishes, narrowly escaped death from a pistol fired by his patron. He had seen, at the houses of Hancock and Russell, cases of well-bound books, and he forthwith bought the best-bound books he could find, irrespective of contents; and, having heard that the nobles in England had a great passion for paintings, he employed a young gentleman of taste to purchase pictures for him in Europe, but, on his return, Dexter selected all the daubs and declined to take the others. He had a coat of arms painted on his coach, with baronial supporters, and was never happier than when the boys ran after his coach and cream-colored horses, crying "Huzza for Dexter's horses!" But when their admiring cries no longer followed him, his love for cream-colored horses died away. Though he was the same imitative creature in his commercial speculations that he was in other respects, he was almost invariably successful. Certain mischievous merchants' clerks at one time induced

him to send a large lot of warming-pans to the West Indies as part of an assorted cargo. The captain put his Yankee ingenuity to work, called them skimmers, and introduced them into a sugar-making establishment, where they met with such favor that the whole lot was soon sold to great advantage. Dexter purchased a country seat in the town of Chester, N. H., and again made an ostentatious display of his wealth in an absurd ornamentation of his house, in erecting magnificent stables and enormous pigeon-houses; but, as he became quarrelsome, the neighbors frequently repaid his impudence with a horse-whipping. When the news of the death of Louis XVI. reached Boston, Dexter was there, and at once hastened to Newburyport and bribed the sextons to ring the passing-bell before he circulated the tidings of the monarch's death. In anticipation of his own death, he had an elegant coffin made and a tomb prepared, and arranged a mock funeral (supposed by many to be real), and caned his wife because she failed to shed tears at the pageant. His remarks at times showed great acuteness, as on one occasion, when the papers were teeming with Lord Thurlow's famous remark, "When I forget my king, may my God forget me," he travestied it to "When I forget myself, may God forget me." Were this all there were to relate of Lord Timothy Dexter's achievements, he might be regarded with a contempt that still left room for pity; but his bacchanalian orgies and licentious escapades preclude almost every feeling but that of disgust. Toward the close of his career he appears to have regretted his follies. The disposition of his wealth was judicious, and showed that he was not wanting in regard for his relatives. Being desirous of reputation as an author, he published a book entitled "A Pickle for the Knowing Ones," and, having been annoyed by the printers about punctuation, he retaliated by writing a pamphlet without a point of any kind, and at the end filled half a page with points in a mass, inviting the readers to "pepper the dish to suit themselves."

DE ZENG, Frederick Augustus, Baron, soldier, b. in Dresden, Saxony, in 1756; d. in Clyde, N. Y., 26 April, 1838. He received a military education, and at the age of eighteen became lieutenant of the guard in the service of the landgrave of Hesse-Cassel. He saw service in Moravia and Bohemia, and in 1776 received the court appointment of gentleman of the chamber. He came to this country about the close of 1780 as captain of one of the Hessian regiments in the British service. He was honorably discharged from the German service in 1783, and in 1784 married an American lady and purchased an estate at Red Hook, N. Y. He was naturalized in 1789, and in 1792 commissioned major of a battalion of militia in Ulster county, N. Y., in which county he had become joint owner with Chancellor Livingston of a large tract of land. He was intimate with Gov. Clinton, interested like him in the opening of the interior water communications of the state, and personally surveyed in 1790–'2 the entire country from Albany to the Genesee river. He was connected with Gen. Schuyler in the Western Inland Lock Navigation company, and in 1796 was one of three who established near Albany a manufactory of window-glass, the first in the state, which proved a financial success until 1815, when it closed, owing to failure of fuel in the neighborhood. In 1812 he suggested measures that resulted in the improvement of the navigation of Seneca river and its associated lakes, and in 1814–'5 began what ultimately became the Chemung canal. He resided at Kingston, Ulster co., and later at Bainbridge, Chenango co., N. Y., where he built and owned the bridge over the Susquehanna river.

DÉZIEL, Joseph David, Canadian R. C. prelate, b. in Maskinongé, province of Quebec, 21 May, 1806; d. in Levis, 25 June, 1882. He was educated in the theological schools of Quebec, and ordained a priest in 1830, and was appointed vicar at Rivière du Loup the same year. He became pastor of St. Joseph de Levis in 1843, and first curé of Notre Dame de Levis in 1852. He was the founder of the town of Levis, and also founded in that place the church of Notre Dame, the Commercial and classical college, the convent of the Sisters of Charity, and St. Joseph's hospital. He was a prelate of the church, and was secret *camerière* to Pope Leo XIII. He was not less distinguished for his love of science than for his piety and benevolence.

DIAS, Bartholomew (de'-as), Portuguese navigator, b. about the middle of the 15th century; lost at sea, 29 May, 1500, while on his way from Brazil to India. In 1486 he sailed on an expedition to explore the western coast of Africa, and, without knowing it, was carried around the southern point of the continent and landed at the mouth of Great Fish river, where he discovered that he was on the eastern coast. The stormy cape which he doubled on his return in 1487 he called Cabo Tormentoso, a name which the king of Portugal changed into Cabo de Boa Esperança, or Cape of Good Hope. He subsequently sailed on another African expedition under Vasco de Gama, and commanded one of the vessels of the fleet with which Cabral discovered Brazil.

DIAS, Gonçalves Antonio, Brazilian poet, b. in Caxias, Brazil, 10 Aug., 1823; d. at sea in 1864. At an early age he studied law and philosophy at the University of Coimbra, Portugal. Returning to his native land, he for a time practised law in Mavanham, and thence went to Rio de Janeiro, retiring from his profession and devoting himself to science and literature. Afterward he became professor of history in the Dom Pedro II. college. Prof. Dias made several visits to France and Germany in the interest of science and for his health. Among his writings are "Primeivos Cantos" (Rio de Janeiro, 1846); "Leonor de Mendonca," a drama (1847); "Segundos Cantos" (1848); "Ultimos Cantos" and "Os Tymbivas," an epic (Leipsic, 1857); and "Diccionario da lingua Tupy," an Indian dialect (1858). Dias also wrote many interesting papers on historical subjects, especially on the migration of the Indian tribes, and also a good report entitled "Brazil e Oceania."

DIAS, Henrique, Brazilian soldier, b. in Pernambuco at the end of the 16th or beginning of the 17th century; d. in Recife, 31 Aug., 1661. He was of pure African blood, and received but scanty education. In 1633 the Portuguese army was suffering continuous defeats from the invading Dutch forces, who advanced to the conquest of the country, when a party of negroes, headed by Dias, appeared before Gen. Matias de Albuquerque, commanding the Portuguese, and offered to fight against the invaders. Albuquerque confirmed Dias as captain of his men, and on 18 Sept. of the same year Dias rendered great service, guiding an expedition of 200 Portuguese to cut off the march of 1,000 Dutch troops that were coming to the relief of Iguarassú. The battle was bloody, and the negro captain fought bravely and was wounded. Till 1635 Dias took part in all the engagements, but on 8 July of that year he was taken prisoner at the fort of Arraial do Bom Jesus, after a three-months' siege and a heroic defence. The Dutch, mistaking the negro for a man of no importance,

left him at liberty, and, after hiding for some time in the woods, Dias rejoined the Portuguese army and gave them tidings of the fall of Arraial do Bom Jesus. On 9 July he distinguished himself again in a battle under the orders of Felippe Camarão. On 17 and 18 Feb., 1637, the negro captain, at the head of a company of eighty of his race, took again a prominent part in the battle of Porto Calvo. He was dangerously wounded in the left hand during the battle, and had it immediately amputated so as to return to the fight without loss of time. On recommendation of the commander-in-chief, he was rewarded by the king of Spain and Portugal with knighthood and the cross of the order of Christ, and was also appointed chief commander of all the colored troops. From 1637 till 1645 Dias distinguished himself as a guerilla chief in the defence of San Salvador da Bahia, and in the repulse of the forces of Prince Maurice of Nassau. In 1645 he deserted with his colored troops from Bahia to join the forces that had risen against Spanish rule. He passed through the districts of Sergipe and Sao Francisco, and in Alagoas roused the inhabitants to revolt, joining afterward the forces of Cardoso and Fernández Vieira, who were at the head of the insurgents in the province. From 1645 till 1654 Dias took part in numerous engagements, and, while the other generals were absent for the conquest of Itamaracá, he commanded for some time the forces besieging Recife, and was again victorious in the two battles of Guararapes; in fact, excepting the capitulation of Arraial do Bom Jesus, he was never defeated in twenty-one years of warfare. Yet, while the Portuguese government, after the expulsion of the Dutch invaders and the independents from Spain, rewarded liberally all the chieftains of the war in the province of Pernambuco, Dias was forgotten, and died in poverty. But his name was given to a regiment, which has always been commanded by a man of the negro race.

DIAS VIEIRA, João Pedro, Brazilian statesman, b. in Guimarães, 30 March, 1820; d. 30 Oct., 1870. He studied law at Maranhão, and was admitted to the bar at Sao Paolo. In 1842 he was appointed district attorney for the capital of his province; but, as he soon afterward entered politics in the liberal party, at that time in the opposition, he had to resign this office. In 1846, under a change of ministry, he was again appointed district attorney for Itapicura-mirim, and elected soon afterward a member of the provincial assembly of Maranhão, where he distinguished himself by his moderation and as an orator, and exercised great influence in the government of the province. In 1852 he was appointed attorney-general of the provincial treasury, and, two years later, general director of public lands of the province, and occupied, at the same time, the chairs of philosophy, rhetoric, and geography in the seminary of the bishopric. He was appointed governor of the province of Amazonas in 1855, and filled this place until 4 Jan., 1857, when he was elected deputy to the Chamber of representatives, and became in 1860 deputy-general for his province. From 1858 he interested himself in steam navigation on the rivers, and in the chamber obtained the protection of the national government for it. On 15 Jan., 1864, he was appointed minister of the navy, and on 15 March minister for foreign affairs. A new ministry was formed on 31 Aug., but only a few days passed before Dias Vieira was again called to take charge of the portfolio of foreign affairs. The country was involved in a foreign war, and Dias's activity was so great that, within nine months, the nation, which at the beginning of the war had not a single ship, found itself in the possession of a powerful fleet and a well-disciplined army. Dias Vieira was rewarded with the title of imperial councillor and other distinctions. He left no estate, and the government gave his widow a pension of 2,200 milreis.

DIAZ, Alonso, Spanish soldier, b. in Seville, Spain, early in the 16th century; d. in Cuzco about 1556. He sought his fortune in the New World, became son-in-law of the former governor of the Isthmus of Panama, Pedrarias Davila, and was one of the conquerors of Cuzco, where he settled. He was distinguished for his gigantic strength, and is said to have killed the Indian prisoners by suffocating them in an embrace, so that the emperor, Charles V., issued a decree forbidding such acts. Diaz also suffocated one of the most famous Indian wrestlers in a trial of strength, and on one occasion is said to have carried his war-horse on his shoulders. In 1553 he was one of the principal accomplices of Francisco Hernandez Giron against Pizarro's successor. After the battle of Pucara, Diaz surrendered in the royal camp, and was pardoned by the judges of the Audiencia, as they were unaware that Giron had already sought safety in flight, fearing that he would be delivered to the royal forces by his own followers. Diaz settled again in Cuzco, but, as he continued his rebellious attempts, he was made a prisoner by the mayor, Bautista Muñoz, and, together with several other conspirators, was executed by the garrote, by order of the viceroy, Marquis de Cañete, and his estate was confiscated. Several books and poems have been written about the adventures of Alonso Diaz.

DIAZ, Camargo Antonio, explorer, b. at the close of the 17th century. He was the first to explore the province of Minas in Brazil. He was commander of a party of explorers called "bandeiras," composed of the mestizos of Sao Paolo, and examined that part of the country known as Villa Rica, and discovered a great quantity of gold. Thus was founded the city of Villa Rica, or, as it is sometimes called, Ouro Preto (dark-colored gold).

DIAZ DEL CASTILLO. See CASTILLO.

DÍAZ DE LUGO, Juan Bernardo (de-ath-da-lu'-go), Spanish R. C. bishop, b. in Seville at the close of the 15th century; d. in 1556. He was professor in Salamanca of belles-lettres and the dead languages. He was present at the council of Trent and became bishop of Calahorra. He spent thirteen years in America. Of his works, the best-known are "Práctica criminal económica"; "Reglas de derecho"; "Antídoto contra la desesperación"; "Instrucción de Prelados"; and "Comentarios á Isaias."

DIAZ DE PINEDA, Gonzalo (de-ath-da-pena'-dah), Spanish soldier, b. in Torrelavega early in the 16th century; d. in Peru in 1545. He went to Peru with Francisco Pizarro on his last expedition (1531), and in 1534 accompanied Sebastian Velalcazar in the conquest of what was afterward called the "New Kingdom of Granada." In 1535 he was sent by Velalcazar to explore the river Magdalena, the upper course of which the expedition had reached, down to its mouth, and acquire information about the adjacent country. He entered the territory of the Indians called Quijos and Canelos, which he discovered in 1536, and his glowing description of the richness of these countries gave rise, some years later, to the unfortunate expedition of Gonzalo Pizarro to Canelos and Amazonas. In 1539 Diaz was appointed governor of Quito, and, by order of the judge, Lorenzo Aldana, imprisoned and sent to Lima Diego Sandoval and Cristobal Daza, friends and followers of Velalcazar, who was in a revolt against Pizarro. In the

beginning of 1540 he marched with Gonzalo Pizarro in his famous expedition for the conquest of the country of the Canelos, visited formerly by Diaz, and for the exploration of the country east of the Andes. Diaz rendered valuable services to Pizarro in this unfortunate expedition by his practical knowledge of the Indian countries, as well as by his endurance of fatigues and hardships. Diaz, with only a handful of followers, went in search of the expedition of Francisco Orellana, who, after the provisions had given out, had been sent down the river Napo in search of supplies in the beginning of 1541, but, finding only a wilderness, had descended the Amazon, which he discovered to its mouth. Seeing the fruitlessness of his errand, Diaz returned in search of Pizarro, being continually harassed by the Indians, and was the principal means of extricating the half-famished expedition from the wilderness and bringing it, although with heavy losses, to Peru. In 1544, when Gonzalo Pizarro rose in rebellion against Nuñez de Vela, Diaz de Pineda, at that time in Lima, offered his services to the viceroy, and advised him to send an expedition to the interior. The viceroy sent him to Jauja at the head of a company of infantry and a force of cavalry, with his nephew, Vela Nuñez, the object being to prevent the junction of a force from Huanuco, under command of Pedro Puelles, with Pizarro's army in Cuzco. But scarcely had Diaz Pineda's force entered the Andes mountains when he (being Puelles's son-in-law) pretended that he was forced by his officers to pronounce for Pizarro, and joined Puelles, young Vela Nuñez barely escaping. Gonzalo Pizarro sent Dias Pineda in 1545, with Geronimo de Villegas, to Trujillo and Piura to recruit soldiers. Meanwhile the viceroy had been set at liberty by one of the judges, and, landing at Tumbez, gathered forces to march against Diaz Pineda, at that time in Piura, who had surprised and killed in Bracamoros Capt. Heredia, of the government forces. Diaz retreated from Piura, but surprised a part of the advancing forces at Chachayoyas and defeated them. On receipt of this news, the viceroy advanced with the remainder of his forces upon Diaz and surprised him at Colliquén. Seeing his troops dispersed, Diaz sought refuge with Hernando de Alvarado, where he perished, being forced by hunger to eat poisonous plants. Garcilaso de la Vega, in his history of the conquest, relates that the two officers, together with Geronimo Villegas, were killed by Indians.

DÍAZ DE SOLÍS, Juan, Spanish navigator, b. in Lebrija, Spain, in 1471; d. in South America in 1516 (or, according to Barcia and Sala, in 1515). In 1506 he sailed from Cadiz in command of a carvel, together with Vicente Yañez Pinzon, and, following the course taken by Columbus from the island of Guanajos to discover new countries on the American continent, they entered the Gulf of Mexico, discovered the coast of Yucatan and the bay of Campeachy, which they called Gulf of the Nativity, and saw the mountain range of Curia. In 1507 they returned to Spain, and Diaz was appointed by the king, together with Amerigo Vespucci and Collado, member of a council of pilots, presided over by the king himself, at which it was resolved to continue the exploration of the Atlantic coast of South America, and Diaz was appointed commander, with the title of royal pilot. He left Seville in 1508 with two carvels, one commanded by Yañez Pinzon, and from the Cape Verde islands they made land at Cape St. Augustin and sailed southward as far as 40° S., recognizing the coast and landing at several points, taking possession in the name of the king of Spain, and erecting crosses (1509). Having quarrelled with Pinzon, he returned the same year to Spain. The king considered Diaz guilty, and sent him to prison. But afterward his innocence was recognized, he was awarded 34,000 maravedis indemnity, and several distinctions, and at the death of Vespucci received the title of chief pilot of the kingdom. He was considered the most expert mariner of that time. In 1515 he was again sent on an expedition to complete the discovery and take possession of South America, and on 8 Oct. of that year sailed from Lepe, Spain, with two ships. In this voyage he discovered many new points of the coast, entered Rio de Janeiro, and, sailing southward, discovered an island which he called La Plata; then taking a southwest course, he discovered land, and in 27° S. a bay, which he called Bahia de los Perdidos, passed Cape Corrientes, and visited the island of San Sebastian, which he called Lobos. He entered the port of Nuestra Señora de la Candelaria, 35° S., and again took possession of the country in the name of the king of Spain. Afterward he anchored in a broad river, which, believing it to be an arm of the ocean, he called "Sweet Sea," but, finding out that it was a river, called it Solis, which to-day is the river Plate. With one of his ships he ascended the river, and, seeing Indians on the shore, landed with a few sailors, desiring to capture some of the inhabitants and carry them to Spain as a present to the king. But he fell into an ambuscade, and, together with the whole boat crew, was killed in sight of his ship, roasted, and eaten. Diaz Solis was the first who by order of the king designed a marine chart of the coast of America (1506), and afterward examined all the charts designed by other mariners.

DÍAZ MELGAREJO, Ruy, Spanish soldier, b. in Seville, Spain, at the beginning of the 16th century; d. about 1585. After six years of service in the Spanish army in Italy, he went with Gov. Alvar Nuñez Cabeza de Vaca to the Rio de la Plata, in the expedition that sailed on 1 Nov., 1540. He remained by Cabeza de Vaca until 24 April, 1544, when he was deposed through a conspiracy of the royal officers, and Capt. Martinez de Irala was appointed in his place. Diaz Melgarejo protested against these proceedings, and was subsequently put into prison, notwithstanding he was related to Irala. When Cabeza de Vaca sailed for Spain, Diaz was left at Asuncion, where he began to organize, in company of his relative Diego de Abreu, a party called the loyalists. When, in 1547, Irala set out toward Peru, he left Fernando Mendoza acting as governor at Asuncion. Mendoza tried, in 1549, to have his authority confirmed, but was thwarted by the election of Abreu, through the exertions of Ruy Diaz. After Abreu had punished Mendoza with death, for attempting to assassinate him, and to avoid Irala's indignation, he fled to the woods, where Diaz kept him company for seven years, until Abreu was killed by emissaries of Felipe Caceres, and Diaz was then imprisoned. Soon afterward Diaz escaped from prison, through the influence of his brother-in-law Irala, and set out with a companion for Brazil, but they were caught by a tribe of Tupi Indians. His companion served as food for them, but Diaz was saved through the affection of an Indian woman, and finally arrived at San Vicente, where he married. But he soon discovered an intimacy between his wife and a lover, and, killing them both, fled to Asuncion. He set out for San Vicente with some Spaniards and a few Portuguese, among whom were the Goes brothers, who were the first to import cattle. They ar-

rived in 1555 at Asuncion, where they were welcomed by Irala, who sent them to conquer and settle the territory of Guayra, with the few remaining partisans of Abreu. Diaz resisted heroically, in the city of Guayra, the fierce attacks of the natives in 1560, and, after several years of continuous struggles, was appointed governor of that city. In 1570 Alonso Riguelme, a nephew of Cabeza de Vaca, was appointed to replace Diaz in his command; but his credentials were disregarded, his family imprisoned, and Riguelme himself was put in chains. Soon after this, Diaz was commissioned to take Riguelme and Felipe de Caceres to Spain. They sailed from Asuncion in 1573. Unfavorable weather forced their ship to enter the Brazilian port of San Vicente, and when Diaz was ready to proceed on his voyage he had to go to the assistance of the new governor, Ortiz de Zarate, against the Charrua Indians. During the term of office of this governor and of his successor Garay, Diaz made new and successful expeditions, which gave him the name of "Invincible Captain." He founded, in 1576, Villarrica del Espíritu Santo, and in 1580 of Santiago de Jerez, or Nueva Vizcaya.

DÍAZ, Miguel, Spanish adventurer, b. in Aragon after the middle of the 15th century. He was in the service of Bartholomew Columbus, brother of the great discoverer, at the time he was in command of Santo Domingo, where he arrived in 1495. Having had a duel with another Spaniard, and wounded him seriously, Diaz fled from the settlement at La Isabella, concealed himself among the Indians, married their queen, and, after many romantic adventures, discovered the gold-mines of St. Christopher, on the banks of the Hayna, in 1504. These were the first mines ever worked by Europeans in the New World. For this service Diaz received a pardon from Columbus. He was in command of the fortress of Santo Domingo when Bobadilla arrived to investigate the conduct of Columbus, and refused to surrender it. He submitted, however, to Bobadilla. In 1509 he was appointed lieutenant-governor of Porto Rico, and nothing more is known of his life. He took a conspicuous part in the foundation of Nueva Isabella, now Santo Domingo.

DÍAZ, Pedro, Spanish missionary, b. in Toledo, Spain, in 1546; d. in Mexico, 12 Jan., 1618. He became a Jesuit in 1566; in 1572 went to Mexico to preach the Gospel, and in 1592 became provincial of his order. His most noted work is "Littera de Missionibus per Indiam Occidentalem ab Jesuitis." He was rector of the Jesuit colleges of Mexico and Guadalajara, went to Rome twice, in 1577 and 1595, and founded new colleges at Puebla, Oaxaca, Michoacan, Guadalajara, and Antequera. He also began the missionary work among the Indians of northern New Spain, now a part of the United States.

DÍAZ, Porfirio, president of Mexico, b. in Oaxaca, 15 Sept., 1830. He received his education in the institute of his native city, and studied law. In 1847, during the American invasion, he joined the national guards, was elected sub-lieutenant, and, after the Guadalupe Hidalgo treaty, he became lieutenant, and studied military science under Commandant Urrea until 1852, when he was made captain of artillery. After the triumph of the party that called Santa Anna to the dictatorship, Diaz, in a fit of discouragement, left the army, and gave his attention to law. At the outbreak of the revolution, provoked by the plan of Ayutla in 1854, he commanded a battalion, and after the flight of Santa Anna, on 9 Aug., 1855, was appointed political and military chief of the district of Yxtlan, in Oaxaca. After Comonfort had been re-elected president in 1857, but had gone over to the reactionary party, and was forced, 21 Jan., 1858, to surrender the executive power to Benito Juarez, Diaz cast his lot with the liberal party, against the reactionary or church party, which, under Miramon and Marquez, began the bloody three years' revolution called the "War of the Reform." Such were his energy and courage that, early in May, 1860, he had achieved the complete pacification of the rebellious state of Oaxaca. After the complete triumph of the liberal party he was elected deputy to the congress of 1861, but he soon took the field again, joining the division led by Gen. Gonzalez Ortega against the reactionary chieftain, Marquez, and obtaining over the latter such a victory that elicited the admiration of his superior, who petitioned the government for the rank of general for Diaz. In the succeeding trying period of the intervention, begun in December, 1861, at the head of a small band of warriors from Oaxaca, he was one of the first to oppose the arms of the invader, and aided Gen. Zaragoza in deciding the victory of 5 May, 1862, in Puebla. Shortly afterward he was appointed governor and military commander of the state of Vera Cruz, but was soon, at his own request, transferred to the army of operation, and, under Gonzalez Ortega's command, took part in the defence of Puebla, besieged by the French army from March till May, 1863, and, on the surrender of the city in the latter month, was made prisoner, but broke his parole and escaped. The government had to fly from the capital, and Diaz was constrained to accept the command of the army, though on condition that he should be relieved after a short period, because he apprehended that his youth might give rise to jealousies among the older generals. After the government was regularly installed at San Luis Potosi he marched southward, and, in November, 1863, invested with full powers for the administration and defence of the southeastern states, Oaxaca, part of Puebla, Chiapas, Tabasco, Campeche, and Yucatan, took up a position between Puebla and Oaxaca. After the arrival of the emperor, Maximilian, in April, 1864, and during the period of intervention and empire, he constituted one of the mainstays of the republican cause, through an uninterrupted series of difficulties and hardships, and, with an effective force that never exceeded 5,000, composed of troops for the most part ill-armed and ill-munitioned, and with insufficient means of support, he turned the tide of invasion. But at last the imperial troops, after success in other parts of Mexico, turned their attention seriously to the southern states, and, invading the state of Oaxaca, besieged Diaz in the capital, where he was forced to capitulate in February, 1865, and was a second time taken a prisoner to Puebla, but a second time escaped in September. In the next year he was again at the head of 900 men in the east, and won at Miahuatlan a victory

over more than double his forces. In the battle of La Carbonera he took 500 Austrian prisoners. After the French army had abandoned Mexico, in February, 1867, Diaz rapidly augmented his forces, and, together with the forces of Gens. Alatorre and Alvarez, who joined him, besieged Puebla, commanded by Gen. Oronos. After a bloody assault, the city was captured, 2 April, 1867. Diaz immediately marched against the army of Marquez, who had attempted to relieve Puebla, defeating him at San Lorenzo, and, after his retreat to the city of Mexico, laid siege to that city, which surrendered on 21 June, 1867. Some acts of cruelty were attributed to Diaz during this campaign. In the French chambers, and especially in the senate, grave charges were brought against him for his unmerciful conduct toward those who fell into his power, and crimes were mentioned by Marshal Forey and several senators in the session of March, 1865. Count Keratry, in his "Elevacion y Caida de Maximiliano," speaks of some facts that he witnessed himself relating to the cruelty of Gen. Diaz during the war, and especially during the sieges of Puebla and Mexico. After the final reconstruction of the republic, Diaz retired to his ranche, "La Noria," in Oaxaca. In the elections of October, 1867, he was an unsuccessful candidate against Juarez for the presidency of the republic, and from that time he continually conspired against the government. In 1870–'1, Diaz having failed in the revolt he had plotted against Juarez, fled, in company with Gen. Galvan, one disguised as a valet and the other as a clergyman, to Sierra de Alica, where Diaz intended to win over to his cause the celebrated bandit, Losada, called the "Tiger of Alica," but, as Losada received him coldly, he sailed for New Orleans by way of Mazatlan. After the bloody pronunciamiento at La Ciudadela in favor of Diaz, having asked an amnesty of Juarez, he was allowed to return to Mexico on condition that he should present himself in that capital as a political prisoner. Instead of keeping his word, Diaz went to Matamoros to conspire again against the government. Juarez ordered his arrest, but, on learning of this order, he hurriedly presented himself to the local authority to assure the government of his fidelity and to decline the candidacy for president. Juarez, as a reward of Diaz's conduct, exerted his influence to have him appointed deputy, but he only remained in congress a short time. Protected by the privileges of a deputy, he joined the revolution, proclaiming the plan called "La Noria." In this revolt he won over Gens. Garcia de la Cadena, Huerta, Toledo, Paz, and several others. The agitators having been defeated at Ovejo, Diaz crossed the river Bravo, and fled for shelter to Brownsville, Texas, where he remained hidden until the sudden death of Juarez in 1872. When under Lerdo, Juarez's successor, amnesty was decreed, Diaz returned to his country, and remained at the estate of La Candelaria for some time. At the general elections in the same year Diaz was elected a deputy to the congress of the union, but joined the new revolution. In 1875 he adopted and proclaimed the plan of Tuxtepec, reformed in Palo Blanco, 1876, advocating free suffrage, the abolition of internal revenue and excise laws, the independence of the federal district, and the ineligibility of the president to succeed himself. He won over the military commander of Matamoros, Toledo, and with the garrison offered battle to Gen. Fuero, by whom he was pursued. Diaz was defeated at Icamole, and escaped to New Orleans, where he remained until called by his partisans to Oaxaca, the centre of the revolution against Lerdo's government.

On the voyage to Vera Cruz, while the steamer was at anchor off one of the towns on the coast, thinking that his presence had been discovered, and that he would be arrested by government officials, he threw himself into the sea with the intention of swimming ashore, but he was picked up by a boat and taken back to the steamer. When he had reached the harbor of Vera Cruz he disguised himself as a coal-heaver, and, with the assistance of the purser, was put on shore. On his arrival at Oaxaca he was acknowledged by the chiefs who favored his cause, and advanced upon Puebla at the head of 7,000 men. After the bloody battles of Epatlan, El Jazmin, and Tecoac, he occupied the capital of the republic five days after Lerdo's flight to the United States. When Lerdo and some of his ministers, among whom were Gen. Escobedo and Romero Rubio, abandoned the country, Jose M. Iglesias, then president of the court of justice, declared himself, in accordance with the constitution of 1857, president of the republic *pro tem.*, which act was supported by the friends of law and order; but immediately afterward Gen. Diaz marched from the capital, with a large force, toward the interior, with the purpose of attacking the troops sustaining Iglesias. A conference was held between Gen. Diaz and Iglesias at the estate of La Capilla, but they could not agree. Gen. Diaz said he had no alternative but revolution, whereupon Iglesias assured the general that, if he (Diaz) obtained dominion over the republic by military force, he would be a "fortunate soldier, but never a constitutional president." Such was the situation at the beginning of 1877; but the troops who were still faithful to the cause of Iglesias were quickly put to flight at Union de Adobes by Diaz. The military prestige of Diaz, the superior force at his command, and the desire to seek an early solution to the existing difficulties, were powerful motives for the recognition of the "plan of Tuxtepec" by many as the only practicable remedy. For a short period Mexico had four presidents at once: Lerdo, Iglesias, Mendez, and Diaz. Gen. Mendez was temporarily intrusted with the management of the government's affairs during Gen. Diaz's absence on his military expedition, and on the following days the elections took place for deputies to the congress of the union, for president of the republic, and for magistrates of the supreme court of justice. Gen. Diaz was elected president. Congress assembled on 1 April, and on 5 May, 1877, Diaz took the oath of office, and was duly inaugurated as chief magistrate of the nation until 30 Nov., 1880. In June occurred the difficulties with the United States respecting American troops on the frontier, but in an interview at Piedras Negras, in July, between Gens. Ord and Treviño, these difficulties were amicably settled. The government of Gen. Diaz by the month of August had been officially recognized by those of Germany, Guatemala, San Salvador, and Italy; but not until March, 1878, was it finally recognized by the United States. In 1878–'9 there were revolts in different parts of the country, which Diaz, with his experience as a revolutionist and conspirator, finally subdued. When it was seen that Diaz was not keeping the promises made in his programme of Tuxtepec, his partisans in the press, and some of the most prominent men of the revolution, urged him to its fulfilment, saying that the only thing gained by eleven years of bloody struggle was his obtaining the presidency. Diaz, feeling that he was being pressed by his party, declared through "El Diario Oficial" that "the programme of Tuxtepec was nothing else but a heap of moral absurdities

and material impossibilities, and that in consequence he was not able to fulfil the promises there made to the nation." The press that before supported Diaz now began to oppose him, and he found himself abandoned by his best generals, without the support of his own party, despised by the parties of Iglesias and Lerdo, and surrounded by an atmosphere of revolution and hatred. He thereupon organized a party composed of the imperialist and reactionary elements, and, in fact, of everybody else he could get, and with it declared war against his own party, subdued the revolution, exiled the editor of "La Colonia Española" and many journalists, imprisoned others, while at the same time he tried by all means to win over the army. In the night of 24 June, 1879, Teran, governor of Vera Cruz, executed nine citizens without any trial whatever. This execution is known by the name of "The Hecatomb of Vera Cruz," and it is charged that it took place by order of Diaz, but no such order has ever been produced. Similar acts were committed in other states, such as the execution, without trial, of Gen. Figuerero and of Col. Rios, and the imprisonment of Gen. Cortina. Gens. Negrete, Martinez, and others concealed themselves in order to avoid persecution. An editor of "El Combate" published an accusation in which 164 charges, including all sorts of crimes and robberies, were attributed to Diaz; and the accuser was imprisoned, denied intercourse with anybody, and was put out of the country in haste in July, 1879. As at the expiration of his presidential term, 30 Nov., 1880, Diaz could not be re-elected, he transferred his powers to his secretary of war, Gen. Gonzalez, while he himself took charge of one of the departments of the government, and was also elected chief justice of the Federal supreme court, but never took his seat. About the same time he was elected governor of Oaxaca, and retired from his other offices. Before the expiration of his term as governor he obtained leave of absence from the legislature, and, leaving the state in the hands of the lieutenant-governor, returned to the city of Mexico to attend to his coming contest for a second presidential term. During this time he had visited the United States, where he had been well received. On 30 Nov., 1884, at the expiration of Gonzalez's term, Diaz was a second time inaugurated as president of the Mexican republic. During his first term concessions for building various railroads had been granted by him to American corporations, but no work on them had been begun till the beginning of Gonzalez's administration. The subsidies that had been granted had been paid regularly, but on Diaz's second inauguration he found the treasury absolutely empty. Besides this, about three quarters of the customs revenues had been pledged by his predecessor. The first official act of Diaz was to repudiate these pledges, without interfering with the railroad subsidies, which, however, he was obliged to stop in June, 1885. The question of settling the public debt now arose anew. In the "plan of Tuxtepec" a general repudiation of the sums due to England had been advised by Diaz, but this was afterward rejected as impolitic, and during the administration of Gonzalez a proposition was made to appropriate a vast sum of money for the payment of the English debt alone. The apprehension that Gonzalez would appropriate a large part of this sum caused public demonstrations of opposition by students and journalists. After the beginning of Diaz's second term a plan for the settlement of the whole debt was made by congress, and is now (1887) in process of execution. In 1886 several unimportant revolts broke out in different parts of the country, but they were immediately suppressed. According to a law enacted by instigation of Diaz, 17 May, all rebels falling into the hands of the government were immediately executed as highwaymen. This law caused the death of many revolutionary chiefs, among them Gen. Garcia de la Cadena and Col. Lizalde. Gen. Negrete was imprisoned in Santiago Tlaltelolco. The question raised by the arrest of Mr. Cutting threatened to cause a rupture between the United States and Mexico. Secretary of State Bayard made an official demand for the immediate and unconditional release of Cutting, who had been arrested for publishing a libel in a newspaper that was issued in El Paso, Tex., but circulated also in Mexico. The trial continued, and Cutting was duly convicted and sentenced. Afterward the superior court reduced his sentence, and gave him credit for the time during which he had already been imprisoned, so that he was released. Gov. Ireland, of Texas, also complained that Arrezures, a citizen of the United States, had been "foully murdered by the Mexican authorities," but his citizenship was denied, and the affair ended amicably. In October, 1886, a letter from Diaz was published in Paris, in which he declared that the ex-marshal Bazaine, during the French-Mexican war, proposed to him to surrender the cities occupied by the imperialists, including the munitions of war, together with the emperor himself and Gens. Miramon and Mejia. This letter caused a great sensation; but Gen. Leonardo Marquez declared, in "El Autonomista" of Havana, that it was Diaz himself who, in a sealed letter sent by Gen. Carballeda to Marshal Bazaine, proposed to deliver up Oaxaca, under condition that he be allowed to depart for the United States. In the latter part of 1886 a movement was set on foot to abolish the article of the constitution that forbids a president to be his own successor, with the intention of electing Gen. Diaz for a third term. Under the administration of Diaz manufactures have increased, the resources of the country have been developed, commerce has multiplied, education has been advanced, the revenues have been appropriated to the purposes for which they were designed, travel is safe, bandits have been dispersed, and railroads and telegraphs are extending. While it has been far from perfect, there has been no public scandal in it, and it has been as clean as the circumstances of his surroundings have allowed. —His elder brother, **Félix,** better known by the name of "El Chato," was governor of Oaxaca in 1871. Although the brothers were not open enemies, there always existed a certain discordance and rivalry between them; yet, when the "Plan de la Noria" was proclaimed, Felix sided with his brother, and pronounced against the government. Juarez sent Gen. Alatorre against Oaxaca, who, after defeating Gen. Teran in the bloody battle of San Mateo, prepared to invest the city, when Felix Diaz abandoned it, and fled over the mountains toward Tehuantepec, but was overtaken by hostile Indians, and killed after suffering cruel tortures.

DÍAZ, Ruy, Spanish soldier, b. in Seville, Spain, in 1503; d. in Peru, 26 April, 1538. He went to Peru with the expedition of Diego de Almagro in 1532, and as captain took part in the conquest of the interior of the country, and the capture of Cuzco, 1534. In the same year he was assigned to the command of Sebastian Velalcazar in his conquest of the province of Quito, where he became prominent by his daring shown in the numerous bloody encounters with the troops of the cacique Rumiñahui. While reconnoitring, he was sur-

rounded by a large number of Indians, and, notwithstanding his valiant defence, would have been crushed had he not at the critical moment slain the principal chief in the midst of his followers, whereupon the enemy fled, and ever afterward they retreated before the Spanish troops when they saw Diaz. In the same year, being in the advance guard with Vasco Guevarra and three soldiers, he was surrounded and furiously attacked by Indians, and only by a desperate fight succeeded in saving himself and joining the main army. When Velalcazar tried to discover the hiding-place of the immense treasure that Rumiñahui was said to possess, this cacique, by skilful movements, evaded the Spanish attack; but while he was on the march to surprise Quito, Diaz, with sixty cavalry-men, overtook and engaged him till Velalcazar with his force and his allies, the Cuñari Indians, could come up, and routed him with great loss, so that Rumiñahui took refuge in the Yumbo mountains, abandoning his train with a part of the treasure. When the province of Quito was invaded, in March, 1534, by the forces of Pedro Alvarado from Guatemala, Almagro, by order of Pizarro, marched with Velalcazar's forces to defend the territory in July, but, desiring to avoid strife between Spanish forces, he sent Ruy Diaz with Bartolome de Segovia and Diego Aguero to make pacific proposals to Alvarado, and Diaz obtained a settlement, signed by Almagro and Alvarado, 26 Aug., by which Alvarado turned over his forces to Almagro and returned to Guatemala. When Pizarro resolved to build near the coast a city destined to be the capital of the Spanish possessions in Peru, he sent an expedition under Diaz to explore the territory of the cacique of the valley of the Rimac, and Diaz, finding the country fertile and well adapted for the purpose, made a favorable report to Pizarro, who ordered a city to be built on the spot designated by Diaz, and on 18 Jan., 1535, the foundation-stone of the city of Los Reyes (now Lima) was laid. When the dissension between Pizarro and Almagro concerning the boundary of their respective governments began, Diaz was in that city, and, as a follower of Almagro, sustained the governor, Hernando de Soto. On the departure of Almagro for his expedition to Chili in 1535, he ordered Diaz to go to Lima to recruit soldiers, and follow him with these forces. Diaz soon joined Almagro with his troops, and participated in the campaign in Chili. On the latter's return in the beginning of 1537, he, wishing to establish an alliance with Manco Inca, who had risen against Pizarro, sent Ruy Diaz with other officers as envoy to the Indian prince, who, regarding all Spaniards as his natural enemies, retained the commissioners as prisoners, tied them naked to a stake, painted and pelted them with fruit and mud, subjected them to all kinds of indignities, and forced them to drink large quantities of the Indian intoxicating liquor, chicha. Almagro, once in possession of Cuzco, 18 April, 1537, began hostilities against Manco Inca: During the obstinate and relentless warfare that Orgoñez waged against Manco Inca till the final destruction of his hosts, Diaz took advantage of a favorable opportunity to escape, and joined Orgoñez's forces. He continued to fight for Almagro against Pizarro's attack, and was present at the victory of Abancay, 12 July, 1537, the advance to Chincha in September, and the retreat to Cuzco in November. In the unfortunate battle of Salinas, 26 April, 1538, Diaz was in command of the escort bearing the royal standard, and, after the defeat of Almagro's forces, Ruy Diaz was overtaken in his flight by Pizarro's soldiers, and killed.

DÍAZ, Sebastian, clergyman, b. in Santiago, Chili, in 1740; d. there in 1812. He was a Dominican, versed in all the sciences of his time, and master of the principal ancient and modern languages. He assisted in founding the convent of Our Lady of Bethlehem, Santiago, and became its prior in 1781. He was again elected in 1784, and finished the buildings that his predecessor had not been able to complete. His principal works are "Noticia general de las cosas del Mundo"; "Tratado contra la falsa Piedad"; "Manual Dogmático"; "Vida del Padre Manuel Acuña"; and "Vida de Sor María de la Purificación Valdes."

DIBBLE, Sheldon, missionary, b. in Skaneateles, N. Y., 26 Jan., 1809; d. in Lahainaluna, Hawaiian islands, 22 Jan., 1845. He was graduated at Hamilton college in 1827, and at Auburn theological seminary in 1830; was ordained at Utica, N. Y., 6 Oct., 1830, and sailed from New Bedford for Honolulu, 28 Dec., 1830, arriving on 9 June, 1831, with the fourth company of missionaries to the Hawaiian islands. He was stationed at Hilo until 1836; but, his health not being good, he was assigned to the seminary at Lahainaluna, on the island of Maui. Here his wife, Maria M. Tomlinson, of Troy, N. Y., b. in April, 1808, died 20 Feb., 1837. On 20 Nov. of that year Mr. Dibble sailed for the United States, where he made an extended tour, delivering lectures upon the islands and the missionary work. An abstract of these was published under the title "Hawaiian History" (New York, 1838). He married Antoinette Tomlinson, of Manlius, N. Y., and returned with her to his station, sailing from New York, 9 Oct., 1839. Mr. Dibble was among the foremost of the mission educators. He translated a part of the Old Testament, prepared eight text-books on grammar, natural history, and scripture history, in the Hawaiian language, and wrote a "History of the Sandwich Islands Mission" (New York, 1839), and a "History of the Sandwich Islands" (Lahainaluna, 1843), which have peculiar value as authentic history.

DIBRELL, George Gibbs, soldier, b. in White county, Tenn., 12 April, 1822. His common-school education was supplemented by one term at East Tennessee university. He was a farmer and merchant, was elected a member of the State constitutional convention of Tennessee, on the union ticket, in February, 1861, and to the legislature of Tennessee in August. Entering the Confederate army as a private, he was elected lieutenant-colonel, and was promoted colonel and brigadier-general of cavalry in 1864. He was detailed to escort the executive officers and treasure of the Confederate government after the evacuation of Richmond, and took charge of the archives at Greensboro, N. C., after the surrender of Lee's army. He was a member of the constitutional convention of Tennessee in 1870, and was twice elected a representative from that state in congress, serving from 5 March, 1875, till 5 March, 1879.

DICK, James T., artist, b. in New York city in 1834; d. in Brooklyn, N. Y., 19 Jan., 1868. He was the son of A. L. Dick, whose engraving of "The Last Supper" was regarded as a superior work of art. At the age of fourteen his son gained prizes awarded by the Manchester, England, academy of design. He was one of the originators of the Brooklyn art-school and a founder of the Academy of design. Among his best efforts are "Cooling Off," "Leap-Frog," and "At Mischief."

DICK, Robert, inventor, b. in Bathgate, Linlithgowshire, Scotland, 12 Jan., 1814. At the age of seven he came with his father's family to Canada. A short time after their arrival, while

travelling through Canada, the father and mother died, leaving eleven children. The eldest, a sister, determined on keeping the brothers and sisters together. They finished their journey, and settled in Lanark county, Canada West. Mr. Dick's studies were pursued under grave disadvantages, but he succeeded and was graduated at Hamilton college, Clinton, N. Y., in 1841. He devoted himself to teaching, lecturing, and missionary work for several years, and in 1854 established the "Gospel Tribune," in Toronto, C. W. In 1856 he invented a newspaper mailing-machine, the capacity of which, under successive improvements, was increased to 20,000 labels in a day of ten hours, pasted and attached by one operator to wrappers or papers. This invention is now in universal use.

DICK, Samuel, b. in New Jersey; d. there in November, 1812. He received a classical education, studied medicine, and practised his profession. He was a delegate from New Jersey in the Continental congress in 1783–'4.

DICKENS, Augustus N., English journalist, b. in Landport, near Portsmouth, England, in 1826; d. in Chicago, Ill., 4 Oct., 1866. He was a brother of Charles Dickens, the novelist, and the original "Boz," this being the pet name given to him by his family. He was for some time a correspondent of the London "News." Emigrating to the United States, he purchased land at Amboy, on the Illinois Central railway, and engaged in mercantile pursuits, but failed. Subsequently he removed to Chicago with his family and became a corresponding clerk in the land-office of the Illinois Central railway, a place which he held till his death.

DICKERSON, James Stokes, clergyman, b. in Philadelphia, Pa., 6 July, 1825; d. in Chicago in March, 1886. He was graduated at Madison university in 1848, and in 1850 became associated with Dr. Martin B. Anderson in the publication of the New York "Recorder." After several years spent in this relation and in the service of the American Baptist publication society, he became proprietor and editor of the Philadelphia "Christian Chronicle." While thus engaged he began preaching, and in March, 1861, accepted the pastorate of the 2d Baptist church in Wilmington, Del. He subsequently served as pastor in Pittsburg, Pa., and in Boston, Mass., till failing health obliged him to retire from the pulpit, and, removing in 1875 to Chicago, he became joint proprietor and editor of the "Standard," a Baptist weekly paper. He received the honorary degree of D. D.

DICKERSON, Mahlon, statesman, b. in Hanover, N. J., 17 April, 1770; d. in Suckasunny, Morris co., N. J., 5 Oct., 1853. He was graduated at Princeton in 1789, studied law, was admitted to the bar in 1793, and practised with success in Philadelphia. In 1805–'8 he was quartermaster-general of Pennsylvania, and in 1808–'10 recorder of the city court of Philadelphia. He returned to New Jersey, became judge of the supreme court and chancellor, and was elected a member of the legislature in 1814. In 1815 he was elected governor of New Jersey, and at the close of his term was sent to the U. S. senate. He was repeatedly re-elected, serving from 1 Dec., 1817, till 2 March, 1833. President Jackson appointed him, on 30 June, 1834, secretary of the navy, in which post he was continued by President Van Buren, serving till 30 June, 1838, when he was succeeded by James K. Paulding. He subsequently served for a few months on the bench of the U. S. district court for the district of New Jersey, and was a delegate to the State constitutional convention in 1844. In 1846–'8 he was president of the American institute. He was largely interested in the mining and manufacture of iron in Morris county, and, although a state-rights democrat, advocated the protective tariff in congress. He published "Speeches in Congress, 1826–'46."—His brother, **Philemon,** b. in Morris county, N. J., in 1788; d. in Paterson, N. J., 10 Dec., 1862, received a liberal education, studied law, and practised in Paterson. He served a term in congress in 1833–'5, and was re-elected, but resigned in 1836 to accept the governorship of New Jersey. In 1838 he was again elected to congress; but his election, as well as that of the other representatives from New Jersey except one, was contested, and he did not take his seat till 10 March, 1840, serving till the following March. He was afterward judge of the United States district court in New Jersey.

DICKERSON, William Fisher, A. M. E. bishop, b. in Woodbury, N. J., 18 Jan. 1844; d. in Columbia, S. C., in December, 1884. He was graduated at Lincoln university in 1870, and in 1876 appointed to represent his church at the general conference of the African Methodist Episcopal denomination. In 1880 he was elected thirteenth bishop, and given charge of the work in South Carolina and Georgia. He founded Allen university, Columbia, S. C., in 1880, of which he was president for four years. In 1881 he was a delegate to the œcumenical council in London, and travelled through France and Switzerland. He received the degree of D. D. from Wilberforce university in 1878.

DICKEY, Ebenezer, clergyman, b. near Oxford, Pa., 12 March, 1772; d. in Oxford, Pa., 31 May, 1831. He was graduated at the University of Pennsylvania in 1792, was settled over the churches of Oxford and Octoraro, and remained pastor of the Oxford church till his death. In 1822, with Dr. George Junkin and most of the associate Reformed clergy and their churches, he entered the Presbyterian connection. Princeton gave him the degree of D. D. in 1823. He published a "Tract to Parents," a pamphlet entitled "Plea for Christian Communion," and wrote for the "Christian Advocate" a series of letters on "Travels in Europe for Health in 1820" that were widely read.—His son, **John Miller,** b. in Oxford, Pa., 15 Dec., 1806; d. in Philadelphia, Pa., 21 March, 1878, was graduated at Dickinson college in 1824, and at Princeton theological seminary in 1827. In 1828 he was employed in missionary labor in northeastern Pennsylvania, and the following year in Florida and southern Georgia. In 1830 he was installed pastor at Newcastle, Del., and after his father's death assumed charge of the church at Oxford, Pa., and that of Upper West Nottingham. He conducted the Oxford female seminary for fifteen years in addition to his pastoral duties. In 1856 he resigned his pastorate. He took the principal part in establishing the Ashmun institute (afterward Lincoln university) at Oxford, and was president of the board of trustees from 1854 till his death. He was also a

director of Princeton theological seminary, and president of the board in 1858–'78.

DICKEY, John McElroy, clergyman, b. in York district, S. C., 16 Dec., 1789; d. near New Washington, Ind., 21 Nov., 1849. He removed with his parents to Livingston county, Ky., in 1803, and, with a view to becoming a minister, studied the classics with his cousin, a clergyman, in the neighborhood, and afterward at Hardin Creek, where he was taken into the family of a person whose name of McElroy he adopted, out of gratitude, as a part of his own. After studying theology, he was licensed to preach in August, 1814, and removed to the territory of Indiana, being the third Presbyterian minister that had settled there. His church was at the forks of White river, near what is now Washington, Daviess co. In the following spring he went for his wife and household goods, and in 1819 removed to the vicinity of Lexington, Scott co., to take charge of Pisgah and Lexington churches, of the latter of which he was pastor till 1835, and of the former till within two years of his death. He went on missionary tours, organized many new churches in Indiana, and his connection with the beginnings of the Presbyterian church in that territory caused him to be widely known in his denomination. He published a "History of the Presbyterian Church in Indiana" (1828), and was preparing a continuation of it at the time of his death.

DICKEY, Robert Barry, Canadian jurist, b. in Amherst, Nova Scotia, 10 Nov., 1811. He studied law with Judge Stewart, of the vice-admiralty court, and was admitted to the bar in 1834. He was a judge and registrar of the probate court for many years, was a director of the Nova Scotia Electric Telegraph company, and was consular agent for the United States at Amherst, N. S., from 1848 till 1858. He was a delegate from the Nova Scotia government to Great Britain on the subject of the intercolonial railway in 1858, and to the Quebec union conference in 1864, and a member of the legislative council of Nova Scotia in 1858–'67, when he was called to the Dominion senate.

DICKEY, Theophilus Lyle, jurist, b. near Paris, Ky., 12 Nov., 1812; d. in Atlantic City, N. J., 22 July, 1885. He read law in his native state, removed to Ohio, liberated the slaves that he had inherited, and afterward established himself in practice in Illinois. During the Mexican war he served as a captain in Col. Hardin's regiment, and in the civil war he was colonel of the 11th Illinois cavalry, and served for two years under Gen. Grant, on whose staff he served for some months as chief of cavalry. From 30 July, 1868, till the close of President Johnson's administration he was assistant attorney-general of the United States. From 1876 till his death he was judge of the Illinois supreme court. See Gen. Jas. Grant Wilson's "Sketches of Illinois Officers" (Chicago, 1863).

DICKINS, John, clergyman, b. in London, England, 24 Aug., 1747; d. in Philadelphia, Pa., 27 Sept., 1798. He received a good education, partly at Eton, and came to this country before the Revolution. He united with the Methodist church in Virginia in 1774, and in 1776 preached there as an evangelist, was admitted into the itinerant ministry in 1777, and labored in North Carolina. In 1780 he suggested to his intimate friend, Bishop Asbury, the plan of Cokesbury college, New Abingdon, Md., the first Methodist academic institution in this country. He was in New York city in 1783–'5 and 1786–'9, and in 1789 removed to Philadelphia, where he published a Methodist hymn-book, printing a large part of it with his own hands. Shortly afterward the conference assumed the publication, and appointed him book-steward, and in this office he founded the Methodist book concern. He issued the "Arminian Magazine" in Philadelphia in 1789–'90, and the "Methodist Magazine" from 1797 till his death. Mr. Dickins was the first American preacher to receive Thomas Coke and approve his scheme for organizing the Methodist denomination. He was a member of the "Christmas conference" of 1784, and suggested the name "Methodist Episcopal Church," which it adopted. During the yellow-fever epidemics of 1793, 1797, and 1798, he remained at his post in Philadelphia, and in the last year fell a victim to the disease. Mr. Dickins was a powerful preacher and one of the best scholars of his church at the time of his ministry. A sermon in his memory was delivered by the Rev. Ezekiel Cooper and afterward published (Philadelphia, 1799). See also John Atkinson's "Centennial History of American Methodism" (New York, 1884).—His son, **Asbury,** secretary of the U. S. senate, b. in North Carolina, 29 July, 1780; d. in Washington, 23 Oct., 1861, passed his early life in Philadelphia, and afterward spent several years in Europe. In 1801 he was associated with Joseph Dennie in founding the "Port Folio" at Philadelphia. He was a clerk in the treasury department under Secretary Crawford from 1816 till 1833, and while there composed and read Secretary Crawford's successful vindication of himself against the charges preferred by Ninian Edwards, then minister to Mexico. He was chief clerk of the state department in 1833–'6, and became secretary of the United States senate in 1836, an office that he retained until 1861. He published an oration on Washington (Philadelphia, 1800; New York, 1825).

DICKINSON, Alfred Elijah, clergyman, b. in Orange county, Va., 3 Dec., 1830. He was educated at Richmond college and the University of Virginia, and became pastor of the Baptist church in Charlottesville. He subsequently spent several years in promoting Sunday-school and colportage work, and then became pastor of the Leigh street Baptist church, Richmond, Va. Still later he associated himself with the Rev. Dr. Jeter as joint owner and editor of the "Religious Herald," and since the death of Dr. Jeter has been editor-in-chief of that journal, whose circulation and influence he has greatly extended. He has received the degree of D. D. from Furman university.

DICKINSON, Anna Elizabeth, orator, b. in Philadelphia, Pa., 28 Oct., 1842. Her father died when she was two years old, leaving her in poverty, and she was educated in the free schools of the society of Friends, of which her parents were members. Her early days were a continuous struggle against adverse circumstances, but she read eagerly, devoting all her earnings to the purchase of books. She wrote an article on slavery for the "Liberator" when only fourteen years old, and made her first appearance as a public speaker in 1857, at meetings for discussion held by a body calling themselves "Progressive Friends," chiefly interested in the anti-slavery movement. A sneering and insolent tirade against women, by a person prominent at these meetings, called from the spirited girl a withering reply, her maiden speech. From this time she spoke frequently, chiefly on temperance and slavery. She taught school in Berks county, Pa., in 1859–'60, and was employed in the U. S. mint in Philadelphia from April to December, 1861, but was dismissed for saying, in a speech in West Chester, that the battle of Ball's Bluff "was lost, not through ignorance and incompetence, but through

the treason of the commanding general" (McClellan). She then made lecturing her profession, speaking chiefly on political subjects. William Lloyd Garrison heard one of her anti-slavery speeches in an annual meeting of the Progressive Friends, held at Kennett, Chester co., Pa., with great delight, and on his return to Boston spoke of the "girl orator" in such terms that she was invited to speak in the fraternity course at Music Hall, Boston, in 1862, and chose for her subject the "National Crisis." From Boston she went to New Hampshire, at the request of the Republican state committee, to speak in the gubernatorial canvass, and thence was called to Connecticut. On election night a reception was tendered her at Hartford, and immediately thereafter she was invited to speak in Cooper institute by the Union League of New York, and shortly afterward in the Academy of Music, Philadelphia, by the Union League of that city. From this time to the end of the civil war she spoke on war issues. In the autumn of 1863 she was asked by the Republican state committee of Pennsylvania to speak throughout the coal regions in the canvass to re-elect Curtin, the male orators at the committee's command being afraid to trust themselves in a district that had recently been the scene of draft riots. Ohio offered her a large sum for her services, but she decided in favor of Pennsylvania. On 16 Jan., 1864, at the request of prominent senators and representatives, she spoke in the capitol at Washington, giving the proceeds, over $1,000, to the Freedmen's relief society. She also spoke in camps and hospitals, and did much in aid of the national cause. After this her addresses were made chiefly from the lyceum platform. On the termination of the war she spoke on "Reconstruction" and on "Woman's Work and Wages." In 1869–'70, after a visit to Utah, she lectured on "Whited Sepulchres." Later lectures, delivered in the northern and western states, were "Demagogues and Workingmen," "Joan of Arc," and "Between us be Truth," the last-named being delivered in 1873 in Pennsylvania and Missouri, where obnoxious bills on the social evil were before the legislatures. In 1876 Miss Dickinson, contrary to the advice of many of her friends, left the lecture platform for the stage, making her first appearance in a play of her own, entitled "A Crown of Thorns." It was not favorably received by the critics, and Miss Dickinson afterward acted in Shakespeare's tragedies, still meeting with little success. "Aurelian" was written in 1878 for John McCullough, but was withdrawn by the author when the failing powers of the great tragedian made it apparent that he would be unable to appear in it. It has never been put upon the stage, but Miss Dickinson has given readings from it. She lectured on "Platform and Stage" in 1879, and in 1880 wrote "An American Girl" for Fanny Davenport, which was successful. Miss Dickinson's published works are "What Answer?" a novel (Boston, 1868); "A Paying Investment" (1876); and "A Ragged Register of People, Places, and Opinions" (New York, 1879).

Anna E. Dickinson

DICKINSON, Baxter, clergyman, b. in Amherst, Mass., 14 April, 1795; d. in Brooklyn, N. Y., 7 Dec., 1875. He was graduated at Yale in 1817 and at Andover theological seminary in 1821. After having pastoral charge of Congregational churches at Longmeadow, Mass., and at Newark, N. J., he was in 1835 appointed professor of sacred rhetoric and pastoral theology in Lane seminary, Cincinnati, Ohio, where he remained until 1839. From 1839 till 1847 he held a similar chair in Auburn seminary, and served as acting professor at Andover in 1848. He was subsequently engaged for nine years in Boston in the service of the American and foreign Christian union and of the American board. He was the author of "Letters to Students," which was republished in England.

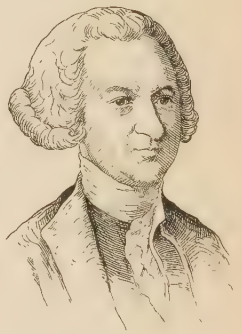
DICKINSON, Daniel Stevens, statesman, b. in Goshen, Conn., 11 Sept., 1800; d. in New York city, 12 April, 1866. In early life he was taken by his father to Guilford, Chenango co., N. Y., where he obtained a public-school education. In addition to this, with but slight assistance, he acquired the Latin language and made himself acquainted with the higher mathematics and other sciences while apprenticed to a clothier. When he became his own master he occupied himself for a time in teaching and surveying, then studied law, and was admitted to the bar in 1828, beginning practice in Guilford. In 1831 he removed to Binghamton, which thenceforth became his home. In 1836 he was chosen state senator, and his great ability as a debater soon made him the leader of his party. Among the questions that came up for discussion were several measures, such as the small-bill law and the general banking law that arose out of the recent overthrow of the U. S. bank, the construction of the Erie railway, and the enlargement of the Erie canal. His strongest oratorical effort at this time was his speech in opposition to the repeal of the usury laws, 10 Feb., 1837. In 1840 he was nominated for the office of lieutenant-governor by the democrats, and, although defeated that year, he was elected in 1842. He thus became *ex-officio* president of the senate, of the court of errors, and of the canal board. At the expiration of his term of office in 1844, Gov. Bouck appointed him to fill a vacancy in the U. S. senate, and on the meeting of the legislature the appointment was ratified and he was elected for a full term. Mr. Dickinson held for several years the chairmanship of the senate committee on finance. In discussing the exciting issues of the day he took strong conservative ground, and from that standpoint spoke frequently on the annexation of Texas, the joint occupation of Oregon, the Mexican war, the Wilmot proviso, and the compromise measures of 1850. In December, 1847, he introduced two resolutions regarding the government of the territories, which virtually embod-

D. S. Dickinson

ied the doctrine afterward known as "popular sovereignty." (See BUTTS, ISAAC.) Among the measures that have since been adopted, Mr. Dickinson earnestly advocated the free passage of weekly newspapers through the mails in the county where published. His conservative course in the senate not only secured him the vote of Virginia for the presidential nomination in the Democratic convention of 1852, but a strongly commendatory letter from Daniel Webster, 27 Sept., 1850, in which the writer asserted that Mr. Dickinson's "noble, able, manly, and patriotic conduct in support of the great measures" of that session had "entirely won his heart" and received his "highest regard." In 1852 President Pierce nominated Mr. Dickinson for collector of the port of New York, and the nomination was confirmed by the senate; but the office was declined. At the beginning of the civil war in 1861, Mr. Dickinson threw all his influence on the side of the government regardless of party considerations, and for the first three years devoted himself to addressing public assemblages in New York, Pennsylvania, and the New England states. In 1861 he was nominated for attorney-general of his state, and was elected by 100,000 majority. He was nominated by President Lincoln to settle the northwestern boundary question, but declined, as he also did a nomination by Gov. Fenton to fill a vacancy in the court of appeals of the state of New York. He subsequently accepted the office of district-attorney for the southern district of New York, and performed its duties almost till the day of his death. In the Republican national convention of 1864, when President Lincoln was renominated, Mr. Dickinson received 150 votes for the vice-presidential nomination. As a debater he was clear, profound, and logical, and not infrequently overwhelmed his opponents with scathing satire. His speeches were ornamented with classical allusions and delivered without apparent effort. Among his happiest efforts are said to have been his speech in the National democratic convention at Baltimore in 1852, in which, having received the vote of Virginia, he declined in favor of Gen. Cass, and his eulogy of Gen. Jackson in 1845. Mr. Dickinson's brother has published his "Life and Works" (2 vols., New York, 1867).

DICKINSON, Edward, lawyer, b. in Amherst, Mass., 1 Jan., 1803; d. in Boston, 16 June, 1874. He was the son of Samuel Fowler Dickinson, one of the founders of Amherst college. He was graduated at Yale in 1823, and opened a law-office in Amherst in 1826, where he continued the practice of his profession until his death. A few months previous to that event he resigned in favor of his son the treasurership of Amherst, an office he had held uninterruptedly since 1835. In 1838–'9 and 1873 he was chosen a member of the Massachusetts assembly, and was elected state senator in 1842–'3. In 1846–'7 he served as a member of the governor's council, and from 1853 till 1855 sat in the lower house of congress, having been elected by the whig party. Having been elected to the legislature in 1873 that he might secure to his native town the advantages of the Massachusetts Central railroad, he delivered an able address in the interests of that road in connection with the Hoosac tunnel, and died of apoplexy on the same day.

DICKINSON, John, publicist, b. in Maryland, 13 Nov., 1732; d. in Wilmington, Del., 14 Feb., 1808. He was the son of Samuel D. Dickinson, who removed to Delaware, became chief justice of the county of Kent, and died, 6 July, 1760, aged seventy-one. John studied law in Philadelphia, and subsequently passed three years in reading in the Temple in London. On his return he practised successfully in Philadelphia. His first appearances in public life were as a member of the Pennsylvania assembly in 1764, and of the Colonial congress convened in New York to oppose the stamp-act in 1765. In the latter year he began to write against the policy of the British government, and, being a member of the 1st Continental congress (1774), was the author of a series of state papers put forth by that body, which won for him a glowing tribute from Lord Chatham. Among them were the "Address to the Inhabitants of Quebec," the first "Petition to the King," the "Address to the Armies," the second "Petition to the King," and the "Address" to the several states. Of the first "Petition," which has been credited to Lee, it has been said that "it will remain an imperishable monument to the glory of its author and of the assembly of which he was a member, so long as fervid and manly eloquence and chaste and elegant composition shall be appreciated." In June, 1776, he opposed the adoption of the Declaration of Independence because he doubted the wisdom of the measure "without some prelusory trials of our strength," and before the terms of the confederation were settled and foreign assistance made certain. When the question came to be voted upon, he absented himself intentionally, but proved that his patriotism was not inferior to that of those who differed with him, by enlisting as a private in the army and remaining until the end of his term of service. He served again as a private in the summer of 1777 in Delaware, and in October of the same year was commissioned as a brigadier-general. In April, 1779, he was elected to congress from Delaware, and in May wrote another "Address to the States." In 1780 he was chosen a member of the Delaware assembly, and in the following year elected president of the state. From 1782 till 1785 he filled the same office in Pennsylvania, and served as a member of the convention that framed the Federal constitution. In 1788 he wrote nine letters over the signature of "Fabius," urging the adoption of the constitution, and these were followed in 1797 by a series of fourteen, written to promote a friendly feeling toward France. In 1783 he was influential in founding and largely endowed Dickinson college, Carlisle, Pa. At this time he was living in Wilmington, Del., where he collected his political writings in 1801. The remaining seven years of his life were passed in retirement. Besides the writings mentioned, he was the author of "Letters from a Pennsylvania Farmer to the Inhabitants of the British Colonies" (Philadelphia, 1767; reprinted, with a preface by Dr. Franklin, London, 1768; French translation, Paris, 1769). In 1774 appeared his "Essay on the Constitutional Power of Great Britain over the Colonies in America." In 1796 he received the degree of LL. D. from the College of New Jersey.—His brother, **Philemon,** soldier, b. in Croisedore, Talbot co., Md., 5 April, 1739; d. near Trenton, N. J., 4 Feb.,



1809, went to Dover, Del., with his father in 1740, and studied under Dr. Allison in Philadelphia. He then went to live on his farm near Trenton, N. J., and, though possessed of an ample fortune, hazarded it by embracing the patriot cause. He entered the army as colonel of the Hunterdon county battalion in July, 1775, and was commissioned brigadier-general on 19 Oct. In 1776 he was a delegate to the provincial congress of New Jersey and member of a committee that drafted a constitution with a clause affirming the independence of New Jersey, which was adopted on 2 July, 1776. On 20 Jan., 1777, with about 400 raw troops, who had to wade waist-deep through a river to make the attack, he surprised and defeated a large foraging party near Somerset Court-House, N. J., capturing a few prisoners, forty wagons, and about a hundred English draught-horses. He was made major-general of the New Jersey forces on 6 June, 1777, and on 27 Nov. made an attack on Staten Island, for which he was thanked by Washington. During the occupation of Trenton by the Hessians, Gen. Dickinson's estate was plundered by the enemy. He led the New Jersey troops at the battle of Monmouth, where he displayed great bravery, and was specially mentioned by Washington in his report to congress. In 1778–'9 he was chief signal officer for the middle department. On 4 July, 1778, he was second to Gen. Cadwalader in his duel with Gen. Conway. He was a delegate to congress in 1782–'3 from Delaware, where he owned property, and in 1783–'4 was vice-president of the New Jersey state council. He was a member of the commission appointed by congress in December, 1784, to select a site for the national capital, and, on the resignation of William Patterson as U. S. senator from New Jersey, was chosen to fill his place, serving from 6 Dec., 1790, till 2 March, 1793. From this time till his death he lived quietly at his country-seat, "The Hermitage," which was the resort of all the distinguished men who passed through Trenton.

DICKINSON, Jonathan, clergyman, b. in Hatfield, Mass., 22 April, 1688; d. in Elizabethtown, N. J., 7 Oct., 1747. He was graduated at Yale in 1706, and in 1709 was installed pastor of the church at Elizabethtown, where he had gone the year previous, and in charge of which he remained nearly forty years, or until his death. The adjoining townships of Rahway, Westfield, Union, Springfield, and a part of Chatham, were included in his parish, to which he ministered not only in spiritual things, but also in things temporal, as he was a practising physician. After the separation of the New Jersey churches from the synod of Philadelphia in 1741, a charter was obtained for the College of New Jersey (originally known as Nassau hall), the first classes were opened in Elizabethtown, and Dr. Dickinson was chosen president, 22 Oct., 1746. In assuming this office he did not change his habits, as he had been accustomed during a portion of his ministry to receive young men for instruction in different branches preparatory to their entering on the study of some profession. He died the year following, but lived long enough to leave upon the institution the permanent impress of his character. His works are largely controversial, being written in defence of what he considered fundamental truths. Among them are "Reasonableness of Christianity: Four Sermons" (1732); "The True Scripture Doctrine Concerning some Important Points of Christian Faith," etc. (1741); and "Familiar Letters to a Gentleman" (1745; 3d ed., Edinburgh, 1757). A collection of many of his writings was published in 1793.

DICKINSON, Mary Clare, superior of Carmelites, b. in London, England, in 1755; d. in Baltimore, Md., in 1830. She was educated in France, where she joined the order of the Carmelites, was afterward a member of that order in Antwerp, and was one of the four Carmelites that left Europe to establish a branch of the community in the United States in 1790. They landed at Port Tobacco, Md., and took possession of their house, which was the first conventual establishment in the United States. In 1800 Sister Mary Clare Dickinson was elected superior, which office she held for thirty years.

DICKINSON, Moss Kent, Canadian capitalist, b. in Denmark, Lewis co., N. Y., 1 June, 1822. He is the son of the late Barnabas Dickinson, who removed from the United States to Canada about 1812, and was the founder of Dickinson's Landing on the St. Lawrence, and the first contractor for the conveyance of the mails, then carried on men's backs, from Montreal westward. His son was educated at the schools of Cornwall and Prescott, and at the academies of Lowville and Denmark, N. Y. He began the business of forwarding in 1844 between Montreal and Kingston, and subsequently extended his line to Quebec and Lake Champlain, with branch offices at Kingston, Ottawa, Montreal, Quebec, Burlington, and Whitehall. His fleet now consists of sixteen steamers and sixty barges. From 1850 till 1857 he was associated with J. M. Currier in the manufacture of lumber at Ottawa. In 1869 he retired from the forwarding business. In 1864 he was elected mayor of Ottawa, and was re-elected by acclamation the two succeeding years. At the general election of 1882 he was elected to the Dominion parliament.

DICKINSON, Richard William, b. in New York city, 21 Nov., 1804; d. in Fordham, N. Y., 16 Aug., 1874. He was graduated at Yale in 1823, and, after studying for two years at Princeton seminary, was ordained as a Presbyterian minister on 24 Oct., 1828. He held pastorates in Philadelphia, New York city, and Brooklyn till 1845, when he retired on account of failing health, and devoted himself to literary work. From 1859 till 1872 he was pastor of a church at Inwood, New York city. The University of New York gave him the degree of D. D. in 1842. Besides articles in periodicals, Dr. Dickinson published "Scenes from Sacred History" (New York, 1849); "Responses from the Sacred Oracles" (1850); "Religion Teaching by Example"; "Life and Times of Howard"; and "Resurrection of Jesus Christ, Historically and Logically Viewed" (Philadelphia, 1865).

DICKINSON, Rodolphus, clergyman, b. in Deerfield, Mass., in 1787; d. there in 1863. He was graduated at Yale in 1805, studied law in Northampton, was admitted to the bar in 1808, and practised his profession in Springfield, Mass., till 1811, acting as clerk of the courts in his native county for eight years. On leaving this office he was ordained deacon by Bishop Griswold, of the Protestant Episcopal church, and removed to South Carolina, where he founded the parishes of Greenville and Pendleton. During the first eighteen months he travelled more than 7,000 miles on horseback. He was advanced to the priesthood in 1822, and returned the following year to Deerfield, which residence he retained till the close of his life. For six years he preached at Montague, Mass., after which, in 1839, he was an unsuccessful candidate for congress. He published his own translation of the New Testament, with notes (Boston, 1833), and several law, geographical, and other text-books, including a "Geographical and Statistical View of Massachusetts Proper."

DICKSON, Andrew Flinn, clergyman, b. in Charleston, S. C., 9 Nov., 1825; d. in Tuscaloosa, Ala., in 1879. He was graduated at Yale in 1845, studied theology at Lane and Yale seminaries, and was ordained as a Presbyterian in 1852. His first church was at John's Island, S. C., where nine-tenths of his congregation were negroes. He then held pastorates at Orangeburg, S. C., New Orleans, La., Wilmington, N. C., and Chester, S. C., was district secretary of the American Sunday-school union in 1855–'7, chaplain in the Confederate army in 1861–'5, and had charge of the Southern general assembly's colored theological institute at Tuscaloosa, Ala., from 1876 till his death. He published "Plantation Sermons" (1856–'60); "The Temptation in the Desert" (1872); and "The Light, is it Waning?" which gained a prize offered by Richard Fletcher (1878).

DICKSON, Cyrus, clergyman, b. in Erie county, Pa., 20 Dec., 1816; d. in Baltimore, 11 Sept., 1881. He was graduated at Jefferson college in 1837, licensed to preach by Erie presbytery in 1838, and held pastorates in Franklin, Pa., Wheeling, Va., and Baltimore, Md. Washington college gave him the degree of D. D. in 1858. After the union of the old- and new-school branches of the Presbyterian church, in 1870, Dr. Dickson was chosen permanent clerk of the general assembly, and soon afterward secretary of the board of home missions, also representing the board at the Pan-Presbyterian council in Edinburgh, Scotland, in 1877. His death was the result of overwork. A memoir of him was published by Rev. Samuel J. M. Eaton, D. D. (New York, 1882).

DICKSON, James A., actor, b. in London, England, in 1774; d. in Boston, Mass., 1 April, 1853. He made his first appearance on the stage in Boston, Mass., in 1794, as Saville in "The Belle's Stratagem," and first appeared on the New York stage, at the John street theatre, 18 Aug., 1797, as John in "The Spoiled Child." Afterward he became eminent as an actor of comic old men. He was manager of the Boston theatre in 1806, and continued so, with various partners, for many years. He married Miss Harrison, sister of the celebrated Mrs. Pownall, and retired from the stage in the character of Kit Cosey in "Town and Country," 14 April, 1817.

DICKSON, James Anderson Ross, Canadian clergyman, b. in Tranent, Scotland, 22 Oct., 1839. He came to Canada in 1857, was educated at the Congregational college, Toronto, and at McGill college, Montreal, being graduated in 1865. Immediately afterward he was called to the Congregational church in London, Ontario, where he remained for six years, during three of which he edited the "Gospel Message." In 1871 he was called to the Northern Congregational church, Toronto, where he remained until 1879, when he became a Presbyterian. While in Toronto he was given the highest office in the gift of the Congregational church, being elected chairman of the Congregational union of Ontario and Quebec in 1877. In 1879 he was called to the pastorate of a Presbyterian church in Galt. He has been a prolific writer for religious journals, and many of his sermons and essays have been published.

DICKSON, John, statesman, b. in Keene, N. H., in 1783; d. in West Bloomfield, N. Y., 22 Feb., 1852. He was graduated at Middlebury in 1808, and while reading law at Milton, N. Y., in 1808–'12, taught languages and mathematics. He was admitted to the bar and practised law in West Bloomfield, N. Y., from 1813 till 1825, in Rochester, N. Y., from 1825 till 1828, and subsequently in West Bloomfield. He was a member of the New York assembly in 1829–'30, and of congress from 1831 till 1835. In February, 1835, he is said to have made "the first important anti-slavery speech ever made in congress." He was known as "Honest John Dickson," and was the author of a work entitled "Remarks on the Presentation of Several Petitions for the Abolition of Slavery and the Slave-trade in the District of Columbia" (1835).

DICKSON, John Robinson, physician, b. in Dungannon, county Tyrone, Ireland, 15 Nov., 1819; d. on Wolfe island, St. Lawrence river, Canada, 23 Nov., 1882. He was educated in Belfast and Glasgow, studied medicine in his native town, and came to Canada with his family in 1838. He was graduated at the medical department of the University of New York in 1842, returned to Canada, settled in Kingston, and became prominent as a surgeon. From 1846 till 1854 he was visiting physician to the Kingston general hospital, then for two years visiting surgeon, becoming, in 1856, clinical lecturer, which place he resigned in 1860 to be reappointed clinical lecturer on surgery in 1861. In 1854 he was active in founding the medical department of the University of Queen's college, where he was chosen dean of the medical faculty and professor of surgery, and during his visit to Great Britain, in 1860, he obtained a recognition of the medical degree of Queen's university. In 1862 he was appointed surgeon to the provincial penitentiary in Kingston, and in 1869 became medical superintendent of Rockwood lunatic asylum. While holding these offices he prepared regularly "Prison Reports" and "Asylum Reports," and, in accordance with his suggestions, the condition of those confined there was materially improved. Chief among the reforms was the introduction of a system of voluntary labor among the insane, and the abolition of the use of alcohol and beer. In 1866 the medical department of Queen's college became the Royal college of physicians and surgeons in connection with Queen's university, for which he obtained the necessary charter, and of which he was appointed president and professor of surgery, offices which he held through his lifetime. Dr. Dickson was a member of numerous societies, and held the degrees of M. R. C. P., London, M. R. C. S., England; also F. C. P. S., Kingston, and F. R. C. S., Edinburgh. He published numerous scientific papers and public addresses in English and Canadian medical journals.

DICKSON, Samuel Henry, physician, b. in Charleston, S. C., 20 Sept., 1798; d. in Philadelphia, Pa., 31 March, 1872. His father, who was of Scottish descent, emigrated from Ireland before the Revolution, and fought in that contest under Gen. Lincoln. Samuel was graduated at Yale in 1814, and, after studying medicine in Charleston and at the University of Pennsylvania, received his diploma from the latter in 1819. He soon had a large practice in Charleston, and in 1823 delivered a course of lectures on physiology and pathology in that city before about thirty medical students. He was active in securing the establishment of a medical college in Charleston, and on its organization, in 1824, became professor of the institutes and practice of medicine. He resigned his chair in 1832, but in the following year, on the reorganization of the institution as the medical college of South Carolina, was re-elected. He was professor of the practice of medicine in the University of New York in 1847–'50, but in the latter year resumed his chair in Charleston. From 1858 until his death he held the same chair in Jefferson medical college, Phila-

delphia. The University of New York gave him the degree of LL. D. in 1853. Dr. Dickson wrote not only on professional but on literary and current topics, and added a graceful style to thoroughness of learning. He published "Dengue; its History, Pathology, and Treatment" (Philadelphia, 1826); "Manual of Pathology"; "Practice of Medicine" (2 vols., New York); "Essays on Pathology and Therapeutics" (2 vols., 1845); "Essays on Life, Sleep, Pain, etc." (1852); "Elements of Medicine" (1855); and "Studies in Pathology and Therapeutics" (1867). He also contributed largely to medical and other current literature, and published many occasional essays and addresses, including an address before the Yale Phi Beta Kappa society in 1842, on the "Pursuit of Happiness," and a pamphlet on slavery, asserting the essential inferiority of the negro race (1845).—His daughter, **Jeanie A.**, has contributed largely, in prose and verse, to current literature.

DICKSON, Thomas, capitalist, b. in Lander, Scotland, 26 March, 1822; d. in Morristown, N. J., 31 July, 1884. He was the son of a Scottish machinist, and emigrated with his parents to Canada in 1835. Afterward they settled in Carbondale, Pa., where young Dickson received an indifferent education, and at the age of thirteen had charge of the horses and mules of the canal company. In 1838 he entered the employ of Charles T. Pierson in Carbondale. This business passed through the hands of several persons, including Joseph Benjamin, whose partner he became in 1845. In 1852 he turned his attention to iron manufacture, and purchased an interest in a foundry and machine-shop. Four years later he established the Dickson Manufacturing company for the building of steam-engines and the construction of mining machinery. The corporation was very successful, and its capital increased in twenty years from $30,000 to $1,350,000, and its business grew until it became one of the most important locomotive works in the United States. In 1860 he retired from this organization and became superintendent of the coal department of the Delaware and Hudson canal company. Four years later he was made general superintendent of the company, then vice-president, and president in 1869, which office he held continuously until his death. During his connection with the company its annual output of coal increased from 500,000 to over 4,000,000 tons. Its mining operations were gradually extended over an area of forty-four miles, and it acquired control of an extensive railroad system. In 1873 Mr. Dickson organized a company for the purchase of a large tract of iron land on the shores of Lake Champlain. Furnaces were erected, and the best quality of pig-iron and Bessemer metal was produced. Besides controlling the affairs of these corporations, he was a director in twenty other companies. His home was in Scranton, where he gathered a large collection of books and fine paintings, and was known as a liberal donor to various charities.

DIDIER, Franklin James (dy'-deer), author, b. in Baltimore, Md., in 1794; d. there in 1840. He became a physician in Baltimore, and was a frequent contributor to the periodicals of his time. In 1831 he published a paper foretelling a civil war between the northern and southern states, caused by the slavery question. Dr. Didier was the author of "Didier's Letters from Paris" (New York, 1821), and "Franklin's Letters to his Kinsfolk" (Philadelphia, 1822).—His son, **Eugene Lemoine**, author, b. in Baltimore, Md., 22 Dec., 1838, spent several years at Loyola college, but was not graduated. After five more years of private study he began a mercantile career, but gave it up to devote himself to literature. In 1867 he founded in Baltimore a weekly journal entitled "Southern Society," and in 1869–'70 was deputy marshal of the U. S. supreme court, being specially detailed to act as secretary to Chief-Justice Chase. He has written much over the signatures "Lemoine" and "Timon." As a critic, his style is aggressive and fearless. He has published "Life of Edgar A. Poe" (New York, 1876); "Life and Letters of Madame Bonaparte" (1879; republished in London, and translated into French and Italian); and a "Primer of Criticism" (1883).

DIEGO Y MORENO, Francisco García, Mexican R. C. bishop, b. in Lagos, Mexico, about 1800; d. in Santa Barbara, Cal., in 1846. He received his early education in the seminary of Guadalajara, and finished his ecclesiastical studies in the Apostolic college of Our Lady of Guadalupe in Zacatecas. He joined the order of St. Francis, and was ordained in 1824. In 1832 he was appointed prefect of the missions for the conversion of the Indians in California, and set out for the post assigned him with ten Franciscans; but, owing to the difficulties of the journey, did not reach the missions till 1833. He divided his fellow-laborers among the Indians, while he himself made Santa Clara the centre of his labors, and endeavored to protect the Indians from the rapacity of the Mexican governors. The passing of a law in 1834, which went into operation in 1837, for the secularization of the missions, rendered his efforts unavailing. He made a journey to the city of Mexico, and procured an order for the restoration of the mission to the church; but this change of policy came too late to restore prosperity to the Indians, many of whom had lapsed into barbarism. He was about to return to California when he received tidings that he had been nominated bishop of California. He was consecrated in 1840, reached San Diego in 1841, and found his diocese in a state of desolation. The Indian population was reduced from 30,000 to 4,500, and these scattered and demoralized, while the flocks and herds had disappeared and agriculture was ruined. He restored some of the missions and erected a seminary at Santa Ines, and his passionate appeals to the government of Mexico in behalf of the Indians were sometimes effective, but his health was destroyed by his incessant labors.

DIELMAN, Frederick, artist, b. in Hanover, Germany, 25 Dec., 1847. He came to this country when a child, was graduated at Calvert college, Baltimore, Md., in 1864, and in 1866–'72 served as a topographer and draughtsman of U. S. engineers in Fortress Monroe and Baltimore, and in the survey of canal-routes over the Alleghanies of Virginia. He then studied art under Diez in the Royal academy, Munich, gaining a medal in the life class, and afterward opened a studio in New York city, taking a prominent place as a genre painter and illustrator of books and magazines. He has contributed largely to *editions de luxe* of Longfellow, Hawthorne, George Eliot, and other writers, and to the various publications of the Tile club, of which he is a member. Mr. Dielman was one of the original members of the Society of American artists, was made a National academician in 1883, and is also a member of the American water-color society, the New York etching club, and the Salmagundi sketch club. Among his pictures shown at National academy exhibitions are "The Patrician Lady" (1877); "Young Gamblers" (1885); and a "Head" (1886). One of the best known of his illustrations is that entitled "A Girl I Know," which has been engraved by Cole.

DIENTE, Juan (dee-ayn'-tay), Spanish soldier, b. in Peñaranda, Spain, about 1497; d. in Guamanga, Peru, 30 Nov., 1542. He served in the wars of Italy and Flanders, and distinguished himself by his daring exploits in the enemy's camp. Owing to his extraordinary swiftness as a runner, in which he outstripped a horse, he was called "the shadow." While still an ensign, Diente went to Darien, Colombia, with Pedrarias, and, commanding a company, took part in the conquest of Nueva Granada. Soon afterward he joined Diego de Almagro, and arrived in Peru in February, 1533, commanding a company. In October of that year, near Bilcas, he had engagements with the Indians, killing a chief in one of them. The agility that he displayed, and his peculiar way of fighting the Indians, gave rise among them to the belief that Diente was a supernatural being. Diente won his greatest distinction at the memorable siege of Cuzco, in February, 1534. During the terrible night of the 20th of that month, in which the Indians surprised and set fire to the city, Diente was seen jumping from roof to roof, in pursuit of the incendiaries, across the streets. In this same night, assaulting one of the Indian forts, he was the first to enter it. In this assault Juan Pizarro died. In April, 1535, Diente joined Diego de Almagro in the conquest of Chili, and served during the whole campaign, commanding the infantry. In 1536 he distinguished himself in the battle of Yucay, and from that date he served under Almagro, taking part in several engagements with the Indians, and also in the civil war of 1537 between Almagro and Pizarro. On 26 April, 1538, he participated in the battle of Salinas. Some time afterward he went to Lima and, finding himself in reduced circumstances, took part in the conspiracy against Pizarro, receiving from Rada, who conducted the assassins in the assault on the palace, 26 June, 1541, the command of the reserve. Pizarro having been killed, Juan Diente was chosen by Diego de Almagro to carry communications of this event to Guamanga y Cuzco. Diente travelled 900 miles over a mountainous country, arrived at Cuzco, and with eighty of Almagro's followers proclaimed Almagro's son as the legitimate governor, exacted from the city corporation the acknowledgment of the new government, and compelled the dependent towns to accept it. He served during the whole campaign against the royal troops, commanded by C. Vaca de Castro, and filled important commissions from Almagro's son. On 16 Nov., 1542, at the battle of Chupas, lost by Almagro's party, Diente was at the head of a column, and, falling a prisoner, was summarily tried by Judge Gama, and hanged at Guamanga as an accomplice in the murder of Pizarro.

DIEREVILLE, M., French traveller, b. in Pont-Levêque, Normandy, about 1670. He had become somewhat noted as a poet through his contributions to the "Mercure galant," when he embarked as supercargo on a vessel bound for Canada in 1699. He reached Acadia after a voyage of fifty-four days, and exchanged the greater part of the merchandise he had brought for the products of the colony. Although he gained great popularity among the fishermen, who supplied him with more fish in six months than the privileged companies were able to obtain in twenty years, he was badly treated by the association for which he acted, and returned to France in 1700. He published "Relation du voyage du Port Royal de l'Acadie, ou Nouvelle-France, dans laquelle on voit un détail des divers mouvements de la mer dans une traversée de long cours; la description du pays, les occupations des Français qui y sont établis, les manières des différentes nations sauvages, leurs superstitions et leurs chasses avec une dissertation exacte sur le castor" (Rouen and Amsterdam, 1708). Diereville intended to write his narrative in verse; but, when some of his friends told him that if he did so it would be looked on as a fable, he compromised by writing his account partly in verse and partly in prose. His fondness for poor rhymes did not prevent him from giving a vivid idea of Acadia. He does justice to the inhabitants and to their attachment to their mother country, and attributes the poverty of the country to the obstacles placed in the way of commerce. While he describes very fully the animals of Acadia and the manners of the savages, he says but little of its botany, although he was charged with the duty of collecting plants for the garden of the king. He brought to France a new shrub, which Tournefort called the *Derevilla*, and which is noted for its beautiful yellow flowers. Linnæus, while preserving the specific name given by his predecessor, has assigned it to the genus *Lonicera*. Jussieu restored the genus *Dierevilla*. Tournefort says that Diereville was a surgeon, Haller that he was a merchant. The probability is that he was both.

DIESKAU, Jean Erdman, Baron, French soldier, b. in Saxony in 1701; d. in Surenne, near Paris, 8 Sept., 1767. He was adjutant to Marshal Saxe, and visited St. Petersburg in that officer's interest in 1741. He also served under Saxe in the Netherlands, and in 1748 became brigadier-general of infantry and commander of Brest. He was sent to Canada on 20 Feb., 1755, with the rank of major-general, at the head of French troops, to conduct the campaign against the English. With 600 savages, as many Canadians, and 200 regulars, he ascended Lake Champlain to its head, designing to attack Fort Edward; but the guides took the road to Lake George by mistake. On 8 Sept. he was informed by scouts that a detachment of 1,000 men under Col. Ephraim Williams, of Massachusetts, had been sent against him, and, disposing his men in ambush in the form of a horseshoe, he surprised the enemy and put them to flight. After pursuing their opponents to the British camp, the Indians halted, the Canadians became alarmed, and Dieskau, with his 200 regulars, was forced to sustain the fight. For five hours the New England militia "kept up the most violent fire that had yet been known in America." Almost all the French regulars perished, and Dieskau himself was thrice wounded; but he refused to retire, and seated himself on a stump, exposed to the bullets. Finally, seeing a soldier approaching as if to capture him, Dieskau put his hand into his pocket for his watch, which he intended to give to his captor; but the man, supposing that he was drawing a pistol, shot him, inflicting a wound that ultimately caused his death. Dieskau was kept a prisoner till 1763, when he was exchanged and returned to France, where he was given a pension.

DIGGES, Sir Dudley, English politician, b. in 1583; d. in 1639. He was the son of Sir Thomas Digges, the celebrated geometer, was ambassador to Russia in 1618, and in 1621 was elected to parliament, where he was active in the impeachment of the Duke of Buckingham. He was at one time imprisoned in the Fleet by Charles I., whom he had offended, but was released on apologizing to the king, and in 1630 was appointed master of the rolls. He was a friend of Henry Hudson, and in 1610 was one of those who fitted out that explorer for his last voyage. In 1631 he was one of the commission appointed by the privy council "to consider how the plantation of Virginia now stand-

eth, and to consider what commodity may be raised in those parts." He published several political works.—His son, **Edward,** governor of Virginia, b. in England in 1620; d. in Virginia, 15 March, 1675, introduced the culture of the silk-worm into Virginia, giving attention to it at Denbigh, on James river, and at Bellfield, eight miles from Williamsburgh, and employing two native Armenians skilled in the business. He was given a seat in the council in November, 1644, "having given a signal testimony of his fidelity to this colony and commonwealth of England." He was elected governor by the assembly in March, 1655, and received a salary of 25,000 pounds of tobacco, with the duties levied on vessels, and marriage-license fees. In the latter part of the year he gave up his office, and was sent as one of the colony's agents to England to treat with prominent merchants about the price of tobacco, and also to secure the rights of the colony. He bore a letter to Cromwell from the assembly, and, by his social position, did much to settle the long-pending controversy between the colony and Lord Baltimore.—Another son, **Dudley,** b. about 1612; d. in 1643, published a treatise on "Illegality of Subjects taking up Arms against their Sovereigns" (1643).

DILLER, Joseph Silas, geologist, b. in Plainfield, Pa., 27 Aug., 1850. He was graduated at Lawrence scientific school of Harvard in 1879, and spent two years in post-graduate studies at Harvard and at the university in Göttingen. From 1873 till 1877 he taught in the State normal school in Westfield, Mass., and from 1881 till 1883 was geologist of the Assos expedition. In 1883 he became assistant geologist on the U. S. geological survey, and in that capacity has travelled extensively throughout the United States. He is a member of several scientific societies, and author of numerous papers that have been published in scientific journals in the United States and in Europe, the principal of which are "Notes on the Geology of the Troad" (1883); "Diamonds in the United States" (1886); and "Notes on the Geology of Northern California" (1886).

DILLON, Arthur, Count, French soldier, b. in France in 1750; d. in Paris in 1794. He was colonel of the Dillon regiment of the Irish brigade. When the court of Versailles concluded a treaty of amity and commerce with the United States in 1778, his regiment was one of those demanding and obtaining the privilege of being the first to fight the English. Count Dillon embarked at Brest, in the squadron of M. de la Motte Picquet, with the first battalion of his regiment, for the West Indies, on 5 April, 1779. The junction of Picquet and D'Estaing enabled the latter to carry out his design of conquering the island of Grenada from the English. An attack was made on the British, after landing, in which Count Dillon distinguished himself at the head of his column, and was wounded, but did not withdraw until after the action. The French were successful. Count Dillon also took a prominent part in the capture of St. Eustache, Tobago, and St. Christopher, and was appointed governor of the latter in 1782. He drew up a code of laws for the government of the island so excellent that the English, on recovering possession, did not interfere with them. When he appeared at a levee of George III., the lord chancellor said to him: "Count Dillon, we knew you to be a brave and able soldier, but we were not aware that you were so good a lawyer. We have investigated and confirmed all your judgments and all your decrees delivered during your government." The count was elected deputy from Martinique to the states-general in 1789. He defended the interests of the colonists, although he opposed the freedom of the slaves as inopportune. He was chosen commander of a division in 1792, and fought successfully on the plains of Champagne and in the forests of Argone, but was accused of wishing to march the army against Paris, and was suspended. He was, however, soon released and restored to his command, when he gained an important advantage over the Prussians. He was again arrested and condemned in 1794. At the foot of the scaffold he cried with a firm voice, "Vive le roi!" He wrote "Compte rendu au ministère de la guerre, suivi de pièces justificatives, et contenant des détails militaires dont la connaissance est nécessaire pour apprécier la partie la plus intéressante de la memorable campagne de 1792."

DILLON, Charles, actor, b. in England; d. in Harwich, England, 24 June, 1881. Both his parents were prominent actors. In his fourteenth year he was engaged at a London minor theatre as stage-manager and to act juvenile characters. In this place he remained two years. His next engagement was at the Surrey theatre under Davage, where he appeared in small parts and in the ballet. After this he left the stage for a time and wrote several melodramas and magazine articles. He returned to the stage and made a tour of the provinces, going to London and appearing at the City of London theatre as Hamlet. His next engagement was with Mr. Douglas at the Marylebone theatre, where he was stage-manager, leading man, and dramatist. At this period of his life he made a resolution that he would leave London and not return to it until he had "starred" in every town and city of importance in Great Britain. This resolve seems to have been kept. During his absence from London he was for a season manager of the Sheffield theatre. He returned to London in 1856 and made his first appearance at Sadler's Wells theatre, and afterward took the Lyceum theatre, where he revived "Belphegor," in which character he had become quite famous. At first he met with great success, as the theatre was crowded nightly. After a time, being compelled to close the theatre for lack of patronage, he travelled again through the provinces. In 1860 Mr. Dillon again appeared in London at Drury Lane, the St. James, Sadler's Wells, Marylebone, and Standard theatres.* In 1861 he came to the United States and opened at the Winter Garden, New York, 24 Jan., as Belphegor, and then "starred" through the country until 1863, when he went to Australia. He returned here in 1866 and opened at Niblo's Garden, and again went on a tour of the country. He re-appeared in London, England, at Sadler's Wells theatre, 17 Feb., 1868, as King Lear. He then acted at Drury Lane theatre, when Byron's "Manfred" was revived. He re-appeared at Drury Lane theatre, 28 Sept., 1878, acting Leontes in "A Winter's Tale." After this engagement he acted only in the provinces. Mr. Dillon was an excellent actor, but was considered much better in melodrama than in tragedy.

DILLON, John Blake, b. in Mayo, Ireland, in 1814; d. in Killiney, Ireland, in 1866. He studied for the priesthood in the Royal college of Maynooth, and for the law at Trinity college, Dublin, where he made the acquaintance of the young men that afterward formed the Young Ireland party. He was a member and auditor of the Historical society. In 1842 he was called to the bar, and shortly afterward took part in establishing the "Nation" newspaper. He was opposed to an insurrection, but felt bound in honor to follow Smith

O'Brien in 1848. After the failure of this attempt he escaped to the Arran islands, where he was protected by the peasants, although a large reward was offered for his capture. He went to France, and thence to the United States, and was admitted to the bar in New York. In 1852 he returned to Ireland, and in 1865 was elected a member of the British parliament, where he defended the interests of his country up to his death.

DILLON, John Forrest, jurist, b. in Montgomery county, N. Y., 25 Dec., 1831. He went to Iowa when about eight years old, and was graduated at the medical department of Iowa university, but, after practising about six months, began the study of law, and was admitted to the bar in 1852. He was in the same year elected state prosecuting attorney, and in 1858 became judge of the 7th judicial district of Iowa. He was elected in 1862 for a second term, but before its expiration was chosen to the supreme bench of the state for six years, during the last two of which he served as chief justice. He was re-elected to the state supreme bench in 1869, but in December of that year was commissioned by President Grant U. S. circuit judge for the 8th judicial circuit. He held that office till 1879, when he accepted the professorship of real estate and equity jurisprudence in the Columbia law-school. He held this professorship for three years, when he resigned it, and gave his attention wholly to the practice of his profession in New York city. Judge Dillon is a member of the Institut de droit international, and of the Association for the reform and codification of the law of nations. He is the author of "U. S. Circuit Court Reports" (5 vols., 1871–'80); "Municipal Corporations" (Chicago, 1872); "Removal of Causes from State to Federal Courts" (1875); and "Municipal Bonds" (1876).

DILLWYN, George, member of the Society of Friends, b. in Philadelphia, 26 Feb., 1738; d. 23 June, 1821. He entered into business in Philadelphia in 1759, but did not succeed. Afterward he became a Quaker preacher, and in this capacity visited the southern states. In 1784 he went to England, where he resided for the next eighteen years, his religious services being limited to London and its vicinity. In 1802 he returned to the United States and settled at Burlington, N. J. He claimed to have a foreknowledge of events, and this gift was conceded to him by the members of his denomination. He was the author of "Dillwyn's Reflections." A memoir of his life has been published. See "Friends' Library," vol. viii.

DIMAN, Byron, governor of Rhode Island, b. in Bristol, R. I., in 1795; d. there, 1 Aug., 1865. He was educated under the private tuition of Alexander V. Griswold, afterward bishop of Massachusetts, and at an early age entered the counting-house of James De Wolf. He afterward engaged extensively in the whale-fishery, and, as that declined, turned his attention to manufacturing. He was for many years either a state senator or a member of the lower house, and was lieutenant-governor of the state for three years. In 1846 he was elected governor, in the exciting canvass attending the disruption of the "Law-and-Order" party, and served one term. Gov. Diman had a remarkable memory, and was fond of antiquarian research.—His son, **Jeremiah Lewis,** clergyman, b. in Bristol, R. I., 1 May, 1831; d. in Providence, R. I., 3 Feb., 1881, was graduated at Brown in 1851, and afterward studied in the universities of Halle, Heidelberg, and Berlin. Returning to America, he was graduated in 1856 at the theological seminary in Andover, Mass., and was pastor of the 1st Congregational church in Fall River in 1856–'60, and of the Harvard church at Brookline in 1860–'4. In 1864 he was appointed professor of history and political economy in Brown university. In 1870 he received the degree of D. D. Many of his sermons and addresses have been published, and he contributed many articles to periodicals. He published in book-form "The Theistic Argument" (Boston, 1881), and "Orations and Essays" (1882). His "Memoirs" have been written by Caroline Hazard (Boston, 1887).

DIMICK, Justin, soldier, b. in Hartford county, Conn., 5 Aug., 1800; d. in Philadelphia, Pa., 13 Oct., 1871. He was graduated at the U. S. military academy in 1819, and assigned to the light artillery. After serving at various posts, and as assistant instructor of infantry tactics at West Point for a few months in 1822, he was promoted to 1st lieutenant in the 1st artillery, 1 May, 1824, and brevetted captain, 1 May, 1834, for ten years' faithful service in one grade. He was given his full commission in 1835, and brevetted major, 8 May, 1836, for gallant conduct in the Florida war, having on that date killed two Seminole Indians in personal encounter while skirmishing near Hernandez plantation. He was engaged in suppressing the Canada-border disturbances at Rouse's Point, N. Y., in 1838–'9, and in the performance of his duty seized a vessel laden with ammunition for the Canadian insurgents. For this act he was called upon in 1851–'3 to defend a civil suit in the Vermont courts. He served as lieutenant-colonel of an artillery battalion of the army of occupation in Texas in 1845–'6, and during the Mexican war received two brevets, that of lieutenant-colonel, 20 Aug., 1847, for gallantry at Contreras and Churubusco, and that of colonel on 13 Sept., for his services at the storming of Chapultepec, where he was wounded. Besides these battles, he was at Resaca de la Palma, La Hoya, and the capture of the city of Mexico. He served again against Florida Indians in 1849–'50 and 1856–'7, was made major in the 1st artillery, 1 April, 1850, lieutenant-colonel, 5 Oct., 1857, and commanded the Fort Monroe artillery school in 1859–'61. He was promoted to colonel on 26 Oct., 1861, and commanded the depot of prisoners of war at Fort Warren, Mass., until 1 Jan., 1864. He was retired from active service on 1 Aug., 1863, and in 1864–'8 was governor of the soldier's home near Washington, D. C. On 13 March, 1865, he was brevetted brigadier-general, U. S. army, "for long, gallant, and faithful services to his country."—His son, **Justin E.,** d. near Chancellorsville, Va., 5 May, 1863, was graduated at the U. S. military academy in 1861, served as 1st lieutenant of the 1st artillery, and received mortal wounds in the battle of Chancellorsville.

DIMITRY, Alexander, educator, b. in New Orleans, La., 7 Feb., 1805; d. there, 30 Jan., 1883. His father, Andrea Demetrios, a native of the island of Hydra, on the coast of Greece, went to New Orleans in 1794, and was for many years a merchant there. Alexander was graduated at Georgetown college, D. C., and soon afterward became editor of the New Orleans "Bee." He was a fine pistol shot and an accomplished fencer, and in his early manhood took part in several duels, either as principal or second. He was subsequently a professor in Baton Rouge college, and in 1834 was employed in the general post-office department. On his return to Louisiana in 1842 he created and organized the free-school system there, and was state superintendent of schools in 1848–'51. In 1856 he became translator to the state depart-

ment in Washington. He was appointed U. S. minister to Costa Rica and Nicaragua in 1858, and served till 1861, when he became chief of a bureau in the Confederate post-office department. He was made assistant superintendent of the New Orleans public schools in 1868, and in 1870 professor of ancient languages in Christian college, at Pass Christian, La. Prof. Dimitry was master of eleven languages, and his favorite study was philology. He wrote many short stories for annuals in 1830–'5, under the signature of "Tobias Guarnerius," and subsequently contributed to magazines and delivered many lectures, chiefly on historical subjects. Previous to 1846 he had prepared, after many years of research, a "History of English Names," but the manuscript was destroyed by a fire at the St. Charles institute, La., of which he was then the principal.—His son, **John Bull Smith,** b. in Washington, D. C., 27 Dec., 1835, was educated at College Hill, near Raymond, Miss., and accompanied his father to Central America as secretary of legation in 1859. He served in the Confederate army of Tennessee in 1861–'4, and was dangerously wounded at Shiloh. In 1864–'5 he was chief clerk in the Confederate post-office department. He travelled in Europe in 1869, and in 1874–'6 lived in the United States of Colombia, where he was professor of languages in Colegio Cáldas, Barranquilla. He was for seven years dramatic and literary editor of the New Orleans "Times," and has been connected with the press in Washington, Philadelphia, and New York, being for several years with the "Mail and Express." Mr. Dimitry has contributed to current literature, and has published a "History and Geography of Louisiana" (New York, 1877), which has since been used in the public schools of that state. —Another son, **Charles Patton,** journalist, b. in Washington, D. C., 31 July, 1837, was educated at Georgetown college, D. C., and, although not graduated, received from it the degree of M. A. in 1867. He served in the Confederate army as a private in the Louisiana guard. Since the war he has been connected with the press in Richmond, Va., Washington, D. C., Baltimore, New York, and New Orleans. Mr. Dimitry has contributed to current literature, both in prose and verse, sometimes under the pen-names of "Tobias Guarnerius, Jr.," and "Braddock Field." His writings include several novels, but the only one issued in book-form is "The House in Balfour Street" (New York, 1868).

DIMMOCK, Charles, soldier, b. in Massachusetts in 1800; d. in Richmond, Va., 27 Oct., 1863. He was graduated at the U. S. military academy in 1821, assigned to the 1st artillery, and served as assistant professor of engineering at West Point in 1821–'2. He was attached to the artillery school at Fort Monroe in 1825–'6 and 1828–'9, being adjutant of the school in the last-named year. He was promoted to 1st lieutenant in 1828, was assistant quartermaster in 1831–'6, and superintended operations at Delaware breakwater in 1831–'3. He was made captain on 6 Aug., 1836, but resigned on 30 Sept., and became a civil engineer in the south, being employed on many important railroads, and in 1837–'8 in the location of a U. S. military road to Fort Smith, Ark. In 1843–'7 he was director of the James river and Kanawha canal. He was captain of Virginia militia in 1839–'40, lieutenant-colonel in 1841–'2, and superintendent of the state armory in 1843–'61. He was a member of the Richmond city council in 1850, 1854, and 1858, and at the beginning of the civil war entered the Confederate service, became brigadier-general, and was chief of the ordnance department of Virginia.

DIMMOCK, George, naturalist, b. in Springfield, Mass., 17 May, 1852. He was graduated at Harvard in 1877, taking special studies there for two years after graduation, and continued his zoölogical studies in Germany and France, returning to Cambridge in the latter part of 1882. His wife, Anna K. Hofmann, whom he married in 1878, studied with him abroad, and has written zoölogical articles. Mr. Dimmock is the publishing editor of "Psyche," a journal of entomology, issued since 1874 in Cambridge. He is secretary and librarian of the entomological club of that place, councillor of the Boston society of natural history, and of the Appalachian mountain club. He has been a contributor to Cassino's "Standard Natural History," the "Science" journal, and other periodicals, for which he has written papers on zoölogical subjects. The degrees of A. M. and Ph. D. were conferred upon him by Leipsic university in 1881. He is author of a work called "The Anatomy of the Mouth-parts of some Insects of the Order of Diptera" (Boston, 1881), and is now (1887) preparing for publication the genealogy of the Dimmock family.

DIMOCK, Susan, physician, b. in North Carolina in 1847; lost on the "Schiller," which was wrecked off the coast of Cornwall, England, 9 May, 1875. When only twelve years old she told her father she wished to study medicine and become a physician. During the civil war her family went north, and twice she applied for admission into the medical school of Harvard university, but was refused. She went to Zurich, Switzerland, where she graduated with honors, and afterward studied at Vienna. Returning to Boston, she became physician of the Hospital for women and children.

DINGLEY, Nelson, Jr., journalist, b. in Durham, Me., 15 Feb., 1832. He was graduated at Dartmouth in 1855, studied law, and was admitted to the bar in 1856, but never practised. He became proprietor and editor of the Lewiston, Me., "Journal," holding this post for more than twenty years. Between 1862 and 1873 he was six times elected to the Maine legislature, serving as speaker in 1863 and 1864, and was governor of the state in 1874 and 1875. He has always been a pronounced advocate of temperance. He was elected to congress as a Republican, 12 Sept., 1881, to fill the vacancy caused by the election of William P. Frye to the U. S. senate, and re-elected in 1882, 1884, and 1886. He has served on the committees on banking and currency and shipping traffic. He has received the degree of LL. D. from Bates college.

DINNIES, Anna Peyre, poet, b. in Georgetown, S. C., in 1816. Her father, W. F. Shackelford, an eminent lawyer, removed to Charleston, where she was educated by the Misses Ramsay. At the age of fourteen she married John C. Dinnies, of St. Louis, Mo., where she resided until 1846, when the family removed to New Orleans, La. Before her marriage she had written many of the poems that she published later under the pen-name "Moina," among them the "Charnel Ship." In 1854 she contributed to the "Catholic Standard," a weekly edited by her husband, a series of didactic articles entitled "Rachel's What-Not." She contributed also to the literary periodicals of the south. In 1847 she published a collection of one hundred poems, arranged in twelve groups, typifying bouquets of flowers, under the title of "The Floral Year" (Boston). The domestic affections form the subject of most of her verses.

DINSMOOR, Robert, poet, b. in Windham, N. H., 7 Oct., 1757; d. there, 16 March, 1836. He was of Scotch-Irish descent, his family having immigrated from the north of Ireland about the be-

ginning of the 18th century, and, after a rough experience of Indian captivity in the woods of Maine, settled in Londonderry, N. H. He received a scanty education. For a short while he was under the tuition of an old British soldier, and afterward he studied with Master McKeen, who spent much of his time hunting squirrels with his pupils. At the age of eighteen he enlisted in the Revolutionary army, and served at the battle of Saratoga. He became a farmer at Windham, was a zealous Presbyterian, and used to make verses, in the Scottish dialect or in simple English, on topics arising from personal incidents or his subjective emotions. He called himself the "Rustic Bard," and published in 1828, at Haverhill, Mass., a volume entitled "Incidental Poems," accompanied with letters and a few select pieces for their illustration, with a sketch of the author's life. In his "Old Portraits and Modern Sketches," John G. Whittier says: "He lived to a good old age, a home-loving, unpretending farmer, cultivating his acres with his own horny hands, and cheering the long rainy days and winter evenings with homely rhyme. Most of his pieces were written in the dialect of his ancestors, which was well understood by his neighbors and friends, the only audience upon which he could venture to calculate. He loved all old things, old language, old customs, old theology. . . . He wrote sometimes to amuse his neighbors, often to soothe their sorrow under domestic calamity, or to give expression to his own. With little of that delicacy of taste which results from the attrition of fastidious and refined society, and altogether too truthful and matter-of-fact to call in the aid of imagination, he describes in the simplest and most direct terms the circumstances in which he found himself, and the impressions which these circumstances had made on his own mind. . . . Never having seen a nightingale, he makes no attempt to describe the fowl; but he has seen the night-hawk, at sunset, cutting the air above him, and he tells of it. Side by side with his waving corn-fields and orchard-blooms, we have the barn-yard and pig-sty."—His brother, **Samuel,** governor of New Hampshire, b. in Londonderry, N. H., 1 July, 1766; d. in Keene, N. H., 15 March, 1835, was graduated at Dartmouth in 1789, studied law, and practised at Keene. He entered the militia, and rose to be major-general. In 1810 he was elected to congress as a war democrat, but was defeated at the next election. In 1821 he was a state councillor and a presidential elector on the Monroe ticket. He was defeated as a candidate for governor by Levi Woodbury. He was judge of probate for Cheshire county from 1823 till 1831, when he was elected governor, and served two years. In 1825 he served on the commission to fix the boundary-line between New Hampshire and Massachusetts. — Samuel's son, **Samuel,** b. in Keene, N. H., 8 May, 1799; d. there, 24 Feb., 1869, was graduated at Dartmouth in 1814, and admitted to the bar in 1818. He passed some time in Arkansas, going there in 1819. From 1826 till 1831 he was clerk of the senate of New Hampshire, and he was elected governor of the state in 1849, and re-elected in 1851.

DINSMORE, Samuel P., journalist, b. in Bristol, Me., about 1822; d. in New York city, 22 March, 1882. He was graduated at Bowdoin in 1844, studied law, and was admitted to the bar in Bangor. Shortly afterward he became editor of the Bangor "Mercury." He took an active part in the presidential canvass for John C. Frémont in 1856. He went to New York to practise law in 1857, was appointed to a place in the war department by President Lincoln, and subsequently became financial editor of the New York "Evening Post." He contributed to the "North American Review" and other periodicals.

DINWIDDIE, Robert, colonial governor of Virginia, b. in Scotland about 1690; d. in Clifton, England, 1 Aug., 1770. While a clerk in the customs department, he detected his principal, a collector of customs in the West Indies, in gross frauds on the government, and as a reward for this service he was made surveyor of customs for the colonies, and soon afterward lieutenant-governor of Virginia. He arrived in the colony in 1752, and in December of that year transmitted to the board of trade an elaborate report in favor of annexing the Ohio valley for the extension of British settlements, and of constructing a line of forts, and making an alliance with the Miami Indians, to secure the settlements against French aggressions. He discerned the military capacity of Washington, whom in 1753 he appointed adjutant-general of one of the four military districts of Virginia, with the rank of major, and sent as a commissioner to expostulate with St. Pierre, the French commander on the Ohio, for his aggressions upon British territory, and to demand the withdrawal of the French troops. Maj. Washington delivered to the French commander Dinwiddie's letter, asserting that the lands on the Ohio belonged to the British crown, demanding to know by whose authority an armed force had crossed the lakes, and insisting on their speedy departure. The governor was incensed at the French soldier's reply, to the effect that it did not become him to discuss treaties, and, calling his council together, determined, by their advice, to expel the French from the disputed territory. Washington's expedition followed. The capture of Fort Trent by the French was the first overt act of the war. The British government, after seeking explanations at the French court, sent Braddock with two regiments to aid the colonists. Dinwiddie met five of the other colonial governors at Annapolis, and afterward at Alexandria, and planned expeditions against Fort Duquesne, Niagara, Frontenac, and Crown Point. He was highly incensed at the tardiness of the house of burgesses in voting money for the public defence, and at their refusal to put it under his absolute disposal. In 1754 he suggested to the British board of trade the propriety of taxing the colonies for the purpose of raising funds to carry on the war, and in the succeeding year was one of the five colonial governors who memorialized the ministry to the same effect. He urged the imposition by the British parliament of a general poll-tax and a general land-tax in America, on the ground that it was impossible to obtain joint efforts of the colonies by appealing to their assemblies. After the defeat of Braddock he continued to busy himself with the military operations on the frontiers, displaying great incapacity, and wearying Washington, then in command of the colonial troops, by frequent exhibitions of ill temper, folly, or caprice. His arrogance brought him into collision with the legislature, while his avarice led him to exact illegal or obsolete fees, and he was at length recalled, leaving Virginia in January, 1758. At the time of his departure he was charged with appropriating to his own use £20,000 placed in his hands to compensate the Virginians for money expended in excess of their proportion of the expenses of the war, for which he never satisfactorily accounted.

DION, Cyrille, billiard player, b. in Montreal, Canada, 22 March, 1843; d. there, 1 Oct., 1878. His first public appearance was in Montreal on 12 July, 1865, when he won the championship of Can-

ada by defeating every competitor in the tournament. The year following he gained the championship cue in New York, then first offered, which he lost by being defeated by Deery and Rudolphe in succeeding tournaments, but regained in 1871 from Frank Foster, and held until, after three essays, Maurice Daly defeated him. He contested the championship in fifteen-ball pool with Wahlstrom in 1877, but was worsted.

DIRCK, Cornelius Lansing, clergyman, b. in Lansingburg, N. Y., 3 March, 1785; d. 19 March, 1857. He studied theology, was ordained at Onondaga, N. Y., in December, 1807, and held various pastorates in the northern states, in addition to which he was connected with Auburn seminary as trustee in 1820–'30 and 1835–'57, vice-president of the board of trustees in 1820–'4, and professor of sacred rhetoric and pastoral theology in 1821–'6. He served without salary, and as financial agent raised large sums for the seminary. He published "Sermons on Important Subjects" (1825).

DISBROWE, Samuel, magistrate, b. in Eltisley, Cambridgeshire, England, 30 Nov., 1619; d. in Elfworth, Cambridgeshire, England, 10 Dec., 1690. He was the brother of John Disbrowe, who gained distinction by his marriage with the sister of Oliver Cromwell and by his active service during the commonwealth, becoming major-general in 1648 and governor of the west in 1650. During the civil war, Samuel Disbrowe and a number of colonists sailed from England in a ship of 350 tons for Connecticut. After a long voyage they arrived in New Haven about 1 July, 1639. In August they purchased from the Indians the tract of land comprising the present town of Guilford, the contract being formally made on 26 Aug., and the deed dated 30 Sept., 1639. These papers and a map made by the Indians of the territory sold and of the adjoining coast are still preserved in the Massachusetts historical society in Boston. The first settlers of Guilford came to New England when the hold of the Dissenters was broken from the mother country, so that they settled as an independent republic. Their constitution is on record in the handwriting of Samuel Disbrowe. This document is complete in all its parts, providing for executive, legislative, and judiciary departments, the order of its courts, manner of holding its meetings, etc. In 1650 he returned to England, and through the influence of his brother was sent to Scotland in the employment of the state. Soon after his arrival he was appointed to represent the town of Edinburgh in parliament, and on 4 May, 1655, was chosen by Cromwell to be one of the nine counsellors of Scotland. In the following year he was a member of the British parliament. Cromwell was so pleased with his services that, on 16 Feb., 1657, he gave a patent for the office of keeper of the great seal of Scotland to him or to his deputy during his lifetime, "subject to such regulations with regard to fees or otherwise as should be made by his highness or his successors with the advice of the privy council of England." Disbrowe was continued in all his offices by the protector, Richard Cromwell, and prudently embraced the royal proclamation sent from Breda. On 21 May, 1660, he signed his submission to the king, and on 12 Dec. obtained his pardon. After that he retired to his home in Elfworth, Cambridgeshire.

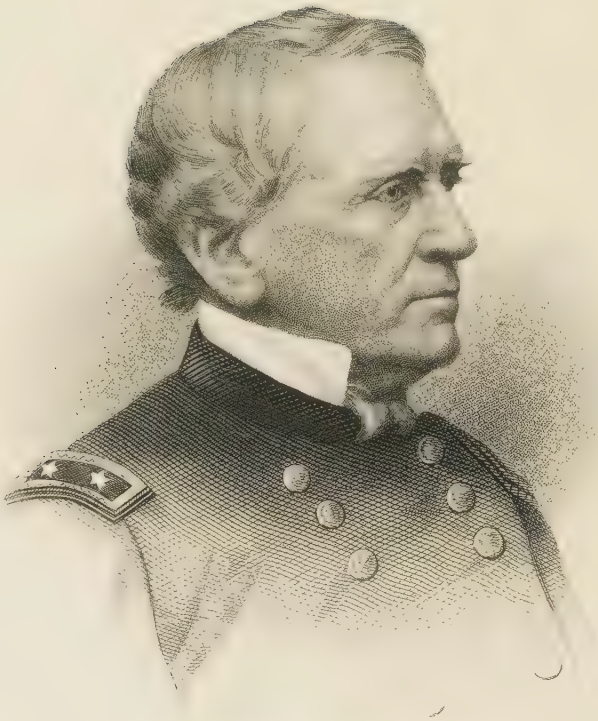
DISNEY, Richard Randolph, Canadian clergyman, b. in North-East, Cecil co., Md., in 1835. His parents had formerly been slaves, but at the time of his birth were free. When he was eight years old his father died. Afterward he was a barber in Baltimore, and while there united with the African Methodist Episcopal church. He was graduated with honors at Osgood seminary, Springfield, in 1857, and at once began his ministerial work. He soon removed to Chatham, Ontario, where a large colored population was settled, and subsequently was stationed as a preacher at Peel, Buxton, Windsor, Hamilton, St. Catharines, Toronto, and Chatham. On the death of Bishop Nazrey he was appointed to the vacant bishopric in the African Methodist Episcopal church.

DISOSWAY, Gabriel Poillon, antiquary, b. in New York city, 6 Dec., 1799; d. on Staten Island, 9 July, 1868. He was graduated at Columbia in 1819, went to Petersburg, Va., where he resided for several years, returned to New York, and became a merchant. He was one of the founders of Randolph-Macon college, established at Ashland, Va., in 1832. He contributed frequently to the newspaper and periodical press, and published "The Earliest Churches of New York and its Vicinity" (New York, 1865).

DISSTON, Henry, manufacturer, b. in Tewkesbury, England, 21 May, 1819; d. in Philadelphia, 16 March, 1878. He came to the United States at the age of fourteen with his father, who died soon after landing in Philadelphia. The boy turned his attention to mechanics, and began business in Philadelphia. It is said he wheeled the coal that he required from the wharf to his place of business. He was the first manufacturer that competed successfully with the English in hand and back saws, and to him belongs the credit of effectually checking the importation of foreign saws. He invented more than twenty improvements in saw manufacture, among them the movable or inserted teeth. His business increased until his buildings covered more than 250,000 square feet of ground and contained over 400 workmen. He was the inventor and manufacturer of the Disston saw.

DISTURNELL, John, compiler, b. in Lansingburg, N. Y., 6 Oct., 1801; d. in New York city, 1 Oct., 1877. He began life as a printer in Albany, N. Y., but soon removed to New York city, where he opened a book-store, became a map publisher, and was a vice-president of the Association for the advancement of science and art. In 1840 he compiled and printed "The Traveller's Railroad Guide," the first railroad guide published in the United States. He was also the author of "New York as it was and as it is," and for twenty years published the "United States Register or Blue Book." He also published "Influence of Climate in North and South America" (New York, 1859); "The Great Lakes or Inland Seas of America" (1863); and "Traveller's Guide to the Hudson River" (1864).

DITSON, George Leighton, traveller, b. in Westford, Mass., 5 Aug., 1812. He was educated at Westford academy, and began the study of medicine in Boston, but gave it up on account of impaired health. After many years' absence from the United States he returned, and took his medical degree at Vermont university in 1864, but never practised. Dr. Ditson has travelled widely in Europe, Asia, and Africa. While in Russia he crossed the Caucasus range, a feat that had been accomplished by no other foreigner not connected with the Russian army. While living in the island of Cuba he was several times acting U. S. consul at Nuevitas under Presidents Tyler and Polk, and he opened and developed the copper mines at Bayatavo. While a resident of Puerto Principe, in 1842–'3, he was professor of English in the Dupuis college there. Dr. Ditson is a member of the Geological society of France, the Theosophi-



John A. Dix

cal society, the American oriental society, and other learned societies, and has published "Circassia, or a Tour to the Caucasus" (New York, 1850); "Crimora" (Boston, 1852); "The Para Papers on France, Egypt, and Ethiopia" (Paris, 1858); "The Crescent and French Crusaders" (New York, 1859; reissued as "Adventures and Observations on the Northern Coast of Africa"); and "The Federati of Italy" (Boston, 1871). He has in preparation (1887) a "History of Ohio."

DITSON, Oliver, publisher, b. in Boston, Mass., 20 Oct., 1811. He was educated in the Boston public schools, and at the age of thirteen entered the service of Samuel H. Parker in the book and music business. After ten years he became a partner of his former employer, under the firm-name of Parker & Ditson. They continued together in a small way until 1844, when the senior withdrew from the concern, leaving Mr. Ditson to follow his own fortune. In 1856 one of his employees, J. C. Haynes, became interested in the business, and the firm-name was permanently changed to Oliver Ditson & Co. In 1867 a branch house was established by his eldest son in New York city, under the style of C. H. Ditson & Co., and in 1876 another in Philadelphia, J. E. Ditson & Co. The published catalogue of the Ditsons numbers over 80,000 different pieces of sheet-music and more than 2,300 music - books. Of piano - forte methods they have published the enormous number of 111, and of books for the organ, about 100. In 1887 the Boston house employed about 100 clerks and book-keepers. They have twenty printing-presses constantly at work. Application, method, economy, and acute business judgment have secured Mr. Ditson's success, and he has absorbed the patronage and the publications of many rival publishers. Mr. Ditson is officially connected with several monetary institutions, and during the past twenty-two years has been president of the Continental bank in his native city.

Oliver Ditson

DIVEN, Alexander S., lawyer, b. in Catherine, Tioga co., N. Y., 15 Feb., 1809. He received an academical education, and studied law. After his admission to the bar he settled in Elmira, and acquired a large practice. He was elected a state senator in 1858, and then was sent to congress as a Republican, serving from 4 July, 1861, till 3 March, 1863. Soon afterward he entered the volunteer army, becoming captain in May, 1863, and rose till he was made brevet brigadier-general in August, 1864. In January, 1865, he resigned his commission and returned to Elmira. Subsequently he became vice-president of the Erie railway company.

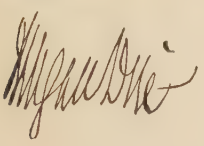
DIVOL, Ira, instructor, b. in Topham, Vt., in October, 1820; d. in Baraboo, Wis., 22 June, 1871. He lost both parents while still a child, and was fitted for college by an elder brother. He was graduated at the University of Vermont in 1847, and, going to New Orleans, became principal of a grammar-school. In 1852 he turned his attention to law, but removed to St. Louis in 1855, and was elected superintendent of the public schools, holding this office for eleven years, when failing health compelled his withdrawal. He was afterward elected state superintendent of public schools. His firm policy carried the schools safely through the dangers of the civil war, and prevented their disintegration. He also laid the foundation of the public-school library, which afterward became the public library in St. Louis.

DIX, Dorothea Lynde, philanthropist, b. in Worcester, Mass., about 1794. After the death, in 1821, of her father, a merchant in Boston, she established a select school for young girls in that city. Hearing of the neglected condition of the convicts in the Charlestown state prison, she visited them, and became interested in the welfare of the unfortunate and suffering classes, for whose elevation she labored until 1834, when, her health becoming impaired, she gave up her school and visited Europe, having inherited from a relative sufficient property to render her independent. She returned to Boston in 1837 and devoted herself to investigating the condition of paupers, lunatics, and prisoners, encouraged by her friend and pastor, Rev. Dr. Channing, of whose children she had been governess. In this work she has visited every state of the Union east of the Rocky mountains, endeavoring to persuade legislatures to take measures for the relief of the poor and wretched. She was especially influential in procuring legislative action for the establishment of state lunatic asylums in New York, Pennsylvania, North Carolina, Illinois, Indiana, and other states. In April, 1854, in consequence of her unwearied exertions and petitions that she presented to congress in 1848 and 1850, a bill passed both houses appropriating 10,000,000 acres to the several states for the relief of the indigent insane; but the bill was vetoed by President Pierce, on the ground that the general government had no constitutional power to make such appropriations. During the civil war she was superintendent of hospital nurses, having the entire control of their appointment and assignment to duty. After its close she resumed her labors for the insane. Miss Dix published anonymously "The Garland of Flora" (Boston, 1829), and "Conversations about Common Things," "Alice and Ruth," "Evening Hours," and other books for children; also, "Prisons and Prison Discipline" (Boston, 1845); and a variety of tracts for prisoners. She is also the author of many memorials to legislative bodies on the subject of lunatic asylums and reports on philanthropic subjects.

DIX, John Adams, b. in Boscawen, N. H., 24 July, 1798; d. in New York city, 21 April, 1879. His early education was received at Salisbury, Phillips Exeter academy, and the College of Montreal. In December, 1812, he was appointed cadet, and going to Baltimore aided his father, Maj. Timothy Dix of the 14th U. S. infantry, and also studied at St. Mary's college. He was made ensign in 1813, and accompanied his regiment, taking part in the operations on the Canadian frontier. Subsequently he served in the 21st infantry at Fort Constitution, N. H., where he became 2d lieutenant in March, 1814, was adjutant to Col. John De B. Walback, and in August was transferred to the 3d artillery. In 1819 he was appointed aide-de-camp to Gen. Jacob Brown, then in command of the Northern military department, and stationed at Brownsville, where he studied law, and later, under the guidance of William West, was admitted to the bar in Washington. He was in 1826 sent as special messenger to the court of Denmark. On his return he was stationed at Fort Monroe, but contin-

ued ill-health led him to resign his commission in the army, 29 July, 1828, after having attained the rank of captain. He then settled in Cooperstown, N. Y., and began the practice of law. In 1830 he removed to Albany, having been appointed adjutant-general of the state by Gov. Enos B. Throop, and in 1833 was appointed secretary of state and superintendent of common schools, publishing during this period numerous reports concerning the schools, and also a very important report in relation to a geological survey of the state (1836). He was a prominent member of the "Albany Regency," who practically ruled the Democratic party of that day. Going out of office in 1840, on the defeat of the democratic candidates and the election of Gen. Harrison to the presidency, he turned to literary pursuits, and was editor-in-chief of "The Northern Light," a journal of a high literary and scientific character, which was published from 1841 till 1843. In 1841 he was elected a member of the assembly. In the following year he went abroad, and spent nearly two years in Madeira, Spain, and Italy. From 1845 till 1849 he was a U. S. senator, being elected as a Democrat, when he became involved in the Free-soil movement, against his judgment and will, but under the pressure of influences that it was impossible for him to resist. He always regarded the Free-soil movement as a great political blunder, and labored to heal the consequent breach in the Democratic party, as a strenuous supporter of the successive Democratic administrations up to the beginning of the civil war. In 1848 he was nominated by the Free-soil Democratic party as governor, but was overwhelmingly defeated by Hamilton Fish. President Pierce appointed him assistant treasurer of New York, and obtained his consent to be minister to France, but the nomination was never made. In the canvass of 1856 he supported Buchanan and Breckenridge, and in 1860 earnestly opposed the election of Mr. Lincoln, voting for Breckenridge and Lane. In May, 1861, he was appointed postmaster of New York, after the defalcations in that office. On 10 Jan., 1861, at the urgent request of the leading bankers and financiers of New York, he was appointed secretary of the treasury by President Buchanan, and he held that office until the close of the administration. His appointment immediately relieved the government from a financial deadlock, gave it the funds that it needed but had failed to obtain, and produced a general confidence in its stability. When he took the office there were two revenue cutters at New Orleans, and he ordered them to New York. The captain of one of them, after consulting with the collector at New Orleans, refused to obey. Secretary Dix thereupon telegraphed: "Tell Lieut. Caldwell to arrest Capt. Breshwood, assume command of the cutter, and obey the order I gave through you. If Capt. Breshwood, after arrest, undertakes to interfere with the command of the cutter, tell. Lieut. Caldwell to consider him as a mutineer, and treat him accordingly. If any one attempts to haul down the American flag, shoot him on the spot." At the beginning of the civil war he took an active part in the formation of the Union defence committee, and was its first president; he also presided at the great meeting in Union square, 24 April, 1861. On the president's first call for troops, he organized and sent to the field seventeen regiments, and was appointed one of the four major-generals to command the New York state forces. In June following he was commissioned major-general of volunteers, and ordered to Washington by Gen. Scott to take command of the Arlington and Alexandria department. By a successful political intrigue, this disposition was changed, and he was sent in July to Baltimore to take command of the Department of Maryland, which was considered a post of small comparative importance; but, on the defeat of the Federal forces at Bull Run, things changed; Maryland became for the time the centre and key of the national position, and it was through Gen. Dix's energetic and judicious measures that the state and the city were prevented from going over to the Confederate cause. In May, 1862, Gen. Dix was sent from Baltimore to Fort Monroe, and in the summer of 1863, after the trouble connected with the draft riots, he was transferred to New York, as commander of the Department of the East, which place he held until the close of the war. In 1866 he was appointed naval officer of the port of New York, the prelude to another appointment during the same year, that of minister to France. In 1872 he was elected governor of the state of New York as a Republican by a majority of 53,000, and, while holding that office, rendered the country great service in thwarting the proceedings of the inflationists in congress, and, with the aid of the legislature, strengthening the national administration in its attitude of opposition to them. On a renomination, in 1874, he was defeated, in consequence partly of the reaction against the president under the "third-term" panic, and partly of the studious apathy of prominent Republican politicians who desired his defeat. During his lifetime Gen. Dix held other places of importance, being elected a vestryman of Trinity church (1849), and in 1872 comptroller of that corporation, delegate to the convention of the diocese of New York, and deputy to the general convention of the Episcopal church. In 1853 he became president of the Mississippi and Missouri railway company, and in 1863 became the first president of the Union Pacific railroad company, an office which he held until 1868, also filling a similar place for a few months in 1872 to the Erie railway company. He married Catharine Morgan, adopted daughter of John J. Morgan, of New York, formerly member of congress, and had by her seven children, of whom three survived him. He was a man of very large reading and thorough culture, spoke several languages with fluency, and was distinguished for proficiency in classical studies, and for ability and elegance as an orator. Among his published works are "Sketch of the Resources of the City of New York" (New York, 1827); "Decisions of the Superintendents of Common Schools" (Albany, 1837); "A Winter in Madeira, and a Summer in Spain and Florence" (New York, 1850; 5th ed., 1853); "Speeches and Occasional Addresses" (2 vols., 1864); "Dies Irae," translation (printed privately, 1863; also revised ed., 1875); and "Stabat Mater," translation (printed privately, 1868).—His eldest son, **Morgan,** clergyman, b. in New York city, 1 Nov., 1827, received his early education and training in Albany, where he resided till 1842. He was graduated at Columbia in 1848, and at the general Theological seminary of the Episcopal church in 1852, was ordained deacon the same year, and priest in 1853. In September, 1855, he was appointed an assistant minister in Trinity parish, New York. In 1859 he was chosen assistant rector of the same parish, and on Dr. Berrian's death became rector, 10 Nov., 1862. Dr. Dix has been indefatigable in the labors of his office as rector of the largest parish in America, as well as in the service of the Episcopal church in general, and was chosen president of the house of deputies at the general convention that was held in Chicago in October, 1886.

He has published a "Commentary on the Epistle to the Romans" (1864); "An Exposition of the Epistles to the Galatians and Colossians" (1865); "Lecture on the Pantheistic Idea of an Impersonal-Substance Deity" (1865); "Essay on Christian Art" (1853); "Lectures on the Two Estates: that of the Wedded in the Lord, and that of the Single for the Kingdom of Heaven's Sake" (1872); "Memoirs of John Adams Dix" (New York, 1883); quarto edition of same (printed privately, 1883); "The Gospel and Philosophy, Six Lectures" (1886); and two volumes of Sermons (1878, 1886). He has also issued several manuals of devotion, and occasional sermons.—Another son, **Charles Temple,** artist, b. in Albany, 25 Feb., 1838; d. in Rome, Italy, 11 March, 1873, studied at Union, and early turned his attention to art. He had made good progress in his studies when, at the beginning of the civil war, he was chosen aide-de-camp on the staff of his father, and won credit from his faithful performance of duty. On the return of peace he devoted himself anew to his profession, and soon established a name among the most promising of our marine painters. His "Sunset in Capri" is a spirited study of sea and shore.



DIX, John Homer, author, b. about 1810; d. in 1884. He was graduated at Harvard in 1833, and as M. D. at Jefferson medical college, Philadelphia, in 1836, and settled in Boston, where he was highly successful as an aurist and oculist. He was a member of the American ophthalmic society, the American otological society, the Massachusetts medical benevolent society, and the Boston society of natural history. In 1856–'7 he built the Hotel Pelham in Boston, the first family hotel erected on this continent. He was the author of "Changes of the Blood," translated from the French of M. Tibert for Dunglison's medical library (Philadelphia); "Treatise on Strabismus" (Boston, 1841); "Essay on Morbid Sensibility of the Retina," Boylston prize essay (Boston, 1849); and "The Ophthalmoscope and its Uses" (1856).

DIXEY, Henry E., actor, b. in Boston, Mass., 6 Jan., 1859. In 1868 he attached himself to the variety stock at the Howard Athenæum in his native city, and made his first success as Peanuts in "Under the Gaslight." In 1875 he played the Heifer in "Evangeline," at the Globe theatre. Other rôles in which he has been seen are: Dr. Syntax in "Cinderella at School," Lorenzo in "The Mascot," Sir Mincing Lane in "Billee Taylor," Bunthorne in "Patience," Sir Joseph Porter in "Pinafore," Peter Papyms in "The New Evangeline," Boss Knivett in "The Romany Rye," the Chancellor in "Iolanthe," William Crank in "Pounce & Co.," John Wellington Wells in "The Sorcerer," Brabazon Sykes in "The Merry Duchess," Carrickfergus in "The Duke's Motto," Frippaponne in "Lieut. Helene," Henry Nervine in "Distinguished Foreigners," and Christopher Blizzard in "Confusion." In one or another of these parts he has been seen in all the large cities of the United States. In 1883 he began an engagement at the Bijou theatre, New York, in the burlesque of "Adonis," and acted it till the summer of 1885, when he appeared in the same piece in London, England, with considerable success. In September of the same year he returned to America, and reappeared at the Fifth avenue theatre, New York.

DIXON, Alexander, Canadian clergyman, b. in Longford, Ireland, about 1820. He emigrated to Canada with his parents, and settled in Toronto (then Little York). He was graduated with distinction at King's college, Toronto, and, after passing through a divinity course, was ordained a deacon in Hamilton. After serving for a few months as curate to the Rev. Dr. Atkinson, in St. Catharines, in 1850 he was appointed rector of Louth and Port Dalhousie, where he remained until appointed rector of Guelph, in 1875. While in Guelph he was for a time joint editor with the Rev. J. G. D. McKenzie of "The Church," was for several years special correspondent of "The London Guardian," likewise of a New York paper, and also wrote reviews for a Toronto daily. In 1883 he was appointed archdeacon of Guelph.

DIXON, Archibald, senator, b. in Caswell county, N. C., 2 April, 1802; d. in Henderson, Ky., 23 April, 1876. His grandfather, Col. Henry, received a wound at the battle of Eutaw which caused his death; and Wynn, his father, served gallantly through the Revolutionary war. In 1805 he removed with his father to Henderson county, Ky., where he received a common-school education, studied law, was admitted to the bar in 1824, and attained high rank as a criminal lawyer. He was a member of the legislature in 1830 and 1841, of the state senate in 1836, and lieutenant-governor in 1843–'7. In 1848 he was the choice of a majority of the Kentucky Whigs for governor; but on the nomination of John J. Crittenden by a section of them he withdrew from the candidacy, in order to heal dissensions in the party. When a candidate for governor he defended the American protective policy, and made that the principal subject of his discussions. In 1849, when the proposition for gradual emancipation of the slaves was before the people, he vehemently opposed the scheme, and, being chosen a member of the Constitutional convention, proposed a resolution, which was substantially incorporated in the new constitution, declaring that whereas the right of the citizen to be secure in his person and property lies at the bottom of all governments, and slaves, and children hereafter born of slave mothers, are property, therefore the convention has not the power nor the right to deprive the citizen of his property except for the public good, and only then by making to him a just compensation. He was the Whig candidate for governor in 1851, but the Whigs who were emancipationists withdrew their support on account of his views on the slavery question, and put in nomination Cassius M. Clay, which resulted in the election of a Democrat. He had endeavored to unite the party by declining the nomination; but his friends in the convention insisted upon his taking it. His canvass was contemporaneous with the agitation for the dissolution of the Union, and he eloquently seconded before the people the appeals for its preservation uttered in Washington by Clay and Webster. He and Mr. Crittenden were rival candidates before the legislature for the next seat that fell vacant in the U. S. senate; but both withdrew for the sake of harmony. When Henry Clay died, shortly afterward, Mr. Dixon's friends elected him for the unexpired term. He

took his seat on 20 Dec., 1852, and served till 3 March, 1855. During the civil war he was an advocate of peace, and in 1863 was a delegate to the peace convention held at Frankfort, Ky.

DIXON, George, British navigator, d. about 1800. He discovered several small islands near the northwest coast of America, and a strait that he named Dixon's Entrance. He was the author of "Voyage Round the World, but more particularly to the Northwest Coast of America, 1785–'88" (London, 1789); "Voyage of Meares" (1790); and "The Navigator's Assistant" (1791).

DIXON, George Washington, comic singer, b. about 1808; d. in New Orleans, La., in March, 1861. He first appeared in 1827 as a comedian, in small parts, at the amphitheatre in Albany, N. Y. In 1830, for the first time in that city, he assumed the character of a negro minstrel, with the accompaniment of the banjo. Thence he went to New York, Philadelphia, and other large cities, singing his famous songs, "The Coal-Black Rose" and "Zip Coon," to admiring throngs. Dixon may justly be termed the pioneer of negro minstrelsy. But he lacked enterprise and industry; his songs were without character, had little melody, and became time-worn. For years he produced nothing new, until he was supplanted by novelty. In 1839 he published in New York a weekly, called the "Polyanthos," and for a libel therein on Rev. Dr. Hawks he suffered six months' imprisonment. His life closed in a charity hospital.

DIXON, James, senator, b. in Enfield, Conn., 5 Aug., 1814; d. in Hartford, 27 March, 1873. He was graduated at Williams with distinction in 1834, studied law in his father's office, and began practice in Enfield, but soon rose to such eminence at the bar that he removed to Hartford, and there formed a partnership with Judge William W. Ellsworth. Early combining with his legal practice an active interest in public affairs, he was elected to the popular branch of the Connecticut legislature in 1837 and 1838, and again in 1844. In 1840 he married Elizabeth L., daughter of the Rev. Dr. Jonathan Cogswell, professor in the Connecticut theological institute. Mr. Dixon at an early date had become the recognized leader of the Whig party in the Hartford congressional district, and was chosen in 1845 a member of the U. S. house of representatives. He was re-elected in 1847, and was distinguished in that difficult arena alike for his power as a debater and for an amenity of bearing that extorted the respect of political opponents even in the turbulent times following the Mexican war, and the exasperations of the sectional debate precipitated by the "Wilmot Proviso." Retiring from congress in 1849, he was in that year elected from Hartford to a seat in the Connecticut senate, and, having been re-elected in 1854, was chosen president of that body, but declined the honor, because the floor seemed to offer a better field for usefulness. During the same year he was made president of the Whig state convention, and, having now reached a position of commanding influence, he was in 1857 elected U. S. senator, and participated in all the parliamentary debates of the epoch that preceded the civil war. He was remarkable among his colleagues in the senate for the tenacity with which he adhered to his political principles, and for the clear presage with which he grasped the drift of events. Six years afterward, in the midst of the civil war, he was re-elected senator with a unanimity that had had no precedent in the annals of Connecticut. During his service in the senate he was an active member of the committee on manufactures, and during his last term was at one time appointed chairman of three important committees. While making his residence in Washington the seat of an elegant hospitality, he was remarkable for the assiduity with which he followed the public business of the senate, and for the eloquence that he brought to the discussion of grave public questions as they successively arose before, during, and after the civil war. Among his more notable speeches was one delivered 25 June, 1862, on the constitutional status created by the so-called acts of secession—a speech that is known to have commanded the express admiration of President Lincoln, as embodying what he held to be the true theory of the war in the light of the constitution and of public law. To the principles expounded in that speech Mr. Dixon steadfastly adhered during the administration alike of President Lincoln and of his successor. In the impeachment trial of President Johnson he was numbered among the Republican senators who voted against the sufficiency of the articles, and from that date he participated no longer in the councils of the Republican party. Withdrawing from public life in 1869, he was urged by the president of the United States and by his colleagues in the senate to accept the mission to Russia, but refused the honor, and, without returning to the practice of his profession, found occupation for his scholarly mind in European travel, in literary studies, and in the society of congenial friends. From his early youth he had been a student and lover of the world's best literature. Remarkable for the purity of his literary taste and for the abundance of his intellectual resources, he might have gained distinction as a prose writer and as a poet if he had not been allured to the more exciting fields of law and politics. While yet a student at college he was the recognized poet of his class, and even his graduation thesis was written in verse. His poems, struck off as the leisure labors of a busy life, occupy a conspicuous place in Everest's "Poets of Connecticut," while five of his sonnets, exquisite for refinement of thought and felicity of execution, are preserved side by side with those of Bryant, Percival, and Lowell in Leigh Hunt's "Book of the Sonnet." He was also a frequent contributor to the "New England Magazine" and to the periodical press. Trinity college conferred upon him in 1862 the degree of LL. D. Deeply imbued with classical letters, versed in the principles and the practice of law, widely read in history, and possessing withal a logical mind, Mr. Dixon always preferred to discuss public questions in the light of a permanent political philosophy, instead of treating them with paramount reference to the dominant emotions of the hour.

James Dixon

DIXON, Jeremiah. See MASON, CHARLES.

DIXON, Joseph, inventor, b. in Marblehead, Mass., 18 Jan., 1799; d. in Jersey City, N. J., 17 June, 1869. He was entirely self-educated, and early showed unusual mechanical ingenuity, inventing a machine for cutting files before he was twenty-one. Subsequently he became a printer,

and then acquired a proficient knowledge of wood-engraving and lithography. He also studied medicine, and in that connection obtained an intimate acquaintance with chemistry, which he applied with great ability in his inventions. His knowledge of optics was unusual, and he had no superior in familiarity with photography. In 1839 he took up the experiments of Daguerre, and was one of the first persons to take portraits by the camera. The application of a reflector, so that the picture should not appear reversed, is credited to him, and Samuel F. B. Morse, to whom he confided the method, endeavored to have it patented in Europe. He built the first locomotive with the double crank, using wooden wheels. That a steam-engine could be run on wheels and perform the services of a carrier was considered absurd. Mr. Dixon originated the process of transferring on stone, now everywhere used by lithographers, and invented the process of photo-lithography, publishing it years before it was believed to be of any value. By his process of transferring, the old bank-notes were easily counterfeited, and it was to prevent the abuse of his process that he devised the method of printing the bills in colors. He patented this process, but never received any benefit from it, as all the banks used it without pay. The present method employed by the U. S. government for printing in colors, for which a large sum is paid to patentees, is the old process invented by Mr. Dixon, of which the patent had long since expired. He perfected the method of making collodion as used in photography, and his suggestions led to the adoption of a true system for grinding the lenses of camera-tubes. It is claimed that the anti-friction metal, known generally under the name of "Babbitt metal," was originally discovered by him. He is the originator of the steel-melting business in the United States. Mr. Dixon became most widely known in connection with the crucible works that bear his name, having invented the plumbago, or graphite, crucible as now made. He established his factory in Salem, Mass., in 1827, removing it to Jersey City in 1847, and, with improvements and additions, it has grown into the largest factory of its kind in the world. The crude material comes largely from mines near Fort Ticonderoga, N. Y., and is also very extensively used by the Joseph Dixon crucible works in the manufacture of lead-pencils, an industry that has been developed simultaneously with the production of crucibles. Mr. Dixon invented a great number of machines and processes, never failing in his mechanical undertakings, and became very wealthy.

DIXON, Nathan Fellows, senator, b. in Plainfield, Conn., in 1774; d. in Washington, D. C., 29 Jan., 1842. He was graduated at Brown in 1799, studied law, and in 1802 settled in Rhode Island. He was elected a member of the general assembly of that state in 1813, and served in that capacity until 1830. From 1839 till 1842 he was a U. S. senator.—His son, **Nathan Fellows,** lawyer, b. in Westerly, R. I., 1 May, 1812; d. there, 11 April, 1861, was graduated at Brown in 1833, attended the law-schools at New Haven and Cambridge, and practised his profession in Connecticut and Rhode Island from 1840 till 1849. He was elected to congress from Rhode Island in 1849, and was one of the governor's council appointed by the general assembly during the Dorr troubles of 1842. In 1844 he was a presidential elector, and in 1851 was elected as a Whig to the general assembly of his state, where, with the exception of two years, he held office until 1859. In 1863 he went to congress as a Republican, and served as a member of the committee on commerce. He was a member of the 39th, 40th, and 41st congresses, and declined re-election in 1870. He, however, resumed his service in the general assembly, being elected successively from 1872 till 1877.

DIXON, William Hepworth, British author, b. in the West Riding of Yorkshire, 30 June, 1821; d. 27 Dec., 1879. Though he had few educational advantages, he early displayed his literary predilections by printing a five-act tragedy. He was an early contributor of verse to Douglas Jerrold's "Illuminated Magazine," and about 1844 became literary editor of a paper at Cheltenham. In 1846 he settled in London as a law student at the Inner Temple, and began contributing to the "Daily News." In 1853 he became chief editor of the "Athenæum," which post he held until 1869. His treatment of American subjects and American authors in this journal, as well as in his books on America, was considered in the United States unjust and incorrect, although he made many friends in his visits to this country. In 1864 he made a tour of the East, and in 1866 spent a few months in travelling and lecturing in the United States, paying especial attention to Mormonism and spiritualism. He revisited America in 1874–'5, and wrote "White Conquest" (2 vols., 1876), which contained some useful information about the condition of the negroes, the Indians, and the Chinese in America. He published "John Howard, a Memoir" (London, 1849); "Life of William Penn" (1851); "The Lives of the Archbishops of York" (1863); "The Holy Land" (2 vols., 1865); "New America" (1867); "Spiritual Wives" (1868); "Her Majesty's Tower" (4 vols., 1869–'71); "Free Russia" (2 vols., 1870); "The Switzers" (1872); "The History of Two Queens—Catherine of Aragon and Anne Boleyn" (4 vols., 1873–'4); "Diana, Lady Lyle" (3 vols., 1877); "Ruby Grey" (3 vols., 1878); "Royal Windsor" (1878); and a work on Cyprus, which he visited in 1878.

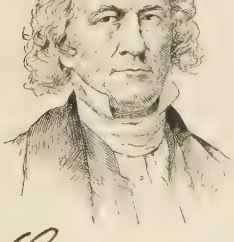
DIXWELL, JOHN, regicide, b. probably in Folkstone, Kent, England, in 1607; d. in New Haven, Conn., 18 March, 1689. It appears that he was a man of estate, and was descended from a family long prominent in Kent and Warwickshire. In the revolution of 1640 he espoused the popular cause, was a colonel in the parliamentary army, a member of four parliaments, thrice in the council, and also one of the court that tried and condemned Charles I. After the Restoration he and his associates were condemned to death, but Dixwell escaped to America. He changed his name to John Davids, and lived undiscovered in New Haven, where he was married and left children. In 1664 he visited two of his fellow-regicides, Whalley and Goff, who had found a refuge at Hadley, Mass. Up to the time of his death he cherished a hope that the spirit of liberty in England would produce a new revolution. See Stiles's "History of Three of the Judges of Charles I.—Whalley, Goffe, Dixwell" (Hartford, 1794).

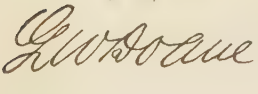
DOAK, Samuel, clergyman, b. in Augusta county, Va., in August, 1749; d. in Bethel, N. C., 12 Dec., 1830. He was graduated at Princeton in 1775, became tutor in Hampden Sidney college, studied theology there, and was licensed to preach by the presbytery of Hanover in 1777. He removed to the Holston settlement (then part of North Carolina, but now a part of east Tennessee), and two years later to a settlement on the Little Limestone, in Washington county, where he bought a farm, built a log school-house and a small church, and founded the "Salem Congregation." The school he established at this place was the first that was organized in the valley of the Mississippi.

In 1785 it was incorporated by the legislature of North Carolina as Martin academy, and in 1795 became Washington college. He presided over it from the time of its incorporation till 1818, when he removed to Bethel and opened a private school, which he named Tusculum academy. Mr. Doak was a member of the convention of 1784 that formed the constitution of the commonwealth of Frankland. The degree of D. D. was conferred upon him by Washington and Greenville colleges in 1818.—His son, **Samuel,** was president of Tusculum college, Tennessee, in 1857.

DOANE, Augustus Sidney, physician, b. in Boston, 2 April, 1808; d. on Staten Island, N. Y., 27 Jan., 1852. He was graduated at Harvard in 1825, studied medicine for two years in Paris, and returned to Boston, but in 1830 settled in New York, where he became a successful practitioner. In 1839 he was appointed professor of physiology in the University of New York, which chair he soon resigned. He was subsequently appointed chief physician of the Marine hospital, practised again from 1843 till 1850, and was again appointed health officer. He edited "Good's Study of Medicine," translated Maygrier's "Midwifery," Dupuytren's "Surgery," Lugol's "Scrofulous Diseases," Baylis's "Descriptive Anatomy," Blandin's "Topographical Anatomy," Ricord's "Syphilis," Chaussier on "The Arteries," and Scoutetten on "Cholera." He also contributed to "Surgery Illustrated," and to other medical publications. See "Discourse on the Death of Dr. Doane," by E. H. Chapin, D. D. (New York, 1852).

DOANE, George Washington, P. E. bishop, b. in Trenton, N. J., 27 May, 1799; d. 27 April, 1859. He was graduated at Union in 1818, studied theology in the General theological seminary, when, as he used to say, "the whole seminary was accommodated in a second-story room over a saddler's shop down town," and ordained, by Bishop Hobart, deacon in 1821 and priest in 1823. He was associated with the bishop as his deacon and assistant in Trinity church, New York, and was also interested with Bishop Uphold in founding St. Luke's, New York. In 1824 he went to Hartford as professor in Washington (now Trinity) college, and during his residence there began his life-long interest and active energy in Christian education according to the system of the church. He gave a great deal of time then, as he did later, to work in connection with the church newspapers, editing the "Episcopal Watchman" in connection with Dr. William Croswell, who was his most congenial and beloved friend. In 1828 he went to Boston to become the assistant to the Rev. Dr. Gardiner, on whose death, in 1830, he was elected rector of Trinity church. He was intimately associated here with Dr. Croswell, who was then the rector of Christ church, Boston. In 1829 he married the widow of James Perkins. He made his mark in that city as an eloquent and persuasive preacher, especially in all matters connected with the missionary work of the church. In 1832 he was elected bishop of New Jersey, to succeed Bishop Croes, to which high office he was consecrated in October of the same year, in St. Paul's chapel, New York. His life from this time was largely associated with the diocese of New Jersey, which, during his episcopate, comprised the entire state; and there was no parish in it with which he was not familiar, and hardly a parishioner whom he did not know and in whom he did not feel that strong personal interest which grows out of great-hearted sympathy, and belongs to that rare gift of remembering faces and names and individual histories. He was prominent in everything that concerned the general interest of the institutions of the church, and particularly those connected with its growth. He had a large part in framing the old constitution of the Missionary society, whose leading principles still survive through various changes of form. His conviction of the great importance of Christian education, and his influence as a Christian educator, led him to found St. Mary's hall, which was really the first effort on a large scale to educate the church's girls in the church's way. Subsequently he founded Burlington college, to do the same work for boys. The former was the more successful of the two, and its great spiritual power, both in the lives of those whom it educated and the pattern it set, can hardly be overestimated. The establishment of these schools brought him into serious financial embarrassments, which became afterward the nominal ground not only for criticism, but for serious accusations, and led to his presentment and trial, the result of which was the unanimous dismissal of the presentment. Bishop Doane's reputation as an orator was second only to the estimation in which he was held as an educator and preacher. Many of his addresses deal with the great questions of the day, in which, as a staunch American and true patriot, he took the deepest interest. He was a spirited and clever conversationalist, ready always to "give a reason for the hope that was in him," especially when the authority of the church was impugned. He published numerous addresses, and a volume of poems with the title "Songs by the Way" (New York, 1824). His son edited his "Life and Writings," with a memoir (4 vols., New York, 1860–'1). Among the best-known of his fugitive poems, found in many collections, are "What is that, Mother?" "Softly Now the Light of Day," and "Thou art the Way."—His son, **George Hobart,** domestic prelate, b. in Boston, Mass., 5 Sept., 1830. He was graduated in medicine at Jefferson college, Philadelphia, in 1850, but did not practise. He then prepared himself for the ministry of the Protestant Episcopal church, was ordained deacon, and stationed at Grace church, Newark. He entered the Roman Catholic church in 1855, was educated for the priesthood in the college of St. Sulpice, Paris, and afterward in the Collegio Pio, Rome. He was ordained priest in 1857, made secretary to Bishop Bayley, and then appointed chancellor of the diocese of Newark. In 1873 he became vicar-general. He was raised to the rank of domestic prelate of the papal household, with the title of monsignor, in 1886. He did much to place the American college in Rome on a solid basis, and raised large sums in the United States for its support.—Another son, **William Croswell,** b. 2 March, 1832, was ordained deacon, 6 March, 1853, and priest, 6 March, 1856, by his father, in St. Mary's church, Burlington, N. J., in which church he was first assistant to his father and then rector. He established St. Barnabas free church in Burlington, where he ministered for three years, was rector of St. John's church, Hart-





ford, from 1863 till 1867, and then rector of St. Peter's church, Albany, in which church he was elected first bishop of the new diocese of Albany on 3 Dec., 1868, and consecrated on 2 Feb., 1869. He has organized the Cathedral of All Saints, in Albany, and begun the erection of the building; has established the Sisterhood of the Holy Child Jesus, for works of mercy and education in the church; and founded St. Agnes school for girls, and the Child's hospital, in Albany, with affiliated houses for the care and training of children in Saratoga and East Line. His publications consist chiefly of addresses, sermons, and fugitive verses, besides the memoir of his father mentioned above, and a volume called "Mosaics for the Christian Year."

DOANE, Joseph, loyalist, of Bucks county, Pa. Previous to the Revolution he was regarded as a reputable man of good estate, but, having been harassed by the whigs, he and his seven sons threw in their lot with the tories. He was in Bedford county jail in September, 1783, but nothing further is known of his history. Five of the sons, Moses, Joseph, Israel, Abraham, and Mahlon, were men of fine physique and address, elegant horsemen, and great runners and leapers. Their property having been confiscated and sold, they determined to wage predatory war upon their persecutors, to live in the open air, and exist as best they could. In pursuance of this plan, they became the terror of the surrounding country, robbing and plundering continually, but sparing the poor, the weak, and the peaceful. They also acted as spies for the British army, always went on horseback, sometimes all together, at other times separately, and with accomplices. So successful were they in escaping when arrested or assailed, that a reward of £300 was offered for each of their heads. Finally, Moses, after a desperate fight, was shot by his captors, and Abraham and Mahlon were hanged at Philadelphia. Joseph, before the Revolution, was a teacher. While on a marauding expedition during the war, he was badly wounded, and, falling from his horse, was captured. He was imprisoned, but succeeded in escaping to New Jersey, where he taught for a year under an assumed name. Finally he fled to Canada, and returned to Pennsylvania, a few years after peace had been declared, a poor, broken-down old man. The only mention of Israel is that in February, 1783, he was in jail, and that his appeal to the council of Pennsylvania to be released was dismissed. Aaron, who was under sentence of death at Philadelphia in October, 1784, was pardoned by the council in March, 1785, and a second Aaron was reprieved under the gallows, at Newark, N. J., in July, 1788.

DOANE, William Howard, musical composer, b. in Preston, Conn., 3 Feb., 1831. He was educated at Woodstock academy, and settled in Cincinnati, Ohio. Though actively engaged in business, he devotes much time to musical study and work, especially in connection with Sunday-schools. Dr. Doane is very active and liberal in the promotion of Christian enterprises. In 1878 he presented Denison university with Doane hall, a library building costing $10,000. His works include "Sabbath-School Gems" (1862); "Little Sunbeams" (1864); "Silver Spray" (1867); and "Songs of Devotion" (1868); and several others in connection with the Rev. Robert Lowry. He is the chief editor of the "Baptist Hymnal" (New York, 1886). In 1875 Denison university, Ohio, conferred upon him the degree of Mus. Doc.

DOBBIN, James Cochrane, statesman, b. in Fayetteville, N. C., in 1814; d. there, 4 Aug., 1857. He was graduated at the University of North Carolina in 1832, studied law, was admitted to the bar in 1835, and practised in Fayetteville. He was elected to congress from North Carolina as a Democrat, and served from 1 Dec., 1845, till 3 March, 1847. He was a member of the state legislature in 1848–'52, and chosen speaker in 1850. He was a member of the Democratic national convention at Baltimore in 1852, and appointed secretary of the navy by President Pierce, serving from 7 March, 1853, until 6 March, 1857.

DOBBINS, Daniel, naval officer, b. in Mifflin county, Pa., 5 July, 1776; d. at Presque Isle, 29 Feb., 1856. He visited Lake Erie with a party of surveyors as early as 1796, and was with Gen. Wayne at the time of his death. He became a resident there, and was noted as a navigator of the great lakes. When Mackinaw was captured by the British in 1812, he was present with his vessel, the "Salina," taken prisoner, and paroled. He was a second time made prisoner at Detroit, but was soon paroled unconditionally. He was of great service in fitting out Perry's fleet on Lake Erie, and was with the expedition under Com. Sinclair that attempted to recapture Mackinaw. After the war he was in command of the "Washington," and in her conveyed the troops to Green bay, she being the first vessel that entered that harbor. Having been ordered to sea in 1826, he, in preference to going, resigned his commission as captain in the navy, but still remained in the employ of the government, and President Jackson appointed him commander of a revenue cutter in 1829. He retired finally from the service in 1849.

DOBBS, Arthur, colonial governor, b. in Ireland in 1784; d. in Town Creek, N. C., 28 March, 1765. He had been a member of the Irish parliament, and was known for his attempt to discover the northwest passage. He became governor of North Carolina, 1 Nov., 1754, and retained the office until 1765. He adopted conciliatory measures toward the Indians, but his administration was a continued contest with the legislature. His zeal in behalf of the royal prerogative was thwarted by the representatives of the people, who did not hesitate to leave the government expenses unprovided for when the governor insisted upon unpopular measures. When he attempted to establish the Anglican church, they were ready to welcome it, so long as their own vestries were permitted to choose their ministers; and when he wished to collect quit-rents from the people, who were nearly all tenants of the king, they deferred, from time to time, the adjustment of the rent-roll. Gov. Dobbs was the author of "Trade and Improvement of Ireland" (Dublin, 1729); "Capt. Middleton's Defence" (1744); and "An Account of the Countries Adjoining to Hudson's Bay" (London, 1748).

DOBLADO, Manuel (do-blah'-do), Mexican statesman, b. in Guanajuato, 15 June, 1818; d. 22 April, 1864. He studied in the college of San Ignacio in Guanajuato and that of San Ildefonso of the city of Mexico, where he was admitted to the bar in 1846, and joined the liberal party. With Zarco and Ignacio Ramirez he wrote for the journal "El Siglo XIX" against the government of Santa Anna, for which he suffered bitter persecution. At the entry of the American troops into the capital in September, 1847, he was taken prisoner while firing from a roof upon the invaders. In 1850 he retired to Guanajuato, and devoted himself to his profession till 1853, when Gen. Juan Alvarez initiated the revolution consequent on the plan of Ayutla. He joined at Acapulco the headquarters of the revolutionary chief, and remained with him as privy counsellor until the triumph of

the revolution in 1855. The newly elected president, Comonfort, appointed him minister of foreign affairs, in which office he displayed diplomatic ability, and through his mediation some difficulties with the government of the United States were arranged satisfactorily, and the existing government, proclaimed by the plan of Ayutla, was recognized by France and Spain. Toward the end of 1856 he resigned his seat in the cabinet, as he had been elected deputy to the famous congress of 1857, and as such he signed the constitution of that year, which was based upon that of the United States of America. When Comonfort in 1857 gave himself entirely into the hands of the reactionary or church party, Doblado was one of the first to suffer persecution; but with Juarez and Lerdo de Fejada, of the liberal group, he worked incessantly to re-establish the constitution of 1857, and was one of the deputies that proposed the famous reform laws, which comprised the confiscation of church property, suppression of religious orders, civil marriage, and other republican principles. After the victory of the liberal party in the battle of Calpulalpan, Doblado was elected governor of Guanajuato in 1859, and occupied this place until the difficulties between Mexico and Spain, England, and France arose, which led to the tripartite intervention, when he hastened to offer his services to President Juarez. After the landing of the allied forces at Vera Cruz, 8 Dec., 1861, Juarez appointed Doblado and invested him with extraordinary powers to meet the commanders, and try to arrange the existing differences. At Soledad, Doblado encountered the advance-guard of the allied army and arranged a treaty that led to the evacuation of Mexico by the English and Spanish forces in April, 1862. After the declaration of war by Napoleon III., and the invasion of the capital of Mexico by the French forces in 1863, Doblado followed Juarez and the cabinet to the interior, and fell a victim to malignant fever two days before the party reached the city of Zacatecas.

DOBRIZHOFFER, Martin, missionary, b. in Gratz, Styria, in 1717; d. in Vienna in 1791. He went as a missionary to South America in 1749, and during the next eighteen years was engaged in converting the Indians that dwelt on the west bank of Paraguay river and in the interior of Paraguay. After the expulsion of the Jesuits from the Spanish colonies he returned to Austria and became a favorite of Maria Theresa. He wrote a history of the Abipones in Latin (Vienna, 1784; German translation, Pesth, 1784; English translation, by Sara Coleridge, London, 1822).

DOCAMPO, Rodrigo (do-cam'-po), Spanish soldier, b. at Zamora, Spain, near the close of the 15th century; d. in Tomebamba, Ecuador, in 1545. He went with Pizarro's expedition to Peru in 1531, took part in the conquest of that kingdom, and in 1533, being in command of a division of the army under Benalcazar, fought in the plains of Riobamba, Ecuador, several battles against the Indian chief Ruminabi, whom at last he defeated decisively, and thereby secured the conquest of Quito. In 1534 he was ordered by Benalcazar to leave Quito at the head of a small army for the north of Ecuador, and explored and conquered a vast territory, after terrible hardships and numerous battles with the Indians. For this service he was made lieutenant-governor of the town of San Juan de Pasto in 1539. After Pizarro's death in 1541, Docampo supported the new viceroy, Cristobal Vaca de Castro, was appointed captain of Castro's body-guard, and, as royal standard-bearer, took part in the battle of Chupas, 1542, against Diego Almagro the younger. In recompense he was appointed vice-governor of Quito, and was also authorized to undertake the conquest of the Sumaco and Macas provinces. When Docampo was informed that Castro's successor, the Viceroy Blasco Nuñez Vela, who had been imprisoned by order of the supreme court, had been liberated by his custodian, Judge Juan Alvarez, and had debarked at Lumbez, he with his followers hastened to the coast and gave him every assistance (1544). The viceroy rewarded him with the appointment of marshal, and gave him the rich commandery of Tomebamba. But these dignities and grants appeared to Docampo insufficient for his merits, and he put himself into secret correspondence with Gonzalo Pizarro, who gave him written orders to imprison and kill the viceroy and the judge, Alvarez. During the retreat after the battle of Popayan, Docampo committed designedly so many blunders that Blasco Nuñez, convinced of his treachery, ordained his execution in his own commandery of Tomebamba.

DOCKERY, Oliver H., congressman, b. in Richmond county, N. C., 12 Aug., 1830. He was graduated at the University of North Carolina in 1848, and studied law, but never practised. He represented his native county in the state legislature in 1858–'9, and was candidate for district elector on the Union ticket, Bell and Everett, in 1860. He was for a short time in the Confederate service, but soon withdrew, and ever afterward was an outspoken advocate of the re-establishment of the Union, and was active in the peace movement of 1864 in his state, under Gov. Holden. He was elected a representative from North Carolina in congress from 13 July, 1868, till 3 March, 1871, and was re-elected as a Republican.

DOD, Thaddeus, clergyman, b. near Newark, N. J., 7 March, 1740; d. in Cross Creek, Pa., 20 May, 1793. His early days were passed in Mendham, N. J. By alternate teaching and studying, he fitted himself for college, and was graduated at Princeton in 1773. He studied theology, was licensed to preach by the New York presbytery in 1775, and held pastoral charges in Virginia and Maryland. He crossed the mountains westward about 1773, when there had been for several years peace with the Indian tribes, but, in consequence of a fresh outbreak in 1774, his colony were driven back, and took refuge in an old fort near Monongahela river, where they found it necessary to build forts, and to live in them part of the time. He returned to New Jersey in 1777, and, with a view to preaching in the distant west, was ordained by the New York presbytery. After living at Patterson's Creek, in Virginia, for nearly two years, he removed across the mountains in September, 1779, organizing a church in 1781. Mr. Dod was the second minister that settled west of the Monongahela (Dr. McMillan only having preceded him), and he took a position farther westward on the frontier than any other, where, in 1783, the first administration of the Lord's supper in that region took place in a barn. The first house of worship was erected two years later, and the second not till 1792. Mr. Dod had an exquisite taste for music, was acquainted with it as a science, and caused special attention to be given to this part of the service, delivering sermons on the importance of sacred music. He introduced the custom of singing without reading the line. He taught in a classical and mathematical school in 1782, of which he was founder and builder, and it was the first school of its kind in the west and was in operation for about three years and a half. As the result of his enterprise, with the co-operation of McMillan, Power,

and Smith, an academy was established at Washington, Pa., in 1787, which he conducted one year, opening it with about thirty students, and continuing his preaching at the same time. He was not only the first president, and one of the founders of Washington college, Pa., but founder of the first presbytery west of the Alleghany mountains. —His nephew, **Daniel,** mechanician, b. in Virginia, 28 Sept., 1788; d. in New York city, 9 May, 1823, was educated at Rutgers, and became distinguished for his mathematical acquirements. He was especially devoted to the construction of steam machinery, beginning when steam navigation was in its infancy, and soon became one of the most successful engine-builders in the country. In 1811 he declined an appointment in Rutgers college as professor of mathematics, in order to devote himself to this business. His mechanical constructions were different from former ones, and, having proved superior to all others, were generally adopted. In 1819 the "Savannah," with an engine of his building, made the first steam-ship voyage across the Atlantic, and returned in safety after visiting England and Russia. Mr. Dod removed, in 1821, to New York city, where he was reputed the most successful engine-builder in the United States. In 1823, having altered the machinery of a steamboat, he went on board to witness the effect of his repair by a trial trip on the East river. The boiler exploded, and so severely injured Mr. Dod that he died a few days thereafter.—His second son, **Albert Baldwin,** educator, b. in Mendham, N. J., 24 March, 1805; d. in Princeton, 20 Nov., 1845, was like his father, not only in mathematical taste, but in the versatility of his genius. He was graduated at Princeton in 1822, and was at once offered a place in the navy by the secretary, who witnessed his graduation, but declined it. He taught four years in Fredericksburg, Va., and in 1826 entered the Theological seminary at Princeton as a student; at the same time was a tutor in the college till 1829, when he was licensed to preach by the New York presbytery. He became professor of mathematics at Princeton in 1830, which chair he held until the time of his death, declining the chaplaincy and professorship of moral philosophy at West Point. He possessed a taste for general literature and the fine arts, and a power of analysis, logical deduction, and lucid statement, to which was due the high degree of success he attained as a teacher. He frequently supplied pulpits in New York and Philadelphia, and was regarded as an eloquent preacher and a learned lecturer on political economy and architecture. The degree of D. D. was conferred upon him by the University of North Carolina in 1844, and by the University of New York in 1845. His articles, contributed mainly to the "Princeton Review," have been published in book-form under the title of "Princeton Theological Essays" (New York, 1847). The one on "Capital Punishment" (1842) was adopted by a committee of the New York legislature as their report. His article on "Transcendentalism" was reprinted as a pamphlet.

DODD, Edward Mills, missionary, b. in Bloomfield, N. J., 22 June, 1824; d. in Marsovan, Turkey, in the autumn of 1865. After receiving a common-school education, he became a clerk in his native place in 1839. He was converted, and resolved upon entering the Presbyterian ministry. With this in view he began a preparatory course of study, and in 1844 was graduated at Princeton. After devoting one year to private teaching in Virginia, and spending three years in the Union theological seminary of New York as a student, he was licensed to preach by the Newark presbytery, and ordained in 1848. He sailed from Boston for Smyrna in 1849, representing the American board on a mission to the Jews at Salonica. Because of the failure of his health three years later, he returned to the United States, but on his recovery again sailed for Smyrna, and from September, 1855, continued his labors among the Armenians for eight years. With special reference to the mission-school for girls, he was transferred from Smyrna to Marsovan. Its organization was delayed till the summer of 1865, and meanwhile Mr. Dodd supervised its construction, and actively shared the missionary work of that vicinity. His sudden death by cholera occurred two months after the opening of the school. The Turkish and Hebrew tongues were familiar to him, and he had contributed largely to the Turkish hymn-book.

DODD, James B., mathematician, b. in Virginia in 1807; d. in Greensburg, Ky., 27 March, 1872. He was chosen professor of mathematics, natural philosophy, and astronomy in Centenary college, Mississippi, in 1841, and in Transylvania university in 1846, of which institution he was acting-president from 1849 till 1855. He was author of arithmetics (New York, 1852), algebras (1853), and a geometry, and contributed to the "Southern Quarterly Review."

DODD, Mary Ann Hanmer, poet, b. in Hartford, Conn., 5 March, 1813. She attended school in Wethersfield, and in her native town, where she was graduated in 1830 at Mrs. Kinnear's seminary. Her first published articles appeared in 1834 in the "Hermethenean," a magazine conducted by the students of Washington (now Trinity) college, Hartford. Her writings would have been known more generally, and perhaps more favorably, if she had not confined herself so much to denominational channels of publication. She wrote but little until 1835, after that becoming a frequent contributor to "The Ladies' Repository" and "The Rose of Sharon," an annual in which the greater part of her writings appeared. Among her best poems were "The Lament," "The Dreamer," "The Mourner," and "To a Cricket." A volume of her poems was published in Boston in 1843.

DODD, Stephen, clergyman, b. in Bloomfield, N. J., in 1777; d. in Morristown, N. J., 1856. He was educated at Union college, and was successively pastor of Presbyterian churches at Carmel, N. Y., and Waterbury and East Haven, Conn., from 1817 till 1847. He published a "History of East Haven" (New Haven, 1824) and "Revolutionary Memorials" (New York, 1852).

DODDRIDGE, Joseph, clergyman, b. in Pennsylvania in 1769; d. in Wellsburg, Brooke co., Va., in November, 1826. He was educated at Jefferson academy, Canonsburg, Pa., and ordained in the Protestant Episcopal church by Bishop White in 1792. He was one of the pioneers of western Virginia, and published "Logan," a dramatic piece (1823), and "Notes on the Settlement and Indian Wars of the Western Country in 1763–'83" (1824). —His brother, **Philip,** lawyer, b. in Wellsburg, Va., in 1772; d. in Washington, D. C., 19 Nov., 1832. After a voyage down the Mississippi on a flat-boat, he studied law, and soon gained a brilliant local reputation. He was a delegate from Brooke county to the Virginia legislature in 1815, and for several years a member of that body. He also served in the state constitutional convention of 1829–'30, and was an earnest advocate there of the white basis of representation. He was elected to congress, and served from 7 Dec., 1829, till his

death, while he was acting on a committee to codify the laws of the District of Columbia.

DO DESTERRO, Antonio Reimas (do-dester'-ro), Brazilian prelate, b. in Vianna da Lima, Portugal, 13 July, 1694; d. in Rio de Janeiro, 5 Dec., 1773. He entered the order of St. Benedict, distinguished himself as a teacher and orator, and became bishop of Angola, from which see he passed to Rio de Janeiro, nominated archbishop of that diocese by the king, and confirmed by the pope, 18 Jan., 1745. Do Desterro made his entry into Rio de Janeiro, 1 Jan., 1747. He was the first that tried to ameliorate the condition of the slaves, and prohibited their burial outside of the cemeteries. He founded schools, built churches, and contributed to the improvement of the country.

DODGE, David Low, merchant, b. in Brooklyn, Conn., 14 June, 1774; d. in New York city, 23 April, 1852. He received a common-school education, and was for several years a teacher, but in 1802 became a dry-goods dealer in Hartford, Conn., and in 1807 removed to New York city. At one time Mr. Dodge had charge of the first cotton factory built in his native state, near Norwich. In 1827 he retired from business. He aided in establishing the New York peace society in 1815, being its first president, was one of the founders of the New York Bible society, and of the New York tract society. His wife was a daughter of the Rev. Aaron Cleveland. He published "The Mediator's Kingdom not of this World" (New York, 1809), and "War inconsistent with the Religion of Jesus Christ" (1812). See "Memorial of David Low Dodge" (Boston, 1854).—His son, **William Earl,** merchant, b. in Hartford, Conn., 4 Sept., 1805; d. in New York city, 9 Feb., 1883, received a common-school education, and worked for a time in his father's cotton mill. At the age of thirteen he removed to New York city with his family, and entered a wholesale dry-goods store, remaining there eight years. Afterward he engaged in the same business on his own account, continuing till 1833, when he married the daughter of Anson G. Phelps, and became a member of the firm of Phelps, Dodge & Co. He continued at the head of this house till 1879. Mr. Dodge was one of the first directors of the Erie railroad, and was interested in other railways and in several insurance corporations. He also owned large districts of woodland, and had numerous lumber and mill interests, besides being concerned in the development of coal and iron mines. He was elected president of the New York chamber of commerce three times in succession. He was a trustee of the Union theological seminary, one of the founders of the Union league club of New York city, vice-president of the American Bible society, president of several temperance associations, and took great interest in the welfare of the freedmen. He was a member of the peace convention of 1861, and in 1866–'7, having successfully contested the election of his Democratic opponent, James Brooks, was a representative in congress, serving on the committee on foreign affairs. President Grant appointed him a member of the Indian commission. He left a large fortune, and made several bequests to religious and charitable institutions. A bronze statue of him has been placed at the junction of Broadway and Sixth Avenue, New York city.—His son, **William Earl,** b. in New York city, 15 Feb., 1832, has given his time and attention to the administration of an extensive mercantile business. He has been connected with the allotment and sanitary commissions during the civil war, and is now (1887) president of several religious and benevolent societies.—Another son, **Charles Cleveland,** soldier, b. in Plainfield, N. J., 16 Sept., 1841, was commissioned as captain of New York mounted rifles on 6 Dec., 1861, and as major on 30 Dec., was in command of the outposts at Newport News, and a cavalry column of Gen. Wool's army that marched on Norfolk, and received the surrender before the arrival of his superiors. He commanded in successful engagements at Suffolk, Va., and Hertford Ford, N. C., was made colonel 14 Aug., 1862, promoted brigadier-general 29 Nov., 1862, was in command at Suffolk during Longstreet's siege, and resigned on 12 June, 1863.—**Grace Hoadley,** daughter of the second William Earl, has been for some time officially connected with New York city charities, and other organizations for the relief of the poor and the care of needy women. In November, 1886, she was appointed by the mayor of New York city one of the board of school commissioners, together with Mrs. Mary Nash Agnew, wife of Dr. Cornelius R. Agnew. Miss Dodge has been a prominent member of the New York state charities association, and is president of the Working-girls' society, and vice-president of the Industrial education association.

DODGE, Ebenezer, educator, b. in Salem, Mass., 22 April, 1819. He was graduated at Brown in 1840, and at Newton theological seminary in 1845. After a pastorate of seven years in the Baptist church in New London, N. H., he was called in 1853 to the professorship of Biblical criticism in Hamilton theological seminary, filling, at the same time, the professorship of evidences of Christianity in Madison university. In 1861 he became professor of Christian theology in the seminary. In 1868 he was made president of Madison university, and also of Hamilton theological seminary. Besides reviews contributed to various periodicals, he is the author of "Christian Evidences" (Boston, 1868), and "Theological Lectures" (1883).

DODGE, Grenville Mellen, soldier, b. in Danvers, Mass., 12 April, 1831. He was graduated at Capt. Partridge's military academy, Norwich, Vt., in 1850, and in 1851 removed to Illinois, where he was engaged in railroad surveys until 1854. He was afterward similarly employed in Iowa and as far west as the Rocky mountains, and made one of the earliest surveys along the Platte for a Pacific railroad. He was sent to Washington in 1861 by the governor of Iowa to procure arms and equipments for the state troops, and on 17 June became colonel of the 4th Iowa regiment, which he had raised, having declined a captaincy in the regular army tendered him by the secretary of war. He served in Missouri under Frémont, commanded a brigade in the army of the southwest, and a portion of his command took Springfield 13 Feb., 1862, opening Gen. Curtis's Arkansas campaign of that year. He commanded a brigade on the ex-

treme right in the battle of Pea Ridge, where three horses were shot under him, and, though severely wounded in the side, kept the field till the final rout of the enemy. For his gallantry on this occasion he was made brigadier-general of volunteers on 31 March, 1862. In June of that year he took command of the district of the Mississippi, and superintended the construction of the Mississippi and Ohio railroad. Gen. Dodge was one of the first to organize colored regiments. During the Vicksburg campaign, with headquarters at Corinth, he made frequent raids, and indirectly protected the flanks of both Grant and Rosecrans, being afterward placed by Grant at the head of his list of officers for promotion. He distinguished himself at Sugar Valley, 9 May, 1864, and Resaca, 14 and 15 May, and for his services in these two battles was promoted to major-general of volunteers on 7 June, 1864. He led the 16th corps in Sherman's Georgia campaign, distinguished himself at Atlanta on 22 July, where, with eleven regiments, he withstood a whole army corps, and at the siege of that city, on 19 Aug., was severely wounded and incapacitated for active service for some time. In December, 1864, he succeeded Gen. Rosecrans in the command of the department of Missouri. That of Kansas and the territories was added in February, 1865, and he carried on in that year a successful campaign against hostile Indians. In 1866 he resigned from the army to become chief engineer of the Union Pacific railroad, which was built under his supervision. He resigned in 1869 to accept a similar place in the Texas Pacific railroad, and since then has been constantly employed in building railroads in the United States and Mexico. He has been for many years a director of the Union Pacific railroad. Gen. Dodge was elected to congress from Iowa as a Republican during his absence from the state, and served one term in 1867–'9, declining a re-nomination. He was also a delegate to the Chicago republican convention of 1868 and the Cincinnati convention of 1876.

DODGE, Henry, soldier, b. in Vincennes, Ind., 12 Oct., 1782; d. in Burlington, Iowa, 19 June, 1867. His father, Israel Dodge, was a revolutionary officer of Connecticut. Henry commanded a mounted company of volunteer riflemen in August and September, 1812, became major of Louisiana militia under Gen. Howard on 28 Sept., major in McNair's regiment of Missouri militia in April, 1813, and commanded a battalion of Missouri mounted infantry, as lieutenant-colonel, from August till October, 1814. He was colonel of Michigan volunteers from April till July, 1832, during the Black Hawk war, and in the affair with the Indians at Pickatolika, on Wisconsin river, 15 June, totally defeating them. He was commissioned major of U. S. rangers, 21 June, 1832, and became the first colonel of the 1st dragoons, 4 March, 1833. He was successful in making peace with the frontier Indians in 1834, and in 1835 commanded an important expedition to the Rocky mountains. Gen. Dodge was unsurpassed as an Indian fighter, and a sword, with the thanks of the nation, was voted him by congress. He resigned from the army, 4 July, 1836, having been appointed by President Jackson governor of Wisconsin territory and superintendent of Indian affairs. He held this office till 1841, when he was elected delegate to congress as a democrat, and served two terms. In 1846 he was again made governor of Wisconsin, and after the admission of that state to the Union was one of its first U. S. senators. He was re-elected, and served altogether from 23 June, 1848, till 3 March, 1857.—His son, **Augustus Cæsar,** senator, b. in St. Genevieve, Mo., 12 Jan., 1812; d. in Burlington, Iowa, 20 Nov., 1883, received a public-school education, and served under his father in the Winnebago war of 1827 and the Black Hawk war of 1832. He removed to Burlington, Iowa, was register of the land-office there in 1838–'9, and was then elected a delegate to congress as a democrat from the territory of Iowa, serving from 1840 till 1847. Upon the admission of Iowa to the Union he became one of its U. S. senators, and served from 1848 till his resignation, 8 Feb., 1855, his father being in the senate from Wisconsin during the same period. He was a presidential elector in 1848, U. S. minister to Spain in 1855–'9, his appointment to fill the mission vacated by the accomplished linguist, Pierre Soulé, eliciting from Horace Greeley the criticism that the administration had thought proper to appoint as successor to a gentleman who spoke six languages a person who could not correctly speak one! Gen. Dodge was a delegate to the Chicago national democratic convention of 1864, and in 1873–'4 was mayor of Burlington, having been chosen on an independent ticket. On 4 Feb., 1854, Albert G. Brown, of Mississippi, alluded, in the course of a speech in the senate, to certain occupations as menial and degrading, whereupon Mr. Dodge replied to him, ending with the following words: "I tell the senator from Mississippi, in presence of my father, who will attest its truth, that I have performed, and do perform when I am at home, all of those menial services to which that senator has referred in terms so grating to my feelings. As a general thing, I saw my own wood and do all my own marketing. I never had a servant, of any color, to wait upon me a day in all my life. I have driven teams, horses, mules, and oxen, and considered myself as respectable then as I now do, or as any senator upon this floor is."

DODGE, John Henry, missionary, b. in Wenham, Mass., 14 Feb., 1828; d. in Wendell, Mass., 18 June, 1863. He worked on a farm till his seventeenth year, when he was apprenticed to a carpenter, and at the same time studied by himself. He was graduated at Amherst in 1856 and at Andover theological seminary in 1859, ordained on 21 Sept. of that year, and sailed at once for Africa as a missionary. Besides the care of a church and a Sunday-school at Sherbro island, Mendi, West Africa, he had the oversight of the workmen on the mission farm, and labored to reduce the Sherbro dialect of the Mandingo language to writing. Overwork and the climate undermined his health, and he returned to this country in 1861, after which he was pastor at Wendell, Mass., till his death.

DODGE, Mary Abigail, author, b. in Hamilton, Mass., about 1830. She was instructor in physical science in the Hartford, Conn., high school in 1851, and for several years thereafter, and was subsequently a governess in the family of Dr. Gamaliel Bailey, of Washington, D. C., to whose paper, the "National Era," she became a contributor. In 1865–'7 she was one of the editors of "Our Young Folks," a magazine for children, published in Boston. Since 1876 she has resided much of the time in Washington. She has been a frequent contributor to prominent magazines, under the pen-name of "Gail Hamilton," and her published works, written in a witty and aggressive style, consist largely of selections from her contributions. They include "Country Living and Country Thinking" (Boston, 1862); "Gala Days" (1863); "A New Atmosphere" and "Stumbling Blocks" (1864); "Skirmishes and Sketches" (1865); "Red-Letter Days in Applethorpe" and "Summer Rest" (1866):

"Wool-Gathering" (1867); "Woman's Wrongs, a Counter-Irritant" (1868); "Battle of the Books" (New York, 1870); "Woman's Worth and Worthlessness" (1871); "Little Folk Life" (1872); "Child World" (2 vols., Boston, 1872–'3); "Twelve Miles from a Lemon" (New York, 1873); "Nursery Noonings" (1874); "Sermons to the Clergy" and "First Love is Best" (Boston, 1875); "What Think Ye of Christ?" (1876); "Our Common-School System" (1880); "Divine Guidance, Memorial of Allen W. Dodge" (New York, 1881); and "The Insuppressible Book" (Boston, 1885). In 1877 she wrote for the New York "Tribune" a series of vigorous letters on civil service reform.

DODGE, Mary Mapes, author, b. in New York city in 1838. She is a daughter of Prof. James J. Mapes, and was educated under private tutors in New York city. Early in life she married William Dodge, a New York lawyer of high standing, at whose death she was left a widow with two sons. Of these the elder, James Mapes Dodge, became known as a successful inventor. In connection with Donald G. Mitchell and Harriet Beecher Stowe, Mrs. Dodge was one of the earliest editorial writers on "Hearth and Home," and for several years conducted the children's department of that paper. In 1873, with the issue of its first number, she became conductor of "St. Nicholas," an illustrated magazine for children, published in New York. She has contributed to English and American periodicals, and has published "Irvington Stories" (New York, 1864); "Hans Brinker, or the Silver Skates," which has been translated into French, Dutch, and other European languages (1865, new illustrated ed., 1876); "A Few Friends, and How they Amused Themselves" (Philadelphia, 1869); "Rhymes and Jingles" (New York, 1874); "Theophilus and Others" (1876); "Along the Way," a volume of poems (1879); and "Donald and Dorothy" (Boston, 1883). Mrs. Dodge is the author of "Miss Malony on the Chinese Question," published in "Scribner's Monthly" in 1870.

DODGE, Nathaniel Shatswell, author, b. in Haverhill, Mass., 10 Jan., 1810; d. in Boston, Mass., 2 Feb., 1874. He studied at Dartmouth, but was not graduated, was in Andover theological seminary in 1833–'4, and was afterward principal of Maplewood institute, Pittsfield, Mass. He lived in London, England, in 1851–'61, saw some service as an army quartermaster in 1862–'6, and was afterward clerk in one of the departments at Washington. At the time of his death he was president of the Papyrus club, an organization of literary men in Boston. He was a voluminous contributor to periodicals, under the pen-name of "John Carver, Esq.," and published "Stories of a Grandfather about American History" (Boston, 1873).

DODGE, Ossian Euclid, vocalist, b. in Cayuga, N. Y., 22 Oct., 1820; d. in London, England, 4 Nov., 1876. Having early given evidence of decided musical ability, he determined, much against the wishes of his friends, to become a professional singer of moral comic songs, which he composed and wrote himself. About 1845, in company with Bernard Covert, composer of the song "The Sword of Bunker Hill," he organized a concert troupe, and gave entertainments in most of the cities of the United States. He was the first to take a company overland from New York to San Francisco, and was the first manager that ever gave an entertainment in the Mormon tabernacle at Salt Lake city. Mr. Dodge was a strict teetotaler, and being brought frequently in contact, during the political canvass of 1844, with Henry Clay, Millard Fillmore, William H. Seward, and others of the Whig leaders, was entertained at dinner by Mr. Clay at Ashland, Ky., in October of that year, where wine was on the table. On being challenged to drink his host's health, Mr. Dodge excused himself on the ground of his total abstinence principles, and proposed substituting water for wine as "more emblematic of the purity of true friendship." Mr. Clay, replacing his untasted glass on the table, and scanning the features of his guest, but finding there no expression but that of the greatest respect, grasped him by the hand, and replied: "I honor your courage, and respect your principles, but," he added, laughingly, "I can't say that I admire your taste." Mr. Dodge purchased the choice of a seat for the first concert given by Jenny Lind in Boston, Mass., paying a premium of $625, which outlay, he asserted, was many times repaid, as, during the nine months following, he netted $11,000 in a tour of the New England states, being frequently compelled to give two concerts in one evening. In 1851 he was sent as a delegate to the "World's Peace Congress," held in Exeter Hall, London. He also acted as foreign correspondent for the Boston "Weekly Museum," a journal he had established in 1849. This was afterward transferred to Cleveland, where he removed about 1858, abandoning public singing and devoting himself to the sale of musical publications. Having invested largely in real estate in St. Paul, Minn., he settled in that city in 1862, where he amassed a fortune. From 1869 till 1873 he was secretary of the St. Paul chamber of commerce.

DODGE, Richard Irving, soldier, b. in Huntsville, N. C., 19 May, 1827. He was graduated at the U. S. military academy in 1848, assigned to the 8th infantry, and after serving at various posts was promoted to captain, 3 May, 1861. He commanded the camp of instruction at Elmira, N. Y., in August and September, 1861, and served as mustering and disbursing officer at various places during the civil war. He was assistant inspector-general of the 4th army corps in 1863, and promoted to major, 21 June, 1864. He was member of a board to perfect a system of army regulations in New York city in 1871–'2, was promoted to lieutenant-colonel on 29 Oct., 1873, and since that time has served against hostile Indians in the west. He was made colonel of the 11th infantry on 26 June, 1882. Col. Dodge has published "The Black Hills" (New York, 1876); "The Plains of the Great West" (1877; republished in London as "Hunting Grounds of the Great West"); and "Our Wild Indians" (1881).

DODGE, Theodore Ayrault, soldier, b. in Pittsfield, Mass., 28 May, 1842. After receiving a military education at Berlin under Maj.-Gen. Von Frohreich, of the Prussian army, he studied at University college, London, and at Heidelberg, and was graduated at the University of London in 1861. On his return to this country in that year he enlisted as a private in the national service, and lost his right leg at Gettysburg. He became 1st lieutenant on 13 Feb., 1862, captain in the veteran reserve corps, 12 Nov., 1863, and was brevetted major, 17 Aug., 1864, and colonel, 2 Dec., 1865. He was made captain in the 44th regular infantry, 28 July, 1866, and served as chief of a war department bureau till 28 April, 1870, when he was retired, and has since lived in Boston. Col. Dodge has lectured and contributed much to periodicals, and has published "The Campaign of Chancellorsville" (Boston, 1881); a "Bird's-Eye View of the Civil War" (1883); and "A Chat in the Saddle" (1885).

DODS, John Bovee, philosopher, b. in New York city in 1795; d. in Brooklyn, N. Y., 21 March, 1872. His life was largely devoted to the study of mental

philosophy. He published "Thirty Sermons"; "Philosophy of Mesmerism" (New York, 1847); "Philosophy of Electrical Psychology" (1849); "Immortality Triumphant" (1852); and "Spirit Manifestations Examined and Explained" (1854).

DODWORTH, Thomas, musician, b. in Sheffield, England, in 1790; d. in Morrisania, N. Y., 30 April, 1876. He came to the United States in 1826, and organized in New York the "City band," which became by his efforts the National brass band, and was the first independent military band of music in the city. He was the originator and business manager, his sons, Allan and Harvey B., assisting him. He was fond of athletic sports, was one of the original members of the St. George's cricket club, and spent much of his time in sporting amusements until he had passed his sixtieth year.

DOE, Charles Henry, journalist, b. in Charlestown, Mass., 28 Nov., 1838. He was graduated at Harvard in 1860, and, after a year's trial in business pursuits in New York city, devoted himself to journalism, beginning on the "Brooklyn Times," and later going to the Boston "Daily Advertiser," where he was assistant editor from 1862 till 1868. A year later he became editor and publisher of the Worcester, Mass., "Evening Gazette." In 1876 Mr. Doe invented the map-type in use in newspaper offices for diagrams and maps. In addition to stories that appeared in the "Knickerbocker" and "Galaxy" magazines, under the pen-name of "Samuel Blotter," he has published a novel, first as a serial in the Boston "Sunday Courier," entitled "Buffets" (Boston, 1875).

DOGGETT, Daniel Seth, M. E. bishop, b. in Virginia in 1810; d. in Richmond, Va., 27 Oct., 1880. His father was a lawyer, and the son began the study of that profession, but changed to the ministry. He was educated at the University of Virginia, and became an itinerant minister in 1829, traveling through the southern states. In 1866 he accepted a professorship in Randolph Macon college, and in 1873 was made a bishop. He was about to take charge of the California conference, when he was seized with the illness that resulted in his death. He was the author of "The War and its Close" (Richmond, 1864).

DOGGETT, Kate, reformer, b. in Charlotte, Vt., about 1835. Her maiden name was Newell. She was educated at Castleton, Vt., and at the Albany, N. Y., female academy, and married William E. Doggett, of Chicago, in 1858. She was elected a member of the academy of science in 1869, and invited to take charge of the herbarium belonging to the academy. She attended, as a delegate of the National woman suffrage association, the Frauen conferenz held in Berlin, Germany, in November, 1869, and on her return delivered lectures on art. Several French and German clubs have been established by her, also a literary society called the Fortnightly, of which she is the president. Mrs. Doggett has translated the "Grammar of Painting and Engraving" (New York, 1874).

DOGGETT, Simeon, clergyman, b. in Middleboro', Mass., 6 March, 1765; d. in Raynham, Mass., 19 March, 1852. He was graduated at Brown in 1788, was a tutor there in 1791–'6, meanwhile pursued a course of theology, and was licensed in 1793. In July, 1796, Bristol academy at Taunton was opened, with Mr. Doggett as its first principal. He remained for seventeen years, and then in April, 1813, resigned, and settled as a minister in Mendon, Worcester co., Mass. Unitarianism was a new thing in that region, and the society by which he had been called was large, and supposed to be orthodox, yet he made it one of the conditions of his acceptance that the church creed and covenant, which he "neither understood nor believed," should be altered. This was done, and he remained in charge of the church until 1831, when he removed to Raynham, Bristol co. The winter of 1834–'5 was passed in a journey through the south. He resigned his active ministry in 1845. He published several orations and sermons.

DOHERTY, Patrick, Canadian clergyman, b. in Quebec, 2 June, 1838; d. there in 1872. He received his early education in the schools of the Christian brothers of Quebec, was graduated at the seminary, and appointed professor of English. In 1864 he joined the novitiate of the Jesuits, but had to leave it owing to feeble health. He was ordained in 1865, and at once became noted as a pulpit orator. He was elected president of St. Patrick's institute, and delivered courses of lectures before this and other literary bodies. In 1869 he traveled through Europe and Palestine, and wrote a journal of his travels. He accompanied the Canadian papal zouaves as chaplain on their return to Canada in 1870. In 1871 he was appointed vicar of St. Roch and chaplain to the hospital of Quebec. But his health was broken by his labors, and a series of lectures before the Society of St. Vincent de Paul, on the principal incidents of his travels, completed his prostration. A collection of his French writings was published in Quebec in 1872.

DOISSIN, Louis, clergyman, b. in America in 1721; d. in Paris, France, 21 Sept., 1753. He was a Jesuit, and became noted at an early age for his skill in Latin poetry. His principal poems are "In Natalibus Burgundiæ Lucis Ecloga" (1751) and "Galliæ ob restitutam delphino valetudinem" (1752). Both works are found in the collection published by the professors of the college of Louis le Grand. "Sculptura, carmen" (Paris, 1752) was reprinted in 1757, with a French translation attributed to Father Boissin himself. "Sculptura, carmen" (Paris, 1753) was accompanied by a French translation by a brother Jesuit. The two latter poems were published in a volume of the "Poemata didascalia" (Paris, 1813). The publication of the poems on sculpture obtained for Father Boissin a high reputation among European scholars. He was peculiarly happy in rendering with dignity and precision mechanical details for which the Latin language offers only equivalent terms.

DOLBEAR, Amos Emerson, physicist, b. in Norwich, Conn., 10 Nov., 1837. He was graduated at Wesleyan university, Delaware, Ohio, in 1866, and with the degree of M. E. at the University of Michigan in 1867, where he received the degree of Ph. D. in 1883. In 1866–'7 he was instructor of chemistry at the University of Michigan, and in 1867–'8 assistant professor of natural sciences in the University of Kentucky in Lexington. From 1868 till 1874 he was professor of natural sciences in Bethany college, W. Va., and mayor of that city during 1871–'2. In 1874 he was appointed professor of physics and astronomy in Tuft's college, College Hill, Mass. He has made valuable contributions to science. Among the inventions that he has perfected are the electric gyroscope, used to demonstrate the rotation of the earth, in 1867; tuning-forks, for the exhibition of Lissajou's curves, in 1872; and the opeidoscope, for the exhibition of vocal vibrations. In 1873 he began to study the convertibility of sound into electricity, and in 1876 perfected and patented his magneto-electric telephone, and the static telephone in 1879. He has published "The Art of Projecting" (Boston, 1876); "The Speaking Telephone" (1877); and "Sound and its Phenomena" (1885).

DOLES, George Pierce, soldier, b. in Milledgeville, Ga., 14 May, 1830; d. near Cold Harbor, Va., 2 June, 1864. He was educated in Milledgeville, and at the beginning of the civil war was captain of a militia company called the "Baldwin Blues." His services and those of his command were at once offered to the governor of Georgia and accepted. He was made a captain in the 4th Georgia infantry, and in May, 1862, became colonel of his regiment. He followed the fortunes of the army of Northern Virginia, and at the battle of Gettysburg succeeded to the command of a brigade. His commission as brigadier-general bore date 2 Nov., 1862. During the overland campaigns he commanded a division in Gen. Ewell's corps, and was killed in the battle of Cold Harbor.

DOLLIER DE CASSON, Francis, clergyman, b. in France about 1630; d. in Canada. The Sulpitians, being anxious to compete with the Jesuits in missionary enterprise, sent Father Dollier de Casson to winter with the Nipissings in 1668. In company with Lasalle and twenty-one other Frenchmen, he set out for the Seneca country, being guided by some Senecas, and at Tenaoutona met Jolliet, and received from him information as to the west, which enabled them to draw a map. But here Lasalle and his party refused to proceed farther. They returned to the St. Lawrence, and, as they had boasted that they were going to China, the name of Lachine was given to Lasalle's place in ridicule. Dollier de Casson, with the nine that remained faithful, set out from Tenaoutona in October, 1669, reached Lake Erie, and spent the winter near the mouth of Grand river on the north shore, and in March, 1670, drew up an act of possession. They then continued their voyage, but had to abandon their project, owing to a storm, and made for the Jesuit mission of Sault St. Marie, which they reached in May. Father Dollier de Casson was the first to sail through Lake Erie and Lake St. Clair. He was the author of a "History of Montreal."

DOLPH, John Henry, artist, b. in Fort Ann, Washington co., N. Y., 18 April, 1835. He studied for two years with Louis Van Kuyck in Antwerp, and then spent three years in Paris, after which he settled in New York. In 1877 he was made an associate of the National academy, and he has been a member of the society of American artists since its organization in 1878. Mr. Dolph's works include "Knickerbocker Farm - Yard" (1869); "The Season of Plenty"; "The Country Blacksmith" (1870); "The Horse-Doctor" (1873); "The Pasture" (1874); "The Antiquarian"; "A Gray Day on the Coast" (1875); "From the Horse-Market" (1876); "The Ante-Chamber" (1878), exhibited in the French salon in 1882; "Relic of the Battle-field"; "The Rehearsal" (1878); "Princess" (1885); and "A June Day" (1886).

DOLPH, Joseph Norton, senator, b. in Hector, Tompkins (now in Schuyler) co., N. Y., 19 Oct., 1835. He received a common - school education, besides private instruction, and for a time attended the Genesee Wesleyan seminary at Lima, N. Y. He studied law, was admitted to the bar in November, 1861, and practised in Schuyler county in 1861–'2. In the latter year he enlisted, and was appointed orderly sergeant in Capt. M. Crawford's company, known as the "Oregon Escort," which was raised under an act of congress, for the purpose of protecting the emigration to the Pacific coast against hostile Indians. He settled in Portland, Oregon, the following October, where he has since resided. He was elected city attorney in 1864, and President Lincoln appointed him district-attorney for the district of Oregon. He was a member of the Oregon senate in 1866, 1872, and 1874. When elected to the U. S. senate, he was actively engaged in various business enterprises, and had an extensive law practice. He was chosen as a republican, and took his seat 4 March, 1883. Senator Dolph is at present (1887) chairman of the committee on coast defences.

DOMBEY, Joseph, French botanist, b. in Mâcon, France, 20 Feb., 1742; d. in the island of Montserrat, West Indies, in May, 1794. He ran away from home and acquired a thorough knowledge of botany in Montpelier, where in 1768 he was graduated in medicine. In 1772 he went to Paris, where he became assistant to the botanist Bernard de Jussieu, and in 1776 was appointed by Turgot botanist of the Jardin des plantes. A year later he was sent on an expedition to visit South America and collect such useful plants as could be cultivated in France. He arrived in Callao in January, 1778, and soon gathered a large herbarium of the Peruvian flora, also accumulating much valuable information concerning the cinchona tree. In 1780 he sent a portion of his collection home, but the vessel containing them was captured by the British, and the specimens sent to the British museum, where they are still retained, notwithstanding the subsequent claims by the French government. Dombey sought at once to replace this loss, and soon had in readiness a second shipment, but the authorities of Callao confiscated over 300 original designs of rare plants on the pretext that works of native artists were not permitted to be exported to foreign countries. These designs were given to the Spanish botanists Pavon and Ruiz, who used them in their publication of "La Flora Peruana." In 1782 he visited Chili and collected the plants indigenous to that country. During his stay in Concepcion the cholera broke out, and at once Dombey offered his services and was appointed physician-in-chief of the city, which office he resigned in 1783 when the epidemic had passed. He was then invited to examine the quicksilver mines of Chili; the mines in Coquimbo he put in working order, and discovered the mines in Jarilla, and although he spent considerable money in this work, refused all compensation from the officials in Chili, saying that he accepted payment only from the king of France. Finally he sailed for Cadiz, where he arrived in February, 1785. Here he suffered the loss of half of his collections, which were seized by the Spanish government and himself imprisoned until he agreed not to publish his researches prior to Pavon and Ruiz. Dombey suceeeded in escaping to France by way of Havre, and secured, on Buffon's recommendation, an indemnity of 10,000 francs and an annual pension of 1,200 francs. In 1793 he was sent on a mission to the United States, but was captured by privateers and imprisoned in Montserrat, where he died. Dombey's collections are among the treasures of the British museum, the Jardin Real of Madrid, and the Jardin des plantes and the Musée d'histoire naturelle of Paris. His grand herbarium contains over 1,500 South American plants, of which more than 60 are new species, accompanied by valuable notes on the plants of Peru and Chili, their cultivation and use, and it is one of the most complete that exists in Europe of the flora of South America. Botanists have honored his memory by giving his name, *Dombeya*, to a plant that belongs to the family of Butnériaceas, of which eleven different species are known. Dombey published: "Lettres sur le salpêtre du Pérou, et la phosphorescence de la mer" (1786); "Mémoires à l'académie des sciences sur

les mines de mercure du Chili" (1786); Mémoire sur le cuivre muriaté" (1787). Dombey's posthumous works, published by L'Héritier, are: "Flore Perouvienne" (Paris, 1799, 2 vols., in 4°); "L'Herbier de Dombey expliqué" (Paris, 1811, 6 vols., in 4°); and "Observations de Dombey faites au Chili et au Pérou" (Paris, 1813, in 4°).

DOMENECH, Emmanuel Henry Dieudonné, French author, b. in Lyons, France, 4 Nov., 1825; d. in France in June, 1886. He became a priest in the Roman Catholic church, and was sent as a missionary to Texas and Mexico. During Maximilian's residence in America, Domenech acted as private chaplain to the emperor, and he was also almoner to the French army during its occupation of Mexico. On his return to France he was made honorary canon of Montpellier. His "Manuscrit pictographique Américain, précédé d'une notice sur l'idéographie des Peaux Rouges" (1860), was published by the French government, with a facsimile of a manuscript in the library of the Paris arsenal, relating, as he claimed, to the American Indians, but the German orientalist, Julius Petzholdt, declared that it consisted only of scribbling and incoherent illustrations of a local German dialect. Domenech maintained the authenticity of the manuscript in a pamphlet entitled "La vérité sur le livre des sauvages" (1861), which drew forth a reply from Petzholdt, translated into French under the title of "Le livre des sauvages au point de vue de la civilization Française" (Brussels, 1861). He has also published "Journal d'un missionaire au Texas et au Mexique" (1857); "Voyage dans les solitudes Américaines, le Minnesota" (1858); "Voyage pittoresque dans les grands desert du Nouveau monde" (1861); "Les Gorges du Diable, voyage en Islande" (1864); "Legendes islandaises" (1865); "Le Mexique tel qu'il est" (1867); and "Histoire du Mexique, Juarez et Maximilien, correspondances inédites" (1868). The historical accuracy of the last-named work has been questioned by several writers, including Gen. Prim. Domenech also published "Quand j'etais journaliste" (1869); "Histoire de la campagne de 1870–'1 et de la deuxième ambulance de la presse Française" (1871); and "L'écriture syllabique (Maya) dans le Yucatan d'après les decouvertes de l'Abbé Brasseur de Bourboug" (1883); and during the latter part of his life he produced also several works pertaining to religion and ancient history.

DOMENECH, Miguel, R. C. bishop, b. in Rios, Spain, in 1816; d. in Tarragona, Spain, in 1878. He was educated in France by the priests of the congregation of the mission, and after becoming a member of that order came to the United States in 1837. He finished his studies in the theological seminary of The Barrens, Missouri, was admitted to the priesthood in 1839, and became a professor in St. Mary's college. In 1842 he founded St. Vincent's male academy at Cape Girardeau, and was subsequently a missionary in the state of Missouri. He was sent to Pennsylvania in 1845, and performed pastoral duties in Nicetown. His next mission was in Germantown, where he erected the church of St. Vincent de Paul. He was consecrated bishop of Pittsburgh in 1860, and during his administration erected several churches and schools. The diocese of Pittsburgh was considered too large for a single bishop, and in 1875 a portion of it was formed into the see of Allegheny, to which Bishop Domenech was transferred in 1876. This division gave rise to dissensions and difficulties, and, in order to bring all questions to a decision, he went to Rome in 1877. He resigned his see the same year.

DOMVILLE, James, Canadian capitalist, b. in England, 29 Nov., 1842. He was educated in his native country, and in 1858 went to Barbadoes, where his father, Gen. James Domville, R. A., was in command of the garrison, and there became a merchant. In 1866 he arrived in St. John, New Brunswick, engaged in business as a merchant, and also became proprietor of the iron works, rolling mills, and nail factories at Moosepath, Coldbrooke, and Rockland, in Kings county, and entered largely into other commercial schemes. He is president of the Maritime bank of the dominion of Canada, a member of the council of the Dominion artillery association, a fellow of the Royal colonial institute, London, England, has been president of the Kings county board of trade, and was chairman of the delegation from St. John, N. B., at the Dominion board of trade, Ottawa, in 1871. He was elected a representative to the Dominion parliament in 1872, and re-elected at the general elections in 1874 and 1878. He is a liberal conservative.

DONALDSON, Edward, naval officer, b. in Baltimore, Md., 17 Nov., 1816. He entered the U. S. navy as cadet midshipman on 21 July, 1835, and served on the "Falmouth," the "Warren," and the "Vandalia" in the West India squadron. In 1838 he went to the East Indies in the "Columbus," and in 1839 participated in the attack on the forts on the coast of Sumatra. He was promoted passed midshipman in June, 1841, and attached to the Mosquito fleet in Florida during 1841–'2, after which he served on various vessels until 1846, when he was appointed on the coast survey. He received his commission as lieutenant in October, 1847, and was connected with the "Dolphin," the "Water-witch," the "Merrimac," and the "San Jacinto," and was on special shore duty until 1861. During 1861 he commanded the gun-boat "Sciota," attached to the Western gulf squadron, and took part in the bombardment of Forts Jackson and St. Philip, and the subsequent capture of New Orleans. He participated in the passage of the Vicksburg batteries, and was made commander in July, 1862. After a year in command of the receiving-ship at Philadelphia, he was transferred to the "Keystone State" as executive officer during her trip to the West Indies in search of the Confederate cruiser "Sumter," and was her commander in 1863–'4. During the battle of Mobile bay, 5 Aug., 1864, he commanded the "Seminole," and rendered efficient service by his coolness and judgment in piloting his vessel while passing Fort Morgan, the regular pilot being ill. In 1865 he was on ordnance duty in Baltimore. He was made captain in July, 1866, and subsequently had command of the receiving-ship at Philadelphia until 1868, when he was assigned to the Brooklyn navy-yard. In September, 1871, he became commodore, and for a time had charge of the naval station in Mound City, Ill. He was promoted to rear-admiral on 21 Sept., 1876, and placed on the retired list a few days later. —His brother, **Frank,** physician, b. in Baltimore, Md., 23 July, 1823, was educated in the University of Maryland, and studied medicine under Drs. Samuel Chew and Thomas H. Buckler, receiving his medical degree in 1846. For two years he was a resident student in the almshouse hospital, Baltimore, and subsequent to his graduation studied in the hospitals in Paris, settling in Baltimore in 1851. He has held the offices of attending physician to the Baltimore almshouse hospital, physician to the general dispensary, attending physician of university hospital, and resident physician to the marine hospital. From 1863 till 1866 he was professor of materia medica in the Maryland college

of pharmacy, and in 1866 became professor of physiology and hygiene, and clinical professor of diseases of the throat and chest in the University of Maryland. He has served as president of the medical and surgical faculty of the state of Maryland, and of the American climatological association. Dr. Donaldson has published papers in the medical journals, principally upon diseases of the heart, lungs, and throat, and is the author of "The Influence of City Life and Occupations in Developing Consumption" (Cambridge, 1876).

DONALDSON, James Lowry, soldier, b. in Baltimore, Md., 17 March, 1814; d. there, 4 Nov., 1885. He was graduated at the U. S. military academy in 1836, and became 2d lieutenant in the 3d artillery, serving in that capacity during the Florida war in 1836–'8. He was transferred to the 1st artillery in May, 1837, and became 1st lieutenant in July, 1838. Subsequently he was on garrison duty until 1846, when he was stationed at Fort Brown during the military occupation of Texas. During the Mexican war he participated in the battles of Monterey and Buena Vista, receiving the brevets of captain and major. He was appointed assistant quartermaster, with the rank of captain, in March, 1847, and was on duty as such in Coahuila, Mexico. Subsequent to the war he continued as quartermaster at various posts until he became chief quartermaster of the Department of New Mexico in 1858–'62. During the civil war he held a like office in Pittsburgh, Pa., with the 8th army corps in Baltimore, Md., and in the Department of the Cumberland. He was chief quartermaster of the military division of the Tennessee in June, 1865, and of the military division of the Missouri until 1869, when he was retired. Meanwhile he had attained the rank of colonel on the staff, and had received the brevet of major-general of volunteers. He resigned on 1 Jan., 1874. During his administration of the quartermaster's department of the division of the Tennessee, he became a favorite with Gen. George H. Thomas, to whom he suggested the creation of cemeteries for the scattered remains of soldiers who had fallen in battle, from which has resulted the annual Decoration day. Gen. Donaldson published "Sergeant Atkins" (Philadelphia, 1871), a tale of adventure founded on events that took place during the Florida war.

DONALDSON, Washington H., aeronaut, b. in Philadelphia, Pa., in 1840; drowned in Lake Michigan, 15 July, 1875. He was one of those apt, energetic, restless individuals known as natural geniuses. He could do anything he undertook to do, and would undertake anything that came in his way. He had enough education for his wants, and an admirable physique, though a little short in stature. Gymnastics were as second nature to him, and there was little in this line in which he was not an expert. Amiability was a chief characteristic, which never failed to assert itself; his rare good humor and pleasant manners won him friends wherever he went, and there never was an aeronaut more popular than he. His early life was spent upon the stage as a gymnast, ventriloquist, and magician. He was a graceful tight-rope performer. In 1862 he walked across the Schuylkill river on a rope 1,200 feet long, returning to the middle and finishing by jumping into the river from a height of 90 feet. He also walked across the Genesee river at Rochester on a rope 1,800 feet long, recrossing it with a man in a wheelbarrow trundled in front of him. From 1857 till 1871 he travelled through the United States, appearing not fewer than 1,300 times in his various specialties. It happened, in a western city, that his host possessed a balloon, left with him for a debt, which he was anxious to sell. Donaldson proposed a trade; he would teach the landlord the mysteries of the black art and transfer to him all the paraphernalia of his exhibitions, which was done, and Donaldson found himself the owner of a balloon. Without the slightest previous knowledge of balloon management, he made arrangements for an ascension, taking his first lesson in a failure, which happened for want of lighter gas or a larger balloon, the latter being too small to carry him except with pure hydrogen. The balloon was enlarged and tried again with coal-gas, as in the previous instance; and this time, 30 Aug., 1871, it succeeded in getting off after Donaldson had thrown away every available thing, even his coat, boots, and hat. This ascent was made from Reading, Pa., and the descent 18 miles distant. Another ascent was made from Reading, in September, upon a trapeze-bar. On 18 Jan., 1872, he ascended from Norfolk, Va., and his balloon accidentally burst when a mile from the ground. He said of it: "The balloon did not collapse, but closed up at the sides, and, swaying from side to side, descended with frightful velocity. I clung with all my strength to the hoop. I could not tell how badly I was frightened, but felt as though all my hair had been torn out. I scarcely had time to realize that I was alive, when, with a crash, I was projected with the velocity of a catapult into a burr-chestnut tree. The netting and rigging, catching in the tree, checked my velocity, but I had my grasp jerked loose, and was precipitated through the limbs and landed flat upon my back, with my tights nearly torn off, and my legs, arms, and body lacerated and bleeding." Shortly after this he ascended again from Norfolk, but on this occasion, in his haste to avoid being carried out to sea, his balloon was wrecked among the trees, although he himself escaped injury. He then undertook the construction of a balloon which he called the "Magenta." It was made of fine jaconet, held about 10,000 cubic feet of gas, and weighed about 100 pounds. He made several ascensions with this balloon, two of which were from Chicago. On the first occasion he was carried out on Lake Michigan and dragged more than a mile through the water, bringing up against a stone pier finally with such violence as to render him insensible. On 17 May, 1873, he ascended from Reading, Pa., in a balloon made of manilla-paper enclosed with a light network, the whole weighing but 48 pounds, although it contained 14,000 cubic feet of gas. He travelled ten miles before landing. Donaldson was a convert to Wise's theory of a constant current blowing from west to east at a height of three miles, and, as the veteran aeronaut had said a balloon could cross the ocean in this current, Donaldson was ready to take the venture, and so announced his intention of making the attempt. Wise offered to join him, and they set out together to raise the necessary funds. They went to New York and opened a subscription, but while this was in progress the proprietors of the "Daily Graphic" offered to furnish the funds required for the construction of a very large balloon and outfit, together with the gas required. The proposition was accepted, and the construction of an immense balloon of twilled cotton was carried to completion. But before the inflation some differences arose between the aeronauts regarding the reliability of the balloon. Donaldson's inexperience placed him in a secondary position throughout the entire transaction, but when the time for action came he found himself the principal, Mr. Wise having withdrawn. Such a balloon as Donaldson found himself possessed of

on this occasion was no toy; it was said to be capable of containing over 700,000 cubic feet of gas, and weighed over three tons. We do not vouch for these figures, but it is certain that the dimensions were enormous, and beyond the capabilities of Donaldson's management at that time. Three unsuccessful attempts were made at inflation, the balloon bursting each time, when finally the aeronaut Prof. S. A. King was sent for, the work was accomplished, and the ascension made from the Capitoline baseball grounds in Brooklyn, N. Y., on 7 Oct., 1873. Donaldson had two companions, named Ford and Lunt. A handsome life-boat, filled with provisions and loaded with great quantities of sand, was hung beneath the balloon, which served both as car and as a means of escape in case of falling into the ocean. But they never reached the sea. Fortunately, they kept inland sufficiently to clear the water till it became manifest that the aeronaut was as incapable of managing the mammoth globe in the air as he had been on the ground. Scarcely one hundred miles had been run when control was completely lost, and the voyagers found themselves dashing about among trees and fences, and coming close to the ground. Donaldson gave the word to jump, and Ford jumped with Donaldson, but Lunt was too late. A thousand-pound drag-rope was trailing, which prevented the balloon from rising to any considerable height after the two men had left the car, and Lunt, panic-stricken at finding himself alone with the monster, threw himself bodily into the first tree the boat came in contact with at New Canaan, Conn., and fell through to the ground without being able to stop himself. He died six months later. P. T. Barnum offered Mr. Donaldson an engagement first at Gilmore's garden and then with his hippodrome, which was accepted. On 24 July, 1874, he ascended from Gilmore's garden in a balloon containing 54,000 cubic feet of gas, with five passengers; these he continued to land one after another as the balloon became weakened; but by resorting to the use of the drag-rope he was able to keep afloat for thirteen hours, landing finally at Greenport, near Hudson, 130 miles from New York. Four days afterward he again ascended from Gilmore's garden. Three hours after starting, two passengers were landed, and the voyage continued into the night. At 2 A. M. a landing was effected at Wallingford, Vt., the journey being resumed at 8 A. M., and at noon the voyage terminated at Thetford, Vt. On 19 Oct. of the same year Mr. Donaldson took up a wedding party from Cincinnati, the ceremony being performed in mid-air. On 23 June, 1875, he ascended from Toronto, taking three newspaper reporters with him. They were carried out over Lake Ontario, and finally descended into the water, through which they were dragged for several miles before they were rescued by a boat's crew sent out from a passing schooner. Donaldson, during his tour with the hippodrome, made numerous ascensions. From Pittsburg, Pa., he ascended with five ladies and one gentleman, making a pleasant and safe voyage. On 17 June, 1875, he ascended from Buffalo, accompanied by two reporters and his friend Prof. King. They expected to have an experience over Lake Erie, but after a sail of twenty miles or more over the water they reached the Canada shore, landing finally near Port Colborne. On 14 July, 1875, Donaldson ascended from the Lake front in Chicago, carrying several persons with him. The air being very still, the balloon, although it drifted lakeward, did not get more than three miles from the shore, and was towed back to the starting-place with most of the gas remaining in it, and held for the ascension of the following day. One of the hippodrome managers, looking at the balloon, inquired of Donaldson: "What's the use of this? Why didn't you go somewhere?" "Wait till to-morrow," he replied, "and I'll go far enough for you." On the following day the wind was blowing up the lake at the rate of ten to fifteen miles an hour. An additional amount of gas was supplied to make up for what had been lost; but, in consequence of the deterioration of what had been in the balloon since the previous day, the buoyancy was not as great as usual. Knowing that he would have a long voyage up the lake, he determined to take but one companion with him, Newton S. Grimwood, of the Chicago "Evening Journal," drawing the prize, as it was then considered. At 5 P. M. the voyage began. The balloon gradually rose to the height of a mile or more, floating off up the lake, and in about an hour and a half disappeared. At seven o'clock the crew of the "Little Guide," a small craft, saw the balloon about thirty miles from shore, trailing the car through the water, and tried to reach it; but before this could be done, the balloon, as if suddenly relieved of some weight, shot up into the air again and off into the distance. Night came on, and, with the cooling gas and natural loss of buoyancy, the luckless aeronauts doubtless came down upon the lake again. But they might have escaped with their lives had it not been for a violent storm which came up about eleven o'clock. The body of Grimwood was washed ashore on the farther side of the lake, and was found on 16 Aug. Donaldson never was found, nor any part of the balloon.

DONDÉ, Ibarra Joaquín (don-day'), Mexican scientist, b. in Campeche, Mexico, 6 July, 1827; d. in Merida, 1 Nov., 1875. He received his early education in the city of Campeche, and in 1844 removed to Puebla, where he entered the college of pharmacy, being graduated in 1847. He continued his studies in the city of Mexico, and in 1850 established a chair of pharmacy in Campeche, and in 1853 another in Merida. He also held for a long time the chair of botany in the Catholic college of Merida, and the chair of industrial chemistry for artisans. Donde was one of the founders of the special school of medicine and pharmacy of Yucatan. He was the inventor of some very useful chemical products, and the first to produce santonate of soda (1862). He published "Pharmaceutical Prescriptions," which appeared in Philadelphia under the name of "Pharmaceutical Notes," and were republished in France, England, and Germany; "Preparación del Santonato de Sosa"; "Estudio sobre el Ni-in"; and "Elementos de Botánica." Donde was a great benefactor of the local industries of Merida.

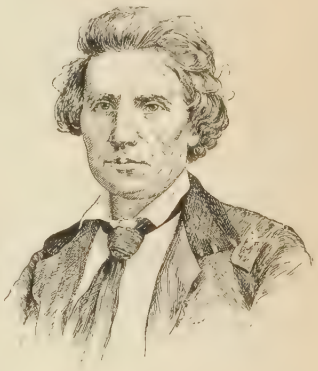
DONELSON, Andrew Jackson, politician, b. near Nashville, Tenn., 25 Aug., 1800; d. in Memphis, 26 June, 1871. He studied in the University of Nashville, and was graduated at the U. S. military academy in 1820, standing second in his class. From 1820 till 1822, while 2d lieutenant in the engineers, he served as aide-de-camp to his uncle, Gen. Andrew Jackson, when the latter was governor of the recently-acquired territory of Florida, and then as assistant to the board of engineers. He resigned from the army in February, 1822, attended law-lectures in the Transylvania university at Lexington, Ky., and was admitted to the bar in 1823, but turned his attention to cotton-planting on his estates in Bolivar county, Miss. On Jackson's election to the presidency, he became his confidential adviser and private secretary, continuing in that capacity until the close of his second administration. The annexation treaty between the United States and Texas having been rejected by

the senate in April, 1844, Mr. Donelson was asked to undertake new negotiations, and accordingly was appointed chargé d'affaires to the republic of Texas. In 1846 he was appointed minister to Prussia, and in 1848 to the federal government of Germany, which office he resigned in 1849. He assumed the editorship of the Washington "Union" in 1851, but relinquished it during the following year. After the inauguration of President Pierce in 1853, he abandoned the Democrats and joined the American party, receiving the nomination of vice-president on the ticket with Millard Fillmore in 1856. After his defeat in the election that followed, he retired from public life, and devoted himself to the management of his extensive estates. Subsequent to the civil war he practised his profession in Memphis. He published "Reports of Explorations" (Washington, 1855).

A. J. Donelson

DONGAN, Thomas, colonial governor of New York, b. in Castletown, County Kildare, Ireland, in 1634; d. in London, England, 14 Dec., 1715. He early entered the army, and served with the British and then with the French, attaining the rank of colonel. Later he was made lieutenant-governor of Tangiers by Charles II., and in 1682 the Duke of York appointed him governor of the colony of New York. His instructions were to conciliate the French, and to give no countenance to Indian tribes hostile to this nation. These suggestions he failed to carry out, and he was accused of inciting the tribes known as the Five Nations to war. In 1686 he gave to the city of New York a charter, and in 1688 resigned his office, but did not return to England until three years later.

DONIPHAN, Alexander William, soldier, b. in Mason county, Ky., 9 July, 1808. He was the youngest of ten children. His father, Joseph Doniphan, a native of Virginia, died in 1813. Alexander was graduated at Augusta college, Ky., in 1826, and on being admitted to the bar in 1830 began the practice of law at Lexington, Mo. Three years afterward he removed still farther west, to the village of Liberty, in Clay county. He soon came to be known as one of the foremost lawyers at the Missouri bar, but at the same time devoted himself with such zeal to military studies that he will be remembered chiefly as a soldier. It seems to have been under the influence of Albert Sidney Johnston, who was for some time stationed at Fort Leavenworth, that this military zeal was awakened in Mr. Doniphan. In 1838 he had risen in the state militia to the grade of brigadier-general, when there was trouble with the Mormons. At the head of a considerable force of state troops, Doniphan imposed terms upon the prophet Joseph Smith; the Mormons were obliged to give up their leaders for trial, lay down their arms, and leave the state of Missouri. When war began with Mexico, in 1846, Doniphan entered the United States service as colonel of the 1st regiment of Missouri mounted volunteers, and took part in Gen. Kearney's expedition to Santa Fé; and, when Kearney, in September, 1846, set out from Santa Fé for California, he ordered Col. Doniphan to proceed with such troops as could be spared from New Mexico to the city of Chihuahua, and there report to Gen. Wool. But before this order could be carried out it became necessary to reduce to submission the warlike Navajos Indians, and having accomplished this difficult task, Col. Doniphan set out from Valverde on 14 Dec. At Bracito river he was met by a superior force of Mexicans, who sent forward an officer with a black flag summoning Doniphan to surrender. "If you don't obey," said the Mexican, "we will charge, and give no quarter." "Charge and be d——d," was the laconic reply. In less than half an hour the Mexicans were put to flight, leaving more than 200 of their number killed or wounded. Of Doniphan's men not one was killed, and only seven were wounded. Two days later he occupied El Paso, where he was obliged to wait for artillery to be sent to him. On 8 Feb., 1847, he set out on a terrible march of 250 miles, through a savage and sterile country, for Chihuahua. On the 28th, having surmounted most formidable hardships and arrived within seventeen miles of his goal, he was confronted by a force of 4,000 Mexicans at the pass of the Sacramento. Although his own force numbered but 924 men, and the enemy were strongly intrenched, he nevertheless attacked with such fury as completely to rout the Mexicans, who lost more than 800 in killed or wounded. Doniphan's loss was one man killed and eleven wounded. It was like the ancient fights between Greeks and Persians. The next day Chihuahua surrendered. After waiting there weeks until further orders were received, the brave little army marched 700 miles to Saltillo, where they arrived on 21 May, to find the active business of the war in that part of Mexico ended. Since 1847 Col. Doniphan has led a quiet life at his home in western Missouri. In 1836, 1840, and 1854 he was elected to the legislature.



A. W. Doniphan

DONKIN, Robert, British soldier, b. 19 March, 1727; d. near Bristol, England, in March, 1821. He entered the army in 1746, was at the siege of Belle Isle in 1761, afterward served in Flanders with Wolfe, and through the Seven years' war, and was aide-de-camp and secretary to Gen. Rufane, governor and commander-in-chief at Martinique. He was commissioned captain in 1770, and had risen to the rank of general in 1809. He served through the whole of the American war from 1775 till 1783, in the early part of it as aide-de-camp to Gen. Gage, and then as major of the 44th regiment. He was the author of "Military Collections and Remarks" (New York, 1777, "published for the benefit of the children and widows of the valiant

soldiers inhumanly and wantonly butchered when peacefully marching to and from Concord, April 19, 1775, by the rebels").

DONNELLY, Ignatius, author, b. in Philadelphia, 3 Nov., 1831. He was educated in the public schools of his native city, studied law, was admitted to the bar, and practised. He went to Minnesota in 1857, was elected lieutenant-governor in 1859, and again in 1861, and was then elected to congress as a republican, serving from 7 Dec., 1863, till 3 March, 1869. Besides doing journalistic work he has written an "Essay on the Sonnets of Shakespeare"; "Atlantis, the Antediluvian World" (New York, 1882), in which he attempts to demonstrate that there once existed in the Atlantic ocean, opposite the straits of Gibraltar, a large island, known to the ancients as "Atlantis"; and "Ragnarok" (1883), in which he tries to prove that the deposits of clay, gravel, and decomposed rocks, characteristic of the drift age, were the result of contact between the earth and a comet.—His sister, **Eleanor Cecilia,** poet, b. in Philadelphia, Pa., 6 Sept., 1838, received her education in the public schools of Philadelphia and at the French academy of Mme. Adèle Sigoigne, of that city. She is a singer, having a rich contralto voice of power and considerable range. Her poetical publications are "Out of Sweet Solitude" (Philadelphia, 1873); "Domus Dei" (1874); "Legend of the Best Beloved, and other Poems" (New York, 1880); "Crowned with Stars" (published by and for the University of Notre Dame, Indiana, 1881); "Hymns of the Sacred Heart," with music (Philadelphia, 1882); "Children of the Golden Sheaf, and other Poems" (1884); "Garland of Festival Songs," with music (New York, 1885); and "Little Compliments of the Season," original, selected, and translated verses (1886). She has also published "Our Birthday Banquet," in prose and verse (New York, 1885); "The Life of Father Felix" (Philadelphia, 1886); and two compilations, "Pearls from the Casket of the Sacred Heart of Jesus" (New York, 1880) and "Signori Leaflets" (1887). Her labors have received the special apostolic benediction of Pope Leo XIII., and she has been awarded a medallion by one of the chief religious orders of Rome. One of her poems was read at a grand academia in the Royal college of the Escorial, Madrid, Spain, in May, 1887.

DONOP, Carl Emil Kurt von, Count, British officer, b. in Germany in 1740; d. in New Jersey, 25 Oct., 1777. He was appointed to the command of four battalions of grenadiers and the yagers in the detachment of Hessian troops in the British employ destined for service in the American war. He landed on Long Island on 22 Aug., 1776, and took part in the battle there on 27 Aug. In December, 1776, when Gen. Howe went into winter quarters in New York, he left Donop as acting brigadier, with two Hessian brigades, the yagers and the 42d Highlanders, to hold the line from Trenton to Burlington. On hearing of the defeat of Rall, Donop hurriedly retreated to Princeton, abandoning his stores and his sick and wounded at Bordentown. In October, 1777, Sir William Howe gave verbal orders to Col. Donop to carry Red Bank, N. J., by assault, if it could be done easily; and on the 22d he, with his Hessians, attacked Fort Mercer at that place, but was repelled after a most desperate resistance, Donop being mortally wounded. He survived the battle three days, and said to a brother officer: "It is finishing a noble career early; but I die the victim of my ambition, and of the avarice of my sovereign."

DOOLITTLE, Amos, engraver, b. in Cheshire, Conn., in 1754; d. in New Haven, Conn., 31 Jan., 1832. He was entirely self-taught, and, after serving an apprenticeship with a silversmith, began business as an engraver in 1775. While a volunteer at Cambridge he visited the battle-ground of Lexington, and on his return to New Haven made an engraving of the action, his first attempt in that art. This is believed to have been the first historical engraving made in America. Mr. Doolittle executed three other historical prints in relation to the expedition to Concord and Lexington.

DOOLITTLE, Benjamin, clergyman, b. 10 July, 1695; d. 9 Jan., 1749. He was graduated at Yale in 1716, and was minister of Northfield, Mass., from 1718 until his death. He was also a physician, and published an interesting "Narrative of the Mischief by the French and Indians from 1744 to 1748," and an "Inquiry into Enthusiasm."

DOOLITTLE, Edwin Stafford, artist, b. in Albany, N. Y., in 1843; d. about 1880. He studied painting under John A. Hows in 1865, and in the studio of William Hart for a short time in 1866. In 1867 he opened a studio in New York, but in 1868 went to Europe. He studied art for some time in Rome, till failing health forced him to return to the United States. In 1869 he painted his "Shadow of a Great Rock in a Weary Land," of which he made several copies. In the summer of 1872 he studied under Jasper F. Cropsey, at Warwick, N. Y. His paintings comprise landscapes and marine subjects, and include "Sunset on an Adirondack Swamp"; "Chimney Rock, North Carolina"; "Gray's Peak, Colorado"; "A Pool in the Warwick Woodlands"; "Ruins of the Claudian Aqueduct on the Roman Campagna"; "On the Giuadecca Canal, Venice"; "The Arch of Titus"; "Autumn in the Catskill Clove"; "The Oxenstrasse, Lake Lucerne"; "The Old Toll-Gate"; and "Sunset on Schroon Lake." Mr. Doolittle also designed book-covers, decorated churches, and executed illuminations, the latter including "The Soliloquy of Friar Pacificus," for the Centennial exhibition at Philadelphia, which was afterward presented to the poet Longfellow, and of "A Prayer to the Virgin," now in the convent of the Sacred Heart at Savannah, Ga. He was the author of "Grace Church Chimes," and other poems.

DOOLITTLE, James Rood, senator, b. in Hampton, Washington co., N. Y., 3 Jan., 1815. After attending Middlebury academy, he entered Geneva (now Hobart) college, where he was graduated in 1834. He then studied law, was admitted to the bar in 1837, and practised at Rochester and at Warsaw, N. Y. He was elected district attorney of Wyoming county, N. Y., in 1845, and also served for some time as a colonel of militia. He removed to Wisconsin in 1851, and was elected judge of the first judicial circuit of that state in 1853, but resigned in 1856, and was elected U. S. senator as a Democratic Republican, to succeed Henry Dodge, serving two terms, from 1857 till 1869. He was a delegate to the peace convention of 1861. While in the senate, he served as chairman of the committee on Indian affairs and as member of other important committees. During the summer recess of 1865, he visited the Indians west of the Mississippi as a member of a special senate committee. He took a prominent part in debate on the various war and reconstruction measures, upholding the national government, but always insisting that the seceding states had never ceased to be a part of the Union. He opposed the fifteenth amendment to the constitution of the United States, on the ground that each state should determine questions of suffrage for itself. Mr. Doolittle retired from public life in 1869, and has since resided in Racine, Wis.,

though practising law in Chicago. He was president of the Philadelphia national union convention of 1866, and also of the Baltimore national Democratic convention of 1872, which adopted the nomination of Horace Greeley for the presidency. Judge Doolittle has been a trustee of Chicago university since its foundation, served for one year as its president, and was for many years a professor in its law school.

DOOLITTLE, Mary Antoinette, lecturer, b. in New Lebanon, N. Y., 8 Sept., 1810; d. in Mt. Lebanon, Columbia co., N. Y., 31 Dec., 1886. She was graduated in New Lebanon in 1825. She became a member of the Shaker society in 1824, a deaconess in a Shaker community in 1826, and was an eldress from 1828. Her lectures on religious subjects, which were delivered in various cities in the United States, attracted much attention. In 1873–'5 she edited, with Frederick W. Evans, the "Shaker and Shakeress," a periodical published at Mt. Lebanon college, and is author of an "Autobiography" (1880), and of a series of remarkable inspirational songs.

DOOLITTLE, Theodore Sandford, educator, b. in Ovid, Seneca co., N. Y., 30 Nov., 1836. He was graduated at Rutgers in 1859, and at the New Brunswick theological seminary in 1862, and in that year was licensed to preach in the Reformed Dutch church, and became pastor at Flatlands, near Brooklyn, N. Y. In 1864 he accepted the chair of rhetoric, logic, and metaphysics at Rutgers, which he has since held, becoming also associate editor of the "Christian at Work" in 1873. Wesleyan university gave him the degree of D. D. in 1872. Dr. Doolittle has frequently lectured on art and literature. Besides articles in periodicals, he has published an "Account of the Centennial Celebration of Rutgers College" (1870), and a "History of Rutgers College," written for the Bureau of education at Washington. In 1875 he contributed to the "Christian Intelligencer" a series of letters entitled "Across the Continent."

DOOLY, John Mitchell, lawyer, b. in Lincoln county, Ga., about 1772; d. there, 26 May, 1827. Little is known of his early life, or the time at which he was admitted to the bar. He was appointed solicitor-general of the Western circuit of Georgia, 2 Sept., 1802, to fill a vacancy, and on 22 Nov., 1804, was elected to the same office by the legislature. In 1816 he was elected judge of the same circuit, and in 1822 chosen first judge of the Northern circuit, to which latter place he was re-elected in 1825. He also represented his county in the legislature during the embargo and other restrictive measures adopted by the general government, and the war with Great Britain, successfully advocating the "alleviating," "thirding," and "stop" laws then passed. It is chiefly as a wit that Judge Dooly is still remembered. He was quick and brilliant in repartee and, when provoked, would launch at his adversary the most biting sarcasm. But, notwithstanding this powerful weapon with which nature had furnished him, he was a genial companion, and utterly unselfish. The reports of his wise and witty sayings, handed down by tradition, have kept the bench and bar of Georgia supplied with anecdotes for a half century.

DORANTES, Pedro (do-rahn'-tays), Spanish explorer, b. in Bejar, Spain, early in the 16th century; d. in Paraguay. He was attached as commissary to the expedition commanded by Cabeza de Vaca, which left Sanlucar for River Plate on 2 Nov., 1540, and reached the island of Santa Catalina, 29 March, 1541. Thence the expedition went to the continent, and as they intended to go to Asuncion by land the commander sent Dorantes to open the way. After exploring the country for three months, he reported that the journey would be difficult, and advised Cabeza de Vaca to ascend Itabicu river, which was successfully effected, and the expedition reached Asuncion, 11 March, 1542. Dorantes proved to be a brave, intelligent, and useful officer, but his maladministration compelled the governor to deliver him to the court of justice. At the same time the colonists were in great danger of perishing at the hands of the hostile natives, and, as every one thought Dorantes to be the only man able to save them, it was decided to stop the proceedings against him and let him continue at his post. The war with the Indians was short, but during that time Dorantes joined the other officers in a plot to force the governor to return to Asuncion, and eight days afterward (25 April, 1544) took an important part in the deposition of the governor and in the election of his successor, Domingo de Irala. He soon became an enemy of the new ruler, who, in 1547, went to Peru, leaving Francisco de Mendoza in his place; but Dorantes was also opposed to Mendoza, and worked for the election of Diego de Abreu, whose party he left again on the return of Irala from Peru. After the death of Irala in 1557, Francisco Ortiz de la Vega was elected governor, and Dorantes accompanied him during the campaign against the Indians in 1559, when he greatly distinguished himself, as well as during the expedition to Peru in 1564, where he remained for five years. In 1569 he returned to Asuncion, and lived in Paraguay to a very old age.

DOREMUS, Sarah Platt, philanthropist, b. in New York city, 3 Aug., 1802; d. there, 29 Jan., 1877. She was the daughter of Elias Haines, a merchant of New York, and her mother was the daughter of Robert Ogden, a distinguished lawyer of New Jersey. In 1812 she united with her mother in praying for the conversion of the world, and from that time dates her interest in foreign missions. She married, in 1821, Thomas C. Doremus, a merchant, whose wealth thenceforth was freely expended in her benevolent enterprises. In 1828, with eight ladies, she organized the Greek relief mission, and sent Dr. Jonas King to Greece to distribute supplies. Seven years later she became interested in the mission at Grand Ligne, Canada, conducted by Madame Henriette Feller, of Switzerland, and in 1860 was made president of the organization. In 1840 she began visiting the New York city prisons, and after establishing Sabbath services, used her influence in 1842 toward founding the Home for women discharged from prison, now the Isaac T. Hopper home, of which she became president on the death of her friend and co-founder, Miss Catherine M. Sedgwick. She aided in founding, in 1850, the House and school of industry for poor women, becoming its president in 1867, and in 1854 became vice-president of the Nursery and child's hospital. In 1855 she assisted Dr. J. Marion Sims in his project of establishing the New York woman's hospital, of which she was ultimately president. During the civil war she co-operated with the work carried on in the hospitals, ministering alike to the wounded from north and south. She founded, in 1860, the Woman's union missionary society, designed to elevate and Christianize the women of heathen lands, and she took an active part as manager in the Presbyterian home for aged women, organized in 1866. She aided in collecting supplies to relieve the sufferers from famine in Ireland in 1869, and was for many years manager of the female branch of the City mission and tract society and of the Female Bible society. The last

society in which she labored was known as the "Gould Memorial," and had for its objects the establishment of Italo-American schools. All foreign missions, without regard to creed, shared her sympathies. Her private charities for the poor were incessant, amid the cares of a family of nine children of her own, and others that she adopted. —Her son, **Robert Ogden,** chemist, b. in New York city, 11 Jan., 1824, studied at Columbia, and was graduated at the New York university in 1842. Here he came under the influence of John W. Draper, and in 1843 became his assistant in the medical department of the university. This office he held for seven years, and aided Prof. Draper in many of his famous researches on light and heat. In 1847 he went to Europe, continuing his chemical studies in Paris with special reference to electro-metallurgy, also visiting the establishments where chemical products were manufactured. On his return to New York, in 1848, with Dr. Charles T. Harris, he established a laboratory on Broadway for the purpose of giving instruction in analytical chemistry, and for making commercial analyses. He was elected professor of chemistry in the New York college of pharmacy in 1849, and delivered the first lectures in his own laboratory. Meanwhile he studied medicine with Dr. Abraham L. Cox, and received his degree from the medical department of the university in 1850. He was one of the founders of the New York medical college in 1850, and at his own expense arranged and equipped the first laboratory in the United States for instructing medical students in analytical chemistry, requiring all the candidates for graduation to pass this examination. In 1851 he was elected professor of natural history in the Free academy (now the College of the city of New York), and in 1859 was associated with others in establishing the Long Island college hospital, where he lectured for several years. He was appointed professor of chemistry and toxicology in Bellevue hospital medical college, New York, in 1861, which chair he has since retained. A year later he went to Paris, where he spent two years in developing the use of compressed granulated gunpowder in fire-arms. The cartridges patented by him require no serge envelopes as are ordinarily used in muzzle-loading cannon, and hence no sponging of the gun after firing is necessary. Dr. Doremus was authorized by the French minister of war to modify the machinery in the Bouchet pouderie so that gunpowder of the American character could be produced. Subsequently an exhibition of the firing of compressed granulated powder in cannon and small arms was made in Vincennes, before Napoleon III. and many of his generals. This system was adopted by the French government, and a large portion of the Mont Cenis tunnel was blasted with "la poudre comprimée." While in Paris he was invited to fill the chair of chemistry and physics in the College of the city of New York, and he still holds

that appointment. His lectures on toxicology at Bellevue hospital medical college resulted in his being called upon by coroners and district attorneys to examine poison cases, and he introduced radical changes in the system of medical jurisprudence. He established a special toxicological laboratory, with a dissecting-room attached, kept under lock and key, using only reagents of known purity, and purchasing new glass and porcelain vessels for each case. Dr. Doremus further insisted that the expert should have ample time for his researches, and that he should be properly remunerated for his services. His course has led to more thorough scientific investigation than was formerly common in poison examinations. In the case of James Stephens, convicted of poisoning his wife, Dr. Doremus analyzed not only the entire body of Mrs. Stephens, but another human body, to test the question of "normal arsenic." He was the expert in the celebrated Burdell murder case (1857), and examined the blood-stains found in Dr. Burdell's room. In another case he proved the presence of strychnine in a body that had been buried for four months. In 1865 the "Atlanta" arrived at quarantine, and during her voyage from Liverpool sixty of her passengers had died from cholera. A quick method of disinfection was necessary, and Dr. Doremus recommended that chlorine in enormous quantities be used. Under his direction, specially prepared vessels for the generation of this powerful gas were introduced between decks, the hatches battened down, and the vapor allowed to accomplish its work of destroying the disease-germs. This heroic treatment proved thoroughly successful, and in 1875 the process was again used, with equal success, in the disinfection of hospital wards. In 1871 he was appointed president of a Board for examining the druggists and their clerks in New York city, which in six months examined over 900 persons. He obtained aid from the Board of health in suppressing the gases emanating from the gas-houses, and opposed its action in adopting the "lactometer with the senses" as the sole means of testing the purity of milk. Dr. Doremus is known as a brilliant lecturer on scientific topics, and has frequently appeared before New York audiences in that capacity. He has patented methods for extinguishing fires, and also other chemical processes, also introducing into the United States several chemical industries. The New York university has conferred on him the degree of LL. D. Dr. Doremus held for several years the presidency of the New York philharmonic society, and has also been president of the New York medico-legal society, of which organization he was chemist for several years. His published writings include only a few addresses, notably that at the unveiling of the Humboldt statue in Central Park, and papers delivered before scientific societies.—His son, **Charles Avery,** chemist, b. in New York city, 6 Sept., 1851, was graduated at the College of the city of New York in 1870, and subsequently studied in the universities of Leipsic and Heidelberg, receiving the degree of Ph. D. from the latter institution in 1872. In 1877 he became professor of chemistry and toxicology in the medical department of the University of Buffalo, which office he held until 1882, when he became assistant to the chair of chemistry and physics in the College of the city of New York. Meanwhile he had received the appointments in New York city of lecturer on practical chemistry and toxicology in Bellevue hospital medical college, and professor of chemistry in the American veterinary college. The chemical laboratories in these institutions, excepting Bellevue, were organized under

his direction. Dr. Doremus has made a specialty of medical chemistry and toxicology, and has frequently been called into courts as an expert in such matters. He is chemist to the Medico-legal society, and a member of the chemical societies of Berlin, Paris, and New York, and for some time edited the journal of the latter society. He has written frequent papers on sanitary chemistry and methods of analysis, which have appeared in the proceedings of the societies to which he belongs, and he is the author of a "Report on Photography," contributed to the U. S. government reports on the Exhibition held in Vienna in 1873.

DORGAN, John Aylmer, poet, b. in Philadelphia, 12 Jan., 1836; d. there, 1 Jan., 1867. He was educated in the public schools of Philadelphia, where he always resided, and was so diligent in his studies as to have prepared himself for entering the Central high school a year before he was old enough for admission. After a four-year's course at this institution, he was graduated with the degree of A. B. He then entered a law office, where he remained until his last illness. He died of consumption, and much of his poetry was written while his body was wasting from the inroads of that disease. His writing was done in the intervals of his daily toil, as he never took any vacation. In 1862 he published the first edition of his poems, under the title of "Studies." In 1864 he issued a second edition, and a third in 1866. He also contributed to the "Atlantic Monthly," and other periodicals. Many of his poems are set in a minor key, but they are characterized by strong and vigorous thought. Some of his lyrics pass far beyond the work of a beginner, and indicate what their author would probably have accomplished had a longer life been vouchsafed him.

DORHMAN, Arnold Henry, merchant, b. in Portugal in 1748; d. in Steubenville, Ohio, 21 March, 1813. He proved himself to be one of the strongest friends of American liberty not born on American soil, and put forth such strenuous efforts to relieve our captured seamen that the British government demanded his expatriation. He was originally a merchant, engaged in business in Lisbon, but came to this country in 1783. In view of his services, and the losses he had sustained in his devotion to the young republic, congress voted him a money compensation and a Western township, besides appointing him U. S. agent in Lisbon.

DORION, Sir **Antoine Aime,** Canadian statesman, b. in Ste. Anne de la Pérade, Quebec, 17 Jan., 1818. He was educated at Nicolet college, studied law, and was admitted to the bar in January, 1842. He was a representative for Montreal in the Canada assembly from 1854 till 1861, when he was defeated; and for Hochelaga from 1862 till 1867. He represented the same county in the commons from the union until the general election of 1872, when he was returned for Napierville, which he represented till 1874. He declined a seat in the Canadian cabinet in 1859, but was a member of the executive council of Canada several times, holding the portfolios of commissioner of crown lands from 2 till 4 Aug., 1858, when the government resigned; provincial secretary from May, 1862, till January, 1863, when he resigned on the question of the Intercolonial railway; and attorney-general of Lower Canada and leader of the government (with John Sandfield Macdonald as premier) from May, 1863, till March, 1864, when the administration retired from office. He was sworn of the privy council, 7 Nov., 1873, and was minister of justice from that date until his appointment, in June, 1874, as chief-justice of the province of Quebec. He was administrator of the province of Quebec in December, 1876, during the last illness of Lieut.-Gov. Caron. Sir Antoine was a leader of the Rouge or French Canadian liberal party of Quebec from his entrance into political life until his retirement. He occupied for years a distinguished place at the bar, and was knighted in 1877.—His father, P. A. Dorion, represented Champlain in the assembly of Lower Canada from 1830 till 1838.—His brother, Jean Baptiste Eric (who died in November, 1866), sat in the Canada assembly.—Another brother, Pierre Néré, had a seat in the house of commons.

DORION, Jacques Edmond, French Canadian journalist, b. in St. Ours, Lower Canada, in 1827. He came to the United States at an early age, studied medicine, and practiced as a physician. He founded the newspapers "La Ruche Canadienne," "La feuille d'érable," "Le citoyen," "L'Union," the last published at Ogdensburg, N. Y., previous to 1860. He also edited "Le courrier d'Ottawa" (1861–'5). Dr. Dorion founded "La Société St. Jean Baptist," at Burlington, Vt., at Plattsburgh and Ogdensburgh, N. Y., and in other places in the United States. He is the author of "L'education populaire" (New York, 1853), and of addresses and novels.

DORNIN, Thomas Aloysius, naval officer, b. in Ireland about 1800; d. in Norfolk, Va., 22 April, 1874. He was appointed midshipman, 2 May, 1815, and lieutenant in 1825. After cruising in the Pacific, he volunteered in the sloop-of-war "Vincennes," bound round the world, and returned in her in 1830. After again cruising in the Pacific, he was appointed to the command of the storeship "Relief" on the fitting out of the South sea exploring expedition. While in command of the "Shark," in the Pacific, he was commissioned commander (1841) and given charge of the sloop "Dale," which he brought home from a cruise in 1843. In 1851 he sailed in command of the "Portsmouth," and during his cruise he was ordered to charter one of the Panama steamers and endeavor to prevent the invasion of Mexican territory by William Walker's expedition. In the execution of this design he was completely successful. After discharging his steamer he visited Mazatlan, where he found forty American citizens, who had been peaceably doing business in Guaymas, closely packed in the hold of a schooner, doubly ironed, and chained to the bottom of the vessel. Capt. Dornin at once demanded of the governor their immediate release, and after considerable delay that official finally complied. Dornin then sailed for Acapulco, where he learned that a Mexican warvessel had declared a blockade and driven off U. S. mail steamers. He pursued and overhauled the vessel, and notified her commander that such proceedings were in violation of a special treaty between the United States and Mexico. The Mexican, after making a written protest, abandoned the blockade. After being commissioned as captain (1855), and while in command of the "San Jacinto," Dornin captured two slave-vessels on the coast of Africa with over 1,400 slaves on board, and landed them safely in Liberia. During the civil war he was promoted to the rank of commodore on the retired list (16 July, 1862), and at its close was placed in charge of the fifth light-house district.

DORR, Benjamin, clergyman, b. in Salisbury, Mass., 22 March, 1796; d. in Germantown, Pa., 18 Sept., 1869. He was graduated at Dartmouth in 1817, and, after studying both law and divinity, was ordained priest by Bishop Hobart in 1823. He was rector of Protestant Episcopal churches in Lansingburg and Waterford in 1820–'9, and of

Trinity church, Utica, in 1829–'35. In 1835–'7 he travelled 15,000 miles as general agent of the domestic committee of the Board of missions. But his real life-work did not begin until 1837, when he succeeded the venerable Bishop White in the rectorship of Christ church, Philadelphia, where he remained until his death. In 1838 the University of Pennsylvania conferred on him the degree of D. D., and in 1839 he was elected bishop of Maryland, but declined. In 1853 he visited Europe, extending his journey to Egypt and the Holy Land. Among his works, which have been extensively circulated in the United States and reprinted in England and the British provinces, are "The Churchman's Manual"; "The History of a Pocket Prayer-Book, Written by Itself"; "Recognition of Friends in Another World"; "Sunday-school Teacher's Encouragement"; "Prophecies and Types Relative to Christ"; "An Affectionate Invitation to the Holy Communion"; "An Historical Account of Christ Church, Philadelphia" (1841); "Notes of Travel" (1856); and "A Memoir of John Fanning Watson" (1861).

DORR, Ebenezer Pearson, sea-captain, b. in Hartford, Vt., 13 March, 1817; d. in Buffalo, N. Y., 29 April, 1881. After following the sea for several years, Capt. Dorr settled in Buffalo in 1838, and from that time until 1843 was engaged in the navigation of the great lakes. In the latter year he became marine inspector for the Buffalo mutual insurance company, and acted as agent of the New York board of underwriters for the entire northwest. He was also for some time the Buffalo representative of many insurance companies, and served for seven years as president of the Board of inland underwriters. He acted at different times as president of the Board of trade, the Society of fine arts, and the Historical society of Buffalo, and as vice-president of the National board of trade. He was the first to organize a regular system of wreckage on the lakes, and did much to improve the condition of seamen and to obtain recognition of their acts of heroism. When Jefferson Davis, as secretary of war, first suggested the value of weather reports, Capt. Dorr, at the request of Lieut. Maury, forwarded daily meteorological observations from Buffalo. On 5 Jan., 1874, Capt. Dorr read before the Buffalo historical society a paper entitled "A Brief Sketch of the First Monitor and its Inventor" (Buffalo, 1874).

DORR, Julia Caroline Ripley, author, b. in Charleston, S. C., 13 Feb., 1825. Her maternal grandparents were natives of France, who fled to South Carolina from San Domingo at the time of the servile insurrection in that island. She lost her mother when a child, and her father, William Young Ripley, a native of Vermont, removed shortly afterward to New York, and in 1830 to his native state, where he was one of the first to develop the Rutland marble quarries. In 1847 Miss Ripley married Seneca R. Dorr, then of New York, who shortly afterward went to Rutland, Vt., and lived there till his death in 1884. She has written since early childhood, but her first published poem was sent to the "Union Magazine" by her husband, without her knowledge, a year or two after their marriage. In 1848 she became a contributor to "Sartain's Magazine," taking one of its hundred dollar prizes by her first published prose tale, "Isabel Leslie." She has since continued to contribute both prose and poetry to prominent periodicals. Mrs. Dorr's works include "Farmingdale," a novel, published under the pen-name of "Caroline Thomas" (New York, 1854); "Lanmere," a novel (1856); "Sibyl Huntingdon," a novel (Philadelphia, 1869); "Poems" (1871); "Expiation," a novel (1872); "Friar Anselm, and other Poems" (New York, 1879); "Daybreak, an Easter Poem" (1882); "Bermuda" (1884); and "Afternoon Songs" (1885). A series of essays on marriage, contributed by Mrs. Dorr to a New England journal under the titles "Letters to a Young Wife" and "Letters to a Young Husband," has appeared in book-form without her sanction, with the title "Bride and Bridegroom" (Cincinnati, 1873).

DORR, Thomas Wilson, politician, b. in Providence, R. I., 5 Nov., 1805; d. there, 27 Dec., 1854. His father, Sullivan Dorr, was a successful manufacturer. Thomas was educated at Phillips Exeter academy and at Harvard, where he was graduated in 1823. He then studied law in New York in the office of Chancellor Kent, was admitted to the bar, and began practice in his native city. He was a member of the assembly in 1833–'7, being elected at first as a Federalist, but becoming a Democrat in the last-named year. In 1836 he introduced and carried through the legislature an important bill curtailing the powers of the banks in the state. At this time the government of the state was based on a charter granted by Charles II. in 1663. The suffrage was limited to possessors of real estate to the amount of $134 and to their eldest sons, and therefore only about one third of the citizens were entitled to vote. The representation in the legislature was also unfairly distributed, Newport, for instance, with 8,000 inhabitants, having six members, while Providence, with 23,000, had only four. Mr. Dorr exerted himself in the assembly for the adoption of a more liberal constitution, but his movement obtained only seven out of seventy votes. He finally resorted to popular agitation, and in the latter part of 1840 a "suffrage party" was organized, which, at a mass meeting held in Providence on 5 July, 1841, authorized the calling of a state constitutional convention. Delegates were elected on 28 Aug., and the convention met at Providence on 4 Oct. and framed a constitution, which was submitted to the people of the state on 27, 28, and 29 Dec., when, as was asserted, about 14,000 votes were cast in its favor, being a majority of the adult male citizens of the state. It was also claimed that the constitution was adopted by a majority of the legal voters, or those entitled to suffrage under the charter. Meanwhile the legislature, on 6 Feb., 1841, had also called a constitutional convention, and delegates elected in accordance with the call met in November, but adjourned to February, 1842, when they agreed upon a constitution, which was submitted to the people on 21, 22, and 23 March, and rejected. On 18 April, 1842, an election was held under the "suffrage" constitution, by which Mr. Dorr, who had been the leader in the movement, was chosen governor, and a legislature was elected consisting exclusively of his supporters. An election was also held under the old charter, which resulted in the choice of Samuel W. King as governor. Both governments organized in Newport on 3 May, 1842, and there was an appeal to arms. Gov. King proclaimed martial law, called out the militia, and asked aid from the National government, which recognized him as the legal governor. On 18 May an attempt was made by an armed party of "suffragists" to seize the Providence arsenal, which was thwarted by the appearance of the military under Gov. King. Mr. Dorr, by request of his adherents, then went to Washington to try and gain the support of the Federal government, and on his return was assured that the people were ready to fight for their rights. On 25 June a demonstration in his favor was made at

Chepachet, ten miles from Providence; but only 300 of Dorr's party were present, and, as nearly ten times their number were opposed to them, Dorr ordered them to disperse, and quiet was restored by 28 June. In this same month the legislature issued another call for a convention, which met at Providence in September, adjourned to East Greenwich, and on 5 Nov. adopted the present state constitution, doing away with most of the objectionable features of the old charter. This was ratified by the people almost unanimously. The affair thus terminated is known as "Dorr's rebellion." Dorr fled to Connecticut, and afterward to New Hampshire. A reward of $4,000 had been offered by the state authorities for his apprehension, and on his return to Rhode Island he was arrested, tried for high treason, and on 25 June, 1844, sentenced to imprisonment for life. He was released in 1847 under a general amnesty act, and in 1851 restored to his civil rights. In 1854 an act to reverse judgment in his case was passed by the legislature, but declared unconstitutional by the supreme court as an assumption of judicial functions by the legislative branch of the government.

DORRANCE, Gordon, clergyman, b. in Stirling, Conn., in 1765; d. in Attica, N. Y., in 1846. He was graduated at Dartmouth in 1786, taught at Griswold, Conn., and studied theology. He was pastor of the Congregational church at Windsor, Mass., in 1795–1834, and afterward preached in Sunderland, Mass., and its vicinity. He published a "History of Windsor" (Pittsfield, Mass., 1829).

DORREGO, Manuel, Argentine soldier, b. in Buenos Ayres, 15 Feb., 1787; d. at Navarro, 13 Dec., 1828. He was graduated in law at the university of San Carlos, in his native city, in 1809, and went to Santiago de Chili to finish his studies.

While he was there the news of the revolution against Spanish rule in Buenos Ayres, 25 May, 1810, arrived, followed in June by that of the deposal of the Spanish governor of Chili, Carrasco, and the formation of a revolutionary junta, 18 Sept. Dorrego joined in the revolutionary movement, and the Chilian government, after its independence was recognized, struck a medal in his honor, with the inscription, "Chili to its first defender." In 1811 Dorrego returned to his native city, was appointed commander of a regiment of cavalry, and distinguished himself in the battle of Salta under Gen. Saavedra. In 1812, commanding a brigade in the army of Gen. Pueyrredon, he marched to Upper Peru, and defeated the Spanish forces in Nazareno and Suipacha, being severely wounded in the latter battle. In September of the same year he took a distinguished part in the battle of Tucuman, and in February, 1813, in that of Salta, and when Artigas took possession of Uruguay in 1814, Dorrego defeated him in the bloody battle of Guayabo, and in the following year participated in the battles of Barrios and Sourena, in which he captured many prisoners, and those of Pozo Verde and Llatarte, saving those towns from conflagration and pillage. When Pueyrredon, 26 March, 1816, declared himself dictator, Dorrego energetically opposed him in the press, and, on a charge of military insubordination and arrogance, was banished. He went to the United States, resided there nearly four years, and published "Cartas apolojéticas en contestación al auto de expatriación" (Baltimore, 1817). On the downfall of the dictator in 1820, Dorrego went home, was elected governor of Buenos Ayres, and organized troops to subdue the lawless bands that opposed the authorities in the interior under the name of "montoneros," whom he defeated, 2 Aug., at San Nicolas de los Arroyos. In 1823 he was elected, by a popular vote, a member of the Junta de Representantes, and in 1826 of the constituent congress, where he distinguished himself by his eloquence, defending federal principles against the central party or "Unitarios." In July, 1827, he was again elected governor of Buenos Ayres, on the resignation of Gen. Rivadavia as unitario president, and as such recognized the independence of Uruguay, notwithstanding the opposition of the other Argentine provinces, but with the general approbation of other American republics and European governments. On 1 Dec., 1828, Gen. Lavalle pronounced against Dorrego's government, and the latter, with such forces as he could collect, marched against the insurgents, but was defeated at Navarro on the 13th, taken prisoner, and shot the same day, by Lavalle's order, without a trial. When in 1862 the federal principle triumphed, the government erected a monument to him in Buenos Ayres.

DORSEY, Anna Hanson, author, b. in Georgetown, D. C., 12 Dec., 1815. Her father was one of the first chaplains appointed in the U. S. navy. During her girlhood she contributed many short anonymous poems to periodicals. At the age of twenty-two she married Owen Dorsey, for many years judge of the Orphan's court in Baltimore. In 1840 she became a convert to the Catholic faith. Her works include dramas, poems, novels, tales, essays, and stories for young people. Many of her stories have appeared first as serials, and when issued in book form have been reproduced in foreign countries. One of her books, "May Brooke," republished in Scotland, was the first Catholic book issued in that country since the reformation. She has also written many political articles, as well as sketches and poems on national topics. The following is a partial list of her books: "The Student of Blenheim Forest" (Baltimore, 1847); "Flowers of Love and Memory," poems (1849); "Oriental Pearl" (1857; translated into German, and republished in Vienna); "Woodreve Manor" (Philadelphia, 1852); "May Brooke" (New York, 1856); "Coaina, the Rose of the Algonquins" (1868); "Nora Brady's Vow" (Boston, 1869); "Mona, the Vestal" (1869); "The Flemings, or Truth Triumphant" (New York, 1869); "The Old Gray Rosary" (1870); "Guy, the Leper," an epic poem (Baltimore, 1850); "Tangled Paths" (1879); "The Old House at Glenarra" (Baltimore, 1886); "Warp and Woof" (1887); and "Palms" (1887).

DORSEY, Godwin Volney, physician, b. in Oxford, Butler co., Ohio, 17 Nov., 1812. He was educated at Miami university, Oxford, Ohio, and was graduated at the medical college of Ohio in 1836, when he settled in Piqua, Ohio. He was for many years president of the Miami county medical society. He was an elector on the democratic presidential ticket in Ohio in 1848, a member of the Ohio constitutional conventions of 1850 and 1873,

a member of the democratic national convention in 1856, and of the republican national convention in 1864, state treasurer of Ohio in 1861 and 1863, chairman of the republican executive committee in 1863–'4, and supplied the place of Governor Tod as elector at large on the Republican ticket in 1868.

DORSEY, James Owen, ethnologist, b. in Baltimore, Md., 31 Oct., 1848. He studied at the Central high school (now Baltimore city college) from 1862 till 1863, and then at the theological seminary of Virginia from 1867 till 1871. After being ordained a deacon, 18 April, 1871, he was sent as a missionary of the Protestant Episcopal church to the Ponka Indians in Dakota, where he remained for two years. From 1873 till 1878 he was engaged in parish work in Maryland. He was appointed ethnologist to the U. S. geological and geographical survey of the Rocky mountain region under Major J. W. Powell, and sent to the Omaha Indians in Nebraska, remaining there until 1880. Meanwhile, in 1879, he had been transferred to the bureau of ethnology in the Smithsonian institution, and in 1880 was also appointed Ponka interpreter to Gen. Crook's commission. Prior to 1884 his investigations were confined to the languages, mythology, and sociology of tribes of the Dakotan or Siouan family, but since then he has made original researches for linguistic material among nineteen Oregon tribes of the Athapascan, Kusan, Takilman, and Yaknon families. He was made member of the council of the Anthropological society of Washington in 1884, and general secretary in 1885, vice-president of the section on anthropology of the American association for the advancement of science in 1885, honorable local correspondent of the Victoria institute of Great Britain in 1885, and member of the Italiana Regále Società Didascalica in 1886, from which organization in 1886 he received a gold medal for his works on sociology. A record of his work will be found in the annual reports of the Smithsonian institution. He has published "Ponka A B C Wabá-ru," a Ponka primer (1873); "Siouan Phonology" (1883); "Osage War Customs" (1884); "Kansas Mourning and War Customs" (1885); "Omaha Sociology" (1885); "Siouan Migrations" (1886) and "Indian Personal Names" (1886). Most of the foregoing were issued as pamphlets or reprints from government publications or transactions of societies.

DORSEY, John Syng, physician, b. in Philadelphia, 23 Dec., 1783; d. there, 12 Nov., 1818. He received his early education at the Friends' academy in Philadelphia, studied medicine, and was graduated at the University of Pennsylvania in 1802. The yellow fever broke out in Philadelphia a few weeks later, and committed such ravages that a hospital was opened, and the young graduate received the appointment of resident physician. He combatted the idea of contagion, and strengthened his theory regarding the disease by courting infection in the most reckless manner. The next year, 1803, he visited France and England, attended the lectures of Humphry Davy, the distinguished chemist, and afterward visited the medical schools of Paris, returning to Philadelphia after an absence of about a year. He was elected adjunct professor of surgery in the school where he had been graduated but five years previously, was transferred to the chair of materia medica in 1816, and, having given two courses of lectures on that subject, was chosen to the professorship of anatomy made vacant by the death of Dr. Wistar. On the evening after delivering his introductory lecture he was attacked by a fever, and died at the end of a week. He had the reputation of being one of the first surgeons of America. He contributed papers to the "Portfolio" and other medical journals, and published an edition of "Cooper's Surgery" in the notes, and "Elements of Surgery" (Philadelphia, 1813). The last was adopted as a text-book in the University of Edinburgh, and was long a favorite in this country.

DORSEY, Sarah Anne, author, b. in Natchez, Miss., 16 Feb., 1829; d. in New Orleans, La., 4 July, 1879. Her maiden name was Ellis. She received a careful education, and enjoyed the advantage of extended foreign travel. Her mother was a sister of Catherine Warfield, author of "The Household of Bouverie," who died in 1877, and left in Mrs. Dorsey's hands a mass of manuscript, the greater part of which is still unpublished. Mrs. Dorsey's mother married Gen. Charles G. Dahlgren, afterward of the Confederate army, and the daughter, in 1853, married Samuel W. Dorsey, of Ellicott's mills, Md., who was then practising law and planting in Tensas parish, Louisiana. Mrs. Dorsey used her pencil with artistic skill, and performed on the harp with exquisite taste. She spoke fluently several modern languages, was a proficient in Latin and Greek, and a student of Sanskrit. She began her literary career by writing for the New York "Churchman," receiving from that journal the pen-name of "Filia Ecclesiæ." Mrs. Dorsey built a chapel on her plantation, and devoted much time to the religious instruction of her slaves, teaching a class of fifty or sixty negroes every Sunday. In 1860 she sent to New York, to be published, the choral services that she had arranged and used successfully among her black pupils for years, but the war began, and the collection remained unpublished. Mr. Dorsey lost nearly a quarter of a million dollars by the civil war. Their home was burned in a skirmish, and several men were killed in the garden. They took their slaves to Texas, where Mrs. Dorsey acted as nurse in a Confederate hospital. After the death of Mr. Dorsey in 1875, she removed from her plantation in Tensas parish, and resided at Beauvoir, a small place on the Gulf shore, which, by her will, was given to Jefferson Davis. Here she continued her literary labors, acting also as amanuensis to Mr. Davis in the preparation of his "Rise and Fall of the Confederate Government." She afterward removed to New Orleans, and submitted to a surgical operation for cancer, which proved unavailing. Her published works are "Recollections of Henry Watkins Allen, ex-governor of Louisiana" (New York, 1866); "Lucia Dare" (1867); "Agnes Graham" (Philadelphia, 1869); "Atalie or a Southern Villeggiatura" (1871); and "Panola; a tale of Louisiana" (1877).

DORSEY, Stephen W., politician, b. in Benson, Vt., 28 Feb., 1842. He received an academical education, and removed with his father's family to Oberlin, Ohio. At the beginning of the civil war he enlisted in the national army, served in the west until 1864, was transferred to the Army of the Potomac, with which he remained until the close of the war. Returning to Ohio, he resumed business as an employee of the Sandusky tool company, was soon afterward made president of the company, and was elected on the same day, without his knowledge, president of the Arkansas central railway company. He removed to Arkansas, and was chosen chairman of the Republican county and state committees. He was elected as a Republican to the U. S. senate, serving from 3 March, 1873, till 3 March, 1879. During the presidential canvass of

1880 he was secretary of the Republican national committee, and did much toward securing the election of Garfield and Arthur. His services commanded the respect of his colleagues, so that he was tendered and accepted a banquet in New York, in February, 1881. At the time of the star-route exposures it was claimed that the necessary legislation was procured through his influence in the senate, in consequence of which he was indicted by the grand jury of Washington, and, as he failed to appear at the time appointed, a warrant was issued for his arrest, and for months it was impossible to ascertain his whereabouts. Later he appeared in court, and also addressed a card to the public in explanation of his connection with the mail contracts, claiming that his relations were disinterested except so far as they benefited his brother and brother-in-law, who held contracts. The first trial resulted in a disagreement, and at the second a verdict of "not guilty as indicted" was rendered. Mr. Dorsey has since been largely occupied with real estate and other interests in the far southwest.

DORSHEIMER, William, journalist, b. in Lyons, N. Y., 5 Feb., 1832. His father was Philip Dorsheimer, a native of Germany, afterward a wealthy citizen of Buffalo, and one of the founders of the republican party. William entered Harvard in 1849, but at the end of two years impaired health forced him to leave his studies. He was admitted to the bar in 1854. In politics he began as a Democrat, joined the Republican party in 1856, and in 1860 again supported the Republican ticket. In 1859 Harvard gave him the degree of M. A. At the beginning of the civil war he was appointed major on Gen. Frémont's staff, and at the close of the Missouri hundred-days' campaign Maj. Dorsheimer returned to civil life, and published a series of articles in the "Atlantic Monthly," entitled "Frémont's Hundred Days in Missouri." In 1867 he was appointed by President Johnson U. S. district attorney for the northern district of New York. His term expired in 1871. In the Democratic state convention of 1874 he was nominated for lieutenant-governor, with Samuel J. Tilden as candidate for governor, and both were elected, Mr. Dorsheimer having a majority of 51,488 over his opponent. In the prosecution of the measures against the Canal ring, Mr. Dorsheimer was an efficient worker. He was re-elected lieutenant-governor, serving from 1 Jan., 1875, till 1 Jan., 1880. In 1875 he was appointed a commissioner of the state survey, and in 1883 one of the commissioners of the state reservation at Niagara, being elected chairman of the latter commission. In 1882 he was elected to congress from the 7th district of New York, and became a member of the judiciary committee, and was also chairman on the part of the house of the joint committee having in charge the proceedings of congress on the completion of the Washington monument. He was a member of the Liberal Republican national convention held in Cincinnati in May, 1872, and also of the Democratic convention held in St. Louis in 1876, a member of the committee on resolutions in the latter body, and reported the platform. He has contributed to periodical literature, delivered occasional addresses, and taken part as a public speaker in various political canvasses. In 1884 he published a biography of Grover Cleveland, the Democratic candidate for the presidency, and in July, 1885, was appointed U. S. attorney for the southern district of New York, which office he resigned in March, 1886. In September, 1885, he purchased the New York "Star," and began its publication as a daily paper on 15 Sept. of that year. Mr. Dorsheimer was one of the founders and original officers of the Buffalo fine arts academy and the Buffalo historical society.

DORSONNENS, Eraste, Canadian author. He is a resident of Montreal, and has contributed tales and sketches to the French Canadian press, among others, "Esquisses Judiennes" in "La Patrie" (1856) and "Angélina" in "La Guipe" (1860). He is the author of "Felluna" (Montreal, 1856) and "Une apparitien" (1860).

DOSQUET, Peter Herman, Canadian R. C. bishop, b. in Lille, Flanders, in 1691; d. in Paris, France, in 1777. He studied theology in the Seminary of St. Sulpice, Paris, became a member of the order, and was sent to Canada in 1721 or 1722. After a short stay in the Seminary of Montreal he received orders to go to the Lake of the Two Mountains, where the Sulpitians had established a mission among the Ottawa Indians, but his health was injured by the fatigues that he underwent in the discharge of his duties, and after two years he returned to France. He was summoned to Paris to superintend the organization of a house of foreign missions, and afterward sent to Rome as procurator-general of the society. Here he was named bishop of Samos by Benedict XIII., and consecrated in 1725. He was appointed coadjutor bishop of Quebec in 1728, and arrived in that city in 1729. In 1732 the needs of his diocese obliged him to go to France, where he learned that the resignation of Bishop Duplessis-Mornay made him titular bishop of Quebec. Several young ecclesiastics of the diocese of Quebec had entered religious orders with the view of escaping the hardships of missionary life, and to counteract this evil he obtained a decree from Rome that all candidates for orders should take an oath before ordination to perform missionary duty in the diocese of Quebec unless they had the licence of the bishop or his successors to leave it. He returned to Quebec after an absence of two years, rebuilt at his own expense the Seminary of Quebec, which had been burned in 1705, endowed it with a valuable tract of land near Quebec, and erected a large country house for the students. He founded a new Latin school in Quebec, and another in Montreal, and also established a school for girls in Louisburg, conducted by sisters of the congregation of Notre Dame. His health was undermined by his labors, and he embarked again for France in 1735. Feeling his infirmities increase, he resigned his bishopric and was appointed vicar-general of Paris.

DOSTIE, Anthony Paul, dentist, b. in Saratoga county, N. Y.; d. in New Orleans, La., 5 Aug., 1866. He was a barber in early life, but became a dentist, and removed to Chicago, and subsequently to New Orleans. He was an active Union man during the civil war, and by his fearlessness gained both warm friends and bitter enemies. On the reorganization of the Louisiana government, during the war, he was appointed state auditor, and he was also a member of the constitutional convention of 1864. Dr. Dostie, in company with a Republican minority in New Orleans, was anxious to extend the suffrage to the freedmen, and to deny it to all those who had taken part against the national government in the civil war. The convention of 1864, in adjourning, had resolved that it should be the duty of the president to recall it "for any cause, or in case the constitution should not be ratified, for the purpose of taking such measures as may be necessary for the formation of a civil government in Louisiana." Dr. Dostie and his associates now began to agitate the recall of the old convention. The project was at first received every-

where with derision, being regarded as a revolutionary movement, since it was claimed that the resolution above quoted gave the convention no power to amend the constitution that it had adopted. Finally, however, the president *pro tempore* of the convention issued an order reconvoking it on 30 July, 1866. On 27 July a meeting was held, which adopted resolutions calling for the enfranchisement of the negroes, and at the same time speeches were made to a large assembly of freedmen outside. That of Dr. Dostie asserted that, if the convention were interfered with, "the streets of New Orleans would run with blood." This speech was afterward spoken of as "intemperate" by Gen. Sheridan. The city authorities now threatened to break up the convention as an unlawful assemblage, but the mayor was told that this would not be permitted by the U. S. forces then in the city. Part of the convention assembled on 30 July, and, while a recess was taken for the purpose of obtaining a quorum, a conflict between a body of negroes and the police occurred outside of the building. This precipitated a riot, and the negroes took refuge in the building, and were attacked by the police and by a mob, which also wreaked its animosity on members of the convention. Dr. Dostie was one of its first victims. Although unarmed, he was shot and beaten till he was supposed to be dead, and thrown into a cart with the dead bodies of other victims of the riot. He was finally taken to the hospital, where he died six days afterward in great suffering. See "Life of A. P. Dostie, or the Conflict of New Orleans," by Emily H. Reed (New York, 1868).

DOTEN, Lizzie, poet, b. in Plymouth, Mass., 1 April, 1829. She received a good early education, but was mostly self-taught. She has been known as an "inspirational speaker," and as an improviser of poetry, which she produces with little or no intellectual effort, claiming that it is dictated to her by spirits. She has published two collections of her poetry, "Poems from the Inner Life" (Boston, 1863) and "Poems of Progress" (1871).

DOTON, Hosea, educator, b. in Pomfret, Vt., 29 Nov., 1809; d. in Woodstock, Vt., 19 Jan., 1886. After receiving a common-school education, he studied by himself, and became one of the best mathematicians in the state. He taught at various places till 1850, when he opened a normal school in his native town, and continued it till 1866. Fully 150 of Mr. Doton's pupils became successful teachers, and his school was a great aid to the educational system of the state. He also worked as a surveyor, and from 1866 till his death was chief engineer of the Woodstock railroad. His work in determining the altitudes of Vermont mountains is accepted as authority. He made astronomical calculations for the "Vermont Register," and for eighteen years kept a meteorological record, making full monthly reports to the war department at Washington. He was a member of the state senate in 1865–'6, and in the latter year the legislature established his method of computing interest, known as the "Vermont rule." Mr. Doton received the degree of M. A. from Norwich university, Vt., in 1845. He published many scientific articles.

DOTY, Elihu, missionary, b. in Berne, Albany co., N. Y., 20 Sept., 1809; d. at sea, 30 Nov., 1864. He was apprenticed to a merchant in 1824, but afterward entered Rutgers college, was graduated there in 1835, at New Brunswick theological seminary in 1836, and sailed as a missionary for Batavia, Java, in June of that year. After working in Java and Borneo, he finally settled, in 1844, at Amoy, China, where his labors were very successful. In his later years he gave himself especially to the literary work of the mission. Over-work ruined his health, and he died on the vessel that was carrying him home. Among his publications are "Some Thoughts on the Proper Term for God in the Chinese" (Shanghai, 1850); "Anglo-Chinese Manual of the Amoy Dialect" (1853); and a translation into that dialect of Milner's "Thirteen Village Sermons" (Amoy, 1854).

DOTY, James Duane, governor of Wisconsin, b. in Salem, Washington co., N. Y., in 1799; d. in Salt Lake City, Utah, 13 June, 1865. After studying law he removed to Detroit, Mich., in 1818, and became secretary of the territorial council and clerk of the court. In 1820 he was one of the party that, under Gen. Lewis Cass, explored the upper lakes in canoes, travelling 4,000 miles, and making treaties with the Indian tribes of that region. In 1823–'32 he was U. S. judge for northern Michigan, holding his first court at Prairie du Chien, then a military outpost. He was one of a commission appointed by congress in 1830 to lay out a military road from Green Bay through Chicago to Prairie du Chien, and in 1834 was a member of the Michigan legislature. Here he introduced a bill that led to the division of Michigan and the creation of Wisconsin and Iowa territories. He was one of the founders of the present city of Madison, Wis., secured its adoption as the capital, and in 1837–'41 was delegate to congress from the new territory, having been elected as a Democrat. In 1841–'4 he was governor of the territory; but his administration was marked by bitter contentions and a collision with the legislature, and after the appointment of his successor he was placed by the war department on a commission to treat with the Indians of the northwest. He was a member of the constitutional convention of 1846, and, on the admission of Wisconsin to the Union, served two more terms in congress, from 1849 till 1853, being chosen the second time as a free-soiler. He was made superintendent of Indian affairs in 1861, and in 1864 was appointed by President Lincoln governor of Utah territory, of which he had previously been treasurer. Gov. Doty was a man of great ability, commanding presence, and winning address. Though he had many political enemies, he was personally a favorite with all.

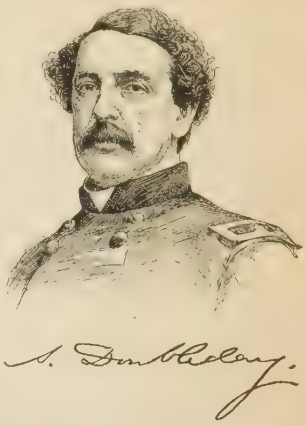
DOTY, Lockwood Lyon, lawyer, b. in Groveland, N. Y., 15 May, 1827; d. in Jersey City, N. J., 18 Jan., 1873. His early years were spent in his native village, and when of age he entered a law-office in Geneseo, N. Y. He was active in procuring enlistments during the war, was military secretary of Gov. Fenton, and founded the State military bureau at Albany, which collected the histories of the volunteer regiments and provided for the care of the sick and wounded. In 1871 he was appointed pension agent in New York city, which office he held until failing health compelled his resignation a few weeks previous to his death.

DOUBLEDAY, Charles William, soldier, b. in Leicestershire, England, 28 Jan., 1829. This surname, of Huguenot origin, was originally Dubaldy. He came to this country early in life, and received a common-school education in Ohio. He went to California in the early days of the "gold fever" and led a life of adventure. Early in 1854 he embarked from San Francisco for New York, by way of Nicaragua, but remained in that country, and espoused the popular cause in the civil war then in progress, raising and commanding a company of American and English riflemen. He subsequently became major and colonel, and, after the arrival of Walker and his party (see Walker, William), was with that adventurer in the battles

of Rivas and Virgin bay. After Walker had unfolded to Doubleday his visionary scheme of a southern empire, the latter left him in disgust and returned to New York late in 1855. But he afterward joined Lockridge's unsuccessful attempt to re-enforce Walker, was injured by the boiler explosion that frustrated that attempt, and subsequently accompanied a party of adventurers that sailed from Mobile, and was shipwrecked on the coast of Central America. In 1861–'2 Col. Doubleday commanded a company of cavalry in the service of the United States, and was for a time acting brigadier-general. He has published "Reminiscences of the Filibuster War in Nicaragua" (New York, 1886).

DOUBLEDAY, Edward, English naturalist, b. in 1810; d. in London in 1849. He was a member of the Society of friends. After making a tour of the United States, he published a paper on the "Natural History of North America," and was made one of the curators of the British museum. He contributed largely to periodicals on ornithology, entomology, and zoölogy, and published a costly, illustrated, and valuable work on the "Genera of Diurnal Lepidoptera."

DOUBLEDAY, Ulysses Freeman, congressman, b. in New Lebanon, Conn., 15 Dec., 1792; d. in Belvidere, Ill., 10 March, 1866. His father fought at Bunker Hill and Stony Point, and was confined for some time in the Jersey prison-ship during the revolution. Ulysses was apprenticed to a printer in 1809, worked at the trade with Thurlow Weed at Cooperstown, N. Y., and in 1812 served for some months against the British at Sackett's Harbor. After working in Utica and Albany he went to Ballston Spa, N. Y., in 1816, where he established and edited the "Saratoga Courier." He removed to Auburn in 1819, and published and edited the "Cayuga Patriot" there for twenty years. He was chosen to congress as a Jackson Democrat, serving two terms, in 1831–'3 and 1835–'7. He became a farmer in Scipio, Cayuga co., N. Y., in 1837, but in 1846 went to New York city, where, in company with his brother Elisha, he opened a stationery store in John street, and became well known as a bookseller.—His son, **Thomas Donnelly,** b. in Albany, N. Y., 18 Feb., 1816; d. in New York city, 9 May, 1864, was engaged in the book trade, and in 1862 became colonel of the 4th New York artillery. He was run over by an omnibus in Broadway, New York, and fatally injured. —Another son, **Abner,** soldier, b. in Ballston Spa, N. Y., 26 June, 1819, was a civil engineer in 1836–'8, when he was appointed to the U. S. military academy, and on his graduation in 1842 was assigned to the 3d artillery. He served in the 1st artillery during the Mexican war, being engaged at Monterey and at Rinconada Pass during the battle of Buena Vista. He was promoted to 1st lieutenant, 3 March, 1847, to captain, 3 March, 1855, and served against the Seminole Indians in 1856–'8. He was in Fort Moultrie from 1860 till the garrison withdrew to Sumter on 26 Dec. of that year, and aimed the first gun fired in defence of the latter fort on 12 April, 1861. He was promoted to major in the 17th infantry on 14 May, 1861, from June till August was with Gen. Patterson in the Shenandoah valley, and then served in defence of Washington, commanding forts and batteries on the Potomac. He was made brigadier-general of volunteers on 3 Feb., 1862, assigned to the command of all the defences of Washington on the same date, and commanded a brigade on the Rappahannock and in the northern Virginia campaign from May till September, 1862, including the second battle of Bull Run, where on 30 Aug. he succeeded to the command of Hatch's division. In the battle of Antietam his division held the extreme right and opened the battle, losing heavily, but taking six battle-flags. On 29 Nov., 1862, he was promoted to major-general of volunteers. He was at Fredericksburg and Chancellorsville, and succeeded Gen. John F. Reynoldsaschief of the 1st corps when that officer was appointed to the command of one wing of the army. On 1 July, 1863, he was sent to Gettysburg to support Buford's cavalry, and, on the fall of Gen. Reynolds, took command of the field till the arrival of Gen. Howard, some hours later. His division fought gallantly in the battle that followed, and on the third day aided in the repulse of Pickett's charge. Gen. Doubleday served on courts-martial and commissions in 1863–'5, and on 12 July, 1864, temporarily commanded the southeastern defences of Washington when the city was threatened by Early's raiders. He was brevetted colonel in the regular army on 11 March, 1865, and brigadier- and major-general on 13 March, for his services during the war. In November and December, 1866, he was in command at Galveston, Tex., served as assistant commissioner of the Freedman's bureau there till 1 Aug., 1867, and, after being mustered out of the volunteer service, was made colonel of the 35th infantry, 15 Sept., 1867. He was a member of the retiring-board in New York city in 1868, and in 1869–'71 superintended the general recruiting service in San Francisco, where in 1870 he suggested and obtained a charter for the first cable street-railway in the United States. After commanding posts in Texas he was retired from active service on 11 Dec., 1873. He has published "Reminiscences of Forts Sumter and Moultrie in 1860–'1" (New York, 1876); "Chancellorsville and Gettysburg" (1882); and articles in periodicals on army matters, the water supply of cities, and other subjects.—Another son, **Ulysses,** soldier, b. in Auburn, N. Y., 31 Aug., 1824, was educated at the academy in his native town. He became major in the 4th New York artillery, 23 Jan., 1862, lieutenant-colonel of the 3d U. S. colored troops, 15 Sept., 1863, and colonel of the 45th colored troops, 8 Oct., 1864. He commanded a brigade at the battle of Five Forks, and was brevetted brigadier-general of volunteers, 11 March, 1865, for his gallantry there. Gen. Doubleday was for many years a member of the stock exchange in New York city.



A. Doubleday.

DOUGHERTY, Daniel, lawyer, b. in Philadelphia, Pa., 15 Oct., 1826. He was educated at private schools, studied law, was admitted to the bar in his native city on 2 May, 1849, and soon became noted as an orator and humorist. He has been a political speaker, and was a strong friend of the national government in 1862. He was one of the founders of the first Union league, and worked earnestly for President Lincoln's re-election in

THOMAS DOUGHTY, PAINTER OF SCENERY

by H. N. Doughty

Thomas Doughty, landscape painter, who was born in Philadelphia July 19, 1793, and died in New York, July 22, 1856, is grouped with the Hudson River School. This is a classification of convenience to students of painting, but misleading if it is considered indicative of the geography of his paintings. Far from limiting himself to the Hudson River, he roamed the eastern seaboard from Mt. Desert to the Potomac and from the Atlantic to the Appalachians. He traveled widely not only because he liked the scenery he painted, but also because he believed his talent should be used to interest his fellow citizens in the beauty of their country. When in New York in 1849 a banquet was given to mark the opening of the new galleries of the American Art Union, Thomas Doughty, as dean of the painters of the United States, was asked to respond to a toast. He said, "I do not profess to tickle the ear with elegant sentences, I would rather appeal to the eye and the heart through the medium of canvas and color, if I might possibly do so; I would rather, if my humble ability would allow me, present to your view or to your mind's eye, one of those beautiful scenes with which our country abounds." It is evident in the original titles of his paintings, as exhibited during his lifetime, that he was not deterred by difficulties of travel from setting up his easel in places not easily reached except by determined travelers. There are very few "beauty spots" not found in a list of his titles. That his paintings were enthusiastically received is evident from the continuous praise they were given in newspapers and periodicals of the time. To understand the public attitude toward his work it must be kept in mind that there was no photography as yet, and anything other than literary description of landscape depended entirely on the "pencil" of the painters.

Born and brought up in Philadelphia, Doughty was well acquainted with the beautiful region that lies along the shores of the Delaware, the Schuylkill, and the Brandywine. As he grew to manhood, he came to know the wilder regions that then surrounded the upper reaches of those streams, the Susquehanna, the Tioga, and the Juniata. He did not begin his career as a landscape painter until 1820. At the age of twenty-seven, after a successful business career as a leather currier, Doughty decided, as he expressed it in a

---

Since retiring from business in 1930, Howard N. Doughty has continued his interest in the New Hampshire and Vermont hills where he has spent much time walking and climbing. For many years he has sought out material on his great grandfather's brother, the painter Thomas Doughty, and has here given us the results of some of his researches.

letter to Dunlap (the author of *A History of the Arts of Design*), "contrary to the wishes of my friends and family, to pursue painting as a profession." There is considerable evidence that he had for many years prior to that date been on friendly terms with the painters who then made Philadelphia their headquarters. It was not long after he was first listed in the Philadelphia City directory in 1820 as "Doughty, Thomas, landscape painter" that he began to make progress in his chosen field.

From 1820 to 1828 most of his time was spent in Philadelphia, but he made trips to New England and painted scenes on the Connecticut River during that time. Most of his paintings during these years were of the Philadelphia or rather of the Pennsylvania region. Several years after his death, one of his contemporaries described the painter as "multiplying pictures of the Susquehanna till you could never think of the artist apart from the river nor of the river but as a running accompaniment for the artist—a transcript of himself, broad, full and plentious." Doughty's paintings were often used to illustrate the gift books which were very popular in the 1820's and 1830's, and there are engravings of his pictures with titles such as: "Lake Scene," "Delaware Water Gap," "Trenton Falls," "Harpers Ferry," "The Banks of Juniata," "The Mountain Stream"—nearly all of them containing mountains, and valued by publishers and public as "embellishments" of the books.

When, in the spring of 1827, the Boston Athenaeum opened the first of a series of exhibitions of painting and sculpture, Thomas Doughty was known to the painters living in Boston and he had sold some of his pictures to "patrons of the arts" in that vicinity. His paintings were included in the first and most of the subsequent exhibitions. In 1828 the painter decided to live in Boston. He remained there and had classes in painting until he went to England in 1838.

It was during this decade that he must have traveled extensively in New England, and there are many paintings of the coast at Nahant, Cohasset, and elsewhere. He was frequently in the White Mountain region, and there are several of his paintings with titles that indicate he visited Crawford Notch, the Chocorua region, and that "paradise of painters," the Conways. Efforts to find the places where he boarded in the mountains have been unsuccessful. It is recorded in a magazine article in the 1890's that Doughty, Alvan Fisher, and Chester Harding stayed at "Thompsons Little Tavern in North Conway" (rates $2.00 per week including washing!), but the Conway Historical Society has no available data regarding this inn.

In *Appalachia* for June 1944, an article on "W. H. Bartlett, Illustrator of American Scenery," by Frank Place, describes *American*

THE SILVER CASCADE

Published in "American Scenery," London, England, 1840

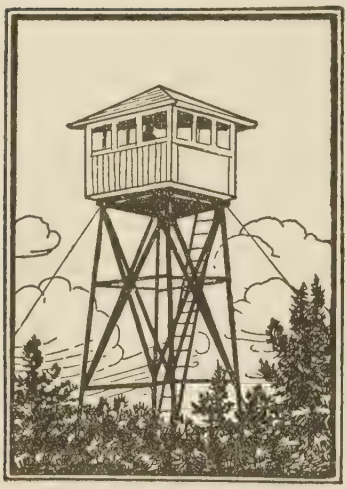
Scenery published by George Virtue in London (1839-1840) to give the British public reproductions of Bartlett's drawings and paintings. The editor, Nathaniel Parker Willis, one of the most widely read of the native journalists of the period in this country, was a great admirer of Thomas Doughty's paintings, and two of them were included with the Bartlett pictures. One was a view of Silver Cascade in Crawford Notch, the other a view of Mt. Desert—"Desert Rock Lighthouse." In his comments on the latter, Willis was generous in praise of Doughty and referred to him as having made a search for beauty on the Maine coast. During this decade Doughty also visited the Adirondack region and painted pictures of Lake George and the upper Hudson River.

After his return from England at the age of forty-five, he lived in New York, where he was given a friendly welcome by writers for the newspapers and magazines. He stayed in New Burg (sic) for a time, visited Albany, and painted scenes in the Highlands of the Hudson and the Catskill region. Although his address is given as New York in the catalogues, his many travels included a visit to New Orleans, and in 1845 he went to England and the continent for a long stay. The Royal Academy exhibitions in London and the Salon in Paris included some of his paintings. After his return to New York he lived in the neighborhood of that city the remainder of his life. A long illness prevented any painting for over a year, but in 1851 he was at work in Sullivan County, New York. The last record of his paintings is in Owego, N. Y. where he returned to the Susquehanna River, thus completing a cycle which had taken him into nearly all sections of eastern United States, where he could find for the edification of his fellow citizens the views "to appeal to the eye and the heart through the medium of canvas and color."

The Author desires to thank the New York Historical Society for loaning the photographs from which the illustrations were made, and to express his thanks to Mr. Robert C. Vose of the Vose Galleries, 559 Boylston Street, Boston, Massachusetts, for his sympathetic and helpful interest in securing photographs of paintings by Thomas Doughty.

FIRE TOWERS OF THE KENNEBEC

by Robert L. M. Underhill



In the years immediately preceding the war it so fell out that our family spent several summers at Randolph, N. H. From this as a base Miriam Underhill and I developed the habit of making occasional climbing raids northeastward into Maine, and gradually there took shape one of those whimsical projects which, no doubt silly enough in themselves, yet manage to lend a lot of interest and drive to one's activity. This was, to climb all the mountains of Maine which are provided with fire towers. We chose the fire-tower mountains for two reasons: first, because they were bound to have trails, and we do not enjoy bushwhacking; and secondly, because they were equally bound to have views.

In defence of this project I might add that the climbing situation in Maine differs significantly from that in the White Mountains. Everyone is aware nowadays that Maine is a state of mountains as well as of lakes and forests, but there is a bit more to be said. While the mountains are numerous on the whole, they are rather thinly spread over an immense area, with no such concentrations of high peaks as we find in New Hampshire. Even the Appalachian Trail is hard pressed to find a continuously mountainous course across the state. In consequence, the rewarding method of dealing with the Maine mountains lies not in setting out to walk exhaustively a given limited district but in taking long jumps by automobile from place to place, climbing carefully selected peaks here and there. And, for the same general reason, to make the selection on the basis of fire towers is not so arbitrary. In the closely organized White Mountains, the fire-tower summits are by no means always the highest or most prominent of their groups; they are simply those from which a certain basin, or set of basins, can best be surveyed. But in Maine, with its simpler topography, the lone high peak is pretty regularly the best viewpoint

---

Well known to readers of *Appalachia,* Robert L. M. Underhill, for many years the Editor of this magazine, has contributed many articles on mountain ascents and mountaineering technique.

1864, but subsequently acted with the Democratic party. Mr. Dougherty's lectures on "The Stage," and "Orators and Oratory," have been much admired. Among his noteworthy addresses is one delivered before the literary societies of Lafayette college, which was quoted and commented on by Lord Lytton in the house of commons (1859). He made the speech of welcome to President Lincoln at the Philadelphia union league in January, 1864, and the speech nominating Gen. Hancock for the presidency in the Democratic convention of 1880.

DOUGHTY, Thomas, artist, b. in Philadelphia, Pa., 19 July, 1793; d. in New York city, 24 July, 1856. He was apprenticed in his youth to a leather manufacturer, and afterward carried on the business in his own name. He painted in his leisure moments, without a master, and had received a quarter's tuition in India-ink drawing, when a growing taste for art induced him to adopt it as a profession about 1820. He painted for many years in the United States, and afterward in London and Paris, acquiring a high reputation by his paintings of American scenery. He was one of the earliest American artists to make evident the charm of what is called the "silvery tone," and to reproduce autumnal effects with genuine grace and emphasis. His works include "A Peep at the Catskills"; "View on the Hudson"; "Lake Scene"; "Old Mill"; "Delaware Water-Gap"; "Scene on the Susquehanna"; and "A View near Paris."

DOUGHTY, William Henry, surgeon, b. in Augusta, Ga., 5 Feb., 1836. He received an academical education in Augusta, was graduated at the medical department of the University of Georgia in 1855, and in the same year began practice in Augusta, giving especial attention to gynecology. From March, 1862, till April, 1865, he served as a surgeon in the Confederate army, being exclusively employed in hospital duty. He was surgeon-in-charge in the general hospital at Macon, Ga., in Walker's division hospital at Lauderdale Springs, Miss., and at the second Georgia hospital at Augusta, where he was engaged from October, 1863, till the close of the war. In the course of this long service he tied the subclavian artery at its external third twice, which operations have passed into the permanent records of military surgery. From 1867 till 1875 he three times held the professorship of materia medica and therapeutics in the medical college of Georgia (now the medical department of the State university). He is a member of numerous medical and health associations, and in 1887 was made a member of the international medical congress. His contributions to medical journals have been numerous, and embrace a wide range of subjects, professional and otherwise.

DOUGLAS, Amanda Minnie, author, b. in New York city, 14 July, 1838. She was educated at the city institute in New York, removed to Newark, N. J., in 1853, and afterward read English literature, history, and various other branches with a private tutor. In early childhood she had the gift of narration, and amused the neighboring children with stories that would be continued for weeks. At eighteen years of age she was about beginning the study of designing and engraving, when illness in the family prevented. For a number of years she was chiefly devoted to nursing the sick, and while at the bedside gave her leisure moments to writing. She participated in planning several inventions, patenting one herself, a folding frame for a mosquito-net, to be used by travellers, artists, and others. Of her early efforts in writing she says: "I had no thought of becoming a novelist, as I was so interested in other pursuits; but this path seemed to open, and others proved quite impossible, as I could not leave my home." She has lived in comparative retirement since childhood, in Newark, N. J., and its suburbs, and is author of the following stories: "In Trust" (Boston, 1866); "Claudia" (1867); "Stephen Dane" (1867); "Sydnie Adriance" (1868); "With Fate Against Him" (New York, 1870); "Kathie's Stories for Young People" (6 vols., Boston, 1870–'1); "Lucia: Her Problem" (New York, 1871); "Santa Claus Land" (Boston, 1873); "Home Nook" (1873); "The Old Woman who Lived in a Shoe" (1874); "Seven Daughters" (1874); "Nelly Kinnard's Kingdom" (1876); "From Hand to Mouth" (1877); "Hope Mills" (1879); "Lost in a Great City" (1880); "Whom Kathie Married" (1883); "Floyd Grandon's Honor" (1883); "Out of the Wreck" (1884); "A Woman's Inheritance" (1885); "Foes of Her Household" (1886).

DOUGLAS, Sir **Charles,** British naval officer, b. in Scotland; d. in 1789. After being for some time in the service of Holland he entered the British navy, and at the beginning of the American war had command of the squadron destined for the Gulf of St. Lawrence. In the spring of 1776 he forced his way up that river, through fields of drifting ice, and for the timely relief of his countrymen at Quebec received honors and promotion. In 1787 he was created a rear-admiral. Sir Charles introduced the mode of firing guns on board ships by means of locks instead of matches.—His son, Sir **Howard,** soldier, b. in Gosport, England, 1 July, 1776; d. in England, 8 Nov., 1861, entered the British army early in life, and served in Portugal and Spain in 1808–'12. He was appointed governor of New Brunswick in 1823, and remained there until 1829. During his term of office he constructed military roads, established schools, and displayed a deep interest in the Presbyterian church and collegiate instruction. He was, in fact, the energetic promoter of the material, educational, and religious interests of the province. On his return to England he was made lord high commissioner of the Ionian Islands (1835–'40), and represented Liverpool in parliament from 1842 till 1847. He was promoted to the rank of general in 1851. His scientific attainments were large, and his "Treatise on Naval Gunnery" (1819), which was approved by the admiralty, is considered an authority. He was also the author of an "Essay on Military Bridges" (1816), and other works on fortifications and gunnery.

DOUGLAS, David, botanist, b. at Scone, Perthshire, Scotland, in 1798; d. in the Hawaiian Islands, 12 July, 1834. He was employed in the botanic garden of the University of Glasgow, where he attracted the notice of Dr. (afterward Sir William) Hooker, who procured for him an appointment as botanical collector in the United States to the Horticultural society of London. In this capacity he travelled extensively in America, extending his researches in 1824 as far as Oregon and California, exploring Columbia river and parts of California, and in 1827 traversing the continent from Fort Vancouver to Hudson bay, where he met Sir John Franklin, and returned with him to England, having many valuable acquisitions for English flower-gardens. After a second visit, when on a similar mission to Columbia river in 1829, he went to the Hawaiian Islands, where he was killed in 1834. Through his agency 217 new species of plants were introduced into England, and he collected 800 specimens of the California flora. A gigantic species of pine, which he discovered in California, is named *Pinus Douglassii*.

DOUGLAS, George, Canadian clergyman, b. at Ashkirk, Roxburghshire, Scotland, in October, 1825. In 1832 the family removed to Canada, and made their home in Montreal. After being apprenticed to a blacksmith, attending a private school, and serving in a book store, he entered into partnership with his brother, a carpenter and builder. He had become an insatiable reader, possessing a natural gift of eloquence and a polished diction unusual for his age, and enrolled himself as a student of medicine. Uniting with the Methodist church, he became a class-leader, a local preacher, and a probationer for the ministry, and in 1849 went to England to attend the Wesleyan theological college, but was at once sent as a missionary to the Bahamas. After his ordination in 1850, he was ordered to the Bermuda Islands, residing there eighteen months, until feeble health compelled him to resign, after which he returned to Canada and was engaged eleven years in the pulpit, and seven as the president of the Wesleyan college in Montreal. As a minister he was stationed three years in each of the cities, Kingston, Toronto, and Hamilton. The disadvantages of his youth made him a student through life, and he has given special attention to literature, philosophy, the natural sciences, and metaphysics. He is one of the first orators of his church in Canada. In 1869 the degree of LL. D. was conferred upon him by McGill university.

DOUGLAS, James, Canadian physician, b. in Brechin, Scotland, 20 May, 1800; d. in New York, 14 April, 1886. He received his early education in Aberdeen and Dumfries, and after a period of apprenticeship with a surgeon was appointed surgeon to a vessel bound for Greenland. Subsequently he passed two winters in study in Edinburgh, and in 1820 was admitted to the Royal college of surgeons of that city, and soon afterward to the Royal college of surgeons, London. After serving in India as assistant surgeon of the Indian army, and in the fatal expedition to the Mosquito territory, from the coast of which he was rescued and taken to Havana, he came to New York in 1824, and after a short residence there and in Utica was appointed lecturer on anatomy to the Auburn medical institution. In 1826 he arrived in Quebec, and during the succeeding twenty-five years practised there, attaining the highest rank as a surgeon and physician. In 1845 he, together with Drs. Marrin and Frémont, founded the lunatic asylum at Beauport, near Quebec, the institution being managed by Dr. Douglas. He was an enthusiastic traveller and antiquarian.

DOUGLAS, Sir **James,** colonial governor, b. in Demerara, British Guiana, 14 Aug., 1803; d. in Victoria, British Columbia, 2 Aug., 1877. He was the son of a poor Scotchman, who had emigrated to the colony a short time previous to his birth, and was early left an orphan. At the age of twelve he set out with an elder brother to push his fortunes in the British possessions of North America. At that time the rivalry between the Hudson Bay and North-west companies was very keen. Young Douglas entered the service of the latter, bringing to his duties remarkable powers of endurance, an iron constitution, and a resolute spirit. He soon displayed prudence, determination, and executive capacity in the arduous service in which he was engaged, and his business ability and the tact that he exhibited in his intercourse with the Indians secured him rapid advancement. After the consolidation of the rival companies, he was appointed chief factor, the duties of which office compelled him to visit the remotest outposts and undergo many hardships. He was once captured and held for weeks by a tribe of Indians. Having at length succeeded in escaping, he made his way back after much suffering to one of the company's forts. He had for some time been given up as dead. In 1833 he was appointed to the chief agency for the region west of the Rocky mountains. In 1843, his headquarters being at Fort Vancouver, Oregon territory, a company of forty men landed by his orders at what is now Victoria (called Tsomus by the natives), and negotiations were concluded for the erection of a fort. In 1851 he became governor of the infant colony, and in 1857 his commission was renewed for a further period of six years. In 1859 Vancouver Island was constituted a crown colony, with Victoria as its capital, and Mr. Douglas was appointed governor, and received the dignity of C. B. British Columbia having been organized as a colony the year previous, and the governorship also vested in Mr. Douglas, he exercised the arduous and responsible duties of his double office so well that in 1863 he was knighted. The following year he retired from public life, on the expiration of his term of office, and, after making the tour of Europe, returned to end his days in the land for which he had done so much. He married in 1827, and for some years his eldest and only surviving son represented Victoria in the provincial legislature.

DOUGLAS, John Hancock, physician, b. in Waterford, Saratoga co., N. Y., 5 June, 1824. He was graduated at Williams in 1843, and in the medical department of the University of Pennsylvania in 1847. He sailed for Europe in 1849, and, after spending the intervening period in study and travel, returned in 1851, but again visited Europe in 1854 and in 1868. He had in the meantime begun to practice in New York city, where from 1856 till 1862 he edited twelve volumes of the "American Medical Monthly," and from 1865 till 1866 three volumes of the "New York Medical Journal," then a monthly, but now a weekly publication. He has also contributed to the columns of the "New Orleans Medical and Surgical Journal," the "New Orleans Hospital Gazette," the "Boston Medical and Surgical Journal," and other periodicals. Dr. Douglas was the attending physician of Gen. U. S. Grant from 22 Oct., 1884, till the death of the latter, 23 July, 1885.

DOUGLAS, Silas Hamilton, chemist, b. in Fredonia, N. Y., 16 Oct., 1816. He was educated at the academy in Fredonia, and then entered the office of Dr. Zina Pitcher in Detroit, Mich., for the study of medicine, after which he was graduated in Baltimore as a physician, and entered on the practice of his profession in Dearborn, Mich. In 1844 he was appointed instructor in chemistry in the University of Michigan, and at once was given charge of that department, Dr. Douglas Houghton, the professor of chemistry, being absent in the prosecution of the geological survey of Michigan. Two years later he was elected professor of chemistry, and took part in the establishment of the department of medicine, which was organized in 1848. He secured at that time the promise of a chemical laboratory in the medical department, but its fulfilment was delayed until 1856, when he was given a separate building, provided with tables for twenty-six students, at a time when few of the older colleges of this country, and not many universities in Europe, were supplied with laboratories. Dr. Douglas served in charge of the chemical department of the University of Michigan for thirty-three years, during which time his labors were directed to the establishment of a laboratory of

instruction, as the object of his life, a purpose in which he was eminently successful. As a result of his efforts the laboratory through successive enlargements reached a capacity for 270 students in 1880. He has been connected with various scientific societies, both as active and corresponding member. His publications include, "Tables for Qualitative Chemical Analysis" (Ann Arbor, 1864); and, jointly with Prof. Albert B. Prescott, "Qualitative Chemical Analysis" (New York, 1873; 3d ed., 1880).

DOUGLAS, Stephen Arnold, statesman, b. in Brandon, Vt., 23 April, 1813; d. in Chicago, Ill., 3 June, 1861. His father, a graduate of Middlebury college and a young physician of high standing, died suddenly when Stephen was two months old, and the widow with her two children retired to a farm near Brandon. Here her son lived with her until he was fifteen years of age, attending school during the three winter months and working on the farm the remainder of the year. Determined then to earn his own living, he went to Middlebury and became an apprentice at cabinet-making. This trade he followed for about eighteen months, when he was forced to abandon it on account of impaired health. He then attended the academy at Brandon for about a year. In the autumn of 1830 he moved to New York state with his mother, who had married Gehazi Granger, of Ontario county, and attended the academy at Canandaigua until December, 1832, when he began the study of law; but, finding that his mother would be unable to support him through the long course of legal studies prescribed by the state, he determined upon going to the west, and on 24 June, 1833, set out for Cleveland, Ohio, where he was dangerously ill with fever for four months. He then visited Cincinnati, Louisville, St. Louis, and Jacksonville, Ill., but failed to obtain employment. Finding his money exhausted, he walked to Winchester, where he arrived at night with only thirty-seven and a half cents. Here he secured three days' employment as clerk to an auctioneer at an administrator's sale, and was paid six dollars. During the sale he made so favorable an impression that he at once obtained a school of about forty pupils, whom he taught for three months. During this time he studied law at night, and on Saturdays practised before justices of the peace.

In March, 1834, he removed to Jacksonville, obtained his licence, and began the regular practice of law. Two weeks thereafter he addressed a large Democratic meeting in defence of Gen. Jackson's administration. In a short sketch of his early life, written in 1838, from which the foregoing facts have been taken, Mr. Douglas thus spoke of this event: "The excitement was intense, and I was rather severe in my remarks upon the opposition. . . . The next week the 'Patriot,' the organ of the opposition, devoted two entire columns to me and my speech, and continued the same course for two or three successive weeks. The necessary consequence was that I immediately became known to every man in the county, and was placed in such a situation as to be supported by one party and opposed by the other. . . . Within one week thereafter I received for collection demands to the amount of thousands of dollars from persons I had never seen or heard of. . . . How foolish, how impolitic, the indiscriminate abuse of political opponents whose humble condition or insignificance prevents the possibility of injury, and who may be greatly benefited by the notoriety thus acquired! . . . Indeed, I sincerely doubt whether I owe most to the kind and efficient support of my friends (and no man similarly situated ever had better and truer friends), or to the violent, reckless, and imprudent opposition of my enemies." During the remainder of the canvass Mr. Douglas bore a prominent part, and on the assembling of the legislature, although not yet twenty-two years of age, he was elected attorney-general, an officer who then, in addition to his other duties, rode the metropolitan circuit. His opponent was Gen. John J. Hardin. This office he resigned in December, 1835, having been elected to the lower house of the legislature, of which he was the youngest member. The mental vigor and capacity he there displayed, in striking contrast with his physical frame, which was then very slight, won for him the title of the "Little Giant," which followed him through life. In 1837 he was appointed register of the land-office at Springfield. In 1838 he was the Democratic candidate for congress; but his opponent was declared elected by a majority of five votes. Over fifty votes cast for Mr. Douglas were rejected by the canvassers because his name was misspelled. In December, 1840, he was appointed secretary of state of Illinois, and in the following February elected a judge of the supreme court. Here his decision of character was shown in the trial of Joseph Smith, the Mormon prophet. A mob had taken possession of the court-room, intending to lynch the prisoner, and the officers of the court appeared powerless. In this emergency Judge Douglas saw a bystander idly looking on whose great strength and desperate courage were well known. Above the shouts of the rioters rose the voice of the judge appointing this man a special officer, and directing him to select his deputies and clear the court-room. In ten minutes order was restored.

In 1843 Judge Douglas was elected to congress by a majority of 400, and he was re-elected in 1844 by 1,900, and again in 1846 by over 3,000; but before the term began he was chosen U. S. senator, and took his seat in the senate, 4 March, 1847. He was re-elected in 1852 and 1858, and had served fourteen years in that body at the time of his death. His last senatorial canvass was remarkable from his joint discussions with Abraham Lincoln. Each was conceded to be the leader of his party and the fittest exponent of its principles, and the election of one or the other to the senate was the real issue of the contest, which was for members of the legislature. Mr. Buchanan's administration was understood to be hostile to Mr. Douglas. The result of the election showed a Republican popular majority of 4,000; but the Democrats returned a majority of eight members to the legislature, which secured Senator Douglas's re-election. In 1852, at the Democratic national convention in Baltimore, he was strongly supported for the presidential nomination, receiving a plurality on the thirtieth ballot. In 1856 he was again a candidate at the Democratic national convention in Cincinnati, his friends

throughout the convention controlling more than enough votes to prevent any nomination under the two-third rule. On the sixteenth ballot he received 121 votes; but, as he was opposed to the principle of the two-third rule, he at once withdrew in favor of Buchanan, who had received a majority, thus securing his nomination. At the Democratic national convention in Charleston in 1860, on the first ballot he received 145½ votes out of 252½ cast. On the twenty-third ballot he received 152½ votes, which was not only a large majority of the votes cast, but also a majority of all those entitled to representation. The convention having adjourned to Baltimore, he received on the first ballot 173½ out of 190½ votes cast. On the second ballot he received 181½ votes out of 194½, and his nomination was then made unanimous. The seceding delegates nominated John C. Breckenridge. Abraham Lincoln was the nominee of the Republican party, and John Bell of the Constitutional Union party. Of the electoral votes only twelve were cast for Douglas, although he received 1,375,157 of the popular votes, distributed through every state in the Union. Mr. Lincoln received 180 electoral votes and 1,866,352 popular votes. From the age of twenty-one till his death, with the exception of about two years, Mr. Douglas's entire life was devoted to the public service. During his congressional career his name was prominently associated with numerous important measures, many of which were the offspring of his own mind or received its controlling impress. In the house of representatives he maintained that the title of the United States to the whole of Oregon up to latitude 54° 40′ N. was "clear and unquestionable." He declared that he "never would, now or hereafter, yield up one inch of Oregon either to Great Britain or any other government." He advocated the policy of giving notice to terminate the joint occupation, of establishing a territorial government over Oregon protected by a sufficient military force, and of putting the country at once in a state of preparation, so that if war should result from the assertion of our just rights we might drive "Great Britain and the last vestiges of royal authority from the continent of North America, and make the United States an ocean-bound republic." In advocating the bill refunding the fine imposed on Gen. Jackson by Judge Hall, he said: "I maintain that, in the exercise of the power of proclaiming martial law, Gen. Jackson did not violate the constitution nor assume to himself any authority not fully authorized and legalized by his position, his duty, and the unavoidable necessity of the case. . . . His power was commensurate with his duty, and he was authorized to use the means essential to its performance. . . . There are exigencies in the history of nations when necessity becomes the paramount law, to which all other considerations must yield." Gen. Jackson personally thanked Mr. Douglas for this speech, and a copy of it was found among Jackson's papers endorsed by him: "This speech constitutes my defence." Mr. Douglas was among the earliest advocates of the annexation of Texas, and, after the treaty for that object had failed in the senate, he introduced joint resolutions having practically the same effect. As chairman of the committee on territories in 1846, he reported the joint resolution by which Texas was declared to be one of the United States, and he vigorously supported the administration of President Polk in the ensuing war with Mexico. He was for two years chairman of the committee on territories in the house (then its most important committee in view of the slavery question), and became chairman of the same committee in the senate immediately upon entering that body. This position he held for eleven years, until removed in December, 1858, on account of his opposition to some of the measures of President Buchanan's administration. During this time he reported and carried through the bills organizing the territories of Minnesota, Oregon, New Mexico, Utah, Washington, Kansas, and Nebraska, and also those for the admission of the states of Iowa, Wisconsin, California, Minnesota, and Oregon.

On the question of slavery in the territories he early took the position, which he consistently maintained, that congress should not interfere, but that the people of each state and territory should be allowed to regulate their domestic institutions to suit themselves. In accordance with this principle he opposed the Wilmot proviso when it passed the house of representatives in 1847, and afterward in the senate when it was offered as an amendment to the bill for the organization of the territory of Oregon. Although opposed to the principles involved in the Missouri compromise, he preferred, as it had been so long acquiesced in, to carry it out in good faith rather than expose the country to renewed sectional agitation; and hence, in August, 1848, he offered an amendment to the Oregon bill, extending the Missouri compromise line to the Pacific ocean, thus prohibiting slavery in all the territory north of the parallel of 36° 30′, and by implication tolerating it south of that line. This amendment was adopted in the senate by a large majority, receiving the support of every southern and several northern senators; but was defeated in the house by nearly a sectional vote. This action of the house of representatives, which Mr. Douglas regarded as a practical repudiation of the principle of the Missouri compromise, together with the refusal of the senate to prohibit slavery in all the territories, gave rise to the sectional agitation of 1849–'50, which was temporarily quieted by the legislation known as the "compromise measures of 1850," the most famous of which was the fugitive-slave law (see CLAY, HENRY, vol. i., page 644). Mr. Douglas strongly supported these measures, the first four having been originally reported by him from the committee on territories. The two others, including the fugitive-slave law, were added by the committee of thirteen, and the measures were reported back by its chairman, Henry Clay. On his return to Chicago, the city council passed resolutions denouncing him as a traitor, and the measures as violations of the law of God and of the constitution; enjoining the city police to disregard the laws, and urging the citizens not to obey them. The next evening a large meeting of citizens was held, at which it was resolved to "defy death, the dungeon, and the grave," in resistance to the execution of the law. Mr. Douglas immediately appeared upon the stand, and announced that on the following evening he would speak at the same place in defence of his course. Accordingly, on 23 Oct., he defended the entire series of measures in a speech in which he defined their principles as follows: "These measures are predicated upon the great fundamental principle that every people ought to possess the right of framing and regulating their own internal concerns and domestic institutions in their own way. . . . These things are all confided by the constitution to each state to decide for itself, and I know of no reason why the same principle should not be extended to the territories." This constituted the celebrated doctrine of "Popular Sovereignty," sometimes called by its opponents "squatter sovereignty" (see BUTTS,

Isaac). At the close of his speech the meeting unanimously resolved to sustain all the compromise measures, including the fugitive-slave law, and on the following evening the common council repealed their nullifying resolutions by a vote of twelve to one. In December, 1853, Mr. Douglas reported his celebrated bill to organize the territories of Kansas and Nebraska, which formed the issues upon which the Democratic and Republican parties became arrayed against each other. The passage of this bill caused intense excitement in the non-slaveholding states, and Mr. Douglas, as its author, was bitterly denounced. He said that he travelled from Washington to Chicago by the light of his own burning effigies. The controversy turned upon the following provision repealing the Missouri compromise: "Which, being inconsistent with the principle of non-intervention by congress with slavery in the states and territories, as recognized by the legislation of 1850 (commonly called the compromise measures), is hereby declared inoperative and void; it being the true intent and meaning of this act not to legislate slavery into any territory or state, nor to exclude it therefrom, but to leave the people thereof perfectly free to form and regulate their domestic institutions in their own way, subject only to the constitution of the United States." In the congressional session of 1857–'8 he denounced and opposed the Lecompton constitution, on the ground that "it was not the act of the people of Kansas, and did not embody their will."

Mr. Douglas was remarkably successful in promoting the interests of his own state during his congressional career. In 1848 he introduced and procured the passage of the bill granting to the state of Illinois the alternate sections of land along the line of the Illinois Central railroad, which so largely contributed to developing the resources and restoring the credit of the state. He was one of the earliest and warmest advocates of a railroad to the Pacific. In foreign policy he opposed the treaty with England limiting the territory of Oregon to the forty-ninth parallel. He also opposed the Trist peace treaty with Mexico. He opposed the ratification of the Clayton-Bulwer treaty, chiefly because it pledged the faith of the United States never to annex, colonize, or exercise dominion over any part of Central America. He maintained that the isthmus routes must be kept open as highways to the American possessions on the Pacific; that the time would come when the United States would be compelled to occupy Central America; and declared that he would never pledge the faith of the republic not to do in the future what its interests and safety might require. He also declared himself in favor of the acquisition of Cuba whenever it could be obtained consistently with the laws of nations and the honor of the United States.

In 1855 he introduced a bill for the relief of the U. S. supreme court, giving circuit-court powers to the district courts, requiring all the district judges in each circuit to meet once a year as an intermediate court of appeals under the presidency of a justice of the supreme court, and providing for appeals from the district courts to these intermediate courts, and thence to the supreme court, in cases involving large amounts. In 1857 he declared that the only solution of the Mormon question in Utah was to "repeal the organic act absolutely and unconditionally, blotting out of existence the territorial government, and bringing Utah under the sole and exclusive jurisdiction of the United States government."

In 1858, and again in 1860, he visited the southern states, and made many speeches. Everywhere he boldly denied the right of secession, and maintained that, while this was a union of sovereign states independent in all local matters, they were bound together in an indissoluble compact by the constitution, which established a national government inherently possessing all powers essential to its own preservation. During the exciting session of 1860–'1, Mr. Douglas, as a member of the committee of thirteen, and on the floor of the senate, labored incessantly to avert civil war by any reasonable measures of adjustment, but at the beginning of hostilities he threw the whole weight of his influence in behalf of the Union, and gave Mr. Lincoln's administration an unfaltering support. In public speeches he denounced secession as crime and madness, and declared that, if the new system of resistance by the sword and bayonet to the result of the ballot-box shall prevail in this country, "the history of the United States is already written in the history of Mexico." He said that "no one could be a true Democrat without being a patriot." In an address to the legislature of Illinois, delivered at its unanimous request, he urged the oblivion of all party differences, and appealed to his political friends and opponents to unite in support of the government. In a letter dictated for publication during his last illness, he said that but one course was left for patriotic men, and that was to sustain the government against all assailants. On his death-bed his last coherent words expressed an ardent wish for the preservation of the Union, and his dying message to his sons was to "obey the laws and uphold the constitution."

Mr. Douglas was somewhat below the middle height, but strongly built, and capable of great mental and physical exertion. He was a ready and powerful speaker, discarding ornament in favor of simplicity and strength. Few equalled him in personal influence over the masses of the people, and none inspired more devoted friendship. While considering it the duty of congress to protect the rights of the slaveholding states, he was opposed to slavery itself. His first wife was the only child of a large slave-holder, who in his last will provided that, if Mrs. Douglas should die without issue, all her slaves should be freed and removed to Liberia at the expense of her estate, saying further that this provision was in accordance with the wishes of Judge Douglas, who would not consent to own a slave. He married, 7 April, 1847, Martha, daughter of Col. Robert Martin, of Rockingham county, N. C., by whom he had three children, two of whom, Robert M. and Stephen A., both lawyers, are living (1887). She died 19 Jan., 1853. He married, 20 Nov., 1856, Adèle, daughter of James

Madison Cutts, of Washington, D. C., who is now the wife of Gen. Robert Williams, U. S. A. The spot on the bank of Lake Michigan in Chicago that Mr. Douglas had reserved for his future home was bought from his widow by the state, and there his remains lie under a magnificent monument begun by private subscriptions and completed by the state of Illinois. It is surmounted by a statue executed by Leonard Volk. His life was written by James W. Sheehan (New York, 1860), and by Henry M. Flint (Philadelphia, 1860).

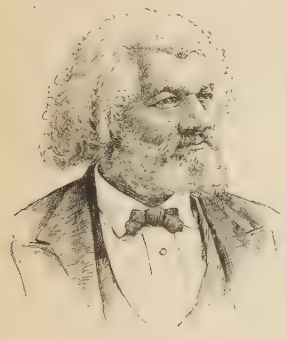
DOUGLAS, William, soldier, b. in Plainfield, Conn., 17 Jan., 1742; d. in Northford, Conn., 28 May, 1777. At sixteen years of age he enlisted among the troops furnished by Connecticut to serve in the French war. He was present at the taking of Quebec, and by 1763 had attained the rank of sergeant. He then removed to New Haven, became a sailor, and in a few years was master of a West India merchantman. Before the Revolution he had made a fortune. After the battle of Lexington he raised a company, became its captain, and joined Montgomery's expedition against Canada. He did good service at the capture of St. John's and Chambly, in command of the flotilla on Lake Champlain, and on his return to New Haven was made major of one of the eight regiments raised by Connecticut early in 1776. He was commissioned colonel in June of that year, and took a prominent part in the disastrous campaign that ended with the evacuation of New York, distinguishing himself at the battles of Long Island and Harlem Plains. At the latter place his horse was shot under him, his clothes were riddled with bullets, and he received wounds that forced him to retire to a farm in Northford, where he died from their effects.—His brother, **John,** was commissioned lieutenant-colonel early in the war, rose to the rank of colonel, and finally to that of general, and served with distinction throughout the war.—William's grandson, **Benjamin,** manufacturer, b. in Northford, Conn., 3 April, 1816, worked on a farm and attended school till he was sixteen years old, when he became apprentice to his elder brother, William, a machinist, at Middletown, Conn. They formed a partnership in 1839, and in 1842 patented a revolving cistern stand-pump. Since that time over one hundred new patents on pumps have been granted to the brothers in this country and Europe. William Douglas died in 1858, and in 1859 a company was formed of which Benjamin became president. The company manufacture over twelve hundred styles of pumps, besides other hydraulic apparatus. They were awarded medals at Paris in 1867 and Vienna in 1873. Mr. Douglas was mayor of Middletown for several years, a republican presidential elector in 1860, and lieutenant-governor of the state in 1861–'2. He has been a trustee of Wesleyan university since 1862.

DOUGLASS, David, actor, b. in England about 1720; d. in Kingston, Jamaica, W. I. Mr. Douglass was a gentleman by birth and fortune, who had emigrated to Jamaica about 1750. Hither Lewis Hallam had transported his company after he found that the colonies could not yield a sufficient harvest in return for his labor, and here he formed a partnership with Mr. Douglass, who, after the death of Lewis Hallam, married his widow, and with her and the rest of the company visited the continent in 1758, where he established theatres successively in New York, Philadelphia, Newport, Perth Amboy, and Charleston, S. C., and between these localities he continued to travel, acting and superintending his company till congress closed the theatres by an act passed 24 Oct., 1774. After this he returned to Jamaica, and was appointed a judge. In early life he had been a printer, and on his return he became a partner in a thriving printing establishment, and received a valuable contract from the government. He accumulated a fortune of £25,000.—His wife, an actress, b. in England; d. in Philadelphia, Pa., in 1773. In her own country Mrs. Douglass had been an eminent actress at Goodman's Field's Theatre, London, as Mrs. Hallam, and was the leading actress of that threatre at the time of Garrick's first success. She came to America with her first husband, Lewis Hallam, in 1752, and made her first American appearance at Williamsburg, Va., 5 Sept., 1752, as Portia in the "Merchant of Venice." She first appeared in New York at the theatre in Nassau street, 17 Sept., 1753, as Lucinda in "The Conscious Lovers." She had fine talents, and her favorite parts were the pathetic. Mr. Dunlap says: "In his youth he had heard the old ladies of Perth Amboy speak almost in raptures of her beauty and grace, and especially of her pathos in her representation of Jane Shore." She retired from the stage in 1769.

DOUGLASS, David Bates, civil engineer, b. in Pompton, N. J., 21 March, 1790; d. in Geneva, N. Y., 19 Oct., 1849. He was graduated at Yale in 1813, in the same year was appointed a 2d lieutenant in the corps of engineers, U. S. army, entered upon duty at West Point as commander of sappers and miners, and later was superintendent of the post. In the war with Great Britain he commanded his company in 1814 on the northern frontier, participated in the battle of Niagara, joined Gen. Brown in that year, took part in the battle of Lundy's Lane, repaired Fort Erie under the guns of the enemy, and at its assault commanded a battery with such skill and gallantry that he was promoted 1st lieutenant and brevetted captain. On the extreme right of the American encampment, and near the lake shore, a strong work had been erected, and two guns *en barbette.* It was called Douglass battery, in honor of Lieut. David B. Douglass, of the engineer corps, under whose superintendence it was built. He was assistant professor of natural and experimental philosophy at West Point in 1819–'20, with the rank of captain. As astronomical surveyor he fulfilled several important commissions; later he became professor of mathematics, and in 1823 of civil and military engineering. In 1831 he resigned his professorship and his commission in the army, and became chief engineer of the Morris canal. His introduction of inclined planes in place of locks for canal navigation proved a success on the completion of the canal in 1832. Subsequent to this he held the professorship of natural philosophy and civil architecture in the University of the city of New York, and designed its collegiate building. In 1833 he began his surveys for supplying New York with water, and, in his first report, showed how to obtain it from the Croton river. He became the chief engineer in this work in 1835, but was superseded, after which he planned and laid out in 1838 Greenwood cemetery, resigning its superintendence in 1841 to accept the presidency of Kenyon college, Ohio. There he remained four years, when he returned to New York and laid out the Catholic cemetery in Albany, and the Protestant cemetery in Quebec. He also designed the supporting wall for Brooklyn Heights, and the supplying of that city with water. In 1848 he became professor of mathematics in Hobart college, Geneva, N. Y., which office he retained during the remainder of his life, at intervals delivering lectures on various subjects in colleges. He received the degree of

LL. D. At the request of the board of Greenwood cemetery, his remains were removed there, and an imposing monument raised to his memory on one of the heights nearest the entrance to the cemetery.

DOUGLASS, Frederick, orator, b. in Tuckahoe, near Easton, Talbot co., Md., in February, 1817. His mother was a negro slave, and his father a white man. He was a slave on the plantation of Col. Edward Lloyd, until at the age of ten he was sent to Baltimore to live with a relative of his master. He learned to read and write from one of his master's relatives, to whom he was lent when about nine years of age. His master allowed him later to hire his own time for three dollars a week, and he was employed in a ship-yard, and, in accordance with a resolution long entertained, fled from Baltimore and from slavery, 3 Sept., 1838. He made his way to New York, and thence to New Bedford, Mass., where he married and lived for two or three years, supporting himself by day-labor on the wharves and in various workshops. While there he changed his name from Lloyd to Douglass. He was aided in his efforts for self-education by William Lloyd Garrison. In the summer of 1841 he attended an anti-slavery convention at Nantucket, and made a speech, which was so well received that he was offered the agency of the Massachusetts anti-slavery society. In this capacity he travelled and lectured through the New England states for four years. Large audiences were attracted by his graphic descriptions of slavery and his eloquent appeals. In 1845 he went to Europe, and lectured on slavery to enthusiastic audiences in nearly all the large towns of England, Ireland, Scotland, and Wales. In 1846 his friends in England contributed $750 to have him manumitted in due form of law. He remained two years in Great Britain, and in 1847 began at Rochester, N. Y., the publication of "Frederick Douglass's Paper," whose title was changed to "The North Star," a weekly journal, which he continued for some years. His supposed implication in the John Brown raid in 1859 led Gov. Wise, of Virginia, to make a requisition for his arrest upon the governor of Michigan, where he then was, and in consequence of this Mr. Douglass went to England, and remained six or eight months. He then returned to Rochester, and continued the publication of his paper. When the civil war began in 1861 he urged upon President Lincoln the employment of colored troops and the proclamation of emancipation. In 1863, when permission was given to employ such troops, he assisted in enlisting men to fill colored regiments, especially the 54th and 55th Massachusetts. After the abolition of slavery he discontinued his paper and applied himself to the preparation and delivery of lectures before lyceums. In September, 1870, he became editor of the "New National Era" in Washington, which was continued by his sons, Lewis and Frederick. In 1871 he was appointed assistant secretary to the commission to Santo Domingo; and on his return President Grant appointed him one of the territorial council of the District of Columbia. In 1872 he was elected presidential elector at large for the state of New York, and was appointed to carry the electoral vote of the state to Washington. In 1876 he was appointed U. S. marshal for the District of Columbia, which office he retained till 1881, after which he became recorder of deeds in the District, from which office he was removed by President Cleveland in 1886. In the autumn of 1886 he revisited England, to inform the friends he had made as a fugitive slave of the progress of the African race in the United States, with the intention of spending the winter on the continent and the following summer in the United Kingdom. His published works are entitled "Narrative of my Experience in Slavery" (Boston, 1844); "My Bondage and my Freedom" (Rochester, 1855); and "Life and Times of Frederick Douglass" (Hartford, 1881).



DOUGLASS, Margaret Crittenden, educator, b. in Washington, D. C. She removed at an early age to Charleston, S. C., where she married, and in 1845 to Norfolk, Va. She opened a school for the instruction of colored children, but it was broken up by the authorities in 1853, and she herself was imprisoned for a month in the common jail. She published a "Personal Narrative," relating her experiences (Boston, 1854).

DOUGLASS, William, physician, b. in East Lothian, Scotland, about 1691; d. in Boston, Mass., 21 Oct., 1752. He came to this country in 1716, and settled in Boston in 1718. Although a skilful practitioner, he violently opposed inoculation for the prevention of small-pox. His prejudices were strong, and his language frequently intemperate. He wrote much on medical and political subjects, and proposed "a stamp duty upon all instruments used in law affairs" for revenue, but the suggestion lacked novelty. A town in Worcester county, Mass., of which he was the principal owner and benefactor, bears his name. His "Summary, or Historical Account of the British Settlements" (1748–'53, left incomplete at his death) is inaccurate, and records his private grievances as well as public affairs. He printed an almanac (1743–'4), entitled "Mercurius Novanglicanus," which is still valued for its chronology. Adam Smith called him "the honest and downright Dr. Douglass." He also wrote treatises on "Small-pox" (1722–'30); "A Practical History of a New Eruptive Miliary Fever which Prevailed in Boston in 1735–'6"; and a work on "Midwifery."

DOUTRELEAU, M., clergyman, b. in France about 1700. He was a missionary among the Illinois Indians, and in December, 1729, was compelled to go to New Orleans on business connected with his mission. He debarked at the mouth of the Yazoo in order to say mass, and while he was making preparations, a party of Indians approached the canoe and said they were Yazoos, friends of the French. Ignorant of the state of the country, the French were off their guard, and the only two that had their guns loaded fired at a flock of birds that flew past just as the missionary was beginning mass. This prevented them from reloading, all which was carefully observed by the Indians, and, although pagans, they knelt down behind the French. Just as Doutreleau intoned the *Kyrie*, the Indians fired, wounding him in both arms and killing one of his companions. Believing that he was now to die, he knelt and awaited the death-blow. The Indians did not rush on him, however, as he expected, but fired three times more at him,

and missed him. Regarding this as a divine interposition in his favor, he wrapped up the sacred vessels and ran for the canoe. His two companions, believing him dead, had put off; but he waded and swam out to them, and as he was climbing into the boat, turning to see if he was pursued, he received a charge of duck-shot in the mouth. They now began their flight down the river, Father Doutreleau steering. The Indians pursued them for more than an hour, and kept up an incessant fire, but without effect. At last, frightened by an old musket, which he kept pointing at them, they gave up the chase. As they drew near Natchez, several volleys were fired at them. The same occurred at the Tensas, where a canoe pursued them unsuccessfully. While they were passing the Tonicas, a boat put out after them, manned by their own countrymen. They were then brought to the little French army that was marching against the Natchez, which had halted among the Tonicas. Here they were attended to, and after a night's rest they proceeded to New Orleans. Father Doutreleau accomplished a journey of over a thousand miles through a hostile country. The officers of the French army admired his bravery, asked him to remain as their chaplain, and he accompanied them in this capacity on an expedition; but on their return he begged to go back among the Illinois Indians. He left New Orleans on 16 April, 1730.

DOUVILLE, Jean Baptiste, French naturalist, b. in Hanbie, France, 15 Feb., 1794; disappeared in South America about 1833. He travelled in Europe, South America, and Asia, landing at Genoa on his return in 1824. In 1826 he went to Paris, where he was made a member of the geographical society, and then sailed for Buenos Ayres. The river La Plata was at that time under blockade by the Brazilians, and the French vessel was captured while endeavoring to break the blockade; but Douville was befriended by the Brazilian admiral, and sent to Buenos Ayres, where, finding his resources nearly exhausted, he attempted to replenish them by mercantile operations. Accused of some fraudulent transactions of which he was acquitted, he left Buenos Ayres in disgust, and went to Rio Janeiro in August, 1827. A few weeks later he embarked for Congo, whence he returned to France in 1831. The stories of his discoveries in several kingdoms hitherto almost unknown to Europeans, and of his exploration of the Congo, or Zaire, and other rivers, aroused great enthusiasm among the Parisians. He received a medal from the geographical society; his researches were published under the title of "Voyage au Congo et dans l'Afrique équinoxiale" (4 vols., with a map, Paris, 1832), and his book and chart were used as the basis of subsequent maps of Africa. But the evident exaggerations of some of his statements soon awakened suspicion. The "Foreign Quarterly Review" assailed him as an impostor, and a few weeks later his deceptions were more fully exposed in the "Revue des deux mondes." To cover his shame by real discoveries, he sailed for Brazil in 1833, and penetrated to the interior of South America by the Amazon, where, according to an uncertain report, he was killed. Recent discoveries in Africa prove the truth of the accusation against him, although it is supposed that he reached the interior of that country, or at least that he obtained his information from Portuguese documents before unpublished; and some geographers of repute still credit a portion of his narrative.

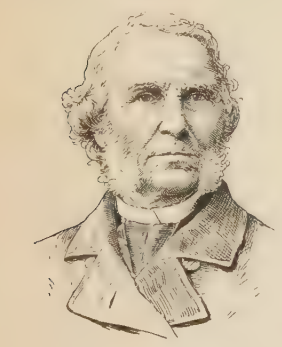
DOW, Daniel, clergyman, b. in Ashford, Conn., 19 Feb., 1772; d. in Thompson, Conn., 19 July, 1849. He was graduated with honor at Yale in 1793, studied theology while teaching psalmody for a livelihood, and on 20 April, 1796, was ordained pastor of the Congregational church in Thompson, Conn. His discourses were never written, but were remarkable for their logical arrangement and clear and forcible style. He published "Familiar Letters to the Rev. John Sherman" (1806); "The Pedobaptist Catechism" (1807); a "Dissertation on the Sinaitic and Abrahamic Covenants" (1811); and "Free Inquiry Recommended on the Subject of Free Masonry" (1829).—His son, **Jesse Erskine,** b. in Thompson, Conn., 21 Jan., 1809, went to sea with Commodore Elliott in 1835, as professor of mathematics, and later became clerk in the United States patent office in Washington, D. C. He has been a correspondent of various periodicals, and written frequently in prose and verse. His literary productions have not been collected.

DOW, Lorenzo, clergyman, b. in Coventry, Conn., 16 Oct., 1777; d. in Georgetown, D. C., 2 Feb., 1834. In his youth he was disturbed by religious speculations until he accepted Methodist doctrines, and determined, in opposition to the wishes of his family, to become a preacher of that denomination, though his education was very limited. In 1796 he made an unsuccessful application for admission into the Connecticut conference; but two years later he was received, and in 1799 was appointed to the Cambridge circuit, N. Y. During the year he was transferred to Pittsfield, Mass., and afterward to Essex, Vt., but remained there only a brief time, as he believed he had a divine call to preach to the Catholics of Ireland. He made two visits to Ireland and England, in 1799 and 1805, and by his eccentric manners and attractive eloquence drew after him immense crowds, who sometimes indulged in a spirit of bitter persecution. He introduced camp-meetings into England, and the controversy about them resulted in the organization of the Primitive Methodists. In 1802 he preached in the Albany district, N. Y., "against atheism, deism, Calvinism, and Universalism." He passed the years 1803 and 1804 in Alabama, delivering the first Protestant sermon within the bounds of that state. In 1807 he extended his labors into Louisiana, and followed the settlers to the extreme borders of civilization. After 1799 he had no official relation to the ministry of the Methodist church, but continued to adhere to and to preach the prominent doctrines of that communion till his death. During his later years his efforts were more specially directed against the Jesuits, whom he regarded as dangerous enemies to pure religion and to republican government. His singularities of manner and of dress excited prejudices against him, causing him to be called "Crazy Dow," and counteracted the effect of his eloquence. Nevertheless he is said to have preached to more persons than any man of his time. Among his numerous writings are "Polemical Works" (New York, 1814); "The Stranger in Charleston, or the Trial and Confession of Lorenzo Dow" (Philadelphia, 1822); "A Short Account of a Long Travel, with Beauties of Wesley" (Philadelphia, 1823); "Journal and Miscellaneous Writings," edited by John Dowling (New York, 1836); and "History of a Cosmopolite, or the Writings of the Rev. Lorenzo Dow, containing his Experience and Travels in Europe and America up to near his Fiftieth Year; also his Polemic Writings" (Cincinnati, 1851; often reprinted).—His wife, **Peggy,** whom he married in 1804, accompanied him in all his travels.

DOW, Moses A., publisher, b. in Littleton, N. H., in 1810; d. in Charlestown, Mass., 22 June, 1886. He learned the printer's trade in Haverhill,

N. H., went to Boston in 1829, was foreman in his brother's printing-office for several years, and in 1840 established a job office. In 1850 he began the publication of the "Waverly Magazine," in which he published all the contributions of fiction and poetry that were offered by school-girls and other young writers. He began with no capital, printed without discrimination the articles of amateur authors, and was successful from the beginning, finding many readers among the friends of the numerous contributors. At one time he engaged an editor of taste and experience, who rejected many of the communications; but the circulation at once fell off, and the paper was restored to its original basis. He gave much thought and care to the typography and appearance of his magazine, and it obtained a wide circulation among young people of scanty education and immature taste in the factory towns of New England and throughout the western states. Before the civil war his income from the paper had reached $60,000 a year. The circulation for many years was 50,000 copies, but it afterward sank to 20,000. He built a fine hotel in Charlestown.

DOW, Neal, temperance reformer, b. in Portland, Me., 20 March, 1804. He is of Quaker parentage, attended the Friends' academy in New Bedford, Mass., and was trained in mercantile and manufacturing pursuits. He was chief engineer of the Portland fire department in 1839, and in 1851 and again in 1854 was elected mayor of the city. He became the champion of the project for the prohibition of the liquor traffic, which was first advocated by James Appleton in his report to the Maine legislature in 1837, and in various speeches while a member of that body. (See Appleton, James.) Through Mr. Dow's efforts, while he was mayor, the Maine liquor law, prohibiting under severe penalties the sale of intoxicating beverages, was passed in 1851. After drafting the bill, which he called "A bill for the suppression of drinking-houses and tippling-shops," he submitted it to the principal friends of temperance in the city, but they all objected to its radical character, as certain to insure its defeat. It provided for the search of places where it was suspected that liquors intended for sale were kept; for the seizure, condemnation, and confiscation of such liquors, if found; and for the punishment of the persons keeping them by fine and imprisonment. Notwithstanding the discouragement of friends, he went to the legislature, then in session at Augusta, had a public hearing in the hall of representatives, which was densely packed by the legislators and citizens of the town, and at the close of the hearing the bill was unanimously accepted by the committee. It was printed that night, was laid on the desks of the members the next morning, and on that day, the last of the session, was passed through all its stages, and was enacted without any change whatever. Mr. Dow was a member of the Maine legislature in 1858–'9. On 31 Dec., 1861, he was appointed colonel of the 13th Maine volunteers, and with his regiment he joined Gen. Butler's expedition to New Orleans. He was commissioned a brigadier-general of volunteers, 28 April, 1862, and placed in command of the forts at the mouth of the Mississippi, and afterward of the district of Florida. He was wounded twice in the attack on Port Hudson, 27 May, 1863, and taken prisoner while lying in a house near. After imprisonment for over eight months in Libby prison and at Mobile, he was exchanged. He resigned on 30 Nov., 1864. In 1857, and again in 1866 and 1874, Mr. Dow went to England at the invitation of the United Kingdom temperance alliance, and addressed crowded meetings in all the large cities. He has spent many years in endeavoring, by public speeches in the United States and Canada, as well as in Great Britain, and by frequent contributions to magazines and newspapers, to win the popular sanction for prohibitory legislation. In 1880 he was the candidate for the national prohibition party for president of the United States, and received 10,305 votes. In 1884 an amendment to the constitution of Maine was adopted by a popular vote of nearly three to one, in which it was declared that the manufacture, sale, and keeping for sale of intoxicating beverages was for ever forbidden, and commanding the legislature to enact suitable laws for the enforcement of the prohibition.



Neal Dow

DOWD, Patrick, Canadian clergyman, b. in the County Louth, Ireland, in 1813. He was educated at Newry and at Paris, where he went in 1832, and pursued his theological studies in the Irish college there. In 1837 he was ordained priest by Archbishop Quelen, of Paris, and soon afterward returned to Ireland, where he resided until 1847, being for a part of that time president of the diocesan seminary of Armagh. In 1848 he removed to Canada, and officiated as assistant to Father Connolly, the pastor of St. Patrick's church at Montreal, until 1856, when he was appointed pastor of the congregation. Soon after Father Dowd's arrival in Montreal he saw the necessity for an asylum for Irish orphans in that city, and in 1849 he established one. He was also mainly instrumental in securing the erection of the present St. Patrick's orphan asylum in Montreal, which was opened in November, 1851, and established in 1856 the night-refuge for the destitute and St. Bridget's home for the old and infirm, and in 1866–'7 he secured the erection of a commodious building on Lagauchetière street as a refuge for the poor. In 1877 he organized the great Irish Roman Catholic pilgrimage to Lourdes and Rome. He has been offered, on several occasions, the highest dignities of the church, and refused the offer of the bishopric of Toronto, or Kingston. He has been more thoroughly identified with the Irish Catholics of Montreal than any other clergyman.

DOWELL, Greensville, physician, b. in Albemarle county, Va., 1 Sept., 1822; d. in Galveston, Texas, in 1881. He was educated at the University of Louisville and at Jefferson medical college, and was graduated M. D. from the latter. After practising in various states he finally established himself in Galveston, Texas, and was for fifteen years preceding his death professor of surgery in the Texas medical college. He was a surgeon in the Confederate army, from 1863 to 1875 was editor and publisher of the "Galveston Medical Journal," originated the Dowell system for the treatment of hernia, and was the author of several books on that subject and yellow fever.

DOWLER, Bennet, physician, b. in Elizabeth (now Moundsville), Ohio co., Va., 16 April, 1797; d. in New Orleans in 1879. He was graduated M. D. at the University of Maryland in 1827, and settled in Clarksburg, Harrison co., Va., where he was postmaster for four years, but in 1836 he removed to New Orleans, and was for a few years editor of the New Orleans "Medical and Surgical Journal." Early in his career he began experimenting upon the human body, immediately or soon after death, and the results of his investigations, comprising some important discoveries relative to contractibility, calorification, capillary circulation, etc., were published in 1843–'4. Since then these and other original experiments have been extended and generalized by him. His researches on animal heat, in health, in disease, and after death, which have been published in various medical journals, have disclosed the fact that post-mortem calorification after death from fever, cholera, sunstroke, etc., rises in some cases much higher than its antecedent maximum during the progress of the trouble. Dr. Dowler began in 1845 a series of experiments in comparative physiology on the alligator of Louisiana, which led him to conclude that, after decapitation, the head and, especially, the trunk afford evidences of possessing the faculties of sensation and motion for hours, and that the headless trunk, deprived of all the senses but that of feeling, still retains the powers of perception and volition, and may act with intelligence in avoiding an irritant. As the result of those discoveries, he held that the functions and structure of the nervous system constitute a unity inconsistent with the assumption of four distinct and separate sets of nerves, and a corresponding four-fold set of functions. He was a fellow and founder of the Royal society of northern antiquities, Copenhagen, a permanent member of the American medical association, and founded the New Orleans academy of sciences. He is the author of a "Tableau of the Yellow Fever of 1853" (1854), and various other contributions to medical science.

DOWLING, John, clergyman, b. in Pavensey, Sussex, England, 12 May, 1807; d. in Middletown, N. Y., 4 July, 1878. In an irregular way he acquired a classical education, and became a tutor in a classical institution in London in 1826. Three years later he established a boarding-school a few miles from Oxford, where he taught until 1832. In that year he emigrated to the United States and united with the Baptist church in Catskill, N. Y., where he was ordained. In 1834 he removed to Newport, R. I., and two years later was called to a church in New York. He afterward preached in Providence, Philadelphia, Newark, and other places. The degree of D. D. was conferred upon him by Transylvania university. Dr. Dowling's published works include "Vindication of the Baptists" (New York); "Exposition of the Prophecies" (1840); "Defence of the Protestant Scriptures" (1843); "History of Romanism" (1845), of which 30,000 copies were sold in less than ten years; "Power of Illustration"; "Nights and Mornings"; and "Judson Offering." He edited a Conference hymn-book (1868); Noel's work on "Baptism," the works of Lorenzo Dow, Conyer's "Middleton, on the Conformity of Popery and Paganism"; "Memoir of the Missionary Jacob Thomas"; and a translation from the French of Dr. Cote's work on "Romanism."

DOWNER, Samuel, manufacturer, b. in Dorchester, Mass., 8 March, 1807. He left school at the age of fourteen, and, after spending six years in a shipping house in Boston, was received into partnership by his father, a West India merchant. He afterward engaged in the manufacture of sperm oil and candles, and in 1854 directed a series of experiments in producing hydro-carbon oils by distillation from various substances. From a kind of bituminous coal known as Albertite he obtained what is now called kerosene. The demand for this oil increased rapidly, and it was obtained from the Albertite till the discovery of petroleum in Pennsylvania in 1861. Another result of these experiments, made principally by Mr. Joshua Merrill, superintendent of the Downer works, was the discovery in 1869 of "mineral sperm oil," and these and other products of the distillation of crude petroleum are manufactured by the company under Mr. Merrill's patents.

DOWNES, John, author, b. in Brooklyn, N. Y., 4 Sept., 1799; d. in Washington, D. C., 30 Sept., 1882. His father, John Downes, of New Haven, Conn., a descendant of one of the regicides of that name, died when his son was a few months old, and the mother removed to Shrewsbury, Mass. After his marriage, John removed to Boston and adopted music as a profession. He afterward became proficient as a wood-engraver and as a mathematician. After serving for a time on the board of the U. S. commission for the northeast boundary survey, he resided for a year or two in Worcester, and was engaged in making wood engravings for John W. Barber's historical collections. In 1842 Mr. Downes removed to Philadelphia, where he published the "U. S. Almanac," and other astronomical and mathematical works. He removed to Washington, D. C., in 1856, and for more than twenty years was employed as a computer for the U. S. coast survey. When the "U. S. Nautical Almanac" was established, Mr. Downes was the first to receive an appointment as a computer, and retained it till his death. He collected many rare books. He was the author of "Peter Parley's Almanacs for Old and Young" (1836–'7); "Botany" (Boston, 1840); United States "Almanac Complete, or Ephemeris" (Philadelphia, 1843–'4). He also calculated mathematical tables, but only a part of them have been published.

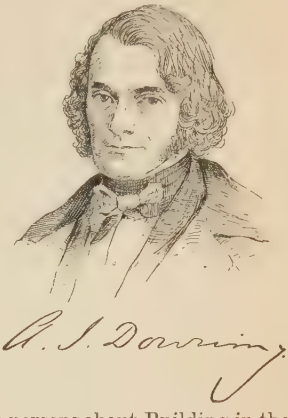
DOWNES, John, naval officer, b. in Canton, Mass., in 1786; d. in Charleston, S. C., 11 Aug., 1855. He entered the navy as a midshipman in June, 1802; was in the frigate "New York" during the war with Tripoli, and distinguished himself in a boat attack upon Tripolitan feluccas. In March, 1807, he was made a lieutenant, and in the war of 1812 he served as executive officer of the frigate "Essex," Capt. Porter, during her cruise in the Pacific. Among her numerous prizes was the whale-ship "Georgiana," which Capt. Porter fitted as a cruiser, with sixteen guns, named the "Essex Junior," and placed under the command of Lieut. Downes, who retained this place until the capture of the "Essex" and the conversion of the "Essex Junior" into a cartel, 28 March, 1814. He was promoted to the rank of master commandant in 1813, and two years later commanded the brig "Epervier" in the squadron employed against Algiers under Decatur, and captured, 17 June, 1815, the Algerine frigate "Nashouda." Two days afterward the "Epervier" and three of the smaller vessels of the squadron captured the Algerine brig of war "Estido," twenty-two guns and 180 men, off Cape Palos. After the conclusion of peace with Algiers, Decatur transferred Downes to his own ship, the "Guerrière." He became captain in March, 1817, and from 1819 till 1821 commanded the frigate "Macedonia" in the Pacific. In 1828–'9 he commanded the "Java"

in the Mediterranean, and from 1832 to 1834 the squadron in the Pacific. On his way to his station he attacked (6 Feb., 1832) and nearly destroyed Quallah Batoo, on the coast of Sumatra, where an outrage had been committed on an American vessel. His sea service terminated with his cruise. From 1837 till 1842, and from 1850 till 1852, he commanded the navy-yard at Boston. —His son, **John A.,** naval officer, b. in Massachusetts, 25 Aug., 1822; d. in New Orleans, 20 Sept., 1865, entered the navy on 4 Sept., 1837; became passed midshipman in 1843, lieutenant in 1851, and a commander in 1862. During the civil war he commanded the iron-clad "Nahant" at the bombardment of Fort McAlister, 3 March, 1863, and in the first attack upon Fort Sumter, 7 April, 1863. In the report of Rear-Admiral Dupont he is mentioned as one of those "who did everything that the utmost gallantry and skill could accomplish in the management of their untried vessels." He aided in the capture of the Confederate iron-clad "Atlanta." He was on special duty at Boston a short time, and was then given command of the Gulf squadron, in which service he died.

DOWNEY, John, educator, b. in Germantown, Pa., in 1770; d. in Harrisburg, 21 July, 1827. He received a classical education in the old academy at Germantown, and in 1795 opened a Latin and grammar school in Harrisburg. At this time he proposed, in a letter to Gov. Thomas Mifflin, a plan of education that foreshadows the present public-school system, which placed him in the front rank of early American educators. This plan was pronounced by Henry Barnard, of Connecticut, far in advance of the age in which he lived. He was the first cashier in the Harrisburg bank, was one of the corporators of the Harrisburg and Middletown turnpike company, and was largely instrumental in the erection of the bridge over the Susquehanna. In 1817 he was a member of the Pennsylvania legislature. He wrote frequently for the press, and was the author of a series of humorous sketches under the signature of "Simon the Wagoner." He compiled a work entitled "The Justice's Assistant."

DOWNIE, George, British naval officer, b. in Ross, Ireland; d. near Plattsburg, N. Y., 11 Sept., 1814. He was the son of a clergyman, and entered the navy at an early age. He was engaged in the battle of Camperdown, served in the West Indies, and in 1812 was placed in command of the British fleet on the lakes of Canada. He commanded the squadron in the battle of Plattsburg, and was killed while gallantly fighting the American fleet under Commodore Macdonough.

DOWNING, Andrew Jackson, horticulturist, b. in Newburgh, N. Y., 20 Oct., 1815; drowned in the Hudson, near Yonkers, 28 July, 1852. From an early age his tastes were directed to horticulture, botany, and the natural sciences, which the occupation of his father, a nurseryman, gave him opportunities to cultivate. His education was acquired chiefly in the academy of the neighboring town of Montgomery. At the age of sixteen he joined his brother in the management of the nursery, and began a course of self-education. He soon formed the acquaintance of Baron de Liderer, the Austrian consul-general, and other men, whose fine estates he visited, cultivating his taste for landscape-gardening, and writing descriptions of the scenery for the New York "Mirror" and other journals. In June, 1838, he married the daughter of John Peter de Wint, and in that year built an elegant mansion upon his estate, in the Elizabethan style, which was his first practical illustration of what an American rural home might be. His career as an author began with the publication of the "Treatise and Practise of Landscape-gardening" (New York, 1841), which was highly successful, orders for the construction of houses and decorations of grounds following the orders for copies of the book to his publishers. His "Cottage Residences" (1842) was received with equal favor, and established him as the chief American authority on rural art. "Fruit and Fruit-trees of America" was printed simultaneously in London and New York in 1845, and a second edition with colored plates in 1850. In 1846, Mr. Downing became editor of the Albany "Horticulturist," for which he wrote an essay each month until his death. In 1849 he wrote "Additional Notes and Hints to persons about Building in the Country," for an American reprint of Wightwick's "Hints to Young Architects." The summer of 1850 he spent in England, visiting the great country-seats, of which he wrote descriptions, and in that year published his "Architecture of Country Houses, including Designs for Cottages, Farm-houses, and Villas." His remaining work is an edition of Mrs. Loudon's "Landscape-gardening for Ladies." In 1851 he was commissioned to lay out and plant the public grounds of the Capitol, the White House, and the Smithsonian buildings. He was employed in these and other professional labors, when he set out for Newport, leaving Newburgh on 28 July, 1852, in the steamer "Henry Clay." The boat entered into a contest with the "Armenia," and when near Yonkers was discovered to be on fire. Mr. Downing perished in his efforts to save other passengers. His "Rural Essays" were collected and published in 1853, with a memoir by George William Curtis, and a "Letter to his Friends" by Frederika Bremer, who was Mr. Downing's guest during a portion of her visit to the United States, and an enthusiastic admirer of the man and his works.



DOWNING, Colonel, chief of the Cherokee Nation. After the death of his Indian wife he married, in 1871, Miss Ayers, a wealthy lady of Philadelphia, who removed with him to Talequah, devoting her life and fortune to the education of the Cherokees. She made her permanent home among the Indians, and adopted the son of the chief, Lewis Downing, for whom she built a handsome residence overlooking the village.

DOWNING, Fanny Murdaugh, poet, b. in Portsmouth, Va., about 1835. She is a daughter of John W. Murdaugh, who was a noted lawyer of Virginia. In 1851 she married Charles W. Downing, who was then secretary of the state of Florida. Her novels include "Nameless" (Raleigh, 1865); "Perfect through Suffering"; and "Florida," published in the "Southern Home Journal." Her best known poems are "Pluto, the Origin of Mint Julep, being the Sad and Lamentable Fate of the Fair Minthe" (1867); "The Legend of Catawba";

and "Dixie." She has written under the pen-names of "Viola" and "Frank Dashmore."

DOWNING, Sir **George**, British statesman, b. in Dublin, Ireland, in 1624; d. in East Hatley, Cambridgeshire, England, in 1684. His father emigrated to Salem, Mass., in 1638, and represented that place in the general court in 1638–'43. His wife was Lucy, a sister of Gov. Winthrop. The son was graduated at Harvard in 1642, returned to England in 1645, and became a preacher among the Independents; chaplain to Col. Okey's regiment in Cromwell's army, and in 1653 commissary-general and scoutmaster-general to the army in Scotland; member of parliament for a Scottish borough in 1654 and 1656, and agent in Holland in 1658–'60. Turning royalist, he was knighted by Charles II., 21 May, 1660. He was elected member of Parliament for Morpeth in 1661, and was again made envoy-extraordinary to Holland. Here he caused the arrest of Cols. Okey and Barksted, and Miles Corbet, three of the judges of Charles I., who were sent to England and executed. Principally through his agency the New Netherlands were wrested from the Dutch and annexed to the English possessions as New York. He was afterward secretary of the treasury and a commissioner of the customs. He was created a baronet, 1 July, 1663. In 1671 he was sent on a commission to Holland, but returned before completing his errand to the satisfaction of the king, and was imprisoned in the Tower, but was again received into favor. Gov. Bradstreet was his brother-in-law. Downing street, London, perpetuates his name. He was a man of ability and natural fitness for politics, and was author of "Political Tracts" (1664–'72).—His grandson, Sir **George**, d. in 1747, founded Downing college, Cambridge, England, in 1717.

DOWNING, Samuel, soldier, b. near Exeter, N. H., in 1766; d. near Amsterdam, N. Y., 18 Feb., 1867. He enlisted in the Continental army in 1780, and served for three years. He received a pension in 1818 of eight dollars a month, but this was taken from him in 1820 on account of his possession of property, and in 1828 was made $80 per annum, increased in 1864 by the addition of $100 per annum, and in 1865 by the further addition of $300 per annum. By special act of 18 Feb., 1867, the day of his death, Congress directed that he be paid a pension of $500 per annum.

DOWSE, Thomas, book-collector, b. in Charlestown, Mass., 28 Dec., 1772; d. in Cambridgeport, 4 Nov., 1856. He was called "the literary leather-dresser." His father, Eleazer Dowse, was a leather-dresser, and was driven with his family from Charlestown on 17 June, 1775, his house being one of those burned by the British forces. He settled at Sherburne, Middlesex co., where Thomas spent his youth, receiving no other education than that of the town school. On attaining his majority he entered the service of a leather-dresser at Roxbury, Mass., and remained in that employment for ten years. He once informed a friend that, at the age of twenty-eight, his highest income had been twenty-five dollars a month; that he had never paid five dollars for conveyance from one place to another; had never owned a pair of boots, but possessed several hundred volumes of good books well bound. In 1803 he set up in business as a leather-dresser at Cambridgeport, and pursued the occupation successfully till he was far advanced in life. From the earliest period he devoted a large part of his income to the purchase of books. Standing at his bench, he would buy books, speculate on philosophical truths, and discuss the great problems of existence. By diligent search, great knowledge of bibliography, shrewdness, and strict economy in his purchases, he amassed a remarkable library. It consisted of about 5,000 volumes in good, often elegant, binding, and of the best editions. It was mostly English, though containing translations of the principal authors in the ancient languages and the cultivated languages of modern Europe. The library was estimated to have cost $40,000. Mr. Dowse had a golden lamb in front of his store as a sign; and, when some Harvard students broke off its head, he was so irritated that he changed his will, by which he had intended to give property valued at $100,000 to Harvard, and bequeathed it instead to the Massachusetts historical society. His library was deposited in a special room in their building in Boston, and he left $10,000 as a permanent fund for its preservation and care. He was an admirer of Benjamin Franklin, and erected a monument to his memory in Mount Auburn cemetery. A collection of engravings and water-colors, which he drew in a lottery about 1820, was given to the Boston athenæum. Harvard gave him the degree of LL. D., which Edward Everett translated into "Literary Leather-Dresser."

DOX, Peter Myndert, lawyer, b. in Geneva, Ontario co., N. Y., 11 Sept., 1813. His maternal grandfather was John Nicholas, a representative in congress during the administrations of Washington and Adams. Peter was graduated at Hobart in 1833, studied law, and was admitted to practice. He was elected to the New York legislature in 1841, and was afterward chosen judge of the Ontario county courts. In 1855 he removed to Alabama, where he became a planter. He was elected to the convention that revised the state constitution in 1865, and took an active interest in restoring Alabama to its place in the Union. From 1869 till 1873 he was a member of congress, having been elected as a Union democrat, and served on the committee on banking and currency. He has held many minor offices, such as commissioner of schools, justice of the peace, etc. He is the author of numerous speeches in congress, including one delivered 6 June, 1870, on the admission of Georgia to the Union, the true condition of the south, and in favor of universal amnesty.

DOYLE, Sir **John**, British soldier, b. in Dublin, Ireland, in 1756; d. 8 Aug., 1834. He was graduated at Trinity college, Dublin, entered the army, and was a lieutenant of light infantry at Boston in 1775. He served as adjutant at the battles of Long Island and Germantown, captain of the volunteers of Ireland, then a major of brigade at the capture of Charleston, and in the battles of Camden and Hobkirk's Hill. In command of a corps of light cavalry, he operated against Gen. Marion in the spring of 1781, and destroyed his camp at Snow Island, but, being pursued by Marion, escaped with the loss of his baggage. He served in Holland in 1794, in 1796 was made a colonel, and was soon afterward appointed secretary of war in Ireland. He served as a brigadier-general with Abercrombie in Egypt in 1800, distinguished himself, and was made a baronet in 1805, and a full general in 1819.—His nephew, Sir **Charles Hastings**, British officer, b. about 1804. He entered the British army as an ensign in 1819, became captain in 1825, and colonel in 1854, serving in both the East and West Indies. He was on the staff as assistant adjutant-general and assistant quartermaster-general in 1847–'56, and served in the army of the Crimea. He was inspector-general of the militia of Ireland, 1856–'61, and was assigned to the command of the troops in Nova Scotia in the latter year. In 1867 he was made lieutenant-

general of that province upon the confederation of the provinces of British North America, being placed in command of her Majesty's forces in North America. For his services in these capacities he was knighted. In 1874 he was assigned to the command of the southern district of England; in 1860 he became a major-general, and in 1870 a lieutenant-general. He is also colonel of the 87th regiment (Royal Irish fusileers).

DRAKE, Benjamin M., clergyman, b. in North Carolina, 11 Sept., 1800; d. in Mississippi in 1860. He joined the Tennessee conference in 1820, and the next year was transferred to the Mississippi conference, in connection with which he attained a commanding position. He was instrumental in building the 1st Methodist church in New Orleans, was president of Elizabeth female academy, the first Methodist school established in that state, and was also president of Centenary college.

DRAKE, Daniel, physician, b. in Plainfield, N. J., 20 Oct., 1785; d. in Cincinnati, Ohio, 6 Nov., 1852. At an early age he and his family emigrated to Mayslick, Ky., where they dwelt in a log cabin. In his sixteenth year the boy left home, to study medicine in Cincinnati, and at the age of twenty found his way to Philadelphia, where he attended two courses of lectures at the medical school of the University of Pennsylvania. Returning to the west, he practised medicine for a year near his old home in Kentucky, and finally settled in Cincinnati. In 1815 Dr. Drake attended a second course of lectures in the University of Pennsylvania, when he was graduated, and, returning to Cincinnati, he soon gained a large and profitable practice. During the two years preceding he had entered on several business ventures and speculations in connection with his father, all of which miscarried. In 1816 he was appointed professor of materia medica in Transylvania university, Ky., and thereafter occupied a chair in other medical schools in succession, until 1835, when he organized the medical department of the Cincinnati college. Here he remained four years, and then accepted the chair of clinical medicine and pathological anatomy in the University of Louisville, Ky. He returned to Cincinnati, and once more, for a single session, filled the chair of medicine in the medical college of Ohio. In 1850 he again went to Louisville, and finally re-entered the medical college of Ohio. In 1827 he projected the "Western Journal of the Medical and Physical Sciences," continuing as one of the editors until 1848. Among his publications are "Topography, Climate, and Diseases of Cincinnati" (a pamphlet, 1810); "Picture of Cincinnati and the Miami Country" (Cincinnati, 1815); "Practical Treatise on the History, Prevention, and Treatment of Epidemic Cholera" (1832); "Practical Essays on Medical Education" (1832); and "Systematic Treatise on the Principal Diseases of the Interior Valley of North America" (1850; 2d vol., Philadelphia, 1854). The last production of his pen was a small volume of "Discourses" (1852).—His brother, **Benjamin,** biographer, b. in Mason county, Ky., in 1794; d. in Cincinnati, Ohio, 1 April, 1841, studied and at first practised law in Cincinnati. In 1830 he established a weekly paper, "The Western Agriculturist," continuing for many years its editor and proprietor. Like his brother, he was much devoted to western interests. His publications include "Cincinnati in 1826" (Cincinnati, 1827); "Life and Adventures of Black Hawk" (1838); "Tales and Sketches from the Queen City" (1838); "Life of William Henry Harrison" (1840); and "Life of Tecumseh" (1841). To the last-named work he gave much time and attention, and it is historically valuable.—Another son, **Charles Daniel,** lawyer, b. in Cincinnati, 11 April, 1811, received a common-school education and spent a short time at St. Joseph's college, Ky., and at a military academy in Middletown, Conn. From 1827 till 1830 he was a midshipman in the U. S. navy, in 1833 was admitted to the bar in Cincinnati, and in 1834 removed to St. Louis, Mo. In 1847 Mr. Drake returned to Cincinnati, whence in 1850 he again went to St. Louis to practise his profession. In 1859 he was elected a member of the Missouri house of representatives and was conspicuous for his opposition to the secession movement, in 1863 a member of the state convention, and in 1864 was chosen a member of a convention to revise the state constitution. In 1867 he became U. S. senator from Missouri, but this office he resigned to accept the appointment of chief justice of the court of claims in Washington. He has published a "Treatise on the Law of Suits by Attachment in the United States" (Boston, 1854), and a "Life of Daniel Drake," his father (1871).

DRAKE, Sir Francis, navigator, b. near Tavistock, Devonshire, according to some authorities in 1539, and to others in 1545 or 1546; d. near Puerto Bello, 27 Dec., 1595. His father was a poor clergyman, and Francis was the eldest of twelve sons, nearly all of whom followed the sea. He received a scanty education through the liberality of a kinsman, and was apprenticed to the master of a bark, who bequeathed him his vessel as a reward for his faithful service. Being thus at the age of eighteen years not only a good sailor, but the proprietor of a ship, he made commercial voyages to the bay of Biscay and the coast of Guinea. He then sold his vessel and invested the proceeds, with all his savings, in an expedition of Capt. Hawkins to Mexico, made in 1567. There were five ships, Drake receiving command of the "Judith," a vessel of fifty tons. The expedition, after capturing 400 or 500 negroes on the African coast, crossed to Dominica for trade, then attempted to reach Florida, but was driven by tempest into the harbor of San Juan de Ulua (now Vera Cruz) for repairs and supplies. The next day a fleet of twelve ships arrived from Spain. A naval battle followed, in which only two of the English ships escaped. Drake returned to England, having lost his entire property, and fruitlessly petitioned the court of Spain for indemnity; but getting no satisfaction, and enraged at the treatment he received, he began to sail with the avowed object of pillaging the Spaniards. In 1570 he obtained a commission from Queen Elizabeth, and in 1572 he armed two ships at Plymouth, with which, joined by a third at Port Pheasant on the coast of South America, he made a descent on New Granada, captured and plun-

dered various Spanish settlements, and made, at the expense of his enemies, a fortune vastly larger than that they had taken from him. He visited the isthmus of Darien, saw from a mountain-top the waves of the Pacific, and planned an expedition into those waters. He returned to England in 1573, and was welcomed as a hero. Under the patronage of Elizabeth, he set sail from Plymouth, 13 Dec., 1577, with five vessels and 164 gentlemen and sailors, to follow the route that had been traced by Magellan. Of these vessels, the "Pelican" was the only one that completed the adventure. Her armament was twenty guns of brass and iron, with others stowed away in the hold. Drake pillaged the Spanish settlements of Chili and Peru, and every vessel he found, among them a royal galleon, laden with gold, silver, and precious stones, to the value of about $3,000,000. He then sailed northward, and, landing on the coast of California, took possession in the name of his sovereign, and named it Nova Albion. He remained for some weeks, and made friends with the natives, who regarded the new-comers as gods. The chief, dressed in furs, came with his official attendants, and indulged in a wild dance. Drake was asked to sit down, and the king, singing with all the rest, set a crown on Drake's head and saluted him as *Hioh* ("sovereign.") On leaving the place, Drake, fearing lest he should meet the Spaniards in superior force if he returned by the way he came, sailed to the north, and sought a passage to the Atlantic through Bering strait. Repelled by the intense cold, he again sought the Pacific, and determined by sailing westward to make the circuit of the globe. He traversed the Pacific and the Indian Ocean, doubled the Cape of Good Hope, and arrived at Plymouth in November, 1580, after an absence of two years and ten months. Elizabeth received him with favor, dined on board his ship, and made him a knight. The Spaniards demanded that he should be given up to them as a pirate, but Elizabeth refused, and the rupture that followed between her and Philip II. gave Drake a new opportunity. Within one year he captured and plundered Cartagena and other towns, burned the forts of San Antonio and Saint Augustine, then visited and carried back to England the remains of the colony that Raleigh had planted in Virginia. In 1587 he was placed in command of a fleet of about thirty sail designed to attack the Spanish ports. He destroyed 100 ships in the harbor of Cadiz, which were destined for the invasion of England, and captured an immense carrack, from papers in which the English first learned the value of the East India traffic, and the mode of carrying it on. In 1588, as vice-admiral, he commanded one squadron of the fleet, by which, with the assistance of the elements, the armada sent by Spain against England was annihilated, and in 1589 ravaged the coasts of the Spanish peninsula. In 1592–'3 he was a member of parliament for Plymouth. In 1594, a report having reached England that Spain was preparing a fleet more numerous and powerful than the armada, he again entered the service. Convinced that the West Indies was the point where Spain could be best attacked, he sailed for America in 1595 with 26 vessels, in company with Admiral Hawkins. A divided command produced its usual bad results, and their first attempts were fruitless. The Spaniards were also forewarned, and the English expedition proved a melancholy failure. At Puerto Rico Hawkins died, either of a wound or of chagrin, and Drake then gained new triumphs. He burned Santa Marta, Rancheria, Nombre de Dios, and Rio Hacha; but a fatal malady broke out among the sailors, and as he heard of the defeat of a division of his forces, which he had sent to operate by land, he fell sick and died from the combined effects of fever and of mental agitation on account of the reverses of the expedition. His remains were placed in a leaden casket and buried at sea off Puerto Cabello, Venezuela.

DRAKE, Joseph Rodman, poet, b. in New York city, 7 Aug., 1795; d. there, 21 Sept., 1820. He was an only son, one of four children, who, early bereaved of their parents, were subjected to many of the pains and privations incident to poverty and the loss of their natural protectors. Like his sisters Caroline and Louise, he was a poet from childhood. Some of his juvenile verses were found by the writer among Halleck's papers. At fourteen Drake wrote the "Mocking-Bird" and "The Past and Present," a part of which furnished the concluding passage of "Leon" in the published volume of his poems. Four years later he abandoned merchandise from a distaste for business, and began the study of medicine with Drs. Bruce and Romayne. In the winter of 1812–'3 Drake and Halleck met and immediately became friends. When the young and handsome physician was married in the summer of 1816 to a daughter of Henry Eckford, the opulent ship-builder, it was Halleck who officiated as groomsman; when he went to Europe with his accomplished wife, it was to his brother-poet that he addressed several amusing epistles; when their daughter and only child was born, she was christened Halleck; when the pulsations of his gentle heart were daily growing weaker, it was his faithful friend "Fitz" who with more than a brother's love soothed his dying pillow; and, when the grave had forever closed over Drake, it was the same sorrow-stricken friend who wrote those exquisitely touching lines so familiar to the English-speaking world, and which will ever continue to be among Halleck's and Drake's most enduring monuments. "The Culprit Fay," on which Drake's reputation as a poet chiefly rests, was written in his twenty-second year, and not, as it has always been said, in the summer of 1819. A MS. copy now before the writer states that it was composed in August, 1816. In March, 1819, the literary partners began contributing anonymously to the "Evening Post" a series of good-natured verses known as "The Croakers," which appeared almost daily during three months and occasionally afterward. These humorous poems were in 1860 col-

J. Rodman Drake

lected and issued in a handsome octavo by the Bradford club of New York, and in 1868 they were included, with several unpublished "Croakers," in an edition of Halleck's poems. In place of the original signatures of Croaker, Croaker Junior, and Croaker & Co., the editor of the volume made known for the first time the respective author of each poem, indicating also by the letters D. and H. the joint authorship of the literary partners, or, to quote Halleck's familiar words to his biographer, that "we each had a finger in the pie." Whoever among the present generation wishes to learn something of the leading men of the city and state, and of the social, scientific, and political events of so interesting a decade as that of 1819–'29 in New York history, cannot but be enlightened as well as greatly amused by a perusal of these sprightly poems. When Drake was on his death-bed, at his wife's request Dr. DeKay, an intimate friend, collected and copied all his poems which could be found and took them to him. "See, Joe," he said, "what I have done." "Burn them," was the reply of the dying poet; "they are valueless." A judicious selection of her father's poems, including "The Culprit Fay" and "The American Flag," was, however, made in October, 1835, by the poet's daughter, being the volume issued in New York during the following year, and fitly dedicated to Fitz-Greene Halleck. Thirty years later an illustrated edition of "The Culprit Fay" was issued in New York, of which many thousands have been sold. The young poet, who was described by his literary partner "as perhaps the handsomest man in New York," left behind him two portraits, one a miniature, from which the accompanying picture is copied, the other an oil-painting by Henry Inman. It was for half a century in the possession of Charles P. Clinch, the last survivor among Drake's intimate friends. See Wilson's "Life of Halleck" (New York, 1869), and "Bryant and his Friends" (1886).

DRAKE, Samuel, actor, b. in England, 15 Nov., 1768; d. in Oldham county, Ky., 16 Oct., 1854. He may properly be called the pioneer of the drama in the west. It is said that his name was Bryant, but he assumed that of Drake on the stage. In early life he was apprenticed to a printer, but ran away before his term had expired and became an actor. Previous to his coming to the United States he was manager of a country theatre in the west of England. Mr. Drake and his family landed in the United States in 1809 and appeared at the Boston theatre the same year, remaining there until 1813, when they joined the company of John Bernhard at Albany, N. Y., where Mr. Drake was stage manager. Mrs. Drake died in Albany in 1814, and in the spring of 1815 Mr. Drake and his family went to Kentucky, he having made arrangements for the occupancy of the Frankfort, Lexington, and Louisville theatres. On their way they gave performances in several towns of northwestern New York. With this company two persons, who afterward became noted in the history of the American drama (Miss Denney and N. M. Ludlow), made their first appearance on the stage. In their journey to Olean, on Alleghany river, the path lay through a wilderness, the men walking most of the way, and the women riding in the wagon that carried their scenery. Arrived at Olean (which then consisted of a few log-cabins), Mr. Drake purchased a flat-boat, and in this they floated down the Alleghany to Pittsburg, Pa., where Mr. Drake and his company gave the first regular theatrical performance ever given in that town. After their Pittsburg season they landed at Maysville (then called Limestone), and made the rest of their journey by land to Frankfort, where they opened the theatre that had been built four years before by Noble Luke Usher. Mr. Drake was quite successful during the first ten or twelve years of his Kentucky career, and afterward managed theatres in Ohio, Tennessee, Missouri, and Indiana.—His daughter-in-law, **Frances Ann,** actress, b. in Schenectady, N. Y., 6 Nov., 1797; d. in Oldham county, Ky., 1 Sept., 1875. Her maiden name was Denney. She made her first appearance on the stage in the spring of 1815 at Cherry Valley, N. Y., with her future father-in-law's company in the character of Julia in "The Midnight Hour." The first character in tragedy that she acted was Imma in "Adelgitha." At Pittsburg, Pa., she played many important parts, and in Kentucky she became a great favorite. In 1819 she tried her fortune in the northern and eastern theatres, going first to Canada and performing at Montreal and Quebec, then to Boston, and thence to New York city, where she made her first appearance, 17 April, 1820, at the Park theatre in the character of Helen Worret in the comedy of "Man and Wife," in which she gave great satisfaction. She then became a regular member of the Park company, and, after the burning of that theatre, was with the same company, performing at the Anthony street theatre, New York, during the season of 1820–'1. In 1823 she married Alexander Drake, and in 1824 appeared at the Chatham theatre, New York, as Imogene in "Bertram." Shortly after this she returned to the west with her husband to his father's theatres, occasionally visiting the east during the vacations of her western engagements. Her last appearance in New York was in 1835 at the Park theatre, 22 April, as Bianca in "Fazio." Mrs. Drake, after the death of her husband, married George W. Cutter (*q. v.*); but the match proved unhappy, they separated upon mutual agreement, and she returned to the stage, resuming the name of Drake, and managed theatres in Kentucky and Ohio.

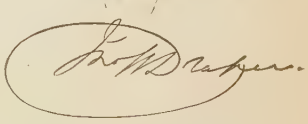
DRAKE, Samuel Gardner, antiquarian, b. in Pittsfield, N. H., 11 Oct., 1798; d. in Boston, Mass., 14 June, 1875. He was brought up on a farm, educated in the common schools of his neighborhood, and in 1818–'25 was a teacher. He early showed a fondness for literary pursuits, and in 1828 established in Boston, whither he had removed, the first antiquarian book-store in the United States, devoting special attention to the collection of books relating to the early history of this country. He continued to do business as a bookseller and publisher during his life, and the most noted writers of his day availed themselves of the store of information that he had collected. Mr. Drake was one of the founders of the New England historic genealogical society in 1847, its president in 1858, and for many years edited its quarterly "Register," contributing many articles to its pages. In 1858–'60 he resided in London, England. He published Church's "Entertaining History of King Philip's War," with additions (Boston, 1825); "Indian Biography" (1832); "Book of the Indians," a standard authority (1833; 11th ed., enlarged, 1851); "Old Indian Chronicle" (1836; new series, 1867); "Indian Captivities" (1839); "Account of the Family of Drake" (1845); "Review of Savage's Edition of Winthrop's Journal" (1854); "History and Antiquities of Boston" (1856); "Result of Searches among the British Archives" (1860); "Memoir of Sir Walter Raleigh" (1862); editions, with introduction and notes, of Mather's "Indian War of 1675–'6" (1862); "Early History of New England" (1864); and Hubbard's "Indian Wars" (1865); "The Witchcraft Delusion in New Eng-

land," being reprints of Mather's "Wonders of the Invisible World," and Robert Calef's "More Wonders of the Invisible World," with introduction and notes (3 vols., 1866); "Annals of Witchcraft in the United States" (1869); and "History of the French and Indian War" (1870).—His son, **Francis Samuel,** b. in Northwood, N. H., 22 Feb., 1828; d. in Washington, D. C., 22 Feb., 1885, was educated in the public schools of Boston. After aiding his father in his Boston book-store he entered a counting-house in that city, but went to Leavenworth, Kan., in 1862, and engaged in bookselling there till 1867, when he returned to Boston. Mr. Drake inherited his father's taste for historical work, and was an eager collector long before he wrote anything for publication. He prepared without aid a "Dictionary of American Biography," the materials for which he was twenty years in collecting (Boston, 1872). He also published a "Memorial of the Massachusetts Society of the Cincinnati" (1873); "Life of Gen. Henry Knox" (1873); "The Town of Roxbury" (1873); "Tea-Leaves" (1884); and "Indian History for Young Folks" (1885). He edited Schoolcraft's "History of the Indians," and contributed articles on Brighton, Watertown, and Roxbury to the "Memorial History of Boston." His "Dictionary of American Biography," with his latest corrections and all the materials that he had gathered for a new edition, is incorporated in "Appletons' Cyclopædia of American Biography."—Another son, **Samuel Adams,** b. in Boston, Mass., 20 Dec., 1833, was educated in the public schools of his native city. He went to Kansas in 1858 as telegraphic agent of the New York associated press, became the regular correspondent of the St. Louis "Republican" and the Louisville "Journal," and for a while edited the Leavenworth "Times." On the organization of the state militia at the beginning of the civil war he became adjutant-general of the northern division, and in 1861 was a captain of militia in the service of the United States. He had risen to the rank of brigadier-general of militia in 1863, and in 1864 was colonel of the 17th Kansas volunteers, commanding the post of Paola, Kan., during Price's invasion of Missouri in that year. In 1871 Gen. Drake returned to Massachusetts. His first publication was "Hints for Emigrants to Pike's Peak" (a pamphlet, 1860). He has since written "Old Landmarks of Boston" (1872); "Old Landmarks of Middlesex" (1873); "Nooks and Corners of the New England Coast" (1875); "Bunker Hill" (1875); "Captain Nelson" (1879); "History of Middlesex County, Mass." (1880); "Heart of the White Mountains" (1881); "Around the Hub" (1881); "New England Legends" (1883); "Our Great Benefactors" (1885); and "The Making of New England" (1886).

DRAPER, Alonzo Granville, soldier, b. in Brattleboro, Vt., 6 Sept., 1835; d. in Brazos, Tex., 3 Sept., 1865. He early settled in Boston, and was graduated at the English high-school in 1854, after which he removed to Lynn, where he edited the "New England Mechanic," and held office in the city government. At the beginning of the civil war he recruited a company of volunteers for the 14th Massachusetts regiment, and was commissioned captain, 6 May, 1861. In January, 1863, he was promoted major, and, after being transferred to the 2d national colored regiment, was made colonel in August, 1863, and afterward attached to the 25th corps, where for a month he had charge of a brigade in Maj.-Gen. Paine's division, and where he won the title of brevet brigadier-general, 28 Oct., 1864. A few months previous to his death he left Virginia in command of a brigade, and died from wounds received in Texas.

DRAPER, Andrew Sloan, lawyer, b. in Westford, Otsego co., N. Y., 21 June, 1848. He was graduated at Albany academy in 1866, and at Albany law-school in 1871, and began practice in that place. He was a member of the city board of education in 1879–'81, and of the legislature in the latter year. He was appointed a member of the court of commissioners of Alabama claims by President Arthur, and sat in that court during the last year of its existence, when over 2,000 cases were tried. In 1886 he became state superintendent of public instruction.

DRAPER, John William, scientist, b. in St. Helen's, near Liverpool, England, 5 May, 1811; d. in Hastings-on-Hudson, 4 Jan., 1882. He was the son of John C. Draper, a Wesleyan clergyman, who was interested in scientific subjects. Young Draper was educated at home under private tutors and at Woodhouse grove, a public-school of the Wesleyans, where he developed a fondness for science. In 1829 the University of London was opened, and he was sent there to receive a course of instruction in chemistry under Dr. Edward Turner, but the death of his father prevented his taking a degree, and in 1832 he came to the United States with his mother and his sister Catherine, settling in the Wesleyan colony in Christiansville, Va., where for a time he devoted himself entirely to scientific pursuits. He was graduated at the medical department of the University of Pennsylvania in 1836. The results of several investigations published in the "Journal of the Franklin Institute" and in Silliman's "American Journal of Science" gave him reputation, and he was called to the chair of chemistry and natural philosophy in Hampden - Sidney college, Va., where he began his official duties in the autumn of 1836, meanwhile prosecuting his researches in various directions. In 1837 he was elected professor of the proposed medical department in the University of New York, but the financial difficulties of that year caused the abandonment of the project. Two years later, however, he was appointed professor in the university itself, and in 1840 was very active in the organization of the medical department, becoming its professor of chemistry. In 1850 he succeeded Dr. Valentine Mott in the pres-



idency of the medical college, and maintained his relations with that institution until 1873. His lectures at the university itself were continued until 1881. During the civil war he was appointed one of the commissioners to inspect hospitals after the battles of Antietam and Gettysburg. Of his many investigations, one of the earliest was in relation to capillary attraction, and in 1834 he published a memoir on that subject. His study of osmose, especially in reference to its physiological relations, dates from 1836. The application of the principles investigated to the explanation of sap in plants and of blood in animals is admirable. His researches on the chemical phenomena of light in both the organic and inorganic world include the most valuable work done by him. Daguerre's announcement of his discovery of the action of sunlight on silver, and its application to the permanent preservation of views, in 1839, was at once taken up by Draper. He made it the subject of special study, and was the first person in the world to apply it to individuals. "The first photographic portrait from life was made by me," he says, and "the face of the sitter," his sister Catherine, "was dusted with a white powder"; but a few trials showed that this was unnecessary. In March, 1840, he presented the Lyceum of natural history in New York with the first representation of the moon's surface ever taken by photography. In the investigation presented to the British association in 1843, on the action of light on chlorine gas, he showed that this gas underwent a decided modification, in consequence of its absorption of the chemical rays from sunlight. He also investigated light from the standpoint of its action on the growth of plants, and his results were presented in a memoir read before the American philosophical society on the occasion of its centennial anniversary in 1834. Besides his connection with the development of photography, he was actively engaged with Samuel F. B. Morse in his production of the electro-magnetic telegraph. The series of experiments made by Prof. Draper in the laboratory of the university was the first to establish with certainty the practicability of utilizing electricity for sending messages over long distances. In 1847 he published his "Production of Light by Heat," an important and early contribution to spectrum analysis, and one that is worthy of special recognition, for it clearly outlines the principles that subsequently were recognized and form part of the brilliant researches of Kirchhoff, who has since specialized the department of prismatic analysis. In this connection he also deserves mention as the first to photograph the diffraction spectrum. His "Production of Light by Chemical Action" (1848) and his "Researches in Actino-Chemistry" (1872) were most important contributions to science. He received in 1875 the Rumford medals from the American academy of science and arts for his researches in "Radiant Energy." In 1860 Princeton conferred on him the degree of LL. D. He was a member of many of the learned societies of Europe, including the Accademia dei Lincei of Rome and the Physical society in London. In the United States he was elected to the American philosophical society in 1843 and to the National academy of sciences in 1877. He was the first president of the American chemical society, and his inaugural address, delivered in November, 1876, was on "Science in America." The titles of his papers exceed 100, and extend from 1832 till 1880. His lectures and addresses, principally delivered at the beginning of the medical course in the university, also include "Thoughts on the Future Civil Policy of America," before the Historical society of New York in 1864, and before the Unitarian institute in Springfield, Mass., in October, 1877, on "Evolution—its Origin, Progress, and Consequences." The most celebrated of his larger works is "History of the Conflict between Religion and Science" (New York, 1874), which has passed through twenty editions in the English language, and has been translated into the French, Spanish, German, Dutch, Russian, Italian, Portuguese, Polish, and Servian languages. Rome placed it on her "Index Expurgatorius," and Draper joined Galileo, Copernicus, Kepler, Locke, and Mill on the list of those under the ban of the church. His other works are "Elements of Chemistry," by Robert Kane, American edition, edited (New York, 1842); "A Treatise on the Forces which produce the Organization of Plants" (1844); "Text-Book on Chemistry" (1846); "Text-Book on Natural Philosophy" (1847); "Human Physiology, Statical and Dynamical" (1856); "History of the Intellectual Development of Europe" (1862); "Thoughts on the Future Civil Policy of America" (1865); "A Text-Book on Physiology" (1866); "History of the American Civil War" (3 vols., 1867–'70); and "Scientific Memoirs; being Experimental Contributions to a Knowledge of Radiant Energy" (1878). See Memoir by Prof. George F. Barker, contributed to the "Biographical Memoirs of the National Academy of Sciences" (vol. ii.).—His son, **John Christopher**, physician, b. in Mecklenburg county, Va., 31 March, 1835; d. in New York city, 20 Dec., 1885, entered the University of New York in 1852, but, leaving the classical department, was graduated at the medical school in 1857. From March, 1856, till July, 1857, he held the office of house physician and surgeon to Bellevue hospital, and published at that time papers on "The Production of Urea" (February, 1856) and "Experiments on Respiration" (July, 1856). The year subsequent to his graduation was spent in Europe in travel and study. In December, 1858, he became professor of analytical chemistry in the University of New York, holding that chair until 1871. From 1860 till 1863 he was professor of chemistry in Cooper Union, and in 1862 accompanied the 12th New York regiment to the front as assistant surgeon, serving for three months. In 1863 he was elected professor of natural sciences in the College of the city of New York, and in 1866 professor of chemistry in the medical department of the University of New York, which chairs he held until his death. Dr. Draper was a member of the New York academy of medicine, and in 1873 received the degree of LL. D. from Trinity college. He was an occasional contributor to medical and scientific journals, and, besides twenty-four original papers, published numerous articles on diet, dress, and ventilation, in the "Galaxy" (1868–'71). In 1872–'3 he edited the "Year-Book of Nature and Science," and also the department of "Natural Science" in "Scribner's Monthly" from 1872 till 1875. He published "Text-Book on Anatomy, Physiology, and Hygiene" (New York, 1866); "A Practical Laboratory-Course in Medical Chemistry" (1882); and a "Text-Book of Medical Physics" (1885).—Another son, **Henry**, physicist, b. in Prince Edward county, Va., 7 March, 1837; d. in New York city, 20 November, 1882, studied at the University of New York, but on the completion of his sophomore year abandoned the classical course to study medicine, and was graduated in 1858, publishing a thesis on "The Changes of Blood-Cells in the Spleen." Subsequently he travelled in Europe, and visited the great telescope of Lord Rosse in Ireland,

the sight of which impressed him with a desire to construct a similar but smaller instrument, and attracted his attention toward astronomy and astronomical photography. On his return to the United States he applied himself to accomplish this purpose, and built the observatory at Hastings-on-Hudson. A description of the details of grinding, polishing, silvering, testing, and mounting the reflector, all of which he did himself, was published by the Smithsonian institution in 1865, and became the standard authority on the subject. Meanwhile he had been appointed on the medical staff in Bellevue hospital, and served for eighteen months. In 1860 he was elected professor of physiology in the university, and in 1866 to the similar chair in the medical department, becoming soon afterward its dean. His specialty of celestial photography was not neglected, and a photograph of the fixed lines in the spectra of the stars is of this period. His most celebrated photograph is that of the moon, and it probably gives the best representation of its surface thus far made. Upward of 1,500 negatives were made by Dr. Draper with this instrument. In 1867 he married Mary Anna, the daughter of Courtland Palmer, who became his assistant in scientific work. In 1872 he photographed the spectrum of α Lyræ (Vega), showing dark lines, a result then unique in science, and in 1873 the finest photograph of the diffraction spectrum ever made. He resigned his chair in the medical department in 1873, in order to devote more time to original research, but the death of Mr. Palmer in 1874 made it necessary for him to take charge of a large estate. In 1874 he was chosen by congress to superintend the photographic department of the commission appointed to observe the transit of Venus. For three months he was busily occupied in Washington, organizing, experimenting, and instructing. Home duties prevented him from joining the expedition, but he received from congress a gold medal in recognition of his services. In 1876 he made a negative of the solar spectrum, and one of the spectrum of an incandescent gas upon the same plate, with their edges in contact. These results and corroborative experiments led him to assume the presence of oxygen in the sun, and in July, 1877, he announced "The Discovery of Oxygen in the Sun by Photography, and a New Theory of the Solar Spectrum." This brilliant investigation, culminating in perhaps the most original discovery ever made in physical science by an American, could not pass unchallenged. English astronomers were slow to accept the results, and in 1879 Dr. Draper submitted his research to the Royal astronomical society in London. The sun told its own story, and its light, acting on the delicate metallic film on the glass negative, was evidence that could not be disputed. In 1878 he observed the solar eclipse of 29 July, in Rawlings, W. T., and obtained excellent photographs of the corona. Later he photographed the great nebula of Orion, and in 1880 photographed the spectrum of Jupiter. In 1882 he received the degree of LL.D. from the University of New York and also from the University of Wisconsin during the same year. Dr. Draper was a member of scientific societies in the United States and in Europe, and in 1877 was elected to the National academy of sciences. His original papers number but a score, and are principally devoted to researches on the chemistry of heavenly bodies. They appeared chiefly in the "American Journal of Science." Dr. Draper also published "A Text-Book on Chemistry" (New York, 1866). Biographical sketches of Henry Draper were contributed by Prof. George F. Barker to the "American Journal of Science" (February, 1883), the "Proceedings of the American Philosophical Society" (December, 1882), and to the "Biographical Memoirs of the National Academy of Sciences" (vol. iii.).—Another son, **Daniel,** meteorologist, b. in New York city, 2 April, 1841, was educated at the University grammar-school, and subsequently followed scientific studies under his father, whom he assisted in his lectures, also becoming his amanuensis in the preparation of the "History of the Intellectual Development of Europe" and in the "History of the American Civil War." In the designing and construction of the observatory in Hastings-on-Hudson, Daniel was associated with his brother Henry. For five years he served an apprenticeship in the Novelty iron-works, New York, where he was employed during the building of the "Roanoke" and other iron-clads for the U. S. government in the early years of the civil war. In 1869 he was appointed director of the New York meteorological observatory established at that time in Central park. For the work under his control he designed and manufactured the self-recording instruments, including the photographic barograph and thermographs (dry and wet), pencil gauges for rain and snow, for direction of the wind, and for the velocity and force of the wind. In 1871 he began a series of meteorological investigations in connection with the observatory. Of these, his consideration of the question "Does the clearing of land increase or diminish the fall of rain?" showed that the prevalent impression of its diminishing was not founded on fact. Besides several researches concerning the variations in temperature, he took up the question "Do American storms cross the Atlantic?" It was found that from 1869 till 1873 eighty-six out of eighty-nine disturbances were felt on the European coast. This led to telegraphic announcement of storms from the United States to Great Britain. A more recent investigation has shown the increased prevalence of pneumonia at times when the atmosphere is richest in ozone. His researches have earned for him the degree of Ph. D. from the University of New York, and they have been fully described in scientific journals both in the United States and Europe. He is a member of scientific societies and has published annual reports of the observatory since his appointment.

DRAPER, Lyman Copeland, antiquarian, b. in Hamburg (now Evans), Erie co., N. Y., 4 Sept., 1815. He removed with his father to Springfield, Pa., and in 1821 to Lockport, N. Y., where he was educated at the village school, worked on his father's farm, and in 1830–'3 served as clerk in various stores. In the latter year he went to Mobile with a relative, and began obtaining information about the Creek chief Weatherford. Since then he has devoted his life to the collection of material relating to western history and biography, and is regarded as an authority on those subjects. In 1835–'6 he was a student in Granville college, Ohio. In 1838 he began an extensive correspondence with well-known western pioneers, and had personal interviews with many of them, thus collecting a great amount of valuable historical information. He became editor of a paper in Pontotoc, Miss., in 1840, and in 1842 was clerk in the office of the Erie canal at Buffalo, N. Y. The next ten years were spent mostly in the family of a relative in Philadelphia, in the prosecution of his search for historical data. He removed to Madison, Wis., in 1853, to become corresponding secretary of the State historical society, and has been instrumental in securing for it a library of 116,000 volumes and

valuable antiquarian collections. In 1858–'9 he was state superintendent of instruction, but in 1860 returned to his former office. On 6 Jan., 1887, he declined a re-election, intending to devote himself to literature, and was appointed honorary secretary for life. The state university gave him the degree of LL. D. in 1871. Dr. Draper has published "Collections" of the State historical society, mostly gathered by himself (10 vols., 1853–'87); "Madison, the Capital of Wisconsin" (1857); "The Helping Hand," with W. A. Croffut (1869); and "King's Mountain and its Heroes" (Cincinnati, 1881). He has many works in preparation, two of which, "The Mecklenburg Declaration of Independence" and "Border Forays and Adventures," are nearly ready for publication.

DRAPER, Richard, journalist, b. in 1727; d. 6 June, 1774. He was early appointed printer to the governor and council of Massachusetts, and retained the office through his life, becoming the proprietor of the "Massachusetts Gazette and Boston News Letter," which strongly supported the crown in its controversies with the colonies. Mr. Draper was esteemed the best compiler of news of his day. He was a man of feeble health and of great gentleness of manner.—His wife, **Margaret,** d. in England about 1800, continued, with the aid of John Howe, the publication of her husband's journal from his death to the evacuation of Boston in 1776, and her paper was the only one published there during the siege. She went with the British army to Halifax, and thence to England, where she spent the rest of her life, receiving a pension from the government. Trumbull, in his "McFingal," speaks of her as "Mother Draper."

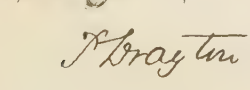
DRAPER, Simeon, politician, b. in 1804; d. in Whitestone, L. I., 6 Nov., 1866. He was for many years a prominent merchant in New York, but was unfortunate in business, and became an auctioneer. He was an active whig, and was long the personal and political friend of William H. Seward, but soon after the formation of the republican party he opposed Gov. Seward's policy. He was several times a member of the Whig state central committee, and in 1864 was chairman of that of the Union party. He was provost marshal for New York city in 1862, and in 1864 was appointed by President Lincoln collector of the port of New York, but resigned in 1865. At the time of his death he was government cotton agent, having charge of all the cotton received at New York. For many years before the war Mr. Draper was one of the board of governors in charge of the city charities, and after the law creating this board was repealed he was a commissioner of public charities and corrections until his resignation of the office in 1864.

DRAPER, William Henry, Canadian jurist, b. near London, England, 11 March, 1801; d. in Yorkville (then a suburb of Toronto), 3 Nov., 1877. His father was rector of St. Anthony's church, London, and when the son was a mere lad he ran away from home and went to sea. He was afterward a cadet on an East Indiaman, but in his eighteenth year he gave up the sea and set out for Canada, where he arrived in 1820. After teaching for a time, he began the study of law, and in 1828 was called to the bar. In 1837 he was called to the legislative council, and accepted a seat in the executive without office. In 1838 he became solicitor-general of Upper Canada, and, on the resignation of Mr. Hagerman, was appointed to succeed him as attorney-general. He was not in favor of many of the reforms introduced into the system of governing the British-American colonies subsequent to the rebellion of 1837. In 1847 Mr. Draper withdrew from political life and became puisne judge of the court of queen's bench, and in February, 1856, was made chief justice of the court of common pleas, and in 1863 chief justice of Upper Canada. He retained this office till 1869, when he became president of the court of errors and appeals. He was a brilliant man, and so eloquent and persuasive was his style of address that he was known among his associates as "Sweet William."

DRAPER, William Henry, physician, b. in Brattleborough, Vt., 14 Oct., 1830. He was graduated at Columbia in 1851, and at the College of physicians and surgeons in 1855. After study in Paris and London, he settled in New York city as a general practitioner, and has acquired a large practice. In 1869 he became clinical professor of diseases of the eye and ear in the College of physicians and surgeons, which chair he held until 1880, when he was appointed professor of clinical medicine. He is attending physician of the New York and the Roosevelt hospitals, also consulting physician of St. Luke's and of the Presbyterian hospitals. In 1886 Dr. Draper became president of the New York academy of medicine. He has contributed numerous professional papers to medical journals.

DRAYTON, William, jurist, b. in South Carolina in 1733; d. 18 May, 1790. After studying law four years in the Middle Temple, London, he returned to this country in 1754, and in 1768 was appointed chief justice of the province of East Florida. He was deprived of his office during the Revolution on account of suspected sympathy with the patriots of his native state, but was afterward reinstated, and spent some time in England with his family. After the close of the war he became judge of the admiralty court of South Carolina, was associate justice of the state from March till October, 1789, and in the latter month was appointed the first U. S. judge for the district of South Carolina.—His son, **William,** soldier, b. in St. Augustine, Fla., 30 Dec., 1776; d. in Philadelphia, Pa., 24 May, 1846, was the youngest of ten brothers; his mother died soon after his birth, and he was brought up as the foster-brother of Robert James Turnbull, the champion of nullification. He was educated in England, but returned to his home at his father's death and became an assistant to his brother, Jacob Drayton, then clerk of the court of general sessions in Charleston. He was admitted to the bar in 1797, and before 1812 had an extensive practice. He had become a lieutenant in the "ancient battalion of artillery" in 1801, and at the beginning of the war of 1812, though, as an earnest federalist, he had opposed it, he offered his services to the government, gave up his law-practice, and was commissioned lieutenant-colonel of the 10th U. S. infantry. He became colonel of the 18th infantry on 25 July, 1812, and inspector-general on 1 Aug., 1814, and shortly before the close of the war was associated with Gen. Scott and Gen. Macomb in the preparation of a system of infantry tactics which was afterward adopted by the war department. On his resignation, 15 June, 1815, the government was about to tender him a brigadier-general's commission. He was recorder of Charleston in 1819–'24, and was then elected to congress as a Union democrat, to fill the vacancy caused by the resignation of Joel R. Poinsett, who had been appointed U. S. minister to Mexico. He served from 1825 till 1833, and in 1830, though hostile to the tariff, unflinchingly opposed nullification. He was a warm friend of President Jackson, and was offered by him the portfolio of war after the resignation of Gen. Eaton, and also the English mission, both of which he declined. After the close of his

congressional career he retired from public life and removed to Philadelphia, partly influenced by the political differences resulting from his course in the nullification contest. In 1839–'40 he was Nicholas Biddle's successor as president of the U. S. bank, and tried to revive it, but retired as soon as he had placed the remaining assets of the bank in the hands of assignees, which he had decided to be the only honest and manly course, though it was unpopular.—**Thomas Fenwick,** son of the second William, b. in South Carolina about 1807, was originally named Thomas. He was graduated at the U. S. military academy in 1828, and served in garrison in Jefferson barracks, Mo., and Newport, Ky., in 1828–'32, and then on topographical duty, but resigned on 15 Aug., 1836, and became a civil engineer in Charleston, Louisville, Ky., and Cincinnati, Ohio. He was also a planter in St. Luke's parish, S. C., in 1838–'61, was a state senator in 1853–'6, and president of the Charleston and Savannah railroad in 1853–'61. At the beginning of the civil war he entered the Confederate service, was commissioned brigadier-general, and commanded the Confederate troops on Hilton Head island at the time of the Port Royal expedition, in which his brother, Capt. Percival Drayton, commanded a national vessel. After the war Gen. Drayton became a farmer in Georgia, and in 1878 was made president of the South Carolina immigrant association, and removed to Charlotte, N. C.—His brother, **Percival,** naval officer, b. in South Carolina, 25 Aug., 1812; d. in Washington, D. C., 4 Aug., 1865, entered the navy as a midshipman, 1 Dec., 1827, was promoted to lieutenant, 28 Feb., 1838, and served on the Brazilian, Mediterranean, and Pacific squadrons. He was attached to the naval observatory in Washington in 1852, and soon afterward was associated with Commander, afterward Admiral, Farragut in ordnance experiments, forming a close intimacy with that officer that lasted through life. He was made commander, 14 Sept., 1855, took part in the Paraguay expedition of 1858, and in 1860 was on ordnance duty at the Philadelphia navy-yard. Though strongly bound by family ties to the seceding states, he rejected all offers of place in the southern confederacy, and remained loyal to the national government. He commanded the "Pocahontas" in the Port Royal expedition, and was afterward transferred to the "Pawnee," in which he made valuable reconnoissances of St. Helena sound and adjacent waters. He was promoted to captain on 16 July, 1862, and in the autumn of that year was ordered to the new Ericsson monitor "Passaic." In this iron-clad he bombarded Fort McAllister, and was in the first attack on Sumter under Admiral Du Pont, who spoke in the highest terms, in his last report, of Drayton's "capacity and courage." He afterward became fleet-captain of the West Gulf squadron, and commanded Farragut's flag-ship, the "Hartford," in the battle of Mobile Bay, 5 Aug., 1864. In his detailed report of that action Farragut spoke of Drayton's "coolness and ability," and said: "He is the fleet-captain of my squadron, and one of more determined energy, untiring devotion to duty, and zeal for the service, tempered by great calmness, I do not think adorns any navy." Capt. Drayton afterward accompanied Farragut to New York, where a formal reception was given to the two officers on 12 Dec., 1864. On 28 April, 1865, Capt. Drayton was made chief of the bureau of navigation, and died while discharging the duties of that office. He was especially distinguished as a flag-officer, and his refined manners and knowledge of languages caused his services in that position to be sought by every commanding officer with whom he sailed.



DRAYTON, William Henry, statesman, b. in Drayton Hall, on Ashley river, S. C., in September, 1742; d. in Philadelphia in September, 1779. He went to England in 1753, under the care of Chief-Justice Charles Pinckney, in company with the latter's two sons Charles Cotesworth and Thomas, where, after studying at Westminster school, he entered Baliol college, Oxford, in 1761, and remained there for three years. After his return, at his father's call, in 1764, he pursued a course of reading in history and international law, was admitted to the bar, and became an active writer on political topics. In 1769 he published letters opposing the patriotic associations in the colonies, which were answered by Christopher Gadsden and John McKenzie. Drayton then went to England, republished his letters there, was introduced at court, and on 27 Feb., 1771, received from the king the appointment of privy councillor for the province of South Carolina. He took his seat on 3 April, 1772, but as the revolutionary crisis approached he was often in opposition to the crown officers and judges, and aided the passage of laws that would otherwise have been negatived. On 25 Jan., 1774, in spite of the jealousy aroused by his course, he was appointed an assistant judge by his uncle, Lieut.-Gov. Bull. Just before the session of the first Continental congress he published a pamphlet, addressed to that body, in which, under the signature of "Freeman," he drew up a bill of rights, and substantially marked out the line of conduct that it afterward pursued. This brought on him an attack from the chief justice, Thomas Knox Gordon, in consequence of which he was suspended from his offices under the crown, but he lost none of his influence in the state. He became a member of the "council of safety" in 1775, and soon afterward its president, and was active in advising the seizure of the provincial arsenals and British mails. He was also president of the provincial congress in 1775, and in March, 1776, after the formation of a temporary constitution, became a privy councillor

and chief justice of the state. He delivered a charge to the grand jury of Charleston on 22 April, in which he declared that the king had abdicated the government, and had no more authority over the people of South Carolina. On 15 Oct., 1776, and in October, 1777, he delivered other charges bearing on the question of independence, which had a powerful effect both in this country and Great Britain. During the absence of John Rutledge in 1777 the duties of president of the state devolved upon him, and in 1778 he was elected a delegate to the Continental congress, of which he continued an active member till his death. He strongly opposed, in a pamphlet, the propositions of conciliation presented by Lord Howe, and on 12 July, 1778, was appointed, with John Hancock and William Duer, to conduct the French minister to Philadelphia. He left a narrative of the events of the Revolution, which was edited and published by his son, Gov. John Drayton, under the title "Memoirs of the American Revolution" (2 vols., Charleston, 1821).—His only son, **John,** governor of South Carolina, b. in South Carolina in 1766; d. in Charleston, S. C., 22 Nov., 1822, was educated at Princeton, under Dr. Witherspoon, and in England. He was admitted to the bar, began practice in Charleston, and was elected lieutenant-governor in 1798, becoming governor by the death of Gov. Edward Rutledge, 23 Jan., 1800. He was elected to the office in December, served two years, and was again elected for the term of 1808–'10. While governor in 1801, he used his influence for the establishment of South Carolina college. On 7 May, 1812, he was appointed by President Madison U. S. judge for the district of South Carolina, and served till his death. Besides his father's memoirs, Gov. Drayton published "Letters written during a Tour through the Northern and Eastern States" (1794), and "A View of South Carolina" (1802).

DRESSER, Horace, lawyer, d. 27 Jan., 1877. He was graduated at Union in 1828. Mr. Dresser was one of the first lawyers who spoke in the New York courts in behalf of the negro race, and his best energies were devoted to defending and assisting fugitive slaves. He wrote much on constitutional questions, and published "The Battle Record of the American Rebellion" (New York, 1863), and "Internal Revenue Laws as Amended to July, 1866" (New York, 1866).

DREUILLETTES, Gabriel, jesuit, b. in France in 1593; d. in Quebec in 1681. He came to this country in August, 1643, and was sent the next year to winter among the Algonquins. Here he lost his sight, which he recovered in an extraordinary manner—miraculously, as he supposed. In 1650 he was sent to Boston to propose a perpetual alliance between the French and English colonies independent of any wars between the sovereigns of England and France. From some of the writings of Father Dreuillettes it would appear that a proposal to this effect had come from the elder Winthrop. Dreuillettes set out in August, 1650, and after much suffering reached Coussinook (Augusta) and presented his credentials to John Winthrop, the Plymouth agent, who went with him to Boston. There he saw Gov. Dudley, of Massachusetts, who referred him to Plymouth, as Kennebec was under the jurisdiction of that colony. He was received favorably by Gov. Bradford, but found that only the commissioners of the United colonies had power to enter into any treaty. After many unsuccessful efforts to influence the delegates of the colonies, he returned to Kennebec, visiting the English missionary John Eliot on the way, and then went to Quebec. Full details of his journey are given in his "Narré du voyage faict pour les missions," and in his "Epistola ad Dom. Joannem Winthrop." He was next placed among the Montagnais, Kristineaux, Papinachois, and Abnakis. He accompanied a French expedition to the west in 1656, and made an unsuccessful attempt to reach Hudson's bay by land in 1661. After instructing Marquette in the Indian dialect, he followed him to the west, and, although broken by age and infirmities, he labored at Sault St. Marie up to 1679, when he returned to Quebec.

DREW, Daniel, capitalist, b. in Carmel, Putnam co., N. Y., in 1788; d. in New York city, 19 Sept., 1879. He began active life as a cattle-dealer, but soon became connected with steamboat-building, and constructed many of the Hudson river boats. Still later he became identified with railroad enterprises, and was a prominent speculator in Wall street. When in the height of prosperity his fortune was estimated at from $5,000,000 to $15,000,000. In 1866 he was treasurer of the Erie railroad company, to which he lent the sum of $3,500,000, receiving as security $3,000,000 of shares of unused stock and $3,000,000 of bonds convertible into stock. He began to sell the stock "short" at the prevailing high price, Cornelius Vanderbilt and his adherents being the purchasers. When the contracts matured Drew converted the bonds into stock and threw into the market the 58,000 shares of stock that he possessed. The matter resulted in litigation, which drove Drew and his party to New Jersey, where they remained until the case was settled. Drew afterward lost heavily, and when the firm of Kenyon, Cox & Co., of which he was a partner, failed, he was compelled to make an assignment and ultimately to go into bankruptcy. He gave liberally to Methodist educational institutions, founding the "Drew ladies' seminary" at Carmel, and giving large sums to Wesleyan university, Middletown, Conn. In 1866 he gave $250,000 to found the Drew theological seminary of Madison, N. J., and increased this sum by successive donations to nearly $1,000,000.

DREW, George Alexander, Canadian jurist, b. near the village of Williamstown, Glengarry co., Ont., 28 Feb., 1827. He is descended from Scotch loyalists who settled in Canada at the time of the American Revolution. He was educated at the grammar-schools in Williamstown and Cornwall, studied law under the late John Sandfield Macdonald at Cornwall, and was called to the bar of Upper Canada in 1854. In 1855 he settled in Elora, in that province, and practised his profession. In 1867 he was elected to parliament for North Wellington, and was re-elected for the same constituency in 1878. At the dissolution of parliament in 1882 he retired from politics, and was appointed judge of the county of Wellington, and afterward local judge of the high court of justice.

DREW, John, actor, b. in Dublin, Ireland, 3 Sept., 1825; d. in Philadelphia, Pa., 21 May, 1862. He made his first appearance on the stage at the Bowery theatre, New York, in 1845, as Dr. O'Toole in "The Irish Tutor." After acting for several seasons at the Albany, N. Y., museum, he visited Philadelphia, and at once became a favorite, appearing there for the first time at the Chestnut street theatre, 28 Aug., 1852, as Trapanti in "She Would and She Would Not." In 1853, in conjunction with William Wheatley, he became manager of the Arch street theatre in the same city. After acting throughout the United States, he visited England in 1855, California in 1858, and Australia in 1859. He returned to this country in 1862, and made his last appearance on any stage on 9 May of

that year. He was considered the best Irish comedian on the American stage.—His wife, **Louisa,** actress, b. in London, England, 10 Jan., 1820, was the daughter of an English actor named Lane, and first appeared in child's parts at eight years of age. In 1828 she came to the United States with her mother, acted in New York and Philadelphia, and then visited Jamaica and other West India islands, returning to this country in 1832. In 1833 she again played in the New York theatres, and in 1834, at the age of fourteen, essayed the part of Julia in the "Hunchback," at the Boston theatre. In 1835 Miss Lane went to New Orleans, where she played Lady Teazle in "School for Scandal," and other high comedy parts; as she says, "being leading lady at the pay of twenty dollars per week." She married Henry Hunt, a veteran English opera singer, in 1836, and in 1842–'6 appeared at intervals in New York city as a member of the stock companies of various theatres, sustaining parts in domestic dramas, burlesques, and light comedy. In 1847 she went to Chicago, Milwaukee, St. Louis, Mobile, and New Orleans, where, as she says, "cold tea and molasses and water were provided as beverages in plays where the business required actors to partake of liquid refreshments, the management, for once, taking high temperance grounds." In 1848, after separating from her first husband, she married George Mossop, a young Irish comedian, who died in 1849, and in the following year she became the wife of Mr. Drew. In 1857 Mrs. Drew went on a tour through the country with her husband, and in 1861 she assumed the sole management of the Arch street theatre, which has since been under her control. In her youth, notwithstanding the grace and refinement of her manner, she was too self-conscious, and her acting displayed neither force nor originality. But study, experience, and earnest emulation have finally made her one of the most versatile and finished artists on the English-speaking stage. Her greatest successes have been in high comedy parts.

DREXEL, Francis Martin, banker, b. in Dornbirn, Austrian Tyrol, 7 April, 1792; d. 5 June, 1863. In 1803 he was sent to study Italian and the fine arts in a Catholic institution near Turin. On his return in 1809 he found his country invaded by the French, and to escape conscription he went to Switzerland and subsequently to Paris. In 1812 he returned to the Tyrol incognito, and, finding the conscription still in force, went to Berne and continued his study of painting. He sailed for the United States in 1817, from Amsterdam, and settled in Philadelphia. After a few years he went to Peru and Chili, painting portraits, among which was one of Gen. Simon Bolivar, with whom he contracted a warm friendship. He visited South America twice, and went to Mexico, where he remained for some time. After his permanent settlement in Philadelphia he founded the banking house of Drexel & Co. in 1837, which represents one of the largest enterprises of that character in the United States. The Paris house, Drexel, Harjes & Co., was founded in 1868, and the New York house, Drexel, Morgan & Co., in 1871.—His son, **Anthony Joseph,** banker, b. in Philadelphia, Pa., in 1826, is now at the head of the Philadelphia bank, having been identified with this enterprise since the age of thirteen. He is zealous in promoting science and art, especially music, and contributes largely to philanthropic and educational interests.—Another son, **Joseph Wilhelm,** banker, b. 24 Jan., 1833. His education was received in the Philadelphia high-school, and he has travelled through Spain, Egypt, Syria, Turkey, and Greece. He retired from business in 1876. He holds the offices in New York of chairman of sanitary commission, commissioner of education, president of the New York philharmonic society, trustee of the Metropolitan museum of art, trustee of the National academy of sciences, and director of the Metropolitan opera-house. Among his philanthropic interests is a 200-acre farm near New York, where persons without work are lodged, clothed, fed, and taught agriculture until places are procured for them. He owns a large tract of land in Maryland, which has been divided into lots, and houses, mills, etc., erected upon them. These farms are sold to poor persons at cost. About 7,000 acres in Michigan is destined for the same purpose.

DRINKER, Anna, poet, b. in Philadelphia, Pa., 3 Dec., 1827. She was educated in Philadelphia, and has resided principally in Montrose, Pa. She is best known by her pen-name, "Edith May." Her contributions to "Sartain's Magazine" and to the "Home Journal," about 1848–'50, attracted much attention. She has published "Poems by Edith May" (Philadelphia, 1854); "Tales and Verses for Children" (1855); and "Katy's Story."

DRISCOL, Michael, clergyman, b. in Drumbeagh, county Clare, Ireland, in 1805; d. in Troy, N. Y., in 1880. He entered the Society of Jesus in 1831, and was ordained in 1840. He exercised his ministry in Kentucky and New York, and attended the victims of the ship-fever in Canada. He was superior of the theological seminary at Fordham, and afterward president of St. Francis Xavier college, New York. He erected the church of St. Michael in Troy, N. Y.

DRISIUS, Samuel, clergyman, b. in 1602; d. about 1673. His name is also written as Dries and Driesch. His parents were Germans, and he was educated in the German language. He was pastor of the Dutch church in London, and could preach in German, Dutch, French, and English. The West India company were anxious to have a minister that could occasionally officiate in English, and requested his appointment to New Amsterdam. The Classis asked him deliver a sermon before them in Dutch, in order to test his pronunciation, and he left Holland on 4 April, 1652, and came to New Amsterdam, having charge of the church until 1673. On account of his knowledge of English he was employed as envoy to the governor of Virginia, to negotiate a treaty. He united with Megapolensis in protesting against the Lutherans. In order that the youth might secure a classical education in New Amsterdam, Drisius proposed to establish a Latin school. He was often called to preach to the French and English, and for a while did so once a month to the Huguenot and Vandois settlers on Staten Island, but after a few years was compelled to relinquish these services on account of failing health.

DRISLER, Henry, scholar, b. on Staten Island, N. Y., 27 Dec., 1818. He was graduated at Columbia in 1839, for several years he was classical instructor in the grammar-school of the college, was appointed tutor of Greek and Latin in Columbia in 1843, adjunct professor of those languages in 1845, professor of Latin in 1857, and professor of Greek in 1867. During the absence of President Barnard in 1878 he was acting president of the university. He was engaged with Dr. Anthon in the preparation of a series of text-books, and has re-edited, with additions, Liddell and Scott's edition of Passow's Greek Lexicon, which reached a sale of 25,000 copies in two years after publication (1851–'3). He had in press a greatly enlarged edition of Yonge's English-Greek Lexicon, which

was destroyed by fire, but was re-stereotyped and printed in 1870. He has also published pamphlets and school-books, and was associate editor of the seventh revised Oxford edition of Liddell and Scott, published in 1883, and is general editor of Harper and Brothers' new classical series.

DROLET, Gustave Adolphe, Canadian lawyer, b. in St. Pie, Quebec, 16 Feb., 1844. He was educated at St. Hyacinthe college, and admitted to the Montreal bar in 1866. He was a member of the jury at the centennial exhibition at Philadelphia in 1876, commissioner for Canada at the Paris universal exhibition of 1878, and a member of the international jury of awards in Paris the same year. He travelled much in Europe, Asia, and Africa. He has been a promoter of the project of establishing a permanent Canadian exhibition in Paris to promote trade and establish new commercial relations between Canada and the continent of Europe. He was decorated and made a knight of the Legion of Honor by the French government in 1878, and was created a knight of the Order of St. Gregory the Great by Pope Pius IX. in 1877. He has written many valuable papers for reviews and periodicals of Canada on topics in politics, political economy, and literature.

DRONE, Eaton Sylvester, journalist, b. in Zanesville, Ohio, 25 Jan., 1842. He was graduated at Harvard in 1866, studied law, and was admitted to the New York bar in 1869. Since 1880 he has been attached to the staff of the New York "Herald," as a writer on law subjects. He has contributed numerous articles to periodical literature and to the "American Cyclopædia," the "Annual Cyclopædia," and the "Encyclopædia Britannica," and is the author of a treatise on "Law of Property in Intellectual Productions, embracing Copyright and Playright" (Boston and London, 1879), which was the first exhaustive treatise ever published on that subject.

DROWN, Thomas Messinger, chemist, b. in Philadelphia, Pa., 19 March, 1842. He was graduated at the Philadelphia high-school in 1859, and at the medical department of the University of Pennsylvania in 1862. Subsequently he studied at the Freiberg, Saxony, mining-school and in the University of Heidelberg. During 1869–'70 he was instructor of metallurgy in Harvard, and from 1874 till 1881 he held the chair of analytical chemistry in Lafayette college. In 1885 he was called to a similar place in the Massachusetts institute of technology, Boston. Prof. Drown was one of the original members of the American institute of mining engineers, its secretary, and editor of its "Transactions" from 1871 till 1884. He has published numerous professional papers on metallurgy and chemistry, and also addresses, which have appeared chiefly in the "Transactions of the American Institute of Engineers."

DROWNE, Solomon, physician, b. in Providence, R. I., 11 March, 1753; d. at Mount Hygeia, in Foster, R. I., 5 Feb., 1834. His grandfather and father were also named Solomon. The latter settled in Providence as a merchant in 1730, and for half a century bore a prominent part in the affairs of the town. Dr. Drowne was graduated at Rhode Island college (now Brown university) in 1773, studied medicine, and received medical degrees from the University of Pennsylvania and from Dartmouth. He served in several states as surgeon in various hospitals and regiments during the war of the Revolution. In the autumn of 1780 he went on a cruise as surgeon in the privateer "Hope," and his journal of this cruise, with the genealogy of his family, has been printed. He won the regard of Lafayette and the Counts de Rochambeau and d'Estaing, as well as of other French officers, to such a degree by his medical ability and skill as a surgeon that the chief of the medical staff intrusted invalid soldiers to his care when they left for home. In 1783 he was elected to the board of fellows in Brown university. After a tour in 1784–'5 in England, Holland, Belgium, and France, visiting hospitals, medical schools, etc., and becoming acquainted at Paris with Franklin, Jefferson, and other distinguished men, he resumed practice at Providence, but in 1788 went to Ohio. He participated with Gen. St. Clair and others in the treaties at Fort Harmar in 1788–'9, with Corn-Planter and other chiefs, and delivered the first anniversary oration on the settlement of Marietta, 7 April, 1789. Impaired health led to his spending several years in western Virginia and southern Pennsylvania, but in 1801 he returned to Rhode Island, and resided in Foster the remainder of his days, occupied with his professional duties, his extensive botanical garden, and various scientific, classical, and literary studies. In 1811 he was appointed professor of botany and materia medica at Brown, and in 1819 was elected a delegate to the convention that formed the national pharmacopœia by the Rhode Island medical society, of which he was vice-president. He took an active part in the organization and proceedings of the Rhode Island society for the encouragement of domestic industry, before which he delivered addresses. In 1824, in connection with his son, William Drowne, he published "The Farmer's Guide," a comprehensive work on husbandry and gardening. He filled several public offices, contributed numerous scientific and literary articles to journals of the day, and participated in the proceedings of the American academy of arts and sciences and other learned bodies, of which he was a member. During the latter part of his life he delivered several courses of botanical lectures, and many public orations and addresses of decided merit, among the most important of which were a "Eulogy on Washington," 22 Feb., 1800, and an "Oration in Aid of the Cause of the Greeks," 23 Feb., 1824.

DRUM, Richard Coulter, soldier, b. in Pennsylvania, 28 May, 1825. He studied at Jefferson college, entered the army as a private in the 1st Pennsylvania volunteers on 8 Dec., 1846, was engaged at the siege of Vera Cruz, and appointed a 2d lieutenant of U. S. infantry on 18 Feb., 1847. He was brevetted 1st lieutenant for bravery at Chapultepec and the capture of the city of Mexico. After the war with Mexico he was transferred to the artillery, was engaged in the action at Blue Water, Neb., served as aide-de-camp to Gen. Harney in the Sioux expedition, and was in Kansas during the troubles of 1856. From 1856 till 1858 he served as acting assistant adjutant-general at the headquarters of the Department of the West, and subsequently as adjutant in the artillery-school. At the beginning of the civil war he was appointed assistant adjutant-general of the U. S. army, and

promoted to captain on 14 May, 1861, major on 3 Aug., 1861, and lieutenant-colonel on 17 July, 1862. On 24 Sept., 1864, he was brevetted colonel, and on 13 March, 1865, brigadier-general for services during the war. He continued in the adjutant-general's department, was stationed in 1866–'8 at Philadelphia, in 1868–'9 at Atlanta, the headquarters of the Department of the South, receiving promotion as colonel on 22 Feb., 1869, and on 15 June, 1880, succeeded Gen. Townsend, on the latter's retirement, as adjutant-general of the army, with the rank of brigadier-general.—His elder brother, **Simon Henry**, soldier, b. in Greensburg, Westmoreland co., Pa., in June, 1807; killed in action at the storming of the city of Mexico, 13 Sept., 1847, was graduated at the U. S. military academy in 1830. He was assistant instructor of infantry tactics there in 1830–'2, was engaged in the Florida war and the Canada border disturbances, and as captain of artillery in the occupation of Texas in 1846, served through the Mexican war, distinguished himself at Contreras, where he recaptured two field-pieces taken from his regiment at Buena Vista, and fell at the assault on the city of Mexico after he had entered the Belen gate while directing the fire of a gun he had captured.

DRUMGOOLE, John C., clergyman, b. in County Longford, Ireland, in 1828. He studied for the priesthood in the United States, and, soon after being ordained priest, offered himself to Archbishop McCloskey to establish a mission for the protection of homeless and houseless children. His first effort in this direction was to take charge of "St. Vincent's lodging-house" in Warren street, which was transferred to his care by the Society of St. Vincent de Paul in 1871. He changed the title to that of "St. Vincent's home for the protection of homeless and destitute boys." Here he opened evening-schools, and lodged homeless boys at a nominal price, with a free dinner on Sundays to encourage them to come for religious instruction. The extraordinary efforts the boys made to throw off bad habits encouraged him to greater enterprises. As there was not room enough in the building in Warren street for the children who applied for admission, Father Drumgoole was forced to build a larger house. To obtain funds he established the Mission of the immaculate virgin and St. Joseph's union, and made arrangements for publishing an illustrated annual, entitled "The Homeless Child and Messenger of St. Joseph's Union." The fund accumulated from the subscriptions to this paper enabled Father Drumgoole to purchase the property on the corner of Lafayette place and Great Jones street, and to erect there, at a cost of over $400,000, the first house of the "Mission of the immaculate virgin," in which more than 500 boys are boarded and educated. Shortly afterward he purchased a farm of over 600 acres on Staten Island, gave it the name of Mount Loretto farm, and erected on it large buildings in which nearly 700 children are comfortably housed. The expense of carrying on these establishments has come almost entirely from the subscriptions to Father Drumgoole's paper. Since 1871 he has provided for 15,730 children. But the benefits of his mission have not been confined to children. During the same period 6,264 destitute adults have been clothed, thousands of outside poor have been fed every year, and the number who receive their breakfasts gratuitously every day exceeds 200.

DRUMMOND, Sir Gordon, British soldier, b. in Quebec in 1771; d. in London, England, 10 Oct., 1854. His father, a member of a Perthshire (Scotland) family of distinction, was paymaster-general of the forces at Quebec. The son entered the army, as ensign in the 1st royals, in 1789. In 1794 he had attained the rank of lieutenant-colonel, with the command of the 8th or king's regiment. He served in the campaign in Holland in 1794–'5, and especially distinguished himself at the siege of Nimeguen in 1795; was at Minorca in 1800, and took part in all the battles in Egypt until the surrender of Cairo and Alexandria. He afterward served as a staff-officer at Jamaica for a few years, and in Canada in 1808–'11, being promoted lieutenant-general in the latter year. In August, 1813, he went to Canada again as second in command to Sir George Prevost. In December he stormed Fort Niagara, captured a large amount of naval and military stores, and planned the attack on Black Rock and Buffalo, which was successfully executed, 31 Dec., 1813, by a small force under Sir P. Riall. In May, 1814, the military force under Lieut.-Gen. Drummond, and the fleet under Sir James Yeo, attacked and took Oswego, and destroyed a sixty-four-gun ship which had just been completed, together with barracks, works, and stores. He commanded at the obstinately contested battle of Lundy's Lane, 25 July, 1814, and next invested Fort Erie, assaulting the outer works so vigorously that an entrance was effected by Col. William Drummond. But at the moment when the assailants were confident of victory a large quantity of ammunition which had been placed under the platform ignited from the firing of the guns in the rear, the result being that the greater part of the British forces which had entered the fort was blown into the air. This disaster compelled Gen. Drummond to relinquish the project of capturing Fort Erie. Soon afterward he succeeded Gen. Prevost in command of the forces in Canada, and as administrator of the government, and was eminently successful. He returned to Great Britain in June, 1816, and in 1817 received the grand cross of the Bath.

DRUMMOND, Thomas, jurist, b. in Bristol Mills, Lincoln co., Me., 16 Oct., 1809. He was graduated at Bowdoin in 1830, studied law in Philadelphia, and was admitted to the bar there in 1833. He removed to Galena, Ill., in 1835, and in 1840–'1 was a member of the Illinois legislature. He was appointed U. S. judge for the district of Illinois in February, 1850, and in 1854 removed to Chicago. In 1855 the state was divided into two judicial districts, and he became judge of the northern one. In December, 1869, he was made judge of the U. S. circuit court for the 7th district, including the states of Illinois, Indiana, and Wisconsin, but resigned in July, 1884, and has since lived in retirement.

DRUMMOND, William, colonial governor, b. in Scotland; d. in Virginia, 20 Jan., 1677. In 1663, when a charter to the territory extending from the 36th degree of latitude to the St. John's river in Florida was granted by Charles II. to the Duke of Albemarle, Lord Clarendon, Lord Ashley Cooper, Lord Berkeley, and his brother, Sir William, the settlement on the Chowan, near Edenton, N. C., established ten years before by Roger Green, was organized as the Albemarle County Colony, with Drummond for governor. He received his appointment from Sir William Berkeley, governor of Virginia and joint proprietary of Carolina, who, according to instructions from his associates, instituted a simple form of government and an easy tenure of lands. In order to encourage settlement, dissenters were tolerated in the new colony, Drummond himself being a Presbyterian. He

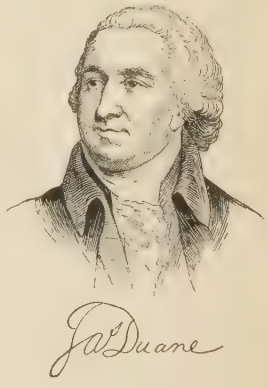
afterward returned to Virginia, where he enjoyed esteem and popularity. In the great rebellion of 1676 he bore a prominent part. When Berkeley, after being frightened into issuing a commission to Bacon to fight the Indians, proclaimed the general and his followers rebels, and endeavored to raise a force to surprise them, Drummond brought the news to the camp. When the governor fled before Bacon's returning forces he proposed that Berkeley should be deposed, asserting that he could find precedents in the ancient records of Virginia. The leading planters, meeting at Middle Plantation, now Williamsburg, agreed to support Bacon against the governor. When Sir William Berkeley returned with a band of hirelings, collected at Accomack, and occupied Jamestown, Drummond prepared for defence, and sent for Bacon, who had returned from an expedition against the Indians, and had disbanded his men. After the recapture of Jamestown he counselled the burning of the capital, removed the records to a place of safety, and with his own hand applied the torch to his dwelling, one of the best houses in the town. After the death of Bacon the insurgents were conquered through the ability of Robert Beverley, and Berkeley wreaked his vengeance by having all the principal offenders summarily executed. "I am more glad to see you," he said when Drummond was brought into his presence, "than any man in Virginia; you shall be hanged in half an hour." Drummond avowed before the court-martial that condemned him the part that he had taken in the rebellion.—His wife, **Sarah,** was as zealous a patriot as himself, and was denounced as a wicked and notorious rebel. "The child that is unborn," she declared, "shall have cause to rejoice for the good that will come by the rising of the country." After the execution of her husband she was driven from her home with her children, and compelled to depend on the charity of the planters.

DRUMMOND, William, British soldier, b. in Keltie, Perthshire, Scotland; killed at Fort Erie, Canada, 15 Aug., 1814. He entered the army at an early age, and at St. Vincent, when a lieutenant in the 2d West India regiment, received the highest testimonial from Lieut.-Gen. Hunter, under whom he served. At the attack on Sackett's Harbor, in the war with the United States, he was wounded, and so distinguished himself that he was mentioned in the public despatches. He was lieutenant-colonel of the 104th regiment, and quartermaster-general in Canada at the time of his death. He perished, according to some accounts, in the explosion of the mine at Fort Erie (see DRUMMOND, Sir GORDON); but other authorities say that Drummond ordered his men to "give the Yankees no quarter," and that he was killed by the side of Lieut. Macdonough, who had asked him for quarter, but was shot by him.

DRYSDALE, Alexander Irvin, clergyman, b. in Savannah, Ga., in 1841; d. in Waukesha, Wis., 30 Aug., 1866. He entered the Protestant Episcopal ministry in early manhood, and after a few years' service in his native city received a call from Mobile, where he remained seven years. In 1880 he returned to New Orleans as rector of Christ church. A few days before his death he was elected to the vacant bishopric at Easton, Md., but it was not supposed by his friends that he would have accepted, as he was greatly interested in the growth of his own parish. His congregation was much attached to him, and built him one of the finest church edifices in the city. Dr. Drysdale was a man of extensive learning, but was noted rather for the zeal with which he engaged in his pastoral work than for his eloquence. He died in Wisconsin, where he had gone for his health.

DRYSDALE, Thomas Murray, physician, b. in Philadelphia, Pa., 31 Aug., 1831. After spending some time in a drug-store, in order to become familiar with pharmacy, he studied medicine in the Pennsylvania medical college, and under the instruction of Dr. Washington L. Atlee, whom he assisted in the chemical laboratory of the college, and whose daughter he married in 1857. He was graduated M. D. in 1852. He lectured on chemistry in the Wagner science institute in 1855, but resigned to devote himself to his practice in surgery and gynecology. In 1862 he delivered a course of lectures on the microscope in the Franklin institute. He also made valuable microscopical observations, and discovered and described the ovarian cell which exists in ovarian tumors. He was one of the first to perform ovariotomy in Philadelphia. He was a delegate to the International medical congress in 1876, and one of the founders of the American gynecological society. He has published papers on rupture of the common duct of the liver, and the granular cell in ovarian fluid, "Dropsical Fluids of the Abdomen," being chap. xxiv of W. L. Atlee's work on "Diagnosis of Ovarian Tumors" (Philadelphia, 1873), and addresses on tracheotomy, and the use of chlorate of potassa in diphtheria and pseudo-membranous croup.

DUANE, James, jurist, b. in New York city, 6 Feb., 1733; d. in Duanesburg, N. Y., 1 Feb., 1797. He inherited a tract of land at Duanesburg, on which he established a settlement in 1765. He became a lawyer, married in 1759 a daughter of Col. Robert Livingston, and attained eminence in his profession in New York. He was the leading advocate of the rights of New York to the New Hampshire grants, and drew up a memorial to the assembly in 1773 in support of the claim of his state to an eastern boundary on the Connecticut river. He was one of the principal New York grantees of territory in Vermont, and when Ethan Allen, Seth Warner, and Remember Baker drove out the New York officials, he headed the applicants who induced the legislature to declare those men traitors and outlaws. He was one of the conservative candidates proposed for congress by the committee of fifty-one in 1774, and was elected a delegate to the 1st Continental congress. In that body he proposed the recognition of the British acts of navigation, and encountered violent opposition, though the resolution of John Adams that was adopted was nearly identical with his own. He seconded Galloway's proposal for a union of the colonies under a grand council, subordinate to parliament, and a president, nominated by the king, and with Galloway entered a protest against the resolution of 8 Oct., 1774, in favor of supporting Massachusetts in her opposition to the acts of parliament. He opposed the idea that no acts of parliament could bind the congress, and moved to strike the Quebec act out of the list of grievances.



With John Jay and Peter Van Schaack he drew up an article of association which all the revolutionists in the town signed after the battle of Lexington. Like Jay, he was in the beginning of the Revolution devoted to the English form of government and to the English church, and opposed to the republican sentiments that prevailed among the mechanics of New York. In the contest between the two revolutionary factions, the party of conciliation, of which those two prominent lawyers were exponents, obtained the representation in congress. In the 2d congress, on 24 May, 1775, Mr. Duane moved the opening of negotiations to settle the disputes between the colonies and Great Britain. He was prepared for extreme measures if the British ministry offered no substantial concessions, but in April, 1776, he opposed the Declaration of Independence before the arrival of the commissioners appointed to treat with the colonists. In May he still urged delay in order to ascertain the wishes of the people before changing the government. He was a member of the Continental congress during the whole period of its existence; also of the New York provincial congress in April, 1775, and from June, 1776, to April, 1777, also serving on the committee appointed to draft a state constitution. In 1776–'7 he was a member of the committee of safety. He returned to New York city after its evacuation in 1783, and was chosen the first mayor of the corporation under the new charter, derived from the state legislature, serving from 1784 to 1789. He was a member of the state senate in 1782–'5 and in 1789–'90; also of the council, and of the convention that adopted the Federal constitution in 1788. From 1789 to 1794 he was U. S. district judge for New York.

DUANE, James Chatham, military engineer, b. in Schenectady, N. Y., 30 June, 1824. He was graduated at Union college in 1844, and at the U. S. military academy in 1848. From 1848 till 1854 he served with the engineer corps, and as assistant instructor at West Point. He was then employed in the construction of fortifications till 1856, was light-house inspector at New York in 1856–'8, commanded the engineer company in the Utah expedition of 1858, and was afterward instructor of engineering at the military academy till the beginning of the civil war. He was stationed at Fort Pickens, Fla., in 1861. During the winter following he organized engineer equipage for the Army of the Potomac, went to Harper's Ferry in February, 1862, to bridge the Potomac, commanded the engineer battalion at the siege of Yorktown, constructed bridges across Chickahominy and White Oak swamps, was engaged at Gaines's Mill on 27 June, 1862, and in the subsequent operations of the Peninsular campaign made roads, field-works, and bridges, notably one 2,000 feet long across the Chickahominy. In the Maryland campaign he served as chief engineer of the Army of the Potomac, and was engaged at South Mountain and Antietam. In 1863, as chief engineer of the Department of the South, he took part in the attack on Fort McAllister, Ga., and in operations against Charleston. From 15 July, 1863, he was again attached to the Army of the Potomac, and was engaged at Manassas Gap, Rappahannock Station, the Wilderness, and Cold Harbor, and distinguished himself at the siege of Petersburg. He became captain of engineers on 6 Aug., 1861, major on 3 March, 1863, and was brevetted colonel on 6 July, 1864, and brigadier-general at the close of the war. From 1865 to 1868 he superintended the construction of the fort at Willet's Point, N. Y., receiving promotion as lieutenant-colonel on 7 March, 1867. He served subsequently as superintendent of fortifications on the coast of Maine and New Hampshire, as light-house engineer of the northeast coast, as a member of various engineer boards, and as president of the board of engineers in New York city. He was promoted colonel on 10 Jan., 1883, and in the autumn of 1886 was appointed chief of engineers, with the rank of brigadier-general. He has published a "Manual for Engineer Troops" (New York, 1862).

DUANE, William, journalist, b. near Lake Champlain, N. Y., in 1760; d. in Philadelphia, 24 Nov., 1835. He was educated in Ireland, learned the business of printing, and in 1784 went to India, where he amassed property rapidly, and became editor of a journal entitled "The World." Having taken sides against the local government in a dispute with some of its troops, he was invited by the governor, Sir John Shaw, to breakfast, and while on the way to meet the appointment was seized by Sepoys, put on board a vessel, carried to England, and his large fortune confiscated. After vainly petitioning parliament and the East India company for redress, he became editor of the "General Advertiser" (which was subsequently merged in the "London Times"). In 1795 he returned to this country and became editor of the Philadelphia "Aurora," making it the leading organ of the democratic party. Jefferson attributed his election to the presidency to its vigorous support, and appointed Mr. Duane a lieutenant-colonel in July, 1805. He served in the war of 1812–'15 as adjutant-general, his commission dating in March, 1813. The change of the seat of government to Washington diminished the political importance of the "Aurora," and Mr. Duane retired from its editorship in 1822, travelled through the republics of South America, and on his return he published "A Visit to Columbia in 1822–'3" (Philadelphia, 1826). He was appointed prothonotary of the supreme court of Pennsylvania for the eastern district, an office which he retained until his death. He published "The Mississippi Question" (Philadelphia, 1803); a "Military Dictionary" (1810); "An Epitome of the Arts and Sciences" (1811); a "Hand-Book for Riflemen" (1813); "Hand-Book for Infantry" (1813); and "American Military Library" (1819).—His son, **William John,** b. in Clonmel, Ireland, in 1780; d. in Philadelphia, 27 Sept., 1865, was originally a printer, afterward a paper dealer. He studied law, was admitted to the bar in 1815, and often represented Philadelphia in the legislature. He became a distinguished lawyer, took a deep interest in schools, and was a trustee and subsequently a director in Girard college. During his father's editorship of the "Aurora" he was his assistant, became secretary of the U. S. treasury in 1833, and was removed by President Jackson for declining to order the removal of the deposits from the U. S. bank. He published "The Law of Nations Investigated" (Philadelphia, 1809); "Letters on Internal Improvements" (1811); and "Narrative and Correspondence concerning the Removal of the Deposits" (1838).—**William,** son of William John, b. in Philadelphia in 1807, has published "Christopher Marshall's Diary," edited (1839; new ed., 1849); "A View of the Relation of Landlord and Tenant in Pennsylvania" (1844); "Coffee, Tea, and Chocolate," translated from the French (1846); "Law of Roads, Highways, Bridges, and Ferries in Pennsylvania" (1848); and "Canada and the Continental Congress" (1850).

DUARTE, Juan Pablo (du-ar'-te), founder of the Dominican republic, b. in Santo Domingo city early in the present century; d. in Venezuela, 15

July, 1876. He studied law in Spain, where he was admitted to the bar. While he was studying, the eastern part of the island of Santo Domingo, which had become independent from Spain, was conquered by the republic of Hayti, which occupied the western part, thus making the island into a single republic. The Haytians ruled with an iron hand on the conquered part, which was inhabited largely by people of Spanish descent. Duarte, after returning to his native city, conceived the idea of freeing his country, and founded in 1838 "La Trinitaria," a secret society, which soon extended through the Spanish section of the island, and paved the way for national independence. A first attempt to obtain this, made in March, 1843, was unsuccessful, and Duarte was compelled to leave the country. On 27 Feb., 1844, another attempt was made, this time a successful one. A commission was sent to Curaçao, where Duarte resided, to bring him to Santo Domingo, to take part in the provisional government of the new republic, and on 12 June, 1844, he was nominated in Cibao for president by the liberal party, in opposition to Gen. Santana, appointed to the same office in Santo Domingo city by the reactionary party. Duarte was defeated and banished, remained in obscurity for many years, and only appeared in the island after the return of the Dominican republic to Spanish rule in 1861. He took part in the struggle that ended in 1865, in the re-establishment of the republic, went on a mission abroad, and died in Caracas. In 1883 the board of aldermen of Santo Domingo caused a life-size portrait of Duarte to be placed in the municipal hall, and in 1884 his remains were brought to Santo Domingo with appropriate public ceremonies.

DUARTE COELHO, Pereira (doo-ar'-te-co-el'-lo), Portuguese nobleman, d. 7 Aug., 1554. King Juan III., of Portugal, bestowed on Duarte one of the first hereditary captainships of Brazil. When he was sailing along the coast of Africa adverse winds compelled him to put in at the island of Itamaraca, where he fought the French, ascended the river Iguarasu, and compelled the Portiguare Indians to leave their village, which he made the seat of his government. On 10 April, 1534, the captainship of Pernambuco was added to his royal donations, and on 24 Oct. his dominion was extended from San Francisco river to that of Iguarasu. In 1535 Duarte founded the city of Olinda, where he removed with his wife and other colonists. He was at first seriously annoyed by the warlike tribe of Catrete Indians, who declared war against him, and afterward by revolts of the colonists, who were for the most part criminals and vagabonds, sent to the colony by the Portuguese government; but he soon put an end to all disturbances. The captainship of Pernambuco throve so well that in 1549, when the general government was established in Brazil, taking away the special privileges of grantees, those of Duarte were accepted. After conquering and settling more than 50,000 square miles of land, and founding several towns and cities, Duarte died, leaving his command to his wife, Brites de Alburquerque, his direct heir being absent in Portugal.

DUBBS, Joseph Henry, clergyman, b. in North Whitehall, Pa., 5 Oct., 1838. He was graduated at Franklin and Marshall college, Lancaster, Pa., in 1856, and at Mercersburg theological seminary in 1859. After holding various pastorates in the German Reformed church, he became in 1875 professor of history and archæology in Franklin and Marshall college. He has discovered many documents relating to the history of the German churches in Pennsylvania, and published review articles on "Early German Hymnology in Pennsylvania" and "Otterbein and the Reformed Church"; and a volume entitled "Historic Manual of the Reformed Church" (Lancaster, Pa., 1885).

DUBOIS, Charles E., artist, b. in New York about 1840. He studied in Paris under Gleyre and Français, and afterward painted in Venice and Rome. At the Paris salon of 1873 he exhibited "Cottages of the Seeland" and "Village of Auvernier"; to that of 1876 he sent "Mill near Dordrecht"; in 1878, "Morning on the Prairie"; to the Philadelphia exhibition, "Willows at East Hampton" and "The Palisades of the Hudson"; to the Paris exposition of 1878, "Morning in Venice," "View on the Hudson," and "Autumn"; to the exhibition of the Society of American artists in 1878, "Evening at East Hampton."

DU BOIS, Gualterus, clergyman, b. in Streefkerk, Holland, in 1666; d. in New York city in October, 1751. He was the son of Rev. Peter Du Bois, a clergyman of Amsterdam. He was called to New York in 1699 as a colleague of Henricus Selyns, whom he succeeded. The services of the Reformed church at that time were conducted entirely in the Dutch language, Rev. A. Laidlie being the first clergyman that preached in English. Contemporary with Du Bois were Henricus Boel (1713–'54), Johannes Ritzenia (1744–'96), and Lambertius De Ronde (1751–'95). Du Bois was a man of a quiet and peaceful spirit, prudent, judicious, and consistent, of high character, and greatly beloved. He was so universally respected that he is said to have been more like a bishop among the Dutch churches of that day than the pastor of a single organization. His correspondence with the classis of Amsterdam is voluminous, and marked by a spirit of moderation and kindness. He left a large amount of manuscript, including commentaries on different books of the Bible.

DUBOIS, Henry Augustus, physician, b. in New York city, 9 Aug., 1808; d. in New Haven, Conn., 13 Jan., 1884. He was graduated at Columbia in 1827, and at the College of physicians and surgeons in 1830, after which for a time he was house physician to the New York hospital. In 1831 he visited Europe, and there pursued studies under the masters in surgery and medicine. During his stay in Paris he became a member of the Polish committee there, holding weekly meetings at the residence of either Lafayette or J. Fenimore Cooper. It was his intention to join the Polish army, but he was finally dissuaded from that purpose. In 1834 he was one of the few Americans who followed the body of Lafayette to the grave, and was exposed in the attack made by the "red republicans" to seize the body. He returned to New York in November of that year, and entered on the active practice of his profession, becoming one of the physicians to the New York dispensary. In 1835 he married a daughter of Peter A. Jay, of the New York bar. Impaired health soon caused his removal to Ohio, where he had inherited a large tract of land, on which he laid out and in a great measure built up Newton Falls. While residing in the west he withdrew from active practice, but continued to act in consultation. In 1852 he returned to New York greatly improved in health, and became president of the Virginia cannel coal company, and later of the Peytona cannel coal company. Two years later he removed to New Haven, where he has since resided. Dr. Dubois is a member of scientific societies. Although he has published no contributions to medical science, he has largely influenced the opinions of his

professional brethren, especially in reference to scarlet fever. He contended more than forty years ago that this disease is an asthenic epidemic, and not amenable to medicines until it has run its course. In 1864 he received from Yale the degree of LL. D. for his reply to the seven English essayists, which was republished in London—His son, **Augustus Jay,** civil engineer, b. in Newton Falls, Trumbull co., Ohio, 25 April, 1849, was educated at the Sheffield scientific school of Yale, where he received the degrees of Ph. B. in 1869, C. E. in 1870, and Ph. D. in 1872, after which he devoted two years to special study in mechanics at the Freiburg, Saxony, mining-school. On his return to the United States he was made professor of civil and mechanical engineering in the Lehigh university, Bethlehem, Pa., holding that chair from 1874 till 1876, when he became professor of mechanical engineering in the Sheffield scientific school, succeeding in 1884 to the chair of civil engineering in that institution, made vacant by the death of Prof. William A. Norton. Prof. DuBois is a member of numerous scientific societies, and has lectured on "Science and Faith," "Science and the Supernatural," "Science and the Spiritual," and similar subjects. Besides frequent contributions to the engineering press he has published "Elements of Graphical Statics" (New York, 1875); Weyranch's "Calculations of Strength and Dimensions of Iron and Steel Construction," edited and translated (1877); "Hydraulics and Hydraulic Motors" (1877) and "Theory of Steam Engine" (1878), being two volumes of Weisbach's "Mechanics," translated and edited; Rontgen's "Principles of Thermodynamics," translated and edited (1880); "The Strains in Framed Structures" (1883); and "Tables for Bridge Engineers" (1885).

DUBOIS, John, R. C. bishop, b. in Paris, 24 Aug., 1764; d. in New York, 20 Dec., 1842. His father died while John was a child, and he received his early education from his mother. He afterward entered the College of Louis le Grand, where the Abbé Delille was one of his professors, and Robespierre and Camille Desmoulins were his classmates. He studied theology in the Oratorian seminary of St. Magloire, and on 22 Sept., 1787, though still under the canonical age, was ordained by special dispensation. He was then appointed assistant rector of the parish of St. Sulpice and chaplain to the insane asylum called the Hospice des petits maisons. At the beginning of the Revolution he was forced to fly from Paris. Obtaining a passport and letters of introduction from Lafayette, he escaped to Havre de Grace and sailed for Norfolk, Va., where he arrived in August, 1791. He was warmly received by Bishop Carroll, who appointed him pastor in Norfolk and afterward in Richmond, Va. Father Dubois was taught English by Patrick Henry, and lived in the house of James Monroe, the future president. He also, by invitation, used the state capitol in Richmond, for some time, for religious services. He was next summoned by Archbishop Carroll to Frederick, Md., exercised the duties of pastor in western Maryland and Virginia, and was for a long time the only priest between Baltimore and St. Louis. In 1805 he began the building of a college and church at Mount St. Mary's, Emmettsburg, Md., and the former, under his care, was developed into one of the most important ecclesiastical institutions of the country. He acted as president of Mount St. Mary's until 1826, when he was appointed bishop of New York, his diocese embracing also a part of New Jersey. He was involved, soon after his consecration, in difficulties with the trustees of his churches, who refused to pay a salary except to such priests as they had selected. Although hampered by their opposition, he succeeded in erecting new churches in Albany and Buffalo. Finding that he could not obtain the funds necessary for his projects, he visited Europe in 1829, returned with some French priests, and, having received a grant of money from the Society for the propagation of the faith, built a college at Nyack. This was hardly finished, however, when it was burned to the ground, its presence in the neighborhood having excited an intense feeling of religious bigotry. During his administration, a plan to destroy St. Patrick's cathedral, New York, was also frustrated. After an unsuccessful attempt to found a college in Brooklyn, he purchased an estate in Jefferson county and built St. Vincent de Paul's seminary at Lafargeville. In 1838 his failing health obliged him to take a coadjutor. When he entered New York there were only a few priests in the state; there were now forty-three, with twenty-six churches, a college, two academies, five asylums, and several parochial schools. See "Discourse on Bishop Dubois," by Rev. John McCaffrey, D. D.

John DuBois.

DU BOIS, William Ewing, numismatist, b. in Doylestown, Pa., 15 Dec., 1810; d. in Philadelphia, Pa., 14 July, 1881. He was assistant assayer at the U. S. mint in Philadelphia in 1836, and held the office until he succeeded his chief, Jacob R. Eckfeldt, on the death of the latter in 1872. The extensive numismatic collection in the mint at Philadelphia is wholly due to the skill and industry of Mr. Du Bois. Besides other contributions to the science of numismatics, he wrote "A Manual of Gold and Silver Coins of all Nations" (1842–'51); and also had a large share in writing "A Description of Ancient and Modern Coins" (1860).

DUBOSE, Catherine Anne, poet, b. in Hook Norton, Oxfordshire, England, 19 Sept., 1826. When she was about five years of age her father, the Rev. William Richards, a Baptist clergyman, emigrated to the United States, settling first at Hudson, N. Y., and subsequently making his home in Georgia. Her education was begun in New York city and completed at Midway, Ga. On 20 June, 1848, she married Charles W. Dubose, a lawyer of Sparta, Ga. Her contributions to literature have been chiefly in the form of tales and poems, appearing in journals and magazines, usually over the pen-name of "Leila Cameron." Some of her best efforts were published in the "Southern Literary Gazette" (Charleston, S. C.), of which her brother, the Rev. William C. Richards, was editor. In the "Orion Magazine," of Georgia, was published a prize poem by her, entitled "Wachulla," after the fountain of that name at Tallahassee, Fla. In 1858 she published "The Pastor's Household," a prose story for the young. She completed a second story, called "The Elliot Family," but the manuscript was destroyed in a fire in New York. She is a sister of the artist, T. Addison Richards of that city.

DU BOSE, Dudley McIver, lawyer, b. in Shelby county, Tenn., 28 Oct., 1834. He was educated at the University of Mississippi, and studied and practised law. At the beginning of the civil war he entered the Confederate army and rose to the rank of brigadier-general. After the war he represented Georgia in congress, serving from 4 March, 1871, till 3 March, 1873.

DUBOST, mother superior, b. in Paris, France, in 1793. She embraced the religious life at the age of nineteen, and after her novitiate as a Sister of Charity was sent to labor in an asylum for foundlings at Versailles. Since that time she has worked in orphanages and hospitals in Brazil. She introduced the Sisters of Charity into Brazil in 1848, and has since made fifty voyages to France, her last being in 1866. She holds the office of visitor of the Sisters of Charity of Brazil.

DUBOURG, William Louis, R. C. bishop, b. in Cape François, Santo Domingo, in 1766; d. in Besançon, France, in 1833. He was sent to the seminary of St. Sulpice, Paris, for his education, and was attending lectures at the Sorbonne when the Revolution began, and he had to take shelter with his family at Bordeaux. Thence he escaped to Spain, and embarked for the United States in 1794. He entered the seminary of St. Sulpice, Baltimore, on his arrival, and was ordained a member of the order in the following year. He was appointed president of Georgetown college in 1796, and spent the next three years in extending the interests of that institution. He was sent to Havana in 1798 with the object of founding a Sulpitian college in Cuba. He was not successful in his immediate purpose, but many of the inhabitants intrusted him with the education of their children, and on his return to Baltimore he opened a college, which was soon crowded with students from the West Indies. In 1803, however, the Spanish government sent a frigate to take back his pupils, being alarmed at so many sons of Cuban planters being educated under republican influences. In 1806 he succeeded in having St. Mary's college, which he had founded, raised to the rank of a university by the Maryland legislature. Father Dubourg had so much to do with the establishment of the Sisters of Charity in America that he is in a certain sense their founder. He persuaded Mrs. Seton to remain in the United States when she was about to join a religious order in Europe, invited her to Baltimore, assisted her in founding a home for her community, and was appointed ecclesiastical superior of the Sisters by Archbishop Carroll. When Mrs. Seton decided on removing to Emmettsburg, he purchased the land on which she built her convent. In 1812 he was appointed administrator apostolic of the diocese of New Orleans. His efforts to animate the patriotism of the people of Louisiana on the advance of the British troops received the warm commendation of Gen. Jackson, and on the repulse of the enemy he was intrusted with the task of reading an address welcoming the victor to the city. In 1815 he went to Europe in order to lay the wants of his mission before the pope, and on his arrival in Rome was consecrated bishop. In France he persuaded several students and priests to volunteer for the American mission, and took a leading part in founding the Association for the propagation of the faith at Lyons. In 1817 a war-vessel was placed at his disposal by Louis XVIII., and he embarked for America. He landed at Annapolis, and went to St. Louis, which he made his episcopal residence. He founded a college and an ecclesiastical seminary at the Barrens, in Missouri, which were confided to the care of the Lazarist fathers, and shortly afterward he opened a college in St. Louis. He next directed his attention to the Indians occupying the southwestern territory, and created an establishment at Florissant, which supplied missionaries for the Indians. He visited Washington in 1823, and procured the transfer of the Indian tribes in his diocese to the care of the Jesuits, obtaining a sum of money from the government for this purpose. He founded several schools for the education of girls under the care of the Sisters of Loreto, and also introduced the ladies of the sacred heart from Paris, for whom he founded convents and schools in Florissant and in St. Louis. He also erected a new cathedral in St. Louis. In 1824 he took up his residence in New Orleans, but in 1826 went to Europe, and never returned, being transferred to the diocese of Montauban, in France. In 1833 he was elevated to the archbishopric of Besançon. Bishop Dubourg was the author of "The Sons of Saint Dominick," and of a volume entitled "Saint Mary's Seminary and the Catholics at large Vindicated," besides other controversial writings.

DUBREUL, Joseph Paul, clergyman, b. in St.-Étienne, France, in 1814; d. in Baltimore, Md., in 1878. He was educated at Monistrol, Alix, and Lyons, entered the Society of St. Sulpice in 1836, and was ordained in 1841. He was the pioneer of his order in the United States, and filled in succession the offices of master of novices, rector, consultor, and provincial.

DUBUC, Joseph, Canadian jurist, b. in St. Martine, Quebec, 26 Dec., 1840. He was graduated as B. C. L. at McGill university in 1869, went to Red river in June, 1870, and was for a year a correspondent of "La Minerve" of Montreal. He was one of the two commissioners appointed to investigate the right to the hay privilege claimed by the settlers on Red and Assiniboine rivers. He has acted as counsel for the crown at criminal assizes since February, 1875, was president of the St. Jean Baptist society of Manitoba for 1875, and president of the Manitoba colonization society for 1877. He is a member of the council of Manitoba university, established in 1877. He was appointed superintendent of Roman Catholic schools, and secretary of the Roman Catholic section of the board of education for Manitoba in 1872, a member of the executive council for the northwest territories in December, 1872, and a legal adviser of the said council in 1874. He was a member of the executive council and attorney-general, in Mr. Girard's administration, from 8 July till 2 Dec., 1874, when the government resigned. He was elected speaker of the Manitoba legislature, 31 March, 1875, and represented Baie St. Paul from 1870 until 1874, when he was elected for St. Nobert, which seat he held until 1878, when he resigned, being elected by acclamation to the Dominion parliament. He was appointed a judge of the court of queen's bench in December, 1879.

DUBUIS, Claude Mary, R. C. bishop, b. in France in 1817. After his ordination he emigrated to Texas, and was stationed at Castroville in 1847. Here he lived in a wretched hut until, with the aid of a brother missionary, he was able to build a residence and a school-house with his own hands. In 1850 he was transferred to San Antonio, and had charge of the church of San Ferdinand. Here he established a convent and school of the Ursulines. In 1862 he was appointed bishop of Galveston. Bishop Dubuis was so successful in reorganizing his diocese after the civil war that in 1874 it contained 55 churches, 83 priests, and about 100,000 Catholics. He resigned his see in 1880.

DUCACHET, Henry William, clergyman, b. in Charleston, S. C., 17 Feb., 1796; d. in Philadelphia, Pa., 13 Dec., 1865. He was educated in Philadelphia, and after studying medicine practised for some time in New York city. In 1825 he became an Episcopal clergyman and had charge of a parish in Salem, Mass. Subsequently he resided in Norfolk, Va., and in 1834 became rector of St. Stephen's church in Philadelphia, where he remained until his death. He represented the diocese of Pennsylvania in the general convention on several occasions, and was for many years secretary of the diocesan convention. He likewise filled the office of rector of the Burd orphan asylum, an institution which owes its origin to his exertions.

DUCALVET, Pierre, French-Canadian political agitator, b. in Canada about 1715; lost at sea in January, 1786. By trading in fur he had acquired great wealth before the British conquered Canada, and remained in the country after that event. Being a Huguenot, he did not suffer from the disabilities resulting from the legal changes introduced into Canada after the peace of Versailles in 1763. His Roman Catholic compatriots, however, did so, and it was in his endeavors to relieve them of these grievances that Ducalvet came prominently into notice. In pursuance of this object he declared open war against the legislative council, and Sir Frederick Haldimand, the governor of Canada; demanded for the Canadians the same rights as British subjects, and drew up a plan of a constitution, nearly the same as that which was granted in 1791. He also prosecuted Sir Frederick Haldimand in England, and the latter retaliated by procuring his imprisonment for treason. Ducalvet published in London a "Letter to the Canadians" and "Appeal to the Justice of the State," the latter addressed to the king and the Prince of Wales. He was lost at sea while on his way to England to continue the prosecution of Haldimand. Though he was in many respects a captious political agitator, his motives were undoubtedly pure, and he sacrificed his fortune in the cause of what he regarded as justice.

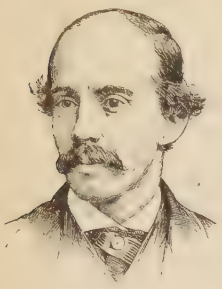
DUCASSE, Jean Baptiste, governor of Santo Domingo, b. in Bearn, France, in 1650; d. in Bourbon L'Archambault in July, 1715. He early went to sea and soon entered the service of the Senegal company, by whom, in 1678, he was sent to San Domingo. Later he commanded the Bannière, engaged by this company in transporting negroes from Africa to the West Indies. In 1691 he was appointed governor of Santo Domingo. On his arrival he found the business interests of the island in a wretched state, but under his skilful management order was soon established, and the affairs of the colony became prosperous. Agriculture flourished and the native products were largely exported. In the invasion of the island by the English and Spanish fleets he defended it, and, after he had expelled the enemy, directed the attention of the inhabitants to the cultivation of sugar and tobacco. In 1700 he was sent to Spain to negotiate a treaty between that country and France. Two years later, while in command of a French squadron, he defeated an English fleet much larger than his own, under the command of Admiral Benbow. His services in the French navy gained for him successive promotions till he became lieutenant-general, in which capacity he commanded the marine force during the siege of Barcelona. Soon afterward he resigned his command on account of failing health.

DUCATEL, Julius Timoleon, chemist, b. in Baltimore, Md., 6 June, 1796; d. there, 23 April, 1849. He was educated at St. Mary's college, and then became associated in business with his father, long the principal pharmacist in Baltimore. His experience in this direction developed a fondness for the study of the natural sciences, and he turned to Paris, where for several years he was occupied in this pursuit. Soon after his return to Baltimore he became professor of natural philosophy in the Mechanics' institute, and later professor of chemistry and geology in the University of Maryland. His ability as a scientist and his success as a lecturer afterward led to his election to the chair of chemistry in the medical department of the university. From 1832 till 1841 he held appointments in connection with the State geological survey, at first in the preliminary work, and then as geologist. Meanwhile he had been made professor of chemistry, mineralogy, and geology in St. John's college, Annapolis, but he resigned both of these posts in 1839 in order to devote more time to his speciality of geology. In 1843 he made a geological exploration of the upper Mississippi in connection with an expedition sent to that region, and in 1846 visited the Lake Superior district for persons interested in the industrial development of that country. He delivered an interesting series of lectures on his return, giving an account of his experiences. Prof. Ducatel was a member of scientific societies at home and abroad, and regularly contributed scientific articles to the "Baltimore Times" and the "American Farmer." His principal work was a "Manual of Toxicology" (Baltimore, 1848).

DUCEY, Thomas James, clergyman, b. in Lismore, Ireland, 4 Feb., 1843. When five years old he came to the United States, and, after spending some time in a law office, was adopted in 1859 by James T. Brady. He studied at the college of St. Francis Xavier, New York, and then entered the theological seminary, Troy, N. Y., in 1864. He was ordained priest in 1868, and attached to the church of the Nativity in 1869. While here the tone of his sermons excited the animosity of members of the Tweed ring, who complained to Archbishop McCloskey, and endeavored to have the young priest sent out of the city. He was supported, however, by his superiors in his denunciation of civic corruption. He was transferred to St. Michael's in 1872, and in 1873 began the work of organizing societies of Roman Catholic young men. With this object he purchased property, and for three years maintained the work to which he had devoted himself out of his own resources. In 1880 he founded the church of St. Leo at a cost of $200,000. He was one of the first to warn the public of the extent of municipal corruption in New York in 1885, declaring it worse than ever before. Father Ducey was assistant chaplain to the Tombs for some years, having volunteered for this office in addition to his other duties. He is now (1887) employed in founding a home for indigent servant women.

DU CHAILLU, Paul Belloni (du-sha'-yu'), traveller, b. in Paris, France, 31 July, 1835. He early went to live in the French settlement at the mouth of the Gaboon, on the west coast of Africa, where his father held a consular appointment, and was at the same time engaged in commerce. He was educated in one of the Jesuit institutions in that country, and acquired a knowledge of the native languages, learning from trading expeditions much of their habits and mode of life. In 1852 he came to the United States with a cargo of ebony, and soon after published in the New York "Tribune" a series of articles on the Gaboon country, which elicited much attention. After becoming a citizen of the United States, he sailed in October,

1855, from New York for Africa, with the intention of making a thorough exploration of the region on the west coast, lying between latitude 2° N. and 2° S. He spent nearly four years in this task, penetrating to about longitude 14° 15′ E., travelling on foot, unaccompanied by any white man, upward of 8,000 miles. During this time he shot and stuffed over 2,000 birds, of which 60 were previously unknown, and killed over 1,000 quadrupeds, among which were several gorillas, never before shot and probably never before seen by a white man, and 20 other species of animals previously unclassified. He returned to New York in 1859, bringing a large collection of native arms and implements, and numerous specimens in natural history, which were publicly exhibited, and many of which were afterward purchased by the British museum. The history of this expedition was published under the title of "Explorations and Adventures in Equatorial Africa" (New York and London, 1861; new ed., enlarged, 1871). This volume is a valuable contribution to the geography, ethnology, and zoölogy of western Africa, but many of its statements were received with distrust, because they were inconsistent with the maps of Henrich Barth and August Petermann. A bitter controversy arose concerning the accuracy of Du Chaillu's statements, Prof. John E. Gray, of the British museum, attacking his veracity with much asperity, while Prof. Richard Owen and Sir Roderick Murchison defended him. As Du Chaillu had made his observations from compass bearings only, their correctness could not be definitely proved, and he resolved to vindicate his reputation by a second expedition. For this he prepared himself by a course of scientific study, learned the use of astronomical and other instruments, and acquired the art of practical photography. Meanwhile his accuracy was established by the French travellers Serval and Griffon du Bellay, who, in charge of a government expedition, explored the Ogobai river and the neighboring country. His statements concerning the cannibalistic habits of the Fan tribe were verified by the English traveller, Capt. Richard F. Burton. Du Chaillu, notwithstanding his vindication, determined to prosecute his expedition, for which he had made thorough preparation. He freighted a schooner with goods for presents to the natives, and sailed from England in August, 1863. Early in October he reached the mouth of the Ogobai, and there met with a severe loss by the swamping of the canoe containing his scientific and photographic apparatus. He was obliged to send to England for a new supply, and he occupied his time in hunting excursions, during which he again had an opportunity of studying the habits of the gorilla. In September, 1864, his instruments having arrived, he set out for the interior, accompanied by ten Commi negroes. He revisited some of the scenes of his former explorations, took many accurate observations, and penetrated among tribes and through portions of country previously unknown.



In September of the following year he was forced to return to the coast in consequence of an unfortunate conflict with the natives, in which he lost everything but his journals. These contained all of his astronomical observations which verified his previous statements, and added much to the geographical knowledge of western Africa. He published an account of this expedition under the title of "A Journey to Ashango Land" (London and New York, 1867). After spending some years in the United States, where he appeared as a public lecturer, he visited Sweden, Norway, Lapland, and Finland, in 1872–'3, returning to New York late in 1873. Du Chaillu has published the following: "Stories of the Gorilla Country" (New York, 1868); "Wild Life under the Equator" (1869); "Lost in the Jungle" (1869); "My Apingi Kingdom" (1870); "The Country of the Dwarfs" (1871); "The Land of the Midnight Sun" (1881); and "The Viking Age" (1887).

DUCHÉ, Jacob, clergyman, b. in Philadelphia in 1737; d. there, 3 Jan., 1798. He was the son of a Huguenot who came to America with William Penn. He was graduated from the College of Philadelphia (now University of Pennsylvania) in 1757, afterward studied in England at the University of Cambridge, and was licensed in 1759 by the bishop of London to officiate as an assistant in the churches of Philadelphia. In 1775 he succeeded to the rectorship of Christ church, in that city, on the resignation of Dr. Peters. At the beginning of the Revolution he espoused the cause of the colonies, and was invited to make the opening prayer on the assembling of the 1st congress, 7 Sept., 1774. After reading a Psalm and several petitions from the Book of Common Prayer, he concluded with an impromptu invocation so patriotic in spirit and so reverent in tone that he was given a vote of thanks. On 9 July, 1776, he was chosen chaplain, and served three months, when he resigned. He devoted his stipend of $150 to the relief of the families of Pennsylvanians who had fallen in battle. When the British took possession of Philadelphia, Dr. Duché seemed to despair of the success of the patriot cause, and wrote a letter to Washington, in October, 1777, urging him to abandon what he considered a forlorn hope, and to "represent to congress the indispensable necessity of rescinding the hasty and ill-advised Declaration of Independence." Washington transmitted the letter to congress, and it soon found its way into the newspapers. In consequence, Dr. Duché left this country and went to England, where he was appointed chaplain to the Lambeth orphan asylum, and soon made a reputation as an eloquent preacher. In the mean time his estate had been confiscated, and he himself declared a traitor. He returned to Philadelphia in 1790 in feeble health. Dr. Duché married a sister of Francis Hopkinson, one of the signers of the Declaration of Independence. He was the master of a polished style, and wrote, among other works, "Caspipina's Letters" (Philadelphia, 1774; Bath, England, 1777), and "Discourses on Various Subjects" (London, 1779). Of the latter it has been said: "His discourses have great warmth and spirit, and at times are in the strain of our old divines." The prayer which he wrote and used during his term as chaplain in congress is a model of that style of composition.

DUCHESNE, Philippa Rose, foundress of the first houses of the Society of the Sacred Heart in America, b. in France in 1769; d. in St. Charles, La., in 1852. She received a better education than most French ladies of her time, having been taught the classics and higher mathematics with her

brothers. She was sent to a convent of the Visitation to prepare for her first communion, and, her confessor being an old missionary who had spent years among the Indians of Louisiana, her thoughts were turned to religious work in America. In 1793 she resided at Grenoble, and devoted herself to caring for the prisoners and educating the children of the streets. This life lasted until 1801, when she organized a community of religious women, whose sole occupation was to be teaching. This community was afterward amalgamated with the Society of the Sacred Heart, founded by Madame Barat. In 1818 she sailed for the United States with four companions, and landed at New Orleans. After a stay of two months she went to St. Louis, where she opened a school under circumstances of great difficulty. She next removed to Florissant, where she established a permanent centre of her order. Madame Duchesne worked a great reformation in the habits of the Creoles, Indians, and colored women who came under her influence. In 1820 she founded a community of the Sacred Heart congregation in Barreins, on the Bois-Brule, and also a boarding-school, and free schools for Indians and for white adults. She next founded the house of Grand-coteau, principally devoted to the education of the poor. In 1824 a hurricane damaged some of her houses, but she set to work with renewed energy, and in 1825 established an institution in the parish of St. Michel among the descendants of the French exiles of Acadia. In 1827 the present house of the order was founded in St. Louis. She closed her ten years' work as a religious pioneer by the foundation of a house in St. Charles. Madame Duchesne governed all her scattered houses with firmness and discretion till 1840, when she was superseded by Madame Galitzin, and became a simple nun again. She then petitioned to be allowed to fulfil her original intention of going as a missionary among the Indians. With three companions she joined a Jesuit mission among the Pottawattamies. She was well received, but the hardships of such a life for a woman over seventy were considered too great, and she was forced by her superiors to return to St. Charles at the end of a year. She lived to see her order flourish in all the great cities of the United States.

DUCKINFIELD, or **DUKINFIELD,** Sir **Nathaniel,** bart., d. in England in 1824. He was a member of the council of North Carolina, where he owned large estates, and in 1772, while on a visit to England, was induced to purchase a commission in the British army. When the war began he refused to serve against the Americans, and on his regiment being ordered to this country he contrived to remain behind. This exhibition of patriotism did not avail him, however, as in 1779 his estates were confiscated. He was intimate with James Iredell, afterward one of the judges of the supreme court of the state, and maintained a correspondence with him until the close of 1791. In 1783 he married a niece of Gen. Warde, on whose staff he was serving as aide-de-camp. In 1789 the British government made him an allowance of £3,000 for his losses as a loyalist. He never returned to this country.

DU COUDRAY, Philippe Charles Jean Baptiste Tronson, French soldier, b. in Rheims, France, 8 Sept., 1738; d. in the United States, 11 Sept., 1777. He was educated in the army as a mining engineer, and evinced such unusual talent that he was promoted, over the heads of 180 senior officers, for services in Corsica. He was adjutant-general of artillery, and ranked as one of the best military engineers in France, when, in 1776, he offered his services to Silas Deane and Benjamin Franklin, who were then engaging officers for the American army. An arrangement was therefore entered into by which Du Coudray, on condition of his furnishing certain supplies, was to receive a commission as major-general in the American service, with the command of the artillery. On his arrival in this country, he claimed that the right to command the engineers was included in this arrangement. Gen. Knox (at that time at the head of the artillery), Gen. Sullivan, Gen. Greene, and other American officers, were greatly dissatisfied with the negotiations of Franklin and Deane, and threatened to resign in case congress should ratify them. This was not done, and the matter finally dropped. Du Coudray was appointed inspector-general, with the rank of major-general, 11 Aug., 1777, and placed in charge of the works on the Delaware. While he was hastening as a volunteer to the battle of the Brandywine, his horse, becoming restive on a ferry-boat as he was crossing the Schuylkill, plunged with him into the river, and he was drowned.

DUCRUE, Bennon Francis, clergyman, b. in Munich, Bavaria, in 1721; d. in Bavaria in 1779. He was a Jesuit, and was sent by his superiors to Mexico, where he performed missionary duty for over twenty years. He returned to Europe after the Jesuits were expelled from the Spanish colonies. He wrote in German a "Relation of the Society of Jesus of the Province of Mexico, and particularly of California in 1767, with other documents worthy of being known." This relation is found in vol. xvi. of the journal of Mur. Independently of what concerns the Jesuits in California, it contains interesting notices on the geography and production of that peninsula. Mur added notes to the relation, and some specimens of the Californian language, which were communicated to him by Ducrue.

DUDLEY, Benjamin Winslow, surgeon, b. in Spottsylvania county, Va., 12 April, 1785; d. in Lexington, Ky., 20 Jan., 1870. He studied at Transylvania university, and was graduated at the medical department of the University of Pennsylvania in 1806, presenting a thesis on the "Medical Topography of Lexington." From 1810 till 1814 he was in Europe, where he studied under Sir Astley Cooper and John Abernethy in London, and under Paul A. Dubois and F. H. Larrey in Paris. On his return to the United States he settled in Lexington, Ky., remaining there in successful practice till 1854, and achieving the reputation of being the most successful surgeon west of the Alleghanies. He operated for stone in the bladder two hundred and twenty-five times, losing only six patients, and had occasion to repeat the operation in but one instance. He performed the lateral operation exclusively, and almost always with the gorget, an instrument now becoming obsolete. His success was so great that in England he was declared to be "the lithotomist of the nineteenth century." Dr. Dudley published several medical essays, was active in the organization in 1817 of the medical department of Transylvania university, long the leading school in the west, and for many years held there the professorships of anatomy and surgery.

DUDLEY, Charles Benjamin, chemist, b. in Oxford, N. Y., 14 July, 1842. He was graduated at Yale in 1871, and then pursued a course in the Sheffield scientific school, receiving the degree of Ph. D. in 1874. In September of the same year he became instructor of physics in the University of Pennsylvania, but resigned at the end of the year. He became chemist to the Pennsylvania railroad

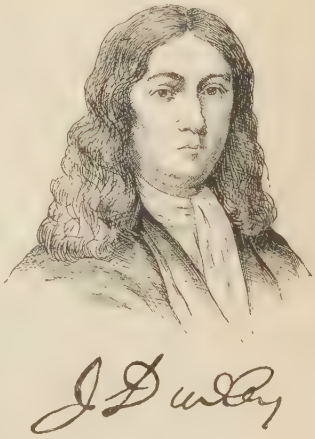
company in November, 1875, and has remained in that capacity since that time. His work has been important and has consisted of chemical researches into the quality of the materials used by the corporation. His investigation on the composition of steel rails is one of the best contributions to the literature of the subject. Dr. Dudley is a member of scientific societies, and has twice been vice-president of the American institute of mining engineers, in whose transactions he has published papers of technical value.

DUDLEY, Charles Edward, senator, b. in Johnson Hall, Staffordshire, England, 23 May, 1780; d. in Albany, N. Y., 23 Jan., 1841. In 1794 he came with his mother to Newport, R. I., where his father, Charles Dudley, who had died in London in 1790, had been the king's collector of customs. The son first became a clerk in a counting-room, but soon entered into trade, and went to the East Indies as supercargo. Subsequently he removed to New York, and then to Albany, where he became a prominent merchant. He was a member of the state senate from 1820 till 1825, and mayor of Albany from 1821 till 1828. He was elected to the U. S. senate as a democrat in 1829 to fill the vacancy caused by the resignation of Martin Van Buren, and served till 1833. He was particularly fond of astronomical science.—His wife, **Blandina,** b. in New York in 1783; d. in Albany in January, 1863, was the daughter of Rutgers Bleecker. In her later years she was lavish in the expenditure of her wealth, and contributed largely to scientific as well as benevolent and religious objects. In 1856 she gave $75,000 toward the endowment and erection of Dudley observatory in Albany, in memory of her husband. At the time of her death she had given more than $100,000 toward its completion.

DUDLEY, Dean, antiquarian, b. in Kingsfield, Me., 23 May, 1823. He is descended from Thomas Dudley, one of the first colonial governors of Massachusetts. He studied at Waterville liberal institute, Me., Greenleaf school in Bradford, Mass., and at Atkinson academy, New Haven, Conn., but was mostly self-taught. He then studied law, was admitted to the Suffolk bar in 1854, and practised for several years in Boston. During this time he procured the enactment of several important state laws. He afterward abandoned the law, on account of failing health, and devoted his attention to the publication of city, town, and county directories, of which he has compiled one hundred. In 1849 he visited England, and spent a year in making antiquarian and genealogical researches. During this time he wrote for the Boston newspapers letters afterward published with the title "Pictures of Life in England and America" (Boston, 1851). His other publications are "The Dudley Genealogies" (Cambridge, 1848); "Social and Political Aspects of England and the Continent" (1862); "History of the First Council of Nice" (Boston, 1860); "Officers of our Union Army and Navy" (Boston, 1862); and "History of the Dudley Family" (Wakefield, Mass., 1886). He compiled a "History and Genealogy of the Swift Family," which has not been printed. From 1863 till 1874 he compiled the census of school-children in Boston, and has made large collections of historical and genealogical subjects in England and America, which are still in manuscript.

DUDLEY, Edward Bishop, governor of North Carolina, b. in Onslow county, N. C., 15 Dec., 1787; d. in Wilmington, N. C., 30 Oct., 1855. He was the son of a wealthy planter, who represented Onslow county in the state senate for several years Mr. Dudley grew up on his father's estate and succeeded to its ownership. From 1811 till 1813 he was a member of the North Carolina house of commons, and in 1814 of the state senate. From 1816 till 1817, and again in 1834, he represented Wilmington in the legislature. He was chosen a member of the 21st congress as a Jackson Democrat, serving from 7 Dec., 1829, till 3 March, 1831, but declined a re-election. In 1836 he was the first governor of the state elected by the people under the amended constitution of 1835, the governors having previously been chosen by the legislature. He was also the first president of the Wilmington and Raleigh (now Wilmington and Delaware) railway. He was one of the most public-spirited and benevolent citizens of his state.

DUDLEY, Thomas, colonial governor of Massachusetts, b. in Northampton, England, in 1576; d. in Roxbury, Mass., 31 July, 1652. He was an officer in the service of Holland before joining the Puritans, and afterward retrieved the fortunes of the Earl of Lincoln by the faithful stewardship of his estates. In 1630 he came to Massachusetts with the commission of deputy governor, which office he held from 1634 till 1640, and again from 1645 till 1650. After residing in Cambridge, Ipswich, and Boston, he finally settled in Roxbury, where his estate was long possessed by his descendants. In 1644 he was appointed major-general. He was a man of talent and integrity, was bold and energetic, but intolerant and narrow in his religious views, and was even more unforbearing and arrogant than Winthrop, with whom he was closely associated.—His son, **Joseph,** colonial governor of Massachusetts, b. in Roxbury, Mass., 23 Sept., 1647; d. there, 2 April, 1720, was graduated at Harvard in 1665 and studied theology, but, preferring a political career, became a representative in the general court and a magistrate in his native town in 1673. From 1677 till 1681 he was one of the commissioners for the united colonies of New England. He was in the battle with the Narragansetts in 1675, and was one of the commissioners that negotiated the treaty with that tribe. In 1682 he went to England as agent for the colony, and, being unable to obtain a confirmation of the old charter, served himself, and became a candidate for the chief magistracy. He was appointed president of New England by James II. in 1685, and made chief justice of the supreme court in 1687. He was arrested as one of the friends of Andros, with whom he was sent to England, where he was received with favor. He was chief justice of New York from 1690 till 1693, and in the latter year again visited England, became deputy governor of the Isle of Wight, and was elected to parliament from Newtown in 1701. In the following year he returned to this country, and was made captain-general and governor of Massachusetts, serving until 1715, when he retired to his rural home in Roxbury. He carried the doctrine of submis-



sion to royal and ministerial authority to extremes, and was said to be a "philosopher and a scholar, a divine and a lawyer, all combined."—His son, **Paul,** jurist, b. 3 Sept., 1675; d. in Roxbury, 21 Jan., 1751, was graduated at Harvard in 1690, and studied law at the Temple in London. He returned to Massachusetts in 1702 with a commission from Queen Anne as attorney-general of the province, which he held until his promotion to the bench in 1718. In 1745 he became chief justice. He represented Roxbury for several years in the legislature. He was a learned naturalist, a fellow of the Royal society of London, and bequeathed £100 to Harvard for the support of an annual lecture to be delivered on one of the four subjects treated in succession—natural religion, the Christian religion, the errors of the Roman Catholic church, and one to explain and to maintain the validity of the ordination of ministers according to the ancient custom of New England. He published essays on the natural history of America, particularly of New England, in the "Transactions" of the Royal society (1720–1735), and a work against the church of Rome.

DUDLEY, Thomas Underwood, P. E. bishop, b. in Richmond, Va., 26 Sept., 1837. He was graduated at the University of Virginia in 1858, and soon afterward became a professor in that institution. During the civil war he held a commission in the commissary department of the Confederate army. Having studied theology in the Virginia theological seminary at Alexandria, he was ordained deacon by Bishop Johns, 28 June, 1867, and priest by Bishop Whittle, 26 June, 1868. While in deacon's orders he was in charge of Harrisonburg parish, Pa. In January, 1869, he became assistant minister of Christ's church, Baltimore, Md., and, on the death of the rector in 1870, was elected to the rectorship of the parish. This place he occupied at the time he was chosen to be assistant bishop of Kentucky. He was consecrated in Christ's church, Baltimore, 27 Jan., 1875, and, on the death of Bishop Smith, 31 May, 1884, he became bishop of the diocese. He received the degree of S. T. D. from St. Mary's college in 1874, and from the University of the South in 1883. He has published "A Nice Discrimination the Church's Need" (New York, 1881), being the "Bohlen Lectures" for 1881; "A Sunday-School Question-Book" (Baltimore, 1872), and occasional sermons and addresses.

DUDLEY, William Henry, physician, b. in Roscrea, Tipperary, Ireland, 7 Oct., 1811; d. in Brooklyn, N. Y., 9 Oct., 1886. He received a classical education, and was graduated at the Royal college of surgeons, Dublin, in 1833. In 1834 he sailed for Jamaica, where he was elected a fellow of King's college of physicians and surgeons, and where he practised his profession until 1841, when he settled in Brooklyn, N. Y. In 1842 he received a diploma from the College of physicians and surgeons of New York, and in 1851 was elected curator of the New York medical college, holding the office for several years. He was one of the founders of the Long Island college hospital, the first of its kind in this country, with which institution he had been connected from its incorporation as a member of the council. He also acted as its treasurer, its president, and as a member of the board of regents. In fact, but for his untiring labors, his counsel, and his generous pecuniary support, it is doubtful whether the college hospital could have been established or its permanence secured. In 1848 Dr. Dudley was elected a member of the New York academy of medicine. He was also a member of the Kings county medical and other societies.

DUDLEY, William Lofland, chemist, b. in Covington, Ky., 16 April, 1859. He followed a special course in chemistry and natural science at the University of Cincinnati, after which he was demonstrator of chemistry in 1879–'80, and professor of chemistry and toxicology from 1880 till 1886 in Miami medical college, Cincinnati. In 1886 he became professor of chemistry in Vanderbilt university, Nashville. Prof. Dudley was commissioner of the Cincinnati industrial exposition from 1883 till 1885, and a director of the Ohio mechanics' institute from 1884 till 1886. He is a member of several scientific societies, and received the honorary degree of M. D. in 1885 from Miami medical college. He has made a reputation through his success in producing iridium. In conjunction with John Holland, of Cincinnati, he devised a process for obtaining this metal, and in consequence its application in the arts has been greatly extended. The electro-metallurgy of iridium has been principally developed through his work. He has published scientific papers in various journals, and wrote the article "Iridium" in "Mineral Resources of the United States, 1883–'4" (Washington).

DUDLEY, William Russell, botanist, b. in Guilford, Conn., 1 March, 1849. He was graduated at Cornell in 1874, and subsequently studied natural history under Agassiz on Penikese island in 1875, and in the Harvard summer school in 1876. In 1873 he became instructor of botany at Cornell, and in 1884 assistant professor of cryptogamic botany, and also professor of botany in the Martha's Vineyard summer institute during its sessions in 1878–'9. Prof. Dudley has contributed articles to botanical journals and cyclopædias, and has published "The Cayuga Flora, Part I.: A Catalogue of the Phænogamia growing without Cultivation in the Cayuga Lake Basin" (Ithaca, 1886).

DUELL, Robert Holland, lawyer, b. in Warren, Herkimer co., N. Y., 20 Dec., 1824. He was educated in the common schools of New York and at Syracuse academy. He studied law, was admitted to the bar in 1845, and began to practise in Cortland in 1848. From 1850 till 1855 he served as district attorney for Cortland county, and in 1855 was made judge of that district, which office he held until 1859, when he was elected to congress as a republican. He was re-elected in 1870, serving until 1875, and in that year was made commissioner of patents, which office he held one year.

DUEÑAS, Francisco (du-ayn-yas), president of Salvador, b. about 1830. He was educated for the bar, and figured at an early age in the politics of his country, on the conservative side, but, on account of his constant opposition to the liberal government of the president, Gerardo Barrios, was obliged to emigrate to Guatemala. When, early in 1863, Gen. Rafael Carrera, president of Guatemala, suspecting Barrios of favoring a re-establishment of the Central American union, with himself as president, declared war against Salvador, Dueñas joined the invading army. Although Carrera was defeated at Coatepeque, 25 Feb., he soon raised a new army, and, after defeating a Salvadorian army under Gen. Santiago Gonzalez at Santa Ana, 30 July, he besieged and on 26 Oct. occupied the capital, San Salvador, deposed Gen. Barrios, and installed Dueñas as provisional president. In 1865 Dueñas was elected constitutional president for the term extending from April, 1865, to 1869, and in the same year a revolution in favor of the exiled Barrios broke out, San Miguel and La Union declaring in his favor, but his general, Cabañas, was routed near La Union, 29 May, and at the same time the former, preparing to sail from Realejo to join

his followers, was taken prisoner by the Nicaraguan authorities, and delivered to the government of Salvador, under a promise that his life should be spared. Notwithstanding this condition, Dueñas submitted Barrios to a court-martial largely composed of personal enemies, and he was condemned to death, and shot in August. In 1869 Dueñas was re-elected for a new term of four years, and, notwithstanding his conservative affiliation, followed a progressist policy. During his administration the first telegraph lines were established in the republic, the national palace in San Salvador built, and new and substantial wharves at the ports of La Libertad, La Union, and Acajutla were constructed. In February, 1871, Honduras declared war against President Dueñas, and at the same time, and probably in concert with Honduras, a revolution against his government broke out at home, headed by Gen. Santiago Gonzalez, and on 10 April, after a three days' battle, the government troops were defeated at Santa Ana. On the receipt of this news at San Salvador, the populace rose and sacked Dueñas's house, who fled to the American consulate for protection, but on the entry of the victorious army, April 15, order was restored and Gonzalez nominated provisional president. Dueñas, who had been delivered to the authorities, was set at liberty in June. After a prolonged trial by the supreme court, he was absolved, 4 July, 1872, but toward the end of that month, on the discovery of a conspiracy to overthrow the governments of Guatemala and Salvador, he was imprisoned again, and in August expelled from the republic with sixteen capuchin friars who were implicated with him. They went to Europe.

DUER, Edward Louis, physician, b. in Crosswicks, N. J., 19 Jan., 1836. He is descended from an old Scottish family long resident in the United States. He was graduated at Yale in 1857, and received his degree of M. D. from the University of Pennsylvania in 1860. During the years succeeding his graduation he practised with his father, Dr. George S. Duer, at Crosswicks. In 1861 he entered the U. S. army as surgeon of volunteers, and served throughout the war. He was resident physician of Philadelphia hospital from 1860 till 1862, surgeon from 1862 till 1865, obstetrician from 1861 till 1884, gynecologist of Presbyterian hospital in 1880, and lecturer on diseases of women and children in Philadelphia polyclinic from 1883 till 1885. He has published "Post-Mortem Discoveries" and "Treatment of Diphtheria."

DUER, William, statesman, b. in Devonshire, England, 18 March, 1747; d. in New York city, 7 May, 1799. He was the third son of John Duer, a planter of Antigua, who had a villa in Devonshire. His mother was Frances Frye, daughter of Sir Frederick Frye, who held a command in the West Indies, where she married John Duer. After being sent to Eton, and while still under age, he was put into the army as ensign, and accompanied Lord Clive as aide-de-camp on his return to India, as governor-general, in 1762. As he suffered severely from the climate, Lord Clive sent him back to England, where he remained five years until his father's death. Having left the army, he went to Antigua, and thence to New York, for the first time in 1768, to arrange for a regular and constant supply of lumber for the plantations in Antigua and Dominica. This brought him into contact with Gen. Schuyler, by whom he was induced to buy a large tract of land at Fort Miller, on the upper Hudson, including the falls, and here he erected large saw-mills. He was appointed colonel of militia, judge of the county courts, member of the New York provincial congress, and member of the committee of safety. In 1773 he went again to England, and obtained a contract to supply the Royal navy with timber for masts and spars. He was one of the committee that drafted the first constitution of New York in the convention of 1777. In 1777–'8 he was a delegate to the Continental congress, and in 1789 secretary of the treasury board, until the organization of the finance department under the National convention. He was a member of the state legislature, and assistant secretary of the treasury under Gov. Hamilton. Mr. Duer's failure in 1792 produced the first financial panic caused by speculation that New York had ever witnessed. The loss was estimated at $3,000,000, and impoverished many in all classes. On 27 July, 1779, he married **Catherine,** second daughter of Gen. William Alexander, the claimant of the Scottish earldom of Stirling. The marriage took place at his country seat, "The Buildings," near Baskingridge, N. J., which was designed to imitate the residence of an English nobleman, with all the appointments of an English country seat. She was descended from James Alexander, the De Peysters, Livingstons, and Schuylers, and occupied a brilliant place in the society of the period.—

Cath. Duer

His eldest son, **William Alexander,** jurist, b. in Rhinebeck, N. Y., 8 Sept., 1780; d. in New York, 30 May, 1858, studied law in Philadelphia, and with Nathaniel Pendleton in New York. During the quasi war with France in 1798 he obtained the appointment of midshipman in the navy, and served under Decatur. On the adjustment of the French question, he resumed his studies with Pendleton, and was admitted to the bar in 1802. He engaged in business with Edward Livingston, who was then district attorney and mayor of New York, and, after his removal to New Orleans, formed a professional partnership with his brother-in-law, Beverley Robinson. About this time he contributed to a partisan weekly paper called the "Corrector," conducted by Dr. Peter Irving in support of Aaron Burr. Mr. Duer shortly afterward joined Livingston at New Orleans, and studied Spanish civil law. He was successful, but, owing to the climate and to his marriage with the daughter of William Denning, a prominent whig of New York, he was induced to resume practice in the latter city. Here he contributed literary articles to the "Morning Chronicle," the newspaper of his friend Peter Irving. He next opened an office in Rhinebeck, and in 1814 was elected to the state assembly, where he was appointed chairman of a committee on colleges and academies, and succeeded in passing a bill, which is the original of the existing law on the subject of the common-school income. He was also chairman of the committee that arranged the constitutionality of the state law vesting the right of navigation in Livingston and Fulton, and throughout his service bore a prominent part in promoting canal legislation. He was judge of the

supreme court from 1822 till 1829, when he was elected president of Columbia college, where he remained until failing health compelled him to resign in 1842. During his administration he delivered to the senior class a course of lectures on the constitutional jurisprudence of the United States (published in 1833; revised ed., 1856). He delivered a eulogy on President Monroe from the portico of the city hall. After his retirement he resided in Morristown, N. J., where he wrote the life of his grandfather, Lord Stirling (published by the Historical society of New Jersey). In 1847 he delivered an address in the college chapel before the literary societies of Columbia, and in 1848 an historical address before the St. Nicholas society, which gives early reminiscences of New York, and describes the scenes connected with the inauguration of President Washington, both of which were published. He was the author of two pamphlets addressed to Cadwallader D. Colden on the "Steamboat Controversy," and the "Life of William Alexander, Earl of Stirling" (New York, 1847). —Another son, **John,** jurist, b. in Albany, N. Y., 7 Oct., 1782; d. on Staten Island, 8 Aug., 1858, entered the army in his sixteenth year, but after two years left the service for the study of law. He began practice in Orange county, N. Y., and removed to New York city about 1820, where he acquired reputation as an insurance lawyer. He was a delegate to the State constitutional convention in 1821, and in 1825 was appointed one of the commissioners to revise the statutes law of the state, and afforded valuable assistance in the preparation of the first half of the work. He was elected an associate judge of the superior court, and, on the death of Judge Oakley in 1857, became chief justice. He has published "A Lecture on the Law of Representations in Marine Insurance, with Notes and Illustrations" (New York, 1844); "A Treatise on the Law and Practice of Marine Insurance," which has become a standard authority in the United States (2 vols., 1845–'6); "A Discourse on the Life, Character, and Public Services of James Kent, Chancellor of the State of New York," delivered by request before the judiciary and bar of the city and county of New York (12 April, 1848); "Three of the Revised Statutes of the State," in connection with Benjamin F. Butler and John C. Spencer; and at the time of his death was editing Duer's reports of the decisions of the superior court, the sixth volume of which he left incomplete. —**William,** son of William Alexander, lawyer, b. in New York city, 25 May, 1805, was graduated at Columbia in 1824, studied law, and removed to Oswego in 1828. In 1832 he was an unsuccessful candidate for the legislature, and in that year returned to New York, and went thence to New Orleans. In 1835 he again resided in Oswego, and was a member of the New York legislature in 1840, and district attorney for Oswego county from 1845 till 1847. He was twice elected to congress as a whig, serving from 1847 till 1851.

DUERINK, John Baptist, missionary, b. in St. Giles, near Lermonde, Belgium, in 1809; d. in Kansas in 1857. He was educated in the Episcopal seminary of Ghent, and, having long desired to devote himself to the conversion of the savages of North America, he embarked for the United States in 1833. He entered the Society of Jesus in Missouri, beginning his novitiate at St. Stanislaus, near Florissant, in 1834, afterward teaching for several years, and serving as treasurer of the colleges of Cincinnati, St. Louis, and Bardstown. He was an accomplished botanist, and traversed a great portion of Illinois and Ohio in search of rare plants and flowers, discovering several new varieties, one of which is known as the *prunus Duerinkiana*. In 1849 he was sent among the Indians. The mission of the Pottawattamies, which he conducted, owed its great success to him. These savages had already been converted, but he civilized them, and induced them to prefer agriculture to the chase. He established schools for the youth of the tribe, and succeeded in interesting the national government in his work. Many of his letters to the authorities were published in the documents that accompany the annual message of the president (1852–'7). Father Duerink was drowned while descending the Missouri river in a small boat.

DUFF, John, actor, b. in Dublin, Ireland, in 1787; d. in Philadelphia, Pa., in April, 1831. Before coming to the United States he was prominent as an actor at the Theatre Royal in his native city. He made his first appearance in this country at the Federal street theatre, Boston, 8 Nov., 1810, as George Gossamer in "Laugh when You Can." His first appearance in New York was at the Park theatre, 14 Jan., 1814, as Octavian in "The Mountaineers," and the "Three Singles." Mr. Duff was for many years the most popular actor in the old Philadelphia company, where he was engaged in 1811 as a "stock star," and attracted far better houses than many who claimed the highest honors. His versatility seems to have been unbounded. He could act Richard or Jeremy Diddler, sing a comic song or take a part in an opera, with equal acceptability. In 1823, when he introduced Mrs. Duff to the New York public, the brilliancy of her acting scarcely allowed a thought of him, and soon afterward he suffered greatly from violent attacks of gout; yet he frequently played at the old Chatham, Bowery, and Lafayette theatres, where he appeared for the last time.—His wife, **Mary Ann,** actress, b. in London, England, in 1795; d. in New York, 5 Sept., 1857, was the daughter of an Englishman named Dyke, who had held an office in the service of the East India company, and died, leaving her and her sisters with small support. They received instruction in dancing from the ballet-master D'Egville, and made their first appearance as professional dancers at the Dublin theatre. While playing with a party of amateurs at Kilkenny, Mary attracted the attention of Thomas Moore, who acted the part of Robin Roughead in "Fortune's Frolic," but, receiving no encouragement, he transferred his affections to her sister, Elizabeth, whom he soon married. After her marriage Mrs. Duff came to Boston with her husband, in 1810, where she made her first appearance on the American stage as "Juliet," but without success. Subsequently she appeared in characters of minor importance, and also in serious pantomimes. In 1817 she began to develop great ability. In 1823 she visited New York for the first time, and appeared in the Park theatre as Hermione in the "Distressed Mother," adapted from Racine's "Andromache." This was the character in which her talents were first asserted and in which she first became known. About this time she played leading Shakespearean parts with Edmund Kean, who considered her the equal of the foremost British actresses of that day. She visited England in 1828, and made her first appearance in London as Isabella in the "Fatal Marriage." Her beauty and talent made her a great favorite throughout the United States. While she was travelling from Cincinnati to New Orleans upon the Mississippi river the Asiatic cholera broke out among her fellow-passengers. Fearless for her own life, she administered to the sick and dying, and upon her arrival in New Or-

leans received a vote of thanks from the survivors. She made her last appearance in New Orleans in 1838 for the benefit of the orphan boys' asylum. After the death of Mr. Duff she married Mr. Seevir, a lawyer in that city, and retired from the stage.

DUFF, Peter, educator, b. in the province of New Brunswick, Canada, 16 Feb., 1802; d. in Pittsburg, Pa., 13 Sept., 1869. His parents emigrated from Scotland in 1802, and settled on a large farm in New Brunswick. Filled with the desire for an active life, he left the farm without the knowledge of his family and went to Edinburgh, where he was educated. His intention was to become a physician, but he finally decided to be a merchant, and returned to New Brunswick, settling in St. Johns, here he soon became prominent, owning many ships and extensive warehouses. Owing to a large fire in 1835, he became bankrupt and went to Pittsburg, Pa., where, in 1840, he founded "Duff's mercantile college," one of the first institutions of the kind in the country, which was very successful, and was carried on by his sons after his death. He published the "North American Accountant" (1847; enlarged ed., 1867; 20th ed., 1885).

DUFFEE, Mary Gordon, author, b. in Alabama about 1840. She lives on a lonely mountain in Blount county, Ala., dresses in ancient and eccentric style, and writes under the pseudonym of "Mary Duff Gordon." In May, 1874, she delivered the address of welcome to the visiting Press association of New York to Alabama. She has written a series of papers in aid of the development of southern industries, and numerous poems, among which "Cleopatra" is the best known. Miss Duffee is a member of the American historical and biographical society, of the North American geographical society, and the New Orleans academy of sciences, and is also the author of a "History of Alabama," "Guide to the Mammoth Cave, Kentucky," guide-books to Blount Springs, Ala., and to various interesting places along the southern railways.

DUFFERIN, Frederick Temple Hamilton Blackwood, Earl of, British statesman, b. in Florence, Italy, 24 June, 1826. His father was Price, fourth Baron Dufferin and Clandeboye, and his mother, Helen Selina, a granddaughter of Richard Brinsley Sheridan, was well known as a writer of prose and verse. He was educated at Eton, and at Christ Church, Oxford, but left the university without taking a degree. He succeeded to his father's title in 1841, and was for some years subsequent lord-in-waiting to the queen. In 1855 he was attached to the mission undertaken by Lord John Russell to Vienna, and in 1859 made a yacht voyage to Iceland, a narrative of which he published (Boston, 1859). He was sent by Lord Palmerston in 1860 as a British commissioner to Syria to make inquiries into the massacre of the Christians there, and on his return was made a K. C. B. He was under-secretary of state for India from 1864 to early in 1866, and from the latter date was for a few months under-secretary for war. When Mr. Gladstone came into power in December, 1868, he was appointed chancellor of the Duchy of Lancaster, in 1871 he was created Viscount Clandeboye and Earl of Dufferin, and in 1872 he became governor-general of Canada. The duties devolving upon this officer are not weighty, being almost entirely limited to the opening and dissolution of parliament; but there are other duties, more social than political in their character, which are regarded as scarcely less incumbent on the viceroy. While acting in this dual capacity the Earl of Dufferin secured a degree of popularity never gained by any of his predecessors. In education and all other matters of public concern he displayed the greatest interest, and he was soon known as the ablest orator in Canada. In the summer of 1876 Earl Dufferin, accompanied by Lady Dufferin, made a tour through British Columbia, where a great degree of discontent prevailed, in consequence of a belief that the terms upon which that remote province had joined the Dominion had not been complied with. Earl Dufferin's visit, and his advocacy of the union and the prospective benefits likely to accrue to British Columbia from it, allayed the prevalent discontent, and did much to increase the friendship between the people of the Pacific coast and their eastern compatriots. He held the office of governor-general of Canada till October, 1878, when he was succeeded by the Marquis of Lorne. On the eve of his leaving Canada he was presented with an address signed by seventy-four mayors, wardens, reeves, and councillors representing municipalities in Ontario. In May, 1878, he was elected president of the Royal geographical society, and in June following he attended the Harvard commencement, when the degree of LL. D. was conferred upon him. To Lord Dufferin may be attributed the credit of first suggesting the purchase of the grounds adjacent to Niagara Falls as an International park. In February, 1879, he was appointed ambassador at St. Petersburg, was transferred to Constantinople in May, 1881, and in October, 1882, proceeded to Cairo, Egypt, to settle questions between England and that country arising out of the rebellion of Arabi Pasha. He left Egypt in April, 1883, and was appointed viceroy of India in 1884, an office that he now holds (1887). He is the author of "Narrative of a Journey from Oxford to Skibereen during the Year of the Irish Famine" (London, 1848); "Letters from High Latitudes" (London, 1860); "Contributions to an Inquiry into the State of Ireland" (1866); "Irish Emigration and the Tenure of Land in Ireland" (1867); and "Mr. Mill's Plan for the Pacification of Ireland examined" (1868). A collection of his "Speeches and Addresses" was published in 1882, edited by Henry Milton. A "History of the Administration of the Earl of Dufferin in Canada" was published by William Leggo (Montreal, 1878).

DUFFIE, Alfred Nattie, soldier, b. in Paris, France, 1 May, 1835; d. in Cadiz, Spain, 1 Nov., 1880. He studied at several military academies in Paris, and was graduated at the military college of St. Cyr in 1854 as 2d lieutenant. He served in Algiers and Senegal, and in the Crimea during the war with Russia, where he was promoted to 1st lieutenant of cavalry. He afterward took part in the campaign against Austria, and gained several medals of honor. He came to the United States in 1860, accepted a captaincy in the 1st New Jersey cavalry at the beginning of the civil war, and was

promoted major of the Harris light cavalry of New York. In July, 1862, he became colonel of the 1st Rhode Island cavalry, and on 23 June, 1863, was promoted to brigadier-general of volunteers. After the war Gen. Duffie was appointed U. S. consul in Cadiz, where he served until his death, a period of ten years.

DUFFIELD, George, clergyman, b. in Lancaster county, Pa., 7 Oct., 1732; d. in Philadelphia, Pa., 2 Feb., 1790. About 1732 his father, George Duffield, emigrated from Ireland to Pennsylvania, where he bought extensive lands. The son was partly educated at Newark, Del., and subsequently entered Princeton, where he was graduated in 1752. He studied theology under Dr. Robert Smith, of Pequea, and, after officiating for two years as tutor in Princeton, was ordained in September, 1761, and took charge of the united Presbyterian churches in the frontier towns of Carlisle, Big Spring, and Monaghan, Pa. In 1766 Mr. Duffield made a missionary tour through the valleys of Pennsylvania, Maryland, and Virginia, the object of which was to administer the offices of religion to families scattered throughout that region, and to establish churches. He warmly espoused the sentiments of the "New Lights" in opposition to the "Old Side" party, and encountered much opposition, which was continued after his removal in 1771 to the 3d Presbyterian church in Philadelphia, and increased by the fact that he was a zealous whig. On one occasion his church was barred against him, and there was such a disturbance that a magistrate was called to read the riot act, but he was finally allowed to govern his charge unmolested. During the Revolution he served as chaplain and fearlessly shared the dangers and privations to which the army was exposed, being so hated by the enemy that a reward was offered for his head. He was also associate chaplain with Bishop William White of the 1st Continental congress. He took an active part in the organization of the Presbyterian church after the Revolution, and was chosen the first stated clerk of the general assembly, which place he held till his death. The degree of D. D. was conferred upon him by Yale in 1785. His only published works are "An Account of a Missionary Tour through Western Pennsylvania in 1766," by order of the synod, and a "Thanksgiving Sermon on Peace," delivered 11 Dec., 1783.—His son, **George,** b. 28 July, 1767, was a merchant in Philadelphia, and was register and comptroller of the state of Pennsylvania for many years.—He was the father of **George,** clergyman, b. in Strasburg, Lancaster co., Pa., 4 July, 1794; d. in Detroit, Mich., 26 June, 1868. He was graduated at the University of Pennsylvania in 1811, studied theology in New York city under Dr. John M. Mason, and was licensed to preach in 1815, when he accepted a call to the Presbyterian church in Carlisle, Pa., where his grandfather had been pastor. He afterward held pastorates in Philadelphia, New York city, and Detroit, Mich., where he remained till his death. Dr. Duffield was a careful student of science, as well as a distinguished linguist. During his residence in Michigan he identified himself with all educational and religious interests, and was twice regent of the State university. In the civil war he was conspicuous for his patriotism, striving to increase the number of troops sent from Michigan and helping to provide for wounded soldiers and their families. His works are "Regeneration" (New York, 1832); "Claims of Episcopal Bishops Examined" (New York, 1842); "Travels in the Holy Land"; and various discourses and addresses.—His wife, **Isabella Graham Bethune,** was a sister of Dr. George Bethune, and granddaughter of Isabella Graham, the philanthropist. —Their eldest son, **George,** b. in Carlisle, Pa., 12 Sept., 1816, was graduated at Yale in 1837, studied at Union theological seminary, New York city, and was ordained 27 Dec., 1840. He has held important pastorates in Brooklyn, Philadelphia, and in Michigan, where he has resided since 1861. His reputation depends chiefly upon the hymns which he has written and published, and which are held in much esteem by his church.—Another son, **Divie Bethune,** lawyer, b. in Carlisle, Cumberland co., Pa., 29 Aug., 1821, after studying at Dickinson, was graduated at Yale in 1840, and at the law-school in 1842. He was admitted to the bar in Detroit, Mich., in 1843, and has since practised his profession in that city. He has been a member of the board of education of Detroit for thirteen years, and is active in all educational interests throughout the state. He has delivered various public addresses, and has contributed to current literature both in prose and in poetry. He possesses a large and valuable library.—Another son, **William Ward,** soldier, b. in Carlisle, Pa., 19 Nov., 1823, was graduated at Columbia in 1842. He served in the Mexican war, was wounded at Cerro Gordo, 18 April, 1847, and also at Contreras, 20 Aug., 1847, while acting adjutant of the 2d Tennessee infantry and on Gen. Gideon J. Pillow's staff. After the close of the war he became a civil engineer. He was resident engineer of the Hudson river railroad in 1851, chief engineer of the Oakland and Ottawa railroad, Michigan, and located that line from Pontiac to Grand Haven; chief engineer of the Central military tract railroad, Ill., in 1854 (now part of the Chicago, Burlington, and Quincy railroad), and built that line; division engineer of the Grand trunk railroad, and built the line from Detroit to Port Huron. He served as lieutenant-colonel of the 4th Michigan infantry in 1861, and was in the first battle of Bull Run. On 10 Sept., 1861, he was appointed colonel of the 9th Michigan infantry. He joined Gen. Sherman at Louisville, Ky., and was sent by him to occupy and fortify the pass through Muldraugh Hill, West Point, Ky., 22 Jan., 1862. He was appointed by Gen. Buell commander of the 23d brigade, Army of the Cumberland, 22 April, 1862, and brigadier-general and president of the examining board under the act of congress to test the efficiency of volunteer officers, 2 May, 1862. He overtook the Confederate forces under Col. John Morgan at Lebanon, and captured the place after a sharp fight. He was assigned by Gen. Buell to command all the forces in Kentucky, 8 May, 1862, and was relieved of this post on 10 Sept. He rejoined the 14th corps, Army of the Cumberland, under Gen. Thomas, and served with it until the battle of Murfreesboro, where he was disabled by two severe wounds and captured. Unable to take the field at the time required by the act of congress, he resigned, and was appointed chief engineer of the Hudson river railroad. He was employed in 1869 to survey lands in Colorado, in 1871–'2 was chief engineer of the Kentucky union railroad, and located that line from Paris to Hazard. He was elected to the Michigan state senate in 1880, and in 1882 was employed in surveying government land in Dakota. In 1885 he was re-appointed chief engineer of the Kentucky union railroad. He has published "School of Brigade and Evolutions of the Line" (Philadelphia, 1862).—Another son, **Samuel Pearce,** physician, b. in Carlisle, Pa., 24 Dec., 1833, was graduated at the University of Michigan

in 1854, and remained there studying chemistry and anatomy till the following year, when he went to the University of Pennsylvania and studied medicine. He went to Berlin in 1856 to be treated for failing eyesight, and after obtaining relief studied physics and chemistry there and in Liebig's laboratory in Munich, finally receiving the degree of Ph. D. at the University of Giessen, Hesse. In 1858 he began to practise medicine at Detroit, still continuing his chemical investigations and giving special attention to toxicology and medical jurisprudence. He soon became known as an analytical chemist, and has been frequently called upon to testify in the courts as an expert. For three months he worked with his friend Prof. George Dragondorff in the laboratory of the Imperial university of Russia, at Dorpat, and is now (1887) engaged in writing a work describing his investigations there. Dr. Duffield arranged the chemical laboratory for the Detroit medical college, and delivered the opening address there in 1868. He read a paper at the Detroit meeting of the American pharmaceutical association, on the "Relation of Hypodermic Injections to Toxicology," and is the author of numerous medical papers, including "Ventilation of Sewers"; "Contamination of Drinking Water"; "Analysis of Malt by Polarization"; and "Aconite Poisoning." He has also delivered an address upon the "Religion of Christ versus the Religion of the Scientists," before the Young Men's Christian Association in Detroit, Mich.—Another son, **Henry Martin,** lawyer, b. in Detroit, Mich., 15 May, 1842, was graduated at Williams in 1861, and enlisted in that year in the 9th Michigan infantry. He was promoted to be adjutant of his regiment and assistant adjutant of U. S. troops in Kentucky in 1862. In 1863 he was made post-adjutant of Chattanooga, and was wounded in the battle of Chickamauga while serving on the staff of Gen. Thomas. From that date until the close of the war he was assistant provost-marshal-general of the Army of the Cumberland on Gen. Thomas's staff. He was the orator on the occasion of the unveiling of the Garfield statue in Washington, in May, 1887. He was an unsuccessful Republican candidate for congress in 1870, and has been corporation counsel for Detroit since 1876. He is also president of the state military board of Michigan. —**Samuel Willoughby,** clergyman, son of the fourth George, b. in Brooklyn, N. Y., in 1843, was graduated at Yale in 1863, and in 1866 entered the Presbyterian ministry. He is now (1887) pastor of a church in Bloomfield, N. J. He has contributed to "The Evangelist" under the pen-name of "Anselmus." His publications are "The Heavenly Land," in English verse, from the "De Contemptu Mundi" of Bernard de Morlaix (New York, 1868); "Warp and Woof" (1870); and "English Hymns, their Authors and History," a learned and exhaustive work (1886).

DUFFIELD, John Thomas, clergyman, b. in McConnellsburg, Pa., 19 Feb., 1823. He is a descendant of George Duffield, an early settler of Pennsylvania. He was graduated at Princeton in 1841, and assumed charge of the mathematical department, Union academy, Philadelphia. He afterward studied in the Theological seminary at Princeton, was appointed tutor of Greek in Princeton college, and served as adjunct professor of mathematics from 1847 till 1850. He was licensed to preach in 1849, and in the following year was elected stated supply of the 2d Presbyterian church of Princeton, and was ordained by the Presbytery of New Brunswick in 1851. During the two years that he had charge of that church, in connection with his duties in college, he published the "Princeton Pulpit," a volume containing a sermon by each of the Presbyterian clergymen then residing in Princeton. He was professor of mathematics in Princeton from 1850 till 1871, and also professor of mechanics from 1862 till 1871. He was chosen moderator of the New Jersey synod in 1865. The degree of D. D. was conferred upon him by Princeton in 1872. His publications include a sermon on the "Second Advent" (1866); a "History of the Second Presbyterian Church of Princeton"; and review articles on "The Philosophy of Mathematics" (1866) and "Evolution as it Respects Man and the Bible" (1878).

DUGANNE, Augustine Joseph Hickey, author, b. in Boston, Mass., in 1823; d. in New York, 20 Oct., 1884. While quite young he wrote patriotic songs and poems, which were published in newspapers and became popular. These were collected and published in a volume entitled "Hand Poems" (Boston, 1844), which had a large sale. He was one of the founders of the American or "know-nothing" party. During the civil war he joined the 176th regiment of New York volunteers, and was commissioned colonel. He was captured by the Confederates and confined in a southern prison. After the war he resumed editorial and literary work, and became connected with the "New York Tribune." He delivered an oration on the heroic succession at the Cooper institute (5 April, 1867) on the second anniversary of the death of Abraham Lincoln (New York, 1867). His publications are "A Comprehensive Summary of General Philosophy" (1845); "The Iron Harp" (Philadelphia, 1847); "The Lydian Queen," a tragedy, produced at the Walnut street theatre, Philadelphia (1848); "MDCCCXLVIII, or the Year of the People" (1849); "Parnassus in Pillory, a Satire, by Motley Manners, Esq." (New York, 1851); "The Mission of Intellect," a poem read in New York (1852); "Art's True Mission in America" (New York, 1867); "The Gospel of Labor," a poem read in New York (1854); "Poetical Works" (Philadelphia, 1856); "A Class-Book of Government and Civil Society" (New York, 1859); "History of Governments" (1861); "The Ring of Destiny, or the Astrologer's Plot, a Tale of Ancient Days" (Boston, 1861); "Utterances" (New York, 1864); "Camps and Prisons; Twenty Months in the Department of the Gulf" (New York, 1865); "Fighting Quakers a True Story of the War for Our Union" (New York, 1866); "Revised Leaves," a series of critiques on contemporary authors, published in "Sartain's Magazine," and papers upon a variety of subjects, under various pen-names, in magazines and journals. His last production was a satire on Robert G. Ingersoll, entitled "Injure Soul."

DUGAS, Louis Alexander, physician, b. in Washington, Ga., 3 Jan., 1806. His parents were of French ancestry, and emigrated from Santo Domingo, W. I. He was educated at home, studied medicine with Dr. John Dent, and in 1827 was graduated at the medical department of the University of Maryland. After attending lectures in Baltimore and Philadelphia, and spending several years in study in Europe, he settled in Augusta, Ga., in 1831. In 1832 he united with five others in founding the Medical college of Georgia, in which he still holds the professorship of surgery. In 1869 the degree of LL. D. was conferred upon him by the University of Georgia. For many years he was president of the Medical society of Augusta, and he has been president of the Medical association of Georgia. During the civil war he was vol-

unteer and consulting surgeon of military hospitals. From 1851 till 1858 he was editor of the "Southern Medical and Surgical Journal." His most important contributions to the literature of his profession are those on "Rheumatism," "Ophthalmia," "Colica Pictonum," "Convulsions," "Surgical Operations during Mesmeric Insensibility," "Use of Quinine in Fevers," "Diagnosis of Shoulder Dislocations," "Fractures of the Scapula," "Transactions of the Medical Association of Georgia" (1874–'6), and "Pathological Peculiarities of Negroes."

DUGDALE, Richard L., political economist, b. in Paris, France, in 1841; d. in New York city, 23 July, 1883. His father was engaged in business in France, but, owing to pecuniary losses, returned to England in 1848. Here the son developed artistic talent, which led to his being placed in the government drawing-school at Somerset House. In 1851 his family came to New York. At the age of fourteen he was employed by a sculptor to do some artistic work, which he accomplished with much credit. For a time he resided in Indiana, but returned to New York, where he entered into mercantile business and attended the night-schools at Cooper Union, distinguishing himself in the debating clubs. He was secretary of the section on sociology of the New York association for the advancement of science and the arts, of the New York social science society, of the New York sociology club, and of the Civil service reform association; treasurer of the New York liberal club, and vice-president of the Society for the prevention of cruelty to animals. He became a member of the New York prison association in 1868, to whose work he gave his first attention. His aim was to improve prison discipline and the treatment of convicts, and to obtain practical aid for them after their release. He visited many prisons, learned the histories of criminals, and published "The Jukes, Hereditary Crime" (New York, 1877), which attracted much attention both in this country and in Europe. In "Further Studies of Criminals" he briefly draws the lessons learned from his investigations. He also published essays on sociological subjects in various periodicals.

DUGGAN, James, R. C. bishop, b. in the county Dublin, Ireland, in 1825. He came to the United States when very young, studied for the ministry in St. Louis, was ordained in 1847, and was immediately afterward appointed rector of the ecclesiastical seminary of the diocese. In 1850 he was made assistant pastor of the Cathedral of St. Louis, and in 1854 created vicar-general of the diocese and pastor of the Church of the Immaculate Conception. He was consecrated coadjutor archbishop in 1857, with the title of Bishop of Antigone, and was afterward nominated bishop of Chicago, but failing health soon compelled him to travel abroad. His administration had given great dissatisfaction, and several priests complained of it to the court of Rome, on learning which he hastened home and removed those who had accused him. But it soon became evident that his mind was giving way, and in 1869 his symptoms developed into insanity and he was removed to an asylum in Missouri. He has never recovered.

DUGGAN, Peter Paul, artist, b. in Ireland about 1810; d. in Paris, 15 Oct., 1861. He came to the United States at an early age, and qualified himself for an art professorship, which he obtained in the New York free academy soon after its opening. He devoted himself principally to crayon-drawing, and occasionally painted in oils. His crayon portraits were delicate and truthful. One of his best was his picture of the poet Bryant. He was compelled to resign his office and to abandon all work on account of his delicate health, and went to England, residing in London until he removed to Paris in 1861.

DUGOMMIER, Jean François Coquille, soldier, b. in Guadaloupe, West Indies, in 1736; d. at San Sebastian, Spain, in 1794. He entered the army when scarcely sixteen years old, served on the continent, and rose to the rank of major; but, having been placed on half-pay, he retired to Martinique, where he had inherited a large estate, on which he lived for nearly twenty-five years. He supported the doctrines of the French revolution, and was elected commander of the national guard of the island, which office he held for three years; but being placed between the white colonists, who were almost unanimously opposed to the new ideas, and the excited negroes, who were impatient to revenge their sufferings upon their former masters, he was forced to resign, and sailed in 1792 for France as deputy to the National convention for Martinique. But he soon resigned his seat and reentered the army, was commissioned general of brigade, and soon rose to the rank of division-general in the army of Italy. In 1793 he directed the siege of Toulon, where he was conspicuous for his ability and courage, as also for his humanity after the surrender. During the siege a young artillery officer, Bonaparte, laid before the general a plan to expel the British fleet from the bay, which would lead to the capture of the city, and Dugommier, recognizing the genius of the young officer, approved the plan with the warmest praise. Dugommier commanded afterward the French army of the eastern Pyrenees, repeatedly defeated the Spanish armies, and recaptured from them Fort St. Elmo, Collioure, Port-Vendres, and Bellegarde. He finally crossed the Pyrenees, and during the siege of San Sebastian was killed by the bursting of a shell.

DUGUÉ, Charles Oscar, poet, b. in New Orleans, La., 1 May, 1821. His parents were Americans of French descent. He was educated in Auvergne, and at the college of St. Louis, in Paris, and while a student wrote verses that Chateaubriand commended for their "noble and natural expression, without affectation or extravagance." In 1852 he became editor of a daily paper in New Orleans, "L'Orléanais," and afterward was a member of the bar. He has published "Essais poétiques" (1847), consisting of descriptions of southern scenery, and occasional poems; two dramatic works on subjects drawn from the romantic legends of Louisiana, "Mila ou La Mort de La Salle" and "Le Cygne, ou Mingo"; an Indian plot, in which Tecumseh is one of the characters (1852); and "Philosophie morale," which was published in French and English.

DUHAMEL, Joseph, Canadian lawyer, b. in Montreal, 20 Jan., 1836. He was educated at the colleges of St. Thérèse and St. Hyacinthe, and at the Jesuit college in Montreal, where he completed his classical education. He then studied law in Montreal, and was called to the bar in April, 1857. He first formed a partnership with the late Cyrille Archambault, then with Gustave Drolet, and, after his retirement, he became head of the legal firms of Duhamel, Rainville, Rinfret & Rainville (now Duhamel, Rainville & Marceau). Mr. Duhamel is a liberal in politics, and was unanimously elected president of the Reform association of the province of Quebec in April, 1882. His high reputation, fluency of speech, knowledge of law, and devotion to his profession, have secured for him one of the largest practices of the Montreal bar.

DUHAMEL, Joseph Thomas, Canadian R. C. archbishop, b. in Contrecœur, county of Verchères, Canada, 6 Nov., 1841. He studied at the College of Ottawa, prepared for the priesthood under the direction of the Oblate Fathers, was ordained priest in 1863, and was immediately appointed curé of Buckingham. Here his administrative qualities attracted the notice of his superiors, and as the parish of St. Eugene was in need of a church he was sent to build one. In 1869 he accompanied his bishop to the Vatican council in the capacity of theologian. In 1874 he was consecrated bishop of Ottawa. He devoted himself specially to the advancement of education in his diocese, developing and improving the College of Ottawa, invited the Jesuits to open establishments, and founded several Christian Brothers' schools. In 1878 he made his first visit to Rome as bishop, and in 1882 revisited it to make arrangements for the division of his diocese. In 1886 Bishop Duhamel was created first archbishop of Ottawa. In 1882 he was constituted a count of the Holy Roman empire, and he is also assistant at the pontifical throne, a knight grand cross of the order of the holy sepulchre, and an advocate of St. Peter's.

J. Thomas Duhamel

DUHAMEL, William, physician, b. in Maryland in 1827; d. in Washington, D. C., 15 Aug., 1883. He was educated at St. Mary's, Md., was graduated at Maryland university of medicine in 1849, and practised near Washington, D. C., for several years in partnership with Dr. Bayne. In 1852 he was appointed adjunct professor of surgery in Georgetown medical college. Dr. Duhamel was called to attend the president of the United States in 1859, and continued to visit all the occupants of the White House during three presidential terms. He also served as chief physician for ten years to the U. S. prisons in the District of Columbia, and was a member of several learned societies, in which he occupied important offices. He contributed valuable articles on the use of chloroform and other professional subjects to the "Stethoscope," of Virginia, and to the "New Jersey Medical Journal," and wrote a treatise on the "National Hotel Disease" (at Washington).

DUHRING, Louis Adolphus, physician, b. in Philadelphia, 23 Dec., 1845. His father emigrated from Germany in 1818, and became a successful merchant. The son was graduated at the medical department of the University of Pennsylvania in 1867, and became one of the resident physicians to the Philadelphia hospital. He made a special study of cutaneous diseases, sailing at the end of fifteen months for Europe, where he spent two years in acquiring a knowledge of dermatology in the hospitals of Paris, London, and Vienna. He returned to this country in 1870, and opened in Philadelphia a dispensary for skin diseases. He was also, in 1871–'2, one of the editors of the "Photographic Review of Medicine and Surgery." In 1871 he was chosen clinical lecturer upon his specialty in the University of Pennsylvania, and in 1876 professor of diseases of the skin. In 1878 he was elected dermatologist to the Philadelphia hospital. He acted as physician to his dispensary until 1880, and has since been the consulting physician. He published "An Atlas of Skin Diseases" (1876); "A Practical Treatise on Diseases of the Skin," the latter translated into French, Italian, and Russian (1877); and "Epitome of Skin Diseases" (1885).—His sister, **Julia,** author, b. in Philadelphia, Pa., 23 Feb., 1836, was educated partly in her native city and partly in Europe, and has travelled extensively in the United States, Europe, Asia, and Africa. Miss Duhring has published two volumes of critical essays on social life, and has prepared a third, which is soon to be issued. The titles of the volumes that have already appeared are "Philosophers and Fools" (Philadelphia, 1874), and "Gentlefolks and Others" (Philadelphia, 1876).

DUKE, William, clergyman, b. on Patapsco Neck, Md., 15 Sept., 1757; d. in Elkton, Md., in 1840. He was licensed as an exhorter when only sixteen years of age, and continued preaching until the spring of 1780, when, his health failing, he devoted the following summer to study, taking lessons in Latin and Greek. Up to 1784 the Methodists had been regarded as a branch of the Episcopal church, and Mr. Duke had always considered himself an Episcopalian. When, therefore, at Christmas of that year, the Methodist conference constituted itself a separate church, Mr. Duke at once severed his connection with it. In 1785 he was admitted to holy orders by Bishop Seabury, and in 1787 was called to preside over St. Paul's parish in Prince George county, Md. His salary being small, and not easily collected under the new voluntary system, Mr. Duke was again compelled to resort to teaching. He labored subsequently in St. Paul's chapel, near Baltimore; North Elk parish, at the head of Chesapeake bay; St. Margaret's, Westminster, Anne Arundel co.; and St. Ann's church, Annapolis. He also taught at Elkton, Md., was professor of languages at St. John's college, Annapolis, in 1803–'4, was principal of Charlotte Hall school in 1812–'14, and in 1818 returned to the academy at Elkton. He left a valuable library, which was presented by his daughter to St. James's college. He was the author of "A Clew to Religious Truth" (1795), written at a time when French infidelity was thought to be making inroads among the gentry of Maryland, and in 1819–'20 was a contributor to the "Theological Repertory," his principal articles being "Letters to Candidates for Holy Orders," the "Thirty-nine Articles Collated with Texts of Scripture," and "The Study of Hebrew."

DUKES, Joseph, missionary, b. in what is now the state of Mississippi in 1811. His parents were half-breed Choctaw Indians, and Joseph was born in the Choctaw nation. At the age of ten he was placed in one of the large mission-schools at Mayhew. After the sale of the Choctaw lands to the United States, Mr. Dukes remained several years in Mississippi, assisting Rev. Cyrus Byington in the preparation of a grammar and lexicon of the Choctaw language. He afterward removed to the new country west of Arkansas, continuing to give his services gratuitously as an interpreter, was chosen an elder in one of the churches, and was licensed to preach by the presbytery in 1853. He was an excellent preacher in the Choctaw language, and was highly esteemed by the missionaries. He also served as captain, or "head man" of the tribe, translated the Choctaw laws, was some time judge of the supreme court, repeatedly chosen a member of the general council, and acted for five years as

a trustee of the public schools. While employed by the Rev. A. Wright as assistant translator, he made the first draft of most of the nine Epistles, the book of Revelation, and the Old Testament as far as the Psalms, besides aiding generally in the work of revision and correction.

DULANY, Daniel, statesman, b. in Maryland in July, 1721; d. in Baltimore, Md., 19 March, 1797. He was a lawyer of Annapolis, Md., and served many years as commissioner-general, secretary of state, attorney-general, and councillor of Maryland, before the Revolution. Few details regarding his career have been preserved, but he ranked high in his profession, and was considered one of the most distinguished men of his time. Although a loyalist, in which character he engaged in a warm newspaper discussion with Charles Carroll, he was earnestly opposed to the stamp-act, being credited with the following sentiment: "There may be a time when redress may be obtained. Till then I shall recommend a legal, orderly, and prudent resentment to be expressed in a zealous and vigorous industry. A garment of linsey-woolsey, when made the distinction of patriotism, is more honorable than the plumes and the diadem of an emperor without it. Let the manufacture of America be the symbol of dignity and the badge of virtue, and it will soon break the fetters of distress." Josiah Quincy, of Massachusetts, while on a journey to the southern states in 1773, speaks of having spent "three hours with the celebrated Daniel Delany." He was the author of "Considerations on the Propriety of Imposing Taxes on the British Colonies," etc. (London, 1766).

DULANY, Lloyd, loyalist, d. in London, England, in 1782. He was a resident of Annapolis, Md. In May, 1774, the Whigs of that city passed resolutions calling upon the lawyers to bring no suits for the recovery of debts due from residents to citizens of Great Britain till the Boston port bill should be repealed. Three days later Mr. Dulany's name appeared at the head of a protest, in which the opinion was expressed that the resolution was "founded in treachery and rashness," and that "our credit as a commercial people will expire under the wound." He was killed in a duel with the "Rev." Bennet Allen, in Hyde park.

DULANY, William, officer of marines, d. in Beltsville, Md., 4 July, 1868. He was appointed from Virginia as 2d lieutenant, 10 June, 1817, became 1st lieutenant, 19 June, 1819, and captain, 1 July, 1834. He was promoted to a brevet majorship, for meritorious conduct in the Florida war, 3 March, 1843, and made full major, 17 Nov., 1847. He served in the Mexican war, and succeeded to the command of a battalion on the death of Maj. Twiggs. He was made brevet lieutenant-colonel, 14 Sept., 1847, for "gallantry at Chapultepec, the capture of the Belen gate and the city of Mexico," and colonel, 26 July, 1861.

DULCE Y GARAY, Domingo (dool'-thay), Marquis of Castel Florite, governor-general of Cuba, b. in Rioja, Spain, in 1808; d. in Madrid, 23 Nov., 1869. He entered the army in 1823, took part in the first Carlist war, where he distinguished himself by his bravery, and in 1841, when a captain, became famous for his gallant defence of the queen's palace with 48 men against 1,000 insurgents under Diego Leon. Isabella made him brigadier-general in 1847, and in 1849 he was promoted to field-marshal. In 1855, while commanding the cavalry in Madrid, he took part with Marshal O'Donnell in the Vicalvaro insurrection, and was afterward made a lieutenant-general. In 1862 Serrano made him governor-general of Cuba, where he became popular. He took stringent measures against the slave traffic, founded free high-schools, and introduced useful reforms in every department. During his administration occurred the famous extradition case of Col. Argüelles, who, having sold as slaves 141 African negroes who were entitled to their freedom by the law, fled to the United States to avoid punishment. The Spanish government asked for his extradition, and, although there was no treaty between the two countries at that time, Sec. Seward, after a long diplomatic correspondence, ordered Argüelles to be surrendered to the governor-general of Cuba. In 1866, after the fall of the liberal government, Gen. Dulce returned to Spain and made a report, in which he suggested a measure whereby all children born thenceforth of slave mothers should be declared free from birth. He was shortly afterward arrested on suspicion of being engaged in a conspiracy to depose the queen, but was soon released. The Revolution of 1868 restored him to influence, and in January, 1869, he was again appointed governor of Cuba, under very trying circumstances. A great part of the island was in open revolt, and Gen. Dulce tried to bring about peace by sending a special commission to the insurgents, but failed. After a short though eventful administration, Gen. Dulce was compelled to resign by the Spanish volunteers at Havana, on account of his desire to deal mercifully with captured insurgents. He returned to Spain in June, 1869, in broken health, and died during the same year.

DU LHUT, or **DULUTH, Daniel Greysolon,** explorer, b. in Lyons, France; d. near Lake Superior in 1709. He belonged to the numerous class of lesser French nobles, many of whom found themselves in Canada without incomes from their estates, and yet were prevented by pride from engaging in trade. It was these men and their sons that composed the "coureurs de bois." They were really forest outlaws, and many were the royal edicts launched against them, but without effect. At several periods of colonial history they comprised the entire male population under middle age, wives, children, and farms being abandoned for the free, fascinating life of the woods. Du Lhut is said to have induced, on one occasion, all the young men to enlist under his leadership for the period of four years, and at one time 800 men, out of a total population of 10,000, mysteriously disappeared. The profit to be derived from the trade in furs, with the freedom from all priestly or secular control enjoyed in the wilderness, were the chief causes of this exodus. Du Lhut's traffic was carried on under the protection of Count Frontenac, and with the assistance of certain merchants, of whom his uncle, Patron, was one. He spent his time in the trackless forests, in the Indian towns, or in remote posts which he himself had planted, trading, fighting, ruling lawless savages and scarcely less ungovernable whites, and from time to time going to France to hold interviews with Seignelay, the colonial minister. He built a trading post on the north side of Lake Superior, at the mouth of a river entering Thunder bay, where Fort William now stands. Du Lhut left Quebec in September, 1678, to explore the upper Mississippi, visited three large Sioux towns in the summer of 1679, held a council near Lake Superior to reconcile the Assiniboines with the neighboring tribes, and in June, 1680, started with four Frenchmen, an Indian, and two canoes to continue his explorations. On reaching the St. Croix he learned that there were three Europeans on the main river below. They proved to be

Father Hennepin and his companions, with whom he joined forces, and to whom he was of great assistance. In 1684 he caused two Indians, who had murdered several Frenchmen on Lake Superior, to be shot, undaunted by the crowd of excited savages that surrounded him and his small band of white men. In 1686 Denonville ordered him to fortify the "detroit," or strait, between Lakes Erie and Huron. He went there with fifty men and built a palisade fort, which he occupied for some time. The year following, with Tonty and Durantaye, he joined Denonville in his campaign against the Senecas, bringing with him a body of Indians from the upper lakes. During the panic among the colonists that followed the Iroquois invasion of Montreal in 1689, Du Lhut, with twenty-eight Canadians, attacked twenty-two Iroquois in canoes, received their fire without returning it, and bore down upon and killed eighteen of them, capturing three and allowing but one to escape. In 1695 he was in command of Fort Frontenac, and in 1697 succeeded to the command of a company of infantry. For twenty-five years Du Lhut was a martyr to the gout, although he thought himself cured at one time by the intervention of an Iroquois saint. Parkman says that "while an habitual breaker of the royal ordinances regarding the fur trade, yet his services were great to the colony and crown, and his name deserves a place of honor among the pioneers of American civilization."

DULLES, John Welsh, editor, b. in Philadelphia, Pa., 4 Nov., 1823; d. there, 13 April, 1887. He was graduated at Yale in 1844, and at Union theological seminary, New York city, in 1848, after spending two years in the study of medicine. He was a missionary in southern India in 1849–'53, and in the latter year took charge of the missionary work of the American Sunday-school union. He became secretary of the publication committee of the Presbyterian general assembly in 1856, and, on the union of the two branches of the church in 1870, was chosen editorial secretary of the united board of publication, editing the tracts, books, and periodicals issued by that body. Princeton gave him the degree of D. D. in 1871. Dr. Dulles visited Europe in 1874, travelled in Egypt, Syria, Asia Minor, and Greece in 1878–'9, and journeyed through Spain and Algeria in 1884. He was a nephew of John Welsh, late minister to England. He was the author of "The Soldier's Friend" (Philadelphia, 1861), the first religious manual prepared for the army during the war for the Union, and subsequently wrote "Life in India" (Philadelphia, 1855) and "The Ride Through Palestine" (1881).

DULON, Rudolf, educator, b. in Stendal, Prussia, 30 April, 1807; d. in Rochester, N. Y., 12 April, 1869. He studied theology and philosophy in the University of Halle, and became rector of a school at Werben in 1831. He accepted pastorates at Flossau, near Osterberg, in 1836, and Magdeburg in 1843, and soon gained a reputation as a pulpit orator and a fearless expounder of liberal Christianity. In 1848 he received a call to the Liebfraukirche in Bremen, and while there entered enthusiastically into the political agitation of that time, strenuously opposing the illiberal measures of the Eichhorn ministry. In 1850 he established the Bremen "Daily Chronicle," a social-democratic sheet, which was suppressed in 1851, and "The Alarmist," a religious weekly. In 1852 the Bremen senate removed him from his charge; but sixteen years later this judgment was reversed by the appellate court of the free city of Lübec. As Prussia had demanded his extradition, Dr. Dulon fled, in 1853, first to Helgoland, and, in November following, to the United States. He became the pastor of an independent congregation in New York city, and at the same time issued a series of "Sabbath Leaves" in the interests of free religion. He subsequently devoted himself to the cause of education, and opened in the city of New York the first German-American school established in the United States, which the civil war finally compelled him to abandon. In July, 1866, he was chosen director of the new German-American "Realschule" in Rochester, N. Y., where he remained until his death. Gen. Franz Sigel, also a Prussian, taught in Dr. Dulon's New York school, and subsequently married one of his daughters. Dr. Dulon's works include "Die Geltung der Bekenntnisssschriften in der reformirten Kirche" (Magdeburg, 1847); "Vom Kampf um Völkerfreiheit" (1849); "Der Tag ist angebrochen," the sale of which was forbidden by the authorities (1852); and "Aus Amerika," a review of educational work in this country (1865).

DUMARESQUE, Philip, loyalist. He was a merchant of Boston, and was married to a daughter of Dr. Sylvester Gardiner. He was one of those who presented an address to Govs. Hutchinson and Gage in 1774 and 1775. In 1776 he went to Halifax with his family, and in 1778 was proscribed and banished. He was appointed by the British government collector of customs at New Providence, Nassau, residing there until his death.

DUMAS, Alexandre Davy (de la Pailleterie), b. in Jeremie, Hayti, 25 March, 1762; d. in Villers-Cotterets, near Paris, 26 Feb., 1806. He was the son of the Marquis de la Pailleterie, a wealthy creole, and an African woman, Tiennette Dumas, whose surname the boy adopted when he enlisted in 1776 in the queen's dragoons. In 1793 he had risen to the rank of general of division, and as such commanded for some time the Army of the Eastern Pyrenees, served in the Army of the Alps, and took possession of the Great Saint-Bernard and Mont-Cenis. In 1794 he was commander-in-chief of the Army of the West. Assigned to service under Bonaparte in 1796, he assisted at the siege of Mantua, and at the battle of Brixen in 1798 he alone defended a bridge against a small force of cavalry till the French could come to the rescue. For this deed Bonaparte presented him to the directory as the "Horatius Cocles of the Tyrol." Gen. Dumas accompanied Bonaparte to Egypt in May, 1798, and in August suppressed a military insurrection at Cairo. On account of the climate and a disagreement with Gen. Berthier, he applied for a furlough, and sailed for France in 1799. A storm obliged the vessel to put into Taranto, and he was arrested by the Neapolitan government and detained for twenty-eight months as a prisoner. After his release the first consul declined to give him an appointment on account of his republican principles. Gen. Dumas was the father of the well-known French novelist, Alexander Dumas, the elder.

DUMAS, Mathieu, Count, French general, b. in Montpellier, 23 Nov., 1753; d. in Paris, 16 Oct., 1837. He entered the army in 1773, served as aide to Rochambeau in America in 1780–'3, and distinguished himself at the siege of Yorktown. He was afterward sent on missions to Turkey and Holland, was a member of the legislative assembly in 1791, and the friend of Lafayette. He was condemned to death, but fled to Switzerland, entered the military service of Napoleon, and was a general at Waterloo. He was active in the Revolution of 1830, and aided Lafayette in placing Louis Philippe on the throne. Besides some military works, he wrote "Memoirs of my own Time" (1773–1826), which were published after his death by his son.

DUMMER, William, lieutenant-governor of Massachusetts, b. in Boston in 1677; d. there, 10 Oct., 1761. When Samuel Shute was appointed governor of the colony in 1716, Dummer was commissioned lieutenant-governor, and after Shute left, 1 Jan., 1723, he acted as governor and commander-in-chief till the arrival of Gov. Burnet in 1728. He conducted the war with the Indians with skill, and was respected for his ability and zealous regard for the public good. After the death of Gov. Burnet he was commander-in-chief again till the arrival of Belcher. After 1730 he lived in retirement. When he died he left his valuable farm and the mansion-house, which is still standing, to endow Dummer academy in Byfield parish, in the town of Newbury, the earliest academy in New England, which was opened on 27 Feb., 1763, with twenty-eight pupils.—His brother, **Jeremiah,** scholar, b. in Boston, Mass., about 1680; d. in Plaistow, England, 19 May, 1739, was graduated at Harvard in 1699, where he was noted for brilliancy. He studied theology, and afterward spent several years at the University of Utrecht, where he obtained his doctor's degree. Soon after his return to America he was sent to England in 1710 as agent of Massachusetts, and remained in London in that capacity till 1721. He was a benefactor of Yale college, to which he presented 800 volumes. He was intimate with Bolingbroke, and adopted some of his views. He published theological and philosophical disquisitions in Latin while at Utrecht, and a "Defence of the New England Charters" (London, 1728; reprinted, 1765), in which he argued that the New England colonists held their charters by compact, in consideration for redeeming the wilderness and annexing it to the British dominions, and that their land-titles were not derived from the crown, which only possessed political rights over the country, but were based on purchases from the natives and on occupation and their own courage and enterprise. The proposal of the Board of trade to unite the colonies under a single viceroy and one assembly would produce, in his opinion, the result that it was chiefly intended to avert, that of encouraging the colonies to throw off their allegiance and constitute themselves a free state.

DUMONCHEL, John Baptist, Canadian merchant, b. in Sandwich, Ontario, in 1784; d. in Saint-Benoit, Canada, in 1844. He came in his youth to Lower Canada, and studied in the College of Montreal. After serving some time as a clerk, he opened a commercial establishment in Saint-Benoit in 1810. Although he filled several public offices, he took the part of the people in their conflict with the British authorities, and, in consequence of having presided over some public meetings, was dismissed from the magistracy and deprived of his commission as major of militia. He took part in the insurrection of 1837, and fled after the defeat of the Canadians at Saint-Eustache, but was betrayed and given up to the soldiers of Gen. Colborne. He was brought to Montreal and imprisoned, being shortly after joined by his two sons, who had also been taken prisoners. He was treated with great severity, and when Lord Durham offered to liberate him and his companions if he consented to sign a document acknowledging that they had been guilty of high treason, he consented to do so. He was set at liberty, however, without the exaction of this penalty.

DUMONT, Julia Louisa, author, b. in Waterford, Ohio, in October, 1794; d. in Vevay, Ind., 2 Jan., 1857. She was the daughter of Ebenezer and Martha Carey, who were among the earliest settlers of Marietta, Ohio. Her mother was herself an author, having published a book entitled "The Mountain Mourner." While Julia was an infant, her parents returned to their native state, Rhode Island, and after her father's death she accompanied her mother to Greenfield, Saratoga co., N. Y. She attended the Milton academy, taught school in 1811–'2, and in the latter year married John Dumont, afterward a well-known citizen of Indiana. She went with him to Ohio, and in 1814 to Vevay, Ind., where she spent the rest of her life, becoming eminent as a teacher. Mrs. Dumont was the earliest woman of the west whose writings have been preserved. She contributed largely to western periodicals, both in prose and verse, and published a collection of her writings, entitled "Life Sketches from Common Paths" (New York, 1856).—Her son, **Ebenezer,** soldier, b. in Vevay, Ind., 23 Nov., 1814; d. in Indianapolis, Ind., 16 April, 1871, was educated at Indiana university, but was not graduated, and, after studying law, was admitted to the bar, and began practice in his native town. He was chosen to the legislature in 1838, where he was speaker of the house, was treasurer of Vevay county in 1839–'45, and was for many years president of the state bank. He fought in the Mexican war as lieutenant-colonel of the 4th Indiana volunteers, distinguishing himself at the battle of Huamantla. He was an elector on the democratic ticket in 1852, and again a member of the legislature in 1850 and 1853. At the beginning of the civil war he became colonel of the 7th Indiana regiment, and served with distinction in 1861 at Laurel Hill, Rich Mountain, and Carrick's Ford. He then reorganized the regiment for three years' service, and commanded it in the action of Greenbrier river on 3 Oct. under Gen. Reynolds. He was made brigadier-general of volunteers, 3 Sept., 1861, was engaged at Cheat Mountain on 12 Sept., and commanded the 17th brigade of the Army of the Ohio in January, 1862. He attacked and routed John Morgan at Lebanon, Ky., on 5 May, 1862, and in October of that year commanded the 12th division of Gen. Buell's army. On 28 Feb., 1863, he resigned his commission on account of failing health, and was elected to congress as a unionist, serving from 1863 till 1867. Gen. Dumont was appointed governor of Idaho a short time before his death.

DU MOTAY, Cyprien Tessié, chemist, b. in France in 1819; d. in New York city, 6 June, 1880. He was of an old Breton family, received his education at Nantes, and then removed to Paris, where he devoted himself to literature. His poems gained him admission to the salon of Madam Récamier, and he became intimate with the foremost writers of the day, including De Musset, Chateaubriand, Victor Hugo, and Dumas. Financial troubles drove him to Germany, where, turning his attention to chemistry and metallurgy, he secured several patents, one of which, for bleaching and dyeing fabrics, was bought by an English manufacturer for 60,000 francs. He then returned to Paris and became consulting chemist in a large laboratory, but was exiled for opposing the second empire, and saved himself from poverty by selling a process for bleaching wax to a London apothecary for £2,000. Napoleon III. recalled him to Paris in 1860, and he applied himself from that time to industrial chemistry, receiving medals at the exhibitions of 1865 and 1878 for his invention. During the siege of Paris he directed the ambulance service. Among his many important inventions in Europe were a process for etching glass, improvements in electric light carbons, a method for the preparation of oxygen on a large scale, and a method of illumination by its use, known as the

"oxy-carbureted light," which has been successfully used for lighting mines and large public places. Du Motay came to New York early in 1879, and was consulting engineer and chemist of the Municipal gas company till his death. While in this country he patented small rotary motors, improvements in steam condensers (1879), and a new method of artificial refrigeration (1880). He left in manuscript a philosophical drama, "The Expiation of Faust."

DUNBAR, Duncan, clergyman, b. in the northern highlands of Scotland about 1791; d. in New York city, 28 July, 1864. When about twenty years old he removed to Aberdeen and engaged in business, occasionally preaching as a layman. He settled in the province of New Brunswick in 1817, where he became a Baptist, and was immersed in the harbor of St. John, 31 Oct., 1818. He was soon afterward ordained, removed to the United States in December, 1823, and held pastorates in Philadelphia and elsewhere. Most of his ministry was spent in the McDougal street Baptist church in New York city. He was for twenty years a member of the board of managers of the American and foreign Bible society. See his life by his son-in-law, Rev. Jeremiah Chaplin (New York, 1878).

DUNBAR, Moses, soldier, b. in Plymouth, Conn.; d. in Hartford, Conn., 19 March, 1777. He was a resident of Bristol (or, as some say, of Waterbury), and was convicted by the superior court in January, 1777, of holding a captain's commission under Sir William Howe, and of enlisting men for the British army. While under sentence of death he knocked down the sentries and escaped, but was apprehended, and on the day appointed, after listening to a sermon at the jail, from Rev. Abraham Jarvis, of Middletown, was hanged in presence of "a prodigious concourse of people." It is charged by Thomas Jones, in his "History of New York," that there was no existing law in the colony making Dunbar's offence punishable with death, and that he was condemned under an *ex-post-facto* law. His young wife is said to have been treated inhumanly, being compelled to ride in the cart with her husband to his execution, and afterward expelled from Middletown, where she had taken refuge in a loyalist family. Four expresses were sent to Howe by Dunbar's friends urging him to stop the execution by threatening retaliation, but he was indifferent to their appeals.

DUNBAR, Thomas, British soldier, d. in 1767. He became colonel of the 48th foot, 29 April, 1752, was stationed in Nova Scotia, and joined Braddock's expedition against Fort Duquesne. Braddock, by Washington's advice, pressed on with 1,200 chosen men on 19 June, 1755, leaving Dunbar behind with the residue of the army. After the defeat of 9 July, Dunbar destroyed his remaining artillery, burned stores and baggage worth £100,000, pretending that it was done by Braddock's orders, and ignominiously retreated. Dunbar was made lieutenant-governor of Gibraltar in 1756, and promoted to lieutenant-general, 18 Dec., 1760.

DUNBAR, Sir **William,** pioneer, b. in Scotland, about 1740; d. in Natchez, Miss., in 1810. He was educated at Glasgow and London, where his love for mathematics and astronomy gained him the friendship of Sir William Herschel. He came to Philadelphia for his health and in charge of a mercantile venture in 1771, afterward went to Pittsburg, and in 1773 formed a partnership with John Ross, a Scottish merchant of Philadelphia, for the purpose of opening a plantation in the British province of West Florida. He settled near Baton Rouge, La., and, after many fluctuations of fortune, finally removed to Natchez, where he cultivated a plantation called the "Forest." He held important trusts under the Federal government, was a correspondent of Thomas Jefferson, Herschel, and Rittenhouse, and contributed numerous valuable papers to the transactions of the American philosophical society of Philadelphia, of which he was a member.

DUNCAN, James, soldier, b. in Cornwall, N. Y., in September, 1810; d. in Mobile, Ala., 3 July, 1849. He was graduated at the U. S. military academy in 1834, and became 2d lieutenant in the 3d artillery. After serving a year on garrison duty in Savannah, Ga., he became assistant professor of mathematics at the military academy. This office he relinquished to engage in the Florida war, and was wounded at Ouithlacoochie. He became 1st lieutenant in November, 1836, and thereafter served on frontier and garrison duty till 1845. In April, 1846, he was made captain, and subsequently participated in the battles of Palo Alto, Resaca de la Palma, Monterey, Cerro Gordo, Churubusco, and Molino del Rey; the assault of Chapultepec, and the capture of Mexico, receiving the brevets of major, lieutenant-colonel, and colonel. From 1849 till his death he was inspector-general, with the rank of colonel.

DUNCAN, James Armstrong, clergyman, b. in Norfolk, Va., 14 April, 1830; d. in Ashland, Va., 23 Sept., 1877. His father, David Duncan, was a graduate of the University of Glasgow, emigrated to the United States, and for forty years was professor of ancient languages in Randolph-Macon college, Va., and at Oxford, S. C. James was graduated at Randolph-Macon in 1849, and joined the Virginia conference of the Methodist church. During the civil war he was pastor of the Broad street church in Richmond, Va., and throughout this period preserved a conservative attitude, never permitting politics to enter into his religious discussions, and endeavoring in every way, after the struggle, to promote good feeling between the sections. From 1868 until his death he was president of Randolph-Macon college. Dr. Duncan was a leader in the councils of his church. For many years he was editor of "The Richmond Christian Advocate."—His brother, **William Wallace,** clergyman, b. in Ashland, Va., 20 Dec., 1839, was graduated at Randolph-Macon college in 1858, joined the Virginia conference the next year, and held several important charges. During the civil war he was a chaplain in the Confederate army. In 1875 Mr. Duncan was transferred to the South Carolina conference, and elected professor of mental and moral philosophy in Wofford college. He was a member of the general conferences of 1878, 1882, and 1886, and a delegate to the œcumenical council in London in 1881. The degree of D. D. was conferred on him in 1882 by Emory college, Ga., and by Central college, Mo. In May, 1886, he was elected bishop of the Methodist Episcopal church south. He resides in Spartanburgh, S. C.

DUNCAN, James Henry, lawyer, b. in Haverhill, Mass., 5 Dec., 1793; d. there, 8 Feb., 1869. He was graduated at Phillips Exeter academy and at Harvard in 1812. After studying law with Leverett Saltonstall in Salem, he was, in 1815, admitted to the Essex bar, and began to practise in Haverhill. He was a member of the Massachusetts state legislature in 1827–'8, 1837–'8, and in 1857, and of the governor's council in 1839–'40. From 1828 till 1831 he was a state senator, and then was elected as a Whig to congress, serving from 3 Dec., 1849, till 3 March, 1853. For many years he was chairman of the board of managers of the Ameri-

can Baptist missionary union, a trustee of Newton theological seminary, and from 1835 till his death a fellow of Brown university, which gave him the degree of LL. D. in 1861. He was actively connected with the state militia, attaining the rank of colonel, and was also a commissioner of bankruptcy in 1841.—His son, **Samuel White,** clergyman, b. in Haverhill, Mass., 19 Dec., 1838, was graduated at Brown in 1860, and at Rochester theological seminary in 1866. In the interval between his college and theological courses he spent a year in foreign travel, and some time in the Union army as captain of the 50th Massachusetts regiment. In 1867 he was ordained as pastor of the Erie street Baptist church, Cleveland, Ohio. In 1875 he accepted a call to the Ninth street church, Cincinnati, and remained there till 1885, when he became pastor of the 2d Baptist church in Rochester, N. Y. In 1885 he was called to the presidency of Vassar college, but declined, continuing his pastorate in Rochester. The University of Chicago gave him the degree of D. D. in 1878.

DUNCAN, John M., clergyman, b. in 1796; d. in Glasgow, Scotland, 3 Oct., 1825. He was an English clergyman who travelled extensively in the United States, and published several books, among which are "Creeds and Confessions of Faith," "Moral Government of God," and "Sabbath among the Tuscaroras." He dedicated to Prof. Benjamin Silliman "Travels in the United States and Canada in 1818–'19" (New York, 1823).

DUNCAN, Johnson Kelly, soldier, b. in York, Pa., 19 March, 1827; d. in Knoxville, Ky., 18 Dec., 1862. He was graduated at the U. S. military academy in 1849, and became 2d lieutenant in the 3d artillery, serving in the Florida hostilities against the Seminole Indians. From 1850 till 1853 he was attached to Forts Sullivan and Preble in Maine, on garrison duty, and was then assistant on the Northern Pacific railroad exploration till December, 1854. He resigned from the army in January, 1855, and became superintendent of repairs in New Orleans, in charge of the branch mint, marine hospital, quarantine warehouse, and Pas à l'Outre boarding station. From 1859 till 1860 he was professionally occupied as civil engineer, surveyor, and architect in New Orleans, becoming also, in 1860, chief engineer of the board of public works of the state of Louisiana. At the beginning of the civil war he entered the Confederate army as colonel, but soon was appointed brigadier-general from Louisiana. He commanded Forts Jackson and St. Philip at the time of their capture by Admiral Farragut, on 25 April, 1862, and became a prisoner of war.

DUNCAN, Joseph, governor, b. in Paris, Ky., 22 Feb., 1789; d. in Jacksonville, Ill., 15 Jan., 1844. He received an excellent education and studied law. During the war of 1812 he served as lieutenant in the U. S. infantry, and distinguished himself especially in the defence of Fort Stephenson under Maj. George Croghan, receiving the testimonial of a sword from congress. Subsequently he settled in Kaskaskia, where he practised his profession, and was made major-general of Illinois militia. In 1824 he was elected to the state senate, and, while holding that office, originated the law which first established common schools in the state. He was elected to congress as a Jackson Democrat, and served for four successive terms, from 3 Dec., 1827, till November, 1834, when he was elected governor of Illinois, holding that office till 1838. He then retired to his home in Jacksonville, whither he had removed in 1829, and continued there till his death.

DUNCAN, Thomas, soldier, b. in Kaskaskia, Ill., 14 April, 1819; d. in Washington, D. C., 7 Jan., 1887. He early became a soldier, and served as a private in the Illinois mounted volunteers in 1832, during the Black Hawk war. Subsequently he was connected for some years with military expeditions, and in 1846 was appointed from Illinois as 1st lieutenant in the U. S. mounted rifles, now the 3d cavalry. He served during the war with Mexico, and was engaged in the siege and surrender of Vera Cruz. Later he was on recruiting duty, was promoted captain in March, 1848, and was on garrison duty at various posts till 1856. He was stationed with his regiment in New Mexico till 1862, had command of Fort Burgwin, Fort Massachusetts, Fort Garland, and Fort Union, participated in the Navajo expedition of 1858, defeated the Comanche Indians in the action at Hatch's Ranch in May, 1861, and became major of his regiment in June, 1861. During the civil war he had command of Fort Craig in New Mexico, was in charge of the cavalry forces at the battle of Valverde, N. M., and of his regiment in the action in Albuquerque, N. M., where a portion of his skull was carried away by a cannon-ball. He was assistant provost-marshal of Iowa in 1863–'6, became lieutenant-colonel of the 5th U. S. cavalry in July, 1866, and commanded the district of Nashville till September, 1868. He then was ordered to the Department of the Platte, was stationed successively at Fort McPherson and Fort D. A. Russell, and was afterward in charge of the construction of Sidney barracks, till November, 1871. Failing health compelled him to obtain sick leave till January, 1873, when he was retired from active service. Col. Duncan received several brevets, including that of brigadier-general, for his services during the civil war.

DUNCAN, William, soldier, b. in Adams county, Pa., 14 Oct., 1772; d. in Philadelphia, Pa., 16 Feb., 1864. In early youth he settled in Philadelphia, where he engaged in mercantile pursuits. During the war of 1812 he was superintendent of U. S. military stores, and was stationed at the arsenal in Philadelphia, holding the office of adjutant-general during 1813–'4. Later he was one of Gov. Simon Synder's special aides, and commanded a brigade at Camp Dupont, near Wilmington, Del., when Philadelphia was threatened by the British, before their defeat at Baltimore. For many years he was a member of the Pennsylvania legislature. In 1829 he became surveyor of customs of Philadelphia, and held that office for two terms. He was a brigadier-general of the Pennsylvania volunteers, and was one of the founders of Jefferson medical college, Philadelphia.

DUNCAN, William Cecil, clergyman, b. in New York city, 24 Jan., 1824; d. in New Orleans, La., 1 May, 1864. His father was a native of Glasgow, Scotland, and emigrated to this country in early life. During the childhood of his son he removed to Grenada, Miss. William Cecil was graduated at Columbia in 1843, studied divinity at Hamilton theological seminary, and returned to the south in 1847. There he established, at New Orleans, the "Southwestern Baptist Chronicle," a religious weekly, which he conducted with vigor and ability. He was ordained in 1848, but, although preaching constantly, accepted no pastoral charge, devoting his entire time to his paper. In 1851, his health entirely failing him, he sailed for Europe, and spent nearly a year in Italy. On his return to New Orleans, convalescent, he was elected to the professorship of Greek and Latin in the University of Louisiana. Three years later he became pastor of the Coliseum place Baptist church in New Orleans, where he continued for six years, although twice compelled to visit Texas for his health. In 1861

his outspoken loyalty to the national government alienated the feelings of his people, and he was forced to go to the north, leaving his family. In the summer of 1862, after the occupation of the city by the Union forces, Dr. Duncan returned to New Orleans and engaged in secular occupations, endeavoring, to the utmost of his ability, to promote the return of Louisiana to the Union. Though suffering from consumption, which resulted fatally, he labored, with pen and voice, for this result, and before his death had the satisfaction of seeing its accomplishment. Columbia gave him the degree of D. D. in 1857. Among his works are "Life of John the Baptist," based on a monograph by Von Rohden (New York, 1853); "History of the Baptists for the First Two Centuries of the Christian Era" (1857); and "The Tears of Jesus" (1859).

DUNCAN, William Stevens, physician, b. in Brownsville, Fayette co., Pa., 24 May, 1834. He studied at Mount Union college, Ohio, was graduated at the medical department of the University of Pennsylvania in 1858, and settled in Brownsville. He served as a volunteer surgeon in the national army at the battle of Gettysburg and was captured, but soon escaped. Dr. Duncan has accomplished numerous difficult surgical operations, including herniotomy nine times and trephining seven times. Besides contributions to journals, he has published "Medical Delusions" (1869) and "Physiology of Death" (1876).

DUNDAS, Francis, British soldier, b. in England about 1750; d. in January, 1824. He entered the British army as ensign in the 1st guards in April, 1775, and served through the Revolutionary war. In January, 1778, he became captain, and participated in the battles of Brandywine, Germantown, Monmouth, and the reduction of the forts on the Delaware. He joined Lord Cornwallis in 1780 and was made lieutenant-colonel. At Guilford and Yorktown he commanded the advance guard. He served in Martinique in 1794, and was governor of the Cape of Good Hope in 1796–1803. In 1812 he was made a general in the army.

DUNDAS, James, banker, b. in Alexandria, Va., in 1788; d. in Philadelphia, Pa., 4 July, 1865. He early settled in Philadelphia, where he became a banker, and was president of the Pennsylvania bank. Mr. Dundas was prominent in many local enterprises, and at the time of his death was president of the Pennsylvania horticultural society.

DUNGLISON, Robley, physician, b. in Keswick, England, 4 Jan., 1798; d. in Philadelphia, Pa., 1 April, 1869. He received the degree of M. D. in London in 1819, and from the University of Erlangen in 1823, settled in London, and began the practice of his profession, and also edited the London "Medical Repository" and the "Medical Intelligencer"; but in 1824, at the invitation of Thomas Jefferson, he came to the United States, and from that year till 1833 was professor of medicine in the University of Virginia. He then accepted the professorship of materia medica and therapeutics in the University of Maryland, and in 1836 that of the institutes of medicine in Jefferson medical college, Philadelphia, where he remained for more than thirty years, during a large portion of which time he was dean of the faculty; and the extraordinary success of this institution was largely due to the attractive course of lectures and to the remarkable tact and practical sagacity with which he administered its affairs. He was a close student of philology and general literature, and enjoyed a high reputation for benevolence, which was especially exercised in giving time and services to the Philadelphia institution for the blind. Much of his attention was directed in later years to this cause, and he was very successful in promoting the printing of books in raised letters for the use of the blind. Dr. Dunglison was president of the Musical fund society of Philadelphia, vice-president of the Pennsylvania institution for the blind and of the American philosophical society, and a member of many literary and scientific societies. In 1825 he received the degree of LL. D. from Yale. He translated and edited a large number of foreign works, including Magendie's "Formulary," the "Cyclopædia of Practical Medicine" of Drs. Forbes, Tweedie, and Conelly, and also edited many originally published in the United States. His published works, which have sold very largely, comprise "Commentaries on Diseases of the Stomach and Bowels in Children" (London, 1824); "Introduction to the Study of Grecian and Roman Geography," the Grecian by George Long, Esq., the Roman by himself (Charlottesville, 1829); "Human Physiology" (Philadelphia, 1832); "Dictionary of Medical Science and Literature" (Boston, 1833; 15th ed., 1858); "Elements of Hygiene" (Philadelphia, 1835; 2d ed., entitled "Human Health," 1844); "General Therapeutics" (1836; 6th ed., 1857); "The Medical Student, or Aids to the Study of Medicine" (Philadelphia, 1837); "New Remedies" (1839); and "The Practice of Medicine" (1842).

—His son, **Richard James,** physician, b. in Baltimore, Md., 13 Nov., 1834, was graduated at the University of Pennsylvania in 1852, and at Jefferson medical college in 1856, settled in Philadelphia, and entered on an extensive practice. During the civil war he was acting assistant surgeon in the U. S. army, and on duty in various military hospitals in Philadelphia. He was at one time physician to the Albion society, and attending physician to the Pennsylvania institution for the instruction of the blind, as also to the Burd orphan asylum. He is a member of many medical societies in the United States and Europe, and has contributed valuable papers to the "North American Medico-Chirurgical Review," among which may be mentioned "Observations on the Deaf and Dumb" (1858) and "Statistics of Insanity in the United States" (1860), both of which appeared in pamphlet-form. He wrote "Reflections on Exanthematic Typhus" in 1861, a series of articles on the "Public Medical Libraries of Philadelphia" for the Philadelphia "Medical Times" in 1872, and "Letters on Medical Centennial Affairs" for the "New York Medical Record" in 1876. He has edited his father's "History of Medicine" (1872); the "Medical Dictionary" (1874); and translated from the French Guersaut's "Surgical Diseases of Children" (1873).

DUNHAM, Carroll, physician, b. in New York city, 29 Oct., 1828; d. in Irvington-on-Hudson, N. Y., 18 Feb., 1877. He was graduated at Columbia in 1847, and at the College of physicians and surgeons, New York, in 1850; and in 1852 began practice in Brooklyn. In 1858 he removed to Newburgh, and in 1863 to Irvington. He was president of the American institute of homœopathy, and for many years dean of the New York homœopathic medical college. For a year prior to the world's homœopathic convention held in Philadelphia, Pa., he was actively engaged in its behalf, and subsequently compiled the proceedings for publication. He has contributed to periodicals, and published "Homœopathy the Science of Therapeutics" (1877) and "Lectures on Materia Medica" (1879).

DUNHAM, William Russell, physician, b. in Chesterfield, Cheshire co., N. H., 15 Dec., 1833. He studied at Berkshire medical college, Massachusetts, and at Harvard university, being graduated at the

latter in 1865. He first practised at Westmoreland, N. H., but removed to Keene, in the same state, in 1876. He was examining surgeon for pensions on the board from April, 1882, to June, 1885, and is now (1887) medical director of the Granite state mutual aid association. He has been a member of the Connecticut river valley medical society, and also its president. He is the author of "Theory of Medical Science: The Doctrine of an Inherent Power in Medicine a Fallacy," which claims that a revolution in medical philosophy is imperative in order to harmonize with the correct theory of vital force. He is skilled in the science of astronomy, and has invented an ingenious contrivance explanatory of some of its problems.

DUNKIN, Christopher, Canadian statesman, b. 24 Sept., 1811; d. in Montreal, 6 Jan., 1880. He was educated at the universities of London and Glasgow, emigrated to the United States, and became a teacher of Greek at Harvard in 1834. In 1835 he gave up his tutorship and removed to Canada. He edited the Montreal "Morning Chronicle" from May, 1837, until the following summer, and on the consummation of the union of Upper and Lower Canada he received an appointment under the government, which he retained until May, 1847. He also studied law, and was admitted to the bar of Lower Canada in 1846. In 1857 he was elected to parliament for Drummond and Arthabaska, which he represented until 1861, when he was defeated. In 1862 he was elected for Brome, and was re-elected by acclamation at the general election in 1868. In 1867 he became provincial treasurer of Quebec, and in 1869 entered the Dominion cabinet as minister of agriculture and statistics, holding this portfolio until 1871, when he was appointed puisne judge of the superior court of Quebec. He was a member of the council of public instruction from 1856 till 1859, and was also a lieutenant-colonel in the Montreal light infantry. During his parliamentary career he was the means of securing much beneficial legislation, but the measure with which he was most intimately connected bears his name, and is known as the "Dunkin Temperance Act of 1864."

DUNLAP, Alexander, physician, b. in Brown county, Ohio, 12 Jan., 1815. He was graduated at Miami university in 1836, and at Cincinnati medical college in 1839, and practised in Greenfield, Ripley, and Springfield, Ohio. He was one of the first surgeons in the country to perform the difficult operation of ovariotomy, and since 1843 has performed it over 100 times, successfully in seventy-five per cent. of his cases. He was a member of the International medical congress in Philadelphia in 1876, vice-president of the American medical association in 1877, and has contributed to the literature of his profession.

DUNLAP, Andrew, lawyer, b. in Salem, Mass., in 1794; d. there in 1835. He was graduated at Harvard in 1813, studied law in Salem, was admitted to the bar there, becoming distinguished in his profession. He removed to Boston in 1820, and was U. S. district attorney for Massachusetts from 1829 till just before his death. He published two fourth-of-July orations (1819 and 1822), his speech in defence of Abner Kneeland (Boston, 1834), and "Admiralty Practice in Civil Cases of Maritime Jurisdiction" (Philadelphia, 1836; 2d ed., New York, 1850), which was "pronounced by competent judges to be learned, accurate, and well digested." —His son, **Samuel Fales,** lawyer, b. in Boston, Mass., in 1825, was graduated at Harvard in 1845, and has published "Origin of Ancient Names" (Cambridge, 1856) and "Vestiges of the Spirit-History of Man" (New York, 1858); and edited, with notes, his father's "Admiralty Practice."

DUNLAP, George Washington, congressman, b. near Lexington, Ky., 22 Feb., 1813; d. in Lancaster, Ky., 6 June, 1880. He was graduated at Transylvania university in 1834, and at the law-school in 1837. He began practice at Lancaster, Ky., in 1838, and was master commissioner of the circuit court from 1843 till 1874, was a member of the legislature in 1853, and of the famous Frankfort border-state convention of May, 1861, where he used his influence to avert the civil war. He was elected to congress as a Unionist, and served one term, in 1861–'3, voting men and money for the support of the government. He was a presidential elector on the Democratic ticket in 1864.

DUNLAP, James, educator, b. in Chester county, Pa., in 1744; d. in Abington, near Philadelphia, Pa., 22 Nov., 1818. He was graduated at Princeton in 1773, and was a tutor there in 1775–'7, at the same time studying theology. He was ordained by Newcastle presbytery on 21 Aug., 1781, went to western Pennsylvania, and, after holding several pastorates, became in 1803 president of Jefferson college, Cannonsburg, Pa., holding also the chairs of languages and moral philosophy. He resigned in 1812, and in 1813–'16 had charge of the academy (now Madison college) at Uniontown, Pa. He was a thorough and accurate classical scholar, and much respected by his pupils, who "called him Neptune, because his presence quelled the waves of noisy merriment among them."

DUNLAP, John, printer, b. in Strabane, Ireland, in 1747; d. in Philadelphia, Pa., 27 Nov., 1812. While a boy he went to live with an uncle, William Dunlap, a printer and publisher in Philadelphia, at the age of eighteen entered the business, and in November, 1771, began the publication of the Pennsylvania "Packet." This paper was changed into a daily in 1784, the first in the United States, and afterward became the "North American and United States Gazette." Mr. Dunlap was appointed printer to congress, and first printed the "Declaration of Independence." He was an officer in the first troop of Philadelphia cavalry, which became the body-guard of Washington at Trenton and Princeton. In 1780 he gave £4,000 to supply provisions to the Revolutionary army.

DUNLAP, John A., author, b. about 1793; d. in New York city about 1858. He was little known, except as an accurate and painstaking legal compiler, somewhat given to intemperance, which increased in his later years, and ultimately caused his death. He published a digest of the laws relating to justices of the peace in New York, an "Abridgment of the 12th and 13th Books of Coke's Reports" (New York, 1813); "Practice of the Superior Court of New York in Civil Actions in 1821–'3" (2 vols., Albany, 1841); and edited the 3d American edition of Paley's "Agency" (New York, 1847) and about fifteen volumes of the American edition of the English chancery reports.

DUNLAP, Robert Pinckney, governor of Maine, b. in Brunswick, Me., 15 Aug., 1796; d. there, 20 Oct., 1859. He was graduated at Bowdoin in 1815, admitted to the bar in 1818, and began practice in his native town, but soon abandoned it, having inherited a fortune. He was a member of the lower house of the legislature in 1821–'2, of the senate in 1823, and its president in 1827–'9 and 1831–'3. He was chosen to the executive council in 1833, was governor of the state in 1834–'8, and was elected to congress as a Democrat in 1842, and served two terms, in 1843–'7. He was for many years president of the board of overseers of Bow-

doin college, collector of Portland in 1848–'9, and postmaster of Brunswick in 1853–'7. Gov. Dunlap was a prominent freemason, being the head of the order in the United States for nine consecutive years. An address delivered by him at the triennial meeting of the general grand chapter of the United States at Hartford was published (1856).

DUNLAP, William, artist, b. in Perth Amboy, N. J., in 1766; d. in New York city, 28 Sept., 1839. He came to the city of New York in 1777, and began to paint portraits, and in 1783 finished a likeness of Washington. In 1784 he went to London, where for several years he studied with Benjamin West. Returning to the United States, Mr. Dunlap became engaged in various artistic, dramatic, and other literary work. In 1789 "The Father," one of his best plays, was produced on the stage. In 1796 he became connected with Hallam and Hodgkinson in the management of the old John street theatre, and in 1798 assumed the management of the Park theatre, where, early in the season, his tragedy "André" was successfully performed. During his administration, numerous imitations, alterations, adaptations, and translations of German and other foreign authors were successfully produced, many of which were published in pamphlet-form, and held the stage in after years. Mr. Dunlap continued as manager and co-manager of the Park theatre for several seasons, until he was overtaken by financial ruin. In 1814–'16 he served as assistant paymaster general of the New York militia. Thereafter he again turned his attention to his early art, and produced a series of large and imposing paintings, mostly scriptural, among which "Christ Rejected," "Bearing the Cross," "Calvary," and "Death on the Pale Horse" obtained considerable reputation. The last named was publicly exhibited in most of the large cities of the country. Mr. Dunlap is known as the founder and early vice-president of the National academy of design. Both as a writer and painter he was a man of more than usual ability; but during a life of varied and ambitious experiment and uninterrupted industry he never attained financial success. A "Dunlap society" was organized in New York city in 1886, for the purpose of preserving the half-forgotten, meritorious plays of Dunlap and other olden American dramatists. In 1887 the society published, for distribution to its members, a small edition of "The Father," one of his comedies, and the second play written by an American author; and also a volume of "Poetic Addresses," spoken at the openings of early American theatres, since 1752. His writings include a "Life of George Frederick Cooke" (London, 1813); "Life of Charles Brockden Brown" (Philadelphia, 1815); "History of the American Theatre" (New York, 1832; London, 1833); "History of the Rise and Progress of the Art of Design in the United States" (New York, 1834); "Thirty Years Ago, Memoirs of a Water-Drinker" (1836); "History of New York, for Schools" (1837); and "New Netherlands, Province of New York" (1840).

DUNLAVY, James, soldier, b. in Decatur county, Ind., 4 Feb., 1844. His father was a prominent democratic politician in Indiana. He enlisted as a private in the 30th Iowa cavalry, and in 1863 reenlisted in the 3d Iowa cavalry, and served in Tennessee, Missouri, and Georgia till the close of the civil war. During the battle of Mine Creek, Kansas, 25 Oct., 1864, when alone and wounded in one arm, he captured the Confederate Gen. Marmaduke. After the war he entered Keokuk, Iowa, medical college, was graduated in 1870, and is now (1887) practising his profession at Stiles, Iowa.

DUNLOP, George Kelly, P. E. bishop, b. in county Tyrone, Ireland, 10 Nov., 1830. He was educated at the Royal college of Dungannon, and at Queen's university, Galway, where he graduated with honors in 1852. He came to the United States in October of the same year, was ordained deacon by Bishop Hawks, in Palmyra, Mo., 3 Dec., 1854, and priest in St. Louis, by the same prelate, 7 Aug., 1856. During his diaconate Mr. Dunlop was missionary at St. Charles, Mo. He then became rector of Christ church, Lexington, Mo., and seven years afterward rector of Grace church, Kirkwood. This latter place he held until his election to a bishopric. He was active in diocesan affairs, was a member of the standing committee, and deputy to the general convention. Dr. Dunlop was selected by the general convention of 1880 for missionary bishop of New Mexico and Arizona, and was consecrated in Christ church, St. Louis, Mo., 21 Nov., 1880. The same year he received the degree of S. T. D. from Racine college.

DUNLOP, James, jurist, b. in Georgetown, D. C., 28 March, 1793; d. there, 6 May, 1872. He was graduated at Princeton in 1811, studied law with Francis S. Key, whose partner he afterward became, and acted as district attorney in his place when Mr. Key was called away on business in 1833. He was recorder of Georgetown till 27 Dec., 1838, when he was appointed judge of the criminal court for the District of Columbia. He was made assistant judge of the U. S. circuit court for that district on 3 Oct., 1845, and was chief justice from 27 Nov., 1855, till 1863, when the court was abolished. Judge Dunlop's opinions often attracted attention in England and other foreign countries.

DUNLOP, James, lawyer, b. in Chambersburg, Pa., in 1795; d. in Baltimore, Md., 9 April, 1856. He was graduated at Dickinson college in 1812, studied law, and became prominent in his profession. He was a member of the state senate in 1825, and was twice in the lower house of the legislature subsequent to that time. He was a delegate to the State constitutional convention of 1838, removed in that year to Pittsburg, and in 1855 to Philadelphia. Mr. Dunlop was a tireless student, and was noted for his caustic wit. Though a formidable opponent, he was very courteous in manner. He was opposed to slavery, and often aided fugitives to escape, once buying a negro and setting him free. He died of paralysis while on a visit to Baltimore. He published "Laws of Pennsylvania in 1700–1853," chronologically arranged, with notes and references to decisions of the supreme court (3d ed., Philadelphia, 1853); "Digest of the General Laws of the United States" (1856); and wrote an elaborate essay on the "Boundaries of Pennsylvania and Maryland," in vol. i. of the State historical society's collections.

DUNLOP, William, Scottish educator, b. in Scotland about 1650; d. there in March, 1700. He

was educated at Glasgow university and was licensed as a minister, but took part in the insurrection of 1679, and subsequently joined the emigrants who colonized Carolina. Here he continued preaching at intervals till 1690, when he returned to Scotland, and was appointed by King William principal of Glasgow university, where he remained until his death, supporting its interests with dignity and zeal.—His son, **Alexander,** b. in Carolina in 1684; d. in Scotland in 1742, became professor of Greek in Glasgow university, and afterward published a grammar of that language (1736) that was long held in esteem.

DUNLOP, William, Canadian physician, b. in Greenock, Scotland, about 1795; d. in Canada in 1848. He was educated as a physician, served as a regimental surgeon in the war with the United States in 1812–'5, and in India; published a book, founded a newspaper, lectured, and engaged in other enterprises before he came to Canada in 1826 with John Galt, the Scottish novelist. He was a contributor to "Blackwood's Magazine," and had been intimately acquainted with John Wilson, Maginn, Hogg, and others mentioned in "The Recreations of Christopher North." After arriving in Canada he contributed to this magazine "The Autobiography of a Rat," and wrote much for the local literary and political journals. In 1836 he founded the Toronto literary club, before which he frequently lectured. The first parliament after the union of Upper and Lower Canada met in 1841 at Kingston, and Dunlop was returned to it for Huron, which he represented until his resignation in 1846. He was noted for his eccentricities.

DUNMORE, John Murray, Earl, royal governor of Virginia, b. in 1732; d. in Ramsgate, England, in May, 1809. He was descended, in the female line, from the house of Stuart; succeeded to the peerage in 1756; was appointed governor of New York in 1770, and of Virginia in July, 1771. On his arrival at Williamsburg in 1772 he dissolved the Virginia assembly; and in May, 1774, he again dissolved the same body, because it resolved to keep the first of June, the day for closing the port of Boston, as a day of fasting, humiliation, and prayer. On the following April, Lord Dunmore caused the removal of the powder from the magazine at Williamsburg, on board an English ship. This incensed the people, and they took arms under Patrick Henry. Lord Dunmore, becoming alarmed at this action, convened the council, but nothing changed Henry's purpose. Lady Dunmore was sent on board the "Fowey" man-of-war, and the governor issued a proclamation against "a certain Patrick Henry" and his "deluded followers," but upon the receipt of the news from Lexington he fled to Fort Johnston, sending his wife to New York. In 1776, when the British army arrived in New York, Lord Dunmore was joined by a few loyalists, and carried on a petty warfare, plundering the inhabitants on the James and York rivers, and carrying off their slaves. On 9 Dec. his followers suffered a severe defeat at the battle of Great Bridge, and shortly afterward he burned Norfolk, then the most populous and flourishing town of Virginia. He was afterward obliged to take refuge on board his fleet, which was driven by well-placed batteries from one place to another, till he anchored near the mouth of the Potomac. Continuing his predatory warfare, he established himself early in June on Gwynn island, in the Chesapeake, there vainly awaiting aid, but was dislodged by the Virginians in July, being wounded in the leg. Washington said, in December, 1775, "I do not think that forcing his lordship on shipboard is sufficient. Nothing less than depriving him of life or liberty will secure peace to Virginia, as motives of resentment actuate his conduct to a degree equal to the total destruction of that colony." Lord Dunmore with his fleet of fugitives continued during a part of 1776 on the coasts and rivers of Virginia, but, after various distressing adventures, he burned the smaller vessels, and sent the remainder to the West Indies. In 1779 his name appears in the confiscation act of New York. He returned to England, and in 1786 was appointed governor of the Bermudas.—His wife, **Elizabeth,** d. at Southwood house, near Ramsgate, England, in 1818, was the daughter of the Earl of Galloway.

DUNN, John Henry, Canadian statesman, d. in London, England, 21 April, 1854. He came to Canada in 1820, and, having been appointed receiver-general and a member of the legislative and executive councils of Upper Canada, retained those offices till the union of the provinces in 1840. —His son, **Alexander Roberts,** b. in Canada; d. about 1867, entered the army, and served in the Crimean war. He was a lieutenant of horse in the 11th, Lord Cardigan's, hussars, rode in the celebrated charge of the light brigade at Balaklava, and was specially selected by his surviving comrades as the most deserving of them all to receive the Victoria cross. After retiring from the army he went to Toronto, Canada, and in June, 1858, together with Baron de Rottenburg, became attached to the 100th, or Prince of Wales's, royal Canadian regiment. Subsequently he was stationed with his regiment at Gibraltar, and, on the retirement of De Rottenburg from command, he was appointed lieutenant-colonel.

DUNN, Oscar, Canadian journalist, b. in Côteau du Lac, Quebec, in 1844; d. in the city of Quebec, 15 April, 1885. He studied law, and was admitted to the bar, but never practised, drifted into journalism, and wrote essays for the "Courrier de St. Hyacinthe," of which paper he became editor. Subsequently he resided in Paris, France, and contributed to the editorial columns of the "Journal." On his return to Canada he became editorially connected with "La Minerve," of Montreal, and also edited "l'Opinion Publique," a weekly, and was for a time one of the editors and directors of "La revue Canadienne." He became librarian to the department of public instruction of Quebec, and held the office of secretary of that department at the time of his death. He wrote pamphlets on national, religious, and political topics, which were widely read, and was the author of a "Glossaire Franco-Canadian," a second edition of which he was preparing at the time of his death.

DUNN, Oscar James, lieutenant-governor of Louisiana, b. in Louisiana in 1820; d. in New Orleans, 20 Nov., 1871. He was born a slave, and as soon as he was old enough to do manual labor was purchased by a firm in the plastering trade, but after reaching his majority ran away from his owners. When Gen. Butler entered New Orleans he enlisted in the first regiment of colored troops raised in Louisiana, and reached a captaincy, the highest rank then permitted to his race. When an incompetent person was promoted over him to the rank of major, he resigned his commission. After the war Capt. Dunn was active in promoting the reconstruction of his state. He had acquired wealth, and in 1868 became lieutenant-governor of Louisiana. John R. Lynch, then secretary of state of Mississippi, in an oration delivered at his funeral, said: "There now lie before us the remains of the first colored man who ever held an executive office in this country."

DUNN, Thomas, Canadian legislator, b. in 1730; d. in Quebec, 15 April, 1818. As a senior member of the Executive council of Lower Canada he assumed the administration of the government on the departure of Sir R. S. Milnes in 1805, and again became administrator on the departure of Gov. Craig, performing this function until the arrival of Sir George Prevost in 1811. During the time that he held office he permitted Monseigneur Panet to be elected to the coadjutorship, and both then and previously advocated a removal of the disabilities which the Roman Catholic clergy suffered. He was also a puisne judge of the court of king's bench, and a Lower Canadian seignior.—His son, **William,** British soldier, b. in London, England, in 1787; d. 24 July, 1863, entered the army in 1803, served in the campaign in Italy, at the battle of Maida and capture of Scylla Castle in 1806, in the expedition to Egypt in 1807, and the campaigns in the Peninsula in 1810 and 1811. He served in Canada in 1814 during the war with the United States, and was present at the taking of Moose island and the occupation of Castine. In 1857 he retired from active service with the rank of major-general on full pay.

DUNN, Williamson, pioneer, b. near Danville, Ky., 25 Dec., 1781; d. in Hanover, Ind., 11 Nov., 1854. He removed to Indiana territory in 1809, settled in Jefferson county, and was appointed justice of the peace, and judge of the court of common pleas of Jefferson county, in 1811, by Gen. Harrison, then governor of the territory. During the war of 1812 he was commissioned by President Madison captain of a company of rangers, an organization provided by congress for the protection of the frontier settlements, which he had in charge for two years. In 1814 Gov. Posey commissioned him an associate judge of the circuit court of Jefferson county. He held this office until 1816, when he entered the first legislature under the state constitution. He was one of the original members and first ruling elders of the Presbyterian church, organized in 1820 at Hanover, a village laid out on his farm. He was a representative in the first three legislatures of the state of Indiana, and was twice speaker. While in the state legislature he was virtually offered a seat in the U. S. senate, but declined. In 1823, having been appointed by President Monroe as register of the land office, he removed to the wilderness, and, in connection with Maj. Whitlock, the receiver, laid out the town of Crawfordsville. He was re-appointed register in 1827, retaining the office till 1829. He returned to Hanover in 1829, was one of the founders of Hanover college, to which he donated fifty acres of land, and served as one of its trustees for many years. He also gave to Wabash college the tract of land on which it was erected, and was a member of its first board of trustees. These colleges are indebted to him for their establishment. After his return to Jefferson county he was elected to the state senate, to fill an unexpired term, and in 1843 was a defeated candidate for the senate. He also served another term on the bench, to which he was re-elected, and held the office till the court was abolished. Judge Dunn began the movement that culminated in the election of Zachary Taylor to the presidency by the Whigs in 1848. Judge Dunn's unyielding devotion to conviction twice cost him a seat in the state senate. He was prominent in the councils of the Presbyterian church, and widely known as connected with the early history of Indiana.—His son, **William McKee,** lawyer, b. in Hanover, Jefferson co., Ind., 12 Dec., 1814. He was graduated at the Indiana state university in Bloomington in 1832, and was for three years principal of the preparatory department and professor of mathematics at Hanover college, Indiana. After a graduate course at Yale, where he received the degree of A. M. in 1835, he studied law, was admitted to the bar, and practised for many years in Madison, Ind. He was a member of the legislature in 1848, a delegate to the State constitutional convention in 1850, and was then chosen to congress as a Republican, serving from 1859 till 1863. When the war broke out he was offered a colonelcy by Gov. Morton, and a brigadiership by President Lincoln, but declined both. During his second term he was chairman of the committee on patents. He was defeated in the election for the following congress, and on 13 March, 1863, was appointed major and judge-advocate, U. S. volunteers, in the department of Missouri. On 22 June, 1864, he became colonel and assistant judge-advocate-general, U. S. army, and was brevetted brigadier-general, U. S. army, in March, 1865, for faithful, meritorious, and distinguished services in his department. On the retirement of Judge-advocate-general Holt, he was elected to the place. He was a delegate to the Philadelphia loyalists' convention of 1866. Gen. Dunn became judge-advocate-general, with the rank of brigadier-general, on 1 Dec., 1875, and on 22 Jan., 1881, was retired from active service.

DUNNELL, Mark Hill, congressman, b. in Buxton, Me., 2 July, 1823. He was graduated at Waterville college (now Colby university) in 1849, and for five years was the principal of Norway and Hebron academies. He was a member of the lower house of the Maine legislature in 1854, and in 1855 of the state senate, and from that time till 1859 was state superintendent of common schools. In 1856 he was a delegate to the National Republican convention at Philadelphia. He began the practice of the law at Portland in 1860, served in the Union army as colonel of the 5th Maine infantry, and in 1862 was U. S. consul at Vera Cruz, Mexico. He removed to Minnesota in 1865, was a member of the legislature there in 1867, and in 1867–'70 was state superintendent of public instruction. He was then chosen to congress as a Republican, and served four terms in succession, in 1871–'9.

DUNNING, Annie Ketchum, author, b. in New York city, 2 Nov., 1831. She is a daughter of Hiram Ketchum, a politician of some distinction; was educated in private schools in New York, and was for several years a pupil of John S. C. Abbott. She married Rev. Andrew Dunning, pastor of the Congregational church in Thompson, Conn., and to supplement his small salary wrote her first story, "Clementina's Mirror" (New York, 1857). She then became a writer for the Presbyterian board of publication, by which most of her subsequent volumes, about fifty in number, have been published. Most of her books have been written under the pseudonym of "Nellie Grahame." Her books include "Whispers from Dreamland" (Philadelphia, 1861); "Mistaken" (New York, 1866); "First Glass of Wine" (Boston, 1866); "Blind Jessie" (1866); "Only a Penny" (Philadelphia, 1867); "Only a Child" (1868); "Miss Latimer's Meetings" (1869); "Fred Wilson" (1870); "Mary's New Friends" (1871); "A Story of Four Lives, or Mistaken" (Boston, 1871).

DUNNING, Edward Osborne, Congregational minister, b. in 1810; d. in New Haven, Conn., 23 March, 1874. He was graduated at Yale in 1832, and at its theological department in 1835, and was settled as a pastor in Rome and in Canajoharie, N. Y., till 1846. He then accepted an

appointment from the American Bible society as their agent in the southern states, in which he continued till the civil war, when he became a chaplain in the army, receiving his appointment 23 June, 1862, and was stationed at Cumberland, Md., but returned to his work after the war. He had become interested in exploring ancient mounds in various parts of the south, and continued his explorations till a few months before his death.

DUNNINGTON, Francis Perry, chemist, b. in Baltimore, Md., 3 March, 1851. He was graduated at the University of Virginia in 1872, became adjunct professor of analytical chemistry in that year, and in 1885 was made professor of analytical and agricultural chemistry. He was elected secretary of the chemical section of the American association for the advancement of science in 1885, and is a member of the American chemical society and other scientific bodies. Prof. Dunnington is the author of numerous chemical investigations, accounts of which have appeared in the "Chemical News," "American Chemical Journal," the transactions of various societies, and elsewhere.

DUNSTER, Edward Swift, physician, b. in Springvale, York co., Me., 2 Sept., 1834. He is a lineal descendant of Henry Dunster, the first president of Harvard, was graduated from that institution in 1856, and from the New York College of physicians and surgeons in 1859, beginning practice in that city in 1860. He entered the army as assistant surgeon in June, 1861, and served in West Virginia and in the peninsular campaign, acting as medical inspector and medical director of hospitals. After being ordered to Philadelphia, Washington, and West Point, he resigned on 1 Feb., 1866, and resumed the practice of his profession in New York, making a specialty of obstetrics and the diseases of women and children. He was editor of the "New York Medical Journal" in 1866–'72, resident physician in charge of hospitals on Randall's island in 1869–'73, and professor of obstetrics and the diseases of women and children in the University of Vermont in 1868–'71. He subsequently held the same chair in Long Island medical college in the medical department of Dartmouth college, and since 1873 in the University of Michigan. Among his contributions to professional literature are papers on "Relations of the Medical Profession to Modern Education"; "Logic of Medicine"; "Notes on Double Monsters"; "History of Anæsthesia"; "The Comparative Mortality in Armies from Wounds and Disease"; and "History of Spontaneous Generation."

DUNSTER, Henry, educator, b. in Lancashire, England, about 1612; d. in Scituate, Mass., 27 Feb., 1659. He was educated at Cambridge, England, in 1630–'4, Jeremy Taylor and John Milton being among his fellow-students. He emigrated to this country to escape persecution for nonconformity, and was, soon after his arrival, chosen to be the first president of Harvard college, that institution having previously been under the charge of Nathaniel Eaton, who bore the title of "professor," or "master." Eaton had been appointed to the office about 1637, but was removed on account of the severity of his discipline. "President Dunster," says Quincy in his "History of Harvard University," "united in himself the character of both patron and president, for, poor as he was, he contributed, at a time of the utmost need, 100 acres of land" toward the support of the college, "besides rendering it for a succession of years a series of official services well directed, unwearied and altogether inestimable." He probably obtained the charter of 1642, and undoubtedly secured that of 1650, through his own petition. By his personal efforts and sacrifices he built the president's house, and used his influence with the general court for the relief of the institution in its dire necessity. After laboring for fourteen years, he was induced to resign in October, 1654, the college authorities having taken exception to his public proclamation, in the Cambridge church, of which he was also pastor, of certain doubts that had arisen in his mind as to the validity of infant baptism. He was indicted for the same offence by the grand jury, sentenced to a public admonition, and laid under bonds for good behavior. He was subsequently presented by the same body for neglecting the baptism of one of his children. After his resignation he removed to Scituate, where he was employed in the ministry till his death. By his last will he ordered that his body should be buried in Cambridge, and magnanimously bequeathed legacies to the very persons who had been instrumental in his removal from the presidency. He was greatly esteemed for his extensive learning, his sincere piety, and his modest and unobtrusive deportment. His knowledge of the oriental languages, especially Hebrew, was remarkable, the new version of the Psalms by Eliot, Welde, and Mather having been submitted to him for revision. "The New England Psalm-Book" (1640) was thus greatly enriched by his scholarship. Under his influence Harvard took a high stand, and through his intelligent administration of its interests, as well as his thorough educational methods, received an impulse which is doubtless felt to the present day. President Dunster's life has been written by Rev. Jeremiah Chaplin, D. D. (Boston, 1872).

DUNTON, John, author, b. in Graffham, Huntingdonshire, England, 14 May, 1659; d. in New England in 1733. He was apprenticed to a bookseller in London, and emigrated to New England in March, 1686, with a cargo of books. This venture was unsuccessful, and he only remained eight months in the colony. But he returned subsequently, established himself in the bookselling business, and, after twenty years devoted to this pursuit, turned his attention to authorship. In 1701 he was employed in the office of the "Post Angel" newspaper. Later he began the publication of the "Athenian Mercury," republished under the name of the "Athenian Oracle" (4 vols.). In 1705 appeared the "Life and Errors of John Dunton," by himself, in which is to be found the "lives and characters of more than 1,000 contemporary characters of literary eminence," and a description of many of the ministers, booksellers, and other citizens of Boston and Salem. His "Letters from New England" were published by the Prince society (1867).

DUPARQUET, James Diel, colonist, b. in France about 1600; d. in Martinique, 8 Jan., 1658. He was a nephew of Enambuc, founder of the French colonies in the Antilles. The latter, feeling his end approaching and wishing to maintain the colony in Martinique, which he regarded as his own work, sent Duparquet there in 1637. The affability of the new governor gained the affection of all the inhabitants, and his prudence brought about a good understanding between the Caribs and the French. Yet, while Martinique was flourishing under his government, serious troubles arose in the part of St. Christopher that belonged to the French. The governor-general of the Antilles, recently sent out by the king, found that Poincy, who occupied this post, refused to surrender his authority to him. Duparquet went to Guadeloupe in 1646 to take out a commission

from the new governor-general, who authorized him to show the orders of the king to Poincy. He endeavored to enforce his claim by arms, but was defeated and obliged to take refuge among the English, who surrendered him to Poincy, and he was kept a prisoner until the following year. He then set about founding a colony in Grenada, where the West India company had made several vain attempts at a settlement. The fame of his just dealings with the natives of Martinique had reached those of Grenada, who begged him to come among them. He arrived in Grenada in June, 1650, and Kaickruan, a Carib chief, said that if he wanted to make himself master of their island he must consent to trade with them. Duparquet received the proposal joyfully, and agreed to give the inhabitants a certain quantity of glass beads, crystals, knives, and other wares in exchange for the island. When the bargain was concluded, he made the necessary arrangements for establishing the colony, and returned to Martinique. But the savages forgot their agreement, and attacked the French, who quickly reduced them to subjection. Some time afterward the English of St. Lucia, whom Duparquet had vainly warned of the plots that the natives of that island were forming against them, were massacred or forced to leave it, and he planted a colony there, which rapidly became prosperous. Then he went to France and purchased the proprietorship of the three islands, the king appointing him his lieutenant-general. In 1654 he received hospitably and settled in Martinique a number of Dutch families who had been banished from Brazil. In 1656 he averted a famine in Guadeloupe, which had been devastated by a hurricane, by a seasonable supply of provisions. The expenses of his colony in Grenada absorbed a large part of his income, and he gladly consented to a proposal for its purchase from Father Dutertro, who acted as agent in the matter for a M. de Cerillac. The rest of his life was devoted to the people of Martinique, who repaid his zeal for their welfare with ingratitude during his life, but appreciated his great qualities after his death.

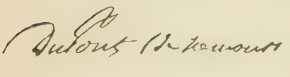
DUPERREY, Louis Isidore, French naval officer, b. in Paris, 21 Oct., 1786; d. there, 10 Sept., 1865. He entered the French navy in 1802, was promoted 2d lieutenant, and sailed in 1817 for a voyage round the world in the corvette "Uranie," which vessel was wrecked on the Malouine islands, and Duperrey, picked up by an American vessel, returned to France, and was promoted to 1st lieutenant. In 1822 he received his commission as captain, and, in command of the corvette "La Coquille," sailed on a scientific expedition to the South American coasts and the Pacific ocean, from which he returned on 24 March, 1825. During that time he visited repeatedly the coasts of Chili and Peru, whence he sent to the navy department interesting reports upon the geology and institutions of those countries, and brought home many thousand zoölogical and botanical specimens. The observations of the pendulum taken during this voyage at many different points proved the flattening of the earth at the poles, and Duperrey also determined the position of the magnetic poles and the figure of the magnetic equator. He designed charts of the coast of South America which are valued, especially one showing the bifurcation of the current at the mouth of the Plate. Duperrey in 1836 was appointed officer of the Legion of Honor, and in 1842 a member of the French academy. He published "Voyage autour du Monde, etc., pendant les années 1822–'3–'4–'5" (Paris, 1826–'30).

DU POISSON, missionary, b. in France about 1695; d. in Louisiana in 1729. He came to this country in 1726, with other Jesuits, in answer to an invitation from the Mississippi company, and descended the Mississippi, accompanied by Father Souel. He described the dangers he encountered in a letter that was published shortly afterward. They rested for some time among the Tonicas, reached Natchez on 13 June, and embarked with Father Dumas in a boat for the Yazoos. After a stay of three days he set out for the Arkansas Indians, to whom he had been specially commissioned. He was well received, and as the boat drew near the village all the people came out to welcome him. He next went to the village of the Santhouis, one of the Arkansas tribes, where there were some French settlers. He was welcomed by the chief, and explained his mission to the assembled people through an interpreter. He found that they were much demoralized by their intercourse with the French traders, and devoted himself to the latter till he could learn the language of the natives. His labors among the Indians were at first not very successful, but after several months he was enabled to fix their attention by some engravings, and he converted several. He continued his labors here for two years, and, as his tribe was obliged to come down to the banks of the Mississippi during the winter of 1729, he resolved to visit Perrier, governor of New Orleans. He reached Natchez on 26 Nov., and was preparing to embark two days later, when the Indians, who had received some injuries at the hands of the French, attacked and killed him.

DUPONCEAU, Peter Stephen, author, b. in France in 1760; d. in Philadelphia, Pa., in 1844. He landed at Portsmouth, N. H., in 1777, and was attached to Baron Steuben's staff. He became a citizen of the United States in 1781, studied law, and while practising his profession translated several works on law, and published legal essays. He was the first to draw the attention of scholars to the philosophical and ethnological labors of early Catholic missionaries in this country. In connection with the American philosophical society he published, in 1819, a report on "The Structure of the Indian Language."

DU PONT DE NEMOURS, Pierre Samuel, political economist, b. in Paris, France, 14 Dec., 1739; d. near Wilmington, Del., 6 Aug., 1817. He was of Huguenot parentage. At the age of twenty-three he published two pamphlets on the finances, which attracted the attention of the celebrated Quesnay, and led to Du Pont's enrolment among the "economists," as the believers in Quesnay's newly discovered principles of political economy were called. They waged unrelenting warfare against the errors and abuses that dwarfed commercial enterprise and ruined the tillers of the soil. Du Pont devoted himself to the cause with zeal, and did more than any one else to give currency to the philanthropic doctrines of the school. His first important book, "De l'exportation et de l'importation des grains" (1764), had a great success. Turgot, then intendant at Limoges, sought the young author's acquaintance, and a close and lasting intimacy ensued. During the next few years Du Pont's chief publications were "Physiocratie," a compendium of Quesnay's system (1768); "De l'origine et du progrès d'une science nouvelle" (1768); "Du commerce de la compagnie des Indes" (1769); "Histoire abrégée des finances de l'Angleterre" (1769); "Analyse du poëme des saisons" (1769); and "Observations sur les effets de la liberté du commerce des grains et sur aux des prohibitions" (1770). He also edited the "Journal de l'agricult-

ure, du commerce, et des finances" (1765–'6), and from May, 1768, the "Ephémérides du citoyen," the organ of the economists. To a minister of the questionable expedients of the Abbé Terray a man like Du Pont could not fail to be obnoxious, and in 1772 the publication of the "Ephémérides" was forbidden. Though persecuted at home, its editor received various titles and decorations from foreign princes, and in 1774 went to Poland, at the instance of King Stanislas-Augustus, to organize a general system of national education. Later in the year, when Turgot succeeded Terray as comptroller-general of the finances, Du Pont was named inspector-general of commerce, and ordered to return forthwith to France. At the head of the bureau in the ministry of finance, to which all affairs of importance were referred, he took a prominent part in all the measures of reform that Turgot instituted. The famous "Report on the Municipalities," which was really the draft of a liberal constitution, was the work of Du Pont, though Turgot did not remain long enough in office to submit it to the king. Upon Turgot's disgrace in 1776, Maurepas, his successor, placed Du Pont upon the retired list and banished him to the country, where he busied himself with agricultural and literary pursuits until recalled to active duty in 1778 by Vergennes, who employed him in the task of negotiating with the English envoy, Dr. Hutton, the treaty of 1783, by which Great Britain formally recognized the independence of the United States, and later in the still more delicate undertaking of arranging the terms of the commercial treaty that France and England signed in 1786. In recognition of these services he was made councillor of state. He was appointed secretary-general of the assembly of notables in 1787, and drew up the various measures of reform that Calonne presented, the personal interference of Louis XVI. alone saving Du Pont from a second banishment after the fall of that minister. From 1772 till 1789 Du Pont's principal works were a translation into French verse of a portion of Ariosto's "Orlando Furioso" (1781); a memoir of Turgot (1782); and his "Lettre à la chambre du commerce de Normandie" (1788), in which he refuted the attacks on the treaty of 1786. He was a member of the states-general from Nemours at the beginning of the Revolution, and later of the constituent assembly, of which he was twice elected president, and was one of the leaders of the moderate party that advocated a constitutional monarchy. His fearless opposition to the issue of an irredeemable paper currency nearly cost him his life at the hands of the mob, 10 Sept., 1790. After the dissolution of the assembly he edited the "Correspondance patriotique," and published various pamphlets in the interest of law and order, among others his memorable letters denouncing Pétion, mayor of Paris. Du Pont was marked for destruction after 10 Aug., 1792, when he and his son were at the Tuileries among the armed defenders of the king, but escaped to the country, after being hidden in the observatory for several weeks by the astronomer Lalande, and while in concealment wrote his "Philosophie de l'univers." He was finally arrested and imprisoned, and only the death of Robespierre, 28 July, 1794, saved him from the guillotine. As soon as he was released he renewed his opposition to the Jacobins, appearing in print with his "Plaidoyer de Lycias," which compared the enormities of the "terror" with an episode in Athenian history, and with his "Constitution pour la république Française" (1795), and other productions. He also founded and edited the "Historian," a political journal. He was elected to the council of ancients in 1795, and became its president in 1797; but, when the Jacobins broke up the councils with Augereau's troops, Du Pont was again imprisoned, his house and property being pillaged and destroyed. In 1799 he emigrated with his family to this country, where he was received with much consideration, and at Jefferson's request prepared a work on national education in the United States (2d ed., 1812). The author's plan, though not carried out in the country for which it was intended, has been partially adopted in his native land. Returning to France in 1802, Du Pont de Nemours was instrumental in promoting the treaty of 1803, by which Louisiana was sold to the United States. He was strongly opposed to Napoleon, refusing to hold office under his government, but became president of the Paris chamber of commerce and of several charitable institutions. Besides numerous scientific and literary papers for the French institute, of which he was a member, he published "Sur le droit de marque des cuirs" (1804); "Sur la banque de France" (1806); and "Mémoires sur différents sujets" (1807). In 1814 he became secretary of the provisional government that prepared the return of Louis XVIII., but when Napoleon escaped from Elba in 1815 Du Pont de Nemours rejoined his sons in America. His last work was "Examen de Malthus et lettre à Say" (Philadelphia, 1817).—His son, **Victor Marie,** b. in Paris, France, 1 Oct., 1767; d. in Philadelphia, Pa., 30 Jan., 1827, entered the diplomatic service in 1787 as attaché of the French legation to the United States, where he remained for several years. In 1795, when M. Adet was minister, he had become first secretary of legation, and the same year was appointed French consul at Charleston, S. C. He was promoted to consul-general of France at New York in 1798; but the president refused him an *exequatur* on account of the grave difficulties that had arisen with the French republic. Returning to Europe, he left the government service and emigrated to the United States, arriving in Newport, R. I., 1 Jan., 1800, with his father and brother. In connection with the former he founded the business house of Du Pont de Nemours, fils et cie, of New York, which was very successful until ruined by heavy advances made to refit and provision the French squadron from Santo Domingo, payment of the drafts on the French treasury being refused by order of Napoleon, who saw a favorable opportunity of striking a political enemy. In 1806 Victor Du Pont went to Angelica, N. Y., and three years later joined his brother near Wilmington, Del., where he established a cloth manufactory, in which, later, he was assisted by his oldest son, Charles Irénée Du Pont. Victor Du Pont was a member of the Delaware legislature, and a director of the bank of the United States, and lived in Delaware till his death.—Another son, **Eleuthère**



Irénée, b. in Paris, France, 24 June, 1771; d. in Philadelphia, Pa., 31 Oct., 1834. His tastes turned early toward scientific pursuits, and his father's friend, Lavoisier, the eminent chemist, whom Turgot had made superintendent of the government powder-mills, offered to take him in charge and secure his reversion to that important post. This led to his going to the royal mills at Essonne to acquire a practical knowledge of the manufacture of gunpowder, where he remained until the French Revolution seemingly changed his whole career. He was summoned to Paris, 8 June, 1791, to take charge of the printing and publishing house that his father had established, and found himself conducting a great business almost alone. He was three times imprisoned, and was in the utmost peril after 10 Aug., 1792, when he and his father were at the Tuileries among the armed supporters of Louis XVI. When the Jacobins, beaten at the polls, called in Augereau's soldiers to overthrow the government, 5 Sept., 1797, his father was imprisoned, and the printing-house was sacked and destroyed. The family sailed for the United States in 1799. Some months after his arrival an accidental circumstance called Irénée du Pont's attention to the bad quality of the gunpowder made in this country, and gave him the first idea of erecting works for its manufacture. He went back to France in January, 1801, and revisited Essonne to procure plans and models, returning to the United States in August with some of the machinery. Thomas Jefferson was very anxious that the works should be built in Virginia; but there, as in Maryland, Irénée Du Pont was deterred by the institution of slavery and its effects upon the white race. In June, 1802, he bought a tract of land, with water-power, on the Brandywine river, near Wilmington, Del., arrived there with his family on 19 July, and set to work at once. After many disappointments and losses, his energy and courage surmounted every obstacle. His works, the largest of their kind in the country at the time of his sudden death from cholera, have been greatly increased under the management of his sons, Alfred Victor (1798–1856), Henry, and Alexis Irénée (1814–1857), and of his grandsons, Eleuthère Irénée (1829–1877), Lammot (1831–1884), Eugene, Francis Gurney, Henry Algernon, and William. Since 1850 the business has been under the direction of Henry Du Pont, second son of its founder, b. near Wilmington, Del., 8 Aug., 1812, a graduate of the U. S. military academy.—**Samuel Francis,** naval officer, son of Victor Marie Du Pont de Nemours, b. at Bergen Point, N. J., 27 Sept., 1803; d. in Philadelphia, Pa., 23 June, 1865. He was appointed a midshipman in the navy from the state of Delaware in December, 1815, his first sea service being on the "Franklin," in the European squadron. In 1821 he served for a year on the "Constitution," after which he was attached to the "Congress" in the West Indies and on the coast of Brazil. He was in the Mediterranean in 1824 on the "North Carolina," of which vessel he became sailing-master, four months of this cruise being spent on the "Porpoise," to which he was ordered soon after his promotion as lieutenant, 28 April, 1826. He was attached to the "Ontario" in 1829, made another three years' cruise in European waters, and from 1835 till 1838 was executive officer of the "Warren" and of the "Constellation," and commanded the "Grampus" and the "Warren" in the Gulf of Mexico. In the latter year he joined the "Ohio," the flag-ship of Com. Hull, in the Mediterranean squadron, his cruise ending in 1841. He was promoted commander in 1842, and sailed for China on the "Perry," but a severe illness forced him to give up his command and return home. In 1845 he was ordered to the Pacific as commander of the "Congress," the flag-ship of Com. Stockton. When they reached California the Mexican war had begun, and Du Pont was at once assigned to the command of the "Cyane," 23 July, 1846. With this vessel he captured San Diego, took possession of La Paz, the capital of Lower California, spiked the guns of San Blas, and entered the harbor of Guaymas, burning two gun-boats and cutting out a Mexican brig under a heavy fire. These operations cleared the Gulf of California of hostile ships, thirty of which were taken or destroyed. He took part in the capture of Mazatlan under Com. Shubrick, 11 Nov., 1847, leading the line of boats that entered the main harbor. On 15 Feb., 1848, he landed at San José with a naval force, and engaged a large body of Mexicans, marching three miles inland and successfully relieving Lieut. Heywood's detachment, which was closely besieged in the Mission-house and about to surrender. Later he led, or sent out, various expeditions into the interior, which co-operated with Col. Burton and Lieut. (afterward General) Henry W. Halleck, who were moving southward, clearing the country of hostile troops and taking many prisoners. He was ordered home in 1848, became captain in 1855, and two years later went on special service to China in command of the "Minnesota," witnessing while there the naval operations of the French and English forces, notably their capture of the Chinese forts on the Peiho. After visiting Japan, India, and Arabia, he returned to Boston in May, 1859. Placed in command of the Philadelphia navy-yard, 31 Dec., 1860, he took the most prompt and energetic measures, on his own responsibility, when communications were cut off with Washington, sending a naval force to the Chesapeake to protect the landing of troops at Annapolis. In June, 1861, he was made president of a board convened at Washington to elaborate a general plan of naval operations against the insurgent states. He was appointed flag-officer in September, and led the expedition that sailed from Norfolk in the following month, no American officer having ever commanded so large a fleet. On 7 Nov. he successfully attacked the fortifications defending Port Royal harbor, which were ably planned and skilfully executed. This engagement is justly regarded as one of the most brilliant achievements of naval tactics. His unarmored vessels, divided into main and flanking divisions, steamed into the harbor in two parallel columns. The flanking division, after engaging the smaller fort and driving back the enemy's ships, took position to enfilade the principal work, before which the main column, led by the flag-ship "Wabash," passed and repassed in an elliptic course, its tremendous fire inflicting heavy

damage. Du Pont actively followed up his victory. Tybee was seized, giving a base for the reduction of Fort Pulaski by the army; a combined naval and military force destroyed the batteries at Port Royal ferry; the sounds and inland waters of Georgia south of the Savannah, and of the eastern coast of Florida, were occupied; St. Mary's, Fernandina, Jacksonville, and other places were captured; Fort Clinch and the fort at St. Augustine were retaken, and fourteen blockading stations were established, all thoroughly effective save that off Charleston, where the vessels at command were insufficient to cover the circuit of twenty-three miles from Bull's Bay to Stono. In recognition of his services, Du Pont received the thanks of congress, and was appointed rear-admiral, to rank from 16 July, 1862. Toward the close of the year several armored vessels were added to his command, mostly of the monitor type, one of which destroyed the Confederate steamer "Nashville," under the guns of Fort McAllister. Being the first officer to whom the monitors had been assigned, he carefully tested their offensive powers by several attacks upon this work, on which they were unable to make any impression on account of the small number of their guns and the slowness of their fire. Assuming immediate command of his nine armored vessels, mounting thirty-two guns, Du Pont made a resolute attempt, on 7 April, 1863, to take Charleston. Unable to manœuvre in the tortuous channels, filled with obstructions, that led to the harbor, the ironclads were exposed to a terrible cross-fire from a hundred guns of the heaviest calibres, and, darkness approaching, the ships were wisely withdrawn, one sinking soon afterward and five others being disabled. This action was fought pursuant to express instructions from the navy department, its probable result not having been unforeseen by the admiral, who had given it as his opinion that the co-operation of troops was necessary to secure success. Time has fully confirmed the entire correctness of Du Pont's judgment; his able successor, with a larger force of armored ships, was no more fortunate, and Charleston only fell on the approach of Sherman's army. In June, the iron-clad ram "Atlanta" coming out of Savannah, Du Pont sent two monitors to intercept her, one of which, under Capt. John Rodgers, succeeded in capturing her after a brief engagement. This was the last important incident of Admiral Du Pont's command, from which he was relieved on 5 July, 1863. During the intervals of more than twenty-five years of service at sea he was almost constantly employed on duties of importance. He was a member of the board that prepared the plan of organization for the naval academy, and was one of the officers that in after years revised and extended the system then adopted. He served on the light-house board, took part in two revisions of the rules and regulations for the navy, and was a member of the naval retiring board of 1855. Admiral Du Pont was the author of various papers on professional subjects, including one on corporal punishment in the navy, and one on the use of floating batteries for coast defence, which has been republished, and is largely cited by Sir Howard Douglas in his work on naval gunnery.—**Henry Algernon,** soldier, son of Henry, b. near Wilmington, Del., 30 July, 1838, was graduated at the U. S. military academy, 6 May, 1861, at the head of his class, and promoted to 2d lieutenant of the engineer corps. On 14 May he was commissioned 1st lieutenant, 5th artillery, and became captain 24 March, 1864. He was acting assistant adjutant-general of the troops in New York harbor in 1862–'3, and commanded a battery in West Virginia from 1863 until 24 May, 1864, participating in the battle of Newmarket. As chief of artillery of that department from the latter date he commanded the artillery in engagements at Piedmont, Lexington, and Lynchburg during the spring and summer of 1864. Later in the year he took part in the battles of Cedar Creek, Halltown, Berryville, Opequan, and Fisher's Hill, in command of the artillery of Crook's corps, being brevetted major for gallant services in the two last-mentioned engagements, and lieutenant-colonel, 19 Oct., 1864, for services at Cedar Creek. After the war he was a member of the board to assimilate the tactics for the three arms of the service. Col. Du Pont resigned in March, 1875. Since 5 May, 1879, he has been president of the Wilmington and Northern railroad company.

DUPORTAIL, Louis Lebègue, Chevalier, soldier, b. in France; d. at sea in 1802. He was educated at the military school of Mézières, and considered an excellent engineer. He was one of four French officers engaged by Dr. Franklin and Silas Deane to serve in the American army (see articles Ducoudray and Deane), they being the only ones engaged by the express authority of congress. He was appointed colonel of engineers on his arrival, promoted to be brigadier-general, 17 Nov., 1777, and major-general, 16 Nov., 1781. He had charge of the engineering operations at the siege of Yorktown, and was one of the general officers particularly mentioned by Washington in his despatches after the capitulation. He returned to France, and in 1788 was named maréchal-de-camp. Owing to his intimate relations with Lafayette, whose political views he approved, he was, on 16 Nov., 1790, appointed minister of war; but, sharing in the misfortunes of his friend and patron, he was denounced in the assembly for maladministration of his office, and resigned, 3 Dec., 1791. He was then given a military appointment in Lorraine; but, being warned in 1792 that a serious accusation was about to be brought against him, left the army, and, after living two years in concealment, retired to America. He was recalled by the events of the 18th Brumaire, but died on the homeward passage. During his service in the American army the Chevalier Duportail was much impressed by the timidity and bad generalship of the British officers. In 1777 he wrote: "The success of the Americans is not owing to their strength or bravery, but to the astonishing conduct of the British forces, to the slowness and timidity of the British general." Referring to the battle of Brandywine, he writes: "If the English had followed up their advantage that day Washington's army would have been spoken of no more; since that time, also, Gen. Howe has, in all his operations, exhibited such slowness and timidity as to strike me with astonishment. With 30,000 men, an active, enterprising general must reduce this country."

DUPRATZ, Le Page, author, b. in Holland about 1695; d. in 1775. After entering the French army he saw service in Germany, and, having obtained an interest in the French western land company, sailed from La Rochelle in May, 1718, to take possession of the territory ceded to the association near New Orleans. After several unsuccessful attempts at colonization, he ascended the Mississippi in 1720 and settled among the Natchez Indians, by whom he was at first well received, but with whom he subsequently became involved in difficulties. These being arranged, he pushed into the interior, visited the region watered by the Missouri and Arkansas, and, after eight years' labor as a pioneer, returned to New Orleans to become treasurer

of the company, on the abolition of which office he sailed for France, where he landed, 25 June, 1734. His "History of Louisiana, or of the Western Parts of Virginia and Carolina" (Paris, 1758; London, 1763), is commended for its exactness, the author having paid especial attention to geology, mineralogy, and other natural sciences.

DUPUIS, Mathias, clergyman, b. in Picardy, France, early in the 17th century; d. in Orleans. He entered the Dominican order in 1641, and was sent as a missionary to Guadeloupe and other French possessions in America in 1644. He returned in 1650 and wrote "Relation de l'établissement d'une colonie française dans l'île de la Guadeloupe, et des moeurs sauvages" (Caen, 1652).

DUPUIS, Thomas R., Canadian educator, b. in Ernesttown, Ontario, 25 March, 1833. He was graduated at Queen's college, Kingston, as a physician in 1860. In 1864 he passed a summer in the Armory Square hospital, Washington, D. C., as assistant surgeon. He attended Harvard medical school in 1870, and studied diseases of the eye under Drs. Williams and Derby at the Boston eye infirmary. In 1871 he received the diploma of the Royal college of physicians and surgeons at Kingston, Ontario, and in 1881 that of the Royal college of surgeons in London, England. In 1868 Dr. Dupuis was appointed professor of botany in the Royal medical college of Kingston, which chair he vacated in 1873 to take that of anatomy, which he still holds (1887). He is also a lecturer on clinical surgery, to which chair he was appointed in 1880. He was elected to the council of Queen's university in 1877, re-elected in 1882, and still retains the office. Dr. Dupuis has travelled extensively through the United States, Canada, and Europe, and has written interesting descriptions of his travels.—His brother, **Nathan Fellowes,** b. in Portland, Ontario, in 1836, received his rudimentary education at a common school, and from his fourteenth till his eighteenth year worked at the business of clock and watch making. He then entered Queen's college, Kingston, where he was graduated with honors. In 1867 he was appointed professor of chemistry in Queen's college, and in 1880 was transferred to the chair of mathematics.

DUPUY, Eliza Ann, author, b. in Petersburg, Va., about 1814; d. in New Orleans in January, 1881. She was descended from Col. Dupuy, who led the band of Huguenot exiles to the banks of James river. At an early age she became a governess in Natchez, and while so employed wrote her first book, "The Conspirators," in which Aaron Burr is the principal character. Her other works include "The Huguenot Exiles"; "Emma Wattou, or Trials and Triumphs"; "Celeste"; "Florence, or the Fatal Vow"; "Separation"; "Concealed Treasure"; "Ashleigh"; and "The Country Neighborhood." She wrote in all about forty stories, most of them for the New York "Ledger."

DUQUESNE, Joseph Marie Lazare, Viscount, French naval officer, b. in Havana, Cuba, in 1804; d. in Mexico in 1854. He was a descendant of the famous Admiral Duquesne, studied at the naval college of Angoulême, France, was promoted 2d lieutenant in 1821, 1st lieutenant in 1831, and in 1837 commander of the brig "Le Laurier," in the fleet operating against Mexico. He distinguished himself during the bombardment of San Juan de Ulua in 1838, and contributed greatly toward the capture of the fortifications of Vera Cruz. He was promoted corvette captain in 1839, commodore in 1844 for bravery at Tanger and Mogador, and rear-admiral in 1853, and as such commanded the French fleet operating in the West Indies and the Gulf of Mexico. During a visit to the city of Mexico he died of yellow fever.

DUQUESNE DE MENNEVILLE, Marquis, governor of New France, b. in France early in the 18th century. He was a grand nephew of Abraham Duquesne, the great French mariner, early entered the royal marine service, and became a captain. In 1752 he was appointed governor of New France, having been recommended to the office by Gallissonière. He introduced great reforms into the colony, placed the colonial troops on a par with the European by constant drilling and study, erected forts in the far west, and resisted the encroachments of the English and colonial troops. Among the forts so erected was the one bearing his name on the present site of Pittsburg. It was during his administration that the assassination of Jumonville took place, and also the brilliant victory over the English at Coulon de Villiers in 1754. Duquesne solicited his recall, and departed for France in 1755.

DUQUET, Joseph, Canadian notary, b. in Châteauquay, Canada, in 1817; d. in Montreal in 1838. He began his studies in the college of Montreal, and finished them in the college of Chambly. He adopted the profession of notary, and became the partner of his uncle, M. Demaray, in the town of Saint-Jean. The latter, a member of the Canadian legislature, was arrested in 1837, along with several others. Duquet attempted a rescue, which failed, and then set out for Montreal, to put his friends on their guard, and to organize a force that would secure the release of the prisoners. When he arrived at Longueil, learning that his friends had been rescued and that he was himself in great danger from the pursuit of the government troops, he fled to the United States. He returned to Canada after a short stay, taking part in the fight at Moor's Corner, in which the Canadians were beaten. He escaped to the United States and remained at Swanton until Lord Durham's proclamation of amnesty, when he returned to his own country. When he learned that the Canadian exiles, who had taken refuge in the United States, were preparing to return to Canada under the command of Robert Nelson, he prepared to assist them. He was one of the most active organizers of the Chasseurs, a secret society, and went from parish to parish, preparing the people for the great rising of the 3d of November. On that date, in conjunction with Cardinal, he arrested all the principal tories of Laprairie, and set out at the head of a small force to take possession of Caughnawaga and deprive the Indian inhabitants of their arms. He was betrayed by those who were to aid him, arrested, and conducted to the prison of Montreal, where he was hanged.

DURÁN, Martin (doo-ran'), Mexican priest, b. near Santiago, Tlaltelolco, Mexico; d. there in 1584. He was of pure Indian blood, was educated in the Franciscan college established in his native town, and entered the religious order of the Dominican fathers, soon becoming one of the most celebrated pulpit orators of the time. In 1584 he had permission to preach in the Mexican language in the church of Santiago Tlaltelolco; and in his first sermon dared to denounce slavery and to support the doctrines of Bartolome de las Casas. Duran was arrested and warned by the church not to preach to the Indians these sermons against the established order of things. Father Francisco de los Rios was then commissioned by the archbishop to hear the succeeding sermons of Duran, and, after listening to one, accused the preacher, before the Inquisition, of propagating among the Indians heretical and

immoral ideas, and hatred to the Spaniards. Duran was seized by the Inquisition, and his property, which consisted only of books, was also seized. Among them were found two magnificent works, which had been overlooked by the inquisitors, and the authorities, hearing of the existence of similar works among the Indians, caused Duran to be subjected to the most cruel torments in order that he should reveal where he had obtained them; but their cruelty was met by the Indian friar with great courage, and he revealed nothing. The torment lasted for several days, and at last Duran was burned alive, on suspicion of being a heretic.

DURAND, Cyrus, engraver, b. in Jefferson village, N. J., 27 Feb., 1787; d. in Irvington, N. J., 18 Sept., 1868. He was descended from Huguenots who came to this country after the revocation of the edict of Nantes, and his father was a watch-maker. Cyrus received a common-school education in his native village, and was for a time occupied in the construction of machinery. In this he was eminently successful, and when, in consequence of the non-intercourse acts passed by England, factories sprang up everywhere, his services were in great demand. In 1814 he settled in Newark, N. J., where he worked as a silversmith, and in the autumn of that year volunteered as a drummer, and served for three months at Sandy Hook. A year later he was employed in the Taurino factory in Rahway, N. J., making machines for spinning and carding hair for the manufacture of carpets. His attention was then directed to bank-note engraving, and he made for Peter Maverick, of New York, a machine for ruling straight and wave-lines for bank-notes. During the next year he made two other machines, one for drawing water-lines, and the other for making plain ovals. These machines, of his own invention, may be regarded as the beginning of that series of geometrical lathes by which machine-work on bank-notes has been carried to a degree of excellence that rivals the rich effects of the burin and pencil. After this Durand devoted himself to bank-note engraving, and his inventions include many appliances, the principal of which, beside the geometrical lathe, are machines for engine-turning and transfer presses. He was a skilled workman of unusual ability, and was considered capable of working in twenty-two occupations.—His brother, **Asher Brown,** artist, b. in Jefferson, N. J., 21 Aug., 1796; d. in South Orange, 17 Sept., 1886, acquired in his father's workshop some knowledge of the elementary processes of engraving. At first he confined his attention to cutting initials on spoons and similar objects. His earliest attempts at engraving prints were made on plates rolled out of copper coins and with gravers of his own make. The success of these efforts led to a commission to copy a portrait on the lid of a snuff-box. In 1812 he was apprenticed to Peter Maverick, an engraver in New York city, and five years later he was admitted into partnership with his master. His first original work was a "Beggar," after a painting by Samuel Waldo, and when John Trumbull painted the "Declaration of Independence," Charles Heath, of London, was to have engraved it, but, business complications having arisen, the picture was given to Durand. He worked steadily at it for three years, and the best-known engraving in the United States was the result. His reputation was at once established and his work grew in demand. "Musidora," engraved in 1825, and "General Jackson," in 1828, are prominent plates of this period. Mr. Durand contributed extensively to the "annuals," which were then fashionable, and some of his best work appears in these, including "The Wife," by S. F. B. Morse, "A Gypsying Party," after Charles R. Leslie, and the "White Plume," by Charles C. Ingham. Many of the heads engraved for the "National Portrait Gallery" were executed by him, and "Ariadne," after John Vanderlyn's painting, was his work. Mr. Durand, who was an admirable draughtsman and possessed an instinctive sense of color, became dissatisfied with the limits of engraving, and aspired for a wider field of art. He studied nature diligently, and became most proficient in landscape painting, which from 1836 became his chosen occupation. Prof. Robert W. Weir speaks of him as one of "the fathers of American landscape." A few portraits are among his earlier productions in oil, such as heads of Andrew Jackson, John Quincy Adams, James Madison, and Edward Everett, while those of William Cullen Bryant, James Kent, and Gouverneur Kemble are among his latest works in this line; and he also executed several figure-paintings, among which are "Harvey Birch and Washington," "The Capture of André," "The Dance on the Battery," "The Wrath of Peter Stuyvesant," and "God's Judgment on Gog." His landscapes include "The Catskills from Hillsdale," "The Franconia Mountains," "The Rainbow," "Sunday Morning," "Primeval Forest," "Franconia Notch," and several views of Lake George. His largest canvas, "A Mountain Forest" (1869), now hangs in the Corcoran gallery, Washington. Of his recent works, "Studies from Nature," "Il Pappagallo," and "Kauterskill Clove," were sent to the Philadelphia exhibition in 1876. He was one of the founders of the National academy of design in 1826, and after the resignation of Samuel F. B. Morse, in 1845, was its president till 1861.—His son, **John,** art critic, b. in New York city, 6 May, 1822, edited for several years a monthly publication called "The Crayon," devoted especially to the interests of the fine arts. He has also translated several of Taine's works, including "Ideal in Art" (New York, 1868); "Italy, Rome, and Naples" (1868); "Italy, Florence, and Venice" (1869); "Philosophy of Art; Art in the Netherlands" (1870); and "Art in Greece" (1871).

DURAND, Elias, botanist, b. in Mentz, France (now Germany), 25 Jan., 1794; d. in Philadelphia, Pa., 15 Aug., 1873. He studied medicine in Paris, and on his graduation joined the medical corps of Napoleon's army. Dr. Durand was present at the battles of Lutzen, Bautzen, Hanau, Katzbach, and Leipzig, but after the downfall of the emperor he left France and came to the United States. He settled at first in Baltimore and then in Philadelphia, where he established a drug-store which became the resort of many of the most eminent physicians of the day. He also devoted himself to botany, and became thoroughly familiar with the flora of North America, collecting an herbarium that included ten thousand species of North American plants. This, the work of nearly forty years, he presented to the museum of the Jardin des

plantes in Paris in 1868. A separate gallery has been devoted to the collection in that institution, and it was called "Herbaria Durandi" after the donor. Dr. Durand was a contributor to scientific journals, and a member of scientific societies in the United States and Europe.

DURAND, Marie, singer, b. in Charleston, S. C., about 1850. She was educated in New York, studying music with Signor Achille Errani, and made her first appearance in Chicago as Zerlina in "Don Giovanni." After continuing her musical studies for some years, she appeared at the imperial opera in St. Petersburg, and then sang in French opera in Brussels. Returning to the United States, she was seen in New Orleans, but went to Italy and sang at Milan and elsewhere. She was induced to leave light soprano parts and devote herself to those great dramatic representations in which she has since achieved distinction, such as Selika in "L'Africaine." Later she became known for her brilliant performances in "Les Huguenots," "Norma," "Robert le Diable," and "Roi de Lahore." In 1883 she made her first appearance at the royal Italian opera in London, in the rôle of La Gioconde, of which she was the first exponent outside of Italy. She was then engaged for the entire opera season in St. Petersburg, but in April, 1884, returned to London to sing in Covent Garden.

DURANG, Charles, dancer, b. in Philadelphia in 1796; d. there, 15 Feb., 1870. He made his first appearance in the Chestnut street theatre in 1803, and subsequently performed in almost every theatre in the United States. Mr. Durang was actor, author, stage-manager, prompter, ballet-master, and finally opened a dancing academy. He was the author of a "History of the Philadelphia Stage from 1752 to 1854," which appeared serially in the Philadelphia "Journal."

DURANQUET, Hyacinth, Jesuit, b. in Clermont, Auvergne, in 1809. He studied theology in the colleges of the society in France, became a Jesuit in 1836, and in the same year embarked for the United States, landing at New Orleans in 1837. For the next ten years he taught in the college of Grand Coteau. He came to New York in 1847 and taught for the next five years in St. John's college, Fordham. Since 1858 he has been chaplain of the Tombs prison and the institutions on Blackwell's Island, and was the first Roman Catholic missionary appointed to that office. His success in persuading criminals condemned to death to repent has been noteworthy. He has written many articles on missionary life for the French magazines, and has published in the "Messenger of the Sacred Heart" a series of papers embodying his reminiscences of New York prisons. He is now engaged (1877) on a volume of the same character.

DURANT, Charles S., aeronaut, b. about 1805; d. in Jersey City, 2 March, 1873. He made a balloon ascension in 1833 from the Battery in New York, which was one of the first ever made by a native American. Subsequently he made fourteen others, on one occasion descending into the Atlantic ocean. Mr. Durant was the author of several books of a scientific character, one of which was a "Treatise on Shells and Sea-Weeds."

DURANT, Henry Towle, philanthropist, b. in Hanover, N. H., 20 Feb., 1822; d. in Wellesley, Mass., 3 Oct., 1881. His name was originally Henry Welles Smith. He was graduated at Harvard in 1841, and subsequently studied law with Gen. Butler. In 1846, having been admitted to the bar, he entered on the practice of his profession in Boston, and soon became prominent. After changing his name to Durant he was associated with Rufus Choate and other noted lawyers of the time, and was very successful with cases committed to his care. Meanwhile he became connected with John H. Cheever in the formation of the New York belting and packing company, and also in the purchase of iron-mines in northern New York, both of which enterprises proved exceedingly profitable. In 1863 his only son died, and during the boy's illness he determined thenceforth to consecrate his life to the cause of the Christian religion. Finding that "the law and the gospel were diametrically opposed," he disposed of his law business, although it was exceedingly profitable. He made New York city his residence for some time, and became impressed with the necessity of providing a college where

women could obtain a superior education. His plans were put into execution and Wellesley college resulted. This institution, built and equipped at an expense of $1,000,000, was opened in September, 1875, and has since been maintained at an expense of $50,000 per annum, furnished through the liberality of Mr. Durant. The college buildings are beautifully situated in the midst of a park of 300 acres in Wellesley, about fifteen miles west of Boston. While undenominational, the institution is distinctively and positively Christian. After 1864 he became a lay preacher, and held a great number of meetings, not only in Boston and its neighborhood, but in many towns of Massachusetts and New Hampshire. Failing health led to his discontinuing public exhortation, but his interest in Christian enterprises continued throughout his life. He left a large property at his death, and the work of the college is continued by his widow.

DURANT, Thomas Jefferson, lawyer, b. in Philadelphia, Pa., 8 Aug., 1817; d. in Washington, D. C., 4 Feb., 1882. He removed to New Orleans at the age of seventeen, and was appointed a clerk in the post-office there. After studying law he was admitted to the bar and became prominent in his profession. He was elected state senator, afterward appointed U. S. district attorney for Louisiana, and then became attorney-general of the state. He was a Union man during the civil war and a recognized leader of those who supported the national government. When New Orleans was captured by Farragut in 1862 the office of governor was tendered to Mr. Durant, but he declined it on the ground that he could not be governor and at the same time be subordinate to military authority. In 1865 he left New Orleans and settled in Washington, where he soon took high rank as a lawyer. He practised before the supreme court, and at the time of his death was counsel for the United States before the Spanish and American claims commission.

DURAO, Jose da Santa-Ritta, Brazilian poet, b. in Infeccionnado, a parish of Marianna, province of Minas-Geraes, Brazil; d. in Lisbon, Portugal,

in 1783. He studied in the University of Coimbra, Portugal, where he was made doctor of laws, and obtained great distinction as a scholar. He afterward entered the order of the Friars of St. Augustin, and at once became celebrated as a preacher. His opinions in favor of the Jesuits excited the enmity of the Marquis of Pombal, the minister of Joseph I., of Portugal, who had been his protector. When the Jesuits were expelled, Durao thought himself in danger, and fled to Andalusia in 1762. Hostilities, however, had begun the same year between Portugal and Spain, and he was imprisoned as a Portuguese spy till the signing of the treaty of Paris, 10 Feb., 1763, when he left Spain for Italy. He took up his residence in Rome, where he enjoyed the acquaintance of Alfieri, Cesarotti, and the noted literary men of the period. Here he began to write the poem on which his fame principally rests, "Caramuru, or the Discovery of Bahia," which was completed and published in 1781. In 1771 he returned to Lisbon, and from that time till his death was professor of theology in the University of Coimbra. In addition to his poem of "Caramuru" he wrote many other works in prose and poetry, but the only one of them read to-day in Portugal and Brazil is the "Caramuru," and its popularity is constantly increasing. The hero is the Portuguese navigator Diogo Alvares, who was shipwrecked on the coast of Brazil in 1508 or 1509, and who was called by the natives "Caramuru," or "man of fire," from the guns of his followers. In his pictures of Indian manners and customs, and in his descriptions of the splendid scenery of Brazil, Durao is considered to have equalled Fenimore Cooper, the novelist. Durao was little known beyond Brazil and Portugal before 1823, when a French translation of the "Caramuru" was published by De Monglave.

DURBIN, Elisha J., missionary, b. in Madison county, Ky., in 1800. At the age of sixteen he entered the Roman Catholic seminary of St. Thomas, Ky., and was ordained priest in 1822, afterward becoming professor in St. Joseph's college, Bardstown, and assistant at the cathedral there. In 1824 he was intrusted with the pastoral care of the entire Roman Catholic population of western and southwestern Kentucky, with headquarters in Morganfield, Union co. After 1832 he was also obliged to visit Nashville several times a year. During fifty years of his missionary labors his horseback journeys averaged 200 miles a week. Father Durbin himself estimates that during sixty-two years he has travelled over 500,000 miles. Within two years after his nomination to the mission of southwestern Kentucky he built the Church of the Sacred Heart, then the only Roman Catholic church west of Breckinridge county and east of the Mississippi, and the Church of St. Ambrose in Union county. He erected the Church of St. Gerome in Graves county in 1836, that of the Sacred Heart, Morganfield, in 1855, and St. Agnes's church, Uniontown, in 1860, of which he was appointed pastor. In 1873 he was relieved of his pastoral duties in Union county, but insisted on being allotted active work, and was given charge of the Roman Catholics living along the Elizabethtown and Paducah railroad. Here he remained till 1883, when he was persuaded to spend the remainder of his life in St. Joseph's seminary, Bardstown. In 1885 he petitioned his bishop to be restored to active duty, and was assigned to pastoral work.

DURBIN, John Price, clergyman, b. in Bourbon county, Ky., in 1800; d. in New York city, 17 Oct., 1876. At the age of fourteen he was apprenticed to a cabinet-maker, and in 1819 entered the itinerant ministry of the Methodist Episcopal church. He studied at Miami university while preaching at Hamilton, Ohio, was graduated at Cincinnati college in 1825, and soon afterward was appointed professor of languages in Augusta college, Kentucky. He was elected chaplain of the U. S. senate in 1831, and in 1832 was chosen professor of natural science in the Wesleyan university, and became editor of the "Christian Advocate and Journal," New York, in 1833. In 1834 he was elected president of Dickinson college, Carlisle, Pa., and during his incumbency made an extensive tour in Europe and the east. As member of the general conference of 1844 he was a prominent actor in the great contest on slavery which divided the church. After retiring from his office in 1845 he was pastor of churches in Philadelphia, and was also presiding elder of the Philadelphia district. He was secretary of the missionary society from 1850 to 1872, when he retired in consequence of physical infirmity. To his labors was largely due the establishment of missions in India, Bulgaria, western and northern Europe, and many parts of the United States, and the reinvigoration of those in China and elsewhere, while through his plans the annual contributions were increased from $100,000 to $600,000. In 1867 he visited Europe in the interest of missions. He was distinguished for his eloquence and administrative ability. Beside numerous contributions to periodical literature, Dr. Durbin published "Observations in Europe, principally in France and Great Britain" (2 vols., New York, 1844), and "Observations in Egypt, Palestine, Syria, and Asia Minor" (2 vols., 1845), and edited, with notes, Wood's "Mosaic History of the Creation" (1831).

DUREAU DE LA MALLE, Jean Baptiste Joseph René, French scholar, b. in Santo Domingo, 21 Nov., 1742; d. in Landres, France, 19 Sept., 1807. He became an orphan in infancy, and was sent to France when five years old. In 1749 he entered the college of Plessis, where he distinguished himself for scholarship. Afterward, his parents having left him a competence, he devoted himself to literature. His thorough knowledge of the principal European languages and his fondness for comparative philology led him to the study of the classics later in life. His house in Paris became the resort of the most distinguished literary men in France, and he was intimate with La Harpe, D'Alembert, Marmontel, and Delille. Dureau was named a member of the corps legislative in 1802, and of the institute in 1804. He published "Traité des Bienfaits," a translation from Seneca (1776), and a translation of the works of Tacitus, which was at once recognized as superior to all previous French translations of that author (3 vols., 1790). After his death appeared his translations of Sallust (1808), Livy (1810), and Valerius Flaccus (1812).

DURELL, Edward Henry, jurist, b. in Portsmouth, N. H., 14 July, 1810; d. in Schoharie, N. Y., 29 March, 1887. His father was chief justice of the state, and U. S. district attorney during the first Jackson administration. After studying at Phillips Exeter academy, the son was graduated at Harvard in 1831, and studied law there and with his father. He also became familiar with the French, Spanish, Italian, and German languages. In the autumn of 1834 he settled in Pittsburg, Miss., which he re-named Grenada, and removed to New Orleans in 1836, where he resumed the practice of his profession. Mr. Durell drafted a statute in 1843 that made a change in the law of the descent of property in Louisiana, thereby removing the

source of many family feuds. In 1854–'6 he was a member of the common council of New Orleans, and as chairman of its finance committee was the author of several important measures. By sinking an artesian well in Canal street, Mr. Durell proved correct the opinion of Sir Charles Lyell, that New Orleans rests on the bed of the sea. He strenuously opposed the adoption of the secession ordinance in Louisiana, left the Democratic party on that issue, and for some time afterward he lived in retirement. After the capture of New Orleans by Farragut, Mr. Durell was called upon to construct a new municipal government, and drafted the so-called bureau system, which remained in force from July, 1862, till some years after the war. He was president of the city's bureau of finances in 1862–'4, and mayor of New Orleans during part of 1863, administering the office with great credit. In 1863 he was appointed by President Lincoln U. S. judge for the eastern district of Louisiana, and presided over the entire state after the abolition of the western district in 1866. Judge Durell was president of the State constitutional convention of 1864, and in 1865 declined the office of justice of the U. S. supreme court, tendered him by Mr. Lincoln. In 1867, by a personal visit to Washington, he brought about a discontinuance of legal procedure in Louisiana under the confiscation laws, and in the same year declined the Austrian mission. In 1868 he was mentioned as a candidate for vice-president. He resigned from the bench in 1874, and from 1875 till his death resided chiefly in Schoharie, N. Y., engaged in literary pursuits. He contributed much to periodical literature, and published "Sketches" under the pen-name of "H. Didimus" (New York, 1840). He left in manuscript a translation, made in 1840, of P. C. Roux's "Essay on the History of France, and the Immediate Causes of the Revolution of 1789," and a volume of notes to the same; and had in preparation a "History of Seventeen Years: from 1860 to the Retiring of the Federal Arms from Louisiana and South Carolina."

E H Durell

DURFEE, Bradford Matthew Chaloner, merchant, b. in Fall River, Mass., 15 June, 1843; d. there, 13 Sept., 1872. His father died shortly after the boy's birth, leaving him a large fortune. He entered Yale, but failing health compelled him to leave college during his sophomore year, and he visited Europe in 1865, spending two and a half years in travel. On his return he assumed the management of his affairs, but his health compelled him to be largely on the sea, and he became an ardent yachtsman. For several years he made long cruises on his yacht "Josephine," visiting various countries on the Atlantic ocean. Durfee hall, one of the finest college dormitories in the United States, was his gift to Yale, which honored him with the degree of A. M. in 1871.

DURFEE, Job, jurist, b. in Tiverton, R. I., 20 Sept., 1790; d. there, 26 July, 1847. He was graduated at Brown in 1813, and then, after studying law, admitted to practice. In 1814 he was elected a member of the state legislature, serving continuously until 1819, and again from 1827 till 1829, becoming speaker in 1828. He was elected as a federalist to congress, and served from 3 Dec., 1821, till 3 March, 1825. At the close of his congressional career he declined a renomination, and retired to his farm, where he devoted his attention to literature. Later he resumed his legal practice, and in 1833 was appointed associate, becoming, two years later, chief justice of the supreme court of his state, which office he held with honor to himself during Dorr's rebellion and till his death. Judge Durfee wrote poetry, and published "What Cheer? or Roger Williams in Exile" (1832; republished in England); also an abstruse philosophical treatise entitled "Panidea." See "Complete Works of Job Duffee, with a Memoir of his Life," edited by his son (Providence, 1849).

DURFEE, William Franklin, engineer, b. in New Bedford, Mass., 15 Nov., 1833, received a practical mechanical training at home, and took a course of special study at the Lawrence scientific school of Harvard. In 1853 he became an engineer and architect in his native town, and for five years held the appointment of city surveyor. He was chosen as one of the representatives of New Bedford in the legislature of 1861, and, as secretary of its military committee, was active in forwarding legislation for the equipment of troops at the beginning of the civil war. While holding office he introduced a resolution requesting congress to repeal "all laws which deprive any class of loyal subjects of the government from bearing arms for the common defence." This is believed to have been the first definite proposal for the arming of colored troops. Subsequent to the adjournment of the legislature he devoted himself to his profession, and designed a gun for naval use. A government commission reported that it was the best of its kind that had ever been brought to its notice. Every essential feature of this weapon anticipated that of the "Destroyer" of John Ericsson; but the government was slow to adopt new weapons, and all efforts to introduce it were abandoned by Mr. Durfee. In June, 1862, he was invited to ascertain if the iron ores of the Lake Superior region were suitable for the manufacture of steel by a method invented by William Kelley, and he erected experimental works where ingots of steel were produced from which were rolled, on 25 May, 1865, the first steel rails ever made in the United States. Mr. Durfee became convinced early in his study of the Bessemer process that an exact knowledge of the chemical composition of the crude materials was necessary, and for this purpose equipped, at Wyandotte, Mich., the first analytical laboratory built as an adjunct to steel-works in the United States. Since that time he has had the management of various works, and has successfully introduced the Siemens's regenerative furnace in several places. During 1876 he was one of the group of judges at the Centennial exhibition in Philadelphia, having under its supervision the examination of machine tools for wood, iron, and stone working. For his services he received a medal. Afterward he built, at Ansonia, Conn., the first successful furnaces for refining copper by the use of gaseous fuel ever constructed in the United States. Of his recent work, the most conspicuous undertaking was the removal of a brick chimney, eight feet square at the base and 100 feet high, weighing 170 tons, from its original foundation, and successfully placing the same upon a new one some thirty feet distant. In 1886 he accepted the general management of the U. S. mitis company, owners of important patents for the production of wrought-iron and

steel castings. Mr. Durfee is a member of numerous scientific bodies, to whose proceedings he has contributed papers of technical interest.

DURFEE, Zoheth Shearman, manufacturer, b. in Fall River, Mass., 22 April, 1831; d. in Providence, R. I., 8 June, 1880. He was graduated at the New Bedford high school, and finished at the Friends' academy in that city. On the completion of his studies he learned the blacksmith's trade, after which he was associated with his father and uncle in the same business. In 1858 he was requested by a number of New Bedford capitalists to report on a new process for the making of steel direct from pig-iron, invented by Joseph Dixon. This led to a careful study of the entire subject of the manufacture of steel, and especially of the Bessemer process, then recently invented in England. He discovered that a patent substantially the same as Henry Bessemer's, but claiming priority over it, had been granted in the United States to William Kelly. After satisfying himself of the validity of this patent, he obtained control of it, and visited England for the purpose of buying Bessemer's rights in the United States, but failed. Meanwhile he accumulated much information relative to the practical details of the manufacture of steel, and became convinced that the invention of Robert Mushet was an essential feature in both processes. On his return to the United States he organized a company of prominent ironmakers for protecting and introducing into practical use the Kelly patent. In 1863 he again visited England, secured the control of the Mushet patent for the United States, and subsequently experimental steel-works were erected by the Kelly-process company in Wyandotte, Mich., where the ingots from which the first steel rails ever made in the United States were produced. During the following year Mr. Durfee, after a course of experiments, indicated the desirability of melting the charge in the cupola instead of in the reverberatory furnace. That feature prevails exclusively to-day and demonstrates the correctness of Mr. Durfee's views. In 1866 the conflicting interests of the rival patentees were united in the Pneumatic steel association, of which he became secretary and treasurer, holding that office till his death. Later he was called to superintend the steel-works in Troy, N. Y., but relinquished that appointment in 1868 and returned to New York, henceforth devoting his exclusive attention to the steel association, whose business he managed until a short time before his death. He patented various improvements in machinery for the manufacture of iron and steel, and made the first movement and probably did more than any other single person toward introducing cheapened steel into the United States.

DURHAM, John George Lambton, Earl of, English statesman, b. in Lambton castle, county Durham, 12 April, 1792; d. in Cowes, Isle of Wight, 28 July, 1840. He was educated at Eton and Cambridge, served a short time in a regiment of hussars, and in 1813 was returned to parliament, where he distinguished himself by his liberal views. During the reform excitement of 1819 he advocated the popular cause, both in parliament and at public meetings. He was one of the defenders of Queen Caroline, and in 1821 brought forward a scheme of parliamentary reform which, though at that time unsuccessful, was embodied in the reform act of ten years later. In 1828 he was raised to the peerage as Baron Durham; in 1830 he was lord privy seal in Earl Grey's ministry, and in 1833, on his retirement from the cabinet, was made an earl. In 1836–'7 he became ambassador to Russia, and in 1838 was sent, with extraordinary powers, to Canada, as governor-general. When he arrived there he found the disturbed state of public feeling, consequent upon the rebellion of 1837, still in existence, the constitution practically suspended, and the efficient administration of the law no longer possible. In order to remedy these evils he issued different ordinances which declared, among other things, an amnesty to all the rebels, save their leaders, who were declared banished to Bermuda. His administration of the duties of his office failed to give satisfaction, either in Canada or Great Britain, and he was in consequence recalled in December, 1839. Soon after his return to England an elaborate report by him on Canadian affairs was published. In it he proposed the scheme of the union of the British North American provinces for legislative purposes, and insisted upon the fullest constitutional freedom for the people. It is supposed that the disgrace of his recall preyed upon his mind and hastened his death.

DURHAM, Milton Jamison, lawyer, b. in Mercer county, Ky., 16 May, 1824. He was graduated at Asbury university in 1844, after which he studied law with Joshua F. Bell and was graduated at the Louisville law-school in 1850. For several years he followed his profession with great success, and in 1861–'2 was one of the circuit judges of Kentucky. He then returned to his law practice in Danville, which he continued till 1873, when he was elected as a Democrat to congress, serving from 1 Dec., 1873, till 3 March, 1879. Mr. Durham resumed his profession, but in March, 1885, was appointed first comptroller of the national treasury, an office which he now holds.

DURIER, Anthony, R. C. bishop, b. in Rouen, France, in 1833. He was preparing himself for the priesthood in the seminary of Lyons when, in response to an appeal from Archbishop Blanc, of New Orleans, he volunteered for the mission of Louisiana. He arrived in the United States in 1855, and was sent to the College of Mount St. Mary's of the West, where he completed his theological course and studied English. He was ordained in 1856, and stationed at Chillicothe, Ohio. In 1857 he was appointed assistant pastor of the cathedral of New Orleans, and afterward became pastor of the Church of the Annunciation in the same city. In 1885 he was consecrated bishop of Natchitoches.

DURIVAGE, Francis Alexander, author, b. in Boston, Mass., in 1814; d. in 1881. He was a contributor of poems, humorous articles, short stories, and sketches to the magazines, under the pen-name of "Old Un." In connection with W. S. Chase he translated Lamartine's "History of the Revolution of 1848." At a later date he issued, with George P. Burnham, who wrote under the pseudonym of "Young Un," "Stray Subjects arrested and bound over, being the Fugitive Offspring of the Old Un and the Young Un that have been lying around loose, and are now tied up for Fast Keeping" (Boston, 1848). He was the author of several plays, and was for a time co-editor of "Ballou's Pictorial." In addition to the works previously mentioned, he published a "Cyclopædia of History" (Hartford, 1836), and "Life Scenes from the World around Us" (Boston, 1853).

DURKEE, Charles, senator, b. in Royalton, Vt., 5 Dec., 1807; d. in Omaha, Neb., 14 Jan., 1870. He was educated in his native town and in the Burlington academy, after which he engaged in business, and later emigrated to the territory of Wisconsin, where he was one of the founders of Southport, now Kenosha. He was a member of

the first territorial legislature of Wisconsin, held in Burlington (Iowa and Minnesota being then parts of the territory). In 1847 he was again a member of the territorial legislature, and in 1848 was elected to the first state legislature of Wisconsin. He was elected as a Free-soiler to congress, serving from 6 Dec., 1849, till 3 March, 1853, and was the first distinctive anti-slavery man in congress from the northwest. In 1855 he was chosen as a Republican to be U. S. senator from Wisconsin, succeeding Isaac P. Walker. He was a member of the peace congress in 1861, and was appointed governor of Utah in 1865, holding that office until failing health compelled him to resign.

DURKEE, John, soldier, b. in Windham, Conn., in 1728; d. in Norwich, 29 May, 1782. He served in the French and Indian war, becoming a major of militia, and, from the name of the place of his birth, was known as the "bold bean-hiller." In 1766, at the time of the passage of the stamp-act, the county of New London appointed him to correspond with the Sons of Liberty in the adjoining provinces. He was among those who settled in Wyoming valley under the name of the Susquehanna company in 1769, and was the leader of the Connecticut forces, commanding the fort that bore his name. Subsequently he was captured by the force sent out by Gov. John Penn, and taken to Philadelphia, where for a time he was closely confined. In 1770 he was released, and again took command, but afterward returned to Connecticut. At the beginning of the Revolutionary war he raised "one hundred choice men," who were annexed to Putnam's brigade, of which he was major. He distinguished himself at Bunker Hill, and commanded a regiment in the battles of Long Island, Germantown, Harlem, White Plains, Trenton, and Monmouth, and was in Gen. John Sullivan's expedition against the Six Nations in 1779. A year later he resigned from the army.

DUROCHER, Laurent, lawyer, b. in the Mission of St. Genevieve, Mo., in 1786; d. in Monroe, Mich., 21 Sept., 1861. His father was a French-Canadian. Laurent was educated in Montreal, and settled at Frenchtown, on the river Raisin, in 1805. At the beginning of the war of 1812 he joined Gen. Hull's army, and rendered important services to the government after his surrender. He was clerk of Monroe county from its organization in 1818 till about 1838, for six years was in the territorial council, and in 1835 a member of the convention that framed the first constitution of Michigan. He also served in the state legislature, and was justice of the peace and probate judge at Monroe. He was the great legal authority among the French population on the river Raisin.

DURRETT, Reuben Thomas, lawyer, b. in Henry county, Ky., 24 Jan., 1824. After studying at Georgetown college, Ky., he was graduated at Brown in 1849, and at the law department of the University of Louisville in 1850, and practised his profession in Louisville until 1880. From 1857 till 1859 he was editor and half owner of the Louisville "Courier." He was the founder of the public library of Kentucky, of the Louisville Abstract and loan association, and of the Filson club of Louisville, and has collected one of the most complete and valuable private libraries in the southwest. He is president of the associations that he has formed, and a member of various historical societies, and has travelled extensively. He is the author of "The Life and Writings of John Filson, the First Historian of Kentucky" (published by the Filson club, 1884), and has assisted in the preparation of many historical works, and contributed to various periodicals. A series of articles on the "Kentucky Resolutions of 1798–'9" appeared in the "Southern Bivouac" in 1886. Many of his arguments and addresses, both legal and literary, have been published.

DURRIE, Daniel Steele, antiquarian, b. in Albany, N. Y., 2 Jan., 1819. He was educated in the schools of that city, and in South Hadley, Mass. He became a bookseller at Albany in 1843, removed to the west in 1850, resumed that business at Madison, Wis., in 1852, and followed it till 1857. In 1858 he became librarian of the State historical society of Wisconsin. He has been superintendent of public schools at Roxbury, and secretary of the Madison board of education. Among his publications are genealogical histories of the Steele and Holt families (Albany, 1862 and 1864); "Bibliographica Genealogica Americana, or Index to American Pedigrees" (3d ed., 1886); "History of Madison, Wis., and the Four-Lake Country" (Madison, 1874); with W. B. Davis, "History of Missouri" (St. Louis, 1875); and "Wisconsin Biographical Dictionary."

DURTHALER, Joseph, clergyman, b. in Ste. Marie-au-Migne, Alsace, in 1819; d. in New York in 1885. He was educated at the Lyceum of Strasbourg, and took his degree at the University of France. He studied theology in the Seminary of Strasbourg, and became a Jesuit in 1844. He was then employed in teaching, and was noted for the number of artistic and literary celebrities that had been his pupils. During the Revolution of 1848 he came to the United States, at his own request was sent on the Indian mission, and in 1850 arrived at Walpole island. Here he was stricken with typhoid fever, and on his recovery was sent to teach in St. Mary's college, Montreal. He was next transferred to St. Francis Xavier's college, New York, of which he may be considered the founder. He built the new college, made it legally a collegiate institution, extended the course of science, strengthened its classical curriculum, and began its fine mineralogical, botanical, and conchological collections. In 1863 he resigned the presidency of St. Francis Xavier's and went to Buffalo, where he built a large church for the Germans, and founded the classical school that was afterward developed into Canisius's college. In 1871 he returned to St. Francis Xavier's college, but after a short stay went to Hoboken, where he organized a German parish. In 1875 he was named rector of St. Joseph's church, New York, and during the succeeding ten years built a church and school-houses, and founded a convent and school of the Sisters of Notre Dame.

DURYÉE, Abram, soldier, b. in New York city, 29 April, 1815. He is of Huguenot descent, and his grandfather served in the Revolutionary war, being at one time a prisoner in the old sugar-house on Liberty street. His father and two of his uncles served as officers in the war of 1812. Young Duryee was graduated at the Crosby street high school, and trained to mercantile life, accumulating a fortune as a mahogany merchant in New York. He entered the New York state militia in 1833, and served in the 142d regiment. Five years later he joined the 27th regiment (now the 7th) as a private, and rose gradually until he became its colonel in 1849, holding that office for fourteen years. During the Astor place riots he commanded his regiment and was twice wounded, and he also participated in the subsequent police, city hall, sixth ward, and "dead-rabbit" riots with the 7th. In April, 1861, he raised in less than a week the 5th New York volunteers, a regiment best known as "Duryee's zouaves." His command was engaged at Big Bethel, the first battle of the

war, and after the fight he was made acting brigadier-general, superseding Gen. E. W. Pierce. In August, 1861, he received his commission as brigadier-general and was given command of a brigade in Gen. James B. Ricketts's division. He participated in the battles of Cedar Mountain, Thoroughfare Gap, second Bull Run, and Chantilly, and with the Army of the Potomac was at South Mountain and Antietam, where he commanded Gen. Ricketts's division when the latter succeeded Gen. Hooker as corps commander. He then obtained a short leave of absence, and on his return to the army found that his brigade had been given to an inferior in rank. His claims for the old position were ignored, and in consequence he resigned in January, 1863. At the close of the war he received the brevet of major-general. Subsequently he was elected colonel of the 71st regiment, and brigadier-general of the 4th New York brigade, but both of these honors he declined. Besides his own regiment, the 165th (2d Duryee zouaves) and the 4th regiments in the national guard bore his name. In 1873 he was appointed police commissioner in New York city, which office he held for many years. At the time of the communistic gathering in Tompkins square during January, 1874, with a small force of police he attacked the crowd, captured their banners, and drove them from the square.

DURYEE, William Rankin, clergyman, b. in Newark, N. J., 10 April, 1838. He was graduated at Rutgers in 1856, and at the New Brunswick seminary in 1861, and ordained in Bergen, N. J., in 1862. In 1862–'3 he was a chaplain in the army, and after a brief pastorate at East Williamsburg became in 1864 pastor of the Reformed church at Lafayette, Jersey City, N. J. He has published a premium tract for soldiers, entitled "Sentinels for the Soul" (New York, 1862); "Our Mission Work Abroad," "Centennial Discourses of the Reformed Church" (1876); and critical essays and poems in religious journals. His song of "The Kingdom of Home" was awarded a prize.

DUSSANCE, Henry, chemist, b. in France; d. in New Lebanon, N. Y., 20 June, 1869. He studied chemistry under Chevreul in Paris, and held important scientific posts under the government of France. About 1863 he came to the United States, and subsequently acted as chemist to various firms, being at the time of his death in charge of the laboratory of a manufacturing chemist in New Lebanon. He translated, edited, and prepared numerous technical works for the press, including "Treatise on the Coloring Matters derived from Coal Tar" (Philadelphia, 1863); "Blues and Carmines of Indigo" (1863); "A Complete Treatise on the Art of dyeing Cotton and Wool" (1863); "A Complete Treatise on Perfumery" (1864); "A Practical Treatise on the Fabrication of Matches, Gun-Cotton, Colored Fires, and Fulminating Powders" (1864); "A New and Complete Treatise on the Arts of Tanning, Currying and Leather-Dressing" (1865); "A Practical Guide for the Perfumer" (1868); "A General Treatise on the Manufacture of Vinegar" (1868); and a "General Treatise on the Manufacture of every Description of Soap" (1869).

DUSTIN, Hannah, pioneer, b. about 1660. She was the wife of Thomas Dustin, of Haverhill, Mass., whom she married, 3 Dec., 1677. In the spring of 1697, when the New England frontier settlements were almost depopulated by the French and Indians, Haverhill, thirty miles from Boston, suffered greatly, forty of its inhabitants being killed or captured. Among them was the family of Hannah Dustin, who, on 15 March, with her infant and nurse, was captured and carried off. Her husband, who first saw the savages approach and hastened to the rescue of his family, obeyed the entreaties of his brave wife, and fled as a protector to the remaining seven children. Mounting his horse and overtaking them, he placed himself between the foe and the little ones, and all escaped. The captive mother saw her infant, a week old, killed in her presence, and her home set on fire. The following day she was compelled to begin a long march with her enemies, walking eight hours on the first day, through snow, without shoes, and with inadequate clothing, after which they were suffered to sleep on the wet ground unsheltered. These hardships were repeated day after day until they reached the home of the leader of the savages, who lived on the island at the junction of the Merrimack and Contoocook rivers, near the present sight of Concord, N. H. Mrs. Dustin being told by the chief, to whom she had become a slave, that his prisoners would run the gauntlet at an Indian village and be subject to torture and wounds, resolved to escape. Instructed by an English lad from Worcester, who had been a prisoner of the Indians for a year, and aided by her companion in suffering, she learned how to kill instantly and how to take off the scalp. In the night, while her captors were asleep, she obtained a tomahawk, and killed nine of them, the lad killing the leader. A squaw, unhurt, and a young Indian boy, though badly wounded, escaped. Sinking all the boats, the party prepared one for their own transfer, with provisions; but, when about to leave the place, Mrs. Dustin, remembering that she had not full evidence of the tragedy, returned and scalped the slain savages. Reaching Haverhill after many hardships, she found her family safe; and in recognition of her heroism she was made the recipient of many honors among the people of her own and adjacent colonies. To the governor in Boston she presented a gun, tomahawk, and ten scalps, trophies of her victory. The general court gave to Mrs. Dustin and her child-companion $250 each. The island is now call Dustin's Island. There, in 1874, the commonwealths of Massachusetts and New Hampshire erected a granite monument, on whose tablets are inscribed the names of Hannah Dustin, Mary Neff, the nurse, and Samuel Leonardson, the English boy.

DUSUAU, Francis Emanuel Frederick, Count de Lacroix, statesman, b. in New Orleans, La., 1 Jan., 1801; d. in Paris, France, 1 Sept., 1836. He was the son of Francis Dusuau De Lacroix, founder and president of the bank of Louisiana. At the age of fourteen he was intrusted to the guardianship of Bishop Dubourg, of New Orleans, who took him to France and placed him in the academy of Abbé Liautard. He showed remarkable ability in his studies, and on their completion entered the bureau of the department of foreign affairs. During the ministry of the Baron de Damas his talents and activity placed him in the first rank among the pupils of the diplomatic school founded by that statesman. He afterward became secretary of the cabinet in the ministry of Prince de Polignac, and in 1830, during the three days of July, showed courage and skill in performing a difficult mission intrusted to him by Charles X. After the accession of Louis Philippe he threw himself with ardor into the cause of the legitimists, in whose interests he made several journeys to England, Holland, Italy, and Portugal. He entertained Don Carlos at the time of his journey to Paris, and was decorated by him with the order of

Charles III. During the intervals of his grave occupations he took part in editing the "Bénovateur," and contributed political articles to the "Quotidienne." In 1834 he published a translation of a work by Col. Hamilton, "Sur les hommes et les mœurs des États-Unis." He had planned several important works, which his premature death prevented him from accomplishing.

DUTCHER, Addison Porter, physician, b. in Durham, Greene co., N. Y., 11 Oct., 1818; d. in Cleveland, Ohio, 30 Jan., 1884. He was educated in the school of Benjamin Romain, began the study of medicine in New York city, and in 1839 was graduated at the New York College of physicians and surgeons. After practising in Cooksburg, N. Y., and New Brighton, Pa., he established himself at Enon Valley, N. Y., in 1847, and remained there until 1864, when he accepted the chair of the principles and practice of medicine in Charity hospital medical college, Cleveland, Ohio, which he held for two years. Since 1866 he has practised medicine in Cleveland. He was active in the movement for the abolition of slavery, and has taken a prominent part as a speaker and writer in that for the prohibition of the sale of intoxicating liquors. He has published "Selections from my Portfolio, comprising Lectures and Essays on Popular and Scientific Subjects" (Pittsburg, 1858); "Pulmonary Tuberculosis" (Philadelphia, 1876); "Sparks from the Forge of a Rough Thinker" (Cleveland, 1880); "Two Voyages to Europe" (1884); papers on "Epidemic Dysentery" and "Incision of the Uterine Neck," and lectures delivered at the Charity hospital.

DUTCHER, Jacob C., clergyman, b. about 1820. He was graduated at Rutgers in 1843, and at the theological seminary of the Reformed church in 1846. After holding pastorates in New Jersey, and from 1858 till 1866 in various churches of New York city, he was settled in 1868 in Bound Brook, N. J., and was subsequently appointed U. S. consul at Port Hope, Canada. He has published "Requisites of National Greatness" (1843); "Sketch of Captain Demming," written at the request of the New York legislature (1864); "The Prodigal Son" (1870); "Our Fallen Heroes"; "Washington," an oration (1872); "The Old Home by the River" (1874); "America: Her Danger and Safety" (1875); and "Frank Lyttleton, or Winning his Way."

DUTCHY, an Apache Indian. He was a member of Geronimo's band, and one of the most vindictive of his race. When the band submitted to Gen. Crook in 1885, Dutchy showed the sincerity of his peacemaking by entering the U. S. cavalry as a scout. He turned the knowledge, skill, and daring that had made him a formidable foe into such use that he soon became famous. He was unerring in the use of the rifle, and claimed that he never missed his mark. He became especially attached to Capt. Emmet Crawford, of the 3d cavalry, and attended him in the treacherous attack when Crawford was killed. Dutchy sprang forward, laid his dead master on the ground, and killed not only the Mexican who had shot him, but the commanding officer of the Mexican detachment to which the slayer belonged. He is ranked as one of the most faithful as well as dangerous scouts in the western service.

DUTERTRE, John Baptist, clergyman, b. in Calais, France, in 1610; d. Paris in 1687. He served at first on board the Dutch fleet, then entered the army, and was present at the taking of Maestricht in 1633. After escaping numerous dangers, he went to Paris and entered the Dominican order in 1635. The confidence of his superiors in his piety and knowledge of affairs induced them to send him on a mission to the Antilles in 1640. There he passed eighteen years, returning to France several times in the spiritual interests of the new colonies. He not only preached to the natives, but gave useful advice to the authorities, assisted in maintaining peace and order, and carefully took notes of all that was interesting or curious in his surroundings. After his return to France he made preparations for publishing the history of the islands he had visited. In 1656 the work was interrupted by an invitation from a M. de Cerillac, who wished to form a colony in America, and for that purpose asked Dutertre to go to that continent and, in conjunction with Duparquet, purchase the island of Grenada. He yielded reluctantly. His ship had hardly left port when it was captured by the English and taken to Plymouth. His friends obtained his liberty, and also letters-patent ordering his effects to be restored. "But," he says, "one knows not what it is to find one's self in a country like that. My robbers, seeing that I was tired of such a melancholy residence and ready to abandon everything to get out of it, kept the letters, and never spoke of them until after my departure." To avoid such difficulties in future, he embarked at Texel, and landed safely at Martinique. Then, having examined Grenada and concluded the purchase of the island, he returned to France toward the close of 1657. In pursuance of his promise to Cerillac, he sailed from Havre with him for America; but a terrible storm forced the ship to put into an English port, when Dutertre abandoned the enterprise and returned to France. He was sent to the convent of Tulle, where he remodelled his work and added to it the new documents he had procured. He was afterward recalled to the house of his order in Paris. His works are "Histoire générale des îles St. Christophe, de la Guadeloupe, de la Martinique et autres de l'Amérique, où l'on verra l'établissment des colonies françoises dans ces îles, leurs guerres civiles et étrangères, et tout ce qui se passe dans le voyage et retour des Indes," containing a translation into Carib of several prayers of the church (Paris, 1654; enlarged ed., 4 vols., 1667–'71), and "La vie de Ste Austreberte, prémiere abbesse de l'abbaye de Pavilly, près de Rouen, tirée de l'ancien manuscrit de Sainte-Austreberte de Montreuil sur mer" (1659). The former comprises a narrative of all that passed in the founding of French colonies in the Antilles from 1625 to 1667, and also the natural history of the islands, as well as curious details concerning the savages, creoles, and negroes, and has often been laid under contribution by writers on natural history.

DUTRA E MELLO, Antonio Francisco (doo-tra-a-mayl'-yo), Brazilian poet, b. in Rio Janeiro, 8 Aug., 1823; d. 22 Feb., 1843. At an early age he lost his father, but through the efforts of his mother he finished his education. In his spare hours he cultivated poetry, writing verses that have been pronounced among the best productions of American poets. He was a corresponding member of the Polytechnic society of Paris, and member of several other scientific and literary societies. His principal works include "A noite inspiracão poetica," "A noite de S. Toão," "Novo curso practico, analytico, theorico ê sinthetico da lingua ingleza applicado a lingua portugueza"; and "Historia critica da lingua latina."

DUTTON, Aaron, clergyman, b. in Watertown, Conn., 21 May, 1780; d. in New Haven, Conn., in June, 1849. He was prepared for college by the

Rev. Azel Backus, and graduated at Yale in 1803. He studied theology under President Dwight, and was ordained pastor of the Congregational church at Guilford in 1806. He resigned in 1842 because his abolitionist views were unacceptable to his congregation. A year later he went as a missionary to Iowa, but was attacked with the disease of which he eventually died, and did not remain.—His son, **Samuel William Southmayd**, clergyman, b. in Guilford, Conn., 14 March, 1814; d. in Millbury, Mass., 26 Jan., 1866. He was graduated at Yale in 1833, and spent the following year in teaching in Mount Hope college, Baltimore, Md. In 1834 he was rector of the Hopkins grammar-school in New Haven. From 1836 till 1838 he was a tutor in Yale, and at the same time pursued theological studies in the seminary. He was pastor of the North church in New Haven from June, 1838, until his death. As a preacher, he was characterized by plainness, directness, and simplicity. He was widely known for his charity, and was a noted champion of the anti-slavery cause. In 1843, upon the establishment of the "New Englander," he became one of the associate editors, and contributed to its pages more articles than any other writer save Dr. Bacon. He also published various addresses, and a "History of the North Church during the Last Century" (1843).

DUTTON, Arthur Henry, soldier, b. in Wallingford, Conn., 15 Nov., 1838; d. in Baltimore, Md., 2 July, 1864. He was graduated at West Point in the engineer corps in 1861. He served on the staff of Gen. Mansfield in Washington at the beginning of the war, and then had charge of the defences of Fernandina, Fla., until he became colonel of the 21st Connecticut regiment on 5 Sept., 1862. While on duty in North Carolina with his regiment, he served as chief of staff to Maj.-Gen. Peck, and subsequently held a similar position upon the staff of Maj.-Gen. W. F. Smith. After the battle of Drury's Bluff, in which he greatly distinguished himself, he was placed in command of the 3d brigade. While reconnoitring with his brigade in the neighborhood of Bermuda Hundred on 5 June, 1864, he came upon the enemy strongly intrenched and almost hidden from view. Being, as usual, on the skirmish line, he was mortally wounded in the beginning of the engagement.—His brother, **Clarence Edward**, soldier, b. in Wallingford, Conn., 15 May, 1841, was graduated at Yale in 1860, and subsequently spent two years in study at New Haven. In 1862 he became 1st lieutenant and adjutant, and shortly afterward captain, in the 21st Connecticut volunteers. He was engaged at Fredericksburg, Norfolk, Cold Harbor, Bermuda Hundred, and Drury's Bluff. In 1863 he was admitted to the U. S. army as 2d lieutenant in the ordnance corps, after passing a severe competitive examination, and was promoted 1st lieutenant in March, 1867. Meanwhile he had been stationed at Watervliet arsenal in West Troy, in 1865, and came under the influence of Robert P. Whitfield and Alexander L. Holley, who directed his attention to geology and the technology of iron. For five years his leisure was occupied in the study of these subjects, and in 1870 he read his first paper, "On the Chemistry of the Bessemer Process," before the American association for the advancement of science, at their Troy meeting. He was transferred to the Frankford arsenal in 1870, and in 1871 to the Washington arsenal, where he remained until May, 1876, having been promoted to captain in June, 1873. While in Washington he renewed his studies in geology and devoted considerable attention to the microscopic examination of rocks. His work was noticed by the officers of the U. S. geological survey, and during the summers of 1875–'7 he was detailed for duty in connection with the survey of the Rocky mountain region under Maj. John W. Powell. The winters of these years were spent in the west as chief ordnance officer of the Department of the Platte. In 1878 he was ordered to report to the secretary of the interior, and subsequently was associated with the U. S. geological survey, being in 1887 geologist in charge of the division of volcanic geology. His work on the geology of the high plateaus of central Utah was begun in 1875 and completed in 1877, and that in the Grand Cañon district was finished in 1880. In 1882 he visited the Hawaiian islands for the purpose of examining the volcanoes, and then made a special study of the great volcanic fields of the northwest. He began the examination of the Mount Taylor and Zuni district of New Mexico in 1884, and in 1885 began an investigation of the cascade and coast ranges of northern California and Oregon, on which he is now (1887) still occupied. In 1886 he was employed for a short time in studying the causes of the Charleston earthquake, concerning which he prepared a monograph. Capt. Dutton is a member of several scientific societies, and in 1884 was elected a member of the National academy of sciences. Besides upward of fifty articles on scientific subjects, he has published the following government reports: "Geology of the High Plateaus of Utah" (Washington, 1880); "Tertiary History of the Grand Cañon District" (1882); "Physical Geology of the Grand Cañon District" (1882); "Hawaiian Volcanoes" (1884); and "Mount Taylor and the Zuni Plateau" (1886).

DUTTON, Henry, jurist, b. in Plymouth, Conn., 12 Feb., 1796; d. in New Haven, Conn., 12 April, 1869. His grandfather, Thomas, was a captain in the Revolutionary army. He was brought up on a farm, prepared himself under difficulties for college, entered the junior class at Yale, and was graduated with honor in 1818. He then taught school, and at the same time studied law in Fairfield, Conn., was a tutor in Yale in 1821–'3, and after that established himself in practice at Newtown, where he remained fourteen years, and was twice elected to the legislature. The next ten years he practised at Bridgeport, where he was prominent in his profession, became state attorney, and was for two terms a member of the legislature. In 1847 he became professor of law in Yale, and removed to New Haven. He was elected to the state senate in 1849, once again to the lower house of the legislature, was for one year judge of the New Haven county court, and in 1854 was elected governor of Connecticut. He was judge of the superior court and of the supreme court of errors from 1861 to 1866, at the same time retaining his professorship. After he was retired from the bench at the statutory age of seventy years, he resumed the practice of law till compelled to retire by failing health. He served on the commissions of 1849 and 1866 to revise the state statutes, and was chairman of the committee that made a new compilation of them in 1854. Judge Dutton was instrumental in the passage of the law allowing parties to a suit to testify in civil cases. He advocated the law allowing the prisoner's counsel the right of a closing argument before the jury, introduced in the legislature the bill giving the superior court sole jurisdiction in divorce cases, and aided in the passage of bills to secure more effectually the rights of married women. He published a "Digest of the Connecticut Reports" (1833), with an analytical

instead of an alphabetical arrangement of subjects, and a revision of Swift's "Digest" (1848).—His cousin, **George Washington,** physician, b. in Sheldon, Vt., 18 Dec., 1826, is also a grandson of Capt. Thomas. He studied at Oberlin college, Ohio, in 1844–'5, enlisted in 1846 in an Ohio regiment of volunteers, and served during the Mexican war in the commissary and medical departments. After studying medicine three years, and attending a course of lectures in the University of Pennsylvania, he began practice at Independence, Ohio, and in 1860 removed to Tomales, Cal. In 1869 he attended a second course of lectures in Philadelphia, and received his doctor's degree. Among his contributions to medical literature is a paper on "Treatment of Fracture of the Femur," printed in the "Transactions" of the California medical society for 1874, in which he first called attention to the fact that the sound limb must be stretched equally with the broken limb as a criterion of measurement in order to avoid inequality of length upon recovery.

DUTTON, Henry Worthington, journalist, b. in Lebanon, Conn., 17 April, 1796; d. in Boston, Mass., 15 April, 1875. When he was about five years old his father removed to Geneseo, N. Y., and erected the first tannery in that part of the state. After his death Henry returned to Connecticut with his mother, and at the age of ten years was sent to Hadley, Mass., where he was taken into a private family, sent to school in winter, and worked on a farm in summer until 1812, when he was indentured to a printer in Stockbridge. He remained there two years, then went to Pittsfield, Mass., and with Ebenezer Cooper printed for some months the "Berkshire Reporter." On the declaration of peace with Great Britain in 1815, he settled in Boston and became a journeyman printer in the office of Wells & Lilly, and afterward foreman until 1824. During a part of this time James Gordon Bennett, founder of the "New York Herald," was a copy-holder and proof-reader in the same office. He began business in Boston with James Wentworth in 1824, and after the latter's death, in 1848, continued it with his widow till 1856, when Mr. Dutton purchased her interest in the "Transcript," and took his son, William Henry, into partnership. For twenty-five years the firm of Dutton & Wentworth had been state printers, the contract terminating in 1852. The office of the "Transcript" was twice destroyed by fire, once in 1851, and again in the great fire of 1872, but the regular issue of the paper was never omitted.

DUVAL, Gabriel, jurist, b. in Prince George county, Md., 6 Dec., 1752; d. there, 6 March, 1844. He received a classical education, studied law, was admitted to the bar, and became clerk of the Maryland legislature previous to the Declaration of Independence. He was elected to congress to fill a vacancy, and re-elected, serving from November, 1794, till March, 1796, when he resigned to take his place on the bench of the Maryland supreme court. In December, 1802, he was appointed comptroller of the currency, which office he held till 18 Nov., 1811, when he was appointed a justice of the U. S. supreme court. In 1836 he was compelled by deafness to resign.

DUVAL, Isaac Hardin, soldier, b. in Wellsburg, Brooke co., Va., 1 Sept., 1824. He received a common-school education, was many years a hunter in the Rocky mountains, commanded the first company that crossed the plains from Texas to California, and travelled in Mexico and Central and South America. In 1846–'7 he was secretary to the commissioners sent by President Polk to treat with the Indians on the Texas frontier. On 1 May, 1861, he entered the U. S. volunteer service as major of the 1st West Virginia infantry. He was promoted colonel on 1 Sept., 1862, brigadier-general on 1 Nov., 1864, assigned to the command of the 1st division of the 8th army corps, and made major-general by brevet at the end of the war. He was two years in the senate of West Virginia, two years adjutant-general of the state, and in 1868 was elected as a republican to congress, serving one term. He was appointed assessor of internal revenue in 1871, and was collector for the first district of West Virginia in 1873–'5. He subsequently followed the insurance business, and in 1886 was elected to the legislature.

DUVAL, William P., lawyer, b. in Virginia in 1784; d. in Washington, D. C., 19 March, 1854. His great-grandfather was a French Huguenot, who settled in Virginia, his grandfather a member of the house of burgesses, and his father, Maj. William, an officer of the Revolution, who possessed a high reputation as a chancery lawyer, spent a large fortune in helping the poor, and enjoyed the friendship of Washington. The son removed to Kentucky when a boy, studied law there, and was admitted to the bar. He commanded a company of mounted volunteers against the Indians in 1812, and was elected to congress in that year, serving from 24 March, 1813, to 2 March, 1815. After his return to Kentucky he practised law at Bardstown till 1822, when he was appointed governor of the territory of Florida by President Monroe. He was continued in that office by Presidents Adams and Jackson, serving till 1834. He removed in 1848 to Texas, and died of a paralytic shock while visiting Washington. His life and character have been celebrated in fiction by James K. Paulding, who portrayed him in "Nimrod Wildfire," and by Washington Irving, who drew from him the character of "Ralph Ringwood."—His brother, **John Pope,** lawyer, b. in Richmond, Va., 3 June, 1790; d. in Florida about 1855, was educated at Washington college and at William and Mary, studied law in Richmond, and was admitted to practice in 1811. He became 1st lieutenant in the 20th U. S. infantry, 9 April, 1812, served on the Canadian frontier, and was promoted to captain in January, 1814, serving in Virginia. After the close of the war he resigned his commission and entered on the practice of the law, but, not meeting with success, sold his property and emigrated to Florida, where his brother was governor, arriving in Tallahassee in June, 1827. He obtained a good practice, but, owing to the unhealthfulness of the climate, removed in 1832 to Bardstown, Ky., where he remained till 1836, organizing volunteer forces during the war between Texas and Mexico, with the rank of brigadier-general in the Texan service. He was on the point of departing for the scene of hostilities when the war ended with the capture of Santa Anna. He then returned to Florida as secretary of the territory, gained a high reputation there as a lawyer, and was commissioned by Gov. Call to make a "Digest of the Laws of Florida" (1840). While acting as governor he secured the capture of a large body of Indians on the Appalachicola river. After the admission of Florida to the Union he was prominent as a Democratic politician, but was a firm unionist during the secessionist agitation of 1851–'2.

DUVENECK, Frank, artist, b. in Covington, Ky., about 1845. He was a student in Paris for ten years or more, and a pupil of Diez. He sent five portraits to the Boston art club in 1875, con-

tributing to the National academy exhibition in 1877 a portrait of Charles Dudley Warner and a "Turkish Page," the most noted of his works. He sent "The Coming Man" and "Interior of St. Mark's, Venice," to the opening exhibition of the American artists' society in 1878. Other works from his hand are "A Circassian," now the property of the Boston museum of fine arts, and "Italian Girl" and "The Professor," which were exhibited at the Boston mechanics' fair in 1878. He was many years in Munich, and about 1881 went to Florence, Italy, where he has since resided and successfully taught, with the exception of two years that he passed in Boston.

DUVERNAY, Ludger, Canadian editor, b. in Verchères, Canada, in 1799; d. in Montreal, Canada, in 1852. He was educated in the public schools of Verchères, came to Montreal in 1813, and became an apprentice in the office of the "Spectateur." He founded the "Gazette des Trois Rivières" in Trois Rivières in 1817, edited it till 1822, and in 1823 published the "Constitutionel," which lived only two years. He established the "Argus" in Trois Rivières in 1826, and in 1827 came to Montreal, where, in conjunction with A. N. Morin, he founded the "Minerve." From this period he was prominent as an advocate of Canadian independence, and was three times imprisoned by the government. In 1833 he laid the foundation of the Society of Saint-Jean-Baptiste, with the object of preserving the creed, language, and nationality of the Canadian French. He was elected a member of the Canadian legislature in 1837, and was some months afterward obliged to fly, in order to escape imprisonment, taking refuge in Burlington, where he founded the "Patriote." He returned to Canada in 1842, and revised the "Minerve," which he continued to publish in the interest of the Canadian liberals till his death.

DUYCKINCK, Evert Augustus, author, b. in New York city, 23 Nov., 1816; d. there, 13 Aug., 1878. He was the son of Evert Duyckinck, who was at his death the oldest publisher in New York city. The son was graduated at Columbia in 1835, studied law with John Anthon, being admitted to the bar in 1837, but, after spending a year in Europe, devoted himself to literature. Previous to going abroad he had contributed articles on the poet Crabbe, the works of George Herbert, and Oliver Goldsmith, to the "New York Review." In 1840 he began with Cornelius Mathews a monthly periodical, entitled "Arcturus," which was continued till 1842. To this magazine he contributed articles on authors at home and abroad. In 1847 he entered upon the editorship of "The Literary World," a weekly review of books, the fine arts, etc., which, with the exception of one year, was carried on by his brother George and himself to the close of 1853. Memorials of Francis L. Hawks, D. D., LL. D. (1867; printed, 1871); Henry T. Tuckerman (1872); and James W. Beekman (1877), were read by him before the New York historical society; similar memorials of John Wolfe (1872) and Samuel G. Drake (1876) were read, the last named written for the American ethnological society (1876). In 1854 the brothers were again united in the preparation of "The Cyclopædia of American Literature" (2 vols., New York, 1855; enlarged eds., 1865 and 1875). He published "Wit and Wisdom of Sydney Smith," with a memoir (New York, 1856); an American edition of Willmot's "Poets of the Nineteenth Century" (1858). Immediately after the death of Washington Irving, Mr. Duyckinck gathered together and published in one volume a collection of anecdotes and traits of the great author, under the title of "Irvingiana" (1859); "History of the War for the Union" (3 vols., 1861–'5); "Memorials of John Allan" (1864); "Poems relating to the American Revolution, with Memoirs of the Authors" (1865); "Poems of Philip Freneau," with notes and a memoir (1865); "National Gallery of Eminent Americans" (2 vols., 1866); "History of the World from the Earliest Period to the Present Time" (4 vols., 1870); and an extensive series of "Biographies of Eminent Men and Women of Europe and America" (2 vols., 1873–'4). His last literary work was the preparation, with William Cullen Bryant, of an edition of Shakespeare, which is still (1887) in manuscript. In January, 1879, a meeting in his memory was held by the New York historical society, and a biographical sketch of Mr. Duyckinck was read by William Allen Butler. See also a memoir of him by Samuel Osgood, D. D., LL. D. (Boston, 1879).—His brother, **George Long,** writer, b. in New York city, 17 Oct., 1823; d. there, 30 March, 1863, after attending Geneva college entered the University of New York, and was graduated there in 1843. He studied law and was admitted to the bar, but never practised. After the completion of his legal studies he travelled extensively in Europe in 1847–'8, and on his return became joint editor with his brother Evert of the "Literary World," afterward becoming joint author with his brother of the "Cyclopædia of American Literature." He then revisited Europe, and, on his return in 1857, entered on a separate career of authorship in a congenial department. He was by early training and long-established choice warmly attached to the liturgy and order of the Protestant Episcopal church, and especially interested in its biographical literature. To this he devoted himself, and, having been elected treasurer of the Sunday-school union and Church book society, he began a series of biographies of English clergymen, with a view to attract the interest of American readers. The first of these was the "Life of George Herbert" (New York, 1858); followed by the lives of Bishop Thomas Ken (1859), Jeremy Taylor (1860), and Hugh Latimer (1861). These memoirs were unpretending in form, and were condensed to a simple narrative; but they are regarded as contributions of high value to the class of works to which they belong. Mr. Duyckinck contemplated writing the life of Bishop Leighton, but before entering on its preparation he was seized with the illness which terminated his blameless and beautiful life.

Evert A. Duyckinck

DWENGER, Joseph, R. C. bishop, b. in St. John's, Ohio, in 1837. He was educated in the school of the Holy Trinity, Cincinnati, and afterward studied for the priesthood in the Seminary of Mount St. Mary's of the West. In 1859 he received ordination and was appointed professor in the College of the precious blood. He was next placed in charge of the congregations of Wapakoneta and

St. Mary's, and was also connected with the Seminary of St. Mary's. He was a travelling missionary in the states of Ohio, Kentucky, and Indiana in 1867–'72, and in the latter year was consecrated bishop of Fort Wayne. He immediately devoted himself to the development and organization of the parochial-school system in his diocese. He established a diocesan school board, and introduced uniformity of teaching and grading. He modelled his system on that of the public-school of the United States, and with great success. In 1884 he had sixty schools in operation, with 8,000 pupils, in a Roman Catholic population of 85,000. The University of Notre Dame was established through him under the priests of the holy cross, and he also founded numerous sisterhoods. He accompanied the American pilgrimage to Rome as its superior, and was present at the third plenary council of Baltimore.

DWIGHT, John Sullivan, musical critic, b. in Boston, Mass., 13 May, 1813. He is one of the Dwights of Shirley, Mass., whose ancestor, Capt. John Dwight, is supposed to have been a nephew of Capt. Henry, of Hatfield. He was graduated at Harvard in 1832, at the Cambridge divinity school in 1835, and in 1840 was ordained pastor of the Unitarian church in Northampton, Mass. He soon left the ministry from sympathy with the socialistic ideas of the famous Brook Farm community, of which he was one of the founders, and where he lived for five years, teaching Latin, Greek, German, and music, and at the same time farming, cutting wood, cultivating trees, and engaging in other industries. He returned to Boston in 1848 and devoted himself to literature, contributing to the "Harbinger" (which was at one time the organ of the Brook Farm community, but afterward removed to New York), the Boston "Dial," the "Christian Examiner," and other periodicals. He now devoted himself specially to musical criticism, doing much to foster a taste for the best compositions, both by his articles and by lectures on Bach, Beethoven, Handel, and Mozart, which he delivered in the principal cities in the country. In April, 1852, he established in Boston "Dwight's Journal of Music," the publication of which was assumed by Oliver Ditson & Co. in 1858, but Mr. Dwight continued its sole editor until 1881, when it was discontinued. It was for several years the only musical journal in the country, and always expressed the opinions of its editor without fear or favor. He earnestly opposed Wagner, Berlioz, Rubinstein, and the "music of the future," and as strenuously upheld Bach, Handel, and Beethoven. Mr. Dwight has published "Translations of Select Minor Poems from the German of Goethe and Schiller, with Notes" (in Ripley's "Specimens of Foreign Standard Literature," Boston, 1838). These are distinguished for grace of diction, close adherence to the originals, and musical rhythm. His best-known original poem is "God Save the State."—His sister, **Frances Ellen,** b. in Boston in 1819, became a teacher of music in that city.

DWIGHT, Joseph, soldier, b. in Dedham, Mass., 16 Oct., 1703; d. in Great Barrington, Mass., 19 June, 1765. His father, Capt. Henry Dwight, of Hatfield, Mass., was grandson to John Dwight, of Dedham, Mass., from whom all of the name in this country are descended. Joseph was graduated at Harvard in 1722, and was a merchant in Springfield, Mass., in 1723–'31, but removed to Brookfield, Mass., and was admitted to the bar in 1733. He was eleven times a member of the colonial council between 1731 and 1751, and its speaker in 1748–'9. In 1739 he was judge of the court of common pleas of Worcester county. He had become a colonel of militia, and on 20 Feb., 1745, was made brigadier-general, and was second in command at the attack on Louisburg in that year, where he led in person the "Ancient and honorable company of artillery of Boston," and was commended for his courage and skill by Gen. Pepperell. In 1756 he commanded a brigade of Massachusetts militia, at Lake Champlain, in the second French war. He had removed in 1752 to Stockbridge, where he was for several years trustee of Indian schools, and in 1753–'61 was chief justice of the Hampshire county court of common pleas. He went to Great Barrington in 1758, and on the formation of the new county of Berkshire in 1761 became judge of its court, and also judge of probate, holding these offices till his death. Gen. Dwight was a man of fine personal appearance, dignified in bearing, and much esteemed throughout the colony.—His grandson, **Henry Williams,** congressman, b. in Stockbridge, Mass., 26 Feb., 1788; d. in New York city, 21 Feb., 1845. His father, of the same name, was a soldier of the Revolution, and treasurer of Berkshire county from 1784 till 1804. Henry was educated at Williams, became a lawyer in Stockbridge, and in the war of 1812 was aide to Gen. Whiton, with the rank of colonel. He was a member of the legislature in 1818 and 1834, and served five successive terms in congress, 1821 till 1831. Col. Dwight, fond of fine stock, was one of the first importers of merino sheep and Devonshire cattle.—Henry Williams's brother, **Edwin Welles,** clergyman, b. in Stockbridge, Mass., 17 Nov., 1789; d. there, 25 Feb., 1841, was graduated at Yale in 1809, was pastor of a Congregational church at Richmond, Mass., in 1819–'37, and published a "History of Berkshire County, Massachusetts" (Pittsfield, Mass., 1829).—Another brother, **Louis,** philanthropist, b. in Stockbridge, Mass., 25 March, 1793; d. in Boston, Mass., 12 July, 1854, was graduated at Yale in 1813, and at Andover theological seminary in 1819. He was prevented from preaching by weak lungs, caused by inhaling "exhilarating gas" during a college chemical lecture. He was an agent of the American tract society in 1819–'21, and of the Education society in 1821–'4, and was ordained in Salem, Mass., on 27 Nov., 1822. In 1824 he married Louisa Willis, sister of N. P. Willis, the poet, and in the latter part of that year, during a six-months' horseback ride for his health, distributed Bibles among the inmates of prisons in various states of the Union. The abuses that thus became known to him led to the formation in 1825 of the Prison discipline society, of which he was secretary and practical manager till his death, effecting many needed reforms. In 1846 he visited Europe and inspected the prisons there. The series of twenty-nine annual reports published by Mr. Dwight contained a vast amount of valuable information not to be found elsewhere.—**Harrison Gray Otis,** missionary, great-grandson of Gen. Joseph's elder brother Seth, b. in Conway, Mass., 22 Nov., 1803; d. in Vermont, 25 Jan., 1862, was graduated at Hamilton college, Clinton, N. Y., in 1825, and at Andover theological seminary in 1828, and on 15 July, 1829, was ordained and commissioned a missionary of the American board, whose agent he had been for a short time. He sailed for Malta in January, 1830, and in the same year began, with Dr. Eli Smith, a fifteen-months' exploration of Asia Minor, Persia, Armenia, and Georgia. In July, 1831, he settled in Constantinople, and became one of the founders of the Armenian mission there. He was one of the most noted American missionaries, and, in addition to his

daily work, carried on a voluminous correspondence with prominent Christians in all parts of the world. He travelled extensively in connection with his labors, his last long journey being a solitary horseback ride of thousands of miles through Asia Minor, in 1859–'60. He revisited the United States for the sixth time in November, 1861, and was killed in a railroad accident in Vermont while on his way to attend a missionary anniversary in Canada. Hamilton gave him the degree of D. D. in 1852. Dr. Dwight wrote books and tracts in the languages of the east, translated portions of the Bible, and published "Researches of Smith and Dwight in Armenia" (Boston, 1833); "Memoir of Mrs. Elizabeth B. Dwight," his wife (New York, 1840); and "Christianity Revived in the East" (1850; London, 1854). He also contributed to the journal of the American oriental society a "Complete Catalogue of Literature in Armenia," and left many unpublished manuscripts.—His son, **William Buck,** scientist, b. in Constantinople, Turkey, 22 May, 1833, came to the United States in 1850, and was graduated at Yale in 1854, at Union theological seminary, New York, in 1857, and at the Yale scientific school in 1859. He took part in founding the village of Englewood, N. J., in 1859, and established a young ladies' school there, of which he was principal till 1865. He was occupied in mining explorations in Virginia and Missouri in 1865–'7, taught at West Point in 1867–'70, and in 1870–'8 was assistant principal and professor of natural science in the State normal school at New Britain, Conn., also editing the Connecticut "School Journal" in 1872–'5. He was chosen professor of natural history and curator of the museum at Vassar college in 1878, and in 1882 was also made curator of the museum of the Vassar Brothers' institute, Poughkeepsie, N. Y. In 1885 he invented a machine for making thin slices and other sections of rocks and fossils. Mr. Dwight has given special attention to the geology and paleontology of the lower Silurian rocks. Since 1879 he has carried on an extended investigation in the Wappinger valley limestones of Dutchess county, N. Y., developing a new group of fossils for which he proposes the name "Rochdale group." He has also investigated the Taconic limestones of Canaan, N. Y. Many of his results have been published in the proceedings of the National academy and the American association, and in scientific periodicals, and when complete they are to be issued in book-form, illustrated.—**Mary Ann,** author, granddaughter of Gen. Joseph's brother Josiah, b. in Northampton, Mass., 17 Sept., 1806; d. in Morrisania, N. Y., 4 Nov., 1858. Her taste was formed in her father's excellent library, and she became a teacher of drawing and painting. She published "Grecian and Roman Mythology" (New York, 1849); "Introduction to the Study of Art" (1856); an elementary astronomy; "Poetry for the Young;" and an edition, with notes, of Cowper's translation of the "Iliad." She had also prepared for publication an abridgment of Lanzi's "History of Painting."—**Edmund,** merchant, grandson of Gen. Joseph's brother Edmund, b. in Springfield, Mass., 28 Nov., 1780; d. in Boston, Mass., 1 April, 1849, was graduated at Yale in 1799, and studied law with Fisher Ames, but never practised. After travelling in Europe in 1802–'4 he became a merchant in Springfield, and in 1815 established the house of William H. & J. W. Dwight, which founded the manufacturing villages of Chicopee Falls in 1822, Chicopee in 1831, and Holyoke in 1847. His firm had for several years the direction of factories in which 3,000 persons were constantly employed. Mr. Dwight took an early and active part in the construction of the Western railroad from Worcester to Albany, and was one of its directors for many years, becoming president in the year of his death. He made a liberal use of his large fortune for objects of public importance, rendering especially great service to the cause of popular education. It was chiefly through his exertions that the Massachusetts state board of education was established, and he was the first to propose the present normal-school system. In 1838 he pledged $10,000 for its establishment, on condition that the legislature should appropriate an equal amount, which was promptly done. Mr. Dwight was for many years a member of the Massachusetts legislature, and one of the founders of the American antiquarian society in 1812.—His son, **Edmund,** merchant, b. in Boston, 3 Sept., 1824, was graduated at Harvard in 1844. In 1871 he went abroad to superintend the distribution of the fund raised by subscription in Boston for the relief of the suffering caused in France by the war with Germany, and on his return he published an interesting "Report to the Executive Committee of the French Relief Fund" (Boston, 1872).—The elder Edmund's nephew, **Francis,** educator, son of James Scutt Dwight, b. in Springfield, Mass., 14 March, 1808; d. in Albany, N. Y., 15 Dec., 1845, was graduated at Harvard in 1827, and at the law-school in 1830. After a tour in Europe he was admitted to the bar in 1834, and practised in the states of Massachusetts, Michigan, and New York, but gave up his profession in 1838, and established at Albany, in 1840, the "District School Journal," under state patronage, which he conducted until his death. He was active in devising and establishing the present code of public instruction in the state of New York.—**William,** soldier, grandson of Edmund's brother Jonathan, b. in Springfield, Mass., 14 July, 1831, attended a military school at West Point in 1846–'9, and was at the U. S. military academy there in 1849–'53, but resigned before he was graduated and became a manufacturer in Boston, and afterward in Philadelphia. He was commissioned captain in the 13th U. S. infantry on 14 May, 1861, and in June of that year became lieutenant-colonel of the 70th New York volunteers, of which Daniel E. Sickles was colonel. At the battle of Williamsburg half the regiment were killed or wounded, Col. Dwight being wounded three times and left for dead on the field. For his gallantry on this occasion he was promoted to brigadier-general of volunteers on 29 Nov., 1862, and assigned to the 1st brigade of Grover's division, which he led in the attack on Port Hudson. He also served on the commission to settle the terms of surrender of that place. In May, 1864, he was Gen. Banks's chief of staff in the Red river expedition, succeeding Charles P. Stone, and in July of that year was put in command of the 1st division of the 19th army corps, under Sheridan, with which he rendered important service at Winchester, Fisher's Hill, and Cedar Creek. He remained in the army till 15 Jan., 1866, and subsequently removed to Cincinnati, Ohio.—His brother, **Wilder,** soldier, b. in Springfield, Mass., 23 April, 1833; d. in Boonsborough, Md., 19 Sept., 1862, was graduated at Harvard in 1853, and at the law-school in 1855. He practised in Boston from 1857 till 24 May, 1861, when he became major of the 2d Massachusetts infantry. He distinguished himself in Gen. Banks's retreat through the Shenandoah valley, and was taken prisoner at Winchester on 25 May, 1862. He was made lieutenant-colonel on 13 June, 1862, was mortally

wounded at Antietam, and died in hospital two days later. His "Life and Letters" were published by his mother, **Elizabeth Amelia,** daughter of Daniel Appleton White, of Salem, Mass. (Boston, 1868).—Two other brothers, **Howard** (1837–'63) and **Charles** (1842), were also in the national military service during the civil war.—**Thomas,** physician, another grandson of Jonathan, b. in Boston, Mass., 13 Oct., 1843, spent two years at Harvard, and then entered the medical school, where he received his degree in 1867, taking the first Boylston prize by an essay on "Intercranial Circulation." After studying abroad for two years, he was instructor in comparative anatomy at Harvard in 1872–'3, lecturer and professor of anatomy at Bowdoin in 1872–'6, instructor in histology at Harvard in 1874–'83, and in the latter year succeeded Oliver Wendell Holmes as professor of anatomy. Dr. Dwight is a Roman Catholic, and the first of that faith to hold a Harvard professorship. In 1878 he won the prize of the Massachusetts medical society by an essay on the "Identification of the Human Skeleton." He is a member of various medical societies, and in 1880–'1 was president of the Catholic union of Boston. He was an editor of the Boston "Medical and Surgical Journal" in 1873–'8, delivered a course of lectures at the Lowell institute in 1884 on the "Mechanics of Bone and Muscle," and has published "Anatomy of the Head" (Boston, 1876); "Frozen Sections of a Child" (New York, 1881); and various papers.

DWIGHT, Timothy, educator, b. in Northampton, Mass., 14 May, 1752; d. in New Haven, Conn., 11 Jan., 1817. He was the great-grandson of Nathaniel, who was brother to Capt. Henry Dwight, of Hatfield (see DWIGHT, JOSEPH). His father, Maj. Timothy Dwight (Yale, 1744), was a lawyer by education, and became a prosperous merchant of Northampton; his mother was Mary, third daughter of the Rev. Jonathan Edwards, a lady of great mental ability and force of character. During the boy's earlier years she devoted herself to his education. At twelve he was sent to the Rev. Enoch Huntingdon's school in Middletown, where he was fitted for college, matriculating at Yale in 1765.

He was graduated in 1769, having but one rival in scholarship, Nathan Strong. After leaving college he was principal of the Hopkins grammar-school in New Haven for two years. In the autumn of 1771 he was given the post of tutor in his alma mater, and in the same year began his ambitious epic, "The Conquest of Canaan." He was made M. A. in 1772, and on taking his degree delivered a dissertation on the "History, Eloquence, and Poetry of the Bible," which attracted much attention. While a tutor, he studied law, with the intention of adopting it as a profession; but in 1777, there being a great dearth of chaplains in the Continental army, he was licensed to preach, and soon afterward became chaplain in Parsons's brigade, of the Connecticut line. While holding this office he wrote several stirring patriotic songs, one of which, "Columbia," became a general favorite. His father's sudden death in 1778 recalled him to the care of his widowed mother and her family, with whom he remained at Northampton, Mass., five years, tilling the farm and preaching occasionally in the neighboring churches. He also kept a day-school for both sexes, in which Joel Barlow, the poet, was a teacher; and after the capture of New Haven by the British he had under his care several of the students of Yale. In 1782 he was a member of the Massachusetts legislature, but refused a nomination to congress. Receiving a call from the church at Greenfield Hill, a beautiful rural parish in Fairfield, Conn., he removed thither in 1783; and shortly afterward he established an academy, which soon acquired a national reputation, students being attracted from all parts of the country and from the West Indies. In this school Dr. Dwight became the pioneer of higher education for women, assigning his female students the same advanced studies as those pursued by the boys, and earnestly advocating the practice. The College of New Jersey gave him the degree of S. T. D. in 1787, and Harvard that of LL. D. in 1810. In 1799 he declined a call from the Dutch Reformed church at Albany. During this period he proposed and agitated, until he secured, the union of the Congregational and Presbyterian churches of New England. In 1795, on the death of Dr. Stiles, he was called to the presidency of Yale college, an office which he held until his death in 1817. On this long and successful adminstration of the affairs of Yale college Dr. Dwight's claims to distinction largely rest. When he assumed control there were but 110 students; the curriculum was still narrow and pedantic; the freshmen were in bondage to the upper-class men, and they in turn to the faculty. President Dwight abolished the primary-school system, and established among the class-men, and between them and the faculty, such rules as are usually observed by gentlemen in social intercourse. He introduced the study of oratory into the curriculum, and himself gave lectures on style and composition. He also abolished the system of fines for petty offences. At his death the number of students had increased to 313. In politics he was a federalist of the Hamilton school, and he earnestly deprecated the introduction of French ideas of education. His published works fill thirteen large octavo volumes, and his unpublished manuscripts would fill almost as many more. While he was a tutor in college, imprudence in the use of his eyes had so weakened them that he could use them neither for study nor writing, and he was afterward obliged to employ an amanuensis very frequently. His most ambitious work was his epic, "The Conquest of Canaan." A critic, writing in the "North American Review" (vii., 347), said its author had invented a medium between absolute barbarism and modern refinement. "There is little that is really distinctive, little that is truly oriental, about any of his persons or scenes. . . . It is occasionally animated, and in description sometimes picturesque and poetical." His pastoral poem, "Greenfield Hill" (1794), in which was introduced a vivid description of the burning of Fairfield by the British in 1779, was much more popular. In 1800 he revised Watts's Psalms, adding translations of his own, and a selection of hymns, both of which were adopted by the general assembly of the Presbyterian church. The best known of these is the version of the 137th Psalm, beginning, "I love thy kingdom, Lord, the house of thine abode." His

"Travels in New England and New York" (4 vols., New Haven, 1821; London, 1823) was pronounced by Robert Southey the most important of his works. His "Theology Explained and Defended in a Course of 173 Sermons" (5 vols., Middletown, Conn., 1818; London, 1819; new ed., with memoir by his son, Rev. Sereno E. Dwight, New York, 1846) has gone through a score of editions in this country and at least one hundred abroad, and on it rests his reputation as a theologian. Besides these works and numerous discourses he published "America, a Poem" (1772); "The Genuineness and Authenticity of the New Testament" (1793); "Triumph of Infidelity, a Satire" (1797); "Discourse on the Character of Washington" (1800); "Observations on Language" (1816); and "Essay on Light" (1816). See, besides, the memoir by his son, and the life in vol. xiv. of Sparks's "American Biography," by Rev. William B. Sprague. Dr. Dwight married, in March, 1777, Mary, daughter of Benjamin Woolsey, of Long Island, who bore him eight sons.—His brother, **Theodore,** journalist, b. in Northampton, Mass., 15 Dec., 1764; d. in New York city, 12 June, 1846, studied law in New Haven with his cousin, Judge Pierrepont Edwards, and began practice at Haddam, Conn., but removed to Hartford in 1791, and became eminent in his profession. He at one time removed to New York to become the law-partner of his cousin, Aaron Burr, but disagreed with the latter's political opinions and returned to Hartford, where he edited the "Courant" and the "Connecticut Mirror," the organ, in that state, of the Federal party, in which he had become prominent. He was also an active member of a club of young poets known as "the Hartford wits," and is said to have been a principal contributor to the "Political Greenhouse" and the "Echo." In 1806 he was chosen to congress to fill the vacancy caused by John Cotton Smith's resignation, serving till 3 March, 1807, and declining a renomination. While in congress he had several sharp passages of wit with John Randolph. He was a member of the state council in 1809–'15, and secretary of the celebrated "Hartford Convention" of 1814. In 1815 he removed to Albany and established the "Daily Advertiser," but relinquished it after two years, to found the New York "Daily Advertiser," a journal which he conducted until 1836, when, retiring from active life, he removed to Hartford, but returned to New York three years before his death. Mr. Dwight was a brilliant writer as well as able debater. Although he wrote too much and too rapidly for lasting fame, his political articles were bright and spicy, and his satirical and sketchy "New Year's Verses," in the "Mirror," were always looked for with eagerness. Mr. Dwight was a man of unflinching integrity and an outspoken opponent of slavery. In person he was tall and fine-looking. He published a "History of the Hartford Convention" (New York, 1833), and "Character of Thomas Jefferson, as exhibited in his own Writings" (Boston, 1839). The latter is written with a strong Federal bias. An outline of this "Life and Writings" was published by the New York historical society (1846), and a sketch of his character by Dr. Francis appeared subsequently under its auspices.—His son, **Theodore,** author, b. in Hartford, Conn., 3 March, 1796; d. in Brooklyn, N. Y., 16 Oct., 1866, was graduated at Yale in 1814, and began to study theology with his uncle, President Dwight, but illness forced him to abandon it in 1818, and he visited Europe for his health. He removed to Brooklyn in 1833, and engaged in various public and philanthropic enterprises, becoming a director of many religious and educational societies, and being active from 1826 till 1854 in multiplying and perfecting Sunday-schools. In 1854–'8 he engaged with George Walter in a systematic effort to send free-soil settlers to Kansas, and it is estimated that, directly or indirectly, they induced 9,000 persons to go thither. Mr. Dwight was a prolific writer, and at various times was on the editorial staff of the New York "Daily Advertiser," his father's paper, the "American Magazine," the "Family Visitor," the "Protestant Vindicator," the "Christian Alliance," the "Israelite Indeed," and the "New York Presbyterian," of which he was at one time chief editor and publisher. In his later years he was employed in the New York custom-house. Mr. Dwight was familiar with six or eight languages. At the time of his death, which was the result of a railroad accident, he was translating educational works into Spanish, for introduction into the Spanish-American countries. He published "A Tour in Italy in 1821" (New York, 1824); "New Gazetteer of the United States," with William Darby (Hartford, 1833); "President Dwight's Decisions of Questions discussed by the Senior Class in Yale College in 1813–'4" (New York, 1833); "History of Connecticut" and "The Northern Traveller" (1841); "Summer Tour of New England" (1847); "The Roman Republic of 1849" (1851); "The Kansas War; or the Exploits of Chivalry in the 19th Century" (1859); and the "Autobiography of Gen. Garibaldi," edited (1859). He was also the author of numerous educational works.—**Nathaniel,** physician, another brother of President Dwight, b. in Northampton, Mass., 31 Jan., 1770; d. in Oswego, N. Y., 11 June, 1831, studied medicine in Hartford, Conn., and after practising there became assistant surgeon in the U. S. army, and was stationed at Governor's Island, New York harbor. He afterward practised in Westfield, Mass., and New London and Wethersfield, Conn., but in 1812 entered the ministry, and was settled at Westchester, Conn., till 1820. He then resumed the medical profession, practising at Providence, R. I., and Norwich, Conn. Dr. Dwight was one of the first, probably the first, to propose the present system of retreats for the insane. As early as 1812, when demented persons were still confined in cellars, and exhibited like wild beasts, he proposed, in a communication to the Connecticut medical society, the establishment of "a hospital for lunatics." He prepared a school geography, the first published in this country, and was the author of "The Great Question Answered" and a "Compendious History of the Signers of the Declaration of Independence."—President Timothy Dwight's eldest son, **Timothy,** b. in Stratford, Conn., 29 March, 1778; d. 13 June, 1844, was for over forty years a merchant in New Haven, and gave $5,000 to endow the "Dwight professorship of didactic theology" at Yale.—President Dwight's second son, **Benjamin Woolsey,** physician, b. in Northampton, Mass., 10 Feb., 1780; d. in Clinton, N. Y., 18 May, 1850, was fitted for college by his father and graduated at Yale in 1799. He studied medicine in Philadelphia under Dr. Rush and Dr. Physic, and practised in Catskill, N. Y., in 1803–'5, but left the profession on account of his health, and became a merchant in New York and afterward in Catskill. He retired to a farm in Clinton, N. Y., in 1831, and lived there till his death. He was treasurer of Hamilton college in 1831–'50. Dr. Dwight published, in the "Memoirs of the Connecticut Academy" for 1811, the first article ever published in this country on "Chronic Debility of the Stomach," which was highly praised

and republished in England.—Benjamin Woolsey's son, **Benjamin Woodbridge,** educator, b. in New Haven, Conn., 5 April, 1816, was graduated at Hamilton college, Clinton, N. Y., in 1835, and at Yale theological seminary in 1838. He was tutor at Hamilton in 1839–'42, founded the 1st Congregational church at Joliet, Ill., in 1844, but gave up pastoral work on account of failing health, and established a private school in Brooklyn, which he removed in 1858 to Clinton, N. Y., and in 1863 Mr. Dwight removed to New York city. In 1867 he returned to Clinton and devoted himself to literary work, having educated over 2,000 pupils. For five months in 1872 he was editor of the Chicago "Interior." He received the degree of Ph. D. from New York university in 1862. Dr. Dwight has contributed largely to the literature of education, theology, philology, and genealogy, and has published "Higher Christian Education" (New York, 1859); "Modern Philology" (2 vols., 1864); "History of the Strong Family" (2 vols., Albany, 1871); and "History of the Dwight Family" (2 vols., New York, 1874); and has ready for publication (1887) "Higher Culture of Woman" and "The True Doctrine of Divine Providence."—Another son of Benjamin Woolsey, **Theodore William,** jurist, b. in Catskill, N. Y., 18 July, 1822, was graduated at Hamilton college, Clinton, N. Y., in 1840, and studied at Yale law-school in 1841–'2. He was tutor at Hamilton in 1842–'6, and in 1846–'58 held there the chair of law, history, civil polity, and political economy. In connection with his professorship he also established a department of law, and in 1858 was elected professor of municipal law in Columbia college, New York. On the organization of Columbia law-school, he became its warden. Prof. Dwight has made a reputation as one of the most successful living teachers of law. He has given courses of lectures on law at Cornell in 1869–'71, and at Amherst in 1870–'2. He was a member of the State constitutional convention of 1867 and of its judiciary committee, vice-president of the State board of public charities in 1873, president of the State prison association in 1874, and an active member of the New York "Committee of Seventy." On 30 Dec., 1873, Gov. Dix appointed him a member of the commission of appeals, which in 1874–'5 aided the court of appeals to clear its docket. He is an associate editor of the "American Law Register," published in Philadelphia, and several of his contributions have been published separately, including "Trial by Impeachment"(1867). In 1886 he was counsel for five professors of Andover theological seminary, against whom complaints of heterodoxy had been made before the board of visitors, and his argument was published (Boston, 1887). He has also published "Charitable Uses," embodying his researches in the Rose will case, argued in New York in 1863 (2 vols., 1863), and other legal arguments, and wrote the first elaborate report of the State board of charities, exhibiting the abuses of the poor-law system at that time in force. He is author of a pamphlet on the "Influence of the Writings of James Harrington on American Political Institutions" (Boston, 1887), and has edited Henry Sumner Maine's "Ancient Law" (New York, 1864).—President Dwight's third son, **James** (1784–1863), was a successful merchant; and his son, **Timothy,** educator, b. in Norwich, Conn., 16 Nov., 1828, was graduated at Yale in 1849, studied theology there in 1850–'3, was a tutor in the college in 1851–'5, and studied at Bonn and Berlin, Germany, in 1856–'8. In the latter year he was chosen professor of sacred literature and New Testament Greek in Yale theological seminary. He has taken an active interest in the affairs of Yale university, and its financial growth has been largely due to his personal efforts. In 1886 he was chosen the successor of Noah Porter as president, and was formally installed into the office on 1 July, delivering an inaugural address, which was published, with an account of the ceremonies at his induction, in pamphlet-form (New Haven, 1886). President Dwight has been one of the editors of the "New Englander" since 1856, and in 1870–'1 published a series of articles in it on "The True Ideal of an American University," which was afterward issued separately, and attracted much attention. He was a member of the American committee for the revision of the English version of the Bible, from 1878 till its completion in 1885.—The elder President Dwight's fifth son, **Sereno Edwards,** educator, b. in Greenfield Hill, Conn., 18 May, 1786; d. in Philadelphia, Pa., 30 Nov., 1850, was graduated at Yale in 1803, and after teaching in Litchfield, Conn., and acting as his father's amanuensis, was tutor at Yale in 1806–'10. He studied law at the same time, and practised in New Haven with success in 1810–'16. In 1812, a dose of mercury, given him during a fever, caused a painful eruption, from which he suffered all his life. Deciding to become a clergyman, he was licensed to preach in 1816, and was chaplain of the U. S. senate in 1816–'7. He was then ordained pastor of the Park street church, Boston, and continued there till 1826, when he resigned on account of failing health and returned to New Haven, where he engaged in literary work, and conducted, with his brother Henry, in 1828–'31, the New Haven gymnasium, a boarding-school for boys. He was chosen president of Hamilton college, Clinton, N. Y., in 1833, but illness and pecuniary considerations forced him to resign in 1835. He was agent for the Pennsylvania colonization society in 1838, and in the same year removed to New York, where he spent his remaining years "among books by day, and in a lonely boarding-house by night," a prey to the distressing malady that finally ended his life. Yale gave him the degree of D. D. in 1835. Dr. Dwight published "Life of David Brainerd" (1822); "Life and Works of Jonathan Edwards," his great-grandfather (New York, 10 vols., 1830); "The Hebrew Wife," de-

Theodore W. Dwight

Timothy Dwight

signed to show the unlawfulness of marrying a deceased wife's sister (New York, 1836; republished in England); a memoir of his father, President Dwight, prefixed to the latter's "Theology"; and various sermons and addresses. His "Select Discourses," with a memoir by his brother, the Rev. William T. Dwight, D. D., appeared after his death (Boston, 1851).—His wife, **Susan Edwards** (1788–1839), daughter of David Daggett, of New Haven, aided her husband in preparing the works of Jonathan Edwards, and published an "Abridgment of the Memoirs of Mrs. Susan Huntington."—A seventh son of President Timothy Dwight (the first of the name), **William Theodore,** clergyman, b. in Greenfield Hill, Conn., 15 June, 1795; d. in Andover, Mass., 22 Oct., 1865, was graduated at Yale in 1813. He was his father's amanuensis for a year, and was a tutor at Yale in 1817–'19. He then studied law with Charles Chauncey, of Philadelphia, was admitted to the bar in 1821, and practised until 1831, when he decided to enter the ministry, and in 1832 was ordained pastor of the 3d Congregational church of Portland, Me., where he remained till the year before his death. He was one of the most prominent and influential clergyman in the state, and a popular preacher. Bowdoin gave him the degree of D. D. in 1846, and he was for some time one of its board of overseers. Dr. Dwight was frequently moderator of ecclesiastical councils, and a member of many charitable and religious associations. He published sermons and addresses, besides the memoir of his brother Sereno, mentioned above.—An eighth son, **Henry Edwin,** author, b. in New Haven, 19 April, 1797; d. there, 11 Aug., 1832, was graduated at Yale in 1815, and after serving as clerk in the stores of his brothers Benjamin in Catskill, and Timothy in New Haven, studied divinity at Andover in 1823–'4. Feeble health induced him to give up the idea of entering the ministry, and, after studying at the University of Göttingen in 1824–'8, he returned and established, with Rev. Cornelius Tuthill and Nathaniel Chauncey, a weekly magazine called the "Microscope," to which James G. Percival, Prof. Fisher, and President Dwight were occasional contributors, but which was soon discontinued from want of pecuniary support. In 1828–'31, with his brother Sereno, he conducted a boarding-school called the "New Haven Gymnasium." Mr. Dwight lectured in New York and Philadelphia on his European experiences, and just before his death declined a professorship in the New York university. He published "Travels in the North of Germany" (New York, 1826).

DWYER, John H., actor, b. in Ireland; d. in Albany, N. Y., 15 Dec., 1843. He was the son of an Irish gentleman who intended him for the law, but, disliking that profession, he made his first appearance, contrary to the wishes of his friends, at the Theatre royal, Dublin, and met with a success that confirmed him in his love for the stage. After playing in various provincial theatres he appeared at Drury Lane theatre, London, 1 May, 1802, as Belcour in "The West Indian," with great approbation, and was immediately engaged as the light comedian of the theatre. He held this situation for three years, then gave it up, and in 1810 came to this country, where he made his first appearance at the Park theatre, New York, as Belcour, meeting with great success. He made his last appearance on the stage at the National opera-house, on the corner of Leonard and Church streets, 30 May, 1839, in the character of Sir John Falstaff.
